### Kendrick Wins From Kamiah

The Valley and South Prairie basketball champions tangled in a close-checking, fast and furious game here Friday evening before a capacity house, with the Kendrick Tigers winning from the Kamiah Kubs 24-23. The Tigers led throughout most of the game, and held a two-point advantage at half-time. Pike, Kamiah center and star, scored ten points to lead his team and the game, while Brocke, with seven, led for Kendrick.

Close checking by both teams (Kamiah using the zone defense and Kendrick man-to-man) kept the score low as neither team was able to make even a fair percentage of field goal tries. Kendrick garnered four points from the free throw line while Kamiah chalked up seven. Lyle Smith, Moscow, was the referee and he certainly had a tough assignment.

In the preliminary B contest Kendrick won 22-17, with Halseth and Dammarell each scoring eight for the winners. Young was high for Kamiah with seven.

Norfolk, Virginia

February 16, 1946

Dear Mac and Bill:  
I am finally getting around to sending you my address as above. I will perhaps be here now until I am discharged, which will likely be this July.

Our squadron (Interpron One) is still intact (what is left of it) as we lose some ten or more each month on points. Our work consists of printing and developing aerial photos, laying mosaics, planning flight lines and possibly a little mapping and interpretation of photos. We are working with a naval photographic squadron and assuredly we are the brains and they fly the planes and take the pictures. Anyway, it is interesting duty and is work related to my previous civilian profession.

This base is on a peacetime schedule of five days a week, so naturally all of us look forward to the week-ends.

Enclosed is a \$2.00 check for the paper.

As always  
Bill Tschantz

Note: Glad to hear from you, Bill, but as for the check, we just don't accept money from men in uniform, so are returning it to you. Thanks just the same.

### EIGHTY-THREE ATTEND COUNTY C. OF C. MEET

Eighty-three members of the Latah Chambers of Commerce sat down to a delicious baked ham dinner prepared by the W. S. C. S. of the Community church last Wednesday evening, and some dozen more came in after the dinner to take part in the meeting that followed.

In front of each plate, as the diners sat down, lay a pound of golden yellow Poflatch Chief butter, in its familiar red, blue and brown wrapper, a gift of the Kendrick Commercial club. And the pleasant remarks which greeted it made the cost well worth while.

Immediately after dinner the group was entertained with musical selections, Beverly Schupfer giving a piano solo; Marilyn Schupfer, violin solo, and Beverly and Marilyn Schupfer and Agnes Baker a vocal trio, all accompanied by Mrs. H. C. Schupfer.

E. M. White, vice-president, presiding in the absence of G. F. Brocke, gave a short talk of welcome to the delegates.

Mr. Yangle, president of the C. of C., responded, thanking all for the fine turn-out, dinner and the butter.

Next, with permission of the Latah Chambers of Commerce, Kenneth Powell, buttermaker in the Kendrick Co-operative Creamery, auctioned off 15 pounds of butter for the benefit of the Living War Memorial Swimming Pool Fund. The purchasers and the amounts paid, follow:

| Total                              | \$387.00 |

Fifteen pounds was the original quota set for the auction, but gifts "back" of the precious yellow spread brought the total pounds auctioned to 22. Kenny Powell may be a rank "green horn or new-comer" to the "auctioneer" game, but we want to say he did a very fine job. The donations thus received are indeed greatly appreciated.

Following the reading and approval of the Minutes of the January meeting, Bill Anderson, mayor of Moscow, was introduced. He gave a short talk, pledging Moscow's aid in securing any reasonable road program that this section might desire.

Mr. Johnson, Boise, state highway supervisor, and James Reid, district highway supervisor, were then introduced. Mr. Reid gave an excellent talk explaining primary and secondary roads. Of the primary roads Idaho has but two, U. S. 95 and U. S. 95 East, and these roads are eligible and will receive the first money available under federal grant — and these highways are badly in need of repair. These roads include the Moscow-Joel, and Lewiston to Kendrick are classed as secondary roads, and as such will, of course, receive "second place money."

Mr. Johnson, Boise, then discussed the "secondary roads" problem. He stated that almost all roads in Latah county were in this category. He explained that the state was far behind in survey work, road repairs, etc. As an example, the five northern counties were served by but three crews. Latah county presented as big a problem as any in the state, as it was third in value, but its "peaty" soil raised construction costs to a high level. He also explained that there would be three times as much federal money for matching purposes as before — but that the state itself would have very little more.

However, for the next three years the state would match on a 38-62 per cent basis if they had to go into the red to do so. He also stated that the Kendrick road construction this year, but the Juliaetta-Kendrick road was not on the program until 1948 (or third year).

Merton Pierce of Texas ridge spoke in favor of turning all the highway districts back to the county, or at least consolidating them into a few, large, rich districts — a move which Mr. Johnson favored.

R. E. Nordby, Genesee, and a county commissioner, stated that he viewed this program favorably, personally, but that it, too, presented many problems that would have to be worked out.

R. E. Emmett of Genesee answered Mr. Pierce. He said he favored the highway districts as it permitted better grouping of machinery and other equipment, and did not force maintenance men to travel long distances to work as they would be required to do under the county system.

Mr. Reid again took the floor and explained briefly federal requirements for road building on secondary roads. Briefly, these are: A 20-foot-wide surface, with a rock mat 6 to 12 inches deep. This mat requirement varying with a laboratory analysis of soil (peaty, semi-peaty, rocky, etc).

