KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, JUNE 17, 1948

NO. 25

INTERESTING HAPPENINGS FROM JULIAETTA AREA

Ben Adams of Long Beach, Calif., visited at the home of his sister, Mrs. Anita Brandt, this week.

Mrs. Eben Adams and Mrs. Amanda Alexander of Moscow visited on Tuesday in the home of Mrs. Anita Brandt.

Mr. and Mrs. Ted Taylor and family were week-end guests in the home of Mrs. Laura Groseclose.

Mr. and Mrs. Gillis of Troy were Sunday afternoon callers at the Laura Groseclose home.

Mrs. H. L. Groseclose has gone to Lewiston to work at Smith's Frozen Foods.

Mrs. Adrian Johns is enjoying a visit from her mother, Mrs. Saddler, of Coeur d'Alene.

Mr. and Mrs. John Trombetta and family have just returned from a fishing trip. We did not learn their luck.

Mrs. Harvie Shepherd enjoyed a week-end visit with her sister and brother-in-law, Mr. and Mrs. George Paulk of Newport, Wash.

Douglas Shepherd, son of Mr. and Mrs. Harvie Shepherd, is spending a few days at a house guest of his aunt and uncle, Mr. and Mrs. Alden Hoidal of Troy.

Donald Hoaglund of Bonners Ferry is visiting his sister, Marilyn Magnuson.

Mr. and Mrs. Ralph Magnuson motored to Bonners Ferry over the week-end.

Jack Neade has taken delivery of a new G. M. C. pickup, and Mikey Hedler a new Chevrolet pickup.

Mrs. A. A. Gardner of Tacoma, Wash., is visiting her sister, Mrs. Walter Cochran. The trip over was made by plane.

Mrs. M. C. Halliday recently returned from a two-week visit in Pasco, Wash.

Mr. and Mrs. Louis Lindquist spent the week-end in Moscow visiting with relatives.

Mr. and Mrs. Woodrow Nye spent Sunday with Mr. and Mrs. Jack Kumpula, in Clarkon Heights.

Beverly Jean Swanson has returned from Coeur d'Alene, where she was employed for the past several weeks.

Mr. and Mrs. Everett Kirkpatrick motored to Spokane on Saturday. Mr. Kirkpatrick returned with a new Chevrolet pickup, Mrs. Kirkpatrick remaining over until Monday.

Mrs. Wm. Groseclose received word Sunday of the passing of her niece, Mrs. Harry Herrington of Beaverton, Oregon. Mrs. Herrington was a sister of Dallas Groseclose, and well known around Juliaetta, it being her home until she married. Dallas and Ed Groseclose, the latter of Arrow, left Tuesday evening for Beaverton to attend the services. They were accompanied by Mrs. Carroll Groseclose of Teakean. Mrs. Wm. Groseclose will go to Teakean during Mrs. Carroll Groseclose' absence.

Orofino Wins Two
Orofino, June 13 — Airtight pitching performances by Sonny Thompson and Shelly Steiner paced Orofino to 5-3 and 2-1 victories over Kendrick in two valley division ball games here today. Thompson allowed only four hits in the first game and Steiner scattered six hits in the second contest. W. Brammer, Kendrick hurler, allowed only four hits in the second game. Jay Armitage's home run with Carl Braun on bases was the big blow for Orofino in the first game.

First game batteries: Kanikkeberg and Armitage for Kendrick; Thompson and Merrill for Orofino. Second game: W. Brammer and Kanikkeberg for Kendrick; Steiner and Rogers for Orofino. — Lewiston Tribune.

Injury And Appendectomy
Wilbur Corkill received a very painful injury last Friday while he was replacing a shackle bolt in a spring on his pick-up. The jack holding the vehicle up slipped, allowing it to fall on the middle finger of his left hand, pinching off the end of the finger.

The following day Mr. and Mrs. Corkill's little daughter suffered an attack of appendicitis and was rushed to Lewiston, where she underwent surgery at the St. Joseph's hospital. It was found the appendix had broken, but penicillin was administered and she is getting along nicely.

Birthday Party
Mrs. Wm. Johnston entertained a group of little folks last Friday afternoon, honoring her son David's birthday anniversary. Those present were Darlene, Sandra and Wanda Peters, Ronnie Craig, Carol, Phyllis, Douglas, Jerry and Charles Hudson, Jack and Gene Basterbrook and Leonard and David Eldridge.

Birthday cake and ice cream were served following an afternoon of games and fun.

Receives Fancy Rabbit
John DeHaven, who raises rabbits as a side line at his farm just east of Kendrick (and has been pretty successful with it) received a blooded New Zealand White doe from a rabbitry at Troutdale, Oregon, Tuesday. The New Zealand, which is considered one of the best for eating, commands a higher price when "wrapped" in white fur — so John is going after the better price.

No Trace Of Pickup
No trace has yet been found of the Chevrolet pick-up stolen from Dan Whybark at Juliaetta almost two weeks ago.

Mr. Whybark carried theft insurance on the vehicle, but states that it was a good one, and he really hates to lose it.

Trade at home. But it in Kendrick.

Improvements About Town

A considerable quantity of "Clean up, paint up," work is now going on about town. For example:

The Ed. Brown and Lester Crocker home are receiving new composition roofs, in green.

The Roy Ramey, Walter Brocke and Don Miller homes are receiving coats of white paint.

The Ben Cook warehouse has received a new metal roof, and other improvements are being made in the interior.

E. M. Millsap has erected a new storage building on the lot at the rear of the Kendrick Club. It is of frame construction with siding of brick finish. Mr. Millsap is also erecting a new cottage on the schoolhouse hill on the lot across from his home.

AREA LIVING WAR MEMORIAL SWIM POOL NOW OPEN

The Area Living War Memorial Swimming Pool at Kendrick opened its gates to the general public Tuesday afternoon of this week at 2:00 o'clock, and despite lack of publicity and a rather cool breeze, a fair number were on hand to enjoy a dip — most of these being kids.

Life guards are Mr. and Mrs. Sally of Moscow, both accredited by the American Red Cross.

Work on the cleaning and painting of the pool was completed last week by "Chop" Lind, and the gleaming white finish and green trim presents a very clean and desirable look to those who enjoy a swim.

At a committee meeting held on Monday evening the following ticket costs were set:

Adults (14 years and over) Season Ticket\$5.00
Junior Season Ticket (Under 14 years)\$3.00

Individual Adult Swim Tickets40c
Kids Individual Swim Ticket25c

It will be noted that these charges represent a slight increase over last season — but if the three-week longer swimming season is taken into consideration there has been no advance in the charges.

Hours, at least for the time being, during which the pool will be open are:

2:00 p. m. to 8:00 p. m., and from 7:00 p. m. to 9:00 p. m. As in the past, the pool will be closed on Mondays.

Roy Ramey stated that Red Cross Swim Pool class details had not yet been worked out, but should be completed within the next week to permit announcement in the paper.

