

KENDRICK GAZETTE

VOLUME 57

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, OCTOBER 23, 1947

NO. 43

MISS AMY DARBY BRIDE OF LLOYD FARRINGTON

Amy R. Darby, daughter of Mr. and Mrs. John B. Darby, Kendrick, and Lloyd R. Farrington, son of Mrs. Rose Farrington, Clarkston, were united in marriage Thursday evening, October 16, at 7:00 o'clock, the double ring ceremony being read by the Rev. E. G. Ranton, pastor of the Methodist church in Clarkston, at a candle-light ceremony.

The church was beautifully decorated with bouquets of white gladioli and Lady Ophelia rose buds. Mr. and Mrs. Harry Dorendorf, Kellogg, attended the couple.

Only immediate relatives of both families were in attendance at the ceremony and at the reception which followed at the home of the groom's sister, Mrs. Phil Kirby. Following the reception the young couple left for a short honeymoon trip to the coast.

The bride was dressed in a gown of white nylon, with fingertip veil, and carried a bouquet of gardenias, surrounded by pink carnations. The matron of honor wore a dusty pink crepe formal and carried an old-fashioned nosegay.

The bride is a graduate of the Kendrick High school, and shortly thereafter began Cadet Nurses training, finishing this course at St. Joseph's hospital in Lewiston this summer.

Mr. Farrington is also a Kendrick High school graduate, and spent three years in Uncle Sam's service, and at present owns and operates a sawmill in Crescent, at which place the happy young couple will make their home.

P-T-A. Enjoy Panel Discussion

The regular P-T-A. meeting held Monday evening in the high school auditorium, and presided over by Mrs. Henry Jones, was especially interesting.

Following the reading of the minutes, the project committee was called on for a report. The teachers composed this committee, and each contributed suggestions to meet several needs. One item that stood out as an urgent need was a flood-light at the entrance of the gym; a football field, and many other things. Mrs. Jones named a committee to meet with the trustees to consider a new light at the gym entrance.

The meeting was then turned over to Mrs. Harry Benscofer, program chairman for the evening. She announced the topic as "Home Is Not Merely Four Square Walls." There followed a panel discussion with Mrs. Perry Mattoon giving an idea of what she expected of her children at home. Mrs. D. A. Christensen discussed, "Our Home." Mrs. Melba Wooddy told what she expected of children in the school room, and Nellie Fry answered with "What She Expected as a Student of Her Teachers and Parents." Rev. Coulter then gave an idea of what he expected of young people in the church, and added that he didn't really know when they ceased to be "young people."

Mrs. E. M. White and Mrs. Walter May concluded the program with a vocal duet, "An Apple Blossom Wedding."

Refreshments were then served by the hospitality committee in the Home Ec. room.

The program was especially enjoyed by the 25 members present.

Honored With Party

Mr. and Mrs. E. A. Deobald were the host and hostess October 3 at a party honoring the birthday anniversary of his mother, Mrs. Mary A. Deobald of American ridge.

Guests were Mr. and Mrs. W. B. Deobald; Lois Deobald and a friend, June Gee, Grangeville; Mr. and Mrs. Otto Schupfer and daughter Maribel, Mrs. Tom Keene, Ricky and Claudia, Mrs. Wade T. Keene, Mrs. Elmer Bechtol, Seattle, Wash.; Mr. and Mrs. Wm. Winn and son George, Seattle, Wash., and the honored one, Mrs. Deobald.

The anniversary dinner was prepared by Mrs. E. A. Deobald, and the three-tiered birthday cake by Mrs. Mary Deobald's daughters, Mrs. Otto Schupfer and Mrs. Elmer Bechtol, and beautifully decorated by her granddaughter, Mrs. Wm. Winn.

Mrs. Deobald received many lovely gifts, including a drawing made by Mrs. Wm. Winn of the Deobald farm home on American ridge. The evening was spent in visiting, and Mrs. Deobald's granddaughters present, serenaded her with song.

The Misses Barbara White, Marilyn Schupfer and Chloe McKeever dropped in to wish her many happy returns of the day.

Matron To Visit Kendrick

Mrs. Rachel Paulson, Worthy Grand Matron, O. E. S., from Wilder, Idaho, will pay her regular visit to Canyon Chapter No. 67, O. E. S., at a special meeting on Saturday, October 25. A school of instruction for members will be held at 2:00 p. m., Mrs. Crystal Gruell of Canyon Chapter, announces.

The evening session at 8:00 will include initiation, with refreshments served after Chapter. All sojourning members are invited.

Return From Hunt

Monday evening Earl Millsap and Bob Clemenhagen returned from the Bungalow section, bringing out two elk and a deer. They returned Wednesday to rejoin their party and try for the balance of their meat.

Undergoes Surgery

Jake Daugherty underwent surgery for a ruptured peptic ulcer at St. Joseph's hospital in Lewiston, Monday, October 20.

He is reported as doing satisfactorily.

Mrs. Mary E. Johnson Passes

Word was received here Monday morning of the death of Mrs. Mary E. Johnson, 77, Leland, who died at Kallispell, Montana, Saturday morning. The body was brought to Lewiston and taken to the Brower-Wann chapel pending funeral arrangements.

Mrs. Johnson, a pioneer of the Potlatch ridge section, made her home with her son, Mr. and Mrs. Herman Johnson. At the time of her death she was visiting at the home of a daughter, Mrs. Pete Siderius.

Survivors are three sons and two daughters: Carl E. (Ed.) Johnson, Kellogg, Idaho, and Herman and William, Kendrick; Mrs. Louise Siderius, Kallispell, Montana, and Mrs. Edna Daugherty, Spokane.

We regret no further information is available at this time.

SALES DAY PROVES SUCCESSFUL DESPITE RAIN

Kendrick's Annual Sales Day proved to be very successful, despite rather inclement weather and mud—mud proving deep enough to force a cancellation of the football game scheduled that afternoon with Genesee—a matter which is much regretted by the committee in charge, but one which could not be helped.

The floral and agricultural exhibits were excellent, despite the lateness of the season. Below we list the winners in the various categories:

Apples: Gerald Halseth, first; A. W. Jones, second. On display were Delicious, Golden Delicious, Rome Beauties, Johnathan and Large Red. Cauliflower: Mrs. Henry Kortemeier, first.

Pinto Beans: F. K. Grayson, first; Harold Parks, second.

Small Red Beans: Jerry Chamberlain, first.

Potatoes (Any variety): Gustav A. Nelson, first; Glenn Betts, second.

Onions (any variety): Glenn Betts, first.

Cucumbers: Mrs. W. L. McCreary, first; Marvin Long, second.

Eggs (largest dozen) Mrs. D. A. Christensen, first; Mrs. C. Johnston, second.

Red Clover Seed: Otto Silflow, first.

Alsylke Clover Seed: Jerry Chamberlain, first.

White Dutch Clover: F. K. Grayson, first.

Largest Ear of Corn (any variety): Walter Bigham, first; Edwin Forest, second.

Largest Squash (any variety): Oscar Sholm, first; Dallas Groseclose, second; Leonard Eckman, second.

Largest Cow Pumpkin: Joe Piper, first (weight 174 pounds).

Alaska Peas: Oliver Clark, first.

Largest Peas: Oliver Clark, first.

Best Bouquet Fall Flowers: Mrs. A. Onstott, first; Mrs. Marvin Long and Elsie Chamberlain, second.

Best Bouquet Roses: Mrs. D. A. Christensen, first; Mrs. Alex Larson, second.

Best Bouquet of Asters: Mrs. H. Kortemeier, first; Elsie Chamberlain, second.

