

# KENDRICK GAZETTE

VOLUME 57

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, JULY 10, 1947

NO. 28

## WHAT CAMERON FOLKS ARE DOING THESE DAYS

Mr. and Mrs. Carl Koopp, Mr. and Mrs. Henry Wendt and daughter Marjorie, Mr. and Mrs. Walter Koopp and family, Mr. and Mrs. Geo. Wilken, Marlene and Kenneth Wilken, Ernest, Irene and Ernie Helmgartner, Mildred Brammer and Herbert Schwarz spent the Fourth at Elk River.

Mr. and Mrs. George Ehlers and sons of Portland visited with Mr. and Mrs. A. E. Spekker over the week-end.

Harold and Cecil Brammer, Roy Silflow and Wally Newman were fishing in the Buffalo Hump country over the Fourth. They had excellent luck — bringing back their limit.

Jo Sanford of Clarkston is visiting in the home of her uncle and aunt, Mr. and Mrs. Ted Weyen.

Mr. and Mrs. Carl Koopp, Mr. and Mrs. Henry Wendt and daughter Marjorie, Mr. and Mrs. Walter Koopp and family, Mr. and Mrs. Geo. Wilken, Marlene and Kenneth Wilken, Ernest, Irene and Ernie Helmgartner, Mildred Brammer and Herbert Schwarz spent the Fourth at Elk River.

## Attends Education Conference

Jasper L. Nutting, Kendrick, was one of the 160 educators attending the third annual school administrators' conference held recently at the University of Idaho.

Problems of the administrative reorganization of the schools in Idaho occupied the major part of the two-day series of meetings.

Leading educators of the state spoke on various problems of the school administration. Speakers presented facts, personal judgments, and experiences in relation to the Idaho laws implementing the Peabody report, published last October. Following each speaker, group discussions were conducted.

## AREA MEMORIAL SWIM POOL TO BE DEDICATED SUNDAY

The official opening of The Area Living War Memorial Swim Pool has been set for next Sunday, July 13, at 1:30 p. m., at which time a half-hour dedication service is scheduled to be held in the park — and the public is urged to be present. The message will be brought by Dr. J. H. Coulter of the Community church. Swimming will follow at 2:00 o'clock.

It was not known until late Saturday afternoon that the pool could be put into use the following day, so the only notification possible was made — a slide flashed on the theatre screen, and cheers and hand-clapping greeted the announcement — and Sunday as many as 80 swimmers were counted taking advantage of the cooling water — Bob Fraser, life guard, counting that many bobbing heads. Although the pool is in use, the official dedication will be, as previously stated, Sunday at 1:30 p. m.

Beverly Schupfer and Ida Marie Silflow are operating the check room and assisting Bob in all ways possible.

Hours now set for the pool are as follows: Week-days: 2:00 to 5:30 p. m. and 6:30 to 9:00 p. m. (except Monday). The pool will not be open Mondays, as life guards must have a day off.

Sunday hours: 2:00 p. m. to 9:00 p. m. — continuous.

Bob Fraser announces that swimming instruction classes for the little folks will be organized at a later date, but that for the present the kids will be allowed to just splash around and "get acquainted with the feel of the water."

This pool represents an organized area effort of which all may well be proud — and under no circumstances should it be referred to as "Kendrick's Pool." It belongs to the people of this area, who donated time and money to build as a living war memorial to the young men of this section who gave their lives that we might continue to live the American way!

It's true that it is operated by the Village of Kendrick — but state law requires that some responsible individual, corporation or similar unit operate it — and the Kendrick Commercial Club, sponsors of the drive that ended in the pool's construction, does not come under any of these headings — Hence it's supervision and operation by the Village trustees.

Simple rules governing the swimmers were published in the Gazette a couple of weeks ago, and may be seen posted at the pool.

Bring in the kids — let them swim — and better still — join them yourself! It's fun!

## Hartinger-Lines Nuptials

Miss Evelyn Hartinger, daughter of Mrs. Earl E. Briggs of 518 W. Mansfield Ave., Spokane, and Richard E. Lines, son of Mr. and Mrs. E. J. Lines, 4708 North Stevens, Spokane, were united in marriage on Wednesday, June 25, at the Knox Presbyterian church in Spokane, with Rev. John B. MacDonald officiating at the double ring ceremony.

Miss Ward sang "Oh Promise Me," accompanied at the organ by Martha Nystrom, Clair and Lynn Dammarell of Port Angeles, Wn., cousins of the bride, lighted the candles. The bridesmaid was Phyllis Strecker, a cousin of the groom; and Wayne P. Lines, brother of the groom, was best man. The bride was given in marriage by James A. Brown, her employer. A reception was held immediately following the ceremony at the home of Mr. and Mrs. Briggs.

Mrs. Lines is a pioneer of Potlatch ridge, receiving her education there and at Lewiston, Idaho, where she graduated with the class of 1934.

Mr. Lines served in the navy during the war, spending four years in the South Pacific area. He is manager of a Safeway meat market in Spokane.

The couple are at home in Spokane at West 617 Dalton Ave.

## Softball Games This Week

Softball games played on the local diamond this week are:

July 7: Red Cross Pharmacy vs. Juliaetta, the Pharmacy winning 3 to 1. This game was the first errorless game played on the local diamond so far this year.

High School vs. Southwick, with Southwick winning 10 to 9.

Millard's Grocery vs. Kendrick Bean Growers — with the "Beanery" winning 19 to 17.

Everyone is cordially invited to come out and see these games. There is no admission charge — and it's a lot of fun.

## Undergoes Tonsillectomy

Glen Wegner, Jr., son of Mr. and Mrs. Glen Wegner, Cameron, underwent a tonsillectomy at the office of Dr. Christensen Tuesday morning. He is getting along nicely.

## PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

C. H. (Sonny) Daugherty, son of Mr. and Mrs. C. H. Daugherty, Spokane, came down last Saturday to spend a few days visiting at the Herman Johnson home in Leland, and with friends in Kendrick. Discharged from the army last November 9, after a second period of service over-seas, this is his first visit "home," since that time. He says he finds civilian life "not bad at all," and is having a swell time with old friends.

Frank H. Rider, Los Angeles, was a Kendrick visitor Tuesday morning on his way home from Chicago, where he had been to get a new car. His time strictly limited, Frank drove from Billings, Mont., to Lewiston (700 miles) Monday, in order to spend the half-day here. He was a luncheon guest in the R. H. Ramey home. Frank says the "old home town" looks just as green and pretty as ever, but appears much busier.

Mr. and Mrs. Ivan Craig of Richland, Wash., arrived here Monday to visit a few days in the home of his parents, Mr. and Mrs. Claude Craig, and with other relatives, and to get their children, who have been visiting here the past two weeks. They came by the way of Spokane, where they spent the Fourth. The family expects to do a little fishing before going back to their home.

Edwin Coulter, Spokane, spent the Fourth at his home here.

Mr. and Mrs. Lester Wallace and grandson Randy drove to Seattle Thursday to spend the Fourth with their son, Lt. John Wallace and family. They returned to their home Monday.

Mr. and Mrs. Howard Rukgaber of Seattle arrived here Friday evening to visit over Monday with her parents, Mr. and Mrs. Emulus Brown and family.

Mr. and Mrs. Byard Davidson of Pullman were Saturday night guests in the W. A. Watts home.

Mr. and Mrs. Lester Crocker and family, accompanied by Charles Ameling, spent the Fourth and following week-end at Red River Hot Springs.

Mr. and Mrs. Don Miller and son Dee and Mr. and Mrs. Frank Crocker spent the Fourth and week-end fishing and camping on the Selway river.

Mr. and Mrs. Don Miller took their son Delos to Lewiston Monday, from which point he left to report for navy boot training at San Diego. Dee enlisted in the navy a couple of weeks ago, and received his orders the Fourth.

Mr. and Mrs. Lyle Trout and family were July 4th guests in the home of his brother, at Moscow.

Mr. and Mrs. Ross Armitage and family spent the three-day holiday with Mr. and Mrs. Jay Armitage and family at Weippe, the whole group going on to the Bungalow to enjoy a fishing trip.

The W. L. McCreary family, accompanied by Ray Easterbrook, spent the week-end visiting relatives in Seattle. McCreary and son Parker remained for a longer visit.

Mr. and Mrs. Ralph Reid and family moved into their new home in the east part of town Saturday. They purchased the incomplete house from Ted Vaughan some months ago, and fished the construction and painting themselves, as time permitted. It is now a very neat and comfortable residence.

Mr. and Mrs. Manning Onstott and family spent the Fourth at Coeur d'Alene, the guests of Mr. and Mrs. Ed. Ring. They came back to Spokane Saturday where they were the house guests of Mr. and Mrs. C. H. Hansen, returning home Sunday evening.

L. J. Herres went to Spokane the Fourth to spend the day with Mr. and Mrs. Jack Johnston, joining Mrs. Herres, who had spent several days in the Johnston home.

Miss Marion Lowery, Pullman, and Mr. and Mrs. Chauncey Kennedy and children Lowell and Kay, of Colfax, were Fourth of July guests in the Marvin Long home. Miss Lowery and Mrs. Long are sisters.

Mr. and Mrs. Edgar Dammarell and family spent July 4th in Grangeville. They visited en route in the Paul and Quentin Dammarell homes at Craigmont.

Mrs. Bonnie Easterbrook and sons Jack and Gene spent the 4th with Mr. and Mrs. Ervin Swenson at Leland.

Mrs. Addie Sayer of Parma, Idaho, and Mrs. Laura Black of Caldwell, Idaho, are here visiting in the Claud Craig and Bonnie Easterbrook homes. Beverly and Marilyn Schupfer were Lewiston visitors Thursday.

Orville Sparber was a Lewiston visitor Friday.

Mrs. Leonard Fairfield and son Buford spent the Fourth with relatives in Spokane.

Mrs. John Cargill was a Spalding visitor the Fourth.