As was probably noted in last week's issue, wherein appeared a financial statement of receipts and disbursements of the pool for last season — it was not a money-making venture, in fact, did not anywhere near meet expenses, so it was felt necessary to raise the swim fees a small amount. However, as previously stated, if the longer season is taken into consideration, there has actually been no advance in prices.

Storm Wrecks Damage

Friday, about 11:00 a. m. one of the most severe rainstorms of the year struck Kendrick — the rain literally falling in sheets. So much water fell in such a brief space of time, that storm sewers could not care for the deluge, and gutters ran almost level-full with the sidewalks.

On the school house hill the water got under the cracked and pot-holed oil mat and literally tore great chunks of it out, washing deep holes and depositing the gravel on Main Street, not only at the foot of the hill, but carrying it as far as the Frank Crocker residence to the east and the L. J. Herres residence on the west. The alley between the Everett Fraser and W. L. McCreary homes, which drains a large area of the hillside, spouted water that the drainage ditches could not carry and it spewed water and gravel from a block down the sidewalk in front of the Fraser home. The road below the schoolhouse has deep ditches washed in it, and gravel edging the oil mat is completely missing.

Gardens, flowers and shrubs also took a beating from the downpour, but this was but minor compared with fields on the Potlatch ridge farms of Otto Rauschke, Otto Silfow, Henry Wendt and the Lohman Brothers, which took a real beating. Beans were literally washed out of the ground and carried away, and deep gullies cut in the fields — the downpour evidently switching course after leaving Juliaetta and Kendrick, and striking that area.

On Fix, American, Big and Little Bear and Texas ridge, a good rain fell, but not the minor cloudburst that struck the sections first mentioned.

Rain Hinders Farm Work

Although the official weather bureau reports for this area show that to date less moisture has fallen in June of this year than June of 1947 — enough moisture keeps descending to prevent farmers from efficiently doing field work, as the soil is soggy with moisture.

As Oscar Slind, who farms on Big Bear ridge puts it: "I'm getting awfully tired playing with mud balls," seems to cover the situation very nicely.

Walter May, who owns and flies his own plane from American ridge states that fields in this area present a weird appearance, farmers having plowed around wet gullies and avoided north slopes.

But for all that steady progress has been and is being made on getting in a crop. Most of the spring grain being put in is Idaho wheat and oats, and there will probably be more barley than is usually produced locally.

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Mr. and Mrs. Clarence Johnston had as guests from Thursday until Saturday their daughter-in-law, Mrs. Jim Johnston and son Donald from Troy, and a friend of Donald's, Donald and his chum stayed for a longer visit.

Mrs. W. B. Deobald enrolled in the U. of I. summer school last week.

Tom Brown left last Thursday for Portland, Oregon, where he has been employed as a public accountant in a law firm.

Agnes Baker left Monday for Deary where she is conducting Bible school.

Mr. and Mrs. Roy Ramey have received word from the O. E. MacPherson family saying they had moved from Salmon to Ashton, Idaho, where Mr. MacPherson is selling insurance. He has given up the printing trade, due to ill health, and plans on making Ashton their home.

Mr. and Mrs. Bob Cain and daughter Rita, accompanied Mr. and Mrs. Clarence Dougherty to Lewiston Friday for a day of business and shopping.

Mrs. Ed. Ohman of Seattle arrived here Wednesday of last week to visit with her mother, Mrs. Liddie Ameling, and sister, Mrs. L. D. Crocker and family.

Mr. and Mrs. E. V. Weeks and grandson, Gary, of Seattle, visited friends and looked after business interests here last week-end, leaving for Seattle on Monday.

Charles Ameling of Tucson, Ariz., arrived here Sunday, where he will spend the summer with his grandmother, Mrs. Liddie Ameling, and aunt, Mrs. L. D. Crocker.

Mrs. Edgar Long is spending a couple of weeks in Spokane with her son, Mr. and Mrs. Roy Long and family.

Emmett Lien, who has been a patient at the Veterans' hospital in Boise for the past three months, returned home Wednesday of last week. He is improving steadily.

Mr. and Mrs. Chas. Andres left Sunday for their new home at Coeur d'Alene. They have purchased a restaurant in that city and take charge of the 17th. Mr. and Mrs. Bob Magnuson and family are moving into the house vacated by the Andres.

Mr. and Mrs. Floyd Millard visited in Kootenai Sunday — and report the flood damage in that town all beyond comprehension.

Mr. and Mrs. Tom Keene and daughter Claudia, accompanied by Mrs. Wade T. Keene, took the train for Spokane Monday, where they will spend several days on business.

Mr. and Mrs. Everett Neumann and son of Pullman were Saturday evening callers in the Lloyd Ware home.

Mrs. R. H. Ramey, Mrs. Estella Leith and Mrs. Bruce Ebert were Lewiston shoppers on Friday.

Bob Lind was a Moscow business visitor Tuesday.

Mrs. Margaret Hull and son Dennis Lee of Spokane arrived here on Tuesday to visit in the Bruce Ebert home. Mrs. Hull and Mrs. Ebert are sisters.

A family get-together was enjoyed Sunday at the Ben Cook home. Those present were Mrs. Jonas Parshall and children of Bonners Ferry; Mr. and Mrs. John Hoduffer and daughter of Genesee; Mr. and Mrs. Ralph White and children of Lewiston; Mr. and Mrs. R. L. Blewett and son and Mr. and Mrs. Ben Cook and family. Mrs. Cook and Mrs. Blewett were the hostesses.

Mrs. Jack Johnston and son of Spokane, accompanied by her nieces, Mrs. Harry South of Coeur d'Alene and Billie Mae Herres of Colville, Wn., visited here Friday and Saturday in the home of her parents, Mr. and Mrs. L. J. Herres.

Mr. and Mrs. R. L. Blewett were here over the week-end, returning to the ranch Monday. They took his sister, Mrs. Jonas Parshall and sons of Bonners Ferry, home with them.

Dr. and Mrs. J. H. Coulter returned on Tuesday from Tacoma, where they attended the meeting of the Pacific Northwest Annual Conference of the Methodist church. Dr. Coulter was re-appointed to Kendrick, Leland and Arrow. The Juliaetta church was left open to be supplied later.

Mr. and Mrs. Geo. Brocke, Sr., were in Spokane Tuesday and Wednesday on business.

Patty McCreary and June Brown were over-night guests in the home of Leola Sumner in Troy, Tuesday.

Idaho Grand Chapter O. E. S.

Idaho Grand Chapter O. E. S. convened in Moscow on June 7, 8, 9 and 10 at the Elks' Temple, with Canyon Chapter officers and members present. On Tuesday morning the local officers, dressed in white, took part in the opening ceremonies.

In the evening a banquet was served to Past Matrons and Past Patrons at the Grange Hall, with Mrs. Martha Long, Past Worthy Matron, presiding.

