## WHEAT MARKETS SUFFER DECLINE IN NORTHWEST

Wheat markets generally declined sharply near the middle of the week but at the close on the last day of the period a large part of the loss had been recovered, according to reports to the Production and Marketing Administration, U.S.D.A. Some of the factors contributing to the decline in the wheat market were reported to be—large scale selling of new crop wheat and smaller allocation of export wheat for September than had been expected. Sept. wheat on the Chicago Board of Trade declined 13 1/2 cents but later in the period the market reacted showing a net loss for the week of only 4 1/2 cents. Cash wheat in the Pacific Northwest markets, reflecting the declines in the futures and other cash markets, dropped 8 cents per bushel on the export classes of wheat, but reacted later in the week. Growers were reported to be selling rather freely at the higher prices which prevailed early in the week but after the decline in the market they lost interest. The Commodity Credit Corporation reported purchases of 1,083,333 bushels of wheat through July 25 to 30.

The cash market at Portland was somewhat irregular during the week with active bidding early in the period but with a decline in the market of 8 cents per bushel on ordinary classes of wheat, the activity slackened. Later in the period, however, when the milling interests entered the market, both for export and high protein classes of wheat, prices advanced and at the close 3/4 of the loss in prices for the week had been recovered. The high premiums that were quoted for Hard White (Baart) wheat both for medium and higher protein was an important feature in the market. Wheat harvesting is being completed in some of the earlier districts of eastern Oregon and southeastern Washington, with numerous reports that yields were better than had been expected.

Receipts of wheat at the terminal markets increased materially during the week with 391 cars reported at the Columbia River terminals and 738 cars at Puget Sound terminals, compared with 276 and 494 cars, respectively, for the previous week.

Bid prices at the Portland Grain Exchange were as follows: Soft White, Soft White (no Rex), White Club, Western Red, and Hard Red winter, all \$2.17 per bushel, bulk, basis No. 1 for 15-day shipment for coast delivery.

Parity Prices: July 15 — Wheat \$2.04, corn \$1.48, oats \$ .922, barley \$1.43, rye \$1.66, flaxseed \$3.90, soybeans \$2.22 per bushel; grain sorghums \$2.80 and beans \$7.78 per 100 pounds.

Farm Prices in the above order—\$2.14, \$2.01, \$ .922, \$1.57, \$2.36, \$5.79, \$3.09, \$12.70.

September grain export quotas of 1,197,500 long tons of wheat, flour (in wheat equivalent) grain sorghums and barley were announced today by U.S.D.A. This is a total of 44,938,000 bushels. It compares with revised August quotas totaling 1,364,500 long tons, or about 52,337,860 bushels. No corn has been allocated for September, and much of the corn originally allocated for July and August has been replaced by wheat and other grains.

Department of Agriculture will supply (1) all wheat excepting quantities going to Mexico and Bolivia; (2) all flour, barley and grain sorghums for U. S.-U. K. occupied zone in Germany and for U. S. occupied areas in the Pacific; and (3) all flour for Italy, Austria, Greece, and Trieste under U. S. foreign relief program administered by Department of State. All other quantities shown on the table will be procured through commercial trade channels.

The San Francisco wheat market developed a somewhat stronger tone during the last week with moderate offerings meeting improved demand. Prices generally around 2 1/2 cents higher compared with a week ago. Growers in nearby producing areas were marketing remaining wheat supplies quite slowly and there were no important offers from intermountain and Pacific Northwestern shippers except at prices above a shipping basis to central California markets.

Local feeders were reported as turning more to wheat in place of higher priced corn and Bay region entered the market for somewhat larger quantities, particularly of wheat with relatively high protein. Baart wheat continued to bring premiums ranging from 5 cents to 15 cents per 100 lbs. over ordinary offerings.

Market San Francisco, July 31: California grown No. 1, Hard White and No. 1 Soft White wheat \$3.95-4.00 per 100 lbs., bulk basis.

Washington-Oregon—No. 2 Soft White and No. 2 Hard Red winter with ordinary protein \$3.95-3.97 1/2 per 100 lbs., bulk basis.