Donald Keeler, who had spent the past two weeks here with his aunt and uncle, Mr. and Mrs. Ted Vaughan and son, left for his home in Spokane Friday.

Miss Dorothy Holt was a Moscow visitor on Monday.

Roy Ramey was a Moscow business visitor Tuesday.

Dinner guests the Fourth in the home of Mr. and Mrs. A. G. Peters were: Mrs. Ollie Fields, Dallas, Texas; Mrs. Rachel Daugherty, Mr. and Mrs. Frank Bregal, Mr. and Mrs. Robert N. Olsen and Leo Peters, all of Spokane; Virgil Flesham and son Cecil of Clarkston; Elmer Peters, Gordon Peters and daughter Daflene and Verna Easterbrook, Kendrick.

Mrs. Rachel Daugherty of Spokane and Mrs. Ollie Fields of Dallas, (Continued On Page 2)

## NORTHWEST WHEAT MARKETS HIT NEW CROP BASIS

Cash markets in the Pacific Northwest fluctuated widely early in the week but later in the period prices were rather definitely established on a new crop basis, according to reports received by the Production and Marketing Administration by the U. S. D. A. Wheat markets in this area were somewhat slower reaching a new crop basis than in the mid-western markets, as prices are generally quoted on a 15-day delivery basis, and new crop deliveries, in quantity, could not be made within that period. With flour mills and the feed trade interested in some wheat for spot or quick delivery, prices for such delivery held firm, resulting in a very irregular market during the period. Bid prices for the ordinary export grades of wheat at \$2.07 per bushel were 8c per bushel below the price quoted a week ago and 24c per bushel lower than was quoted earlier in the week. Feed grain prices were also irregular with corn especially strong. Growing grain crops in the Pacific Northwest have been greatly benefited by rain and cool cloudy weather during recent weeks, and reports indicate the wheat crop in the three states will be about an average. Wheat harvesting has been in progress to a limited extent during the week in the Columbia river counties but is not expected to become general in the earlier districts of Oregon, Washington and Idaho until next week.

The cash wheat market at Portland was somewhat unsettled during the week, with prices generally in the process of adjustment to a new crop basis. Trading was reported to have been very, very light, with practically no offerings from the producing areas. Growers are reported to be more interested in getting ready for harvest, than in selling what little grain yet remains in their hands. The Commodity Credit Corporation was reported to be accepting new wheat for August 15 delivery at \$2.05 per bushel, basis No. 1, delivered or truck at terminal markets, and at \$2.03 per bushel on the same basis for delivery August 15 to 31, 1947. Shipments to the terminal markets held up fairly well with 86 cars reported at Columbia river terminals and 135 cars at the Puget Sound terminals, compared with 136 cars and 130, respectively, a week ago.

Bid prices at the Portland Grain Exchange on June 26, were as follows: Soft white, soft white (No. 2), white club, western red and hard red winter, all \$2.06 per bushel, basis No. 1, bulk, for 15-day shipment, coast delivery. No bids were available on the higher milling types.

Wheat receipts at Ogden during the past week were 54 cars, compared with only four cars the preceding week. Quotations were \$2.31 per bushel for all classes, with no premium for higher milling grades. Prices f. o. b. country shipping points averaged about 16c per bushel under Ogden.

The San Francisco wheat market was quiet but steady during the week, with prices largely unchanged compared with the previous period. While local demand was quite slow, offerings were only moderate and this made for steadiness. California growers generally were marketing supplies rather slowly following the declines of recent weeks, while offerings in other areas also were relatively light. On the other hand, supplies appeared well in line with local needs. Bay region mills reported a slow flour business and were quite selective in their wheat purchases.

Cash wheat in the Kansas City market failed to hold the pattern set by futures and spot values were off as much as 8c on ordinary type hard winter. Arrivals totaled 1,233 cars with only an occasional car of Kansas new crop origin. Excess moisture was not an important factor, as less than 10 per cent of the arrivals graded "tough." Demand was good, although the bulk of arrivals were applied on "to arrive" purchases.

The Minneapolis cash wheat market was very unsettled at the close of the week, after giving a good account of itself earlier.

Small grains made generally good growth in the northern portion of the country, but cool and rainy weather in the middle and southern sections retarded maturity and delayed harvesting. Winter wheat is in generally good condition and is beginning to head to the northern border states and harvesting has advanced northward to the Ohio valley and Missouri. Spring wheat made very good progress and is mostly in very good condition. Wheat is showing improvement in the Pacific Northwest.

Wheat is ripe or nearly so to the Oklahoma-Kansas border, with a negligible damage from stem rust. There is a bare trace of rust in the panhandle of Oklahoma, but practically none elsewhere in northwest Oklahoma or on wheat in the Texas panhandle.

## Temperature Climbs

Locally, the red fluid in the thermometer bulb has been having quite a bit of fun climbing upward in its tube the past few days, hitting from 87 to a high of 94 Tuesday afternoon.

This weather suits the farmers perfectly, since there is now plenty of moisture in the ground to assure filled wheat heads — and having it making excellent progress.

## Now Improving

Mr. and Mrs. Wade T. Keene drove to Colfax Sunday to see Mrs. Ira Havens, at the Colfax Clinic. She has been gravely ill, but they report her condition as improved.

## Kendrick Almost "Ghost Town"

One could almost call Kendrick a "ghost town" on the Fourth and the following Saturday and Sunday, for the streets were almost deserted — Saturday night, as usual, showing the greatest signs of life.

It is the first real Fourth of July holiday that business men have been able to enjoy for some seven years — and one certainly could not blame them for taking advantage of it. Our governor certainly lost no votes by adding Saturday to the legal holiday list.

Service station operators report the Fourth a "poor business day."

## TWO PIONEERS OF THIS AREA CALLED BY DEATH

Harvey Southwick

Friends from many parts of Potlatch ridge and the Lenore area were in Lewiston Monday to attend funeral services for Harvey Southwick, a pioneer of the Cream ridge area, which were conducted from the Brower-Wann chapel with the Rev. A. C. Wischmeier as officiant. Hymns were sung by Mr. and Mrs. Earl Wilson, accompanied by Mrs. Volney Miller, organist.

Interment was at Normal Hill cemetery, with the following acting as pallbearers: Harold Powell, Will Dyvret, Jack Ferrell, Henry Davis, Walter Eberhardt and James Gillespie. — Lewiston Tribune.

## Andrew C. Longeteig

Andrew C. Longeteig, 70, Nez Perce county resident since the middle 80's, including 26 years in Lewiston, died at 4:00 o'clock Saturday morning at St. Joseph's hospital. He suffered a stroke a short time before and expired a few minutes after entering the hospital. His home was at 1502 G street.

Mr. Longeteig was born in Bergen, Norway, Feb. 18, 1877, and came to the United States with his parents, Mr. and Mrs. Chris Longeteig, when he was 7 years old. The family first settled briefly in Minnesota and more than 60 years ago moved to Idaho. Chris Longeteig operated a store at Southwick for many years, and there Andrew grew to manhood. On Feb. 17, 1905, Mr. Longeteig married Anna B. Rekdahl at Greer. He farmed on Nez Perce prairie for many years, retiring in 1921 and moving to Lewiston.

Mr. Longeteig was a member of the United States Naval academy at Annapolis.

Richard Frank Harris, 18, son of Mr. and Mrs. Frank G. Harris, Lewiston, died at 4:00 o'clock Saturday morning at St. Joseph's hospital. He was a graduate of Lewiston high school, was riding to Spokane with his parents Thursday of last week when he heard the Associated Press radio report announcing his appointment to the United States Naval academy at Annapolis.

In March Rep. Abe M. Goff informed Harris he was an alternate for the academy appointment, but no other word had been received until the radio announcement.

The appointee was born in Lewiston and has lived there all his life with the exception of three years at Kendrick and a year at Wallace. This year he was graduated from the Lewiston high school where he participated in the following activities: Yearbook staff, band, Commercial club, orchestra, Purr club, council, Melody Makers and Press club.

Harris, who is working at Potlatch Forests, Inc. this summer, first became interested in the academy last winter when he passed the examinations for naval ROTC training. — Lewiston Tribune.

Our Note: Dick was a popular high school student, and all his friends here will be glad to learn of this wonderful opportunity.

## Local Fire Wardens Busy

Henry Jones and Clarence Perryman were plenty busy July 2nd, 4th and 7th, with a total of six fires being fought during those three days. The fire July 2nd was on the Herman Lohman pasture land south and east of town, and adjoining the village park. It burned about an acre of thick brush and down timber. The cause of this blaze is unknown.

On July 4th a fire was fought at Hatwai creek, which burned approximately 17 acres of grass. The next report came from Lookout point on the grade, where four acres of grass were burned. Two other fires also occurred on the grade of about 10 acres each. These fires were all caused by fireworks, and the two wardens made seven arrests — the culprits admitting their guilt. Bud Huddelson, deputy sheriff, who was assisting in the fire fighting, also made several arrests.

The last fire was at Lapwai July 7, when a total of 18 acres of standing wheat and 15 acres of pasture were burned. The cause of this latter fire is also believed to have been fireworks, but no arrests were made.

There was lots of volunteer help in fighting all the fires with the exception of that on the Herman Lohman pasture, which was controlled with the help of Sam Stedman and Frank Dammarell.

Mr. Jones issues a stern warning regarding fireworks, cigarettes, etc., as well as burning without a permit. He states his orders are to make arrests — and he will follow them.

## Wins In Bareback Riding

At the three-day celebration and rodeo in Coeur d'Alene, Jack Maynard, Kendrick placed second in the bareback riding and first in bull riding for day money in the final performance.

Betty Jean Maynard, daughter of Mr. and Mrs. Maynard, was one of the trick riders at the show. Betty Jean is 16 years of age and this was her first professional appearance.

## INTERESTING HAPPENINGS FROM THE LINDEN AREA

Mr. and Mrs. Ray Weaver and son left Sunday for their home in Montana after visiting over the holidays with his brother, Lester Weaver, and family.