Wednesday morning Mrs. Crystal Gruell, Grand Representative to Nebraska, was introduced. Thursday morning, Anne Deobald, Canyon Chapter secretary, was introduced with other secretaries.

Mrs. Elsie Redfield, Idaho Falls, was installed as Worthy Matron, and Fred Easton as Worthy Grand Patron for the coming year.

Mrs. Alice Tarry, Worthy Matron, will give her report on June 22nd.

New Arrival

Mr. and Mrs. Wm. Cuddy of Cedar ridge are the proud parents of a 10½-pound baby boy, born to them Tuesday at the Davidson Nursing home in Kendrick.

All concerned are doing nicely.

CLOUDBURST WRECKS TERRIBLE DAMAGE TUES. NIGHT

A cloudburst, which began with a terrific lightning display and gentle rain about 8:30 Tuesday evening did damage which cannot begin to be appraised as we go to press Wednesday at noon. As the lightning and thunder increased in volume the rainfall matched it in intensity, and about 9:30 the cloudburst was on in full swing — and we give you the damage done as accurately as we have been able to learn to date.

The full force of the storm apparently hit American Ridge, and then followed the canyon eastward. On the ridge the water rushing down Brady Gulch undermined and washed away the Clarence Johnston barn, carrying with it a calf. It undercut the approaches to the bridge to his farm and carried away the bridge. It also washed out the big culverts across the top of the little creek giving access to the Werner Brammer, Norie Callison and Harry Langdon farms, depositing them on the baseball diamond at Kendrick.

With the rushing water came tons of top-soil, boulders, lumber from the Johnston barn and from the old Harry Langdon place which is in the process of being wrecked by Walter Sparger, its present owner. The latter house, however, withstood the flood, a portion of one side and some loose lumber in the interior being carried away.

So fast did the water come down the gulch that the big drain ditch cut across the ball diamond was unable to carry the excess, and it backed up until the home of Mrs. A. Onstott was flooded to a depth of about two feet, ruining carpets, furniture, etc. Mr. and Mrs. Wm. Johnson, her neighbors, attempted to warn her, but were not quite fast enough, and one of the big E. M. Millsap logging trucks braved the water and took her from her home. During the trip, logs and debris floating about tore off much of the trucks electrical wiring, and put out the lights, so flashlights were used.

The Wm. Johnson family home adjoining was not flooded, water just edging the lawn. The same situation existed at the Walter Jones home and at the E. E. McDowell home.

The Ersel Hudson home, however, was flooded, and all interior furnishings damaged. Damage was also suffered at the L. A. Wallace home, although water did not flood the interior.

The foot of the gulch, of course, is again deep in rock and debris, with all traffic shut off — and the ball-diamond is littered with every conceivable type of rubbish from culverts to aluminum roofing — plus, tons upon tons of fine top soil and boulders.

As the storm swept on up the canyon it washed out the Big Bear Ridge grade road in two places — at the watering trough and at the site of the rock crusher above.

Swinging to the south and east the storm struck in full fury in the Wauncher gulch area. About 9:45 Mr. and Mrs. Gordon Peters were ascending the grade. As they rounded the curve just above the rock crusher pit, they were faced with a road full of rushing water, carrying with it rocks, mud and debris. Throwing the car into reverse, Mr. Peters, steering with the light from the car's tail-lights and the aid of word from his wife and eldest daughter, successfully backed the car to a spot where he could turn around, despite water to a depth of about a foot, and rolling rocks carried by the torrent. Once turned, he out-ran the water, and stopped two other cars at the foot of the grade. All were safe — but "jittery."

Not so lucky was Henry Jones, deputy state fire warden, who resides on the family farm, which is probably better known as the Amos Specker place. Mr. Jones said he "felt in his bones" it was going to rain hard, so he parked the pickup belonging to the state, which is his official transportation, on the highway, where he felt it would be safe, and drove his own on to the ranch house. This morning the road where he parked the pickup is gone completely — and with it the pickup.

He said he found pieces of the vehicle strung from where the bridge to his ranch used to be — to the bottom of the gulch at the Pemberton home. His own pickup, sitting in the doorway, is safe, but two bridges must be built before it can be gotten out. The big bridge across the creek had just been rebuilt by himself and family from the flood of three weeks ago. During the storm Mr. and Mrs. Jones feared their home would be washed away, and sat for an hour and a half on the hillside above the house in the pouring rain — getting occasional glimpses of the devastation being wrought as lightning flashed.

Mr. Jones said that he did not go to the top of the Gulch Wednesday morning, but that about 200 yards above where his bridge used to sit the Wauncher Gulch road is completely wiped out for a considerable stretch and to a depth of about 20 feet.

He said he just hadn't any idea how much damage was done to the family farm — but a lot of it — not counting the bridges.

Water, carrying with it mud, rock, fence posts, trees and what-not also poured down the gulch back of the old Lewiston Grain Growers warehouse, and at one time dammed up Potlatch creek. Water from the creek above, however, soon cut through this dam and no damage was done on this score.

We realize that these damage accounts are far from complete — but it is the best we can do to date.

(Continued On Page 2)

Word From Carrollton, Mo.

In renewing her subscription to the Gazette Mrs. James Emmett, who now resides at Carrollton, Mo., adds a little note:

"With all the high waters and floods your paper came through about on time. I usually get it on Monday, but on Memorial Day it arrived on Tuesday.

The papers were full of news about the high waters and floods and the destruction they caused. It was certainly terrible. We had floods and high water here last year that did much damage, but were personally happy to be on high ground. So far, with the exception of a week or more, we have had good rains, but we are needing more now, although we are having garden vegetables from our own garden. Had our first peas last week. If it rains soon, we can enjoy ripe tomatoes."

COMMERCIAL CLUB MEETING HELD ON WEDNESDAY EVE

The regular monthly meeting of the Kendrick Commercial Club was held last Wednesday evening with 14 present for the 6:30 dinner, to be joined by two others at the business session in the city hall, the dinner being served at the Kendrick Cafe.

A. O. Kanikkeberg, reporting for the Highway committee reported that a joint meeting of the Village trustees and commissioners of the Kendrick Highway district had been held at the last regular meeting of the village trustees — but no definite plan of action had yet been worked out on road work, as the state had not yet called for any right-of-way deeds, and no action could be taken until such deeds were called for.

After a round-table discussion of the road problem between Kendrick and Juliaetta — a route which will be traveled by several school buses this fall, it was deemed best to try to obtain federal government emergency flood money, and the club secretary was instructed to immediately write Congressman Abe Goff, Senator Henry Dworshack and Gov. C. A. Robins in an effort to obtain this badly needed piece of road.

Ross Armitage and A. O. Kanikkeberg, reporting for the special ball ground committee, reported they had investigated the proposed new grounds on the school house hill and that it would afford plenty of room for a ball diamond and play ground. After a discussion the matter was left entirely in the hands of the school trustees, with the club pledging every possible aid when a course of action might be decided upon. It was felt that this was the only logical location close to the school grounds that would afford plenty of room and at the same time be flood-proof.