Best Bouquet Dahlias: Mrs. Alex Larson, first; Mrs. Charlie Schultz, second.

Best Bouquet Marigolds: Mrs. H. Kortemeier, first; Mrs. Marvin Long, second.

Best Bouquet Chrysanthemums: Mrs. Stanley Hepler, first; D. M. Hepler, second.

Judges of the exhibits were Given Mustoe, Mrs. R. H. Ramey and Mrs. Manning Onstott, and the Kendrick Commercial Club extends its thanks to them for their services.

Not all the exhibits mentioned above were listed as money winners on the prize list previously published, but if your exhibit was so listed, and you have not received your money, please contact Floyd Millard and you will be paid.

The free auction sale did not offer as many items as usual, due, no doubt to the large number of farm sales previously held. But, nevertheless the sum changing hands was a goodly one, amounting to the sum of \$1,748.95. The sale itself moved very smoothly, with Roy Glenn, auctioneer in charge; Nora Callison, clerk, and Ira Foster in charge of listings. Auctioneer Glenn says he considers the day one of the best he had ever had, as the goods offered for sale were in general "top quality" and the prices good. If anyone has money due them from the auction they may obtain a check by contacting Ira Foster at his home.

The free show put on by Schupfer Brothers was quite well attended, in fact, they found it necessary to run the film twice in order that all might see it.

The dance that evening at the high school gymnasium was attended by a large crowd. The floor was excellent and the music in the same category.

So, despite the inability of our football team to play on the local diamond—we feel safe in saying that the day was a success in every way.

Bank Shows Big Increase

In this issue will be found the published statement of our local bank, "The Farmers Bank," and a study of that statement will show the fine financial condition of that institution, which, of course, reflects that of this section.

Deposits are now \$2,205,189.95, or a growth of \$502,876.93 since their last published statement. Total resources of the institution have grown from \$1,794,598.97 to \$2,301,069.78. It should be borne in mind, too, that this growth was accomplished with an estimated 20 percent of the local bean crop written off as a dead loss, as well as 12 per cent (estimated) clover crop loss.

Confined To Bed

L. J. Herres suffered a slight heart attack early Wednesday morning, and is now confined to his bed.

EIGHTEEN ATTEND COMMERCIAL CLUB MEETING

Fourteen Commercial Club members and friends enjoyed the 6:30 dinner at Burt's Confectionery last Wednesday evening, and were joined by four more at the business session which followed in the city hall.

Following the reading and approval of the minutes of the previous meeting, committee reports were called for.

W. A. Watts of the Highway committee reported that he had had a conference with Mr. Stellman of the Lewiston Chamber of Commerce Highway committee, and he had suggested that this organization send a committee to Boise to consult with the State Highway Department and Gov. Robins regarding the road between Juliaetta and Kendrick. Mr. Stellman said they would cooperate in this effort by sending a delegate.

G. F. Brocke reported that he had contacted Mr. McCreedy of the Lewiston Highway department office, and Mr. McCreedy had come up and met with the group, agreeing to send a shovel and crew to clean out the great gulch at the foot of Brady gulch—but that some hitch had evidently arisen in plans, for the shovel and crew had not yet put in their appearance.

After a round-table discussion of these and other highway matters, the group suggested that a telegram be sent Gov. Robins and the State Highway department, inviting them to be the guests of this organization on a highway inspection tour.

L. S. Thurber of the Civic Improvement committee reported that his group's survey was still under way, and he hoped to have it ready for presentation at the next meeting.

Ira Foster, who had charge of the Kendrick booth at the Latah County Fair presented the blue ribbon to the club as their first prize. He stated that many compliments had been received on the booth, which was made up of 113 items. He felt the club should extend its thanks to all for their help in gathering the display, but especially to Dr. D. A. Christensen and A. W. Jones.

Floyd Millard of the Merchant's committee reported that Sales Day plans were going well, and that there was a great deal of interest being shown in displays as well as in the auction sale.

In connection with the Sales Day program the matter of the football game for that afternoon was discussed, and the terrible condition of our local ball diamond and football field received due consideration. It was felt that this field was in terrible condition, and that it could be improved considerably by the re-opening of the Brady gulch creek channel and some ditching on the part of the village. However, the club is without power to do other than recommend and attempt to get action from those with authority.

Jasper Nutting reporting for the Education Committee stated that our local high school now employs a five and one-half teacher bus, and with the addition of Mrs. Coulter half-days, were able to present more courses. The teacher-pupil ratio is now 1-to-19, although a still lower ratio would be very advantageous. Mr. Nutting stated that the Hot Lunch program began operation on October 1st, and they are now serving all but a few students a nourishing lunch for 20c. He said they hoped that price would prove sufficient to bear the costs of the program.

Mr. Nutting further reported that the average daily attendance in the high school was now 103, and in the grades, 123—both showing a higher enrollment than that of last year. He also reported the High School band now had 34 members—and were rapidly learning the difference between high and low notes, although "not much music" could be expected from them this fall.

W. A. Watts reported that he had attended this month's meeting of the Latah County Chambers of Commerce at Moscow, at which time Soil Conservation was the principal topic. On about November 13, Mr. McNaughton, Portland, one of those present at the meeting, and a very fine speaker, will be in Kendrick and discuss the Soil Conservation program (voluntary, county) with farmers and business men of this section. After due discussion the club voted to send the sum of \$50.00 to the county committee for furtherance of this educational program.

Roy Glenn of the Agricultural committee reported thousands of sacks of beans and clover seed still in the fields, and hopes of threshing and salvaging them are about abandoned.

The matter of a Boy Scout troop was then brought up, and after round-table discussion, the matter was referred to the local V. F. W. post, as the club felt the V. F. W. members were younger and came nearer "speaking the language of youth." It is to be hoped that the matter can be worked out by the veterans and a leader found.

W. A. Watts reported that he had been in contact with the Latah County commissioners, and had been advised that Axel Swanson would be taken to Spokane Monday to see a bone specialist, in the hopes that surgery might enable him to walk again, although scant hopes are held at this time.

Reporting for the Industrial committee Otto Schupfer stated two new long distance lines had just been installed between Kendrick and Lewiston, and faster and better service could thereby be given.

Walter Sparker and Clarence Perryman are busily engaged these days in the construction of a new concrete retaining wall in front of the Walter Brocke home on Main street.

The new wall, four feet in height, will permit filling, and to a large extent, leveling of the lawn in front of the Brocke home.

INTERESTING HAPPENINGS FROM JULIAETTA AREA

Mrs. Bruce Sherman is employed at the postoffice during the absence of Mrs. Mae Walsh.

Mrs. Gene Taylor and Mrs. Mae Walsh left Monday morning for Coeur d'Alene, where they will attend Rebekah Grand Lodge.

Mrs. Loye Taylor is ill at her home, suffering with the flu.

Dale and Neil Candler, Jim Prater and Jack Holmes were Lewiston visitors Monday.

Junior Neil and Onal Cope of Pasco were visiting with friends here over the week-end.

Guests of Mr. and Mrs. Paul Rains, Saturday evening, in Lewiston, were Mr. and Mrs. Loye Tackler, Mr. and Mrs. Jack Browning, Donna Nye, Onal Cope, Claudine Clark, Junior Neil, Mr. and Mrs. Rex Peters, Tureda Sams and Neil Candler.

Miss Donna Nye was ill at her home with the flu last week but is now able to be back on the job.

Ben Hammer and wife visited at the home of his nephew, Ralph Magnuson, Sunday.

Opl. Letus Smith is spending a furlough at the home of his mother, Mrs. Hazel Bisbee.

Earl Gaskill and Mr. and Mrs. Sam Taber made a business trip to Lewiston, Monday.

