NO. 16

WHAT WILL EMERGENCY HOUSING LAWS ACCOMPLISH

Down in Washington congress has favored emergency housing legislation that will provide the Housing Expediter with \$620,000,000 to use for subsidizing building material manufacturers, and also grant power to underwrite or guarantee a huge market for prefabricated houses.

The United States building and equipment industries are not organized to produce cheap houses, which are in demand. The sights have been raised a little higher in an effort to turn out custom-built houses.

Building material manufacturers are reported to be opposed to government plans that seek to subsidize production. At the same time the manufacturers of pre-fabricated houses are opposed to having the government guarantee their markets.

The row over these questions seems to originate from the determination of the government to manage all building problems, from the cutting down of trees, the sawing of boards in the mills, and putting the houses together.

A Congressman has observed: "Suddenly the industry is limited... fewer dwelling units will be produced than would have been produced if the industry had been given the go-ahead signal with less red-tape wrapped around it."

While a great deal of the home-building troubles are being laid up against the so-called real estate trusts (an no doubt some of them are), an examination of the facts seems to indicate that Washington's formulas are worse, as the price of old dwellings are boosted anywhere from 10 to 20 per cent.

The brief period since reconversion was tackled has not shown expected results, and a lot of new jobs, including housing, are muddled and in confusion.

Majority Leader Alben Barkley said a few days ago that Housing Expediter has power to increase prices, and if he exercises that right without using subsidies that an additional \$500 would be added to the cost of each veteran's home.

A Baltimore newspaper observes that the government program should get the desired housing "with a minimum of disturbance to the rest of the nation's economy."

A Cincinnati paper warns: "By stopping erection of factories and business buildings... the government may be building the veteran a home, but depriving him of a job."

Information For Veterans: Authoritative information and aid in applying for rights and benefits under laws enacted by congress for the veteran will be given at public meetings to be held at focal points throughout Idaho, beginning April 22.

Latest information on vocational rehabilitation and education, loan guaranty, insurance, and other rights will be outlined by members of a five-man crew of VA specialists, the manager said.

In the party will be Lloyd McCarter of St. Maries, Idaho's only living Congressional Medal of Honor veteran of World War II.

Sponsoring Another Dance: The Juliaetta P-T-O is sponsoring another dance for the benefit of the Hot Lunch program in the Juliaetta schools this coming Saturday evening, April 20.

An ad. regarding it will be found in this issue.

EASTER 1946

Light up our way dear God with singing stars, Here in the rapture of the Eastern morn;

Teach us the new song, reft of false-note bars, The song of thanks to Thee for peace re-born.

Help us to find the straight and narrow way, Though it may lead up grim Gogtha's steep;

Plant in our hearts again what e're betide, Seeds that will burgeon in the coming years;

Of thine own deathless love that must abide, 'Mid peace so dearly won through blood and tears.

INTERESTING HAPPENINGS IN AND ABOUT SOUTHWICK

Mr. and Mrs. Foster McFadden of Cream ridge were Sunday visitors at the home of Mr. and Mrs. Henry Davis.

Roy Douglas of Dayton Wn., spent Sunday visiting friends here. Mr. and Mrs. Charlie Harris and family, Mr. and Mrs. Russel Rodgers and Hank and Chris Tschantz were afternoon callers in the Virgil Harris home Sunday.

Mr. and Mrs. J. R. King entertained at dinner Sunday for the following: Mr. and Mrs. Claud King, Mr. and Mrs. Ray King and Mr. and Mrs. Clay King; Mr. and Mrs. Ralph King and baby, Mr. and Mrs. Floyd Russell, Mrs. Bob Stevens and Rollin Russell, the latter group of Lewiston.

Mr. Aaron Wells entertained at dinner Friday evening in honor of her husband's birthday anniversary. Those present were Mr. and Mrs. Rollin Armitage and family and Mr. and Mrs. Wade Candier.

Walter Carman of Lewiston spent Sunday evening with Elmer McCoy. Mrs. Ray Cuddy is visiting in the Rollin Armitage home.

Lou Watson and Elmer McCoy left Monday for the Musselshell, where they will be engaged in logging.

Mr. and Mrs. Wilmer Hanks and family spent Sunday evening in the Foster McFadden home on Cream ridge.

The Homemakers club will meet with Mrs. Tommy King on Wednesday April 24.

Mr. and Mrs. Milton Benjamin called on Mr. and Mrs. Ervin Fry at Cavendish, Sunday.

Mr. and Mrs. Clarence Wilson visited with Mr. and Mrs. Lou Watson Sunday afternoon.

Mr. and Mrs. Howard Southwick entertained at dinner Sunday for Mr. and Mrs. L. J. Southwick, Mr. and Mrs. Lloyd Southwick and son of Lewiston, and Mr. and Mrs. Neal Southwick and daughter of Boise.

Mr. and Mrs. Neal Southwick left Monday for their home in Boise following a visit with relatives and friends here. They returned by way of Oregon. Mrs. Cora Thornton accompanied them to that state, where she will visit relatives.

NEWS FROM LOCAL MEN IN THE ARMED FORCES

Pfc. Frank Loesser, son of Mr. and Mrs. W. H. Loesser, Southwick, arrived home on Wednesday, April 10, from Fort Lewis, Washington, following his honorable discharge from the army on Tuesday, April 9.

Pfc. Loesser arrived in the states from Korea, April 6th, where he had been stationed with the army of occupation.

Frank entered the army in June of 1944, and received his preliminary training at Fort Worden and Fort Lawton, Wash., as a member of the coast artillery. However, as the war crept ever closer to Japan itself, most of these units were transferred into the infantry, and as such Frank left the states in June of 1945, going first to Hawaii and then on to Okinawa, his unit landing there two days after V-J day, but still one day ahead of the official announcement of the cessation of fighting, so he was on that island when the glad news came through officially, and says he will never forget the demonstration put on by the G. I.'s there.

His unit remained on Okinawa until September 8, when they were sent to Korea, landing near Seoul, one of the larger cities in the northern area of that country. His unit (outside of a jeep reconnaissance one) was the first to land on foreign shores in that country. He said that no difficulty, outside of pushing the curious civilians aside in order to make a passage-way was encountered, and the Jap troops there meekly gave up their arms and entered the allotted prisoner-of-war camps.

In speaking of the Koreans Pfc. Loesser said that the men were of larger stature than the Japs, better looking and personally much cleaner, with the reverse being true of the Japs.