A. O. Kanikkeberg read the financial report of the club for the year — a report which showed a goodly amount of activity, and that the club was "still in the black."

Next came a discussion of the city park and particularly of tables and benches for picnic parties — these items having been broken up and now missing. A committee consisting of Ross Armitage, Dick Cuddy and L. S. Thuber was appointed to contact a builder immediately and have benches and tables built, painted and put in the park as soon as possible — a project that is now under way by John W. Davis.

This meeting being the final one of the year, an election of directors for the coming season was held, with the following being chosen: Judson I. Lee, G. F. Brocke, A. O. Kanikkeberg, E. A. Deobald and Dick Cuddy. These directors will meet and choose officers, announcing them at the next club meeting.

A brief discussion of the Area Living War Memorial Pool, as it fitted into the school Physical Education plan was held, and Ross Armitage asked to make a more thorough investigation of possibilities for this sport.

A brief discussion of the Fourth of July celebration, as once considered, but later abandoned, was held, and it was the consensus of opinion of the club that the committee had done right in deciding against such activity this year, as the legal day for the celebration falls on the Fifth (Monday), and too many area residents would be at work in the fields or taking advantage of the three-day holiday thus afforded.

Make Big Tax Payment

Latah county tax collector Edna M. Theriault, received a check on Tuesday, June 15, for \$14,027.14, representing the second half payment of the Washington Water Power Company's 1947 property taxes. Full payment to the county for the year amounted to \$28,280.53, an 11.7 percent increase over last year.

Total tax payment by the W. W. P. Co. in nine Idaho counties for this period amounted to \$170,437.83 according to J. H. Lucas, district manager for the electric company who presented Edna M. Theriault with Latah county's payment.

"The company's total property tax in Idaho for 1947 was \$343,522.99, a 16.8 percent increase over last year," Mr. Lucas said.

"The increase is due to new property construction by the W. W. P. which was added to the tax rolls this year, and heavier expenses of the various taxing units," the power company manager stated. Additional taxes brought the total W. W. P. Co. bill in Idaho to approximately \$469,808 for 1947.

Your home town — Kendrick — is what you help to make. A boost, instead of knock means improvement

WHEAT MARKETS LOWER WITH INCREASED OFFERINGS

Wheat markets weakened further during the week ending June 10, largely reflecting increased receipts from the new winter wheat crop and the generally favorable crop conditions in the main spring wheat belt, according to reports to the Federal-State Market News Service. Despite additional purchases of wheat and flour by governmental agencies the prices at the principal southwestern terminal markets declined around 5c to 8c per bushel, with the greatest losses in the better milling grades. Spring wheat markets also dropped several cents per bushel, although marketings were very light and were confined to old crop grain. Pacific Northwestern wheat markets declined also, but to a far lesser degree, but California markets dropped sharply in adjustment toward a new crop basis.

The condition of the U. S. winter wheat crop and spring wheat prospects at the first of June indicated a wheat production this season of 1,192,425,000 bushels. This, as realized, would be the second largest crop on record and 25 percent larger than the 10-year average. The winter wheat crop is forecast at 877,230,000 bushels compared with 1,067,970,000 bushels in 1947 and 688,606,000 bushels for the 10-year average. Spring wheat production is estimated as 315,195,000 bushels against 296,949,000 last year, and 254,017,000 bushels for the 10-year average. Of the spring wheat this year, it is estimated 46,332,000 bushels will be durum. Planting weather was generally favorable in the major spring wheat states and present indications are that the intended acreage was planted. Rains during May varied from moderate showers to good soakers and were of substantial benefit to winter wheat. Harvesting, which began around the middle of May in Oklahoma and Texas, will be general in Oklahoma by the second week in June and on the high plains of Texas by June 25th.

Generally favorable weather during the week favored harvesting of small grains in the South Atlantic and gulf states and southern great plains. Winter wheat is advancing rapidly toward maturity with heading extended into the later districts and harvesting beginning in southwestern Missouri. Additional moisture is needed in most middle sections of the country between the Rockies and the Appalachians, although part of the Ohio valley received substantial rains at the end of the period. In the Ohio and upper Mississippi valley and lake regions winter wheat made mostly fair to good progress and is in good condition. The spring wheat advanced favorably in the northern Great Plains where general rains fell and improvement is also reported from the Pacific Northwest, where soil has been too wet for proper development.

Pacific Northwestern wheat markets were featured by light trading and movement as flood conditions restricted shipping from producing areas and limited milling operations at a number of points. Prices, however, dropped slightly, reflecting the weakness in markets to the eastward. Dealers at Portland reduced bids 2c per bushel and at the close of the period were offering \$2.31 for No. 1 soft white, No. 1 white club, No. 1 western red and No. 1 hard red winter wheat in bulk, delivered coast market.

Intermountain wheat markets held independently firm with light local offerings. Prices at Ogden were unchanged from a week ago, with most grades bringing \$2.23 per bushel, bulk basis, f. o. b. Ogden.

The Commodity Credit Corporation of the U. S. Department of Agriculture purchased 6,888,511 bushels of wheat and 215,000 bushels of oats during the week ending June 4. Flour purchases totaled 41,900,000 pounds, equivalent to about 946,638 bushels of wheat. The wheat purchased consisted of 5,789,579 bushels through the Kansas City office; 69,932 through Chicago; 700,000 through Minneapolis and 320,000 through Portland. These purchases brought the total taking of wheat for export since July 1, 1947, up to 284,569,350 bushels; flour 3,333,245,600 pounds (equivalent to 74,265,659 bushels of wheat); barley 7,214,786 bushels; oats 7,162,533 bushels; grain sorghums, 7,712,661 bushels; rye 912,460 bushels and corn 2,000 bushels.

Gerber-Babeock Nuptials

Fern Gerber, Viola, Idaho, and Cecil W. Babeock, Kendrick, were united in marriage, Sunday, at Pullman, Wash., by the Rev. Monbeck of the Pullman Baptist church.

Mr. and Mrs. H. W. Comstock, former residents of Big Bear ridge, but now of Moscow, were the attendants.

Mr. Babeock operates the Kendrick Shoe Shop here, and they will make their home in Kendrick.

United In Marriage

Word was received here this week that Carol Mattoon, daughter of Mr. and Mrs. Perry Mattoon, and Earl Harris, son of Mr. and Mrs. C. E. Harris, were united in marriage at Superior Montana early this spring, and have kept it a secret until this week.

First Idaho Printing Press
Lapwai — The spot where the first press in Idaho was operated may be marked by the newspaper publishers of Idaho, according to information received here. The notable press was used at the Lapwai mission over 100 years ago to print hymns and a translation of the Bible into Indian tongues.