Cash wheat at Kansas City held comparatively firmer than futures early in period but weakened and then broke sharply with futures on Tuesday, despite reportedly heavy Commodity Credit Corporation buying on downturn. Buying improved and smaller receipts of 6,472 cars in for period strengthened market. Cash protein premiums were also quite irregular.

The cash wheat market at Minneapolis was very unsettled and nervous during week as buyers and sellers both found it hard to follow premiums levels. Mills definitely on hand to mouth basis as some days they are in and out of market several times during trading session. Cash premiums weakened and by mid-week were down 7-8 cents. This, together with the break in September futures

## Commercial Club Meeting

The regular monthly meeting of the Kendrick Commercial club will be held next Wednesday evening, August 13, with the 6:30 dinner being served at Burt's Confectionery. Quite a number of important matters, including roads, will be taken up for discussion, and all members and friends of the organization are urged to be present.

Committee reports will be expected from appointments announced at the last meeting. So be there — and bring that report.

### Machinery Arriving

Machinery for the new Dixie Dry Cleaners began arriving Monday of this week, but Mr. Eich and son are "very unhappy" over the failure of some of the most important items to put in their appearance, even though they are supposed to have been shipped. They hope to be able to open on time, however.

made for quite a drop in values. However, light receipts coupled with revived interest by mills at a lower price level, boosted values, and at close cash premiums were paid over September.

Stocks of food grains, including corn, oats, barley, and rye were near 5 1/4 million tons larger than July 1 year earlier and amounted to 26,210,000 tons. Supplies of corn comprised over 20 million tons of this quantity. Oats stocks were nearly 4 1/2 million tons or only a little less than a year earlier. Barley stocks totaled slightly over 1 1/4 million and rye stocks nearly 66,000 tons. Consumption or disappearance of food grains to the first of July this season was 1 1/2 million tons greater than in the same period the previous year and amounted to 24 1/4 million tons.

Winter wheat harvest has advanced to the northern border states where it is expected to be in full swing next week. The condition of spring wheat is reported good and the crop is heading to the northern border.

Mr. Tschantz has been staying in Clarkston since that time to be near his father, who he reports is showing a slow but steady improvement.

### Bridge Gives Way

Tuesday afternoon the highway bridge at the edge of Julietaetta, across Middle Potlatch creek between Julietaetta and Kendrick, gave way, five of the stringers beneath the decking being reported as broken.

This bridge has long carried a "10-ton load limit," but logging and other trucks carrying far more than that have been crossing it — and finally it gave way. No one went "through," however, the breaking being discovered before that happened, and someone got hurt.

E. A. Kirkpatrick, Julietaetta, offered assistance with his big bulldozer, and at 1:30 Wednesday morning a detour was completed around the bridge — which again permits heavy hauling.

### Girls' 4-H Club Meets

The Future Homemakers 4-H club met at the home of Maxine Slind on Friday, July 25, with the club president, Darlene Whitcomb, presiding. The roll call and the minutes of the last meeting were read by Carolee McGraw, secretary.

Those present were Darlene Whitcomb, Loretta Whitcomb, Carolee McGraw, Doris Shreffler, Sharyn Sturman, Maxine Slind, Jeanette Shreffler and Mrs. Ingle, the leader.

Mrs. Ingle gave instructions on "Patching."

Joan Bells, from Iowa, was a club guest.

After the meeting refreshments were served and a recreation hour enjoyed.

### Millions Of Sweet Bees

Millions of the good sized striped fly, known as the "sweat bee" have been making this area their headquarters for the past couple of weeks.

These bees are the mortal enemy of the tussock moth, for which the timber was sprayed this spring, and it is thought that any moths surviving the spraying will meet their death at the hands of the bees.

### Have Leased Hotel

The Ruby Hotel has been leased from its present owner, Mrs. Runyan, by Mr. and Mrs. Chas. Greenwood, who will take charge Friday of this week.

## Temperature Climbs High

Last Friday, Saturday and Sunday were "sizzlers" in anyone's language, the mercury hitting 95, 96 and 96 on those three days, respectively, and coupled with the high reading was a humid air that made it seem all the hotter.

Monday night the temperature began dropping, and since that time it has been quite comfortable.