Mr. and Mrs. Joe Coles, accompanied by their daughter, Catherine, were Lewiston business visitors on Tuesday.

Mr. and Mrs. Ed Groseclose of Arrow visited Sunday at the home of Mr. and Mrs. Clifford Nelson.

Duane Carlon saw Idaho win the football game from Portland University at Moscow, Saturday.

Mr. and Mrs. John Murphy and family of Weippe spent the week-end with the Robert Young family.

Robert Magnuson and family of Spokane spent a few days at the Ralph Magnuson home.

Mr. and Mrs. Joe Perry of Coeur d'Alene spent Sunday at the Adrian Johns home.

Ray Sams accompanied his cousin, Virgil Baker, to Genesee Sunday to visit their grandmother.

The Harold Abrams family visited from Saturday until Monday with relatives in Kendrick.

Everett Kirkpatrick and Jack Meade returned Saturday from a big game hunt with no game, due to continuing storms. Mr. Kirkpatrick, with Buzz Nye, returned to the camp Monday to again join the hunters in further game searching. Mr. Meade remained at home.

Mr. and Mrs. John Kite, Jr., of Council, Idaho, called Sunday at the Woody Nye home here, on their way to attend Rebekah Grand Lodge at Coeur d'Alene. Mr. and Mrs. Kite were the delegates of the Council lodge.

Mrs. Lola Sutherland of Moscow spent the week-end in the John Brandt home here. Sunday dinner guests of Mr. and Mrs. Brandt were Mr. and Mrs. Eben Adams and Mr. and Mrs. Keith Adams and son Michael, all of Moscow. Mrs. Sutherland returned home with them on Sunday evening.

Ed. Grant returned home Saturday from a big game hunt, but due to weather conditions, reported not so enjoyable a trip.

Richard Hammond came home on Friday for a few days' visit with his parents, returning Tuesday to Somer Creek Landing, where he is employed.

Mrs. Wallace Clark and son Clinton have returned from Simi, Calif., where they visited at the home of their daughter and sister, respectively, Mrs. Estel Richardson. Mr. and Mrs. Richardson are the proud parents of a son, born September 2. The little man weighed 8 pounds and 3 ounces, and has been christened Estel David, Junior. His mother will be remembered as Jackie Clark. This is the Richardson's second child.

Mr. and Mrs. Phil Johns and Mr. and Mrs. Walter Cochran returned Wednesday from Long Beach, Calif., where they visited for two weeks. While on their trip they visited the Rock Gardens in Oregon. They also visited Mrs. Johns' sister, Mrs. Mary Bartlett and family at Long Beach, and at Riverside, Calif., they visited Mr. and Mrs. Albert Cuddy. Mr. and Mrs. Cochran visited Mr. Cochran's only brother, Floyd, at Los Angeles.

Mr. and Mrs. Neil Packer and two children of Curry, Alaska, have been visiting at the Ernest Walsh home here.

Juliaetta Rebekah Lodge No. 9 held its regular business session last Thursday, with one guest, Mrs. Neil Packer, of Alaska, present. Mrs. Packer is a former member here.

Mr. and Mrs. Lewis Lindquist motored to Lewiston Monday afternoon on business.

Mr. and Mrs. Dan Whybark and Mrs. Susan Groseclose attended the Sales Day at Kendrick, Saturday.

Geo. Earl and Richard Hammond were Lewiston visitors Monday.

Mr. and Mrs. Chas. Hicks and Mrs. Frank Barton and daughter Charlene are leaving Thursday morning for Indiana, Ohio and Kentucky to visit Mr. Hicks' relatives. They expect to be gone about a month. Mr. and Mrs. Hicks purchased a new Ford DeLuxe sedan to make the trip.

Making Improvements
Walter Sparker and Clarence Perryman are busily engaged these days in the construction of a new concrete retaining wall in front of the Walter Brocke home on Main street.

Warm, Wet Weather Continues

Warm and wet seems to be the order of the day with weather in the Potlatch section, with a warm rain falling for an hour or two almost every day and night, and it's been just steady enough to keep remaining unthreshed bean and clover fields too wet to even think about getting them dry enough to thresh, and as a result, many farmers are planning on plowing them under as fertilizer. One farmer (with a rather large acreage out) was heard to remark: "Well, at least I won't have to pay income tax on the danged things!"

This loss is regrettable, but as yet science has found no way to control the weather, or thresh wet beans.

FINAL RITES HELD FOR CPL. WARREN R. LOCKE

Final rites for Cpl. Warren R. Locke, son of Mr. and Mrs. A. R. Locke of Everett, Wash., former residents here, were held Monday, October 13, at the First Baptist church in Everett, Washington, with interment in the Everett cemetery.

Cpl. Warren R. Locke, U. S. Army, 19, was killed instantly at 5:48 a. m., October 4th, near Tulsa, Oklahoma, when his car overturned. He apparently fell asleep at the wheel.

Cpl. Locke was stationed at Williams Field, Arizona, with the A. F. He was returning to his army base after having taken his wife to the home of her parents at Kalamazoo, Michigan. Mrs. Locke had returned to her parents home to await the arrival of their child, expected in February.

The deceased was born March 15, 1928, at Minneapolis, Minn. He lived most of his life at Leland, having moved there with his parents when but a small child, and moved with them to Everett, Wash., in 1943. Cpl. Locke was married to Miss Helen Channels of Kalamazoo, Mich., on November 27, 1946.

Survivors are his wife, Helen; parents, Mr. and Mrs. A. R. Locke; brother, Alfred Locke and sister Evelyn, all residing in Everett, Wn.; Mrs. Roy Thomas, Lewiston; Wn.; V. E. Gibbons, Anacortes, Wash., and a grandmother, Mrs. Rosa Locke, also of Everett, Wash.

Military services were held at Kalamazoo, Michigan. After the services there the body was sent to the family home at Everett, Wash., where services were again held.

Cpl. Locke attended the Kendrick High school before moving with his parents to Everett, and former schoolmates and friends were deeply shocked at learning of his untimely passing.

He entered the service of his country in October of 1945.

KENDRICK SCHOOL NOTES

Sports News

The football game that was to be held on Sales Day, Saturday, October 18, between the Kendrick Tigers and the Genesee Bulldogs was postponed because the field was so soggy with accumulated water that it was in no shape to permit a game.

The next game will be on October 24 between Kendrick and Grangeville—that is, if the field at Kendrick is in shape.

A bit of ditch cleaning and drainage on the field would be greatly appreciated by the student body—and most of the townspeople.

High School News

The Junior Class ordered their class rings this week.

The Senior class have ordered their Announcements and Cards from a firm in the east, and expect to receive them before Christmas, as they got their order in early.

Grade School News

The First graders started their second Pre-Primer this week.

The third and fourth grade room sold \$13.85 worth of Red Hearts for the Children's Home in the recent "Have a Heart" campaign. Eddie Tout has left the third grade. He will attend school in Deary.

Christmas cards are now being sold as a grade school project to raise money to buy a portable phonograph and a good set of records.

The grade school pupils have been seeing the shows: "Land of Liberty," "Transportation" and "Frozen Food."

The fifth and sixth graders are having a Halloween party Thursday afternoon at 2:00. The mothers and friends are invited.

Jimmy Diehl from the seventh grade left for California last Friday evening. He was honored by a farewell party Friday morning by the seventh and eighth grades.

Purchase Jones Home

A deal was consummated some ten days ago whereby Mrs. Adrienne Clemenhagen became the owner of the Henry Jones home in the west part of town, and she, with her son Fred, now occupy the house. The home is perhaps better known as the "Grandma Stanton" place.