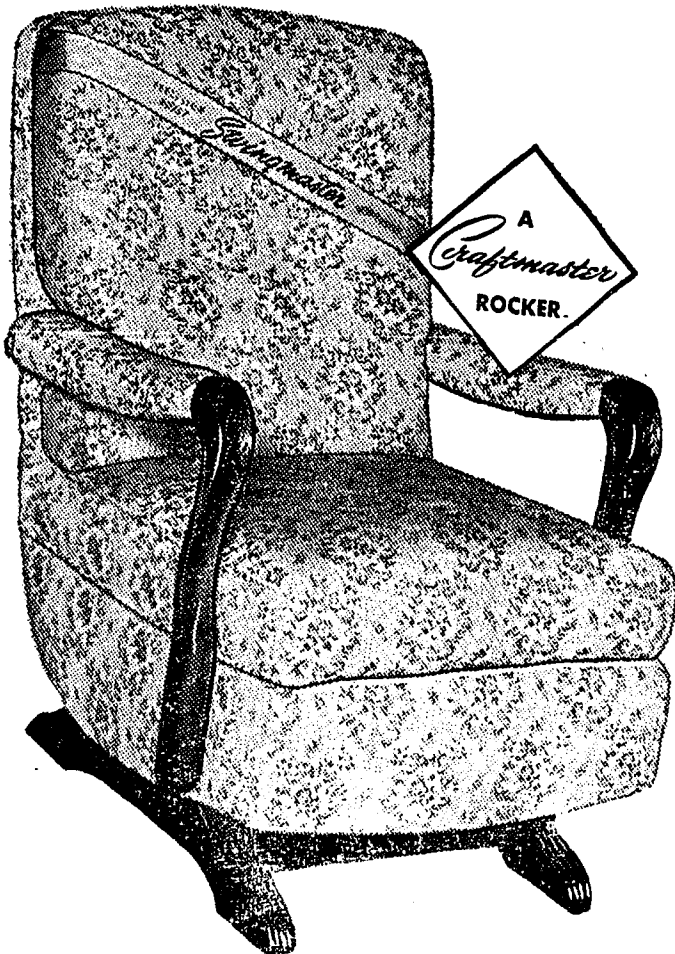

The press was sent to the Lapwai mission in 1839 from the Hawaiian islands by the American board of missions. After use at the mission, the press was acquired in 1848 for publishing the Oregon American and

Evangelical Unionist, issued from the home of the Rev. John S. Griffin, its editor, on Tualatin Plains near Hillsboro, and is now in the rooms of the Oregon Historical Society.

The suggestion has been made to the Idaho State Editorial Association that there be an appropriate marker set up here commemorating the first printing press in Idaho.

Choice fresh or cured meats are always available at Blewett's Grocery-Market. And remember, too, that the place to get those Bird's Eye Frozen vegetables, 1-adv.

PERSONALS AND NEWS ON AMERICAN RIDGE

Mr. and Mrs. Clarence Dougharty took Mrs. Mary Deobald and Mrs. Tina Bigham to Moscow Sunday, where they attended church and then went on to the Pioneer picnic and Elks' Lodge Flag Service. C. J. Brosnon talked of the building of the American Constitution and described different characters of that great historical gathering. Dean E. J. Iddings gave the address of the day. Dean Iddings taught the first agricultural course given at the U. of I. about 1911. Lester Roberts and Clarence Dougharty attended the short course offered that year. Both talks were instructive and interesting. The scrap books, wherein are found local folks pictures and items of interest were enjoyed, as well as the rest of the program. From Moscow the group drove to Little Bear ridge to visit Mrs. Wm. Kelly and Mrs. Mary Cain, then to the Bigham home for ice cream and cake. All agreed it was a most enjoyable day. They report Mrs. Cain as having been ill, but now improving.

Clarence Dougharty saw two deer cross the three-cornered field on the C. W. Jessup farm Thursday evening about 6:30. A tractor on the main road frightened them, and they ran up the hill toward the Walter Bigham home — one kicking up its heels playfully as they ran.

Ray Benscoter of Lewiston is spending his vacation with his parents, Mr. and Mrs. Frankie Benscoter.

Don Benscoter left for Peck Saturday to join his wife for a visit with relatives there.

Mr. and Mrs. Frankie Benscoter were in Lewiston Saturday.

Mrs. Bud Fey and son Bill spent Monday with his parents, Mr. and Mrs. Perry Mattoon.

Mr. and Mrs. Wayne Davis were in Pullman Tuesday visiting his parents, Mr. and Mrs. Burt Davis.

Bill Lebars of Winona, Wn., spent a few days visiting his niece, Mrs. Wayne Davis and family. He leaves soon for the east to make his home.

Mr. and Mrs. Ray Knutson and daughters and Mr. and Mrs. M. F. Hayes spent Friday evening with Mr. and Mrs. Perry Mattoon.

Mr. and Mrs. J. K. Bruce and Mr. and Mrs. H. K. Bruce of Lewiston spent Sunday with Mr. and Mrs. Walter May and family.

Mr. and Mrs. Wade Keene and Mr. and Mrs. Tom Keene and family called Sunday of last week at the home of Mrs. Mary Deobald.

Mr. and Mrs. E. A. Deobald and Mr. and Mrs. Otto Schupfer spent Thursday of last week with Mrs. Mary Deobald.

Mr. and Mrs. Warney May and son Warney were in Lewiston Saturday.

Mr. and Mrs. Norla Callison, Mr. and Mrs. Ernest Roberts and Mr. and Mrs. Lyons and son, the latter of Deary, were over-night guests at the Perry Mattoon home Tuesday night. They were stranded by the cloudburst which struck this ridge.

Mr. and Mrs. Bill Fry and Mrs. Kirk Wilson and daughter were over-night guests in the Henry Brammer home Tuesday night. They, too, were stranded by high water.

Mr. and Mrs. Frankie Benscoter were Sunday dinner guests of Mr. and Mrs. Walter Benscoter.

Mr. and Mrs. C. Dougharty called Sunday of last week on Mrs. Mary Deobald.

The cloudburst of Tuesday evening hit the upper end of this ridge, but the lower end — the Cox, Kent, Davis, Frankie Benscoter, Dougharty and Roberts ranches were not hit very hard — but from the Harry Benscoter farm on toward Troy the downpour was terrible.

Mr. and Mrs. Warney May and son were Sunday visitors of Mr. and Mrs. Dave Peterson, at Deary.

Werner Brammer assisted George Havens several days last week with field work. Mrs. Werner Brammer also spent several days at the Havens home.

Ira Havens of Moscow was a Thursday visitor at the Geo. Havens home.

Mr. and Mrs. Guy Kitch and daughter of Troy were Sunday dinner guests of Mr. and Mrs. Bruce Glenn.

Mrs. Bruce Glenn was in Moscow Tuesday. Joan spent that day and the night at the Geo. Swanson home in Troy.

Johnnie Perry of Moscow is visiting this week with the Harold Roberts children.

Larry and Buddy Langdon were Sunday dinner guests of their parents, Mr. and Mrs. Harry Langdon.

