VOLUME 57

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, APRIL 17, 1947

NO. 16

INTERESTING HAPPENINGS FROM JULIAETTA AREA

Rev. and Mrs. Paul Foresberg and children, Mr. and Mrs. Martin Shove and son David and Mrs. Margaret Covington and daughter Jane were Monday night supper guests of Mr. and Mrs. Jasper Nutting at Kendrick.

Mr. and Mrs. Everett Kirkpatrick motored to Spokane on Tuesday on a business trip.

Mrs. Jack Meade and Mrs. Everett Kirkpatrick were Monday business shoppers in Lewiston.

Mr. and Mrs. Herb Weber have moved to their newly completed home on Big Bear ridge. Leo Cline will stay the remainder of the school term at the Ernest Walsh home.

Mr. and Mrs. Lloyd Porter of Portland, Oregon, have been visiting Mr. and Mrs. Johnnie Walsh here this week, and will leave at the end of the week for Portland, taking with them their little granddaughter, Sharon Walsh, for a visit.

The Misses Louise Peters, JoAnne Peters and Arlene Holmes were overnight guests of Claudene Clark on Monday night.

Mr. and Mrs. Leo Mushlitz and sons Kenneth Lee and John Ivan, and Mr. and Mrs. Bernard Lindquist and sons Douglas and Ronald and daughter Pauline, all of Moscow, were Sunday callers of Mr. and Mrs. Lewis Lindquist, later motoring to Spalding park, where a delightful picnic lunch was enjoyed by all.

Little Carol Black, a second grader, is moving to Moscow, and little Richard Weber, also a second grader, is moving to Big Bear ridge. The room regrets very much losing these children.

Vaden and Norman Bisby of Lewiston entered the third grade here this week.

Mrs. Rose Long of Pullman, Wn., visited school one day last week. Glenda and Larry Berge of Kenawick entered the second and third grades here this week.

Mrs. Woodrow Nye returned home Tuesday of last week from a week's motor trip to Vancouver, Seattle, and other coastal points. She was accompanied by her parents, Mr. and Mrs. Jack Kumpula of Clarkston Heights.

Mr. and Mrs. Harvie Shepherd and son Douglas motored to Newport, Wash., over the week-end.

Mr. and Mrs. Alvin Nye and children of Clarkston; Mr. and Mrs. Everett Millard and children and Mr. and Mrs. Woodrow Nye of Juliaetta had a picnic Sunday, ten miles above Astoria.

Mr. and Mrs. Earl Parks were Sunday dinner guests of Mr. and Mrs. Ronald Jones of Big Bear ridge. A wicker roast was given Friday evening by Claudene Clark, and was greatly enjoyed by all present.

Doris Lingenfeiter and Beverly Swears were Lewiston shoppers on Saturday.

Frankie Peters and Peggy Hadley were Lewiston shoppers Saturday.

Mr. and Mrs. M. Mamphier of Coeur d'Alene spent the week-end visiting their daughter, Mrs. W. G. Swears and family.

Alice Brown and Minnie Peters were Lewiston shoppers on Monday.

Mrs. Joy Swan and Mrs. Maude Finell of Pinehurst, Idaho, are visiting here. Mrs. Joy Swan at the home of her parents, Mr. and Mrs. J. L. Johnson, and Mrs. Finell at the Black home.

Mr. and Mrs. Henry Black are moving to Moscow. He has accepted employment at the University garage. The family will be moving into a housing project home.

Bridal Shower

A bridal shower honoring Mrs. Geo. Brocke, Jr., (nee Helen Harris) was given at the school house Tuesday afternoon in the Home Ec. room.

A short program was held in which a "mock" wedding held the "lime light" and furnished much merriment.

Large baskets of gifts were then presented the honor guest, after which cake and ice cream were served from a lace-covered table, centered with a crystal bowl filled with tulips, daffodils and forsythia.

Hostesses for the occasion were Janice DePeel, Dorothy LaPlant, Gladys Silflow, Barbara Stedman, Patty McCreary and Mrs. W. B. Deobald.

Finished Marine Corps Course

Oceanside, Calif. (Official Dispatch) Marine Private Donald Robert Riley, 18, son of Mr. and Mrs. William A. Riley of Kendrick, Idaho, has been graduated from a Marine Corps Amphibian tractor school.

During the 10-week course the Kendrick leatherneck received instruction in the operation, maintenance and tactics of these Marine Corps developed "alligators" which were used in 16 assault landings in the Pacific during World War II.

Pvt. Riley enlisted in the Marines in October, 1946, and received his basic training at the recruit depot in San Diego, Calif. He was graduated last year from Kendrick High school.

New Creamery Staff Member

E. J. Rieger of Cascade, Idaho, has been added to the staff at the Kendrick Co-operative Creamery.

Mr. Rieger will act as assistant to Arthur Rundhaug, being well acquainted with working operations of a creamery. He comes highly recommended, having been employed the past year and a half in the Cascade Creamery and before that time he saw army service.

Mr. Rieger plans to bring his wife here as soon as he can find a place to live.

Weather, Ideal

Weather locally the past week has been what one could almost describe as "perfect." Bright, sunny days, clear nights, and as a result trees are beginning to display their leafy greenery, tulips and hyacinths are in full bloom, as well as violets, daisies and many other early varieties of flowers.

Pastures, too, are turning to a bright emerald green — and Potlatch creek is subsiding its muddy flow.

And, although spring has its advantages, it has its disadvantages, too, for business men are developing severe cases of spring fever, and the desire to go fishing or squirrel shooting is almost overpowering!

KENDRICK COMMERCIAL CLUB HONORS TIGERS

Wednesday evening of last week at the regular monthly meeting of the Kendrick Commercial Club, the Kendrick Tigers were the guests of honor at a 7:15 banquet at the Kendrick Cafe. Also present as the honor guests of the Club were the Genesee Bulldogs, the Troy Trojans and the Juliaetta Pirates, opponents during the season of the Tigers. Other guests were James M. Lyle, Jr., secretary of the Idaho Alumni Association; Steve Belco, Freshman Coach at the U. of I.; Guy Wicks, baseball and basketball coach at the University, Stanley Heizerman, track coach of the U. of I., and Perrin Shoemaker, end coach at the U. of I.

At the banquet a total of 71 were present, and at the conclusion of the meal adjourned to the Community church basement for the evening's program.

Dick Coulter opened the evening's fun with a piano solo.

Lewis B. Keene, Entertainment committee chairman turned the meeting over to Jasper Nutting, who introduced the guests.

Leonard Weber, captain of the Juliaetta team, introduced the team members and reported on their playing season.

Coach Garry Hammond of Genesee introduced the members of that team and made a few pertinent remarks on athletics.

Coach Cliff Moffet of Troy introduced the trojans and reported very briefly on their season's record.

Ross Armitage, local coach, introduced the Tiger team members and gave a brief resume of tournament play, from sub-district to state, including with it a brief financial report on the various tournaments.

Mr. Nutting then introduced Elroy Kuykendall, team manager, paying him a tribute for his fine work.

James Lyle, alumni secretary of the U. of I. and former superintendent here was then introduced, and after a brief talk he called on Steve Belco, Freshman coach at the U. of I.

Mr. Belco remarked that he thought this section of Idaho produced some of the finest athletes, and that this basketball league was one of the toughest in the state.

Guy Wicks, chief basketball and baseball coach at the U. commended the school and others in this area for their fine spirit in sports — not only school spirit but the spirit of fair play.

Stanley Heizerman, track coach at the U. took the floor to remark that he wished schools in this section could turn out fine track teams, as they did basketball — his job would then be much easier.

Mr. Shoemaker was then introduced, and commended the school and town for its close co-operation. He said that it took this working together to produce winning teams in small schools — and he hoped that the area could or would, in the future, produce as fine football material as they did basketball.

The official meeting was then concluded, but an hour of general visiting and get-together was enjoyed after the meeting's close.

Invitations had also been sent to Cudezac and Lapwai, but for some reason no representatives of these schools or teams were present — and due to the phone strike they were unable to notify the club of the reason for their absence.

Tickets Have Been Filed

It looked for a time as if the village election this year would be the same as that of two years ago — no file candidates — but at the last moment two tickets were filed by petition. On the "Progressive Ticket" for the two-year term, appear the names of E. A. Deobald and Floyd Millard; and for the four-year term the names of Walter Brocke and Lewis B. Keene.

On the "Citizens Ticket", for two-year term, appear the names of Dr. Geo. W. McKeever and James Farrington; and for the four-year term Lewis B. Keene and Edgar Dammarell.

To date we haven't heard of any campaign promises or seen any cigars — but from where we sit it looks like Tom Keene is a cinch to win.

Voting Tuesday of next week will tell the story.

Pay Off Basketball "Debt"

Sunday afternoon the Kendrick Tigers, Coach Armitage and Manager Elroy Kuykendall, were the guests of Mr. and Mrs. Stanley Hepler of Southwick for airplane rides.

Mr. and Mrs. Hepler had promised the boys scenic trips if they won the state championship, and Sunday, being a beautiful day with visibility unlimited, they "paid their debt."

The group reported a most enjoyable time.

WHAT CAMERON FOLKS ARE DOING THESE DAYS

A meeting for the Cancer Drive was held at the Ladies Aid hall on Wednesday evening, with Mrs. Marvin Silflow, chairman, in charge. Those attending and taking part in the program from Lewiston were Dr. and Mrs. K. C. Keeler, Mr. and Mrs. Arde Gustafsen, Mrs. Jesse Hoffman, Mrs. Lloyd Harris and Mrs. Gladys Swank. Mr. Cridlebaugh of Leland showed the picture, "Miracle Money." A lunch was served at the close of the evening. The sum of \$47.30 was contributed to the Cancer Drive at the meeting.

A large crowd attended the chili supper sponsored by the Lutheran Brotherhood at the Ladies Aid hall Sunday evening. The time was spent in showing local moving pictures and moving pictures taken by Herman Schupfer.