Mr. and Mrs. Horace Rainey and children from Vancouver, Wash., visited Mrs. Annie Weaver and other relatives over the holidays — Mrs. Annie Weaver and daughter, Dayma, returned home with them for a visit.

Mr. and Mrs. Earl McDowell are enjoying a week's visit with her sister-in-law, Mrs. Vernon St. Marie, and two children from Lewiston.

Carlton French and his son-in-law and daughter and their son, of Corona, Calif., and his sister, Mrs. Ed. Ruberg and husband, Clarkston, were callers at the Frank Lyons home Thursday. Mr. French taught the Gold Hill school about 40 years ago. This was his first visit here in a good many years.

Mr. and Mrs. Dan Whybark and daughter, Miss Elsie Whybark, and Mr. and Mrs. Earl Gaskill and daughter of Juliaetta attended Sunday school and spent the remainder of the day with Raymond Whybark, Sunday.

The Al Pederson, Frank Lyons and Stewart Wilson families were picnicking on Three Bear the Fourth. They report huckleberries very, very scarce.

Mr. and Mrs. George Souders and son and Mr. and Mrs. Frank Souders, Jr. and son, from Kellogg, visited with Mr. and Mrs. Frank Souders, Sr. over the holidays. Mr. and Mrs. Geo. Souders returned home Sunday, but Mr. and Mrs. Frank Souders stayed to help care for his father, who is seriously ill.

Mr. and Mrs. Arthur Foster and family spent the Fourth with Mr. and Mrs. Arley Allen.

Marjorie Foster went to Orofino Saturday to spend some time with Mr. and Mrs. Edgar Bohn.

Mrs. Robert Chilberg entertained on Tuesday, July 1st, at a party for little folks — honoring their son Allan's 10th birthday anniversary.

Mr. and Mrs. Dan Kechter were Sunday afternoon visitors in the home of Mr. and Mrs. Harley Perryman. Mr. and Mrs. Al Pederson and two little sons were visitors that evening.

Mr. and Mrs. Robert Chilberg and family went to Spalding park for a picnic lunch July 4th, going on to Winchester that afternoon to attend the celebration there.

Theodore Weaver went to Kendrick for a picnic lunch in the park with the Mrs. Annie Weaver, Sanford Weaver and Horace Rainey families, July 4th.

Guests at the Clem Israel home over the holidays were Mr. and Mrs. James Cuddy and children from Woodland, Wn., Mr. and Mrs. Riley Long and Mrs. H. A. Holmes from Seattle, and Junior Israel, who is home on a 30-day leave from the navy.

Mrs. C. L. Murray and daughter Beatrice returned to their home at Spokane Sunday, after spending the holidays with her parents, Mr. and Mrs. Chas. Keeler and other relatives.

Donnie Keeler returned to his home at Spokane Monday, having spent the past two weeks with his grandparents, Mr. and Mrs. Chas. Keeler, and his uncle and aunt, Mr. and Mrs. Ted Vaughan, Kendrick.

Mr. and Mrs. Wm. Morris of Ritzville, Wn., and Mr. and Mrs. Donald Browning and son of Richland, Wn., were dinner guests in the Ramey Hunt home Saturday.

Mr. and Mrs. James Cuddy and family of Woodland, Wn., arrived here Thursday evening to visit their parents, Mr. and Mrs. Ray Cuddy and family and Mr. and Mrs. Clem Israel and family. James returned to his work at Woodland Sunday evening, but Mrs. Cuddy and children will remain for a longer visit.

Sunday dinner guests in the James Holt home were Mr. and Mrs. Ray Cuddy, Elmer, Bill and Wilma; Mr. and Mrs. John Cuddy and family, Mr. and Mrs. James Cuddy and family, Richland, Wn., and Mrs. Dick Cuddy and daughter, Kendrick. Mr. and Mrs. Rollin Armitage and family were evening callers.

## 4-H Awards Doubled

Sectional awards in the National 4-H Meat Animal Program have been doubled this year, the National Committee on Boys and Girls has announced.

As a result, the two highest scoring state winners in this Western Extension will each receive an educational trip to the National 4-H Club Congress in Chicago next December. Previously only one state winner in each of the four extension sections was awarded the trip.

The county, state, and national awards of medals, gold watches and \$200.00 scholarships, respectively, provided by Thomas E. Wilson, Chicago meat packer, remain the same. This is the eighteenth consecutive year of the activity, which is conducted under the direction of the Federal and State Extension Services.

Last year's state winner in Idaho was Raymond Dillon of Caldwell.

**WELCOME**  
**To The Kendrick Club**  
 BEER, LUNCHESES  
 Dancing Every Friday & Sat. Nite  
**NELDA & BOB BREWER**

**PERSONAL MENTION**

Texas, accompanied Virgil Fleschman to Kellogg, Saturday, after having spent the past two weeks visiting in the A. G. Peters home.

Week-end guests in the home of Mr. and Mrs. A. G. Peters were Mr. and Mrs. Frank Bregal, Leo Peters and Mr. and Mrs. Robert N. Olsen, all of Spokane, and Elmer Peters.

Clyde Daugherty, Jr., Spokane, visited Sunday evening in the home of Mr. and Mrs. A. G. Peters.

Mr. and Mrs. Chas. Andres and daughter spent the Fourth and the following holidays at Coeur d'Alene, visiting relatives.

Mr. and Mrs. R. L. Blewett and son Billy spent the week-end at their home here, coming over from the Gifford ranch.

Mr. and Mrs. George Jones and family of Uniontown spent the week-end in the home of her parents, Mr. and Mrs. Wade T. Keene.

Mr. and Mrs. J. S. Craben of Rupert, Idaho, were Fourth and week-end guests in the Jasper Nutting home. On Monday afternoon all went on a fishing trip to the Marble creek section.

Mr. and Mrs. O. W. Layman and Mrs. J. S. Layman, all of Portland, and O. N. Layman of Lewiston were Fourth of July and week-end guests in the Paul Lind home. They left Wednesday for their homes.

Donald Stroh, who is attending the U. of I., and Bob Lind, drove to Gooding, Idaho, to spend the holidays in the Stroh home.

Mr. and Mrs. Elmer Clayton of Moscow were Sunday guests in the Jasper Nutting home.

Mr. and Mrs. Paul Lind and Mr. and Mrs. O. W. Layman visited in the Leon Lind home at Gifford, Sunday.

Mr. and Mrs. Tom Rodgers, Tommy and Karn, formerly of Moscow, are guests in the A. J. Sheneman home. They will remain here until living quarters can be located in that city, as their home was destroyed by fire.

Mr. and Mrs. Ray Hathaway and daughter of Spokane spent the week-end in the home of her parents, Mr. and Mrs. Clifford Davidson.

Mr. and Mrs. Roy Long and daughters of Spokane spent Saturday and Sunday in the Ed. Long home. W. E. Wright of Spokane, was also a guest.

Mr. and Mrs. Charles Lewis and Mr. and Mrs. Wayne Lewis and sons of Riverside, Calif., were visitors here over the Fourth. Mr. and Mrs. Charles Lewis were former residents, leaving here about 20 years ago.

Mr. and Mrs. Bob Fuller and children, who have been visiting at the home of her grandmother, Mrs. Sam Bigham, left for their home at San Francisco Sunday morning, flying their own plane. They were taken to the Pullman airport by Mrs. Fuller's mother, Mrs. Fox.

Mrs. Chas. Fox, who has been visiting in the home of her mother and brother, Mrs. Sam Bigham and Walter Bigham, left by car for her home in San Francisco Monday morning. She was accompanied by Marybeth Benscoter, who will visit several weeks in the Fox home.

Thirty-three Potlatch residents took part in a cherry picking bee at the Bigham home on American ridge Thursday. The group enjoyed a picnic lunch on the lawn at the George Havens home at noon.

Mr. and Mrs. Geo. Havens and family and Ira Havens, the latter of Moscow, were dinner guests at the John Havens home in Moscow Sunday, where a family reunion was held. That afternoon Mr. and Mrs. Geo. Havens and Ira Havens drove on to Colfax to visit Mrs. Ira Havens in the Clinic there. They report her greatly improved.

Ira Havens, Moscow, was a Tuesday night and Wednesday guest in the George Havens home.

Mr. and Mrs. Otto Schupfer were Sunday evening callers at the Mary Deobald home. All drove down the gulch to inspect the new road construction.

Mr. and Mrs. Glen Hansen of Potlatch were Monday dinner guests in the George Havens home.

Potato chips, pickles, relishes, canned and cold meats and a host of other picnic supplies are available at Blewett's Grocery-Market. You'll find the price reasonable. 1-adv.

**How's The Pheasant Crop?**

How's the pheasant crop in your section? Ask the postman.

Aid of 186 rural mail carriers throughout Idaho has been enlisted by the state fish and game department. Maurice Lundy, wildlife restoration project leader, received approval of the postmaster general. Carriers who volunteer for the census will keep track of the number of pheasants, partridge, sage hens, quail and other upland game birds encountered on their appointed rounds and submit reports to the game department.

The first survey will be from July 1 to July 7 and will provide information on the spring hatch that will be useful to the fish and game commission in determining the 1947 seasons and bag limits. Another count by rural postmen will be conducted next January, and the third will be in March.

In reply to a request from Senator Henry C. Dworshak, the postmaster general's office said "the department will interpose no objection to rural carriers engaging in this work on a voluntary basis with the distinct understanding that they do not deviate from the official line of travel of their routes, or permit such assistance to the fish and game department to interfere in any way with the proper performance of their official duties. The carrier should be contacted through his postmaster and the approval of that official obtained in each case."

Lundy said he had presented the idea to a number of carriers who were enthusiastic about this suggestion and had offered their cooperation. The bird biologist expressed confidence that a good deal of accurate data on pheasants and other birds could be obtained from the postmen.