The only difficulty encountered at any time with the Koreans was in teaching them sanitation about their homes and business houses, and to use the sidewalks (or marked off pavement areas) when walking, rather than wandering about in the middle of the street, which they had been in the habit of doing. This action, of course, was made necessary by the American military traffic and apparently the Japs had had no traffic worth mentioning.

Frank brought back with him a number of souvenirs, such as coins, shells, pencils, etc. He said that Jap rifles and bayonets were available, but personal transportation of these items by the average G. I. was out of the question. He said that he knew Bud Magee was stationed only about 125 miles away, but since a train was the only means of transportation, and such a trip would require at least eight hours, he was unable to go to see him — and imagined Bud was in the same predicament. Frank went on to say that when they loaded passengers on a train in Korea, they didn't fool around about, they really loaded it — even to the tops of the cars!

Frank left Korea on March 25, landing in the states April 6, the trip taking just 12 days, which was pretty good time.

His plans for the future are rather indefinite, but for the time being, at least, he is going to stay out on the ranch and get caught up on his eating and sleeping.

Cpl. D. E. (Gene) Mattoon arrived home from army service with his honorable discharge papers on Saturday, April 6, after spending two years, five months and three days in army service, being stationed during this time at camps in California, Texas, Louisiana and New York. Gene entered the army Army Corps, was transferred to a reconnaissance unit — and wound up as an army mail clerk at Camp Shanks, New York.

Gene said of all the camps he had seen during his army duties, he preferred Camp Shanks, not for its climate or duties, but because it offered the best recreational facilities when off-duty. His chief pleasure, he said, was roller skating, and there was a big rink near the camp.

For the present, Gene will stay with his wife and son at Lewiston, where she has been employed during his absence, beyond that his plans for the future are indefinite. However, he still expects to retain his home here at Kendrick.

Mr. and Mrs. August Brammer, Cameron, have received word from their son, Harold, with the army of occupation in Japan, that he had been promoted from Corporal to Sergeant.

Cpl. Wallace Fraser arrived home last Friday night from the Portland Army Air Base, bringing with him his honorable discharge papers.

Wally Newman has written his parents, Mr. and Mrs. Fred Newman, that he has arrived safely in Korea, where he will be stationed with the army of occupation.

Take Pre-Induction Physical: Maurice Long, Buck Langdon and Donald Brown left here Thursday morning for Spokane to take their army pre-induction physical examinations. They were joined at Moscow by Jordan Kanikkeberg and Bob Watts, who went on to Spokane with them for the same purpose.

Bakken Circle To Meet: The Bakken Circle of the W. S. C. S. will meet at the home of Mrs. J. G. Travis on Friday, April 19, at 2:00 p. m. All are cordially invited.

PERSONALS AND NEWS ON AMERICAN RIDGE

Red Cross will meet this Friday afternoon with Mrs. Ada Cain. It was postponed last Friday to permit members to attend funeral services for the late J. E. Helpman.

Tom and Peggy Cox were Sunday visitors in the home of Mr. and Mrs. Bruce Glenn. Mr. and Mrs. Walter Hartung and family of Juliaetta were evening callers.

Mr. and Mrs. Robert Cain were Moscow callers last Friday. Mr. and Mrs. John Wilson and family of Troy spent the week-end at the Robert Cain home. John went on to Lewiston to see his father, "Scotty" Wilson, and reported him as getting along fine, being up and around the hospital.

Carroll Mattoon spent the week-end with Dorothy Dammarell in Kendrick. Mr. and Mrs. Ray Knutson and daughter were Friday evening supper guests of Mr. and Mrs. Perry Mattoon.

George Davidson, Moscow, is building a new chicken house on his ranch, for Mr. and Mrs. Perry Mattoon.

Mr. and Mrs. Geo. Havens and family were Sunday dinner guests of Mr. and Mrs. Carl L. Wegner in Pullman. The dinner honored Mr. and Mrs. Havens 12th wedding anniversary and Mrs. Wegner's birthday anniversary. Other guests were Mr. and Mrs. Ira Havens of Moscow, Mr. and Mrs. Delbert Hoffman and daughter Diana of Leland, Mr. and Mrs. Harold Hansen of Pullman and Mrs. Alvina Groh of Spokane.

Mrs. Henry Wendt returned home with Mr. and Mrs. Geo. Havens from Pullman Sunday evening, after having spent the week-end with her daughters, Marjorie and Esther, in that city. Her husband met her at the Havens home, and remained for a short visit.

Mr. and Mrs. Perry Mattoon entertained at a dinner honoring Mr. and Mrs. Harry Benscotter's 20th wedding anniversary, Wednesday.

Mr. and Mrs. Andy Cox, Mr. and Mrs. Walter May and Manning Onstott were callers at the Eichner home one day last week.

Buddy Langdon was a Sunday guest of Mr. and Mrs. Frankie Benscotter. Bruce and Dora Dee May were Sunday evening visitors at the Harley Eichner home.

Mrs. Dot Stanton of Colfax spent last week with her daughter, Mrs. Harley Eichner and family. She is spending this week in Spokane.

Mrs. Harley Eichner attended the Happy Home club on Big Bear ridge last Friday, and gave a brief talk on the Cancer drive.

Mr. and Mrs. Andy Cox went to Kellogg last Thursday, remaining until Sunday in that city, visiting relatives.

Newt. Morey of Big Bear ridge was a Sunday dinner guest of Mr. and Mrs. Ed. Kent, and also so see his son, Mickall, who is staying with his grandparents. All drove to Moscow in the afternoon to see Mrs. Morey and tiny son, who are in the Gritman hospital.

Donald and Dale Yarnell of Moscow spent the week-end with Mr. and Mrs. Wayne Davis.

Mr. and Mrs. Frankie Benscotter were Lewiston visitors Friday.

Mrs. Wayne Davis went to Pullman Tuesday, going after her brother, Bill Fockler, and his English bride, who arrived last week. They will visit a few days in the Davis home.

Mrs. Frankie Benscotter and Mrs. Wayne Davis were in Lewiston on Monday. Larry Langdon did some spading for Mrs. Ida McAllister Tuesday evening.

About The Swimming Pool

Latest donations toward the Area Living War Memorial Swimming Pool show:

M. L. Rathbun \$ 5.00 Frank Castor, Kennewick 10.00 L. A. Wallace 5.00 Joe and Edwin Forest 25.00

Total \$45.00

Of general information we can say: The lumber for the forms is here and piled in the park ground; the reinforcing steel is on the ground; the big steel drain pipes are here and a ditch is now being dug for their connection with the sewer; the pumps are here, together with one motor, one motor remaining to be purchased; the sand and gravel (or as much as storage room permits at this time) is here and awaiting their use.