Mr. and Mrs. Billy Weyen and daughters and Mr. and Mrs. Ted Weyen were Friday evening guests of Mr. and Mrs. Glen Wegner.

Rev. and Mrs. Theo Meske and family returned from Ritzville, Wn., Wednesday, where they had visited with relatives for a few days.

Mrs. Ernestine Riggers of Nez Perce was a guest of Mr. and Mrs. Carl Koepf, the first of last week. Mrs. Koepf accompanied Mrs. Riggers to Seattle Thursday for a few days' visit with relatives.

Miss Gladys Wegner, a teacher at Washlucna, Wash., is spending the spring vacation with her parents, Mr. and Mrs. A. F. Wegner and family.

Guests of Mr. and Mrs. Glenn Newman Tuesday evening included Mrs. Carey, Mr. and Mrs. Jack Lansing, Mr. and Mrs. Loren Pitcher, Mr. and Mrs. Maurice Hudson and daughter, Mr. and Mrs. Ed Mielke and daughters, Mr. and Mrs. Fred Newman, Ernest Heimgartner, Harry and Wally Newman.

August and Glen Wegner were Moscow visitors Friday.

Ted Mielke, Herbert and Ernest Schwarz were Lewiston visitors on Wednesday evening, where they attended a meeting of the Farmers Auto Insurance Co.

Mr. and Mrs. Geo. Wilken and daughter Marlene, Rev. and Mrs. Meske and family and Mr. and Mrs. Ed Mielke and daughters were Friday evening visitors in the home of Mr. and Mrs. Walter Koepf.

George Wilken and Walter Koepf attended the annual school trustees meeting at Lewiston last week.

Mrs. Otto Silflow returned home Monday, having spent the week-end in Spokane with relatives.

Rev. and Mrs. Meske and family and Mrs. Herman Silflow were Spokane visitors Monday evening and Tuesday.

Mrs. Ned McCamant of Spokane visited with her sisters, Mrs. Herman Silflow, for a few days last week.

Mr. and Mrs. Dave Schoeffler of Lewiston were Saturday night and Sunday guests of Mr. and Mrs. Earl Whiting.

Mr. and Mrs. Ted Weven spent Sunday with friends in Moscow.

Mr. and Mrs. Aug. B. Wagner and family and Mr. and Mrs. Glen Wegner and family were Sunday guests of Mr. and Mrs. Wilson Rogers in Moscow.

Virgil Badgett of St. Maries visited with James Whiting and Roy Silflow, Sunday.

Cancer Is Dangerous Disease

During 1946 cancer was a mauler in Idaho, causing the death of 270 men, while at the same time taking the lives of 253 women.

In a study of the total cancer deaths in the state, L. J. Peterson, administrative director of the Idaho department of public health, said that during the year cancer continued to maintain its standing as the second highest cause of death in the state, claiming the lives of 523 men, women and children.

"The age brackets for cancer deaths extended from under five years of age to 85 and over — indicating that cancer has no respect for males or females, nor the age of anyone," he declared.

In the study, compiled by the health department's division of vital statistics, it was revealed that cancer of the digestive organs in men caused 143 deaths to become the principal cause.

Other totals and sites in men are: Cancer of the genital organs, 54; cancer of the respiratory system, 16; cancer of the urinary organs, 14; cancer of the skin, 10; cancer of the throat, 8; and of the brain and other parts of the nervous system, 3.

In female deaths cancer of the digestive organs also headed the list, accounting for 116. Other sites and totals are: Cancer of the breast, 61; cancer of the uterus, 28; cancer of the genital organs, 11; cancer of unspecified organs, 6; cancer of the throat, 5; cancer of the skin, 2 and cancer of the brain and central nervous system, 2.

Cancer was listed as the cause of death for eight persons under 19 years of age, of which five were boys and three were girls.

Unfortunately no part of the human body is immune to the disease, and ever since mankind has attempted to keep records of the diseases striking humanity, cancer has consistently been recorded and history tells us that it is one of the oldest of the diseases, and always known as a killer of men, women and children.

Circles To Meet

Mrs. John Davis Circle and Mrs. J. G. Travis Circle will meet this Friday afternoon, with Mrs. D. A. Christensen. All are invited to be present.

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Mr. and Mrs. Everett Fraser drove to Potlatch Sunday to spend the day visiting his aunt, Mrs. Flora Lenhard.

Mr. and Mrs. Roy Long and children are moving this week to the home of his parents, Mr. and Mrs. Edgar Long, as Mr. and Mrs. Axel Swanson and children are returning from Wheeler, Oregon, and want their apartment.

Mr. and Mrs. Jack Travis were Spokane business visitors Monday and Tuesday of this week.

Mrs. Ida Pemberton was a Lewiston visitor Tuesday.

Mr. and Mrs. John Davis were Lewiston shoppers Monday.

Mr. and Mrs. W. L. McCreary and children were Sunday dinner guests of Mr. and Mrs. James Lyle, Jr., Moscow.

Mrs. Emulus Brown and son Jerry spent the week-end in Lewiston with her sister.

Scottie Coulter of Moscow and Edwina Coulter, Spokane, spent the week-end at their home here.

Mr. and Mrs. Edgar Long were Sunday guests in the home of Mr. and Mrs. Silvie Cook in Lewiston Orchards.

Mr. and Mrs. Rufus May and daughter of Clarkston were recent visitors here in the homes of Mrs. Nettie Gentry and Mr. and Mrs. Dave Gentry.

Mrs. Floyd Millard spent Wednesday in Lewiston Orchards visiting her daughter and family, Mr. and Mrs. Vernon Bogar.

Mrs. Ida McAllister returned Saturday from Rochester, Minn., where she had been receiving medical treatment. She is staying with the Henry Jones family for the present.

Mary Ellen Meyer, who is teaching at Sunnyside, Wn., came Wednesday of last week to spend the Easter vacation with her aunt, Mrs. Marvin Long. Miss Meyer's mother will be remembered as Esther Lowery, having taught Home Economics in the school here in 1918.

Mrs. R. L. Blewett, who has been confined for her bed the past three weeks with a severe case of bronchitis, is somewhat improved, and expects to be up soon.

Mrs. Ullie Hardman of Peck arrived Wednesday to spend several days with her sister and family, Mrs. Wade Keene.

Mrs. D. W. Smith, Glenns Ferry, came Friday to visit her son, Mr. and Mrs. Russell Smith and daughter, until Monday.

Mr. and Mrs. Leland Houck of Lewiston were Sunday dinner guests in the home of Mr. and Mrs. Bruce Glenn.

Verna Swanson of Troy spent the week-end with the Bruce Glenn family.

Mary A. Deobald was a dinner guest Tuesday in the E. A. Deobald home, and in the evening enjoyed supper with Mr. and Mrs. Otto Schupfer.

Mrs. Harry Benscoter, Mrs. Bruce Glenn and Mrs. George Havens attended the Westdalia Ladies Aid in Troy Thursday.

Mrs. D. W. Clarence Dougharty were Sunday afternoon callers in the home of Mrs. Mary Deobald.

Mr. and Mrs. Edgar Dammarell took James Benjamin back to the Veterans Hospital at Boise Saturday, after he had spent a month's furlough here with relatives.

Capacity Crowd At Show

Tuesday evening of this week a capacity crowd packed the Fraternal Temple hall to witness the Kendrick Grange's annual minstrel show, not only was every seat filled, but the walls were lined with "standees" as well.

The show itself was in three acts. The first, put on by Potlatch ridge, was a negro minstrel skit, featuring a "town meeting," and drew laughs galore.

The second act featured "Mountain Music," and was supposedly laid at a community gathering in a mountain school house. It was replete with jugs, stills and harmonica music — and the actors were often interrupted by laughs and hand-clapping. This skit was a presentation of American ridge.

The final act was a black-face skit supposedly taking place on a "Jim Crow" car in the deep south. It was replete with bells, whistles, a conductor — according to piano music, and songs. This final skit was a presentation of Kendrick residents.

The "acts" were supposed to be judged, and the best one announced to the crowd, but if the judges ever got around to it, nobody ever heard from, for all were having too much fun.

A dance followed the minstrel show — also attended by a large crowd.

A Big Egg And Little One

Mrs. Frank Jean, Juliaetta, came into the Gazette office Saturday with two eggs, one laid by a Black Minorca hen measured 6 3/8 by 8 inches; the other, laid by a Rhode Island Red, measured 2 1/4 by 2 1/4 inches!

Well, the loss on one was at least made up by the gain on the other.

Red Cross Meeting
The American Ridge Red Cross will meet Friday afternoon at the school house, following school election. This will be a short business meeting, and everyone is urged to be present. Please bring your Cancer Fund donation to this meeting.

Undergoes Surgery
George Brocke, Sr., underwent surgery Friday morning of last week at St. Joseph's hospital.

He is getting along nicely.

Now Power Shovel Arrives

Thursday of last week the Osberg Construction Company received a new large size Lima diesel-powered shovel, and shortly before the end of the week had it in operation — and it certainly makes the dirt and rocks fly.

At about the same time they received the repairs for the old shovel which had broken down and was blocking the lower end of the grade — and now have it out of the way. So progress, in a real sense of the word — is again under way, and it looks like the road will be finished in time for harvest hauling, which is indeed the sincere wish of all.

INTERESTING NEWS ITEMS FROM KENDRICK SCHOOLS

Meeting

J. V. Fowler, vocational guidance director from the state department of education will be the guest speaker at an open meeting at the Kendrick High school at 8 o'clock on Thursday evening, April 17. Mr. Fowler will speak on the subject of recent school legislation. As this subject is so very important to us all at the present time it is hoped that there will be a large turnout from Kendrick and all the neighboring communities. Everyone interested is urged to attend this meeting. Remember it is tonight (Thursday, April 17) at 8:00. Please attend.

Assembly Program

Rev. Lewis I. Bacheller, who is at present holding revival services at the Full Gospel Church, Kendrick, gave us a very interesting assembly program Tuesday morning of this week. He first lectured on the beauties of Hawaii, a land where he served as a minister for a number of years. After his talk he made three pastel drawings, presenting one each to Coach Armitage, Herb Millard and George Brocke, Jr.