**Good Neighbor Policy Costly**

Since V-J day lend lease and similar policies have been discarded, but billions of dollars are still rolling out of the federal treasury to implement the "good neighbor" program. Loans, grants, and aid of other kinds are utilized, but one of the most remarkable plans is the inter-American institute created by Nelson Rockefeller in 1942. About \$70,000,000 have been expended to influence countries in Central and South America to improve the health and education of their citizens. Another activity of the state department is the "Voice of America" broadcast program sponsored to acquaint Europeans with the advantages of our way of life.

Congress has questioned some of the tactics used, as well as the loyalty of some of the personnel engaged in this activity. The program will be continued, however, on a streamlined basis during the coming year. Although foreign propaganda is difficult to counteract, it is obvious that the United States has already demonstrated its interest and benevolence in promoting stability and peace.

**TICKS ALWAYS DANGEROUS — USE CARE IN THE WOODS**

Along about this time of the year dog ticks, commonly known as wood ticks, get pretty active. These ticks carry the serious disease, Rocky Mountain spotted fever.

According to USDA entomologists we now have a low-cost, practical way of controlling these ticks. However, they can't be done away with completely because ticks attach themselves not only to humans and to dogs, but to a wide variety of small animals, such as field mice.

It's good to know, though, that a light dusting of DDT at the rate of about 1 ounce to 1 thousand square feet of area is enough for tick control. This application rate is light enough so it won't endanger children, dogs and pets. One dusting applied early in the season is usually enough to do the trick, but a second dusting may be needed if they appear later.

It's a good idea to spray or dust areas along paths and roads, as this pest usually moves toward roads and paths — probably attracted by the scent of dogs and other animals, including humans.

If your children play in the woods and fields, or come in contact with dogs the Bureau recommends daily inspections for ticks.

If you find a tick on the youngster be careful and don't crush it, the tick, that is. It's best to use tweezers and to remember that the body fluid of infected ticks will transmit the disease. A tick doesn't ordinarily transmit Rocky Mountain spotted fever until it has been attached for five or six hours — another reason why a nightly inspection is a dandy safeguard against this deadly fever.

**Special Hunts Coming Again**

Special hunts for bighorn mountain sheep and moose will be repeated in Idaho next fall if recommendations of conservation officers meet with the approval of the fish and game commission at its next Boise meeting. T. D. Bladreau, big game supervisor, states that short hunts for limited numbers of bighorn rams and bull moose had been proposed by the field force. The suggestions were made at recent district meetings at which seasons for hunting big game, game birds and trapping fur were thoroughly discussed.

Short, supervised hunts for bighorn sheep and moose were conducted last year for the first time in many seasons. Thirty-five permits for mature bighorn rams were issued in a public drawing. Thirteen head were killed. Thirty bull moose permits were issued and 26 were killed. Sheep were hunted in portions of Custer, Lemhi and Idaho counties. The moose event was in Fremont county north of Ashton.

Conservation officers of District III (south central Idaho) suggested that a special hunt for mature bighorn rams with at least three-quarter curl, be conducted September 10 to September 20. They said 35 permits would be a suitable number.

Dates for the suggested moose hunt would be Nov. 9 to 14, and 30 permits would be issued, according to the views of officers of District V.

A special hunt for elk in the Pocatello game preserve, October 1 to October 7, with 100 permits issued, was also recommended.

**Spends Millions Each Year**

Your state government uses a lot of supplies and equipment—for offices, for buildings and maintenance, for food and clothing, for institutions and for cleaning, painting, and many other purposes. Millions of dollars must be expended each year to keep state government functioning and to provide the services expected by the taxpayers.

The state purchasing department is under the supervision of the state purchasing agent, who also acts as disbursing officer for the bureau of supplies and chairman of the board for war surplus.

The department is made up of two main divisions — general purchasing of supplies for all Idaho institutions and departments and the bureau of supplies which operates as a central store to make possible buying in large quantities for redistribution to departments as needed. A third division, known as the war surplus division, was created by the legislature last winter for a two-year period to procure government war surplus commodities for state departments under the priority system of the war assets administration.

Head of the department is Harold A. Boyd, state purchasing agent. Dana H. Baker is deputy and Eleanor Williamson, formerly of Boise county, is secretary.

While the purchasing department often has to buy irrespective of prices, purchases are usually made through formal or informal bids. Much of the buying of the department is checked by the state board of examiners, of which the governor is chairman.

**DDT GETS 'EM!**

NOW IS THE TIME OF YEAR TO CONTROL ALL INSECTS AND PESTS ABOUT YOUR HOME!

Earwigs and Box Elder Bugs have been especially bad this year, owing to the late, damp spring — and now's the time to do something about it.

Come in and let us supply you with the proper DDT solution to destroy these pests. Costs are small — results are big.

**Have You Seen Those Discs?**

The flying disc reports of the past ten days undoubtedly have all the world speculating, and certainly, if nothing ever comes of it, they have provided a topic for endless conversation and conjecture about what they may or may not be (if such a thing there is).

Statements from scientists, college professors and an almost endless list of other learned men, have done nothing to clear up the situation, at least so far as the man in the street or farm is concerned.

The guess of these men ranges all the way from "optical illusion" to "floating weed seed" and reflections from high-flying planes.

The only parties of which we have heard locally of their having been seen come from Mr. and Mrs. Howard Rukgaber, Seattle, who state that they saw several of the discs.

Well, your guess is as good as anyone's — apparently!

**Idaho Has Gained Population**

Reports widely circulated in eastern magazines which show that Idaho has lost population since 1940 are without foundation. Earl W. Murphy, secretary of the Idaho State Chamber of Commerce, has stated emphatically.

"Idaho has gained 5 per cent in population since the 1940 census was taken," Murphy said. "In 1940 the state had approximately 525,000 population, and our latest estimate, prepared by Floyd West, assistant secretary, shows Idaho may have as much as 574,000 civilian and military population."

Idaho's population has kept pace with increased per capita wealth, larger agricultural earnings, more people under unemployment compensation, and other "normal" growth and the state has approximately 14,000 men and women still in the armed force.

**Particular Fish!**

Sandpoint — Those hulking kamloops of Fend d' Orelle lake are whimsical. They don't run true to form. Some celebrities they go for. To others they won't give a look.

Gypsy Rose Lee, a strip-tease artist of renown, spent a couple of days fishing for the noted rainbow. According to an account in the Sandpoint News Bulletin she summed up her success in a one word telegram: "Skunked".

Undaunted by the run of luck, the G-string champion said she would be back for another outing.

Miss Lee was fishing in the same water that produced a 30-ounce beauty that bit a Post Falls woman on the knee.

**Ex-GI has Pack Saddle Business**

Salmon — When Max Oyler returned after serving in both the army and the merchant marine during the war, he found his niche in Salmon by opening business to manufacture pack saddles — his own particular kind. Each saddle is Decker-type, hand made from the shaping of the side boards from native cottonwood to the canvas boot and rigging. Oyler operates his own shop and is finding a ready market among discerning packers, outfitters, prospectors, and sportsmen throughout the intermountain West. In addition he has at least two wholesale outlets. Each Oyler product has his trademark burned into the wood. It is "X-G-I."

**Golden Eagle Argument**

Mackay — The golden eagle argument is on again. Sportsmen attending a meeting here recently stirred the old issue with hot and heavy debate. Residents of the primitive area along Middle Fork of Salmon river contended that golden eagles are responsible for the destruction of mountain sheep lambs, fawn deer, and probably some goat kids.

L. L. Anderson of Meyers Cove said he had on several occasions noted eagles swooping above mountain sheep and forcing lambs to the edge of cliffs over which they plunged to destruction. He advocated a bounty on the big birds.

Others attending the district session declared that eagles were not capable of lifting objects the weight of young game animals, and that the stories were based on supposition rather than actual fact. Instances backing up both sides of the argument were cited. The upshot was a suggestion that the game commission give further study to the eagle question.

The bald eagle is secure no matter what punitive action is taken against his golden cousin. The bald bird is the national emblem and enjoys federal protection.

**4-H Club Health Program**

A new 4-H program designed to improve health conditions in rural areas has been announced by the National Committee on Boys' and Girls' club work. Urgent need for intensive and extensive health education is disclosed in recent surveys of families living on farms and in

many small communities. The program, which is conducted under the direction of the Extension Service, emphasizes group and individual health improvements on community, county and state levels. Recognition is also given on a national level to individual members. Objectives of the National 4-H

Health Improvement program are to help members and their leaders gain a personal consciousness and understanding of physical and mental health consistent with advancing standards and scientific knowledge; to help youth share in the responsibilities for improving home and community health conditions, and to

help young people grow and develop sound bodies and mature personalities. Honor award incentives to stimulate interest among club groups, as well as individual members, are being provided. Awards include a certificate symbolizing health to the club in each county conducting the best health improvement program. Ten cash awards of \$20.00 each will be given to the ten club which carry on the best health program in their state. The top ranking 4-H member in health achievements in each state will receive an educational trip to the 1947 National 4-H Club Congress in Chicago next December. County extension agents will furnish complete information regarding this activity to all club groups and their leaders.

ing began a "fixed" conversation, the idea being to make the old gal hurry and finish eating and leave. The first sailor said: "Boy, I'm glad to be back. First thing I do tonight is take a bath. I ain't had one for ten months." "Ten months?" cried the second. "I haven't changed my undershirt in a year. Japs kept us that busy." "Change your underwear?" sneered the third. "If it's anything like mine's grown onto my skin." Finally the spinster could stand it no longer. "Pardon me," she interrupted in biting tones, "but would one of you stinkers mind passing the sugar?"

**Speed Poses Real Problem**

A solid brass model of Lockheed Shooting Star (P-80, fastest plane in the world) failed to survive wind tunnel tests at transonic speeds in a recent test featuring Beman-Weaver "bump" in tests up to 850 miles per hour the trailing edge of the brass model's main wing section was literally chewed away and scattered throughout the tunnel.