New Arrivals

Mr. and Mrs. Ray Knutson are the proud parents of a baby girl, born October 18 at the Davidson nursing home, weighing 8 1/4 pounds.

Mr. and Mrs. Ronald Jones are entertaining a new baby boy at their home, born October 20, weight 8 1/4 pounds.

Birthday Dinner

Mrs. Paul Lind entertained at a dinner Sunday honoring the birthday anniversaries of her son, Eugene, and grandson, Johnny. Besides the family, Mrs. Bina Raby of Lewiston, Leon Lind, Gifford and Jean Ann Atkinson of Gifford were present.

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Leon Lind, Gifford, spent Tuesday at the home of his parents, Mr. and Mrs. Paul Lind.

Mrs. Roy Ramey, accompanied by Mrs. Estella Leth and Mrs. Bruce Ebert were Lewiston visitors Wednesday.

Mrs. Frank Lyons took the train for Spokane Wednesday morning.

Mrs. H. C. Schupfer returned on Wednesday from Clarkston, where she had been most of the past week visiting and helping care for her uncle, N. E. Walker, who has been seriously ill in the Clinic here.

David Coulter left Friday to visit his brother, Scottie, who is teaching at LeGrande, Oregon, and then went on to Boise to visit friends. He returned the first part of the week.

Miss Barbara White arrived home Friday to spend a ten-day vacation with her parents, Mr. and Mrs. E. M. White.

Mrs. Walter May and Mrs. Ross Armistead and son Jerry were lunch-cousins of Mrs. E. M. White, Monday.

Mrs. Wm. Wolff and son Warren of Moscow spent Friday here in the home of her sister, Mrs. Walter McCall and family.

Edwin Knox and son George left today for their home in Los Angeles, after a visit here with his mother, Mrs. L. S. Thurber. They will go by the way of Spokane, stopping off to visit Mr. Knox's sister.

Mr. and Mrs. Walter McCall have received word from their son Walter MoMM 3/c that he had arrived in Pearl Harbor—but didn't know where he was going from there.

Archie May returned last week from a big game hunt in Canada, bringing out a huge moose. The horns, which are on display at Long's store, measure 47 inches across in the widest place.

Mr. and Mrs. Ervin Halseth, accompanied by Mrs. R. L. Blewett, were Lewiston callers Wednesday.

Mrs. Emulus Brown spent the week-end in Lewiston visiting her sister.

Howard Baker left for Headquarters Wednesday, where he will be employed.

Mrs. Harry Baker was the hostess at a Stanley party in her home last Friday afternoon. There were 25 guests present.

Norman S. (Porky) Fry arrived here Friday from southern Idaho to spend a few days visiting his parents, Mr. and Mrs. C. H. Fry, and go big game hunting.

Werner Davis, Walla Walla, was calling on friends in Kendrick Wednesday morning.

Deputy Sheriff Ingvald Aas, Moscow, came down Monday morning, for Axel Swanson, taking him to Spokane for a physical examination by bone specialists in that city. The report is that Axel still has active arthritis, and is not yet ready for surgery. They returned here Monday night.

Mrs. Nettie Gentry returned Tuesday from a ten-week visit with relatives at Toledo and Portland, Oregon, and Everett, Wash. At Toledo she visited with two sons and their families; at Portland with a nephew, and at Everett with a son and niece. She reports a most enjoyable time.

Henry Emery returned last Friday from a visit in Spokane, and has again taken up his residence at the local hotel.

Miss Elsie Darby, Coeur d'Alene, was here visiting her brother and family, Mr. and Mrs. John Darby and daughter Jo, Wednesday and Thursday.

S2/c W. Delos Miller, son of Mr. and Mrs. Don Miller, left last week to report to San Diego for assignment, following a 10-day leave spent at his home here. Dee hopes to be assigned to an electronics school at Treasure Island.</

Annual Bazaar Nov. 5th
 The ladies of the W. S. C. S. are giving their annual bazaar and chicken dinner in the church basement on Wednesday evening, Nov. 5th.

W. S. C. S. To Meet Nov. 7
 The W. S. C. S. will meet on Friday afternoon, Nov. 7th, at 2:00 o'clock at the home of Mrs. Gordon Peters. Everyone is urged to attend. An election of officers is scheduled.

Homemakers Club Nov. 14
 The Homemakers Club will meet with Mrs. Ben Hoffman on Friday afternoon, Nov. 14, at 2:00 o'clock. Miss Lucille Eyrich will be present with gift suggestions for Christmas. Will each lady please bring something she has made and suitable for a gift. The one judged the best will receive a prize.

Observe Birthday Anniversary
 Mrs. Dora Haffel was pleasantly surprised on Monday afternoon on her birthday anniversary, when the following ladies came to help her celebrate the occasion: Mrs. Charles Hoffman, Mrs. Lloyd Craig, Mrs. Robert Draper, Mrs. Jesse Thornton and Mrs. Harry Smith.
 Refreshments were served by Mrs. Roy Craig.

Other News
 Mrs. Harry Smith accompanied Mr. and Mrs. J. M. Woodward to Moscow on Tuesday. They were dinner guests in the home of Mr. and Mrs. Elvin Salisbury.

Mr. and Mrs. Donald Morgan and family of Lenore were Sunday guests in the home of her parents, Mr. and Mrs. Chas. Hoffman.

Mr. and Mrs. Willis Thornton of Moscow and Mr. and Mrs. LaVerne Williams and daughter Diana of Lewiston were Saturday evening visitors in the home of Mr. and Mrs. Jesse Thornton.

The "Harvest Festival" dinner given at the church Sunday was well attended. The afternoon was spent in visiting and singing hymns.

Mrs. Rachel Daugherty of Spokane is spending several weeks with Mr. and Mrs. A. G. Peters and other relatives.

Miss Vivian Draper, Miss Odetta Lohman and Ervin Draper were Sunday evening guests of Mr. and Mrs.

Ted Weyen.
 Mr. and Mrs. Herman Johnson and Bill Johnson were called to Kalispell, Montana, Saturday, by the sudden death of their mother, Mrs. Betty Johnson.

Mr. and Mrs. Jesse Thornton and Wayne Thornton were Sunday afternoon callers at the home of Mr. and Mrs. Chester Vincent.

Cushman Smith of Port Elgin, Ontario, Canada, arrived Tuesday to spend several days visiting his cousin and family, Mr. and Mrs. Harry Smith.

Leland School Notes
 A number of parents were present at the Clinic held last Friday, conducted by Dr. McQueen and Mrs. Crossley, R. N.

Tomorrow night (Friday) is the night when one may see the famous Sing Ling Bros. & Harnum & Hailley's Greater Circus. This great attraction is being presented by the students of the Leland School. Promptly at 7:00 the doors will open and the side shows will present for your pleasure a number of strange attractions. Immediately following the side shows, the main show will open for one performance only. This will be followed by the opening of the concessions of the great Etesena Carnival Co. We know you will see more than you expect, and we guarantee a good time to all with a sense of humor. Remember, this entertainment is being put on by the student body of the Leland School.

Plenty To Build With
 This nation, but Idaho in particular, has a plentiful supply of diatomaceous earth and sawdust, and a University of Idaho research worker has come up with a formula for utilizing them in housebuilding.
 Walter R. Friberg, associate agricultural engineer at the university, has demonstrated how the two raw materials can be brought together as a lightweight concrete with high insulative properties for use in both farm and home construction.
 Sawdust in concrete is nothing new. However, when the cement mix was lean the resulting concrete was not at all fireproof. This kind of sawdust concrete actually would burn. If the mix was made rich, the excessive amount of cement necessary to provide strength and fire resistance more than offset any saving over sand and gravel. Moreover, a rich mix actually destroyed the insulative value of the wood.