With slightly dryer weather the hand shaping of the completed excavation can be done and "footage forms" erected and concrete and retaining steel set into them.

FINAL RITES HELD FOR J. B. HELPMAN, TRUE PIONEER

Final rites for J. B. Helpman, Kendrick pioneer, were conducted at 1:30 p. m. last Friday afternoon from the Vassar-Rawls chapel, Lewiston, with the Rev. Frederick Belton officiating. Hymns were sung by Miss Maxine Beach, accompanied by Mrs. Volney Miller, organist.

The chapel was filled with old friends, and the many beautiful flowers attested to the high esteem in which Mr. Helpman was held.

Interment was in the Kendrick cemetery, where the I. O. O. F. lodge had charge of the grave-side rites. Honorary pallbearers were Frank Roberts, David Gentry, F. E. Stookey, Norris Walker, R. A. Peterson, R. L. Higgins and H. M. Slocum; active, Ira Foster, A. A. May, Fred Gladden, Bernard Jones, Edgar Long and John Galloway.

John Barton Helpman, who passed away April 9th, 1946, at the St. Joseph's hospital in Lewiston, was born in Hancock County, Ohio, Nov. 19, 1855. He came west in 1889 and located in Oregon. Two years later he came to Idaho, and located in Kendrick, being among the earliest settlers. At the time of his arrival very few buildings had been erected, and the railroad had only been built as far as Juliaetta.

In 1891 he was married to Miss Grace Wilcox, daughter of Mr. and Mrs. Bela Wilcox, Moscow.

Mr. Helpman was engaged as office manager for Haislip and Norcross, Mannie Kaufman and the Lincoln Hardware for many years. During this time he lived on a ranch near town, which he homesteaded about 1896, making it the family home until 1909, at which time they purchased and moved into the G. W. Suppinger home.

In the year 1914 the family moved to Northport, Wn., where he engaged in the banking business, retiring and moving back to Kendrick in 1924.

After the death of Mrs. Helpman on October 7, 1938, he spent his summers in Kendrick and the winters with his children in Lewiston.

Mr. Helpman is survived by his son and two daughters, Hugh Helpman and Mrs. Gregory Eaves, Lewiston and Mrs. E. P. Roberts, Kendrick. Two grandchildren, Hugh Helpman, Jr., Lewiston, and Betty Boyd, Moscow, and one great-granddaughter, Susan Margaret Helpman, Lewiston, also survive.

Mr. Helpman had been a member of the I. O. O. F. lodge for 63 years, and at the time of his death was the oldest member in Idaho, holding the "Diamond Jubilee" pin.

Hecht-Benjamin Nuptials: Miss Velma Hecht, daughter of Mr. and Mrs. W. E. Hecht, Kendrick, and Richard Benjamin, son of the Rev. G. W. Benjamin, Clarkston, were united in marriage Wednesday, April 10, at 3:00 o'clock in the home of Mr. and Mrs. D. E. Clear, Clarkston.

The double-ring ceremony was solemnized by the Rev. Benjamin in front of the fireplace, which was beautifully decorated with spring flowers and candleabra.

The bride was attired in a two-piece dress, with a corsage of white gardenias and pink rosebuds. The bridesmaid, Miss Leila Riley, wore a suit with a corsage of white carnations.

NEWS ITEMS ABOUT LELAND RESIDENTS AND FRIENDS

Mr. and Mrs. Jesse Thornton and family were Sunday dinner guests of Mr. and Mrs. George Baugh at Orofino.

Melvin Flesham spent several days with his sister and family, Mr. and Mrs. Lloyd Craig, last week.

Gerald Daugherty of Lewiston spent the week-end with his grandparents, Mr. and Mrs. Jesse Daugherty.

Jesse Heffel was a Sunday dinner guest of Mr. and Mrs. Roy Craig. Virgil Flesham was a visitor at the Lloyd Craig home Friday and Saturday.

Mr. and Mrs. Claud Cook and son Roger of Lewiston were Sunday dinner guests in the home of his mother, Mrs. Emma Cook.

Mr. and Mrs. Ted Weyen, accompanied by Marvin Silflow, were Spokane visitors on Tuesday.

Mr. and Mrs. Orval Walker and sons of Lewiston were over-night guests of Mr. and Mrs. Oney Walker recently.

Mrs. Chas. Hoffman called on Mrs. Lloyd Craig Friday afternoon.

Mr. and Mrs. Harold Parks and family were Friday evening callers in the home of Mr. and Mrs. Gordon Peters.

Rev. E. Bishop was an over-night guest in the home of Mr. and Mrs. Ben Hoffman, Sunday night.

Mrs. Lloyd Craig and daughters, Virgil and Melvin Flesham and Mr. and Mrs. Orval Walker and sons were Sunday dinner guests of Mr. and Mrs. Oney Walker.

David Hudson spent the week-end with his grandparents, Mr. and Mrs. A. G. Peters.

Ervin Draper accompanied Lloyd Farrington to Spokane on Monday.

Mrs. Donald Morgan and son Roger of Lenore attended Club on Tuesday at the Lloyd Craig home.

Mr. and Mrs. Elwin Flesham and son Ronald of Clarkston were Sunday afternoon callers in the home of Mr. and Mrs. Oney Walker.

Mrs. Lloyd Craig entertained the Leland Homemakers club on Tuesday. The day was spent in quilting. Mrs. Gordon Peters was the assistant hostess.

Harry Flaig, Portland, was a guest of his sister and family, Mr. and Mrs. Harold Parks, Sunday.

Leland School Notes: Students having a perfect attendance record for the six-week period ending April 12, were: Keith Thornton, Darlene Peters, Howard Wolff, Barbara Silflow, Stanley Smith, Kathleen Crawford, Charles Parks, Luther Parks, Hermina Meyer, Betty Parks, Glynis Thornton, James Thornton, Arlene Glenn, Edwin Corkill, Nina Dagefoerde, Norman Silflow, Herman Hinrichs, Jeanette Cridlebaugh, Walter Wolff, Teddy Meyer, Norma Dagefoerde, Mary Ann Glenn, Marlene Silflow, Marcella Craig.