**Common Scents**

During the war three tough sailors on terminal leave from the Pacific dropped into a restaurant for dinner. It was crowded and the only table they could get was one at which an old maid was leisurely dining. Reluctantly they took it and wink-

**Kendrick Gazette**

**Urge Industrial Dental Care To Reduce Absenteeism Rate**

Expansion of industrial dental health programs as a means of reducing worker absenteeism is urged by the Journal of the American Dental Association. According to a new study of Tennessee war plants published in the Journal, dental diseases were an important cause of industrial absenteeism during wartime.

Drs. Ruth R. Puffer and Carl L. Sebelius of the Tennessee department of public health reported that four Tennessee factories with 5,988 employees lost 1,255 employee-days in the year 1944-45 as a result of dental diseases. The annual absence rate due to diseases of the teeth and gums was 47.3 per 1,000 workers, Drs. Puffer and Sebelius said.

Women, they reported, had an absence rate of 64.5 per 1,000, almost twice that of the rate of 33 per 1,000 for men. The absence rate for Negro workers was recorded at 84 per 1,000. The average absence directly traced to dental diseases was for 4.4 days. Drs. Puffer and Sebelius declared that dental diseases may also have been the direct or indirect cause of other illnesses which caused absences and, in many cases, directly interfered with worker efficiency on the job.

**Little Arab Village Grows Into Big Near-East Port**

From an Arab village, the big Palestinian port of Haifa has turned into a metropolis of wide streets and public buildings, of banks, schools, restaurants and recreation centers. Its modernistic department stores and apartment houses—with their sweeping curves, glassed-in fronts, and severe straight lines—are typical of new architectural forms around the world.

In normal times the people of Haifa go briskly about their business at the docks, in the oil refineries and cement mills, the machine shops, cigarette factories, metal works and power plants. A pipe line more than 600 miles long brings petroleum from Iraq oil fields. Tankers are fed at the oil-jetty terminus, or by undersea hose that carries the vital fluid from the beach to ships anchored offshore.

Haifa's artificial harbor was created between 1929 and 1933 by dredging and by construction of huge stone breakwaters. Railways and highways link this eastern Mediterranean port with Egypt, Turkey and other Near East states. Airfields and seaplane landings are available.

**Watermelon Seed**

For the best methods of saving and preparing watermelon seed, select the largest melons in your patch, mark them and let them ripen thoroughly for seed. When the melon is cut, separate the seed, wash and spread them out to dry in the air for a few hours. Then place the seed in a cloth sack. This same procedure may be followed with cantaloupes, squash, cucumbers, pumpkins and cushaws. If you plant melons on a large scale, here's another method to follow in saving seed. Remove the flesh from the largest melons that have been saved and place in a barrel. Then fill the barrel with water. In from 48 to 72 hours, the flesh will go through a semi-souring process and come to the surface of the water. The meat may then be skimmed from the top and the seed removed from the bottom of the barrel, washed, dried and stored in cloth bags.

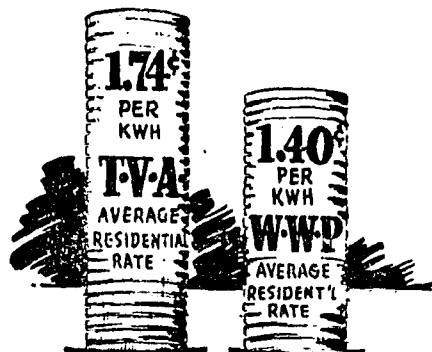

**Cantaloupe Nutritious**

Tests at the Arizona experiment station show that cantaloupes are so rich in vitamins A and C that one serving of the usual size furnishes more than the day's requirements for both vitamins. Not only are cantaloupes naturally rich in vitamin C; they also hold this vitamin well, even after they are cut and prepared for serving. This makes them an exception to the general rule that the less acid a fruit contains, the more easily it loses C. Cantaloupes are low in acidity compared to many fruits, yet their vitamin C is relatively stable. Tests at the New Mexico station showed that cut slices of cantaloupe kept in the refrigerator 2 to 4 hours lost none of their C; those kept 18 to 21 hours lost only 13 per cent. The Arizona station found that small if any loss of C occurred during the time cantaloupe is generally held after cutting.

**Bad Posture**

Poor posture reduces the circulation locally and generally, perhaps serving a temporarily useful purpose during relaxation but, if continued, diminishing the metabolism and efficiency of the cells and tissues, inducing sluggishness and drowsiness, authorities say. Breathing is shallow, with reduced oxygen available for the tissues. The abdominal organs sag and perform poorly, often with discomfort, resulting in constipation and headache. The physical and mental attitude is one of depression and sluggishness. Backache, leg and foot pain and fatigue are frequent symptoms of bad posture, and consequently stooping, heavy work and participation in sports are frequently avoided. Lastly, clothes fit poorly when the posture is bad, and the general appearance of the individual is distasteful to others.

**WASHINGTON WATER POWER CO. RATES are LOWER THAN EVEN THE FAMED T.V.A.**

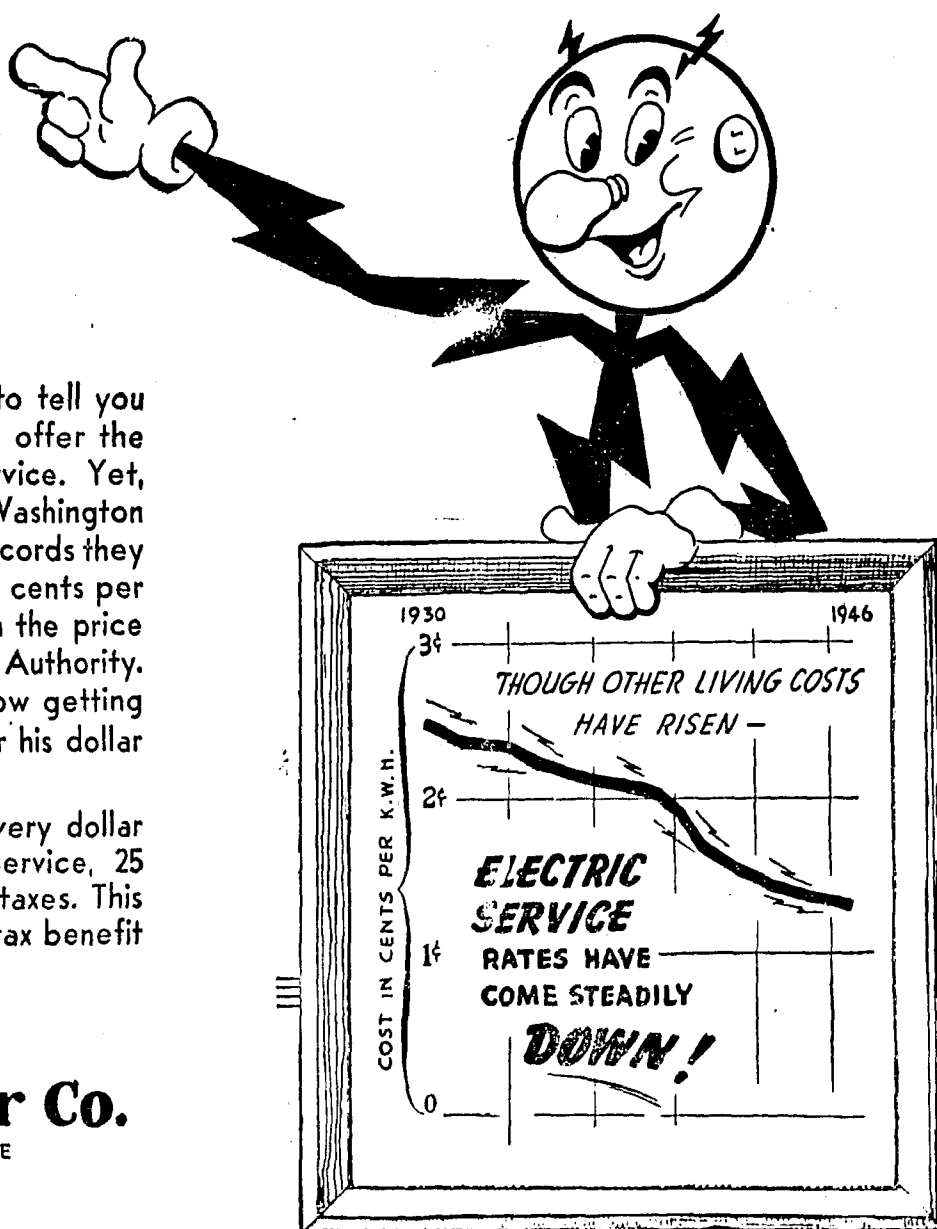

The Washington Water Power Co., through its experience of more than half a century, will continue to give you the best in electric service, always at the lowest possible rate.

Advocates of public power will try to tell you their nearly tax-free electric systems offer the lowest possible rates for electric service. Yet, when residential customers of The Washington Water Power Company examine the records they find they are actually paying only 1.4 cents per kilowatt hour, 20 PER CENT LESS than the price demanded by the Tennessee Valley Authority. The average W. W. P. customer is now getting 61 PER CENT MORE ELECTRICITY for his dollar than ten years ago.

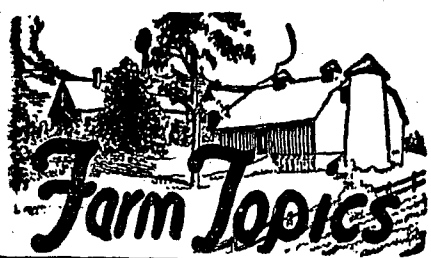

The records also show that out of every dollar you paid for dependable electric service, 25 cents came back to you in the form of taxes. This is not true of the T.V.A. In 1946 this tax benefit amounted to well over \$3,000,000.