Junior-Senior Banquet

Friday evening of last week the Junior Class was the host at the annual Junior-Senior banquet, honoring the Senior class, the faculty and their wives and husbands, and the school trustees and their wives. The program and menu followed the "Ship Ahoy" lines. The menu follows: Chow — Salt Air, Gangplank, Milky Way, Convoy of Sea Gulls, Pearls in a Pot of Gold, Fleecy Clouds and Star Dust, Big Briny Splash, Heavily Breeze and Black Joe — which translated means: Favors, Meat Loaf, Scalloped Potatoes, Tomato 'spic Salad, Peas and Carrots, Rolls, Butter, Pickles, Snow Squares, Coffee.

The program, for which there is no "translation," reads as follows: "Captain, William Kuykendall, Junior President; Buglemaster, Chloe McKeever, Junior Accompanist; Junior Buglers, Torpedo Jim, Gene Kuykendall, Jerry White, Buford Fairfield, David Coulter; Admiral, Elroy Kuykendall, Senior President; Bureau of Ordnance, A. O. Kankkeberg, G. W. McKeever, E. A. Deobald (Board of Education); Senior Officers of the Deck, Patty McCreary, Beverly Schupfer (Nautical Almanic); Field Musician, Wilma Benscoter, 'Red Sails in the Sunset'; Bureau of Navigation, Jasper Nutting, Mrs. Werner Brammer, Roy Long, Mrs. W. B. Deobald (High School Faculty); Field Music, 'Anchors Aweigh'."

Table decorations carried out the nautical theme, with red, white and blue menus. Favors were tiny paper hats filled with nuts and candy, and place cards were a "nautical" "Donald Duck."

All in all, it was a most pleasant and delightful occasion.

School Activities

The school calendar is very full, and many activities will occur between now and the end of school. The Juniors are busy this week preparing for the Junior Prom, which will be tomorrow night (Friday, April 18). Also on Friday afternoon of the same day the baseball team will meet Orofino on the Orofino diamond, for the first game of the season.

Steel Lockers Ordered

An order was placed Tuesday of this week for a set of steel lockers to be used in the dressing rooms of the High School gym.

Seniors Get "False Information"

Wednesday saw one of the sleepiest groups of Juniors ever to attend school — for someone "tipped them off" that the Seniors were to "sneak" Wednesday, and as a result the entire class spent the night patrolling the town in cars awaiting the Senior "take-off." However, the event did not come to pass, the Seniors being home in bed!

Softball Association Organized

Last Thursday evening, April 10, a softball meeting was held at the City hall and the "Kendrick Softball Association" organized. A. O. Kankkeberg was elected president and Jordan Kankkeberg secretary-treasurer. It was tentatively decided to have a six-team league, composed of four teams from Kendrick and one each from Juliaetta and Cameron.

Tom Keene, Kenneth Brocke and Floyd Millard are to sign up all available players and divide them into three teams. Anyone interested in participating is asked to contact any one of these three fellows. The fourth team from Kendrick will be made up of high school boys with Ross Armitage in charge.

May 1st was suggested as the opening of the season, if the local grounds are ready by that time.

Names For School Trustees

Two names were filed for the office of school trustee for the election of Friday of this week — Floyd Millard and Geo. W. McKeever.

GRAIN MARKETS SHOW SLIGHT INCREASE FOR WEEK

Domestic grain markets reacted somewhat from the lower levels of a week ago showing a rather substantial recovery during the week, according to reports received by the Production and Marketing Administration, U. S. D. A. The May wheat in the futures markets made a net gain of about 14 cents per bushel during the week, but cash wheat in the Pacific Northwest markets only partially reflected the advance in May futures. Bid prices on the ordinary expert classes of wheat in the local markets showed a net gain for the period of 5 cents per bushel while the higher protein types of wheat averaged only about 4 cents per bushel higher as compared with the previous week's close. Trading in cash wheat during the week was reported to have been extremely light as the telephone strike made it difficult for terminal dealers to make direct contact with their dealers in the producing areas. The United States weather bureau reports that precipitation occurred quite generally over the Pacific Northwest wheat region during the week and that winter wheat is developed above the seasonal average and making very satisfactory growth. Spring wheat generally has germinated well and plants are thrifty. The absence of extremes in temperature has been a favorable factor in building up the current excellent condition of the wheat crop in this area.

Trading in cash wheat at the Portland market during the week was extremely quiet with practically no interest in marketing spot wheat or making new crop contracts since the markets declined. The spread in the markets between cash prices in the Pacific Northwest and the eastern May futures during the week has resulted in the mid-western dealers bidding for soft white and hard winter wheat in this area for rail shipment east, and prices quoted were reported to have been satisfactory but on account of the shortage of box cars, the volume of business booked was rather small. Shipment of wheat to the Pacific Northwest terminals for export also declined during the week with only 468 cars received at the Columbia river terminals and 322 at Puget Sound terminals, compared with 497 and 476, respectively, for the previous week. Bid prices at the Portland Grain Exchange were as follows: Soft white, \$2.31; soft red (no Rex) white club, western red and hard red winter, \$2.32, all per bushel, basis No. 1, bulk, for 15-day shipment, coast delivery.

Wheat receipts at Ogden consisted of 75 cars during the week, with 58 cars diverted to eastern markets. Quotations on all classes of wheat were \$2.45 per bushel, basis No. 1, bulk, f. o. b. Ogden, which was an advance of 11c per bushel, compared with the previous week. Prices quoted f. o. b. country shipping points averaged about 16c per bushel under Ogden.

The San Francisco wheat market was quiet and appeared barely steady during the week, despite advance in most other markets. While local offerings were small, demand was slow from practically all classes of trade and prices held largely unchanged compared with a week ago. Bay region mills reported slow flour business and confined purchases of local wheat to small lots to round out milling mixtures. Central California usage of wheat for feed was reported as well below most seasons due to smaller poultry flocks, unsatisfactory feeding ratios and the availability of other lower priced feed grains. Despite slow demand offerings were far from burdensome and this tended to hold prices steady. Central California stocks were reported reduced to low levels and offerings of wheat from northern mountain and Pacific Northwest shippers were small and at higher prices than the San Francisco market bids.

Cash wheat in the Kansas City market, in addition to following the upward movement of the futures, milling grades rose 4c to 5c per bushel, amounting to 19c to 20c on hard winter and 14c to 17 1/2c on red wheats. Demand was good with competition for offerings more pronounced. Mills and merchandisers were in the market for moderately increased amounts over requirements a week ago. Receipts for the five-day period totaled 1,246 cars.

The nine principal southwestern markets received 2,851 cars of wheat during the week, compared with 3,514 the previous week and 988 a year ago. Cash wheat at Minneapolis followed the full advance in futures. Mill demand, although not aggressive, was steady enough to absorb all offerings readily. Mills were largely on a hand-to-mouth basis, with reserve stocks limited.

Favorable prospects for wheat on April 1 indicate a record crop of nearly 1,250,000,000 bushels. Winter wheat production is forecast April 1 at 973,000,000 bushels. If the prospective spring wheat acreage is realized and yields per acre average for the years 1937 to 1946 by states, the production of all spring wheat would be 265,000,000 bushels. The movement of wheat from farms of 226,400,000 bushels January 1 through March this year is the largest on record for that period.

Twin Sons Arrive

Mr. and Mrs. Clayton Creasy, Custer, Wn., are the proud parents of twin sons, born at Bellingham, April 4th, weighing 4 lbs. 12 oz., and 5 pounds, 4 oz.

Mrs. Creasy will be remembered here as Ruth Biddison, daughter of Mr. and Mrs. Bert Biddison.

NEWS ITEMS ABOUT LELAND RESIDENTS AND FRIENDS

School Election
The annual school election will be held on April 18 — Friday — from 1:00 p. m. until 4:00 p. m. at the Leland school house.

Other News
Mr. and Mrs. Wallace V. Christensen and sons David and James spent

Friday visiting at the Herman Meyer, Homer Parks, and Gerald Schmidt homes. They just arrived last week from Honolulu, T. H., and are staying at the Ernest Schmidt home in Lewiston. Mrs. Christensen was the former Myrtle Schmidt.

Mr. and Mrs. Earl Kimes and family and Mr. and Mrs. Dennis Porter were Sunday dinner guests of Mr. and Mrs. Wm. Thornton.

Mrs. Robert Draper and Mrs. Roy Craig attended a meeting of the Home Demonstration clubs in Lewiston on Saturday.

Mr. and Mrs. Harry Smith entertained Sunday with a dinner honoring Mrs. Oney Walker's birthday anniversary. Guests were J. M. Woodward, Mr. and Mrs. Ben Hoffman, Howard Hoffman and Mr. and Mrs. Oney Walker and son Neal.

Mr. and Mrs. Billy Veyen entertained with a dinner Sunday for Mr. and Mrs. Robert Draper, Ervin Draper, Mr. and Mrs. W. H. Weyen, John Vincent, Roy Craig and Paige Craig.

Mrs. Chester Vincent and daughter Carol Lynn were Sunday afternoon callers of Mr. and Mrs. Jesse Thornton.

Mr. and Mrs. Lloyd Craig and daughters were Sunday afternoon callers in the home of Mr. and Mrs. Chas. Craig.

Mr. and Mrs. Jesse Thornton spent Friday and Saturday in Lewiston, getting acquainted with their new granddaughter, little Dianna Williams.

Mr. and Mrs. Harry Smith accompanied J. M. Woodward to Lewiston and Clarkston on Monday.

Mr. and Mrs. Marvin Vincent and Mr. and Mrs. Oney Walker were Sunday afternoon callers in the home of Mr. and Mrs. Herman Johnson.

Mrs. Dora Heffel spent Tuesday with Mr. and Mrs. Marvin Vincent. John Vincent left Tuesday for Genesee, where he will be employed by Fred Magee.