4-H Club Organized — Loren Kamritch, Nez Perce county 4-H agent of Lewiston, and Leonard Wolff, met during the Thursday noon recess period with the boys and organized a local 4-H club with Mr. Wolff as adult leader. Boys enrolling were Keith Thornton, Howard and Walter Wolff, Stanley Smith, Luther Parks, James Thornton, Charles Parks, Ernest Heimgartner and Teddy Meyer.

INTERESTING NEWS NOTES FROM KENDRICK SCHOOLS

Assignment-Tomorrow
This excellent film, put out by the National Education Association, primarily for the P-T. A. and other civic organizations, was presented Monday evening to an audience of four people, two of them teachers.

The theme of the picture dealt with the aspirations of a war veteran for the youth of tomorrow, and how this building of a better world depended upon the parents, teachers and civic organizations. It featured especially the part played by the teaching profession in this building of a post-war world. An analogy was made with the type of education we are endeavoring to promote with that of Germany and Japan. However, the need was seen for better equipment, facilities and buildings in order that our principles of education and philosophies of life might better be instilled into the hearts and minds of our youth, and in order that youth might better prepare himself for his life work.

The need was also seen for better salaries for teachers, commensurate with other people rendering a similar service. Possibilities were seen for further state aid as well as Federal support for education through more initiative on the part of all.

This N'That
Our trophy case has finally arrived and enduring the admiring glances of students. Two new glass-enclosed bulletin boards have also arrived.

The Junior-Senior banquet was attended by 53 people. Over the traditional candlelight, a delicious meal was enjoyed, as well as an interesting program. Six sophomore girls served efficiently. Dancing followed the banquet.

Educational films shown this week were "Brazil" and "Colloids."

Fifth And Sixth Grade News
The fifth and sixth grades contributed \$2.40 toward the Cancer Drive.

New class officers for the final nine weeks of school are: David Crocker, president; Parker McCreary, vice-president; Billy Bamberry, secretary; Max Shreffler, Burton Souders and Lee Jones, librarians.

Penmanship Contest
The first four grades are entering the National Penmanship Contest for Little Folks. The entry fee is 7c per participant. Entries must be submitted from at least 50 percent of the pupils. Contest papers must be sent to arrive on or before April 27th to "The National Board of Examiners, Penmanship Research Center, Bridgeport, Ill."

Primary Room News
The first, second, third and fourth grades cleaned the school yard last Thursday afternoon.

Mrs. George Brocke visited the Primary room Wednesday afternoon. Mary Lee Westendahl, Phyllis Hudson and Patty Candler visited the first and second grade room on Tuesday of this week.

Jack Dillon, who is in the second grade, is ill with the measles.

Entertain Basketball Team
The Kendrick basketball team, Northern Division champions and state runners-up, were honored with a chicken dinner in the home of Mr. and Mrs. J. G. Travis last Wednesday evening, with Mr. and Mrs. Herman Travis as assisting hosts. Other guests were Coach and Mrs. Ross Armitage and the yell leaders.

Interested In First Aid?
Mrs. Roy Ramey, local Red Cross chairman, has received word from Moscow stating that a First Aid class would be given here, if there was enough interest shown.

Anyone wanting to take this course, please call Mrs. Ramey at 673. Monday is the deadline.

Repainted Building Front
The Kendrick Gazette is sporting a new coat of paint on the front of its building, put there last week-end by Clarence Perryman.

The whole block now presents the same color fronts.

Ammonium Nitrate or Nitrogen for Hay

Proper Application to Increase Tonnage Urged

Farmers can increase their hay production from three-quarters to one and one-half tons per acre by applying ammonium nitrate or other nitrogen fertilizers as a top dressing in April or early May, according to Prof. C. J. Chapman of the soils department of the University of Wisconsin.

Professor Chapman recommended the use of 150 to 200 pounds per acre of ammonium nitrate on timothy and other grassland meadows. In addition to increased yield, the fertilizer treatment improves the protein content and feeding value of the hay, he added. Professor Chapman declared that ammonium nitrate is excellent as a treatment for grassland pastures, since it greatly increases milk production and provides a week's earlier grazing.

The value of ammonium nitrate and other nitrogenous fertilizers as

This Raleigh county, West Virginia, farm has proven value of fertilizers to the hay fields.

a top dressing for pastures and hay fields was demonstrated.

Most of the treatments were at the rate of 200 pounds per acre, with a few at 150 pounds and one at 400 pounds. The average profit for all the demonstrations, over and above the cost of the fertilizer was \$18.82 per acre.

Professor Chapman pointed out, however, that the continuous use, year after year of ammonium nitrate or any other straight nitrogen fertilizer will eventually result in the depletion of the available reserves of lime, phosphate and potash in the soil.

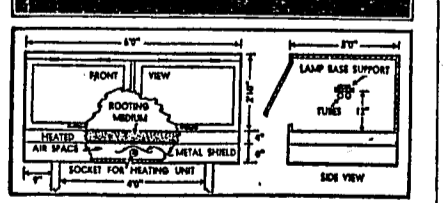

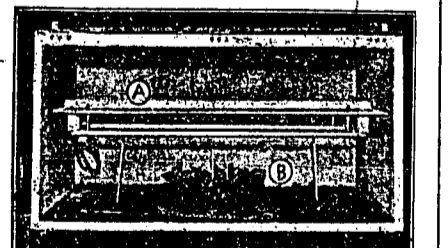

"It is therefore recommended," he said, "that the mineral reserves of the soil be maintained through the application of lime, phosphate and potash fertilizers, together with the systematic use of stable manure."

Improved Machinery Harvester Control

Combine can be made into a one-man machine by the installation of an electric harvester control placed on the market by the Gleaner Harvester corporation, Independence, Mo.

The moving part of the lift consists of a lead screw which is turned by the electric motor. As this screw turns in either direction, a large nut follows it up or down, thus raising or lowering the harvester unit.

Fluorescent Hotbeds

A hotbed in which plants may be started in the basement, barn or any other building has been developed by Dr. V. T. Stoutemeyer and Albert W. Close of the USDA.

The diagram (a) is the fixture and reflector holding two 40-watt fluorescent lamps, and (b) the trays or flats in which seedling plants are grown.

'1080' Super Rough-On

Rats Become Available
The DDT of the rat world, the new chemical rat-killer, has recently been released from wartime duty. This product, "1080" was developed by the U. S. Fish and Wildlife Service and the Wildlife Research Laboratory. The poison is sodium fluoroacetate. It has been proven to be the most deadly stuff ever tried out on rats. But it will also kill any other animal. It is now available for release.