**The Washington Water Power Co.**

A SELF-SUPPORTING, TAX-PAYING, BUSINESS ENTERPRISE

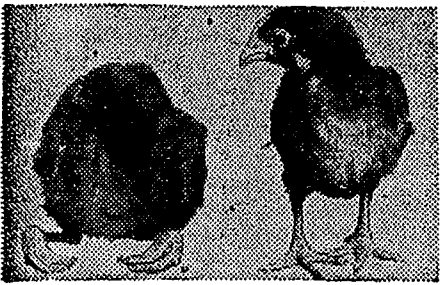

### Baby Chick Need of Riboflavin Is Great

#### Curled Toe Paralysis Caused by Deficiency

Riboflavin, a crystalline yellow vitamin containing nitrogen and ribose, has proven necessary for growth of poultry. It is also important in connection with the formation of an enzyme responsible for

Chick at left is afflicted with curled toe paralysis due to riboflavin lack. Right, same chick a week later after being furnished this vitamin.—Photo, University of Missouri.

utilization of feed within the cells of the body.

Riboflavin is widely distributed in feeding materials. It is present in greatest amounts in milk products, yeast, live meal, alfalfa, cereal grasses and byproducts of the fermenting and distilling industry. Only a few grams are required per ton of mixed feeds.

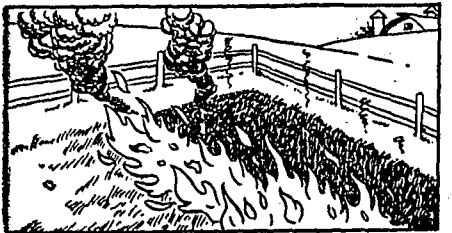

Many poultry authorities have stated there is an advantage in using natural riboflavin concentrates in preference to synthetic riboflavin. The natural concentrate generally supplies other important nutrients aside from riboflavin.

When chicks are fed a ration low in riboflavin, they start squalling and develop a condition known as curled toe paralysis.

In the past the lack of riboflavin in feed ingredients has caused considerable economic loss. Baby chicks require greater quantities than older birds. Deficiency in laying flocks lowers egg production and results in inferior eggs or poor hatchability.

### BURNING DESTROYS SOIL

When you burn straw, cornstalks and other crop residues on the field you lose valuable nitrogen and destroy organic matter vital to soil rebuilding and crop production. If the stalks of a 100-bushel corn crop go up in smoke 6,500 pounds of organic matter and 55 pounds of nitrogen

are lost. When you light a match to a mature sweet clover crop, you lose about 150 pounds of nitrogen and three to four tons of organic matter. It takes more effort to plow these materials under than it does to burn them, but an extra 10 to 20 bushels of corn per acre and a more fertile soil should be worth the extra trouble.

### New Disease of Sweet Potatoes in the South

A new and distinctive disease of sweet potatoes known as "internal cork" has been the subject of intensive studies by Dr. C. J. Nusbbaum, South Carolina experiment station. Sweet potatoes affected with the disease are characterized by the occurrence of dark brown, corky spots of irregular shape and size. There are indications that it may be possible to develop resistant strains. The disease is caused by a virus but little else is known about it.

### Farmers' Money Not All Increased Earnings

"What farmers do now with their liquid assets and credit will determine their financial position for the next two decades. It is imperative for farmers to recognize that much of their present money in fact is not increased profits. It represents the soil fertility sold off the farm, depreciation of buildings, fences and equipment. The money farmers now have, in large part, belongs back on their land—to restore soil—to modernize—" The Land.

### Trapping Is Good Way To Control Moles

In the spring the activities of the common mole appear to be more noticeable. Unlike rodents, such as rats and mice, moles live chiefly on earthworms and insects. The mole is unpopular with farmers because his tell tale ridges and mounds disfigure the fields, ruin new seedbeds and damage gardens and lawns. Trapping appears to be the most satisfactory way yet found to control the mole.

### Defective Vision Traced To Emotional Disturbances

Prolonged emotional disturbances can cause permanent injury to the eyes in persons with unstable sympathetic nervous systems, reports Dr. David O. Harrington, assistant clinical professor of ophthalmology in the University of California medical school.

Dr. Harrington reported the analysis of a large number of cases of defective vision in young men examined by him while on active duty with the navy during World War II. Several varieties of ocular diseases were brought about by various emotional disturbances in large numbers of young soldiers and sailors, he said.

The physician said that the young men in whom these psychologically induced ocular diseases were found had inherited a deficient autonomic nervous system which controls certain involuntary muscles in the blood vessel walls and thereby affects blood circulation.

When such individuals are subjected to severe emotional disturbances there is an involuntary, severe contraction of blood vessels in various parts of the body. In the case of the eyes this contraction may cause marked changes in the retina or sensitive nerve layer at the back of the eye. If the disturbance is short-lived, these retinal changes may disappear, but if it lasts a long time the damage may be permanent.

### A-B-C Listing Shows Uses Of Electricity on Farms

Electricity was a toy when Benjamin Franklin made his famous kite experiments 200 years ago. Today it has become an essential part of the daily lives of city dwellers and many Americans who live on farms. Electricity is not a luxury to many people; it is a necessity.

Recently electrification specialists of the department of agriculture made a tally of the uses to which electricity is put around the farm. The astonishing total of uses comes to 400. So varied are the uses of electricity that there is at least one use for practically every letter of the alphabet.

A typical A-B-C listing of farm electric uses might run like this: Aerating milk, brooding chicks, clipping livestock, drying hay, elevating grain, filling silos, grinding feeds, heating water, irrigating fields, jointing woodwork, killing insects, lighting farmsteads, milking cows, neutering livestock, opening doors, pumping water, quickening housework, refrigerating foods, sawing wood, turning grindstones, unloading hay, ventilating buildings, welding machinery, and X-Y-Z represent some 370 additional uses for farm electricity.

### Delicate Process

In making glass for spectacle lenses, carefully selected materials—sand, alkali and other substances—are melted together in special clay pots. The molten glass is poured on a large table and rolled to desired thickness, following which it is allowed to cool slowly for about eight hours. When properly cooled the glass is cut into squares, each of which is subjected to careful inspection. About one out of every four of these squares is rejected as below the standard of quality for spectacle lenses. The accepted squares are heated and molded to the approximate shape of the lenses desired, after which they are carefully annealed. The glass now is ready for grinding into lenses, a delicate, precision operation.

All steps in the production of ophthalmic glass are carefully controlled so that the glass will have the proper purity, uniformity and correct light refractive power.

### Speculate on Spawning

For tens of centuries the spawning habits of American eels were shrouded in mystery, and even now eels that inhabit streams of this country are the subject of fabulous speculations when fishermen get together.

The American eel is one of the most remarkable of the fishes inhabiting our waters. She is a depressed creature, but is a tough and voracious brawler that will devour anything she can overcome. Only the female eel is known to enter fresh water, according to scientists who have studied the migrations of this curious species.

Despite her snake-like appearance and movements, the eel is a true fish whose scales are embedded in a slimy and gelatinous skin. Through examination of these minute scales it has been determined that an eel has a life span of at least 37 years.

### Kitchen Is Fascinating

The kitchen is a fascinating place for the child as soon as he is able to move about. The kitchen furnishes more situations for learning than any other place he goes. Kitchen tools and equipment provide him with endless activities like dropping clothespins into a basket and fitting tops on jars and boilers. All his kitchen experiences help him to develop motor skills, judgment and ability to reason. The common everyday articles he uses are as valuable for learning as the most expensive "educational" toys. The child learns names of many things and what to do with them and so learns common words more readily by this association with objects.

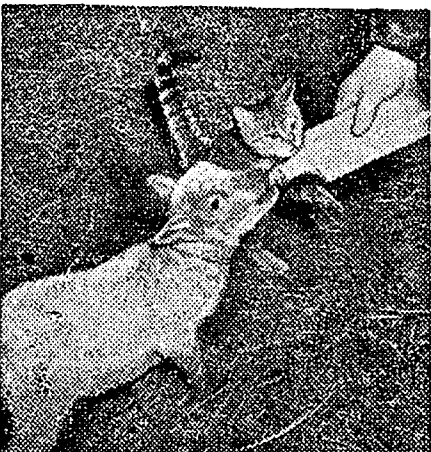

### Phenothiazine-Salt Mixture for Sheep

#### Reduction of Worms And Heavier Lambs

Tests have been carried on for four successive seasons at the Texas substation, Sonora, to determine whether continued licking of phenothiazine-salt mixtures is toxic to sheep, and also whether this practice will control infestations of stomach and other roundworms of sheep (without drenching animals individually). The pheno-salt mixture was kept before sheep on pasture all the time.

There were no harmful results; in fact, the lamb crops were 3 per cent heavier than during three previous seasons when salt alone was kept in the troughs.

Use of the phenothiazine-salt mixture also resulted in reduction and checking of worms. The sheep were heavily infested at the beginning—in ewes, 1,180 worm eggs per gram of feces; in lambs, 1,700 eggs per

This sturdy baby Southdown will gain by being fed phenothiazine-salt.

gram. In the fourth season, the worm egg count was down to 80 for ewes and 30 for lambs.

On the strength of these figures, Dr. I. B. Boughton, who did the work, concludes: "The mixture eliminated the need for individual treatment in the control of stomach and other roundworm infestation." Also, he says: "There was no ill effect on the health of either the ewes or the lambs."

### Salt Speeds Gains In Hog Feeding Tests

Hogs receiving some salt in their daily rations can gain two and one-half times faster than those without it, tests at Purdue university indicate. Average daily gain of hogs which received salt was 1.71 pounds, while those receiving none gained only .67 pounds daily. For each pound of salt consumed there were 45 extra pounds of gain. Each pound of salt saved \$5.60 worth of feed consumed by hogs.

### Alarm on Freezer

The symphony of the American farm, its cow bells, dinner bells and hog calling, soon will be joined by another sound, a distinct and not-to-be-mistaken alarm which is being added to the home freezer.

An extensive series of tests conducted by the USDA has resulted in the Brown instrument company developing an audible signal which will warn if home freezers cease operating. Electronic potentiometers record temperatures instantaneously and constantly at 16 points within each freezer.