The high temperature has brought on winter wheat rapidly, and the grain trucks are now really rolling from dawn till dark.

## WHAT CAMERON FOLKS ARE DOING THESE DAYS

(Delayed)

Mrs. John Brockop of Minnesota; Edward Wegner of Portland, and Carl Wegner of Pullman were visiting with Mr. and Mrs. Herman Silflow, Tuesday. Mr. and Mrs. Ag. F. Wegner and Henry Bleck called in the afternoon.

### Pfc. Robert Tschantz Writes

The Philippines  
July 29, 1947

Dear Friends:

I left San Francisco for overseas duty on June 20th. We stopped at Hawaii, Guam and Okinawa, and were able to get off the ship at all three places. We had a very nice voyage except for the first night out, when we hit a brief but heavy storm.

We arrived at Manila, P. I., on the 18th of July. It is possible to see a lot of war damage — sunken ships in the harbor, and a lot of the buildings show how they have been shelled. We have been getting a lot of rain, since this is the rainy season here. We are stationed about four miles from Manila, and are living in tents.

My battalion is mapping a lot of the islands of the Pacific, and I am on the drafting end of this work.

There are a couple of good radio stations at Manila, and they carry all the overseas popular songs. All the announcing is done in English, so that makes it pretty good. You at least know what you have.

Will you please send the paper to me. I don't know if you are sending it free now. If not, I will pay for it when I get back.

Sincerely  
Robert Tschantz.

Pfc. Robert Tschantz; 34th Engr. Base, Photo Mapping Co., 29th Engr. Base, Topo. Bn., A. P. O. 900, c/o P.M., San Francisco, Calif.

Note: Thanks for the letter, Robert. Your paper begins this week.

### New Signs

Dick's Barber Shop is sporting a brand new window sign, and the Kendrick Club a new hanging sign.

## HAVE NARROW ESCAPE FROM DEATH; CAR IS TOTAL LOSS

Monday morning about 3:00 o'clock a car belonging to and driven by Ray Birge, and carrying as passenger Ramie Hunt, went over the Cedar creek grade about a quarter-mile this side of the Chas. Keeler ranch, did a flip-flop and lodged against a big pine tree — and then burst into flames, which quickly destroyed it and its contents.

Mr. Birge and Mr. Hunt received multiple contusions and a severe shaking-up, but were otherwise uninjured. Not knowing this, however, an ambulance was called and they were taken to St. Joseph's hospital at Lewiston for examination.

The gas tank on the car exploded, together with a five-gallon can of hydraulic brake fluid which was in the back seat, and thus defied the efforts of fire fighters to extinguish the blaze and save the car and contents, which included an estimated \$500 worth of tools belonging to Mr. Birge.

## Three Fires Reported

The local fire warden's office reports three fires over the week-end and so far this week. The first of these occurred Saturday evening about 9:00 o'clock, when about an half acre of tall grain stubble was destroyed on the Carl Gustafson farm on Big Bear ridge. The cause of the blaze is unknown, since it originated about 30 feet from the road — but long past working hours.

Sunday morning about 3:00 o'clock the fire fighters were again called out to extinguish a fire in tall grass above the Valley View dance hall. About an acre was burned over. This blaze was believed caused by a cigarette, since it began right at the edge of the road.

And Monday morning about 3:00 o'clock they responded to a fire call on the Cedar Creek grade, approximately a quarter-mile below the Chas. Keeler farm, caused when a car went over the grade, lodged against a tree, and caught fire. The blaze was held to a few trees.

## Game Returns Wrong

Our Cameron correspondent, Mrs. Fred Newman, calls our attention to errors in reporting the softball games, and says:

The game, Cameron vs. Millards, was won by Cameron, not Millards. The score was: Cameron, 22; Millards, 11.

The two games, Cameron vs. Julietaetta, played on July 14, with Cameron 15, and Julietaetta 9; and Cameron vs. the Red Cross Pharmacy, played on July 16, with Cameron 13, and the Red Cross Pharmacy, 18, were not reported.

Our Note: We're sorry. We picked up these scores from the "official" score board at the Bean Growers and it is probable that we overlooked a couple of games, as well as reporting one wrong. An "official" compilation of team standings will be made as soon as possible, and published.

