KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, MAY 27, 1948

NO. 22

IDAHO NOT WORTH PROVERBIAL "PINCH OF SNUFF"

Senator McDuffie of South Carolina, during debate on Oregon Territory, told his colleagues he "would not give a pinch of snuff" for all of it. Another senator, "Thomas H. Benton, declared the Rocky Mountains had been "placed by Providence" to mark the western limits of the United States and thus set a boundary to man's ambition.

These and other incidents were recalled this week by the Idaho State Chamber of Commerce in calling attention to Idaho's centennial. It was 100 years ago that Congress allowed the pioneers to set up the Oregon Territory, which included the present states of Oregon, Washington and Idaho, and parts of Montana and Wyoming. Thus, a century ago, law and order and organized government replaced the lawless mass of trappers, traders, miners and settlers who had settled in a new land.

What is now Idaho, loomed large in the early days of Oregon Territory. The Oregon Trail, a torturous, dusty, dangerous route — traversed the southern part of Idaho. Fort Hall, Massacre Rocks, lonely graves and markers, and deep wagon ruts that still remain are today's reminders of America's great westward migration 100 years ago.

Earlier still is the Lewis and Clark Trail through northern Idaho. The first mission in Oregon Territory was established in Idaho by Marcus Whitman in 1836. When gold was discovered in California in 1848, the California cut-off from the Oregon Trail, by way of Silent City of Rocks near Oakley, became a broad highway on which wagons and carts rolled into the land of promised riches.

The Idaho state chamber of commerce is urging Idaho communities to call particular attention to this centennial year in celebrations planned for this summer and fall.

Mrs. C. D. Bell Succumbs

Moscow — Mrs. C. D. Bell passed away at her home at 412 South Asbury St., Saturday night. She was born in Missouri in 1861, and had lived in Moscow for many years.

Survivors include three daughters, M. Joy Bell, Pullman; Mrs. A. Bennett, Potlatch, and Mrs. H. M. Roundtree, Tuscaloosa, Ala.; three sons, William W., Bombay, India; Homer, Rupert, Idaho, and Clarence, Escondido, Calif. She is also survived by eight grandchildren and three great-grandchildren.

Funeral services were held at the Short Funeral Chapel, Monday, at 2:00 p. m., with the Rev. E. P. Goulder officiating. Burial was in the Moscow cemetery. — Lewiston Tribune

Mrs. Bell was very well known here, she with her husband having been residents quite a number of years ago, but often came back to visit.

Has Narrow Escape From Death

Don Hoisington, six-year-old son of Mr. and Mrs. Cletis Hoisington of the Stony Point section of Potlatch ridge, had a very narrow escape from death Monday, May 24, when he was accidentally shot by a .22 caliber pistol in the hands of an older brother. The bullet struck almost directly over the heart and emerged between the ribs on his left side, missing the heart and main arteries.

Don's brother was engaged in loading the weapon, presumably to go squirrel shooting, when the accidental discharge occurred. Dr. Christensen was called, and dressed the wound, and is caring for him at the family home.

Don's condition is reported as satisfactory, and no permanent ill effects are anticipated.

Three Babies Are Born

Mr. and Mrs. J. S. Pike of Texas ridge are the parents of a 5½-pound baby daughter, born to them Friday, May 21.

Mr. and Mrs. Don Morgan of Lenore are the parents of an 8½-pound son, born May 22nd.

A 6½-pound son was born to Mr. and Mrs. Loyd Israel on Sunday, May 23.

All the babies were born at the Davidson Nursing home in Kendrick and all concerned are doing nicely.

Twin Casualties

Mrs. Marvin Long is incapacitated this week with a severely sprained ankle, the accident happening while working in the family flower garden.

Mrs. Edgar Long wanted to be different, so she sprained her left arm when she fell from a step ladder while removing thumb tacks from a wall.

Birthday Party

Mrs. Geo. Brocke gave a party for 23 little folks Tuesday afternoon in the park, honoring her son Darrel's tenth birthday anniversary.

Games were played and birthday cake and ice cream served by Mrs. George Brocke, Sr., assisted by Mrs. George Brocke, Jr., and Mrs. Eugene Brocke.

Undergoes Tonsillectomy

Mr. Walter Crawford, Leland, underwent a tonsillectomy at Dr. Christensen's office on Thursday, May 20.

Navy Owns "Grog" Tub

The U. S. Navy's only "grog tub" is at the naval academy, Annapolis, Md. An exhibit in the museum, it is a present from HMS Frohisher, a British training ship, in appreciation of the welcome given the English sailors on a week's visit to the naval academy.

Can This Be Spring?

Following the deluge of Saturday, stars were shining that night, and the weather since has been ideal — in fact, almost "too warm," for we were becoming used to damp, chill weather.

Farmers estimated that a week to ten days of good weather must elapse before spring work in all its phases can begin. It is to be hoped that old soil does not turn on too much heat immediately, since that would put a cement-hard crust upon the sodden fields, which are already plenty hard, due to the pounding rains.

Well, we can hope, can't we?

COMMERCIAL CLUB MEETING HELD WEDNESDAY EVENING

At the regular monthly meeting of the Kendrick Commercial Club, held Wednesday evening of last week, only eight were present at the 6:30 dinner at Burr's Confectionery, to be joined by four others for a total of twelve at the business session which followed in the city hall.

First on the business program was a brief report on the apparent feasibility of a playground and base ball diamond on the school house hill, but before comment could be offered by the club it was felt that an inspection survey, using instruments, should be made on the ground.

Next came a round-table discussion of the road between Kendrick and Juliaetta, especially dealing with the water and rock problem at the foot of Brady Gulch. Along this line Henry Brammer spoke of the problem faced by himself and other local residents in "fording the swamp" to get to town. He stated as his frank opinion that dissection within the town had had its effect in delaying the construction of the road, as many feared that the building of the road would ruin the ball diamond. Mr. Brammer felt, however, and the club agreed with him, that if the rock at the foot of the gulch were used for construction purposes, the road would actually improve, rather than injure the diamond.

Tom Long reported that the Kendrick Highway district had not yet been called upon for any right-of-way outside the village limits, so doubted that the state construction work would begin in the anywhere near future. Frank Abrams, village clerk, stated that the village, like the district, had received no call for right-of-way deeds, despite the blueprint plans in the hands of the "city fathers."

Realizing that the procurement of right-of-way takes time it was the consensus of opinion that this proposed road might not materialize this year by the beginning of school, and since school buses must travel the road this coming fall, the club requested a meeting of the Village Trustees and the commissioners of the Kendrick Highway District in the near future to permit them to lay plans for the alleviation of the water-hole at the foot of the gulch this fall in the event the state road construction does not materialize.

Next the matter of a celebration for July 4th was brought up, but as there were no members of the Merchants committee present, and but a handful of club members, the matter was put off until a special meeting could be held on Tuesday evening of this week.

There was a lack of attendance at the meeting scheduled for Tuesday evening, but a consensus of opinion taken up and down the street, shows a strong sentiment against putting on a Fourth of July celebration due to the fact that the Fourth falls on Sunday, and the celebration itself would therefore have to be held on Monday — with odds against a good crowd the last day of a two-day holiday. It is therefore thought unlikely that a celebration will be held, although the next meeting of the group, June 9, might see a group vote change the program.

William L. Rogers Passes

Moscow, Idaho, May 24 — William LeRoy Rogers, 65, died suddenly today at his home. Death was attributed to a heart attack.

A member of Our Savior's Lutheran church and the Odd Fellows lodge, he had lived in and near Moscow most of his life. He came west at the age of six.

Survivors include the widow, Augusta, and one son, Wilson Rogers, of Moscow; three grandchildren and a brother, Milton Rogers, Moscow. — Spokesman-Review.

Mr. Rogers was a former resident of Kendrick, and very well known here among the old-timers, as he operated a barber shop in Kendrick for years.

School Dates Are Set

At a recent meeting of the Kendrick Board of Education, it was decided that school will commence on Wednesday, Sept. 1st. High school registration will take place Monday and Tuesday of the same week — August 30 and 31.