Improved construction of the freezer and the warning signal will result in better food protection.

### Reenforce 2, 4-D

The mixture of ammonium salt of 2, 4-D at the rate of .15 per cent with 2.8 urea and ferate at the rate of 2 pounds per 100 gallons for small grains and grass is proving effective.

### Plow Down Cover Crop To Conserve Moisture

To save soil moisture, cover crops should be plowed down as early as possible. Cover crops, especially rye and vetch, grow fast and use a lot of soil moisture during warm days, Iowa State agronomists point out. If plants are allowed to grow too late they will take so much moisture that, without additional rain, there won't be enough to germinate newly planted crops. Nitrogen also will be added to soil.

### Prompt Handling Required To Save Vegetables' Value

Vegetables to be stored in home freezing units or lockers should be frozen, just as they should be cooked, as soon as possible after harvesting. This is the recommendation made by state experiment stations which have tested loss of flavor, tenderness and vitamin content in vegetables after the harvest.

"Prompt handling of garden products from harvesting to freezing is of the utmost importance," say extension specialists. "For example, holding freshly picked peas in a warm room for three to four hours will materially toughen the skins. Losses of vitamin C are greatest during this period."

One to two thirds of their original vitamin C value may be lost by vegetables in 24 hours at room temperature. If necessary to hold overnight, they should be placed in a refrigerator or covered with crushed ice. Never try to hold them after shelling, slicing or scalding.

The findings concerning the loss of nutrition are of importance to housewives who harvest or purchase vegetables for the table. Peas are an outstanding example of the loss of flavor due to delay in cooking or processing. Tests by the state experiment station at Geneva, N. Y., showed also that vitamin C content dropped as peas grew older. In lots harvested at different stages of maturity over a 10 day period, the oldest lots contained 36 per cent less vitamin C than the youngest. They also lost tenderness.

### Plant Extracts Surveyed For Antibiotic Properties

The green portions of sage brush, mountain pasque, juniper, wild buttermilk and water leaf contain compounds which may rival penicillin in their antibiotic properties, believes Dr. Harve J. Carlson, assistant professor of bacteriology, department of pediatrics, Western Reserve university.

A pound of plant material yields extracts equivalent to several quarts of penicillium culture. Some of the plants extracted in Carlson's laboratory come from the west coast, others from the Rocky mountain area; some are collected locally and some in Wooster, Ohio. Ether is used to extract the antibiotic substances.

Dr. Carlson is chiefly interested in finding agents that are active against virus diseases, particularly infantile paralysis, which resist the present-known antibiotics as well as the sulfa drugs. The antibiotics that he has found in plants destroy cultures of pneumococci and of typhoid types of bacteria.

### Penguins Are Comedians

Comedians in formal black-and-white dress—those are the solemn emperor penguins enticed from Antarctic shelf ice by men of the Byrd expedition for shipment to the Washington zoo. These flat-footed, flightless birds are partial to the southern hemisphere, says National Geographic society. Some species live as far north as the equatorial Galapagos islands. Unknown in the Arctic, penguins in the northern hemisphere are counted by the half-dozen in zoo and resort exhibits. Largest of nearly a score of living species are the emperor and king penguins. Their stalwart adults average a yard high, and include individuals that surpass 40 inches in height, 80 pounds in weight and an estimated 30 years in age. Small species grow only 15 inches tall. Fossil discoveries indicate many species that are now extinct, among them a family of six-footers! The rugged emperors incubate their own eggs and raise their downy young in the darkness of Antarctic winter when temperatures range from 40 to 80 degrees below zero. At this time their enemies, the leopard seal and the skua gull, are busy elsewhere.

### Colors Are Important

Psychologists report that there is much more to the selection of colors than just "liking them." Color has a definite effect on the emotions and, as a result, affects the individual physically and mentally. They point out that red is a strong color and can be stimulating to a degree of over-excitement. Blue is more soothing but, if used in too large quantities, becomes depressing. Yellow is a warm, happy color. Color experts claim that color can quiet down over-active people or "pep up" those who are listless. It can create a feeling of hunger or kill the appetite, induce a feeling of well-being or actually result in illness. Clever use of color can create many desired effects without awareness on the part of those living with it. For this reason, the homemaker should plan color schemes carefully, not only for decorative appeal but also for psychological effect.

### Testing Alloys

In a "bombproof" dugout at the Westinghouse research laboratories, engineers soon will determine the maximum strength of parts for aircraft jet engines. Disks of specially developed alloys, one foot in diameter and one inch thick, will be heated to temperatures above 1,400 degrees Fahrenheit and spun at the speed of 1,200 miles per hour—35,000 revolutions a minute—until they fly apart under the combined attack of centrifugal force and heat. The tests will reveal the ultimate strength of alloys now used in motors of jet engines.

Come Out And Have a Good Time

Prizes For Simplicity 4-H Club members in Idaho again have an opportunity this year to win special recognition for developing methods that will simplify their farm and home jobs. Recognition in the form of merit awards will be given on county, state and national levels in the 4-H Better Methods Electric Activity, the National Committee on Boys and Girls Club Work has announced.

Members need not have electricity on their farms to take part in this activity, which may be applied to all types of 4-H Club work. Last year county winners were named in Idaho, Jerome, and Blinn counties. Each county winner receives a gold-filled medal of honor. State and national winner in 1946 was David McClum, 14, of Preston, who received a trip to the National 4-H Club Congress and a \$200.00 college scholarship, provided by Westinghouse Educational Foundation. Among his work simplification accomplishments on the farm was installing water heaters in his poultry houses to provide warm water during the winter months. He also put into use other electrically-operated labor-saving equipment, such as stock fence, drill press, grindstone and constructed a portable motor.

Six state winners are selected for national honors each receiving a \$200.00 college scholarship.

The activity is conducted under the direction of the Extension Service of the State Agricultural College and USDA cooperating.

Fast Thinker At a recent contractor's meeting the boys present were each given one pair of nylon. As the last pair was handed out the man in charge said: "And now we would like to remind you that cards announcing the distribution of these nylons have been sent to your wives."

To which a voice in the rear boomed out: "If that's the case I want to change my pair from size 9½ to size 10½!"

"HOW'D YOU LIKE TO CUT DIESEL REPAIRS 50%?"

Folks using RPM DELO, the Diesel Engine Lubricating Oil that stretches time between overhauls, say it cuts repairs as much as 50%. And that's right, neighbors—RPM DELO Oil protects your Diesel, gives it longer life. Compounds in RPM DELO Oil make it stop ring-sticking and corrosion, cut carbon and sludge, stick to hot spots. The Navy uses it, too. Try it today!

 Rev. and Mrs. Swantz. Send the chil-  
 dren. All are welcome!

Fellowship Night on July 16,  
 Wednesday, at 7:30 o'clock. Films  
 will be shown of you and your  
 neighbors. Also various other films  
 of interest taken by your pastor.  
 You will enjoy the evening. Make it  
 a family night. Everyone is welcome.

**Bad Breath, Too?**

North Fork — Is mountain sheep  
 meat strong? Whatever the flavor  
 may be, it is getting stouter in the  
 vicinity of the Jack Smith ranch  
 five miles below this community on  
 Salmon river between Salmon City  
 and the middle Fork. Three mountain  
 sheep are regular visitors in his gar-  
 den. They prefer green onions.

Glen Richardson, game officer  
 at Salmon, believes garden damage  
 by mountain sheep is something new  
 and different. Deer and elk will occa-  
 sionally pick up a tidbit from a farm,  
 but sheep do not ordinarily get so  
 close to civilization.

The three sheep seem to have no  
 fear of the Smith family as work  
 proceeds about the ranch. They bed  
 down on a nearby hillside and chew  
 their onions.

Trade at home — it pays!

**Planning Coyote Control**

Boise — All state and federal  
 agencies engaged in the chore of  
 knocking down the population of  
 coyotes and other predators met in  
 Boise on July 7 to outline their cam-  
 paign for the next fiscal year. T. B.  
 Murray, director of the state fish and  
 game department, said the meeting  
 was being conducted a week prior to  
 the summer commission meeting,  
 also in Boise, so that approval of the  
 game department's participation may  
 be given at the earliest possible mo-  
 ment.

Representatives of the game de-  
 partment, U. S. Fish and wildlife  
 service, state predatory animal board,  
 and stockmen's associations took  
 part. A cooperative program utilizing  
 all available funds and manpower of  
 the several agencies will be under-  
 taken.

Reduction in coyotes, the most de-  
 structive animal preying on game  
 animals and livestock, has been noted  
 in the last several years, officials  
 stated. It is the hope of the  
 agencies that combined forces can be  
 brought to bear in a concentrated  
 campaign that will further trim the  
 ranks of coyotes and keep the popu-  
 lation at a low figure.

No bounty is paid by the fish and  
 game departments on coyotes or  
 wildcats. The only predator animal  
 bounty is \$50 on each cougar.

**Purchases "Jeep"**

So far as we know, Harold Parks,  
 Leland, is the first in this area to  
 own a "jeep." He having purchased  
 one last week.

Harold says he finds it quite useful  
 for "roustabout" work on the farm  
 and quick trips to town.

**NOTICE TO CREDITORS**

In The Probate Court of Latah  
 County, State of Idaho

In The Matter of the Estate of  
 Christian H. Molden, deceased.

NOTICE IS HEREBY GIVEN by  
 the undersigned Administratrix of  
 the estate of Christian H. Molden,  
 deceased, to the creditors of, and all  
 persons having claims against the  
 said deceased, to exhibit them with  
 the necessary vouchers within four  
 (4) months after July 4, 1947, the  
 first publication of this Notice, to  
 said Administratrix at the office of  
 Jack McQuade, Moscow, Idaho, the  
 same being the place for the trans-  
 action of the business of said estate  
 in Latah County, State of Idaho.  
 Dated this 27th day of June, 1947.

