THE OLD JUDGE SAYS...

HENRY: "I've heard that same thing several times lately ... that alcoholics are really sick people. It was news to me. Do you agree with that statement, Judge?"

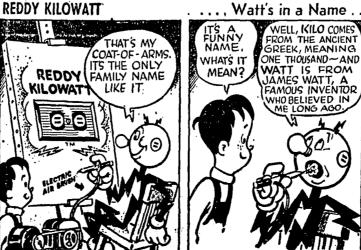

OLD JUDGE: "Yes, it's true, Henry. It's no notion of mine...it's a statement made by scientists who have studied the subject." HENRY: "What did they find out, Judge?"

OLD JUDGE: "Well, as a result of their medical research, they found out that approximately 95% of the people who drink, urink sensibly. 5% do so unwisely, at times. Included in that 5% is the small percentage known as alcoholics.' HENRY: "But why are they called sick

OLD JUDGE: "Because it has been discovered that, in many cases, excessive drinking is a symptom of some physical or emotional maladjustment...not the cause of it."

HENRY: "Now I understand it, Judge. I am glad to hear of the modern approach to this problem and that so much is really being done to help these folks.

PLEASE MILK THOSE cows!!

As of February 1st, 1946, only 63% of the milk cows in the United States were being milked, which was the lowest in 21 years. Some predictions are being made that the shortage of butter will

continue for at least two years. Supplies of butter were at the lowest level reached in almost 25 years. Creamery production was 27% below that of last year and almost 60% below 1943.

In view of the above facts we strongly urge the farmers of this area to milk high grade cows and feed them for the highest possible production.