Erma Langdon of Lewiston spent Saturday with her parents, Mr. and Mrs. Harry Langdon.

Mrs. Harry Benscoter and son Dick moved Bob Benscoter's household goods from Lewiston to Sandpoint Sunday, returning here Tuesday night.

MORE ABOUT CLOUDBURST

To attempt to assess the loss in terms of topsoil, crops washed out and fences carried away is impossible. We'll attempt to give a further account of the storms path in next week's issue.

However, as we go to press the Brady gulch road, permitting access to Troy and Moscow, and across the point of American ridge to Lewiston is open and described as in "fair" shape.

Word has just been received that the Big Bear ridge grade is now open to one-way traffic, but is dangerous.

Wauncher gulch, of course, is closed.

The Sperry grade is open and in fair shape. The Texas ridge and Cedar ridge grades are also open, the storm evidently edging this area.

The big E. M. Millsap dozer is patiently "dozing" its way across the foot of Brady Gulch in an attempt to open the "road" between Kendrick and Juliaetta, and drain away the "swamp" at the ball diamond. One of his big logging trucks went out to the Three Bear area to get this equipment — it being the nearest available.

Healing Process Slow
Mrs. Oscar Slind, who burned her right foot very severely with hot grease about three weeks ago, is slowly improving, but still unable to walk.

NEWS ITEMS ABOUT LELAND RESIDENTS AND FRIENDS

Mr. and Mrs. Earl Hoffman and son Tony spent several days with Mr. and Mrs. Chas. Hoffman.

Mr. and Mrs. Willis Thornton and son Douglas were week-end guests of Mrs. Thornton's parents, Mr. and Mrs. Ben Johann of Moscow.

Mr. and Mrs. Willard Reed and son Timothy, Mr. and Mrs. Oney Walker and son Neal, Waldo Smith and son Russell and Mrs. Bessie Kimes and children were Sunday dinner guests of Mrs. Harry Smith. Mrs. Jesse Thornton, Dorothy Thornton and Glynnes Thornton were afternoon callers in the Smith home.

Mr. and Mrs. Ervin Draper drove to Anatone Sunday to spend a couple of days visiting with Mr. and Mrs. Burton Tarbutt.

Harry Smith left Thursday for Headquarters where he will do some carpenter work for the C. C. C.

Mr. and Mrs. Weyne Weyen were Sunday evening callers in the Roy Craig and Robert Draper homes.

Mrs. Harry Smith spent Friday with Mr. and Mrs. J. M. Woodward.

Mr. and Mrs. Chas. Hoffman, and Mr. and Mrs. Earl Hoffman and son Tony were supper guests of Mr. and Mrs. Donald Morgan at Lenore.

Mr. and Mrs. Robert Draper were Sunday afternoon visitors in the home of Mr. and Mrs. Joe Piper at Agatha.

Elaine Hefel spent several days last week visiting with Paige Craig. Mr. and Mrs. Mevin Flesman and Arlene were Sunday afternoon callers in the home of Mr. and Mrs. Lloyd Craig. Mrs. Craig and daughters Marcella and Jeanne returned home with them to Clarkston that evening.

Most everyone here has been "glued" to a tractor seat for the past several days — and news is mighty scarce.

Officers Given Course

U. of I. Moscow — A "post-graduate" course in the finer points of the law was given state police officials at the F. B. I.'s second annual Law Enforcement Institute, held at the University of Idaho on June 15th and 16th. About 50 Idaho law enforcement officers attended the institute.

The F. B. I. has long found that a thorough knowledge of legal technicalities is highly valuable in dealing with persons to try to "bend" the law without breaking it. In fact, most G-men hold law degrees. Discussion of ways to plug loopholes was included in the conference.

Several attorneys from this area delivered talks on various legal points. They included James Wayne, Coeur d'Alene prosecuting attorney, who discussed "Laws of Arrest, Searches and Seizures;" J. Morey O'Donnell, Moscow, "Criminal Law" and Robert T. Drake, law professor at the University of Idaho, "Principles of Evidence."

F. B. I. agents who spoke were W. C. Banister and Paul J. Shine of Butte, Mont. Other talks were made by J. Harry Lucas, manager of the W. W. P. Co. office at Moscow, and Dr. William H. Boyer, head of the psychology department at the U. of I.

Watch For "Signs of Life"

The "Signs of Life" are the traffic signs, signals and pavement markings installed on our streets and highways to guide you safely and quickly on your way. During the month of June, the Idaho State Safety Director's office is cooperating with the National Safety Council, and other state and local safety organizations in emphasizing the importance of these traffic control devices to your safety as a motorist or pedestrian.

It is pretty hard to pick out the statistics which will indicate the exact part that disregarding signs and signals played in the 32,000 motor vehicle traffic deaths that took place in our country in 1947. Anyone who drives knows that the signs and other devices cover just about any situation the driver will meet. That means that failure to pay attention to "The Signs of Life" must have played a part in most traffic accidents. In the early days drivers were pleading for adequate signs on our roads. They have them now. Yet accidents continue. For the sake of others, if you care nothing for yourself or vehicle, head "The Signs of Life."

Receive "Superior" Rating

U. of I. Moscow — A rating of "superior" has been given the U. of I. R. O. T. C. unit for the past year. Gen. Mark Clark, commanding general of the Sixth Army, advised Col. B. H. Hensley, professor of military science and tactics in a letter received last week. The rating is the highest award available to an R. O. T. C. unit.

Col. Hensley, who has directed the R. O. T. C. program at the university for the last four years, will not be on duty when next year's cadet corps begins training. He will terminate a career of 43 years' service in August. Also leaving is Major F. V. Smith, who has been on duty for two years as assistant professor of military science and tactics. He has received orders for duty in the Philippine Islands.

Replacements for Col. Hensley and Major Smith have not yet been announced.

Another Fruit Pest Appears

If you have raspberries be on the lookout for the fruitworm. This pest does most of its damage west of the Cascades, but you may find him on this side, too, says the U. S. D. A.

It's a small brownish beetle about 1/8th of an inch long that overwinters in the soil. About blossoming time the beetle starts feeding on the leaves and blossoms. Eggs are fastened to flower buds and stems. The yellow-colored worms hatching from these eggs feed inside the developing fruits.

Where the beetles appear before blossoming time lead arsenate spray will control them. If they don't appear until blossoming time, use a rotenone spray about seven days after the first blossoms appear, then make two more applications at 10-day intervals.

80 INLAND EMPIRE COMMUNITIES PREFER WWP ELECTRIC SERVICE

This is definite proof of the confidence of the people in Washington Water Power's ability to serve them well, in the future as it has in the past, the American free enterprise way! This preference for Water Power service is not hearsay or guesswork—it is proved by franchises for electric service.

Such confidence must be earned. It cannot result from glowing promises or political oratory—it must be based on services rendered. The people's confidence in the Washington Water Power comes from experience—50 years of the best in electric service at low rates, plus a sincere interest in community building and civic cooperation.