Unsung Hero Aided in Food Standardization

Among the unsung heroes was Paul M. Williams who died recently after long service with the department of agriculture as a food researchist.

To Paul M. Williams the American public owes the development of U. S. standards of quality for many canned, frozen and dried foods. The reason you can buy a can of grade A peaches in Dallas, Texas . . . another at Portland, Ore. . . and a third at Boston, Mass. . . and find them all the same in quality, though they were of three different brands . . . is partly because of Williams' untiring efforts.

Back in 1918, Williams left private business with his father to take a job with the department of agriculture, supervising the grading of fruits and vegetables for army use. He took it because it was described to him as a "war emergency assignment." By the time the emergency was over he was very greatly interested in grading and food standardization work — and he stayed on and on.

So it was that World War II found him again at army food inspection work, this time as a supervisor of a large and widely scattered group of men. He survived two world wars and then died at Temple university hospital at the age of 55. His friends say he was as much a war casualty as his son who fell on Iwo Jima.

Organize Work to Save Sewing Time

Much of the time spent sewing is wasted because of lack of organization, say extension clothing specialists. While long, uninterrupted blocks of time for sewing are the most productive, it is possible to save time and steps when sewing intermittently. The first time saver is a sewing corner, where all materials and equipment can be assembled and not need to be put away after each sewing period. A sewing corner should include a sewing machine, work table, a well-organized cabinet or box for small sewing equipment, patterns and other supplies, pressing equipment, a dress form if you have one, and a full-length mirror. Lighting conditions should be the best available with light coming over the left shoulder of a right-handed person. After the sewing equipment is arranged, the home sewer will find that these following small items are big time savers: A cabinet, box or drawer that can be placed at the side of your favorite sewing chair, to keep small tools in order and easy to reach without rummaging around. Tweezers for pulling bastings and thread ends caught under stitches or in the machine. Needle threaders for hand and machine needles may be worthwhile if you have trouble seeing the "eye."

Corn Research

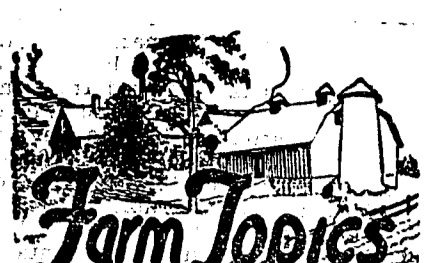

At least four research projects now in progress in the other Americas to develop higher-yielding corns for use there are being aided by United States scientists. The importance of developing improved corns in the other Americas can be seen from the fact that the use of hybrid corn in the United States during 1942-45 increased production by 1.8 billion bushels — worth more than 2 billion dollars. In Costa Rica three research projects are being carried on by the food supply division of the institute of inter-American affairs, an agency of the office of inter-American affairs, by the inter-American institute of agricultural sciences, and by the Goodyear Rubber company plantation. In Venezuela two United States government specialists on corn are carrying on experimental work to develop corns of high quality. One of them is the agricultural attache and the other is a corn specialist of the United States department of agriculture.

Drink More Milk

According to the department of agriculture, the average consumption of milk and cream per person in the United States during the decade from 1930 to 1939 was less than 325 pints per person, or less than .89 of a pint per day for each individual. By 1943 milk and cream consumption reached 374 pints, the first time the American people had ever consumed more than a pint per day each. The next year this consumption climbed to 392 pints, or 1.07 pints daily. The latest department estimates are that milk and cream consumption reached another high in 1945 with 411 pints for the year per person, or 1.10 pints per person daily.

Peanut Butter

Dry peanut butter is becoming a thing of the past. Much of the peanut butter you buy today has been treated in such a way that the oil will not separate easily. That's only one of the improvements made in the manufacture of peanut butter in the last year or so. With improved techniques in the preparation of the product, it is much less likely to get rancid. Another type of peanut butter, still in the experimental stage, is one in a molded form that can be sliced for sandwiches. As a result of demands for such a product, it is reasonable to expect it on the market before long.

Soil Proven Cause Of Cattle Disease

Cobalt, Iodine, Copper Deficiencies Found

Recent investigations conducted by the American Veterinary Medical association has pointed a way to better health among farm animals. Many livestock diseases have been traced directly to the soil of fields and pastures.

A wasting-away condition found in many localities has been traced to

Carnation Ormsby Madcap Fayne could never have established her record on a pasture deficient in proper elements.

a deficiency of the earthy element called "cobalt." In every case, this condition was remedied when top dressing of superphosphate, containing less than a tin-cupful per ton, was applied to the land.

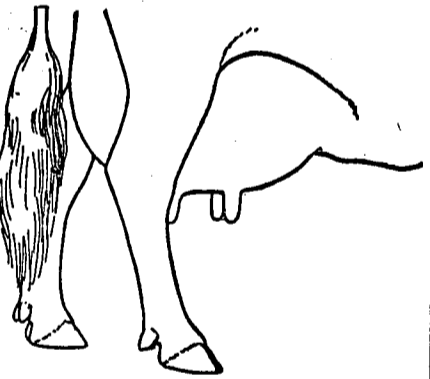

Lack of iodine in the soil and water often causes prenatal goiter and stillbirth in all species of animals, as well as poor hatchability of eggs.

Sway-back has been traced to a lack of copper in the soil. As little as two tablespoonfuls of copper salt mixed with each hundred pounds of salt lick will do away with the sway-back trouble.

Deficiencies of manganese, of phosphorus, zinc and calcium may also be responsible for mysterious losses among flocks and herds which are apparently given good care and feeding. A suggested remedy is a soil survey followed by the addition of the missing element in the manure or fertilizer applied to the soil.

Selection Prevents Broken Down Udders

While there is no known cure for a cow with a broken down udder, they can usually be prevented by proper breeding selection. Weak udders are inherited. Some strains have them more than others. In selecting foundation stock breeders should choose only cows whose udders are so well attached that there is little likelihood that they will

When selecting dairy cattle for breeding, special attention must be paid to udders.

break down for several years. There is always a danger of break down caused by severe injury.

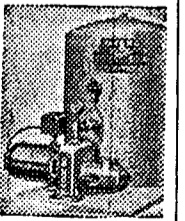

At the first suggestion of an oversized udder, calf heifers should be fed lightly on grain, substituting bran or other laxative feeds for most of the carbohydrate feeds, such as corn and barley.