Mrs. Roy Craig was a dinner guest Tuesday of Mr. and Mrs. Chas. Craig, and called that afternoon at the Donald Morgan home in Lenore. Mr. and Mrs. Wallace Christensen and sons of Hawaii were Friday supper guests of Mr. and Mrs. Homer Parks.

Picture To Be Shown

A picture on cancer, "Miracle Money," will be shown to the high school on Thursday. Assisting Mrs. Coulter with the solicitation for funds are Mrs. E. M. White, Mrs. E. A. Deobald and Mrs. Marvin Long. Local contributions may be sent to Mrs. Long, treasurer.

Mrs. Ella Benschoter is the chairman for American ridge.

Mrs. Ben Hoffman reports that the Leland solicitors have received about \$100.00.

More Swimming Pools

Payette — Call for bids for construction of a \$36,000 swimming pool in Payette was made by the city last week. The plans for the pool call for submarine lights with a filtration and heating plant, dressing rooms and showers. Funds for this community project were voted at a bond election about a year ago.

Salmon — Community efforts of both money and labor are rapidly creating a recreation center for Salmon. The ambitious program includes a 50 by 100 foot swimming pool, tennis court, play grounds, horseshoe pitching pits, putting greens, sand boxes, archery range, a picnic area and landscaping for the center.

New Arrival

Mr. and Mrs. Rex Peters, Julia, are the proud parents of a baby daughter, born Wednesday, April 16, weight 6½ pounds.

PRODUCTION PRICES MUST MEET BUYER INCOME

One of the remarkable anomalies of the time is that while most business is operating at extremely high production levels, a great many industrial leaders are seriously worried about the not-so-distant future. They see pitfalls ahead. This attitude is the result of the obvious fact that a great many consumers—and especially those in the middle-income brackets who used to absorb most of the output of our smoking factories — are being priced out of the market.

The signs are growing plainer for anyone who takes the trouble to look. That of debbil, high prices, is a dark cloud on the economic horizon. In some strictly luxury fields, such as the night club business, conditions are worsening fast. Many a club has been forced to rid itself of expensive floor shows and to engage cheaper bands. Liquor sales have declined. Sales of costly fur coats, jewelry and cosmetics have fallen sharply. The great wartime spree, when you could sell practically anything at any price, is but a diminishing shadow of its former lusty self.

The price cloud likewise hangs over basic lines of goods—the kind of goods whose mass production keeps the American economy in motion. The most obvious example here is automobiles. Dealers everywhere report cancellations of orders, as disappointed people take a look at the price tags. Some motor manufacturers have frankly forecast that by the end of the year salesmen will be out looking for purchasers. This more cautious attitude on the part of consumers is reflected in many fields, and one result of it is that large retail buyers are placing their orders with great care.

What it all adds up to is that millions of people now have more money—but less buying power. Prices and living costs have outrun increases in salaries and income. An article in a recent issue of the New Republic, by Bernard Posner, entitled "What'll We Use for Dough?" deals vividly with this sad fact. Mr. Posner describes himself as a typical \$5000-a-year man with a wife and baby. Families in this income bracket—which is, of course, well above the average—are supposed to be steady and dependable buyers of new cars, expensive radio-phonograph combinations, fine clothes, super-de-luxe kitchen equipment, and so forth. Mr. Posner's article goes into complete detail as to what happens to his money. Out of his \$416.67 monthly paycheck, \$48.67 is retained for withholding taxes. Rent takes \$65, and food about \$95. An ancient car costs \$25 to operate at best, and laundry, cleaning and diaper service run to \$22. Clothes call for \$20, and such things as insurance, telephone, and a monthly Savings Bond total about \$40. Recreation and charity cost \$25, and \$5 is spent for newspapers and other reading matter. His lunches consume \$20 and house-cleaning equipment, bathroom necessities, furniture, and odds and ends demand close to \$30 more. So it goes, with the money budgeted carefully, until at the end of the month nothing is left. These costs are typical of a vast number of families in and about the \$5000 income level. Nothing remains for that shiny new car or that amazing refrigerator with the built-in deep-freeze unit.

If the \$5000-a-year family is in this position, what about those with substantially lesser incomes? A survey made by the National Housing Agency last summer contained a section on the earnings of war veterans. It found that only 4 out of each 100 made \$30 a week or more. The average weekly income of married vets was \$48. These incomes may be somewhat higher now, but they are still far below the level that will permit buying on the scale needed to keep the industrial machine functioning once the shortages are made up.

It is hard to find a reputable economist who believes that more and more wage increases are the real answer to the cost of living problem. The reason for that is that significant wage increases are almost inevitably followed by price increases which more than offset the gains. Industry, obviously, can meet its bills only by pricing its wares in accordance with operating costs. This wage-price spiral, if allowed to go on unchecked, always winds up with unbridled inflation of the kind that plagues Europe and China. Money can be measured only in terms of what it will buy. And inflation always hits hardest the white-collar class which has been the backbone of the economy.

Tax reduction will help, but not as much as some people seem to think. For instance, if the new tax bill, in the form approved by the House, becomes law, a four-member family with \$2500 net income would save only 50 cents a week—and the same family at the \$5,000 net level would save only \$2 a week. These savings would hardly permit "luxurious" living.

A good many experts are convinced that prices are due to come down—but there is much disagreement as to just how far down they can possibly go. Consumer resistance is a factor in this, but the fact remains that no one can long sell goods without a profit. And some very convincing surveys have been made which indicate that business, by and large, is pricing products about as low as today's running costs will permit. The prophets are being extremely cautious in predicting what will happen. But most of them feel sure that there are difficulties ahead.

Ministers Hold Get-together

A group of Methodist ministers and their families — 29 in all — were entertained at the Community church parsonage at a "no host" luncheon on Monday. They came from Orofino, Lapwai, Colfax, Pullman, Moscow, Walla Walla, Grangeville, Cottonwood and Culesac. All were thrilled by the beauty of the scenery around Kendrick.

Preventing Calf Scours

A dispatch says that very favorable results in preventing calf scours have been had by feeding nothing but milk, alfalfa hay and timothy hay. Folks who have tried this system say the condition of the calves is as good if not better than when starting grain too soon.

V. F. W. Meeting!

Fraternal Temple, Kendrick

SATURDAY, APRIL 19

7:00 P. M.

Come on, fellows, let's make this meeting a good one!

Kendrick Bean Growers Ass'n, Inc.

Kendrick, Idaho

A FRANK AND OPEN LETTER:

TO OUR FRIENDS AND PATRONS —

The purpose of this letter is to inform you as to conditions as they are today in business, mainly the credit situation. As you know in the past your Association has had a very Easy Going Policy in regards to credit and collections. The Customer purchased the Hardware, Lumber, Repairs, or other merchandise wanted, had it charged to his account, and paid the account, maybe in 10 days, or 30 days, or at the end of the year. The Association's only worry was to have enough money to meet the bills due at the end of the month. In the past, up to Jan. 1st, 1947, we were able to purchase large amounts of merchandise on future datings. In other words, we would buy Hardware, Building Supplies, Repairs, etc., in the spring and pay for these purchases either the 10th of Sept., or the 10th of Oct. With these datings we could sell on credit to our customers, as we did not have to pay for a large part of our merchandise until fall, and in the fall most of our customers paid us their accounts.

Beginning Jan. 1st, 1947, our suppliers of Hardware, Electrical Equipment, Farm Implements, Repairs, etc., changed their policy. They decided to give no more "Datings" on the purchase of merchandise. They cut the cash discounts to "net" in most cases, and made all accounts due within 30 days, or the 10th of month following date of purchase. Some suppliers have cut their terms to 15 days, and some to 10 days. This means that if we purchase \$15,000.00 worth of merchandise in one month, we have to pay for \$15,000.00 worth by the 10th of the following month, and in several cases must have it paid for before the current month ends.

We do not wish to discontinue our credit policy. We believe that it is to your benefit to have a charge account with us, as each sale is itemized, and entered in our records as such, and you can, at the end of each year receive an itemized statement that will give you a complete record of your purchases, from which you can take expense items which are deductible from your income tax. By all means, if you pay cash for an item, have a cash sale slip made, and save this slip for your record. However, in order for us to operate the business in a business-like manner, and in the way you would like to have the business taken care of, it is necessary that we receive the accounts that are due us by the 10th of the month following date of purchase.

If you want to buy merchandise that you need on terms, we will gladly extend them to you, on our time payment plan. This time payment plan is well worth looking into, and covers every item that we sell, including seeds, seed beans, farm implements, electrical appliances — in fact, everything in the store. The interest rates are low.

These are the conditions. We do not believe them unreasonable. We are in an era of change, and in business we must keep up with the changes or lose out.

Very truly yours

KENDRICK BEAN GROWERS ASS'N.

Good Farm Wiring Is Held Essential

Expensive to Pay for Preventive Power Loss

"Anything less than good wiring on the farmstead is not only a serious bottleneck to successful use of electricity, but usually causes dissat-

isfaction and needless expense in the use of electricity for anything beyond lighting and minimum power uses," William A. Ritt, Minneapolis, Minn., declared at the national farm electrification conference.

In planning the wiring for a farm, Ritt declared, the average farm must be considered as an industrial plant, a production and processing plant for products. The greater the degree of processing performed on any farm, the greater is the return in terms of farm income, he explained.

No matter what efficient equipment the farmer may employ to arrive at more complete and profitable electrification, its successful operation depends upon a good wiring installation.

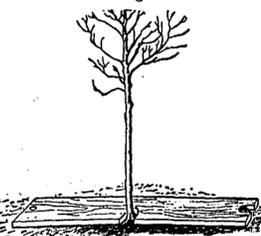

Larger capacity service entrances, heavier conductors to farmstead buildings and also for serving the higher horsepower motors now being used, an increased number of circuits and more attention to balancing loads among the various circuits, are among the outstanding needs of farm wiring systems today, Ritt said.

MISS SLICK CHICK OF 1947?