At the same meeting it was decided that beginners must be six years of age on or before October 1, 1948, to be admitted to school.

J. V. Fowler, state director of Vocational Guidance and acting transportation officer, was a visitor at this meeting.

Cars Collide

Tuesday afternoon, on the back street, cars owned by Don Brown and Gabriel Forest, the latter vehicle being driven by Dick White, were involved in a collision. Fender damage was suffered by both vehicles, but no one was injured.

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Danny Crocker was a passenger for Spokane Tuesday, where he witnessed a performance of the Philharmonic orchestra at the Fox theater.

Richard Johnson, Clarkston, was a Sunday guest in the L. D. Crocker home.

Mr. and Mrs. Robert Fry and family of Emmet, Idaho, arrived here Friday for a visit in the home of his parents, Mr. and Mrs. C. H. Fry, and other relatives. They had planned on returning the first of the week, but will now remain until road conditions improve.

Mr. and Mrs. Don Miller returned last Thursday evening from a two-week vacation trip to California. They visited for a time with their son, Dee, who is stationed at Treasure Island, near San Francisco. They report a very enjoyable time.

Mr. and Mrs. R. L. Blewett and son Bill left Tuesday morning for the ranch at Gifford, where they will spend a few days.

U. of I. students home over the week-end included Tom Brown, Teddy Deobald, Beverly Schupfer, Ida Marie Siffow and Tommy Long.

H. J. Monk, from Pennsylvania is visiting this week in the C. H. Fry home.

Mr. and Mrs. Axel Swanson and family are moving this week to Juliaetta. They will live in the house formerly occupied by Mr. and Mrs. Harold Abrams and family.

Mrs. Werner Brammer returned Tuesday from Spokane where she had spent several days at the bedside of her grandmother, who is quite ill.

Miss Dorothy Holt arrived home for the summer last week-end from Emmett, Idaho, where she has been teaching the past year.

Miss Lois Deobald, who has been teaching in the Grangeville high school the past year, arrived home Saturday. She was met at Spalding by her parents, Mr. and Mrs. W. B. Deobald. The stage on which she was a passenger was due at Spalding at 10:30, but due to floods, slides, etc., did not get through until 4:00 o'clock. All-in-all, it was a rather exciting ride.

Mrs. Harry Baker took the train for Portland last Wednesday, where she was met by her daughter, Agnes, and spent several days with her there. They returned home together Sunday.

Dick Coulter is doing part-time secretarial work for J. B. Coles in Juliaetta, driving back and forth.

Mrs. Raymond Hudson was flown to Portland last Friday by Stanley Hepler, upon receiving word that her husband would receive special medical treatment Saturday morning.

Lois Deobald had as a house guests Tuesday and Wednesday of this week a college chum, Winifred Tovey, who taught this past term at Emmett, Idaho; also Cecil Alldaffer of the U. of I.

Fred Clemenhagen returned early Monday morning from a business trip to Boise, leaving here early Saturday morning. Fred states that so far as he knows, his was the last car to make the trip over the road from Riggins to Whitebird, as he was just able to "squeeze" by a number of washouts and slides on the road before the Salmon river claimed the highway, which is now completely gone in a couple of spots.

Mrs. Norris Krakrug and children of Bonners Ferry, Idaho, arrived here Wednesday to spend several days waiting for the flood in that city to subside. Mr. Krakrug operates a shoe store in that city and must remain with his business, despite the flood danger. Mrs. Krakrug is a niece of Mrs. Travis.

Mr. and Mrs. John Samuel of Coe d'Alene have taken up their residence for the summer here in an auto trailer parked on the E. A. Deobald lot. Mr. Samuel is a log scaler for Potlatch Forests.

Mr. and Mrs. W. B. Deobald and daughter Lois were Spokane visitors Monday.

Mrs. Harold Goff returned Tuesday to Mullan, after spending a week here visiting her parents, Mr. and Mrs. Ben Cook and family.

Mr. and Mrs. Bill Pedlar and son Dickie arrived Monday from Tacoma to visit several days in the home of Mr. and Mrs. Bob Magnuson and family. On Tuesday all picnicked in Spalding park.

E. M. White took Hugh McDowell to St. Maries Monday, for a medical check-up.

Mrs. A. C. Needham left for her home in Spokane Monday, after spending two weeks here visiting her parents, Mr. and Mrs. Leonard Fairfield and family.

Bud Fairfield and Gerald Halseh left for Moscow Wednesday to resume work driving tractors on farms near that town.

Miss Leona Wilson, who has been teaching at Worley High school for the past year, arrived home Friday. She plans on attending a short-course summer school at N. I. C. E. in Lewiston or at the Oregon Normal this summer, and will spend the remainder of the time at her home here.

Mr. and Mrs. Fred Rogers, Greenland, Mich., and Mr. and Mrs. F. Loren Rogers of Ontonagon, Mich., arrived here Thursday evening of last week and visited until Sunday morning in the L. S. Thurber home, leaving for Spokane and coast points.

Mrs. Fred Rogers is a niece of Mrs. L. S. Thurber. Mrs. Thurber accompanied them as far as Spokane.

Mrs. Russell Smith was a Moscow visitor Wednesday.

Mrs. Bernard Reigers and baby and Mrs. John Branting and baby

(Continued On Page 2)

DEATH CALLS W. R. DAVIS, FORMER AREA RESIDENT

William Frederick (Bill Davis), 58, well known Lewiston insurance man, and a former resident of Potlatch ridge, near Southwick, died Saturday night at 11:05 at the Riverview rest home in Clarkston. He had been ill since last October.

Mr. Davis was a native of Pomeroy, born there Aug. 8, 1889. When a youth he attended Lewiston State Normal School. There he met Lola Gifford, also a student, whom he married at Pomeroy, Sept. 22, 1912. Later he and Mrs. Davis moved to a farm on Potlatch ridge, near Southwick, where they lived for 17 years, moving to Lewiston in 1936. Here he engaged in the insurance business which occupied him for the remainder of his active career.

Mr. Davis was widely known in the entire Lewiston-Clarkston and Kendrick areas and had many friends. He was active in community "home front" projects during World War II, and had many other civic activities. He was a member of the Advent Christian church.

Surviving besides his wife are four daughters and a son. They are: Mrs. Elmer Lohman, Southwick; Mrs. V. E. Buhman, Spokane; Mrs. Gus Schenckloth, and Joanne, living at home at 211 Silcott St., Clarkston. Burton Davis, Clarkston, is the son.

Two sisters, Mrs. Larry Williams, Winchester, and Mrs. Lauren Armstrong, Pomeroy, and a brother, A. W. Davis, Pomeroy, also survive. — Lewiston Tribune.

Funeral services were conducted from the Brower-Wann chapel Tuesday at 3:30 p. m., with the Rev. Orrin Conser officiating. Hymns were sung by Margaret Baer accompanied by Pauline Brigham, organist. Burial was in Normal Hill cemetery.

Honorary pallbearers were James Barkley, Lewiston; Otto Shide, Geo. Evans, Dr. J. E. DeBaun, J. Omar Gilkey and E. R. Schenckloth, all of Clarkston. Active pallbearers were Even Northug, Arthur Haworth and Kenneth Kent, all of Lewiston; Jack McLeod, Wayne Proper and Chester Peterson, all of Clarkston.

Deluge Brings Slides, Floods

A downpour of rain which began Friday night and continued almost unabated throughout Saturday caused the Potlatch to again become a chocolate tide, carrying with it tons upon tons of fine Potlatch topsoil. So heavy was the rain that the local sewer was unable to handle the run-off of the streets, and water poured out of the two lower manholes in the west part of town. Planted gardens were pounded almost into the ground and tree limbs bent low with their weight of water. The Lewiston weather bureau reported a fall of 1.7 inches during that 24 hours, while the normal precipitation for the entire month of May is 1.57 inches.

The downpour brought rolling rock and muddy waters pouring down Brady Gulch, again closing the road to Lewiston, flooding the ball diamond and backing waters up almost into the homes in the west part of town. Brady Gulch highway, however, withstood the downpour, and traffic to Lewiston was diverted over the ridge.