Other beneficial steps are milking before freshening, as soon as the udder gets large, and three times a day milking of the heavy producers for several weeks after freshening.

Improved Machinery Water System

This new water system is so designed that the same pump may be used for either shallow or deep well service. Made by F. E. Myers & Bros. Co., Ashland, Ohio.

If the water level changes, the pump is quickly converted by removing tap bolts with ordinary tools and attaching simple fittings.

Popcorn Promises Real Return in Many Areas

The American appetite for popcorn is expected to continue strong for some years to come. While the profit from popcorn is not fabulous, the growing of the crop is "very little extra trouble." It is possible to secure contracts for the raising of popcorn for seed purposes. North Carolina farmers report that they have been receiving from 10 to 12 cents a pound for their popcorn.

UNITE to CONQUER CANCER...

Cancer strikes and kills more children than infantile paralysis. You can do your part — united effort will win.

POTLATCH FORESTS, INC.

LEWISTON • POTLATCH • COEUR D'ALENE • HEADQUARTERS • BOYLL • OROFINO

Yes, he does ride cheap!

RIDING THE RODS or running a business, it's easy enough when you don't have to pay the freight. You simply get a free ride at somebody else's expense.

Maybe you run a store or service station or dress shop. Would you like to have a next-door competitor who has little or no rent, or taxes, or interest to pay, and who is kept in business partly by your tax money?

Yet this is what happens with government and municipal electric power systems. They are not required to pay federal taxes; often get money from the public treasury at little or no interest; make up losses out of your pocket as a taxpayer.

Meanwhile, on the average, America's business-managed electric companies turn back to the people as taxes about 25c out of every dollar received. And these companies—owned and operated by millions of folks like you—meet all other obligations without benefit of special privileges.

Better yet—at a time when most things cost more—business-managed companies still deliver electricity at low pre-war prices. This record is your assurance that cheap, plentiful, dependable electric power will be yours in the era ahead.

Help The Broken Bones Knit

An illustration of how industrial research frequently makes an unforeseen contribution to human welfare in fields far removed from that towards which the research was directed, is afforded by the development of a new type of fracture cast. For nearly a century the medical profession has recognized that the plaster-of-paris cast, invented in 1852, possessed certain disadvantages, notably heavy bulk and poor penetrability of X-rays. In spite of this general recognition, little progress in developing a better cast was made until Dr. Roger Anderson of Seattle a short time ago conceived the idea of a light-weight plastic cast.

Permanence of dimensions under changing moisture conditions—that is, absence of stretch or shrinkage—was one of the basic requirements for the cast. For a time this presented a difficult problem, but it was solved by employing a glass yarn developed in research laboratories for use in weaving industrial service fabrics. The glass filaments composing the yarn can not absorb moisture, and therefore do not shrink or stretch when they are wetted, or when they dry out after a wetting.

Fiberglass yarn and cellulose acetate yarn were knitted in the form of a soft, flexible bandage that can be immersed in a setting liquid before it is applied. After the setting liquid has dried the resulting cast has a silky interior finish. The open mesh provides free circulation of light and air, making the cast cool to wear. The cast weighs only one-fourth to one-sixth as much as an equivalent plaster cast and does not block X-ray penetration. A patient can move about and even bathe while wearing it.

Fiberglass is inert so far as body tissues are concerned, and the other minerals likewise have been chosen for their non-toxic and non-irritant characteristics. The cast can even be placed safely over open wounds. Before any public announcement was made it was successfully tried out on a substantial number of hospital patients. Today it is providing previously undreamed of comfort and freedom of movement for many patients suffering from fractures or other injuries requiring immobilization of the part affected.

Food Values

During the war a surprisingly big percentage of draftees in both England and the United States were rejected for causes arising from malnutrition. This does not mean that these men were underfed, especially not the Americans, but rather that they had been improperly fed. In other words, they did not keep their diets properly balanced.

Not many years ago people in general thought that the amount of food they consumed determined how well fed they were. But discoveries of comparatively recent months have brought out the fact that the nutritional value of food is more important than mere quantity.

In those European and Asiatic countries where the quantity and

variety of food is definitely limited, malnutrition on a large scale is not surprising. But in America there is little excuse for it since we produce almost every conceivable kind of food right here in our own country. And what is equally important, we have the world's most efficient distribution system to bring the food to the consumers. The many thousands of independent grocers who so faithfully serve their communities in small towns and large centers form the very heart of that distribution system—not the chain grocers.

These progressive independents have done much toward providing better products at lower prices for their customers—through active, individual competition.

So America's nutritional needs do not call for more food but for better use of the supplies daily available. This can be done only as the public becomes more familiar with real food values. Hence, along this line there is need for public education. To eat well, we must know what to eat.

Capital And Labor

The wave of strikes which this nation has been experiencing is often referred to as a conflict between labor and capital. But the fact is that in America it is pretty hard to draw a line between the two because in many respects they are identical.

The man who spends less than he earns and puts his savings in a bank or in government bonds or buys a share of stock, creates capital. So while he may be a laborer, he is also a capitalist.

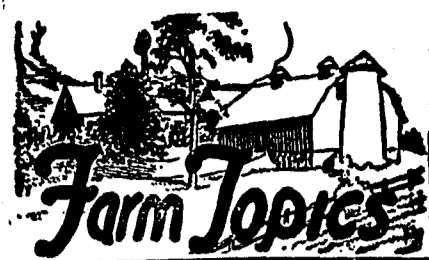

American industry today is very largely financed by the savings of millions of our citizens, many of whom have comparatively small incomes, but who save carefully and invest wisely. Few, indeed, are the large enterprises that do not have thousands, or even tens of thousands of stockholders. As one example, the business-managed electric light and power companies which provide more than four-fifths of the nation's electricity, are owned by a vast number of persons, some having but one or two shares of stock.

The capital supplied by this army of stockholders has not only put the comforts and conveniences of electricity within the reach of the average householder, but has furthered the development of many industries, increased their efficiency and raised their productivity.

The American economic system is a so-called capitalistic system. It is not a perfect system, but it has produced higher wages, lower prices, better products and better living conditions than any other system ever devised.

Labor's part in this capitalistic system is just as vital as that of capital itself, and in the final analysis, the interests of capital and labor are not divergent, they are very much the same.

Trade with home merchants—they know you, you know them. They offer honest values.