Friberg decided to try a dash of diatomaceous earth in the mix, and the results were so good that he turned to the use of the formula in constructing a home for himself.
 Although the concrete developed at the university is not capable of carrying heavy loads, it does open the way to the utilization of sawdust and shavings in making a cheaper mix for walls and floors where high insulative values are desired. The wet mix is also more plastic and has better cohesiveness than regular concrete, and the setting and hardening time is decreased.

Facts About Idaho
 The Malad River in Idaho is one of the shortest rivers in the world. It is three miles long. Water springs out of the surrounding cliffs to the river, and at the end of the three-mile flow the Malad joins the Snake between Bliss and Hagerman.
 One of the largest undeveloped bodies of coal in the United States is located in the Teton valley, near Driggs, Idaho.
 Gold was discovered in Idaho by Capt. E. D. Pierce on Orofino creek in 1860.
 The Mountain Bluebird was designated as the state bird for Idaho by the legislature in February, 1931.

With Sister In Lewiston
 Mrs. Wade Keene went to Lewiston Sunday evening to be with her sister, Mrs. Ullie Hardman, Peck, who underwent a major operation at St. Joseph's hospital Monday morning.

Have Chosen Class Name
 Mrs. E. M. White's Sunday School class has chosen a name and henceforth will be known as "The Onward and Upward Class." They elected officers as follows: Shirley Travis, president; Donna Mae Travis, vice president; Parker McCreary, secretary and treasurer.

Hunters Brave Weather
 Braving plenty of water and the prospect of muddy roads, a hunting party made up of Don and Porky Fry, Glen Wegner, Willard Schoeffler and Chuck Andres left Tuesday morning on a big game hunt in the Bungalow section

Alfalfa Benefited By Superphosphate Provides Protection Against Winter Kill

How 45 per cent superphosphate drilled with alfalfa seed at the rate of 100 pounds per acre not only stimulates growth of the seedlings but

Unfertilized strip, left upper photo, indicates sparse growth. Right the fertilized patch. Photo taken in October. Lower photo shows the result of winter to the unfertilized strip in center, compared to fertilized on both sides.

also gives marked protection against winter-killing was described by Prof. H. E. Myers, agronomist at Kansas State college.

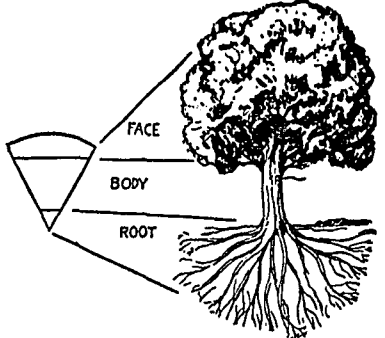

The beneficial effects of the fertilizer treatment are illustrated in the accompanying photographs taken in an alfalfa field in Kansas.

The alfalfa was seeded August 15 and 16. The fertilizer was placed in the same row with the seed. The last two rounds were drilled without fertilizer.

As shown above, there is an almost complete absence of plants in the center unfertilized strip as the result of winter-killing. The crowns of the unfertilized plants were about three inches above the soil surface by spring. The fertilized plants remained in place, thrifty and undamaged.

Strength of Wood

"I have always compared a weld with that of a tree because of its substantial and mutual characteristics," says Frank J. Balistreri, Milwaukee, Wis.

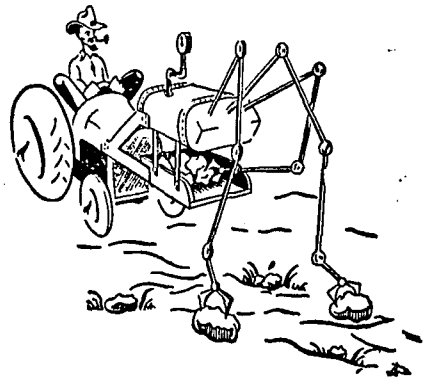

Face, body and root are important in electric welding. Drawing—courtesy Lincoln Electric Co.

The strength of the weld (electric arc welding) is started from the root; it is the foundation of the weld.

Harvest Connecticut's Big Annual Rock Crop

A machine that will harvest the Connecticut farmer's biggest and most productive crop recently was demonstrated under supervision of University of Connecticut.

The crop—stones—will be picked up by the new tractor driven stone

It is not recommended that farmers try to build a stonepicker according to the artist's idea.

picking machine. Equipped with a hydraulic lift, this machine will gather stones of any size.

The machine will be a revelation to gardeners and farmers with aching backs. It is also possible that the artist's drawing will be a revelation to the manufacturer of the stone picker.

DDT Spray Readily Removed From Fruit

DDT residue on apples and pears do not present a serious difficulty according to research results reported by Dr. J. E. Hoskins, University of California. Any excess residue can be reduced readily to below tolerance allowed by washing the fruit with detergents.

The tolerance as provisionally set by the government is seven parts of DDT to one million parts of pears or apples.

Metal and Plywood Combined In Sturdy New Material

Cigarette-proof desk tops, fire-proof office partitions, and lighter planes, made possible by a new method of combining metal and plywood layers in manufacture, are described by Thomas D. Perry of the Resinous Products and Chemical company of Philadelphia.

Plymetal, he said, is the relatively new product which combines the good qualities of both wood and metal, and compensates for the less desirable qualities of each. It is made by gluing layers of metal to sheets of veneer with a resin adhesive, to which heat and pressure are simultaneously applied.

Some of the uses already made of plymetal include a table-top construction developed for office desk, bank counters and smoking stands, where an inserted sheet of aluminum is provided to absorb and distribute the heat from lighted cigarettes so that the outer wood surface is in no way disfigured. Kitchen equipment, table tops, drainboards and the like are much improved by metal surfaces for cleanliness and wear, backed by a lightweight plywood for stiffness and heat insulation. Both steel and aluminum are employed for this.

Coal and Lignite Supply Assures U. S. of Fuel Reserve

Although liquid and gaseous fuels make up only 1.2 per cent of the mineral-fuel reserve of the United States, the reserves of coal and lignite can be used to supplement declining reserves of natural gas and petroleum for "certainly not less than 1,000 and probably for 2,000 years," according to Arno C. Fieldner, chief of the fuels and explosives branch of the bureau of mines.

Fieldner estimated the proved fuel reserves of the United States at an energy equivalent of 2.6 trillion tons of bituminous coal having a heating value of 13,000 B.T.U. per pound. Coal and lignite comprise 98.8 of this reserve. Fifty-five per cent of this solid fuel reserve consists of high-volatile bituminous coal, 23 per cent subbituminous coal, 19 per cent lignite, 2.5 per cent low-volatile bituminous coal, and 0.5 per cent anthracite.

"All of these fuels can be converted by suitable processes to gaseous and liquid fuel," he said. "Satisfactory fuel gases have been manufactured from coal or from coke and petroleum for many years. Processes and equipment for this purpose have been well-developed, and the costs are known. In recent years in Germany, in particular, processes have been developed and put into commercial operation for the manufacture of liquid fuel from coal and from lignite."

Preserved Order

Prior to the existence of law courts and peace officials in the United States, vigilance committees, formed of substantial citizens, operated in border communities to combat desperadoes. Following the gold rush in San Francisco in 1848 outlaws endangered the lives and property of residents of that area until the San Francisco Vigilance committee was formed in 1851 and drove them from that section or apprehended and executed them. When the terrorists fled to other localities like committees were organized, resulting in mob rule at times but generally well coordinated procedure prevailed. The Squatters' Claim association was established near Leavenworth, Kan., in 1854 to protect slaveholders' rights. Eventually all the Western States and territories had vigilance committees to break up organized outlaw rule.