## New Telephone Directory

The 1947 Potlatch Telephone Company directory left the press at the Gazette office Thursday evening, and was delivered to the local telephone company Saturday evening. It is now in the process of distribution by them.

More directories than ever before were required to meet the company needs — and of course many new names made their appearance.

Contrary to what might be expected, however, the "Jones, Davises, Browns, Whites and Blacks" did not lead in name totals, as they almost invariably do in the city. Locally, the Craig and Silflow names lead, with seven listings each, followed by the Joneses with six listings. There are quite a number of family names carrying five listings.

## Play Softball At Moscow

A pick-up team of softball players traveled to Moscow Sunday evening, and played a double-header with the Moscow Legion team, losing both games — 13 to 4 and 7 to 6.

The batteries for Kendrick were Trout and Andres, and O. Kanikkeberg and Andres. Homers were hit by Trout, Millard and O. Kanikkeberg.

A team from Kendrick will enter the district tournament at Moscow on Friday, Saturday and Sunday of this week. There will be two teams from Moscow and one from Potlatch, also. The winners of the tournament will enter the state playoffs at Caldwell.

## Scrubbing Swimming Pool

Draining of the Area War Memorial Swimming Pool was begun Monday morning, and as the water receded the interior of the pool was given a thorough scrubbing by Bob Fraser, life guard, and a number of volunteer assistants.

The water tests in the pool, as prescribed by state health department standards, were O. K., but the bottom felt "a bit slick," so it was decided that drainage and a good scrubbing was in order.

This operation will put the pool out of commission until Sunday, much to the disgust of the smaller fry in the territory — but will be all for the best.

## Another Pool Donation

Latest donors to the Area Living War Memorial Swimming Pool are Mr. and Mrs. Emil Silflow, Cameron, in the amount of \$10.00.

Unforeseeable heavy expenses at the last minute, raised construction costs considerable, and any gifts to the pool will be greatly appreciated,

He specializes in wiring of all kinds and appliance repair work. He has been here the past several days wiring farm homes for electric ranges, but will move his family here this week and be open for business August 11.

**Idaho Boosted In New York**  
The Far West, including Idaho, has grown greatly in recent years in "population, income, industrial stature and international importance," said a report in The Index, published by the New York Trust company. The report is based on figures compiled by industrialists, statisticians and information supplied by the Idaho State Chamber of Commerce. States listed as "Far West" include Arizona, California, Idaho, Nevada, Oregon, Utah and Washington. This region's "gains in both industry and population during the war were considerably greater than those of the United States as a whole," the report declared. With its vast store of natural resources and its rapidly increasing population, the Far West looks forward to "a continuing growth through development of new products and new markets."

Of Idaho, The Index report stated it was one of the leading states in the production of potatoes, and called attention to its irrigation and its vast wheat production. It also stated that Idaho has many more manufacturing establishments than at any time in its history.

"During World War II, Idaho mines are reported to have supplied about 95 percent of the domestic antimony production," said the report. "One Idaho mining company is producing currently at the rate of about 6,000 tons of antimony annually. Idaho is also producing considerable barite, a non-metallic mineral which has many uses and is in increased demand because of the working out of previously mined areas. Idaho has also gained in lumbering."

The report stated that many of the nation's largest corporations have recently established branches in the Far West and that readjustment of freight rates in its favor "is expected to bring new business to the region."

"Thus, it appears that Idaho has been discovered by the 'East,' and may expect more attention from that quarter in the future."

**Sheep Hunt To Be Held**  
The first of several special big game hunts scheduled during the fall of 1947, by the Idaho fish and game department, will be for mountain sheep rams of the Middle Fork of Salmon river, the department states. Dates which were set by the commission at a July meeting will be September 10 to September 20. Any licensed hunter, whether a resident or non-resident, may make application for one of the 35 permits to be issued. Applications will close August 19, and a public drawing, to determine the winners, will be conducted August 20. In making application the hunter should give his Idaho game license number and send a check or money order for the \$5.00 special bighorn ram fee. Cash is not accepted. Permit fees will be returned to persons who do not receive permits. A self-addressed, stamped envelope should be included. Bighorn sheep are rated among the greatest trophies a hunter can obtain in North America. Although