### Swimming Pool Fund Grows

Gifts this past week to the Living War Memorial Swimming Pool Fund include the following:

- |                               |          |
|-------------------------------|----------|
| Mr. and Mrs. Arthur E. Foster | \$ 10.00 |
| Southwick                     | 260.00   |
| Butter auction                | 260.00   |
| Kendrick Athletic Club        | 100.00   |
| Total                         | \$370.00 |

Note: A discrepancy of \$187.00 will be noted between butter auction gifts and actual cash reported. This is because checks from organizations giving at the meeting will have to await a future meeting before issuance.

No further excavation work has been done over that reported last week, but two truck-loads of reinforcing steel have been put on the grounds by the Kendrick Auto Freight, and M. C. Halliday is soon to begin the pouring of guide strips and corner keystones.

There were some who said the pool would never be built — that enough money could not be raised — and they would not give until they saw actual work begin — well, it has begun!

# FARMERS

## YOUR HELP IS NEEDED!

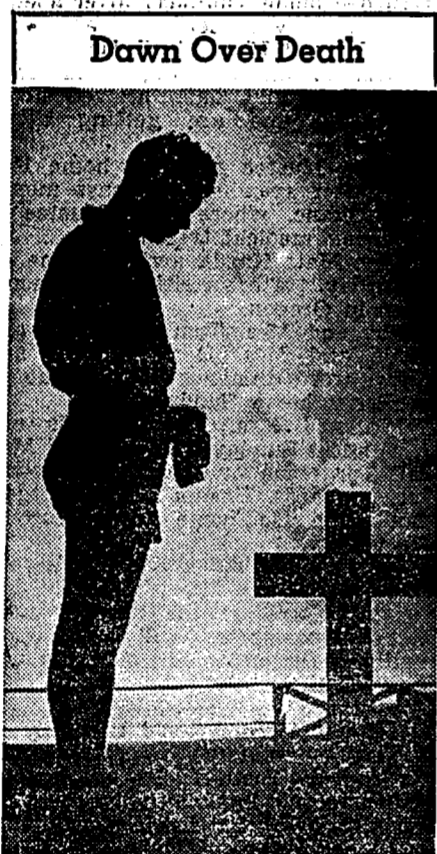

With excavation almost complete and reinforcing steel now arriving, sand and gravel for concrete work on the Living War Memorial Swimming Pool is a **Must!**

Cost of hauling this material from Lewiston would be no small part of its price, and knowing that farmers from this area often go to Lewiston with cattle or other goods and return with empty trucks, the committee in charge is wondering if such truckers could not be persuaded to donate the "empty back haul" to this worthy cause, bringing up sand or gravel — these items to be paid for from the pool fund.

If the trucker so prefers, a "donation credit" for this service will be given him.

If you are willing to aid us in this money-saving effort, contact Jack Kuykendall for a "sand order" before you leave town.

Loading is done from a hopper, and there will be help to unload.

Arlene Brown missed a few days of school last week due to illness. She attends Orofino high school.

The residents in this area of Clearwater county are signing a petition to have the present Lewiston 18th street bridge moved to the mouth of the South Fork at Ahsahka. This bridge is scheduled to be dismantled and replaced with a larger one, but it would be adequate for the traffic at Ahsahka, and would save many miles of driving when going to Lewiston — in fact, eight miles.

Burnham Choate, recently returned veteran of the Pacific, was in Orofino last week on business. He and his wife are living on the Pete Olson place.

Our one-time more than adequate supply of snow has now settled to such an extent that it is possible to get some fencing done — and many are taking advantage of it.

**THE OLD JUDGE SAYS . . .**

**OLD JUDGE:** "Hank, you're a big grain producer... let me ask you a question or two?"  
**HANK:** "Glad to have you, Judge."  
**OLD JUDGE:** "Do you think the grain used by distillers is wasted as some folks are saying?"  
**HANK:** "I certainly do Not! As a matter of fact, it is just the opposite."  
**OLD JUDGE:** "How do you figure that, Hank?"  
**HANK:** "From my own experience and from reports I've read. For the year endin' last June, the distillers produced over 1,200,000,000 pounds of distillers' dried grains... the best feed supplements we can lay our hands on. They are rich in nutrients. Why... I've never had such fat dairy cows, livestock and poultry as I have since I've been usin' these dried grains."  
**OLD JUDGE:** "How do you use them, Hank?"  
**HANK:** "I blend them in with original grain. This balanced ration has far greater feed value than the original grain itself. I can cut down on my whole grain feeding about 20% and still get better results."

### DID YOU KNOW THAT:

- Nearly one-fifth of the total farm income of the United States comes from milk.
- Each year good cows usually produce ten times their own weight in milk.
- An exceptionally good cow may produce twenty times her own weight in milk.
- Other things being equal, the amount of milk a cow can produce depends on the size of her udder.
- Individual quarters may vary greatly in size.
- On the average, the front quarters make up 40% and the rear quarters 60% of the weight of the udder.
- About 400 gallons of blood must pass through the cow's udder for every gallon of milk produced.
- The milk vein on the abdomen is only one of three carrying blood away from the udder.
- Either of the two large veins

can carry all of the blood which enters the udder.

— J. F. Wilkinson.  
There used to appear in the catalogue of a mail order house a picture of a pair of corduroy trousers.

Year after year the picture appeared, together with the description of the pants, and the price, \$3.00. In the 25th year of the ad. the company received this letter: "Dear Friend: The more I been seeing them corduroy breeches, the more I get to wantin' them. If you ain't sold them yet, let me know, and I will buy them."

Wife: "Aren't those chimes beautiful? Such harmony! So enchanting!"

Hubby: "You'll have to talk louder. Those darn bells are making so much racket I can't hear a word you're saying."