A big slide occurred on the Wauncher Gulch road, near the "watering trough," and it was not until Sunday morning that Brady Gulch and this highway were opened by Dee Shepherd's big bulldozer, all state equipment being engaged in work up the Clearwater, where flood conditions were far greater than many realized.

All the other grades out of town remained open, despite ditches being washed full and water cascading over the road surfaces most everywhere.

This area can feel very lucky not to have suffered greater damage. Clarence Perryman said that the state has a ditching machine here but is unable to use it at present due to wet slime on the roadways, and that as soon as conditions improve, ditches on roads in this section will again be cleaned.

Girl Scouts Hold Meeting

The regular meeting of the Kendrick Girl Scouts was held in the basement of the Community church last Wednesday evening, May 19, at 5:00 o'clock.

Three girls from American ridge were present for the first time and are planning on joining the troop.

The girls received their Hand books, played a few games, sang a number of songs and made plans for a hike and Weiner roast to be held May 26th.

Mrs. D. A. Christensen, Mrs. A. O. Kanikkeberg and Mrs. Marvin L. Long have consented to be on the Troop Committee.

Moving To New Building

Although their new building is far from complete, the Kendrick Bean Growers have begun the moving of parts, racks, bins, etc., from the Abrams Hardware to their new location, in an effort to get settled before the late spring rush begins.

Exterior and interior finish work is now under way on the new structure, and it is estimated that three weeks will see it nearly completed, so far as the display room and parts departments are concerned.

Be Sure You Have License

As the general opening date of trout season in Idaho approached, the fish and game department again announced the opening date as June 4 and the closing date October 31, throughout most of the state.

Be sure you have the proper license and that you are not fishing in closed waters.

Stores To Close Memorial Day

Kendrick business houses, almost without exception, will observe the Memorial Day legal holiday, which this year falls on Monday, Sunday being the true Memorial Day.

All places of business will be closed with the exception of the Kendrick Bakery, which will be open; the Red Cross Pharmacy, which will observe Sunday hours, and the Kendrick Co-operative Creamery, which will be open from 9:00 to 11:00 a. m. to receive cream and milk, and to permit purchases. There will be no milk delivery, however.

The bank and postoffice, will, of course, observe the holiday.

NEWS ITEMS ABOUT LELAND RESIDENTS AND FRIENDS

L. S. L. A. To Meet May 28

The L. S. L. A. will meet on Friday afternoon, May 28, at the Leland church basement, at 2:00 o'clock.

Homemakers Club To Meet

The Homemakers Club will meet on Wednesday, June 2, at 2:00 p. m. at the home of Mrs. Wilbur Tarbet. All members are urged to be present.

W. S. C. S. To Meet June 3

The Ladies of the W. S. C. S. will meet Thursday afternoon, June 3, at 2:00 o'clock, with Mrs. J. H. Coulter in Kendrick. Mrs. Wilbur Corkill will lead the devotional.

Other News

Mr. and Mrs. Robert Draper were Tuesday evening supper guests of Mr. and Mrs. Roy Craig.

Mrs. Ben Hoffman and Mrs. Harry Smith and son Stanley visited with Mrs. Bertha Pirce Friday afternoon. Mrs. Hoffman also visited her sister, Mrs. J. M. Frisbee, in Juliaetta.

Mr. and Mrs. Oney Walker and son Neal were Sunday dinner guests of Mr. and Mrs. Harry Smith.

Mr. and Mrs. Robert Draper, Mr. and Mrs. Weyne Weyne, Mr. and Mrs. Marvin Vincent and Mr. and Mrs. Ervin Draper were Spokane visitors on Thursday. Mr. and Mrs. Robert Draper drove home a new Nash.

Mrs. Jesse Thornton and Mrs. Willis Thornton and son Douglas were Wednesday afternoon visitors in the home of Mrs. Roy Craig.

Mr. and Mrs. Jack Withrow of Kellogg and Mr. and Mrs. Wm. Brooks of Spokane came Saturday to spend several days as the guests of Mr. and Mrs. Marvin Vincent, Mr. and Mrs. Robert Draper, and other relatives and friends.

Mr. and Mrs. Melvin Flesman and daughter Arlene of Clarkston were Sunday guests of Mr. and Mrs. Lloyd Craig. Marcella and Jeanne Craig went home with them to spend a week.

Mrs. Dora Heffel was a week-end guest of Mrs. Ida McAllister in Kendrick.

Mr. and Mrs. Ervin Draper drove to Moscow Monday to visit Everett Lohman, a patient in the Gritman Memorial hospital there. They were over-night guests of Mr. and Mrs. Billy Deobald, returning home Tuesday.

Mr. and Mrs. Roy Craig and daughter Paige were Sunday guests of Mr. and Mrs. Chas. Craig in Clarkston.

Mr. and Mrs. Homer Parks and Mr. and Mrs. Gerald Schmidt were Spokane visitors on Monday.

As we write these words (Tuesday) the \$64.00 question is: "Is the rain over?" Let's hope so!

University Receives Award

Battleboro, Vt. — For the ninth year a Progressive Breeder's Certificate has been awarded to the University of Idaho, Moscow, by the Holstein-Friesian Association of America. Only 136 Holstein breeding establishments in the nation have received this honor, and the University is one of six in Idaho to qualify. The Progressive Breeder's award is the highest honor given to members of the national Holstein association, and is given in recognition of a well-balanced herd improvement program developed over a period of years.

The University herd has been tested for production in the Herd Improvement Registry program of the national Holstein association for 11 consecutive years. The last test year was completed December 31, 1947, with the 23-cow herd averaging 514 pounds of butterfat and 14,667 pounds of milk in 318 days on two milkings daily.

The herd also has been classified for type and scored 84.0.

The current award is based on a herd of 48 animals, of which 28 have been freshened. Each of these 28 is a home-bred animal, that is, born and developed at the university farm.

Scouts To Hold Camporee

On Saturday of this week the local Boy Scouts, under the leadership of their Scoutmaster, Gene Lind, and assistant, Jordan Kanikkeberg, will go to Atwater lake for a three-day camporee, returning on Monday evening.

L. D. Crocker, a member of the local committee, will also accompany the group.

Engaged In Raising House

John DeHaven has been busy the past few weeks raising the home of Mrs. Nettie Gentry in the east part of town, and placing under it a concrete foundation. When the work is completed Mrs. Gentry's home should be much more comfortable, as well as being above flood water height.

Gets Pilot's License

Kenneth Wilkin, Cameron, was issued a private pilot's license Monday at the Asotin county airport by Floyd F. O'Neal, flight examiner.

WHEAT MARKETS HOLD STEADY DURING WEEK

Domestic wheat markets showed little change during the past week, according to reports to the Federal State Market News Service. Favorable new crop conditions and somewhat larger marketings of old crop grain were the weakening influences, but prospects for continued large shipments to fill export allocations made for steadiness. Prices of ordinary quality wheat held largely unchanged, but demand for high grade milling types was slow and premiums dropped sharply at some points.

Prospects at the first of May were for a wheat crop this season of around 1,117,500,000 bushels. Crop conditions May 1 indicated a winter wheat out-turn of 845,500,000 bushels. If average yields are obtained for spring wheat, a harvest of about 272,000,000 bushels would result. This estimated production would be only a little under the average utilization of the five-year period, 1942-46.

Milling requirements during the past five years have averaged only a little over 600,000,000 bushels, including wheat milled for flour for export and relief purposes. Exports of wheat as grain amounted to 273,000,000 bushels in the peak year, 1945-46, but averaged only 150,000,000 bushels during the five-year period. Seed and feed requirements during recent years have been relatively large and averaged about 360,000,000 bushels. In addition to this, small quantities have been used in the production of alcohol. Based on the May 1 prospects and the probable carry-over from the 1947 crop it would appear that wheat supplies for the 1948-49 season would be equal to the average utilization of the past five years and leave a moderate carry-over at the end of the season.