the number in Idaho is small, game men believe the removal of a few old rams with mature horns will not be detrimental. Last year, during the first Idaho sheep hunt in nearly 10 years, 13 rams were shot. Thirty-five permits were issued. Several permit holders did not hunt. The area for the 1947 hunt will be a remote, craggy region in the Middle Fork drainage of Lemhi county, a small portion of Valley county across the Middle Fork from Lemhi county, and a few miles of Idaho county in the same vicinity. Sheep hunters will obtain their \$10.00 tags at checking stations to be established in the area.

**Many Eggs "Taken"**  
Nearly 19,000,000 trout eggs were taken at seven fish and game department stations during the spawning season of 1947, James C. Simpson, fish culturalist, announces. Production of eggs was considerably larger than it was in 1946, giving promise of greater planting of fish in 1948, as many of the young trout will be raised at hatcheries during the winter and released next spring and summer.

Henry's lake led the list with 10,870,470 cutthroat trout. Spawns taken at other traps included: Coffee Pot, 3,951,000 rainbow; Granite creek, 538,000 cutthroat; Hayden creek, 424,000 cutthroat and 138,000 rainbow; Mackay, 694,000 rainbow; Mulvan, 918,000 rainbow, and Wolf Lodge, 1,970,000 cutthroat.

A salmon trap has been installed near Cape Horn in Custer county on a tributary of the Middle Fork of Salmon river in the expectation of harvesting eggs of chinook salmon. If a satisfactory number of eggs can be collected the spawn will be developed to the "eye" stage in a northern hatchery and placed in the upper waters of the Clearwater river, which used to have a substantial run of salmon, but has had none of the big fish since construction of a dam near Lewiston. Ladders have been built at the dam since the run stopped, but salmon have not returned.

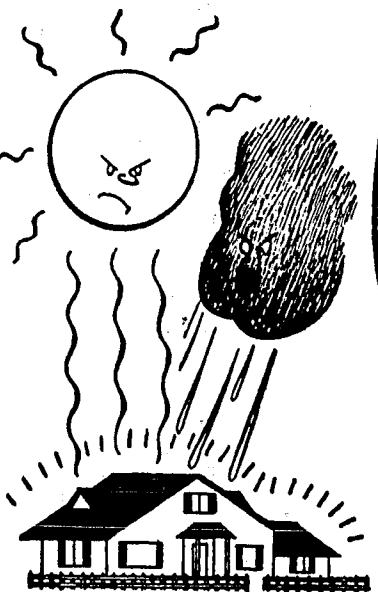

**Spokane To Be Big B-29 Base**  
The 92nd Bombardment Group of the Army Air Forces is to take over the army air field at Galena, the site of the Spokane air depot.

The 92nd Bombardment group is a part of the 15th Air Force and will have very heavy bombardment planes. It will also have a military personnel of approximately 3,000, and will employ a civilian personnel of approximately 300.

The air depot itself will be kept in a standby condition, all machinery and equipment have been preserved and are held intact, ready for operation in any emergency. The depot will continue to function as a sub-depot for supplies and in itself will employ approximately 300 civilians, so that combined the sub-depot and the bombardment group will have a civilian employment payroll of 600 or more. The 15th Air Force, of which the group is a part, is under the command of Gen. Leon W. Johnson, whose headquarters are at Colorado Springs, Colo.

Col. A. J. Shower is commanding officer of the 92nd bombardment group.

Transfer of six fish hatchery super-  
intendents at four hatcheries in  
southern Idaho and one in the north  
has been announced by James C.  
Simpson, fish culturist of the fish  
and game department. The moves, all  
effective the first week in June,  
were approved by T. B. Murray, de-  
partment director.

E. D. Ainsworth, superintendent  
of the Ashton hatchery and super-  
visor of fisheries in the southeastern  
division, will take charge of the  
American Falls hatchery; Charles  
Sherwood, superintendent at Ameri-  
can Falls for several years, will move  
to Whiskey creek, near Grace, where  
a hatchery constructed in 1946 is  
being operated the second year. Har-  
vey Albrethsen will transfer from  
Whiskey creek to Ashton.  
Walter Bethke, a new man on  
civil service, has been assigned to  
the Grangeville hatchery.