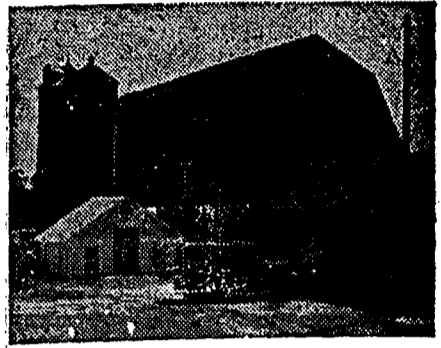

Aluminum Paint to Improve Old Farms

Delay Deterioration By Proper Painting

One of the most common tell-tale signs of deterioration on the farm is blistered and peeling paint. Yet, paint does remain one of the quickest and most practical of "repair" materials and the best way of stopping deterioration.

The average farmer does not repaint his service buildings oftener

Paint adds to life of building.

than every 10 years. Cheap white paints will not last that long.

Aluminum paint is recommended for agricultural uses because it can be applied satisfactorily to almost any kind of paintable surface. It serves equally well on steel, wood, brick, concrete, plaster, wallboard, galvanized iron, asphalt roofing and even canvas.

Aluminum paint is an effective temperature reducer. A coat on the roof of an uninsulated building will reduce the interior temperature of that building by as much as 10 to 14 degrees. The reduction is effective in a chicken coop, hog house, dairy barn, milk or egg building or the home. Because aluminum paint reflects approximately 70 per cent of the heat striking it, roof temperature as high as 140 degrees can be reduced to 95 or 100 degrees.

Because of its high moisture-proofing powers and its ability to withstand washing as well as constant exposure to steam, fume and other corrosive agencies, aluminum paint has long been widely applied in dairies and similar plants. It is also used to protect all kinds of farm equipment and machinery.

Catch Boring Waste

Cup on Brace Catches Borings from Overhead.

When using a brace and bit to bore a hole in wood that is overhead, and prevent the borings from falling into the eyes, a funnel may be utilized. The bit extends through the funnel, giving it freedom, but holds the cup in place.

Postwar Machinery Track Tractors

Postwar farm tractor, designed by B. F. Goodrich, combining the sleekness of a racing auto and the rugged track-laying ability of the famous military half-track. The self-track-laying tractors move at high speed on highways, and are said to have a drawbar pull nearly twice as great as that of wheels and exert lighter pressure per unit of ground contact which reduces soil packing.

Saves Apples by Air

By applying the principle of the gas mask to protect apples in storage, apple growers may save thousands of dollars annually, according to research work conducted at Cornell University.

The conditioning prevents storage apples from developing a "scald" disease, which causes the fruit to become unsightly and to lose market value. One of the greatest problems of apple storage has been the formation of gases causing damage.

Cancer Kills Many

Cancer, one of the oldest and greatest killers of men, women and children, claimed the lives of 496 Idaho people during 1945, to become the second highest cause of death in the state, says a Boise dispatch. Of the total who died from the disease, 274 were males and 222 were females, with the ages running from less than five years to 85 and over. The Vital Statistics division of the Idaho Department of Public Health revealed that of the total deaths, 231 were caused by cancer of the digestive organs. Unfortunately no part of the human body is immune to cancer, which is best described as an uncontrolled growth of cells. These cells have rightfully been called "gangster cells" because of their total disregard for the law and order within one's body. Ever since mankind has attempted to keep records of some sort of the diseases which struck him, cancer has consistently been recorded and history tells us that cancer is one of the oldest of diseases and always has been one of the greatest killers of man. It has no respect for any person regardless of class, age or country. The danger signals of cancer are: Any sore that does not heal, especially about the tongue, mouth or lips; a painless lump or thickening in the breast, lips or tongue; irregular bleeding or discharge from any body opening; progressive change in color or size of a wart, mole or birthmark; persistent hoarseness, unexplained cough or difficulty in swallowing; any changes in normal excretion habits and persistent indigestion.

The more an individual talks the easier he gets fooled. Buy it in Kendrick — it's your home town and mine.

NOTICE OF SALE OF TRUCK The Village of Kendrick will accept sealed bids until May 1st, 1946, for the sale of one Model A Ford truck, 1 1/2-ton, in "As Is" condition. Bids will be opened at the next regular Council meeting, which will be May 1st, at 8:00 p. m. Truck may be seen at City Hall lot.

FLOYD MILLARD, Village Clerk.

Has Spring "Sprung?"

A popular pastime these days is wondering if spring has really come. The warm days and sunshine of last Friday, Saturday Sunday and Monday brought many a case of spring fever out into the open — but by Tuesday a coat again felt quite comfortable. It is still too wet here in the canyon for making gardens, and of course plowing on the ridges is still out of the question. On American ridge Frankie Benschoter reports about two inches of mellow soil on top, and below that the gooiest of mud. Reports from other ridges indicate the same situation.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Joint Common School District No. 24, Latah County, Idaho

NOTICE IS HEREBY GIVEN, That the annual school meeting of Joint Common School District No. 24, County of Latah, State of Idaho, will be held on Friday, the 19th day of April, 1946, and the said meeting shall convene at 1:00 o'clock P. M. on said day and continue uninterrupted until the business properly coming before said meeting is disposed of, at the school house in said district; provided, that the polls for the election hereinafter referred to shall remain open until 5:00 P. M. o'clock at said time and place; that at said meeting the following business will be transacted:

- 1. One trustee to serve for a term of three (3) years will be elected. 2. The length of time school shall be taught in said District for the ensuing year and the season of the year in which the same shall be taught will be determined. 3. That at the said annual meeting in said District there will be determined the amount of money to be raised by special taxation, and shall determine the purpose for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes. The maximum levies for current expense shall be as follows: (a) 10 mills General Fund — approved at annual meeting for general expense; (b) 5 mills High School purposes — approved at annual meeting; (c) 2 mills Emergency Levy for General Fund — approval by 2/3 majority vote of qualified electors. (d) High School Tuition Levy above 5 mills as required — prior approval of State Board of Education and approval at Annual meeting. (e) Bond Interest and Sinking Fund levy as needed — levied by trustees. Legal operation levy, including 5 mills for high school purposes, is 17 mills. If 5-mill levy is insufficient to cover tuition, Common Districts may ask approval of the State Board for a sufficient levy to cover charges. For Common Districts this extra levy is to be determined in money while for Joint Common Districts it shall be determined in mills. 4. That at said meeting general questions pertaining to school and school interests will be taken up and disposed of. The name or names of all candidates for election of trustees, together with the term for which nominated, shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election. That the election at said meeting will be by secret and separate ballot. Dated this 27th day of March, 1946. A. O. KANIKKEBERG, Clerk of Joint Common School District No. 24, of Latah County, Idaho. 14-3

NOTICE OF SALE

In The Probate Court of the County of Latah, State of Idaho

In The Matter of the Guardianship of Eddie Richardson, an Insane Person NOTICE IS HEREBY GIVEN that J. H. Millard, guardian of the estate of Eddie Richardson, an insane person, will sell at private sale, on or after Saturday, the 20th day of April, 1946, the following described real estate, situate in the County of Latah, State of Idaho, to-wit: Lots One (1), Two (2), Three (3), and Four (4) in Block Two (2) of the Town of Juliaetta.