WE ARE RESENTFUL . . . Hens, resentful and envious of the "Slick Chick" designation, which with utter abandon has been bestowed upon human femmes, at long last have come to the fore and demanded their equal rights. The Poultry and Egg National board, realizing the justice of their claims, is conducting a nationwide search for the most beautiful hen in all America, who will be crowned "Miss Slick Chick of 1947," and will be guest of honor at world premiere of "The Egg and I."

Planting Trees

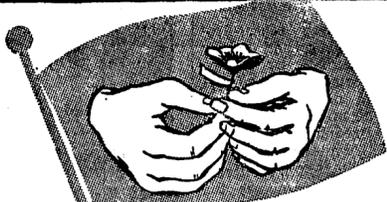

Ease in planting trees at uniform distances in straight rows may be secured by the board marker shown in illustration. The length of the board will depend on the type of tree and distance to be spaced.

Home Garden Goals

Established for 1947

Six million farm gardens and 12 million urban, suburban, and small-town gardens will be the goal of the 1947 national garden program. The necessity and desirability for the garden program is to insure better nutrition in millions of American homes, to help all families in meeting the cost of living and to provide better qualities of vegetables and fruits, especially for the lower-income families.

COMMUNISM, LABOR, AND BUSINESS JUST DON'T MIX

When a businessman or industrialist finds that nothing he does can please his union, he tends at first to form a sour view of organized labor. But, as he becomes more sophisticated, he realizes that his difficulties may not arise from his own workers, who usually understand his problems, but from outside influences controlling his local union. Their demands are insatiable, because they thrive on trouble. His workers are no more happy than he in such a situation, but they are not trained to cope with it. They may at times even be constrained to support extreme and impossible demands.

Even where workers or their employers are not directly involved they are often affected in an oblique manner. The national policies of organized labor, if influenced by the Communists, can sometimes involve unions led by non-Communists. This is particularly the case where the objective seems reasonable to labor. An instance of this would be the Political Action Committee of the C. I. O. The general principle that labor has an interest in politics is almost as old as unionism itself. The more direct and aggressive methods of the C. I. O. are new and in contrast to the established approach of the A. F. of L. Even here, however, many workers who are by no means radical would accept the new approach.

The result is that practically all C. I. O. unions readily support P. A. C. Its philosophy and its program sound reasonable to them. What they do not realize is the nature of the forces which infiltrated this program. While Hillman was not a Communist, nor is Philip Murray, two of their top advisors are Communists, taking direct and frequent orders on P. A. C. policies from the very top levels of the Communist Party. At the other end of the scale, in many cities and regions the local committees are Communist controlled. They have the organization for ringing doorbells and getting out the vote. The easy thing is to use them, and many labor leaders take the easy way. As a result, at the time of writing such important Councils as those in New York and Detroit are Communist controlled.

The direct national effect of Communist infiltration in P. A. C. may not have been serious. A few candidates deserving of labor's favor may have suffered because their foreign policy was opposed to the Communist line. A half dozen Communists may have gotten into our national legislature. The net effect of these moves would not be tragic. The real danger lies in the threat of the future.

ORDINANCE NO. 256

AN ORDINANCE ALTERING THE BOUNDARIES OF THE VILLAGE OF KENDRICK AND EXCLUDING FROM THE CORPORATE LIMITS OF THE VILLAGE OF KENDRICK ALL OF THAT PART OF OAK'S ADDITION LOCATED AND BEING NORTH OF THE CENTER LINE OF LOCUST STREET AND REPEALING THE PROVISIONS OF ANY AND ALL OTHER ORDINANCES IN CONFLICT WITH THE PROVISIONS HEREOF.

BE IT ORDAINED BY THE CHAIRMAN AND BOARD OF TRUSTEES OF THE VILLAGE OF KENDRICK, IDAHO:

Section 1. That a petition signed by electors of said Village residing within the corporate limits of the Village of Kendrick equal to a majority of the votes cast at the last general village election held therein was filed with the Village Clerk in accordance with the provisions of Chapter 21 of Title 49 of the Idaho Code Annotated praying that the Board of Trustees enact an ordinance altering the boundaries of the Village of Kendrick and excluding therefrom all of that portion of Oak's Addition thereof located and being north of the center line of Locust Street therein. That such petition was presented to the Board of Trustees of such Village at the next regular meeting after the filing thereof.

Section 2. That the petition was signed by the requisite number of electors of said Village; that the granting thereof will be for the best interest of the Village of Kendrick and will not materially mar the symmetry thereof.

Section 3. That all of that part of Oak's Addition to the Village of Kendrick located and being north of the center line of Locust Street therein shall be excluded from the corporate limits of the Village of Kendrick and the boundaries of said Village are altered accordingly.

Section 4. That this ordinance will be in full force and effect from and after its passage and approval and publication.

PASSED BY THE BOARD OF TRUSTEES, this 2nd day of April, 1947.

APPROVED BY THE CHAIRMAN, this 2nd day of April, 1947.

W. E. BROCKE, Chairman.

ATTEST: FRANK ABRAMS, City Clerk.

FIRE WASTE NEAR HIGH POINT IN NATION'S HISTORY

The nation's fire waste in 1946, an estimated total of \$561,487,000, was the highest in 20 years and the second highest in U. S. history. This huge loss nearly exceeded the record loss of \$561,980,000 in 1926.

The 1946 loss represents an increase of 23 per cent over estimated losses of \$455,329,000, recorded in 1945, and 83 per cent higher than losses of \$306,469,520 in the last pre-war year, 1940.

Fire waste in December, 1946, set a new record for a single month—\$58,094,000, an increase of 30 per cent over November, 1946, and 17.4 per cent over December, 1945. The second highest monthly loss ever recorded also occurred in 1946—\$53,252,000 for March.

Losses for January, 1947, were \$57,180,000, the highest January on record, and 14.8% over 1946.

The average peacetime per capita fire loss in the United States, \$1.95, has risen more than 100 per cent to its present high of \$4.01. With employment at the 56,000,000 level, each wage earner's average share would be about \$10. This cost of fire

would not include the huge indirect waste, loss of jobs, impairment of credit, business failures, cost of fighting fires and waste of resources.

Conflagrations destroying large amounts of raw materials, food, lumber, housing, and manufacturing facilities, and frequently taking a heavy toll of lives, are occurring at an astonishing rate. Last year there were 30 conflagrations, destroying a total of more than \$50,000,000.

More large fires involving \$250,000 or more were reported in 1946 than in any other year by the National Fire Protection Association. There were 187 such fires, causing damage in excess of \$120,000,000.

Greatest loss of life in 1946 occurred in the Winecoff Hotel fire in Atlanta, where 121 persons died in the nation's worst hotel fire in its history. The LaSalle Hotel fire in Chicago last summer took 61 lives, and the Canfield Hotel fire in Dubuque took 19.

The Wall Street Journal lately pointed out that one fourth of the 789 deaths in hotel fires in this country and Canada since 1888 occurred in 1946.

Collapse of a tenement house when a fire-weakened wall of an

icehouse fell against it killed 37 persons in New York City.

The most destructive of the 30 conflagrations were two grain elevator fires in Minneapolis, with losses totaling \$4,000,000, warehouse fires in Fresno, Calif., and Langley, S. C., with losses approximately \$3,800,000 each, an oil tanker that burned at Jacksonville, Fla., with a loss of \$3,300,000, river docks and sugar stocks that burned at Arabi, La., causing \$3,000,000 loss, the \$2,000,000 ferry terminal fire at St. George, Staten Island, and a \$2,000,000 railroad warehouse fire in Pittsburgh.

Souvenir Booklets Available

Headquarters, Fifth Army, has announced that all combat veterans of the Fifth Army, both in and out of the service, may obtain copies of the booklet entitled, "Nineteen Days From the Appennines to the Alps — The Story of the Po Valley Campaign."

These booklets may be obtained by addressing a request to the Commanding General, Fifth Army, 1660 East Hyde Park Blvd., Chicago 15, Illinois, Attention ALFSI-AN.

TEAMWORK SCORES FOR ALL

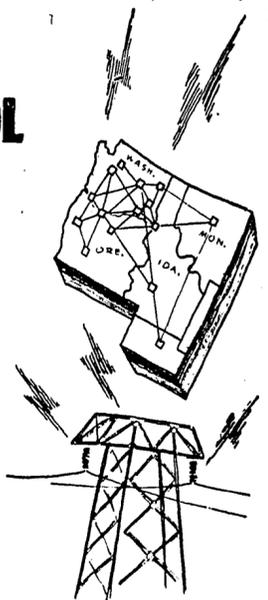

through the NORTHWEST POWER POOL

Is it possible for private power companies, municipal systems and the Federal government to join hands and pool their vast power resources for the best interests of the Northwest?

Good neighbor, it has already been accomplished. During the war, power resources in this area were joined to whip the enemy. Now in peace, private companies as well as government and municipal agencies are agreed that here is the answer to a greater Northwest.

First, let the Federal government continue to be the main source of power; second, let this power be distributed by the efficient and economical systems serving you right now. The Washington Water Power Company helped to organize the Northwest Power Pool years before the war. It has the know-how to serve you best tomorrow.

National Forest Dividends

The 25 percent equity which local governments have in the receipts of the national forests of the Northern Region recently brought dividend checks to the states in the region, according to P. D. Hanson, regional forester.

From the region's receipts for the fiscal year 1946, ending last June 30, payments to the states were: Montana \$134,725.71; Idaho \$108,043.20; Washington \$25,217.85; South Dakota \$1,170.77, Mr. Hanson reported. The states in turn distribute the funds to the counties having national forest territory within their bound-

aries. When a national forest is in more than one state or county receipts from it are distributed on the basis of the proportionate area in each state or county. The funds are used as the state legislature prescribes for the benefit of public schools and public roads.

Of the 48 states, Idaho is twelfth in size, with an area of approximately 84,000 square miles. Other states most nearly of the same size are Utah, Kansas and Minnesota.

Get your fresh vegetables at Blewett's Grocery-Market. 1-adv.