**In Memoriam**

In memory of my beloved husband,  
Lloyd R. Kuykendall, born Aug. 8,  
1896; passed to his rest Feb. 10,  
1937. He fell asleep in "The Blessed  
Hope", confident that Jesus soon  
would come and awaken him to life  
eternal.

Soon our loved ones which are sleeping  
While our hearts are lonely here  
Will be raised to life immortal  
When the Saviour shall appear.

It will seem to them a moment.  
When they wake to be with God;  
For they know not time nor years  
While they rest beneath the sod.

They are resting, sweetly resting,  
Free from sorrow, toil or pain,  
Just asleep until the Saviour  
Comes to earth His own to claim.

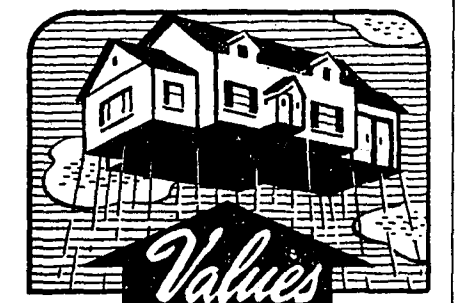

When the Holy Angels meet us  
As we go to join their band  
We will know our precious loved ones  
In that glorious happy land.

When we see the same eyes shining  
On us as in days of yore,  
Then we'll feel the same arms twining  
Fondly round us as before.

Though our earth-worn feet are weary  
Yet our heavy hearts grow light,  
As we think of what awaits us  
In that land where comes no night.

Soon the Prince of Peace is coming  
Then we'll never part no more,  
Let's proclaim the blessed promise  
Till we reach that golden shore.

He Took The Junction!  
A broker, newly moved to the  
rural community, ordered an elabo-  
rate, pre-fabricated chicken house. On  
receiving word that it had arrived,  
he set out with a truck and helper  
to bring it home.  
No one was about when he finally  
located the railway station, but there  
was the chicken house. They soon  
had it loaded on the truck and were  
on their way.

Half a mile up the road, they  
passed a little man in blue, with  
"Station Master" written on his cap.  
He took one look, then shouted wild-

you've got on that truck?" he asked.  
"Why, my new chicken coop," said  
the broker.  
"Chicken coop, heck!" shouted the

HELLO, THERE, FOLKS:

**About Milk:**

Have you ever stopped to consider how important it is to always buy pasteurized milk, rather than raw milk? Here are a few facts for you to consider before buying milk:

No matter how clean or careful an individual may be when handling milk, bacteria exists in all raw milk. The process of pasteurization stops all growth of bacteria and kills other germs, which may appear in the milk. Raw milk can be very harmful to the human body, particularly to youngsters, as they have not developed the "cast iron constitutions" that so many of the oldsters now have. Raw milk can be harmful to any person of any age, or to one who is run down or sick.

When buying pasteurized milk, you insure clean containers, as all bottles are carefully disinfected

each time they are washed. Remember that the best way to keep your family healthy is to buy the right kind of wholesome, healthy foods, such as pasteurized milk. Keep this in mind, and for purity, Potlatch Chief brand is at the top of the list.

Householder (to man who was brought to his house from wrecked car): "Sorry, I can't help you. I'm a veterinarian, not an M. D." Injured man: "You're just the fellow for me — I was a jackass to think I could do 50 with those bum tires."

Man (at police station): "Could I see the burglar who broke into our house last night?" Sargeant: "Why do you want to see him?"

Man: "I'd like to ask him how he got in without waking my wife!"

The name "Potlatch Chief" is your assurance of quality.

### To Construct Hatchery

Hagerman — Construction of a \$55,000 hatchery by the state fish and game department will begin here soon. Building of a hatchery on grounds used by the state for several years for rearing of trout and bass was authorized by the fish and game commission at its recent meeting in Boise. James C. Stimpson, fish culturist, said the hatchery will be one of the largest in the state. Supply of spring water is adequate for hatchery and a battery of ponds. A cold storage plant is already on the grounds, supplying feed for trout in large earthen rearing ponds.