Bids or offers must be in writing and may be left at the residence of the undersigned in Juliaetta, Idaho, delivered to him personally, or may be filed in the office of the Clerk of the Probate Court of the County of Latah, State of Idaho. The terms of this sale are cash, ten per cent to be paid upon the acceptance of the bid or offer and the remaining ninety per cent to be paid upon confirmation of sale and delivery of conveyance. Conveyance of the property will be made in conformity with the laws of the State of Idaho. Dated this 29th day of March, 1946. J. H. MILLARD, Guardian of the Estate of Eddie Richardson, an Insane Person. First pub. Apr. 4, 1946. Last pub. Apr. 18, 1946. J. H. Felton, Atty., Moscow.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In American Ridge School District No. 22, Latah County, Idaho

NOTICE IS HEREBY GIVEN, That the annual school meeting of American Ridge School District No. 22, County of Latah, State of Idaho, will be held on Friday, the 19th day of April, 1946, at the school house in said district; the said meeting shall convene at 1:00 o'clock P. M. of said day and continue uninterrupted until 3:00 p. m. The following business will be transacted: 1. One trustee to serve for a term of three (3) years will be elected. 2. The length of time school will be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined. 3. At the said annual meeting in said District the amount of money to be raised by special taxation shall be determined, the levy for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District; the purposes for which the money derived therefrom shall be expended shall also be determined, and in each instance the proportion of the whole amount which is to be used for the various and separate purposes shall be named. 4. At said meeting general questions pertaining to school interests will be taken up and disposed of. The name or names of all candidates for election of trustees, together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election. The election at said meeting will be by secret and separate ballot. Dated this 27th day of March, 1946. ANDREW COX, Clerk of American Ridge Common School District No. 22, of Latah County, Idaho. 14-3

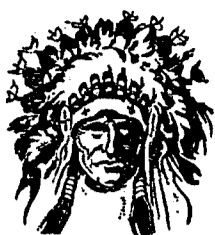

About Egg Prices So you think you've seen high priced eggs? What would you think about eggs which cost \$2.00 apiece? Laid by the golden goose? No! They were produced by high-quality American poultry! The other day 20,000 hatching eggs valued at \$12,000, took to the air from New York bound for Russia. Russia's poultry stocks were largely destroyed by war. Now they want to build them up — right. Those eggs came from leading breeding farms in the United States, and made up the most valuable shipment of hatching eggs ever to leave this country. Many of the eggs were individually pedigreed from the best breeding flocks. That's how it happens that some of those single eggs sell for \$1.00 and \$2.00 each. Gosh, if a fellow's hens laid eggs like that he'd have to mount an armed guard over the nesting house.

Standing By The Philippines The idea seems to have gotten around that there are differences of opinion between the United States and the Philippine government. Some quotas on exports of Philippine sugar have been fixed by our congress for the next few years. Apparently the Philippines will not be able to export sugar to the United States for the next three in greater quantities than is provided in our legislative plans. The Philippines will undoubtedly be allowed to ship us all the sugar they want to, in future years. The United States has been a big, good brother of the Philippines since it was freed from Spain in 1898. Our armies and navies drove the Japanese out of the Philippines in the recent war, at terrific cost to ourselves. Now we are going to set them free on their own footing of independence — and we'll never go back on them — nor their sugar.

Special Show Scheduled The local theatre has scheduled a special show for Tuesday and Wednesday, April 23 and 24 — a double feature. First offering will be Bing Crosby and Joan Blondell in "East Side of Heaven." The second will be "Easy to Look At," starring Gloria Jean and Kirby Grant. But one show will be presented each night, beginning at 8:00 o'clock.

ELECTRONICALLY YOURS featuring REDDY KILOWATT your WASHINGTON WATER POWER ELECTRICAL SERVANT. Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HELLO THERE, FOLKS:

Want to buy some large, fresh, white eggs for Easter? — The kind that color so beautifully? The creamery is the place to buy them, as we have some special eggs set aside for Easter — nice fresh ones! Buy two or three dozen, at least, for coloring.

Cottage Cheese and Buttermilk

Have you tried any of our Potlatch Chief cottage cheese or buttermilk? It's the tops! If you don't believe this statement, just take some home and see for yourself.

Potlatch Chief Products

Always keep well stocked with Potlatch Chief products. We sell milk, whipping cream, cottage cheese, buttermilk, butter, eggs and ice cream.

Remember — Always ask for Potlatch Chief Products by name

Soldier: "What would you do if I kissed you?"
Girl: "I'd call my brother."
Soldier: "How old is he?"
Girl: "Two!"

Blonde: "Have you had much experience with sailors?"
Brunette: "Oh, gobs and gobs."

She: "Pardon me, sir, does this train go to 42nd street?"
Drunk: "Yesh, ma'm. Jus' wash me and get off one stashion before I do."

She: "Why do they call a sailboat 'she'?"
He: "Because it makes a better showing in the breeze."

Novice: "What is the secret of good golf?"
Instructor: "To hit the ball hard, straight, and not too often."

Market your products the "Co-operative Way." It pays!

TEAKEAN GOSSIP

Merton Preussler has repaired his road and moved up from Orofino this past week. He is now returning to his farm after having worked at a Boeing Aircraft parts factory at Chehalis, Wn., during the latter part of the war. He returned to Orofino last fall — and now, "back to the farm."

Elwood Brock has been getting the material together for his cellar. Asa and Burnham Choate hauled sand and gravel for him and Elwood is now skidding up cedar for the necessary timbers.

Rev. Underwood, pastor of the Cavendish Methodist church, was visiting his members here last Thursday.

George Jones has taken over a tank truck from its former owner, Carl Erickson, and is now delivering gas in this area.

Mrs. McKeenan is confined to her