Watch Your Bird Dogs

Owners of bird dogs were reminded today by the fish and game department that the closed season for training dogs on upland game birds, including pheasants, begins April 1. The season during which it is illegal to run dogs on birds lasts until August 15.

The rule is enforced each year, the department said, for protection of brood stock and young birds during the nesting season.

In commenting on the pheasant situation in Idaho, Maurice Lundy, bird biologist for the southern district, said that an increase was noted in many areas, in comparison with last year, and that with a favorable spring, the outlook for next fall would be much improved.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Joint Common School District No. 24, Latah County, Idaho

NOTICE IS HEREBY GIVEN, That the annual school meeting of Joint Common School District No. 24, County of Latah, State of Idaho, will be held on Friday, the 18th day of April, 1947, and the said meeting shall convene at 1:00 o'clock P. M. on said day and continue uninterruptedly until the business properly coming before said meeting is disposed of, at the school house in said district; provided, that the polls for the election hereinafter referred to shall remain open until 5:00 P. M. o'clock at said time and place; that at said meeting the following business will be transacted:

1. One trustee to serve for a term of three (3) years will be elected.
2. The length of time school shall be taught in said District for the ensuing year and the seasons of the year which same shall be taught will be determined.
3. That at said annual meeting in said District there will be determined the amount of money to be raised by special taxation, and shall determine the purpose for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes. The maximum levies for current expense shall be as follows:
 - (a) 10 mills General Fund — approved at annual meeting for general expense;
 - (b) 5 mills High School purposes — approved at annual meeting;
 - (c) 2 mills Emergency Levy for General Fund approved by 2/3 majority vote of qualified electors;
 - (d) High School Tuition Levy above 5 mills as required — prior approval of State Board of Education and approval at Annual Meeting;
 - (e) Bond Interest and Sinking Fund levy as needed — levied by trustees.
4. That at said meeting general questions pertaining to school and school interests will be taken up and disposed of.

The name or names of all candidates for election of trustees, together with the term for which nominated, shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

That the election at said meeting will be by secret and separate ballot.

Dated this 26th day of March, 1947. A. O. KANIKKEBERG, Clerk of Joint Common School District No. 24, of Latah County, Idaho.

First pub. April 3, 1947. Last pub. April 17, 1947.

NOTICE OF KENDRICK VILLAGE ELECTION

Notice is hereby given that there will be held in the City Hall of the Village of Kendrick, Latah County, Idaho, on the 22nd day of April, 1947, between the hours of 9:00 o'clock a. m. and 7:00 o'clock p. m. of said day, a municipal election, in accordance with Chapter 164, Title 32, of the Idaho Compiled Statutes A. D. 1919, and all acts amendatory thereto, for the purpose of electing four Village Trustees; two to serve for a term of two years; and two to serve for a term of four years.

That all qualified electors of the State of Idaho, who have resided within the corporate limits of the said Village of Kendrick, Latah County, Idaho, for a period of three months next preceding such election, if and when properly registered according to law, shall be entitled to vote at such election.

That after an elector has registered for a general city or village election he shall not be required to again register so long as he or she shall continue to reside at the address, ward or precinct in which he is registered.

That if such elector shall fail or neglect to vote for two successive general biennial city or village elections, the clerk shall strike the name of such elector from the Elector's Register, and such elector, in order to vote at the general city or village election, must again register.

That whenever an elector shall have removed from the city or village in which he is so registered, and shall remain away from such city or village for a period of one year, his name shall be stricken from said register, and if he shall thereafter again reside in such city or village for at least thirty (30) days, he shall again register.

That the place for registration shall be at the office of the Village Clerk (The Red Cross Pharmacy). You may register up to and including the Saturday just preceding the day of election.

Done by order of the Chairman and Board of Trustees of the Village of Kendrick, County of Latah, State of Idaho.

WALTER BROCKE, Chairman. FRANK ABRAMS, Clerk.

Metal and Plywood Combined In Sturdy New Material

Cigarette-proof desk tops, fire-proof office partitions, and lighter planes, made possible by a new method of combining metal and plywood layers in manufacture, are described by Thomas D. Perry of the Resinous Products and Chemical company of Philadelphia.

Plymetal, he said, is the relatively new product which combines the good qualities of both wood and metal, and compensates for the less desirable qualities of each. It is made by gluing layers of metal to sheets of veneer with a resin adhesive, to which heat and pressure are simultaneously applied.

Some of the uses already made of plymetal include a table-top construction developed for office desk, bank counters and smoking stands, where an inserted sheet of aluminum is provided to absorb and distribute the heat from lighted cigarettes so that the outer wood surface is in no way disfigured. Kitchen equipment, table tops, drainboards and the like are much improved by metal surfaces for cleanliness and wear, backed by a lightweight plywood for stiffness and heat insulation. Both steel and aluminum are employed for this.

Coal and Lignite Supply Assures U. S. of Fuel Reserve

Although liquid and gaseous fuels make up only 1.2 per cent of the mineral-fuel reserve of the United States, the reserves of coal and lignite can be used to supplement declining reserves of natural gas and petroleum for "certainly not less than 1,000 and probably for 2,000 years," according to Arno C. Fieldner, chief of the fuels and explosives branch of the bureau of mines.

Fieldner estimated the proved fuel reserves of the United States at an energy equivalent of 2.6 trillion tons of bituminous coal having a heating value of 13,000 B.T.U. per pound. Coal and lignite comprise 98.8 of this reserve. Fifty-five per cent of this solid fuel reserve consists of high-volatile bituminous coal, 23 per cent subbituminous coal, 19 per cent lignite, 2.5 per cent low-volatile bituminous coal, and 0.5 per cent anthracite.

"All of these fuels can be converted by suitable processes to gaseous and liquid fuel," he said. "Satisfactory fuel gases have been manufactured from coal or from coke and petroleum for many years. Processes and equipment for this purpose have been well-developed, and the costs are known. In recent years in Germany, in particular, processes have been developed and put into commercial operation for the manufacture of liquid fuel from coal and from lignite."

Preserved Order

Prior to the existence of law courts and peace officials in the United States, vigilance committees, formed of substantial citizens, operated in border communities to combat desperadoes. Following the gold rush in San Francisco in 1848 outlaws endangered the lives and property of residents of that area until the San Francisco Vigilance committee was formed in 1851 and drove them from that section or apprehended and executed them. When the terrorists fled to other localities like committees were organized, resulting in mob rule at times but generally well coordinated procedure prevailed. The Squatters' Claim association was established near Leavenworth, Kan., in 1854 to protect slaveholders' rights. Eventually all the Western States and territories had vigilance committees to break up organized outlaw rule.

Pasture Moisture

The amount of water entering the soil following rainfall has been found to be about five times less on heavily grazed pastures than on those not grazed since 1940, according to the Rocky Mountain Forest and Range experiment station. On land heavily grazed by cattle, after .65 inches of artificial rainfall, .44 inches were lost through run-off. Only .21 inches soaked into the ground. On pastures ungrazed since 1940, following a simulated rain of .80 inches, run-off amounted to only .08 inches, while .52 inches filtered into the soil. This indicates that on ungrazed or moderately grazed pastures, rainfall is much more likely to enter the soil. This reduces the possibility of erosion, siltation and floods.

Cleaning Nylons

To help get your nylons clean safely and with little work, use lukewarm water and a mild soap, the same as you use for any washable, fine fabric. Rinse well without wringing or twisting and your fabric will last longer. Do not force-dry or hang colored fabrics directly on or above a radiator. They may fade if you do. Direct sunlight may also fade such material. Properly finished nylon fabric is highly resistant to wrinkling and only requires touching up with a warm iron. Do not use a hot iron. Ironing the wrong side when your garment is slightly damp helps to take out wrinkles. You can use most cleaning agents on nylon. Because of the nature of some dyes, it is a good idea to try a bit on an inconspicuous part of the garment first. If there is any doubt, send your garment to a reliable dry cleaner.

Anti-Frost Machine Will Save Orchards

Michigan Machine Will Raise Temperature

By W. J. DRYDEN

A new machine designed to protect farm crops, particularly semitropical orchard crops, has been perfected at Michigan State college.

The machine heats the plant and soil by means of an oil burning heater costing about \$125, which sends out infra-red heat waves. Cost of operation is about 75 cents an hour.

Severe frost damage has occurred in many fruit-growing areas and young trees have been severely affected. The new machine, shown in illustration, should prevent much of the loss.

The cause of frost damage is well known. Heat which is stored up in the soil and plants during the daylight hours is rapidly radiated into the atmosphere on still, cloudless nights. Lower layers of the atmosphere become chilled and on sloping ground, the chilled air, increasing in density, moves to the lowest situation. For this reason the new invention will prove of real value to orchard operators in many sections of the country.

Rid Farm of Wild Garlic With 2, 4-D

It will take only about 100 gallons of 2, 4-D spray mixture to rid the average acre of wild garlic. Winter has proven an ideal time. It will aid in eradication if the application can be made when the land is free of snow.

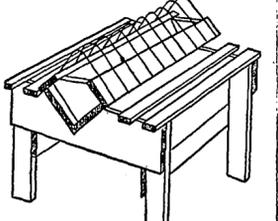

By applying the mixture in the winter, all the germinated wild

garlic plants will be killed and sufficient 2, 4-D will remain in the soil for two months to kill late germinating plants. Some spot spraying may be necessary the second year.

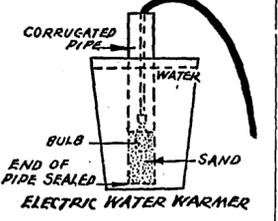

Many cities and road districts plan to use 2, 4-D to kill weeds along roads, parks and public land. Tests conducted last year have proven the value of this weed killer.

Indoor Hopper

For best results one foot of mash hopper space should be provided for each five hens. In case of small flocks it might be advisable to increase the space. With this type of hopper, daily filling usually is advisable. The V-shaped hopper should not be over-filled.

Electric Water Heater

Pieces of metal tubes such as down spout, if closed water tight on one end, make satisfactory water warmers. Light bulbs are inserted into sand for retaining the heat. The tube stands in the water pail.