Additional rains and cool weather were generally beneficial for wheat and other small grains in most of the area east of the Rocky mountains during the week. Moisture is still needed, however, in most sections of the western plains from southwestern Nebraska southward to western Texas and eastern New Mexico. Some abandonment of wheat is reported in this area and much of the grain is headed on short straw. Spring wheat seedling is nearing completion except along the northern border, where it has just begun in some areas.

Crop prospects are reported favorable in Europe where rains during the week were beneficial in most sections and where warm weather was aiding growth. The crop is reported in good condition in the United Kingdom and an excellent out-turn of wheat is indicated in France, with trade reports placing production around 292,000,000 bushels. Rains were also beneficial in the Netherlands and in Italy. Warm weather, however, is needed in the latter country. Acreage reports for Russia are conflicting, but mostly indicate increased plantings. Heavy rains have been beneficial in Jugoslavia and Germany.

Pacific Northwestern wheat markets declined around 2c per bushel with limited demand from most classes of trade. Marketings were not very large, since stocks in the principal producing areas were reported reduced to rather low levels and growers were showing a strong holding tendency despite favorable winter wheat crop conditions. The C. C. C. purchased 166,666 bushels of wheat through the Portland office during the week, but other movement was relatively light. On the last day of the period dealers at Portland were bidding \$2.38 per bushel for No. 1 soft white, No. 1 white club, No. 1 western red and No. 1 hard red winter wheat, in bulk, for prompt shipment, delivered coast markets.

June grain export quotas announced during the week bring the total for the 1947-48 season to 415,900,000 bushels for P. M. A. procurement. Of this quantity 291,800,000 bushels are wheat, 82,200,000 are flour in terms of wheat, and 41,900,000 bushels other grains. Commercial procurement during the year totaled 105,700,000 bushels of wheat and flour in wheat equivalent and 53,300,000 in other grains. All but 200,000 bushels of the allocations for P. M. A. procurement have been obtained as of May 7. Exports of grain and grain products during April totaled 39,055,000 bushels of United States grain and grain products, which brought the total since July 1 to 493,851,000 bushels. Of this quantity 264,521,000 were wheat; 138,867,000 flour and wheat equivalent and 90,463,000 bushels other grains.

Purchases Warehouse

A deal was consummated last week whereby Ben Cook became the owner of a warehouse building in the east part of town, just across the street from the J. G. Travis home. The building is probably best known as the "old cold storage warehouse," purchasing it from the Idaho Bean & Elevator Co. at Troy.

Ben also purchased the two big planers and re-saw equipment from the Kendrick Bean Growers association, and will enter into the finished lumber business, making a specialty of home builders supplies. Right now he is busily engaged in remodeling the warehouse to suit his coming business.

Cooks Are Needed

Any lady desiring to cook for the school lunches at Juliaetta, Leland or Southwick is requested to submit written applications to Jasper Nutting immediately.

JULIAETTA NEWS

The Boy Scouts Camporee, which was to be held at Asotin on May 22 and 23 was postponed on account of rain, but it didn't stop Troop 91. They pitched camp in Asotin Park despite the rain, but then learned the gathering was to be postponed until a later date, so came home and set camp at their Sr. Patrol leader's cabin, built an out-door fire, cooked their meals and proceeded with their plans including songs and stories around the camp fire in the evening. Those taking part were Bobby Bisbee, senior patrol leader, Harold Freeman, Clinton Brown, Freddie Hadley, Dickie Mabbot, Dickie Bisbee. Absent were Donnie Whybar, Charles Taylor and Alfred Boone. Considering the terrible time the senior patrol leader had trying to get a sponsor to go with them and to find transportation, we think he did a swell job. The boys were all really cooperative and report a fine time, despite the odds against them. Vanden Bisbee and Roy Sams, who belong to the Cub Scouts, were visitors.

Mrs. Bisbee, Mrs. Tomkinson, Clinton Brown, Bob and Dick Vaden and Norman Bisbee attended the school picnic at Asotin Friday, being the guests of Jesse Kinney, a grandson of Mrs. Bisbee. Norman stayed over the week-end as a guest of Jesse Kinney.

Graduation exercises for the four eighth grade graduates were held at Kendrick on May 12, in cooperation with the Kendrick school. Those graduating were Shirley Baker, Harold Freeman, Alfred Boone and Bobby Bisbee. Bobby Bisbee was the honor student of the class.

Many of the grade school children received Spelling, Reading and Attendance awards Friday at the school picnic, which was preceded by the Pet Parade. All was greatly enjoyed.

Honored With Shower

Mrs. Eugene Brocke was honored at a bridal shower Tuesday evening, given at the home of Patty Brocke, assisted by Louella Forest and Nellie Fry.

The evening was spent playing games, after which the bride was presented many lovely gifts.

Dainty refreshments were served by the hostesses at the close of the evening.

Getting "Up In The 'Greats'"

Ira Foster received an announcement last Thursday that through the birth of a son to Mr. and Mrs. Vivian Jolin of Coeur d'Alene, he had become a great-great-great-uncle.

Highway Act To Be Extended

Idaho would receive \$4,687,000 in federal funds for highway construction for each of the next three years under provisions of the federal highway aid act of 1948, senate hearings on which will likely be concluded this week. The bill, as it passed the house, extends the act of 1944 in substantially its present form, and provides a total of \$500,000,000 per year for three more years to be used on a matching basis by the 48 states.

In allocation of Idaho's share, \$2,753,000 would be ear-marked for federal aid primary highways; \$1,925,000 for secondary roads, and \$209,000 for urban route construction and improvement.

The new bill enlarges the terms "secondary" or "feeder roads" to include county or township roads, and directs state highway officials to cooperate with county heads in selecting road projects. Enactment of the authorization bill is necessary this year so that state legislatures can appropriate matching funds during their 1949 sessions.

Many Packages Sent Abroad

The Cooperative for American Remittances to Europe, Inc., (CARE) set a record of 2,608,106 food and clothing textile packages delivered in 17 European countries in 1947, and is on the way to an even greater volume of overseas aid in 1948. P. C. French, executive director, states in his annual report to the board of directors.

CARE's non-profit, government-approved service last year tripled the 992,749 orders filled for Americans seeking to aid friends and relatives overseas in 1946, the first year of its operation.

PERSONAL MENTION

were Lewiston visitors Friday.

A. G. (Scottie) Wilson, Clarkston, was in town between trains Monday, visiting with old friends.

Mrs. Bonnie Easterbrook visited Saturday and Sunday with Mrs. Lucy Carmody and daughter Harriet in Pullman.

Mrs. Dora Heffel and Mrs. Ida McAllister visited Sunday with Mrs. Oral Craig.

W. W. Eldridge and L. A. Wallace are spending a few days in Missoula, Montana.

Mr. and Mrs. Bud McGee and sons visited Tuesday in the Erle Hudson home.

Mrs. Claude Craig, Mrs. Ervin Swenson, Mrs. Julius Caesar and sons and Mrs. Bonnie Easterbrook and daughter Vera visited Tuesday in the Phil Kirby home in Clarkston.

Charlie Craig of Clarkston was an over-night guest in the Oral Craig home Tuesday night.

Arlene Riley was a passenger for Moscow on Wednesday.

Something About TVA

Back in 1933 and 1934, the Tennessee Valley Authority built the town of Norris, Tenn., to provide homes for the construction workers who were building the Norris dam. Later the town served the same function for the builders of the Oak Ridge atomic research project. Now, we learn from an eastern newspaper, the town is for sale. The news story, with all that it tells about the town and the operations of TVA, is well worth the careful consideration of all federal tax payers as well as residents of particular areas of the nation proposed to be included in and ruled over by valley authorities after the fashion of the TVA.

The prospect of the sale, so the news has it, finds the residents of Norris torn by conflicting emotions. "On the one hand," it is said, "the sale offers them the prospect of enjoying democratic self-government." But "TVA has been an excellent landlord and its departure from the scene will fill the future with uncertainty."

In those quoted sentences the reader gets a glimpse behind the scenes. He finds in them what critics of TVA have always claimed. He finds that TVA has been a despotism, benevolent perhaps but still the supreme authority, and with the people fully controlled. And those people, having leaned for years on the TVA crutch, are not quite sure that they are going to be able to walk. They have become uncertain about self-government.