Pasture Moisture

The amount of water entering the soil following rainfall has been found to be about five times less on heavily grazed pastures than on those not grazed since 1940, according to the Rocky Mountain Forest and Range experiment station. On land heavily grazed by cattle, after .65 inches of artificial rainfall, .44 inches were lost through run-off. Only .21 inches soaked into the ground. On pastures ungrazed since 1940, following a simulated rain of .60 inches, run-off amounted to only .08 inches, while .52 inches filtered into the soil. This indicates that on ungrazed or moderately grazed pastures, rainfall is much more likely to enter the soil. This reduces the possibility of erosion, siltation and floods.

Cleaning Nylons

To help get your nylons clean safely and with little work, use lukewarm water and a mild soap, the same as you use for any washable, fine fabric. Rinse well without wringing or twisting and your fabric will last longer. Do not force-dry or hang colored fabrics directly on or above a radiator. They may fade if you do. Direct sunlight may also fade such material. Properly finished nylon fabric is highly resistant to wrinkling and only requires touching up with a warm iron. Do not use a hot iron. Ironing the wrong side when your garment is slightly damp helps to take out wrinkles. You can use most cleaning agents on nylon. Because of the nature of some dyes, it is a good idea to try a bit on an inconspicuous part of the garment first. If there is any doubt, send your garment to a reliable dry cleaner.

Agricultural Production Is Backward in Honduras

In British Honduras progress in extending and improving agricultural production has been hindered by the difficulty of inducing non-agricultural West Indian Creole population to practice farming instead of forestry and by the problem of replacing shifting cultivation by permanent agriculture. The topography varies from land in the north at less than 100 feet, about one-third of which is suitable for agriculture, to country reaching over 3,000 feet further south. In the extreme south there is rolling country with rich alluvium, swamps, lagoons and sandy pine ridges. Valuable mixed tropical forests and pine forests occupy 92 per cent of the country.

Along the rivers are fairly deep, somewhat acid, fawn-gray to red-brown alluvial loams and clays. Citrus is grown in the valleys and rice on the silt near the river mouths. In the north, good, black, clayey limestone land also is found away from the rivers and in the south there is some fertile rolling limestone country with fairly rich red-brown loams. In both areas sugar is grown. Coconuts are areas on deep sandy soils along the coast and on clays off the coast.

Methods of planting maize, vegetables and tobacco amongst the Mayas are crude and there is no cultivation. The Caribs have better land and use better methods to grow cassava, plantains, sugar, rice and vegetables. The Creoles also practice shifting cultivation, but on the more fertile river banks, and grow bananas, maize and rice. There is little fertilizer used in the country.

Labor Efficiency Is Major Factor for Locker Plants

An examination of income and expense records of a large group of cold storage locker plants for 1944 and 1945 shows a close relationship of net income per locker to several income and expense items.

Total expense per locker was much less with the large plants than with the smaller plants. On the average, for each 100 lockers increase in size of plant, the expense per locker was 36 cents less in 1944 and 34 cents less in 1945. Net income per locker increased by 23 cents in 1944 and by 22 cents in 1945 for each decrease of \$1 expense per locker.

The need for efficient use of labor can be seen by the relation between the processing income expressed as per cent of labor, expense per locker and the net income per locker. Those plants which were able to recover a high percentage of the labor cost from processing charges showed a much better net income per locker. On the average, for each 10 per cent increase in the amount of labor costs recovered in processing charges there was an increase of 34 cents net income per locker in 1944 and of 20 cents in 1945.

It appears from the analysis that increased efficiency in use of labor offers one of the best ways to increase net income per locker and per plant. Plant size also played an important role in net income.

All About Potatoes

When Irish potatoes were being introduced into Europe a certain king grew them in the royal gardens to the exclusion of his subjects. But care was taken not to guard them by night so that the public could "pilfer" the tubers from the "exclusive" gardens and thus spread their culture much faster than otherwise, for "stolen" fruit is said to be the best. Also, the flowers of the potato were to be worn by none other than the queen and her ladies in waiting. At any rate, despite the restrictions on potato planting it didn't take long before the "pomme de terre" or the "apple of the earth" became the food of the white race in Europe. And when the disease later known as the late blight hit Ireland in particular, a million or more starved to death due to the failure of the potato crop. Thousands of Ireland's stalwart sons migrated to the United States at that time.

Automotive Industry

Following a survey of the automotive industry in this country, the Motor and Equipment Manufacturers association reported that there are more than 3,000 automotive replacement parts, accessory, shop equipment, service tools and chemical manufacturers associated with motor vehicle output. There are 7,338 automotive wholesalers and specialty distributors, 242,000 gasoline filling stations, 91,200 repair shops, 18,000 automotive retail stores, 36,300 authorized new car and truck dealers holding factory franchises, and \$3,531,000,000 of automotive wholesale sales in 1946.

Bring in the Light

Easiest way to introduce light into a house is through use of white or very light colored paint on the ceiling in every room. The first effect is to brighten the entire outlook of the household. The second, particularly in working areas, it to raise the safety level to a new high point. White painted ceilings not only bring the light in from outdoors during the daytime but they also reflect light from ceiling fixture and from indirect lamps in a much more efficient manner.

Do Mining Investigation
 The "swish" of miners' pans was heard in many old ghost mining camps of Idaho during the summer, but no ghosts were doing the swishing. The pan twirlers were Prof. William W. Staley of the University of Idaho school of mines and Walter Shaw, a senior in the school, who are now back at the university after a 3,800 mile survey of mineral deposits in the state.

Staley and Shaw went to work with pick and pan in such historic camps as Warren, north of McCall; Leesburg, 25 miles west of Salmon, and Yellowjacket in western Lemhi county. The data they compiled will be contained in reports to be published by the Idaho bureau of mines and geology.

The university researchers were welcome visitors, particularly in the primitive area of the Salmon river country. They were the only persons several old prospectors had seen in more than six months.

Strangely enough, the prospectors were more interested in having Prof.

Staley identify mineral specimens and give them advice on prospecting than they were in news of the outside world.

Staley and Shaw also visited the big dredge operations at Idaho City, Elk City, Salmon, and Yankee Fork. "There is a great revival of mining interest throughout the entire state," commented Prof. Staley. Modern mining machinery is making practical operations in many abandoned fields. His one regret on the trip: "We were in some of the world's best fishing country, but were too busy to throw out a line."

To Head "March Of Dimes"
 Appointment of Ben Johnson of Preston, Idaho, a civic and business leader, as Idaho state chairman of the 1948 March of Dimes was announced this week by Basil O'Conner, president of the National Foundation for Infantile Paralysis.

The 1948 drive, to be held Jan. 15-30, Mr. O'Conner disclosed, will mark the tenth anniversary of the National Foundation, set up by

President Franklin D. Roosevelt to "lead, direct and unify" the fight against infantile paralysis. The annual March of Dimes is the National Foundation's sole support.

A native Idahoan, Mr. Johnson has served as a federal Land Bank appraiser and county attorney as well as carrying on his own law practice. He was state campaign chairman for the 1947 March of Dimes and has long been active in civic and church organizations.

In announcing Mr. Johnson's appointment, Mr. O'Conner disclosed that since 1943 infantile paralysis has stricken more than 72,000 young Americans.

"Thousands," he warned, "continue to face a long, fight for recovery. This summer, fortunately, we had a "breathing spell" as polio incidence nationally, did not approach the terrible total of 1946."