Can Get Security Payments
More than 200 Idaho veterans of World War II have died since their discharge, according to S. E. Vance, state adjutant for the American Legion.

Families of many of these men will receive survivors payments under the Social Security Act. In 1946 congress amended the law to provide social security survivors payments to the families of those veterans who died within three years after discharge. To qualify for the payment the veteran must have had at least 90 days of service in World War II, and a discharge "other than dishonorable."

These social security payments are made whether the veteran had a

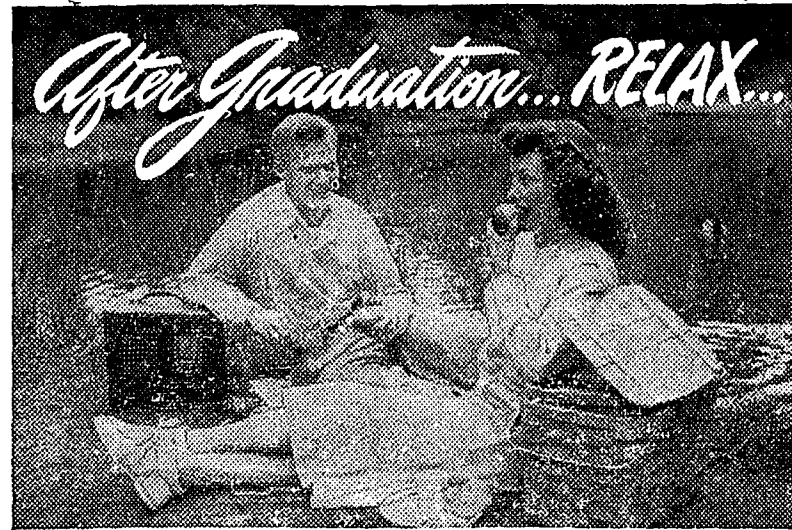

social security card or not. However, if the veteran's family qualifies for a veterans' administration pension, this special social security payment will not be made.

Some member of the veteran's family should contact the social security administration following the death of a World War II veteran, to insure receipt of any payments due the family.

Kendrick is your town and mine. Let's work and boost together to make it a better one.

108 East Third Street Moscow, Idaho

Spring has been most tempting through many a western high school window... and now that the "Big Day" is close at hand, thousands of young men are murmuring, "Me for the outdoors. After graduation, I'm going to relax... for a little while"...

Not a bad idea, young man!

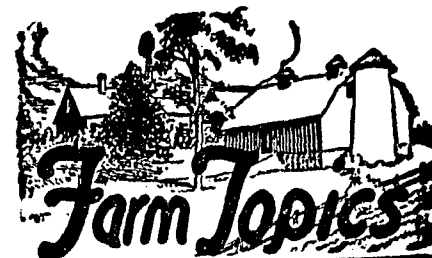

And, if you haven't yet decided where you are going from here... think about it while you're relaxing.

If it's a job you want... a real career that'll offer you security, travel, regular advancement, top pay and opportunities for training in dozens of fields... consider a "job" with your Army or Air Force.

Talk it over with the fellows at your neighborhood recruiting office... probably you know them. They'll give you all the details of careers with a future for you.

WELCH BUILDING 610 MAIN STREET SPOKANE, WASHINGTON

U.S. Army and U.S. Air Force RECRUITING SERVICE

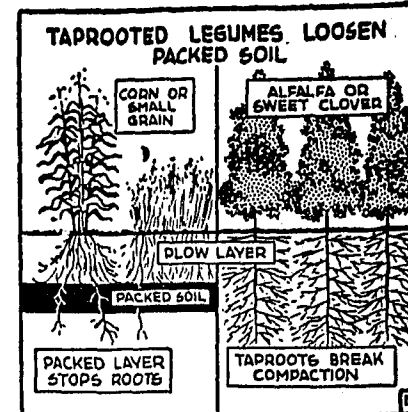

Legumes Open Soil To Air and Water

System of Rotation Prevents Compaction

Tight "stuffy" soils are robbing many farmers of high bushel-per-acre yields of corn and small grains each year. Loams, silt loams and clay loams need large amounts of organic matter in the plow layer and deeper to keep them open and loose for high crop production.

Heavy soils that are low in organic matter and worked with heavy tractors and machinery become

Tap roots of alfalfa and sweet clover, as shown in sketch, break through packed soil to assure water and plant food for growing crops.

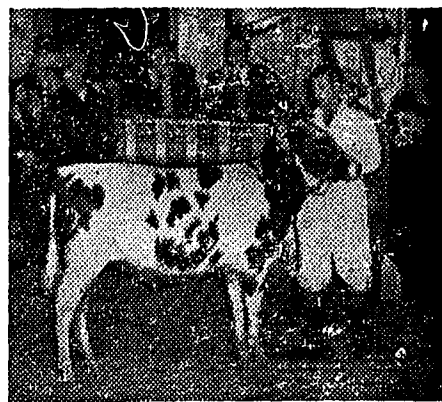

packed, especially just below the plow sole. These compactions slow down the intake of water. They cut down the amount of water and air the soil will hold for crop use. They keep the fibrous roots of corn and small grain "upstairs" away from water and plant food held deeper in the soil.

Temporary relief can be had by using machines that reach below the ordinary plow layer and break up the plow sole compactions. Real relief, however, comes only through regular use of deep-rooted legumes in the rotation.

The driving tap roots of sweet clover and alfalfa force their way through the compactions and reach deep into the soil, thus opening it to air and water. The mineralized organic matter they leave there improves soil tilth and furnishes plant food for other crops.

Channels of the tap roots are routes for water and air and fibrous roots to follow deep into the soil. Compaction-busting alfalfa and sweet clover need phosphate and potash if they are to do a good job.

Smash Sale Records

All records for Ayrshire auction sales in the U. S. were broken when an average of \$2,267.39 was paid for 23 Scottish bred Ayrshires imported and sold by Frank V. Lile of Bellefontaine, Ohio. The sale grossed \$52,150.

A new record price for Ayrshire bull calves was set at \$4,600 by Howard Baum and Sons of Paint Valley farm, Bainbridge, Ohio, in the purchase of eight-months-old Killoch Gay Spark (above).

Increased Yields Noted With Use of Fertilizer

Wheat yields can be stepped up 7 to 14 bushels per acre and the hay crop can be increased through use of more fertilizer in hay and pasture crops seeded in small grains, declares Dr. D. R. Dodd of the Ohio experiment station.

This practice is particularly profitable on land already highly productive, Dodd points out. As an example, he cites tests made by research men on plots at the Ohio station. The land's producing capacity already had been built up by good soil management so that it was producing an average of 85 bushels of corn, 23 bushels of wheat and 3 tons of hay per acre.

In the tests, a 2-12-6 fertilizer was applied at increasing rates to wheat.

Minnesota Starts Big Tree Planting Project

As the first step in a far-reaching tree planting program authorized by the state legislature last year, Minnesota is planting about two million trees this year.