Get Busy When Pigs Develop Diarrhea

When pigs have diarrhea, the cause should be found immediately. It may be the symptom of a serious disease. Diarrhea in pigs also may mean an attack of cholera, necro or one of several other diseases. The hog raiser should be especially suspicious if the bowel trouble is accompanied by weakness or other symptoms, says Dr. L. P. Doyle of Purdue university.

Advance In Conditioning Hard and Soft Waters

Water conditioning may soon become as familiar as air conditioning, says the Plumbing and Heating Industries bureau, in pointing out that the chemical content of water varies in different parts of the country, and that much progress has been made in recent years in finding economical and practical corrective methods. Whereas in some parts of the country water is hard and tends to clog piping by deposits of scale, in other sections the water is soft and tends to corrode tanks and piping, the bureau points out. Water also varies in the amount of sulphur, iron and other materials.

The chief problems, however, are the correction of hard water conditions and the correction of water that is too aggressive or soft, the bureau points out. Equipment is available which will make hard water soft. This equipment may be used either at the source of the water or at the point of use. It may be combined with equipment which filters and removes objectionable odors.

Much progress has been made in recent years in finding methods that will inhibit corrosion. It has been found that a chemical technically known as sodium hexametaphosphate, when fed into the water supply, will coat tanks and piping with a phosphate covering which prevents water from contacting metal, thus preventing rust and corrosion.

Roast Young Wild Ducks To Bring Out the Flavor

To do a skillful job of cooking wild ducks, means an understanding of the differences between cooking domestic meats and wild game, home specialists say.

The method of cooking will depend upon the age of the bird. Age can be determined by feeling the breastbone. A young duck has a soft, pliable breastbone, while an old bird has a stiff breastbone. Young ducks may be roasted in an uncovered pan, but old birds are better braised or cooked in a casserole.

For roasting young duck, oven temperatures should be kept moderate, 325 F. Twenty to thirty minutes per pound is usually recommended for roasting time, "since many game lovers prefer their duck slightly rare. Ducks can be roasted for a longer time, however, if care is taken to keep them moist.

The real secret in cooking wild game is to conserve moisture. Wild meat is naturally drier and tougher than domestic meats and needs to be cooked for a longer time and at a lower temperature.

Missouri Valley Indians

Research during the past two decades has made it obvious that the pre-white occupation of the Missouri valley covered a very long period. First came the makers of the Folsom points, purely a hunting and food-gathering people, without any agriculture, pottery, or fixed abodes. Nothing is known of their physical appearance, nor of their relationships to later groups. Then came a stage represented by the culture of corn and beans and the making of pottery. This brought about the establishment of semipermanent villages. Later came the still more sedentary "pit-house" dwellers. It is the remains of these later people that are found in relative profusion in most of the arable stream valleys of Nebraska and neighboring states. The relationships of the various recognized prehistoric peoples to such historic groups as the Arikara and Pawnee still is obscure.

Jack Pine Poles

The Lake States Forest experiment station, St. Paul, reports that about 9 million jack pine poles, suitable for power line construction, are growing in the forests of Minnesota. Jack pine, long in demand for pulpwood and lumber, was recently approved as pole material by the American Standards association. The figures of 9 million includes only poles which are at least 30 feet long with a circumference of 25 inches 6 feet from the butt. Although the 1945 forest service estimates show about 977,000 acres of jack pine in Minnesota, only 57 per cent of this area supports stands of pole-size timber. Under the allowable cut, 270,000 poles could be produced each year in Minnesota if all the pole-size timber were used for poles. With heavy competition for other uses, however, it is estimated that the state's annual jack pine pole production will not exceed 100,000.

Innerspring Mattress

An innerspring mattress is designed to supply two-thirds of the total resilience of an ordinary mattress and spring combination, therefore it should be used with a rather firm spring and should be well padded. A boxspring is an excellent support, gives perhaps a little better appearance with its upholstered sides and top and is easily cleaned. Coil springs furnish suitable support, also, provided they have one of two features: a platinum painted top consisting of bands of metal running lengthwise and crosswise on top of the coils; or convolute coils which have several extra turns of wire at the top so that when depressed they furnish a closed surface.

"Off Flavor" In Milk
If you don't use care in getting those cows onto pasture there's likely to be an "off flavor" to the milk that customers won't like.
This problem of getting cows on pasture without serious complaints on flavor is perennial. Many dairymen don't realize the seriousness of the problem.
Experience has taught that "off flavors" from pasture grasses are best controlled by starting the pasture season gradually and taking as much as two or three weeks to get the herd on to full pasture feeding.
Some dairymen use a plan like this. For the first two days leave the cows on pasture not longer than two hours following the morning milking. By the end of the first week the cows may be turned out after the morning milking and left until noon. By the end of the second week they may be left all day. At the end of three weeks, the cows may be left on pasture both day and night — and there is little danger that any "off flavor" will result. — Hoard's Dairyman.

Will Mass Medicine Work?

In a recent address, the Most Reverend Karl J. Altar, Bishop of Toledo, brought up some cogent objections to the proposed national compulsory health insurance law. In the course of his discussion, he said: "The assumption that tens of millions of people will make absolutely no demands on a physician's time during an entire year in spite of the fact that this service is paid for by taxes and therefore presumed to be free service to the patient, exceeds all human probability."

"The inevitable result must be quantitative medicine which means substitution of quantity for quality — or a mass production technique for the profession of medicine. Present standards could not be maintained. To meet the minimum requirements of a national compulsory health program, there would need to be twice as many physicians as exist today, or in round numbers about 240,000. To develop adequate teaching staffs and facilities to train this additional quota of physicians would require twenty years time."

There is a bit of the hypochondriac in all of us — and many thousands of people think themselves beset by imaginary ills. Under a compulsory medical system it is unquestionably true that such people would besiege doctors and waste their time, on the theory that they'd paid for service and might as well get something for their money. Then people really in need of careful, time-consuming care would inevitably receive inferior and hasty service.

This is but one of the many dangers inherent in compulsory medical insurance. Mass medicine would be a threat to the health of the American people.

Almo One Of State's Oldest
One of the least known Idaho villages today, Almo has been one of its most historical. It is located in south central Cassia county, about six miles east of the City of Rocks. The name might have been Almo originally, but its origin is disputed. In 1863 a company of emigrants on the California trail were massacred by Indians at Almo. Later Almo was a stage station on the Boise-Kelton route. Near the village are Durfree Hot Springs and the famous Silent City of Rocks.

Remember — Fresh and cured meats are always available at Blewett's Grocery Market. Prices are reasonable. 1-adv.

NOTICE TO CREDITORS

Agronomists Preserve Seed For Scientific Reference

Cold storage and sun-warmed seed plots are both used in preserving the seed collections the department of agriculture maintains as the source of "germ plasm" in plant breeding and for other scientific values. Each year at the Beltsville research center and at field stations in various parts of the country there are many rows and small plots in cultivation mainly for the purpose of maintaining a stock of seeds of many varieties of plants, a great many of which are never likely to be grown as a field crop.

Fieldmen keep records of the row, when it is planted, the yield, the habit of growth and the plant health-record — whether it shows signs of resistance or susceptibility to disease and insect injury. A seed crop is harvested, perhaps only a handful or two, put in a bag, an envelope or a sealed vial, tagged and stored. Most of the seeds are kept in cold storage for only a few months or for several years. For most seeds, dry and cold storage favor the preservation of the germinating power of the seed. In keeping up the stock of breeding material it is more convenient and less expensive to apply scientific skill and knowledge in storing seeds safely for several years, than it is to regrow them frequently.

The bureau of plant industry, soils and agricultural engineering maintains a collection of approximately 8,500 varieties of wheats, drawn from every country where wheat is grown. It has 4,000 barley varieties, 3,000 of oats, 1,000 of rice, about 300 corn, 400 of flax and between 200 and 300 of sorghums. When a breeding problem arises, the past records as to yields, disease resistance and growth habit are available as aids to making a promising cross.

Dutch Call Sumatra Future Of Opulent East Indies

Sumatra, one of the largest islands of the Netherlands Indies, has a wealth of agricultural and mineral raw materials which figured prominently on United States pre-war import lists.
So far, however, the resources have been but lightly tapped. A Dutch saying, based on the early trade history and the recent development of the group, has it that "the Moluccas (or Spice) islands are the past, Java the present, and Sumatra the future."

Pepper now leads in the spice trade of the Indies, over which nations once fought bitterly. Normally, the chief centers of production are in Sumatra and the adjacent islands of Billiton and Bangka, along with neighboring Borneo. Sumatran cloves and nutmegs, too, are aromatics that find a spot on distant pantry shelves.

Acrylic Resins

During the two world's fairs at New York and San Francisco, acrylic resins first appeared in solid form and were sensational because they had the unique property of piping light around corners in spirals, knots and other spectacular ways. Some thought it possible that houses might have a powerful central lighting system which would transmit light to other parts of the house through these transparent solid rods. Then came their use in specialized protective coatings in which they are strongly resistant to after-yellowing and to moisture, alkalis and dilute acids. Acrylic resins adhere well to plated surfaces and being water white do not contribute any discoloration to the plating. For this reason, they are widely used in clear finishes for polished metals. They are also useful in luminous paints, in which they are ideal binders for the luminous pigments which are adversely affected by acidity.

Farm Sales

Even though the rate of transfers of farms has been high during the war years, there has been a relatively high proportion of all cash sales, the bureau of agricultural economics notes. Of the recorded farm real estate sales in 1945 in about 130 selected counties, 58 per cent were entirely for cash. For 1942, 1943 and 1944 the percentages of all cash were 45, 52 and 55, respectively. For the transfers financed by credit, down payments during 1945 averaged 42 per cent of the purchase price as compared with 40 per cent in 1944 and 38 per cent in 1943. During 1945, about one-seventh of all purchases involved a debt of 75 per cent or more of the purchase price. On the average, the debt in such cases was more than the full market price in 1941.