Cold weather calls for piping hot coffee. You'll find all the popular brands on the shelves at Blewett's Grocery-Market, Kendrick. 1-adv.

Big Labor Savings By Modern Methods Improved Machinery Has Resulted in Profit Gain

The modern wheat farmer's labor is 14 times as productive as that of his great-grandfather.

Figures presented in the new Encyclopaedia Britannica reveal that the hand methods of 1830 required 87.7 man-hours of labor to produce 20 bushels of wheat on one acre of land.

By 1896, machine methods had cut the time to a little under nine man-hours. In 1940, using tractor power, gang plow, tandem disc, harrow, drill, combine and truck, the amount of labor to produce 20 bushels of wheat was only slightly more than four man-hours.

We have come a long ways since the "good old days."

The more machines are used for farming, the more skilled the workers become and the higher the wages that can be paid them. A demand for skill and a desire to acquire it tend to improve the quality of the rural population.

Farm machinery also has improved product quality. Better yields result from precise planting, proper placing of fertilizer and more thorough harvesting, and in addition, there is less waste through weathering and rotting.

Adapting plants to machines, breeders have produced hybrid corn bearing ears at a uniform height, wheat with stronger stalks and grain sorghums with upright seed heads to speed harvesting.

NOSE-PRINTS OR TATTOO

The tattoo system of equine identification, to prevent substituting ringers in races, is generally advocated.

As early as 1921 it was found that animals could be identified by nose-prints, using a system similar to that

used with finger-prints by police authorities. A combination of the two systems should be fool-proof. First, the horse or cattle would be tattooed, then nose-print taken to include the tattoo. This double protection would make an alteration impossible.

Cow Mine Detector

Metal objects often pierce the cow's stomach, then enter the heart and cause severe inflammation and sometimes almost instant death.

With the bovine "mine detector," the veterinarian passes the instrument over the cow, and if she has any metal objects inside her, it produces a ringing sound in the ear-phones. Then by surgery, the nails and other objects can be removed.

Hexachloro Cyclohexane Finding Many New Uses

A new insecticide now appears containing 50 per cent hexachloro cyclohexane in a wettable powder formulation suitable for application in a water spray and for further dilution for dust application.

It shows promise for control of cattle lice, many insects of cotton, including aphids, and for certain insects that heretofore have been difficult or impossible to control, including locusts and hoppers.

New Research May Make World Entirely Louse Free

The louse has never had such hard going as in the last five years. Wars usually have been periods when lice thrived and multiplied. Frequently they have decided military campaigns by spreading deadly typhus fever to one army or both.

This last war proved different. And the postwar louse has even dimmer prospects, according to E. F. Knippling of the department of agriculture. Knippling says that it is time to give serious consideration to eradicating lice "from entire communities, countries and continents." Success with DDT makes possible a louse free world if man will make the effort, he says.

The louse has lived with and on human beings since long before the beginnings of recorded history. In this association with man, the insect has become so perfectly adjusted that it cannot live or multiply except as it feeds on human blood. That is now its weak spot. DDT can make deadly every approach the louse may make to a meal of human blood. The DDT may be dusted on the body, or clothing, or clothing may be impregnated with the louse-killing chemical. DDT also is effective against fleas.

Knippling has summarized the last five years of scientific advance in louse control. There are four major steps: (1) The methyl bromide fumigation for uniforms which were developed for the army. (2) Discovery early in the war of the MYL powder which was more effective than any previous louse killer. (3) Development of DDT as a louse insecticide, with the army's climax demonstration of effectiveness at Naples where it stopped an epidemic of typhus among civilians—and also protected our army. And (4) discovery of several other highly effective louse-killing chemicals at least two of which are practically on a par with DDT.

This research, says Knippling, lends support to the hope for complete eradication of the louse.

Old Indian Planting Custom Shows Value of Fertilizer

The early colonists were acutely soil-conscious. If their crops failed, starvation faced them. The Indians gave the colonists their first basic lessons in the use of fertilizer, one that amazed them.

In each hill of corn, the Indians would drop a fish. At first the colonists thought this was some heathen superstition, some strange pagan religious rite, that the fish were placed in the corn hills to placate some obscure god.

However, they quickly learned that the real purpose was soil enrichment. Where the fish were placed, the corn grew taller, the ears were larger. Where possible, the colonist-farmers followed the Indian method, and profited greatly thereby.

Wherever men lived, the topic of crops was of personal, vital import. Our leaders following the Revolutionary war had a very special interest in agriculture, in soils and their improvement. They had been taught well by the Indians, and they saw the answer, and until this day they have been trying to improve upon the method of their Red Cousins.

Investment in Tools

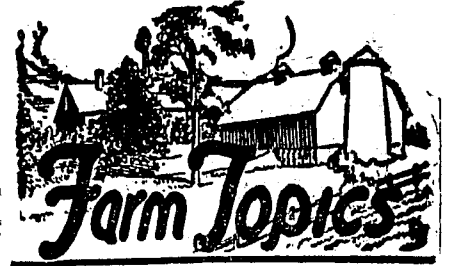

Cheap tools are no bargain. A trowel that snaps in the middle of transplanting a flat of seedlings or a hoe that bends while cultivating spells a loss of time and money. A few simple, well-made tools are far better than a garage full of assorted equipment, poor in design, quality and workmanship. A spade, pointed shovel or spading fork is needed first. A metal rake and a bamboo rake for clean-up or the new all-purpose rake combining all functions are next on the list. Stakes, cord and a hoe are also essential. If a watering can, a length of good hose and a lawn mower are added, a small plot or even one of some size can be managed efficiently. Additional tools depend upon activities, methods of work and inclination.

Eye Disease

Prolonged emotional disturbances can cause permanent injury to the eyes in persons with unstable sympathetic nervous systems, says Dr. David O. Harrington, assistant clinical professor of ophthalmology in University of California medical school. The physician said that young men afflicted with these psychologically induced ocular diseases were found to have inherited a deficient autonomic nervous system which controls certain involuntary muscles in various parts of the body. In the case of vision, this may cause marked changes in the retina at the back of the eye. If the disturbance is short-lived, these retinal changes may disappear but if it lasts a long time the damage may be permanent.

Plan Before Pruning

Pruning trees and ornamental shrubs can be risky business unless you plan before you prune. If you're pruning to promote vigor, dead wood and broken limbs should be removed. Top branches also may need to be thinned out. For improving form, remove only misshapen or crossing branches. In either case—take it easy—severe pruning may cause permanent injury to trees and shrubs.

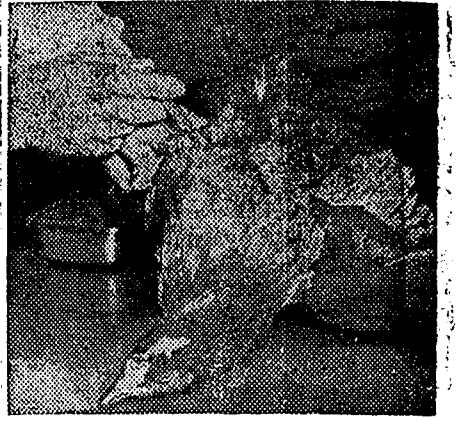

Newcastle Disease Control Progresses

Vaccination Now Gives Promise of Real Aid

By W. J. DRYDEN

New vaccine developed by the U. S. department of agriculture gives a chicken immunity to Newcastle disease for several months. This is good news to the poultry industry which

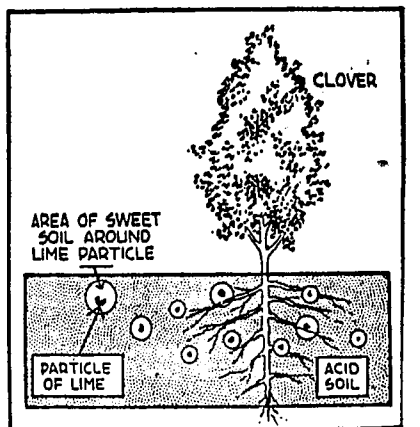

had cause to fear this new killer. Poultrymen in about 30 states have suffered from costly inroads made by the disease.