Here are more sentences: "The homes range from three to eight rooms and rents range from \$18 to \$70 a month. They are arranged 'informally,' according to the prospectus, on winding roads. Robert Moore, principal of the school, described the landscaping as 'out of this world.' Though the homes are small, the large grounds give the town the appearance of a 'swank residential area,' he said.

"Norris residents have paid no local taxes under TVA administration, and all their public utilities, police and fire protection have been provided by the TVA."

No taxes. Everything for free except rent and the community kept up like a "swank residential area." That, indeed, was something to lean on!

It's no wonder that visitors came away from the TVA region marveling at what they had seen. The trouble is, however, that they saw only the surface. What is under the surface is now coming to light in such stories as this one and in the audit of the TVA finances made public last year.

"No taxes," we said. We take that back. No taxes on the TVA operations and beneficiaries but plenty on the rest of the country to help pay for this experiment. — The Bend, Oregon, Bulletin.

Idaho Gas Use Increases

Idaho ranked fourth in the nation in the percentage of increase in motor fuels taxed by the state in 1947, compared with 1946, according to Earl Floyd, director of the motor fuels bureau.

The total of aviation gasoline, diesel fuel and gasoline taxed during 1947 was 164,864,089 gallons, which represented an increase of 13.2 percent over the 1946 gallonage. The largest percentage of increase in gasoline consumption in the nation was reported from Wyoming with approximately a 15 percent increase.

State gasoline taxes were collected on 28,407,000,000 gallons of motor fuel during 1947, an increase of 2,539,000,000 gallons or nearly 10 percent more than was taxed during 1946, according to figures compiled by the Public Roads Administration of the Federal Works Agency from motor fuel reports of state agencies.

This gallonage does not include approximately 4,345,000,000 gallons of gasoline on which the tax either was not paid or paid at a reduced rate because the fuel was used for government or non-highway purposes such as agriculture, industry, etc.

California again led all states in the amount of motor fuel taxed, with a total of 2,739,906,000 gallons in 1947, an increase of 303,476,000 gallons, or 12.5 percent over the 1946 figure.

In Idaho the increase in gasoline gallonage between 1946 and 1947 amounted to 17,785,027 gallons, or 12.6 percent. The total tax for 1947 was \$9,839,040 compared with \$8,639,702 for 1946.

The total tax collected in April of this year was \$763,860, making the total for the first four months \$2,706,391.00.

Uniform In Museum

The uniform worn by Fleet Admiral Chester W. Nimitz when he signed the Japanese surrender document in Tokyo Bay, Sept. 2, 1945, has been donated as a permanent exhibit at the Naval Academy Museum, Annapolis, Md.

Installs New Radio Equipment

John Davis of the Kendrick Metal Shop last week installed a new radio tube tester and tester for condensers and other portions of the set, all in one "package" unit. John is now repairing radios as his time permits.

Bigger Fowl Contest Extended for Year Poultry Raisers Seek Heavier Farm Flocks

Bigger and better drumsticks for "Junior" are sought in the national Chicken-of-Tomorrow contest, which will be extended through 1948. The decision to continue the event was made in response to demand from poultry raisers from coast-to-coast.

Unlike popular reducing fads among the hen's human counterparts, this barnyard project is designed to add weight to the farm flocks and to give American chicken

A day-old chick perches on a model of the Chicken-of-Tomorrow, the objective in a nationwide contest extended through 1948.

eat more for their money. Poultrymen from all parts of the country are joining in the hunt for a breeding formula which will add at least 10 per cent more meat to the present-day chicken. A higher percentage of meat on the bone structure and even meatier wings are sought, thus assuring "Junior" that no longer will only a skimpy appendage be left as his lot when the dinner platter arrives at his lowly place.

The industry-wide educational breeding contest originally was set up on a three-year basis, with two years of state and regional contests culminating in a grand national championship this spring in Delaware. Forty top breeders throughout the nation will send eggs to the finals, where they will be hatched and raised under identical conditions under supervision of the department of agriculture. Winners will receive \$7,000 in prizes awarded by A & P stores, sponsors of the contest.

Expensive Alarm

Why keep a rooster when an alarm clock is cheaper?

That question is posed by Boyd A. Ivory, Wyoming agricultural extension service poultry specialist. A rooster, Ivory points out, eats about \$5 worth of feed a year at current prices. All you get in return, he insists, is a lot of crowing—accompanied by NO eggs!

A rooster is worthless in a poultry flock unless he is being used for breeding purposes in supplying fertile eggs for hatcheries or home incubation.

Hens won't lay any more eggs than they are laying just because a rooster is on the premises, so why not sell that "crowing so-and-so"?

Trade him for a \$1.93 alarm clock that tells the time of day for the entire 24 hours and you'll save about \$3 in feed costs on the swap!

Quality Chicks Needed To Offset Feed Costs

One method through which poultrymen can combat the present high cost of feed is to purchase good quality chicks. Feed costs, records compiled by the extension service indicate, now amount to 60 per cent or more of the total costs of producing eggs and chicken meat in contrast to 50 per cent in normal times.

Tree 'Butchery' Blamed On Untrained Pruners

It often takes 50 to 75 years to raise a good shade tree. But, extension foresters insist, it takes only a few minutes for an untrained pruner to ruin its beauty. Poor trimming technique is destroying the beauty of many streets.

Examples of good pruning are seen on most public building grounds. On the other hand, on almost any street examples of tree "butchery" can be seen.

White Pine, Big Favorite, Offers Most Varied Uses

Of all American woods none has been more significant than white pine. Nowhere else is there a wood so light that grows so tall.

Within 30 years of their arrival, the Pilgrims were exporting white pine all the way to Madagascar. A single tree made a mast tall as a ship could carry, yet so light it was never topheavy. When the English navy sailed to some of its greatest victories in the 18th century, it spread its sails on masts and yards of New England white pine, says Donald Culross Peattie, in American Forests.

White pine built New England's loveliest colonial mansions and churches. A favorite of the carpenter, it works smoothly under the plane, and shrinks or swells little when properly seasoned. Fleets were launched to export white pine, railroads were bent to great stands of it, mushroom cities rose in its clearings, and it founded great fortunes. Under its boughs evolved the American lumberjack.

For toughness our pioneers turned to hickory. Not steel itself is as shock resistant. So the Norwegian ski champion wants to know that, when he takes that flying leap, his life is insured by good American hickory under his feet. As a fuel, a cord of hickory almost equals in thermal units a ton of anthracite, and epicures will have no smoked hams but those cured over green hickory coals, so subtle is their aroma.

Every American soldier, from Washington's armies to Eisenhower's, has known the feel of a native black walnut rifle stock under his palm. Under hard usage, walnut does not splinter; instead of growing rougher with handling, it becomes smoother.

Old Superstitions Thrive In Ozark Mountain Country

Down in the Ozarks many superstitions still linger and flourish. It is bad luck in these hills to remove the ashes on Sunday, and many still count the stars around the moon to learn when it is going to rain.

Many farmers in the Ozarks plant their potatoes on Good Friday, in the dark of the moon, and watermelon seeds go into the ground the first Sunday of May. Those who want big melons carry the seeds to the patch in a bushel basket.

The caw of the rain crow is a good sign of rain, and so is the croaking of the tree frog and stretching of necks and sniffing of air by horses and cattle. However, there will be dry weather if the whippoorwill calls or the owl hoots in the barnyard.

A bald head baby presages good, for thick hair means the child will not grow fast. If the child smiles in his sleep the angels are talking to the baby and will soon take him away.

Perhaps water witching is the most universally believed and practiced superstition of the Ozarks. The water witch with a forked stick of hazel, willow, elm or peach tree can locate where water will be found. If the land owner will dig beneath the place where the twig points he will find water.

Plutonium Poisoning Remedy

When the atom bombs were dropped at Hiroshima and Nagasaki many thousands of people who were not killed outright died subsequently of plutonium poisoning, which has been a constant menace to U. S. atomic scientists. Treatment for plutonium poisoning now has been found in the use of a rare metal called zirconium, which "bumps" the radioactive plutonium out of human bodies. This treatment has been tested extensively on animals. All tests indicate that the treatment would be effective on human casualties in an atomic war, as well as on scientists who might absorb too much radioactive plutonium in the course of atomic research.