Longest and Shortest Roads

The Atchison, Topeka and Santa Fe Railway ranks first in miles of road operated, with 13,092 miles of railroad. The Pennsylvania Railroad, with 24,960 miles of track, ranks first in miles of track operated. The Valley Railroad, one mile long, at Westline, McKean county, Pa., is the shortest line-haul railroad in the United States, a line-haul railroad being one which performs mainline and trunkline transportation service as distinguished from a switching or terminal company. The Beaufort and Morehead Railroad, three miles long, operated between Beaufort and Morehead City, N. C., is the shortest railroad in the country performing freight, passenger, express and mail service.

Sunken Logs Are Recovered
Coeur d'Alene — Thousands of "deadheads" or "sinkers" meaning logs which have become water-soaked, lie at the bottom of Idaho lakes and hundreds of them are being recovered daily from Lake Coeur d'Alene by J. M. Murray and his brother, Jim.
Murray finds the retrieved logs provide as sound lumber as can be found anywhere. Generally they are but cutters, but Murray finds most of the outfits will sell them. Unmarked logs belong to the finder.
Craters Of The Moon
Craters of the Moon National Monument was so named because in its barrenness and numerous cones and craters, it greatly resembles the surface of the moon as seen through a powerful telescope.
Fresh salmon and halibut arrives at Blewett's Grocery Market every Thursday. VaVry your diet by eating fish. 1-adv.

Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HELLO, THERE, FOLKS:

WHAT IS A CUSTOMER?

A customer is the most important person ever in our office or plant, either in person or by mail.

A customer is not dependent on us. We are dependent on him.

A customer is not an interruption of our work; he is the purpose of it. We are not doing him a favor by serving him; he is doing us a favor by giving us an opportunity to do so.

A customer is not an outsider to our business; he is part of it.

A customer is not a cold statistic—a name on a filing card or ledger sheet. He is a flesh-and-blood human being with biases, prejudices, feelings and emotions like our own.

A customer is not someone to argue with. Nobody ever won an argument with a customer.

A customer is a person who brings us his wants. It's our job to fill them profitably—to him

and to ourselves.

About Tools —

Someone has borrowed our pipe and thread cutters, and failed to return them. If you are the one, we would really appreciate your returning them to us at your first opportunity.

"Oh Give Me a Home" —

"Oh, give me a home, I don't like to roam" is the theme song of our new employee here at the creamery. If you know of someone who has an apartment or house for rent, please call, write or run down to the creamery and let us know! This is urgent!

Poet: "This is an unfair world."

Friend: "How so?"

Poet: "A banker can write a bad poem, and people think nothing of it. But just let a poet try writing a bad check!"

We're in the market for your cream.

INTERESTING HAPPENINGS FROM THE LINDEN AREA

4-H Sponsors Social

The 4-H club sponsored a social evening at the hall Saturday with a large crowd in attendance.

County Agent Elbert McProud introduced the following men, who gave very interesting talks on the Tussock moth, and the control measures being set up: James C. Evenden, senior entomologist in charge of the bureau of entomology of plant quarantine; Vernon H. Burlison, assistant extension forester; E. H. Myrick, information and co-ordinator of the job of Tussock moth control (he is Forest Supervisor of the Lolo Forest, at Missoula, Mont., but borrowed for this control work in Idaho).

The information given in the talks was greatly appreciated as part of the control work will be carried on from our ridge, as a plane landing strip is to be constructed on the Clem Israel farm.

Darrell Kerby, 4-H club agent showed some very interesting pictures of club activities, and spoke of his appreciation of the cooperation and interest the community is showing the club members here.

The selling of snadows for supper partners netted the 4-H club \$77.00. The remainder of the evening was spent in visiting and playing games.

Other News
The Friendly Club met with Mrs. James Holt Thursday, with the following present: Mattie Garner, Pearl Alexander, Ida Lyons, Maxine Foster and children, Thelma Ball and son, Mrs. Pederson, Millie Keeler, Lillie Wilson, Mary Bahr, Marjorie Holt and children, Margaret Craig and daughter Judy, Lettie and Aletha Israel, Janet Rae Cuddy, and the hostess, Rose Ann Holt. At dinner they were joined by the following men, who had been vaccinating calves at Ramey Hunt's: Gil Erlwine, Ernest Loeser, Ramey Hunt, Felix and James Holt.

Forest Grayson and family and Violet Brown spent Saturday evening and Sunday at Pomeroy with Mr. and Mrs. E. J. Waldhens.

John Cuddy attended the wedding anniversary dinner of Mr. and Mrs. T. J. Armbage at Southwick, Sunday.

Fred Magee and son Junior of Genesee were visiting on the ridge last Wednesday.

Mrs. Leslie Ball and son of Riggins are visiting at the home of her sister, Mrs. Arthur Foster and family.

Mr. and Mrs. Al Pederson and children spent Sunday with Mr. and Mrs. Clem Israel and family.

Miss Aletha Israel returned to Kirkland, Wash., after spending part of her Easter vacation with her parents, Mr. and Mrs. Clem Israel.

Mr. and Mrs. Dan Kechter and Mr. and Mrs. Harley Perryman spent Sunday with Mr. and Mrs. Cecil Chamberlain on Big Bear ridge.

Mr. and Mrs. Arley Allen visited with Mr. and Mrs. Edgar Bohn and Mr. and Mrs. Claud Pippinger of Orofino, Sunday.

Mr. and Mrs. Adolph Dennler and children of Juliaetta spent Sunday with Mrs. Annie Weaver and family. The men have completed house insulation operations at Addie Alexander's, and are now working on the Frank Lyons home.

Frank, Clem and George Lyons brought their new combine home from Lewiston Saturday.

Miss Pearl Brown spent Sunday with her aunt, Mrs. Dallas Hepler, at Southwick, and witnessed the airplane rides given the Kendrick

basketball team.

Mr. and Mrs. Sam Weaver and Mr. and Mrs. Belts picnicked on Tamarac, Sunday.

Ray and Elmer Cuddy were Lewiston visitors Saturday.

Melvin Garner and Miss Daphne Wisdom of Riggins visited with Mr. and Mrs. Arley Allen Saturday.

Mrs. C. L. Murray and son Russell Dee, Spokane, spent Sunday afternoon and night in the Charles Keeler home. They visited the following day with her sister, Mrs. Ted Vaughan, Kendrick.

Mr. and Mrs. Charles Keeler were dinner guests in the Ted Vaughan home in Kendrick, Sunday.

Mr. and Mrs. Ted Vaughan and son Robert Bruce of Kendrick visited Mrs. Vaughan's sister, Helen Bereman, in Lewiston Saturday night.

Delbert Bereman is working putting in and repairing fences on his farm here, and plans on beginning farm work as soon as possible.

GOLDEN RULE

Mr. and Mrs. Ed. Walcott, who recently sold their ranch to Roy Southwick, have moved to Lewiston. Donna is staying with her sister, Mrs. Ernest Cowger, to finish her school term here.

Chris Tschantz wired the Oscar Lawrence farm for electricity.

Paul Chairest visited Dr. Haury in Lewiston Wednesday, and left for San Francisco, Saturday, for medical treatment.

The Oscar Lawrence family were Sunday dinner guests at the W. A. Cowger home.

Mrs. Roy Martin and Mary Jane, of Lewiston, and Mrs. Lyle Bashaw and baby of Grangenont, spent the past week at the Martin home here.

Finke Bros. are moving up to Cole creek, where they have a logging job.

Mr. and Mrs. Wm. Cuddy and Mr. Ben Reinhardt were among the Lewiston visitors Saturday.

The Carl Finke family visited at the Loyd Ware home in Kendrick Sunday.

Mr. and Mrs. Don Candler and children of Bovill visited at the Abner Cowger and John Jennings' homes Sunday.

Mr. and Mrs. Roy Southwick and Mr. and Mrs. Abner Cowger were callers at the D. V. Kuykendall home Sunday.

Roy Southwick, D. V. Kuykendall, Russell Betts and Glen Betts were Orofino visitors Monday, trying to promote a bit of road work.

High Awards To 4-H Workers

More than \$317,000 worth of merit awards are offered in 1947 for superior achievements in national 4-H contests arranged by the National committee on Boys' and Girls' club work, according to G. L. Noble, director.

Outstanding records of members in the United States will receive recognition on county, state, sectional and national levels in 24 different 4-H agricultural and home economics awards programs this year, Noble announced. Adult and junior leaders, clubs and county groups will also be given special awards.

All awards are provided by private citizens, educational foundations and industrial organizations interested in furthering 4-H club work.

Awards for county winners comprise 143,500 gold and silver medals, and \$9,200 in cash prizes of \$20.00 to each of the ten top-ranking 4-H health improvement clubs in a state. Plaques of merit will also be awarded to the county in each state reporting the most outstanding 1947 program in 4-H farm safety and better methods in electric activities.

State, sectional and national awards include 184 gold watches, 1,087 U. S. Savings bonds, 118 scholarships and 795 educational trips to the National 4-H Club Congress, Chicago.

In addition scholarships totaling \$38,480 are offered to adult and junior 4-H Club leaders in 42 states to receive special instruction at tractor maintenance clinics.

Watch 2,4-D Garden Use

A warning comes this week from the U. S. Department of Agriculture not to use 2,4-D in your vegetable garden, as plant specialists with the department fear that some home gardeners may be tempted to try the potent 2,4-D in their garden.

Because this new weed killer has proved to be highly effective in ridding lawns of plantain, dandelions and other broad-leaf pests, don't get the idea you can settle your weeding problem among the vegetables the same way.

Tomatoes, beans, peas, radishes, lettuce, sinach and other popular

This Makes Your Motor Last Longer

Let us show you how a Fram Oil and Motor Cleaner gives your motor two important kinds of protection. (1) It removes grit and abrasive particles. (2) It impedes the formation of acids and corrosives. If your car does not have an oil filter—we'll install a Fram in a jiffy. If it does, we'll install a Fram Replacement Filter Cartridge which gives you the benefits of Fram's Extra protection. Drive in today.