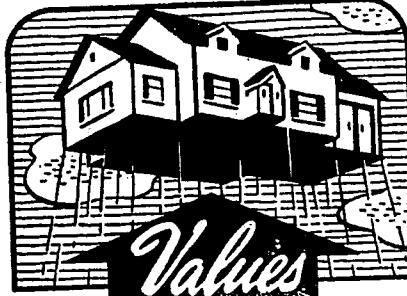

LAURA MOLDEN,

Administratrix of said Estate.

First pub. July 3, 1947.

Last pub. July 31, 1947.

Jack McQuade, Atty., Moscow, Ida.

**Larger Planes and Ships**

**Present Landing Problem**

Ship builders of the eighteenth  
 century would look with unbelieving  
 eyes if they could see the Queen  
 Elizabeth in New York harbor. So  
 would the Wright Brothers had they  
 not seen some of the progress in  
 airplane design since Kittyhawk.

Big planes mean many things:  
 Greater pay load, safety, speed,  
 comfort and cruising range. To  
 the paving engineer, however, they  
 mean only one thing—the need for  
 larger and more stable airport land-  
 ing and taxi strips.

Most airports were constructed  
 when planes weighed only a few  
 tons. Few envisioned the 50-ton B-29  
 that won a marvelous war record  
 (and could operate only from the  
 best and biggest of airports). But  
 the B-29 was only the beginning.  
 Now Consolidated Vultee has pro-  
 duced and flown the B-36, which at  
 this time is the world's largest oper-  
 able aircraft. This mammoth ship  
 has a range of 10,000 miles, a length  
 of 163 feet, a wing span of 230 feet,  
 and its operational weight is ap-  
 proximately 150 tons. Now engi-  
 neers explain that a ship of this  
 type on landing exerts a force on  
 the ground of between four to five  
 times its normal weight. This  
 means that a landing strip to handle  
 this ship must withstand weights up  
 to 750 tons.

The new Howard Hughes flying  
 boat is powered by eight engines  
 and will carry 700 passengers. In  
 any ocean that ship is going to  
 make quite a splash, and with  
 wheels it would take something out  
 of the ordinary in the way of run-  
 ways to handle it.

**Agricultural Research**

**Repays Large Dividends**

Dividends from agricultural re-  
 search repay the total cost of the  
 investment many times over each  
 year. One of the best examples is  
 that of hybrid corn research, cover-  
 ing a period of 30 years, during  
 which time the cost to the federal  
 government was about five million  
 dollars. During the same period the  
 states spent a similar amount on  
 this work. From the 10 million dol-  
 lars thus invested, the nation last  
 year collected a dividend of at least  
 three-fourths of a billion dollars.

The same yardstick of financial  
 return is applied to research activi-  
 ties on livestock improvement;  
 wheat, oats and other cereal crops;  
 butterfat production, etc. It is not  
 possible, however, to consider all  
 research strictly from the stand-  
 point of how much it adds to the  
 national income. Often the most  
 productive research is that which  
 makes it possible to avoid large  
 losses from insects and diseases of  
 crops and livestock.

Investments in this type of re-  
 search must be regarded as insur-  
 ance against losses which the coun-  
 try cannot afford to take. Public  
 health has been improved and aver-  
 age lifespan greatly increased as a  
 direct result of agricultural re-  
 search. In addition to federal and  
 state research, private industry has  
 spent millions, resulting in billions  
 added to the nation's wealth, as  
 well as a better nation of healthier  
 individuals.

**Dishwashing Hints**

You homemakers may welcome  
 a few motion savers for your dish-  
 washing KP duty which takes much  
 of your time. Home management  
 specialists have some suggestions  
 for you as a result of studies made  
 about the country. Save steps by  
 using a tray to carry soiled dishes  
 to the sink. Put pots and pans to  
 soak during the meal, or wash them  
 immediately if possible. Use waxed  
 paper in your baking dishes to  
 make cleaning easier. Keep a sup-  
 ply of paper towels handy and wipe  
 greasy pans with them. If you're  
 right-handed, wash dishes from  
 right to left. Rinse and stack dishes  
 on the right of the sink or dishpan  
 before washing. Then rinse and  
 drain dishes on the left of the sink  
 after washing. While the dishes are  
 drying wipe the glasses and silver-  
 ware. Rinse them in boiling water  
 so they'll dry fast.

**Treat Garden Seeds**

Garden seeds that don't come up  
 frequently are affected by damping  
 off and various seed rots. The fungi  
 that cause these attacks can be con-  
 trolled by dusting seeds with any of  
 several chemicals. The procedure is  
 extremely simple and almost cost-  
 less. A few cents worth of fungicidal  
 dust mixed with the seed will pro-  
 vide protection for your entire gar-  
 den. Tear open a corner of the seed  
 envelope and insert as much of the  
 fungicide as can be held on the  
 point of a penknife. The packet then  
 should be closed and shaken.  
 Larger quantities can be treated in  
 a tight-sealing jar.

**Huge Hangar**

A huge hangar, with a span of 340  
 feet capable of handling the biggest  
 bomber in existence, is being de-  
 signed for immediate construction  
 at the Rapid City, S. D., airfield. The  
 army said that construction, esti-  
 mated to cost about one million dol-  
 lars, would be supervised by army  
 engineers. The arch-type rein-  
 forced-concrete building will have a  
 door opening 300 feet wide by 40  
 feet high. The Rapid City field is  
 one of the bases of the strategic  
 air command, which operates the  
 "very heavy bombers" of the B-29  
 type and will get the B-36. The B-36  
 wing span is 230 feet.

# Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HELLO, THERE, FOLKS:

**About Flies And Weather:**  
Along came the warm weather, and with it a crop of the biggest and liveliest flies we've ever seen. Naturally, the only thing to do was to get out the spray gun and go to work on them with Miller's DDT. It really put that bunch of flies out of commission, and the nice part about it, is that now the walls and curtains are coated with DDT we need not spray again for several months, as Miller's DDT has lasting results.  
No doubt you too have noticed the new supply of flies the warm weather has brought us, but have you done anything about it? If not, don't delay — don't be bothered with such pests — come in today and get Miller's DDT. We have a complete line. For further information don't hesitate to drop in, and we will be glad to advise you on the type of spray most suitable for your need.

**About Ice Cream:**  
The 4th of July may be over and forgotten, but our supply of Potlatch Chief ice cream is bigger and better than ever. Don't be without a good supply of Potlatch Chief brand ice cream all the time — for it's just the thing to serve on these hot days.

**Woman Shopper:** "Have you really shown me everything you have in the shop?"

**Disgusted Merchant:** "Not quite, ma'am. We have an overdue account of yours on the books if you'd like to see it!"

**Bus driver (to little girl):** "You say you're only six? When will you be seven?"

**Little Girl:** "As soon as I get off the bus."

**Husband:** "I've been thinking it over and I've decided to agree with you."

**Wife:** "That won't do you any good — I've changed my mind!"

Frank Webber's brother from Los Angeles, Calif., is here visiting his mother, who is quite ill.

Mr. and Mrs. C. W. Jessup have returned home from a visit with a daughter, Mrs. Ethel Fullerton and family at Walla Walla. From Walla Walla they drove on to Yakima, where they visited a daughter-in-law and grandchildren. Mrs. Fullerton drove the Jessup car on the Walla Walla to Yakima trip.

Will Leland, Pritchard, Idaho, has returned to his home after a visit with his sisters, Mrs. C. W. Jessup, and Miss Ruth Leland, at the C. W. Jessup home.

### Veterans Finding Jobs

Unemployed veterans in Idaho are being rapidly absorbed in jobs, according to the Employment Security agency. It stated that unemployed veterans drew \$41,718 in June, 1947, under the G. I. Bill of Rights, and \$83,939 in the same month of 1946.

The group drawing self-employment payments is also decreasing, according to the agency. A total of \$208,138 was paid to self-employed veterans in June of 1946, while only \$157,868 was paid out in June, 1947.

The overall picture, however, is not too bright for the first six months of 1947, as compared to the first six months of 1946. Total amount of unemployed veteran benefits paid to ex-G. I.'s during the first half of 1946 was \$1,157,361, as compared with \$1,324,702 in the first six months of 1947. The same periods saw the payment of \$498,905 to self-employed veterans in 1947, and \$772,695 in 1946.

Claimants for unemployment compensation under the state program increased during the first six months of 1947, over the same period in 1946. In 1947 the total paid out during the first six months to unemployed workers was \$637,130, as compared with \$542,070 for 1946. The trend of employment is rather steady despite the small differences in payments to unemployed workers and to veterans' groups, the dispatch adds.

### Tourists Coming Our Way

Boise — Most popular travel areas this year are California, Idaho, and the Pacific Northwest, and the Canadian Rockies, the Idaho State Chamber of Commerce has determined.

"Our information comes from travel bureaus, chambers of commerce, national holiday and recreation magazines and other sources," Earl W. Murphy, state chamber secretary said.

The nation's vacation business in 1947 will aggregate \$10,700,000,000,

according to estimates of the American Automobile association, which predicted that 60,000,000 Americans will take vacations by motor and spend \$6,700,000,000 on their tours. Travel by air, rail and bus will add another \$4,000,000,000 to the grand total.  
Motoring vacationists, it is estimated, will spend an average of \$7.00 a day, or \$112 for a 16-day vacation. The average trip will be of close to 3,500 miles, compared with an average of 2,567 miles in 1946.  
"Also, we might point out that accident rates in national parks are increasing this year," Murphy concluded. "This is attributed largely to disregard of regulations."  
Planning a picnic? Cold meats, salad dressings, potato chips, coffee and tea for icing, olives, pickles, relish spreads, and all other types of picnic supplies are available at Blewett's Grocery-Market. 1-adv

Tests show Goodyear DeLuxe tires give longer tread wear... an extra margin of service and safety that swings the balance in favor of Goodyear. Buy wisely... go farther, safer... go Goodyear!