Nutrient Value of Margarine

A survey conducted over a two-year period shows that margarine fortified with Vitamin A and butter have equal nutritional value, the Journal of the American Medical Association announced recently.

The test was conducted at the University of Illinois by Dr. Anton J. Carlson, dean of American physiologists, Dr. Harry Leichenger, and Dr. George Eisenberg.

Two groups of children were observed in the study. One group, consisting of 160 children from three to 16 years who were orphans or children from broken homes, ate standard brands of margarine during the two-year period. They were given margarine on bread, in vegetables, in pastry, and in fried foods.

The butter group included 107 children of approximately the same age in another institution ten miles away.

Conclusions reached by the investigator indicated that there is no apparent nutritional difference when the source of supplementary table fat is margarine rather than butter.

Mississippi Flood Costs

Mississippi river floods during 1947 caused crop losses reaching \$12,242,000 in Illinois levee and drainage districts and exacted an additional toll of \$1,837,550 in property damage. Flood conditions which prevailed virtually continuously from April to July last year inundated approximately 236,000 acres.

New Device Controls 'Cancer' of Buildings Pipes Enable Chemical To Reach Termites

Termites, the "cancer" of buildings, now can be controlled. Through all the ages the tiny insect that feasts on wood in homes, farm buildings and other structures has been a constant destroyer. Annual property losses run far into the millions. Ordinary control measures could not get at the intricate tunnels hidden away in difficult and impossible to reach places.

A new device, hailed as an effective means of combating the destructive pest, was demonstrated at the annual convention of the National Association of Home Builders in Chicago by W. B. Hill of Memphis, Tenn., nationally known as a termite expert.

His method consists of installing a series of slotted pipes at the time of construction in all inaccessible areas, including dirt-filled porches, sun parlors, stoops, steps and fireplaces. Annually a perforated pipe is slipped into the allotted pipes and all hidden areas are treated with a powerful chemical toxic blown

In this novel display, a colony of termites is feasting on the framework in a model home structure. It provides dramatic proof of the destructive ability of the tiny insects.

Hill, who has spent 20 years figuring ways of waging war on the termite, also has devised a display showing live termites at work. Enclosed in glass, his small scale model home has an army of hungry termites actually at work constructing their intricate network of mud tunnels or shelter tubes. It shows the worker, the soldier on guard and the immature, young potential queen who swarms in the spring.

Beware the 'New Look,' Crop Specialist Advises

Beware the "new look," especially in crop varieties. That is the advice of Joe Robinson, Iowa State college agronomist.

"New varieties seem to hold some sort of magic charm over many farmers," stated Robinson. "I am happy to see the farmer change to new varieties whenever they can increase his yield but just because a variety carries a new name is no indication of its value." Robinson pointed out that performance records are more important than newness.

Selection of suitable hybrid corn varieties creates another problem. Unlike other crops, some hybrid corn varieties are produced by only one concern. Eligibility of both the private hybrid lines and the experiment station lines for certification depends on the performance records in a corn yield test.

Mosquito Control

Use of DDT, 2,4-D and other newly-developed weed killers is aiding efforts for mosquito control. Cost of some of the new insecticides, however, makes their use prohibitive on large mosquito breeding areas. Ditching and other more permanent methods still must be resorted to in those areas.

Photo, from the New Jersey agricultural experiment station, shows an aerosol fog generator used by a mosquito extermination commission.

Income From Poultry Increases in Nebraska

Sale of poultry and eggs has been accounting for 9 to 12 per cent of the cash farm income in Nebraska, according to figures compiled by J. H. Claybaugh, extension poultryman.

Yearly egg sales have been more than 50 million dollars and as high as \$7 million for the past five years. Sales of poultry have averaged more than 20 million, reaching a peak of 27 million.

To Eradicate Pests

Parma — The Idaho fish and game commission recently appropriated \$65,500 for a 15-month predatory animal control campaign. Under the program \$15,000 will be used to eradicate magpies; \$7,500 for cougars and \$40,000 for coyotes and bobcats.

Warning Is Issued

The Idaho State Chamber of Commerce this week warned people to give money for charities only to authorized solicitors, who are provided with official receipts or who can display the credentials of well-known organizations.

Get those fresh frozen vegetables, fruits, meats and fish at Blewett's Grocery-Market. 1-adv.

Wheelbarrow load of dead rats

Imagine—a wheelbarrow load! That's what a farmer picked up after he'd baited the premises with Anturat, the new, modern Dr. Hess rat killer.

Anturat is made especially for farm use. Its killing agent is antu whose unusual properties as a rat killer were discovered during the war. Anturat is less toxic to livestock and poultry than most commonly used rat poisons.

Anturat can be used either as a baiting poison or a tracking poison. To use it as a tracking poison, you just sprinkle it in rat holes and runs.

The rats pick up Anturat on their feet. They lick their feet and get a killing dose of the poison.

It costs \$2 a year to keep a rat. Rats spread disease and filth. Kill them with Anturat. Get the 8-oz. farm-size package.

Grow IN
CHRISTIAN FAITH
AS YOU GROW IN YEARS

Grow In Christian Faith

One of two things is true. You continue to grow in your Christian faith or you lose your Christian faith. The truthfulness of this statement must be recognized and acted upon. Christian faith is not static; it is a dynamic force that must find expression.

Learning is not an elective for Christians. The Christian life is a way of living; a process that is ever developing.

As each year passes it should mark a stage of growth in spiritual understanding. Each adult should be able to look back upon the past and say: "I have left the place upon which I stood last year. I am now standing upon higher ground in my understanding of God's plan and purpose for me."

There can be no abiding satisfaction for those who are growing in years unless they are growing in their faith. We must recognize these fundamental principles and live in keeping with them or we will die spiritually and physically.

Proper Cooking Will Hold

Nutritive Value of Foods

When a housewife's cooking is needlessly wasteful of vitamins and minerals that fresh foods offer, it may take heavy toll of what the food can contribute to health and well being. To help the big question: "What constitutes good cooking from a nutritive standpoint?" a group of food and nutrition specialists in the U. S. department of agriculture have systematically cooked some familiar foods in family-sized quantities.

These specialists have boiled, baked, fried and used other common cookery methods suitable to the foods under test. Before and after cooking, they checked up on 12 nutrients, including not only vitamins sensitive to heat, air and water, but also minerals that escape into cooking water, and the ash and mineral content of the foods.

Green peas, carrots and potatoes—three vegetables commonly prepared in a wide variety of ways—were chosen for intensive tests. The findings show, for example, that although the skin of a potato is a highly protective device for holding in nutritive values during cooking, the skin of a carrot plays no such protective role.

Carrots boiled whole, pared or unpared, kept about 90 per cent of their vitamin C. Potatoes boiled whole in their skins kept practically all of their vitamin C, whereas when pared before boiling, potatoes retained from 70 to 80 per cent of this most delicate of the vitamins.

More Machines for Farmer Expected as Output Rises

More new farm machinery will be on the market for farmers in 1948 than in 1947. Production of farm machinery in 1948 probably will be enough above 1947 to allow for a slight rise in total exports and still leave more new machines for the home market than in 1947 or any other year.

However, export demand for some types of tractors and machines may be relatively high in relation to our production of these machines.

Farm machinery output in 1947 probably was about 15 per cent above the previous record of 1946. More materials, new plants and expanded facilities in established plants, are all helping to roll more machines off the assembly lines.

At the same time, the export demand, especially for tractors and tractor equipment, is exceptionally strong. Our farmers depend mostly on American factories to supply their machinery needs. Only a small percentage of our machinery is imported, principally from Canada, and 10 per cent or more of our output has been exported in most recent years.

In 1947, exports probably took more than 15 per cent of our total farm machinery output. Those exports were larger than for any recent years. Shipments to Europe this year may total about 4 per cent of the 1947 output.