The hatchery which will provide fish for a large section of south-central and southwestern Idaho will be constructed by a game department crew under direction of Frank Oster, engineer, and Herman Anderson, carpenter foreman. Much of the work will be done during the winter of 1947-1948. It is expected that the hatchery will be ready to receive eggs next spring.

"This station is given priority in the construction program", Stimpson said, "because of the urgent need for fish of catchable size for distribution, and for larger fish to transfer to other hatcheries, which, because of the extremely cold water during the winter months, cannot raise fish to the desired size."

"Hagerman installations," the fish culturist said, "have not been operating to capacity or possibilities. Of the 14 ponds constructed, only four are suitable for trout. According to present plans two of these will revert to culture of smallmouth bass. The other two, now being remodeled, will be used for trout."

"There is definite need for fish of catchable size for planting in the drainages of the Weiser, Little Salmon, Payette, and Boise rivers. It is planned to stagger the distribution of catchable fish—that is, plant the heavily-fished areas from two to four times during the fishing season. To accomplish this, fish will be moved to Eagle and McCall hatcheries and redistributed from there. The plan has been started this year. One ton of yearling rainbow were transferred from Hagerman ponds to McCall for distribution in the Little Salmon and Weiser rivers.

"There is also need of catchable-size fish in certain areas of District Two (North Central Idaho). These fish must also come from Hagerman. If the production of the poundage of fish at Boyd Creek, Fernwood, and McCall hatcheries is to be improved it will be necessary to hatch and start the fish in eastern Idaho hatcheries, one of which will be at Hagerman. A portion of the fish to be produced at Hagerman will be planted in the area adjacent to the new hatchery."

A state hatchery at Evergreen in Adams county will be sold as soon as arrangements for disposal of the property can be made. The decision to abandon the hatchery was reached by the commission after the hatchery had been operated about ten years with disappointing results. Rearing ponds near Weiser are to be constructed and stocked. Some of these trout will be planted in areas formerly in the Evergreen district. More fish will be brought from Hagerman.

### City Kids On The Farms

There is a great story featured by the Extension Service of the U. S. D. A., showing that "city kids" have made fine records on the farms.

Non-farm youths were an unknown quantity a few years ago. Some berry and vegetable growers had relied on them for harvesting operations in years past, but farmers, as a whole, put little stock in city boys and girls, for many of these new recruits were not offering to work because they needed a job or the money. Farmers were especially skeptical about housing a "green" city youngster in the farm home and making even a substitute "hired man" out of him. And many a county agent shared this skepticism.

But the youth program began a few years ago, and it has stuck through the war and into the re-conversion period. The U. S. Dept. of Agriculture's extension placements amounted to as many as a million and a half in one year, backed by a good platoon system in Oregon, the youth movement made a big contribution to the Northwest's fruit and vegetable production.

In Iowa and Utah, more than half of extension's placements last year were boys and girls. At least a third of the farm labor placements last year were boys and girls. At least a third of the farm labor placements were youth in Idaho, Oklahoma, Wisconsin, Illinois, Indiana, New

Jersey and the southern cotton states. Teen-agers last year picked 90 per cent of the snap beans in Maine; 65 per cent of Idaho's potatoes, and de-tasseled a whopping big part of the midwest's hybrid seed corn. In Kansas, an estimated 10,000 non-farm youth did farm work, mostly in the wheat harvest.

**Borrow For A Home**  
"There is no limit on the amount that an ex G. I. can borrow for the construction of a home," says the VA. "However, the government cannot guarantee more than \$4,000 or more than 50 percent of the loan. Thus, if you borrow less than \$8,000, the government will guarantee half; if you borrow more than \$8,000, the maximum guarantee will be \$4,000."

Coffee and tea suitable for icing is now available at Blewett's Grocery-Market, Kendrick. 1-adv

## Clover Seed

We are in position this harvest to receive and keep in separate piles — your clover seed.

Several companies have had their agents in this territory and all state that they are more than anxious to bid on all lots.

Think it over! We believe this is the best way to get the highest price.

We do not buy ourselves — but will see that all buyers get a chance to bid on your crop!