The new vaccine is not the last word. Specialists of the various states and federal department of agriculture are still at work to devise a "fool proof" vaccine. The achievement of the federal specialists in developing the vaccine that would last even several months is a big step forward.

Newcastle disease is a virus which attacks chickens of all ages, from baby chicks to laying hens. It also is known to attack pigeons, ducks, turkeys, geese and pheasants.

Until the vaccine has been placed on the market in an improved state, the prevention and spread of the disease must be controlled by sanitary procedures, use of disinfectants, proper feeding, housing and management.

HOW LIMESTONE WORKS

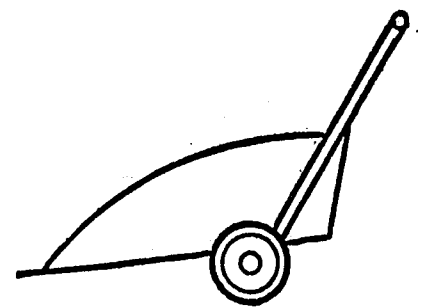

Applications of limestone at the rate called for by a soil test will correct the acidity of surface soils. Lime, however, should be applied from six months to a year before legume seeding to allow time to sweeten the soil.

Disking or harrowing scatters limestone particles through the top two or three inches of surface soils. Then each particle starts correcting acidity in its immediate area. Within a year it may materialize an area of from one-half to an inch in diameter.

In the beginning, acid soil zones considerably outnumber non-acid areas around the limestone particles. However, if sufficient limestone has been applied and thoroughly mixed with the soil and if lime particles are allowed several months to establish areas of sweet soil, clover will be able to secure lime from the sweet areas. Tests should be made before, not after, liming.

New Utility Cart

This cart may be used for garden or barn. It is made from an old hood, doll carriage wheels and three pieces of tubing for the handle. This cart disposes of leaves, weeds, etc., from the garden and even takes the ash car to the dump. It was designed and welded by Fred W. H. Spear, Natick, Mass.

New Enzyme May Have Affect Upon All Life

The new enzyme found in the eggs of frogs, by University of California scientists, called phosphoprotein phosphates may have counterpart in all forms of life. This enzyme separates phosphorus from proteins in the ovum, making it available for use by the developing embryo. Phosphorus is essential to the normal growth and development of all living tissue, and development of embryo.

Mr. and Mrs. Al. Pederson visited Sunday evening in the Arley Allen home.
James and Felix Holt each brought

In The District Court of the Second Judicial District of the State of Idaho, In and for the County of Latah.
Lewis B. Keene and Annabel Keene, his wife — Plaintiffs.
vs.
SPOKANE & PALOUSE RAILWAY COMPANY, a corporation; NORTHERN PACIFIC RAILWAY COMPANY, a corporation; BESSIE V. CLARKE; NORMA HOPKINS UNDERHILL; NORMA VOLLMEYER; GRACE L. VOLLMEYER; ELIZABETH Z. LELANDE, a minor; JOHN M. BONNER; SALLIE DAVID; GENEVIEVE HANCOCK; H. M. EMERSON, Executor of the Will of Ralston Vollmer, Deceased; JOHN M. BONNER, Executor of the Will of Genevieve Vollmer Bonner, Deceased; the Unknown Owners of the following described real property situate in Kendrick, Latah County, Idaho, to-wit:

North half (N 1/2) of Lot Four (4), and Lot Five (5) of Block Twenty (20) of Original Town of Kendrick, according to the recorded plat there-of. Defendants.

SUMMONS
THE STATE OF IDAHO SENDS GREETINGS TO THE ABOVE NAMED DEFENDANTS:
You, and each of you, are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, by the above named plaintiffs, and you are hereby directed to appear and answer said complaint within twenty (20) days of the service of this summons and you are further notified that unless you so appear and plead to said complaint within the time herein specified, the plaintiffs will take judgment against you as prayed in said complaint.
This action is brought to quiet plaintiffs' title to the property described in the title and caption of this action, against all of said defendants in said action, and to adjudge and decree that the plaintiffs are the owners in fee simple absolute of the property described in the caption of this summons, all as set forth in the complaint on file herein, to which reference is hereby made.

WITNESS My hand and the seal of said District Court this 30th day of September, 1947.

Facts About Idaho
Owyhee county, in Idaho, is one of the few spots in the United States where mahogany trees, normally a tropical tree, will grow.
Idaho's first capital building cost \$80,000 to construct. The present Idaho state capital was erected in 1906 and cost \$2,290,000.00.

Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HELLO, THERE, FOLKS:

We're In Trouble Again!

Where are our ice cream packers? Practically all of our gallon packers have been loaned out and not returned. Do you have any? We would like very much to get these back, as we are in constant need of them. Though the weather may be a little chilly, our customers are still having birthday parties and anniversary dinners and buying gallons of ice cream for such occasions. Please look around your back porch, or in the trunk of your car, the basement, or any other out-of-the-way places and return any packers you may find.

And —

Speaking of parties and dinners, do you have one planned for the near future? If so, no doubt you are wondering what to serve. You needn't wonder any longer as Potlatch Chief Ice Cream is the

answer to such a problem. Ice cream is a real treat for your most particular guests. It not only has that rich, creamy quality, but also comes in a large variety of delicious flavors. Our special flavors for this week are Maple Nut and Licorice. It has been months since we have had these flavors available. For something new and different, Licorice is just the thing. And for an old favorite, which is sure to satisfy everyone, serve Maple Nut.

And —

Potlatch Chief Cottage Cheese is a simple but nutritious dish to serve and a big help these Meatless Tuesdays. So add it to your shopping list today.

And Don't Forget—

Buy Potlatch Chief Ice Cream today for complete satisfaction in a quick dessert.

The name "Potlatch Chief" is your assurance of quality.

PERSONAL MENTION

Fred Clemenhagen was a Sunday visitor in Lewiston.

Mr. and Mrs. Ted Vaughan and son arrived home Friday from an 8,000-mile vacation trip through the east, south and back via the west coast. They were joined in Texas by Mr. and Mrs. John Keeler and little daughter, who went with them to California, and on to Kendrick. Mr. and Mrs. Keeler expect to locate somewhere in this area, but for the present are visiting his parents, Mr. and Mrs. C. H. Keeler, on Cedar creek. John has been away six years, four in the army, and two as a civilian.

PERSONALS AND NEWS ON AMERICAN RIDGE

The Student Council of the Troy High school met at the home of Harry Benscoter Tuesday, and made cider. They were also luncheon guests of Mrs. Benscoter.

Mr. and Mrs. Lloyd Farrington returned home from their honeymoon trip Monday afternoon, wishing the newlyweds many happy years together.

About forty friends and neighbors called on Mr. and Mrs. Lloyd Farrington Monday night at the H. J. Pressnall home (John Darby place). Owing to the pouring rain, a rather feeble serenade was given, but the guests were admitted and the candy and cigars as well enjoyed as if the "music" had earned them. After

visiting a short time the guests left, wishing the newlyweds many happy years together.

Party And Social Postponed
The Grange party and pie social scheduled for Tuesday evening, Oct. 21, was postponed until Tuesday evening, October 28, at which time everyone is invited to come.