Life-Saving Job

Thanks to his knowledge of tile setting, a murderer was once saved from the hangman. Just as the executioner was ready to place the noose around his neck, a monk who had learned that the man knew the tile trade requested that he be pardoned. Years before, it seems, the monastery of San Francisco, in Lima, Peru, had been given a splendid collection of Spanish tiles, but had never been able to find a craftsman to put them in place. The prior, therefore, asked the murderer's reprieve, so that he could be put on the job. The man thus expiated his crime by years of labor, setting some of the most beautiful tile work to be found in the new world.

America's Freedom Train

Sponsored by U. S. department of justice and financed by the American Heritage foundation, the Freedom Train is a traveling shrine spearheading a rededication to democracy. In addition to the United States constitution, the bill of rights and the declaration of independence, it exhibits the manuscript of Lincoln's Gettysburg address, the last message from Corregidor, Admiral Spruance's reports on Iwo Jima operations and the German and Japanese surrender papers. The locomotive powering the train is a 2,000 h.p. diesel-electric.

Franklin D. Roosevelt Library

The Franklin D. Roosevelt library at Hyde Park, N. Y., was established by joint resolution of congress approved July 18, 1939, to preserve and make available for use the books, manuscripts and other historical material donated to it by President Roosevelt, and such other related historical material as it might acquire. The building was erected with privately subscribed funds on a section of the Roosevelt estate donated by Mr. Roosevelt, and was turned over to the government on July 4, 1940.

Junior Traffic Tragedies

Approximately 4,200 children under 15 years of age were killed in traffic in 1947, according to National Safety council figures. About 200,000 of this age were struck down by autos but recovered. More than half of these young victims were pedestrians. Many were struck while playing in the street. Seventeen thousand youngsters were hit while riding bicycles.

New Chemical Curbs Many Fruit Pests

Tests Show Fungicide Effective in Orchard

Characterized as effective against a wide range of fruit pests and diseases, a new dinitro-fungicide and insecticide for orchard use now is available commercially under the trade name of DN-289. It is a stable, clear solution containing eight ounces actual dinitro-secbutylphenol in each quart and is readily miscible with water.

DN-289 has proved effective as an insecticide for use in the dormant period against a variety of insects such as rosy apple aphid, currant aphid, black cherry aphid, mealy plum aphid and viburnum aphid, eye-spotted bud moth, cherry case-bearer, pear psylla and oyster shell scale on apple and lilac. Promising results also have been shown in control of San Jose scale, scurfy scale and the eggs of the European red mite.

As a fungicide, DN-289 has been used successfully for control of sooty blotch on pears.

Amount of the compound required to attain good control ranges from

Photo shows an apple protected by DN-289 (left) and cluster attacked by rosy apple aphid.

one quart to two quarts in 100 gallons of water. Aphids are controlled with one quart while two quarts are needed to kill bud moths, case-bearer and the pear psylla. Heavier concentrations may be needed to control oyster shell scale.

Research workers are conducting extensive tests to find other insects and diseases that may be controlled with the chemical, which was developed by the Dow Chemical company.

Packaging of Poultry Is New Development

Farmers of tomorrow must be poultry merchandisers as well as producers if they are to compete successfully with the new "broiler factories." Progressive poultry raisers must keep attuned to the times if they are to meet the challenge of new developments in the industry.

Within a short time the consumer will have a wide range of selection for poultry and meat products. This will necessitate better merchandising on the part of the individual poultryman.

One of the principal means of meeting this challenge is for the poultry raiser to start selling chickens under brand names in an effort to promote his product for the time when consumers again will be "choosy."

To accomplish this, good packaging is essential. Modern transparent

Good packaging, as demonstrated by this cellophane-wrapped chicken, is good advertising.

packaging of ready-to-eat poultry will increase sales and profits.

Tests conducted with the same grade of poultry, half being sealed in flexible packages, the others without covering, proved that demand for the packaged birds was one to three times as large as for the unwrapped ones.

For packaging, cellophane, transparent regenerated cellulose film or a rubber hydrochloride film are available. They are moisture-proof, air-proof, strong, flexible and resistant to liquid and grease.

Pullets Termed Better Layers Than Old Hens

Further evidence of the importance of keeping only pullets for layers and selling all old hens is contained in tests conducted at western Kentucky substation.

Average results over 11 years show that annual production of Barred Rock pullets was four dozen eggs per bird greater than that of hens. In the case of White Leghorns, pullets laid three dozen eggs per bird more than old hens.

SOMETHING TO BUY OR SELL — USE A WANT AD.

You can't help but keep a McCormick-Deering Milker pail spotlessly clean. Every part of the surface that milktouches is readily seen for quick cleaning.

Besides, the completely stainless steel construction makes rusting impossible. Just take a look at this modern machine and you'll agree that the easy-to-clean McCormick-Deering helps produce more profitable milk.

And the 9-inch pail opening... how can that mean better milk for you? Because it simplifies your cleaning job, thus keeping bacteria at a minimum, and speeds up drying.

There's a good way to prove these facts. Stop in and look over this great milker or, better yet, arrange for a demonstration. Find out for yourself just how the McCormick-Deering Milker turns out cleaner, healthier milk.

GOLDEN RULE

Jimmy Finke is spending a couple of weeks in camp with the Finke Brothers.
 Mrs. Bob Babb and Phyllis; Mrs. Don Christensen and Doris Ann, and Fred Stage were supper guests at the Glen Betts home Tuesday. Mrs. Babb was just returning home after spending the past ten days in Lewiston with Phyllis.

Fred Stage received word Tuesday of the death of his brother, Frank, at Butler, Indiana. He had been back to visit him this winter.

Loy Martin came home from his work at Grangemont Wednesday. He is suffering with boils on one arm. We extend our sympathy to Mr. and Mrs. Ishmael Martin, who lost their infant twin sons, Ronald and Donald, at St. Joseph's hospital in Lewiston, Wednesday, only a few hours after birth.

Loy Martin went to Lewiston for a few days to take treatments. Mr. and Mrs. Chester Martin took him down.

Visitors at the Glen Betts home Sunday were Mrs. Oscar Laurence and Caroline; Mrs. Frank LeBaron and son Ben and daughter Barbara.

George Finke, Jr., was a Spokane visitor the last of the week. On the return trip the steering gear of his car gave way, he hit the bank, and was lucky to come out with only a couple of cracked ribs as injuries. Pat Finke was among the young folks who helped the Hanks brothers celebrate their birthday anniversaries, Sunday.

The sunshine we have had the past two days is very welcome. We only hope it will continue.

Take Many Trout Eggs
 The largest number of rainbow trout eggs taken at Coffee Pot Rapids since 1944, was gathered during the 1948 spawning season just ended, says and Idaho state fish and game department report. Seven and one-half million eggs were taken. The station is on the North Fork of the Snake river near Ashton.

High water caused the removal of racks while many fish were still below the trap. If the river had not reached such a high stage it was estimated that at least 10,000,000 eggs would have been received.

A total of 7,000 females and 4,000 males were handled through the trap. The eggs are being distributed from Ashton to many state hatcheries throughout Idaho.

To Hold Baseball School
 Beginning June 3, the St. Louis Browns will conduct a four-day baseball try-out camp at Bengal Field, Lewiston. The purpose is the finding of new talent with which to supply teams in their increasing minor league system.

The try-outs begin at 10:00 a. m. daily and will be open free to all baseball-minded youths 17 to 23 years of age, the only requirement being that they bring their own baseball shoes and gloves.

COOL — COLORFUL — MODERN AWNINGS

YOU MAY BE ELIGIBLE FOR OLD AGE PENSION PAYMENT

"Too many people are losing old-age and survivors insurance benefits through ignorance of their rights under the Social Security Act," King C. Torgeson, manager of the social security administration, Lewiston, Idaho, field office, announces.

Mr. Torgeson stated that local offices of the administration have no means of notifying all workers or their survivors when they become eligible for benefits under the old-age and survivors insurance program. Through the cooperation of funeral directors we have been able to advise many, but not all, survivors of workers in death cases of their potential eligibility. We have, however, no way of getting in touch with live workers when they reach age 65.

Some workers wait several months and some even years after their retirement at or past their 65th birthday before they file claims for old-age insurance, with a consequent loss of benefits.

The worker, himself, if he has been employed in industry or commerce, should visit the field office when he reaches age 65, even if still employed. At the field office he can learn the status of his account and get valuable information as to when he should file application for benefits so as to obtain the highest amount payable on his account.

The other visit should be made without delay by a member of the immediate family or near relative of a worker in covered employment who dies, at whatever age. This contact with the field office by survivors is important.

Tips About Pigs

Says the American Veterinary Medical association:

Lush green pastures and damp weather can be a bad combination for young pigs. During the spring and early summer months, 30 to 60-pound pigs on pastures should be protected against the danger of grass scours. This severe and often fatal condition is believed to be caused by a fungus growth on vegetation during wet weather. Affected pigs should be taken off pasture and given dry feed for a week. Intestinal astringents may also be used to help speed recovery.

Do not wear them too young! Be sure they're at least eight weeks old, and it's even better if they're ten.

The best and cheapest way to keep pigs free from parasites is to put them on pasture which hasn't had hogs on it the past year. Then, too, there is no better way to cut down the cost of feeding hogs for market than to feed them on legume pasture if possible. By using a good legume pasture, a considerable quantity of grain and about half the expensive protein supplement can be saved. Not only are the gains cheaper but the pigs are more thrifty.

Some animal protein must be provided for pigs until they reach 100 pounds. Skim milk and tankage are the most common animal proteins used. If skim milk is available, there is nothing better.

Feeding fattening pigs with a self-feeder is the most efficient and economical method of pork production.

Fruit juices, bacon and eggs, toast and coffee for breakfast? Get the "makin's" at Blewett's-Grocery Market, Kendrick. 1-adv.

NOTICE OF SPECIAL SCHOOL MEETING AND ELECTION

In Kendrick Joint School District No. 283, Latah County, Idaho

NOTICE IS HEREBY GIVEN. That a special meeting and election of the qualified voters of the above named School District will be held on the 5th day of June, 1948, at 1:00 o'clock P. M., at the school house in said district, at which meeting it shall be determined by a majority vote of the qualified voters present and voting:

- Whether the Board of Trustees of said District shall be authorized to make a levy in some amount not exceeding nine (9) mills, in addition to and above the levy which, as provided by law, the Board of Trustees may make without such election or authorization.
- Whether the Board of Trustees of said District shall be authorized to make a levy not to exceed one (1) mill, for the purpose of purchasing, equipping and/or maintaining playgrounds and gymnasiums.

FURTHER NOTICE IS GIVEN,

That:

- The assessed valuation of said District for the preceding year was \$1,818,650.00.
- The amount of money which the Board of Trustees has estimated to be necessary to operate the schools of the District for the ensuing fiscal school year is \$92,231.54.
- The levy which the Board of Trustees may make without election will raise approximately \$24,551.77.
- State and County Apportionments for the next fiscal year are estimated at \$200.00.
- The levies for which authorization is being asked, and which will raise approximately \$21,823.80, are:

For Current Expense 12 mills.
 For Playgrounds and Gymnasium 1 mill.

That the qualifications of voters entitled to vote at such meeting or election are:

- Electors of the State of Idaho.
- Residents of the district at the time of election.

In addition thereto said voters must possess one of the two following qualifications:

- Parents or guardians of a child or children when such child or children are under twenty-one (21) years of age, and when such child or children and parents or guardians thereof are residents of the district at the time of election; or
 - A person who pays taxes within the district, and the husband or wife of such taxpayer, in case the taxpayer is married. A payer of poll tax is not a taxpayer.
- That the election will be by secret and separate ballot.
 Dated this 21st day of May, 1948.
 A. O. KANIKKEBERG,
 Clerk of Joint School District No. 283, of Latah County, Idaho. 22-1

IN MEMORIAM:
In Flanders Fields the poppies blow
Between the crosses row on row—
Saturday, May 29th, Buddy Poppies will be on sale in Kendrick. For twenty-seven years the Veterans of Foreign Wars have paid tribute to the memory of their fallen comrades by conducting a nation-wide "Buddy Poppy" Sale. Every dollar, every penny that comes from these scarlet poppies of "Flanders Fields" is applied directly to the welfare of our veterans in need and their dependents.
The disabled veterans in our government hospitals make the "Buddy Poppies." Now they are asking you to buy them, and to contribute generously, for there remains much work to be done.
Buy a "Buddy Poppy" and help a needy veteran. Remember that when you buy your "Buddy Pop-

py" you are honoring the dead — for you are helping their living comrades.
An efficiency expert walked up to two clerks. He asked the first: "What do you do here?"
The clerk, fed up with red-tape, buck-passing, forms, office politics, and, above all, efficiency experts, answered: "I don't do a thing!"
The efficiency expert nodded, made a note, then asked the second clerk: "And you, what is your job here?"
The second clerk, a fellow sufferer, said: "I don't do a thing—either!"
The efficiency expert's ears perked up: "H-m-m," he said, "useless duplication!"
Foreman to one of his workmen: "When I hired you two weeks ago, you told me how good you are. Now tell me all over again. I'm getting discouraged."

PARK ITEMETTES

Mrs. Smith closed a very successful term of school last Friday, May 21. A community picnic was held at the school house with all the pupils, their parents, and many friends present. The weather was rainy so the usual game of ball could not be played, so the afternoon was spent in visiting.
The following awards were given: Spelling Certificates — For receiving 94 or above in the county Spelling contest: Virginia, Roy and Ethel Smith.
Book Report Awards with Gold Seals: Karl Enger, Ethel Smith and Donald Smith.
Book Report Awards: Eunice Stratton, Ronald Mael, Hazel Mael, Jerry Smith and Lestil Roy.
Those receiving certificates for being neither tardy nor absent were Roger Mael, Hazel Mael, Ethel Smith, Clem, Smith, Donald Smith and Jerry Smith.
Those only absent two days each were Karl Enger and Ronald Mael. Those receiving their diplomas from the Eighth grade were Hazel Mael, Lestil Roy and Jerry Smith.
We sincerely hope the rains are over, for farmers in this vicinity are very anxious to begin their spring work.

FAIRVIEW NEWS ITEMS

Mr. and Mrs. Harold Parks and family were Lewiston shoppers on Wednesday.
Mr. and Mrs. Pearl Hazeltine and baby son were Pullman visitors on Thursday.
Mr. and Mrs. Fred Glenn and family were Sunday dinner guests of Mr. and Mrs. Paul Hall and family on Little Bear ridge.
Mr. and Mrs. Ed. Gertje called at the Harold Parks home Thursday afternoon.
Dr. and Mrs. D. A. Christensen were callers in the Jesse Heffel home Thursday evening.
Mr. and Mrs. Harold Parks and family attended the Air Show in Clarkston Sunday afternoon.
Miss Mary Byrne spent Sunday in Lewiston with her parents, Mr. and Mrs. Frank Byrne. All were dinner guests that day of Mr. and Mrs. Paul Byrne in Clarkston.
Those attending the Horse Show in Lewiston Sunday were Jesse Heffel and Mr. and Mrs. Wilbur Corkin and family.

LINDEN ITEMS

Mrs. Clem Israel is steadily improving, especially now that her daughter, Mrs. James Cuddy and children of Woodland, Wash, are here to help care for her. Mrs. Cuddy will remain until her mother is able to be up and around. And, too, Mrs. Israel enjoys her grandchildren.
A baby boy was born to Mr. and Mrs. Loyd Israel Saturday night at the Davidson Nursing Home in Kendrick. No further particulars are available at this time.
Ted Grinolds is convalescing from a recent major operation. We understand he is now at the home of his father-in-law, Mr. and Mrs. Hill, where he will remain until able to come home. Louis Alexander is doing the chores during his absence.
Has the clearing up shower finally fallen? We hope so. This spring has certainly been a good one for grass — but then, we can't eat it!

Game Law Violations Down

Cold weather during April had a beneficial effect on one phase of Idaho wildlife, the fish and game department reports. Poaching was held to a low level.
Sixty-six arrests were reported by