A million deciduous and coniferous trees are being sold at cost plus handling expense for planting on private lands. Another million coniferous trees are available for free distribution for planting on public lands.

Simple Dehydrator Saves Garden Crops
Homemade Apparatus Serves Many Purposes

A homemade dehydrator heating unit, which also may be used as a room heater in the home or brooder house, is an economical device and a labor-saver on the farm.

Successful drying depends upon removal of enough moisture from the fruit or vegetables to prevent spoilage. This must be done at a temperature that does not seriously affect the texture, color and flavor of the vegetable or fruit.

Best results are obtained when fruits and vegetables are dried in a dehydrator, like one shown, rather than in the sun. In hot, dry localities, however, sun-dried fruits have excellent color, flavor and good nutritive value. Sun-dried vegetables usually are noticeably inferior to

Good type of homemade dehydrator heating unit, which also may be used as a room heater.

dehydrated vegetables in most respects, but when properly dried they are fairly satisfactory.

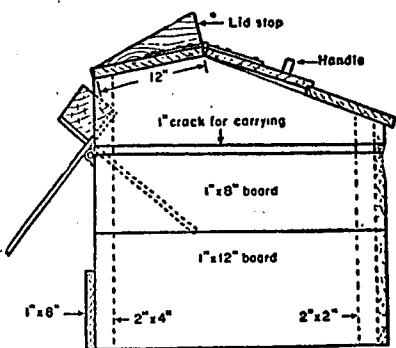

If gas-filled tungsten-filament lamps are used, care should be taken to prevent liquids dripping onto the bulbs, as that is likely to crack them. If carbon-filament lamps are used, as shown in the picture, water dripping on them will not crack the bulbs.

Minerals Will Improve Quality of Egg Shells

Improvement in shell texture of eggs can be made in many cases by providing the foods that supply the mineral properties contained in the shell itself. The shell of the egg contains about 90 per cent calcium carbonate and foodstuff containing the minerals and vitamins necessary for shell production should help to increase the supply and bring about some improvement in shell quality.

Shell-grit or oyster shell-grit provides calcium carbonate, but without vitamin D the hen may not be able to convert sufficient quantities to meet the demands for bone and egg-shell formation.

Nests For Turkeys

Crowding of turkeys in nests will be largely eliminated if enough space and enough nests are provided. Accepted size of an individual turkey nest is 18 inches wide by 24 inches high by 28 inches deep. Quite often eggs are broken and these broken eggs soil others. It is wise to have turkey nests both inside the breeder house and out-of-doors during periods of rapidly changing weather conditions. Photo shows Utah type of turkey nest.

Swine Diarrhea Curbed With Proper Nutrition

Proper nutrition plays an important role in control of swine diarrhea and scours, a source of considerable loss to most pork producers, according to Wise Burroughs of the Ohio station. Nursing pigs are susceptible to the disease, feeder pigs get enteritis and even older animals sometimes scour.

Deficiencies in any one of five different B-vitamins may cause diarrhea, Burroughs warns.

Sallflower Crop Thrives Without Heavy Rainfall

Sallflower poses no serious question of competition with flax in humid areas where flax prospers. It seems to thrive in areas of less rainfall, where normal precipitation is only 12 to 15 inches annually and where flax generally does not yield so well. Normally, too, under "dry-land" conditions, sallflower does as well as wheat or better. It is resistant to most diseases and insects.

SEE EVERY PART OF THE SURFACE FOR Fast, Easy Cleaning

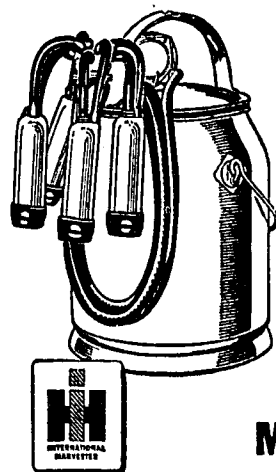

You can't help but keep a McCormick-Deering Milker pail spotlessly clean. Every part of the surface that milk touches is readily seen for quick cleaning.

Besides, the completely stainless steel construction makes rusting impossible. Just take a look at this modern machine and you'll agree that the easy-to-clean McCormick-Deering helps produce more profitable milk.

And the 9-inch pail opening... how can that mean better milk for you? Because it simplifies your cleaning job, thus keeping bacteria at a minimum, and speeds up drying.

There's a good way to prove these facts. Stop in and look over this great milker or, better yet, arrange for a demonstration. Find out for yourself just how the McCormick-Deering Milker turns out cleaner, healthier milk.

PROGRAM TO CONSOLIDATE DISTRICTS BEING STUDIED

The program to amalgamate highway districts, now being carried on in Latah county, is described in an article in the current "Tax Bulletin" issued by the Associated Taxpayers of Idaho. The article was written by Robert Summerville, secretary-manager of the Moscow Chamber of Commerce.

"The advantages of county-wide co-operation, so that we may get the most for our tax money, are clearly evident in the program to amalgamate highway districts now going forward in Latah county," Summerville said. "By pooling resources on a county-wide basis there would be sufficient funds to buy and operate heavy equipment, create stock piles, hire an engineer, and operate a year-round program that would systematically, and with economy, cover the entire county," he added.

Summerville described meetings of the 48 commissioners of the 12 highway districts for secondary roads in the county. "Each district supplied data which was compiled and distributed to all and studied at meetings," he reported. "The plan under consideration observes that each consolidation of school districts represents a logical road pattern to a central point, with common concerns. Five such consolidations have been achieved in Latah county. Why not, therefore, pool road money on a county-wide basis, but governed by five road commissioners, each responsible to one of these school areas?" Summerville said.

He explained that present highway districts would maintain their legal entities only until each paid up its bonded indebtedness, and would then be dissolved. Under the proposed plan, the five commissioners meanwhile would pursue the county-wide plan, empowered to hire an engineer, and acquire bigger equipment permitting greater efficiency, economy and increased road construction. The plan calls for commissioners to be paid and be required by law to spend a proper amount of time in their areas, to hear all complaints and travel all the roads. There would be a single county-wide levy. And the program, established on sound engineering planning, would permit the commissioners to take full advantage of state and federal aid," Summerville said.

Our Note: We have not had an opportunity to discuss this matter with our local highway commissioners, so have no opportunity to find out how it would affect roads in this area, as we are in a "Joint (three county) school district." We therefore present it without comment.

Lots Of Snow Moisture
Kellogg — Snow depth on Look-out summit on May 1, was nearly double the average for the past 11 years, when such records were first kept. The snow depth measured 80 inches, as compared to 59.3 inches this time last year, and 71.2 inches in 1946, the previous record.

Worn and Torn Linoleum Can Be Patched at Home

If the linoleum in front of sink, stove or door is worn through or torn it can be patched easily by following these directions given by Miss Madonna Fitzgerald, Missouri university home economist.

Before starting work gather up these supplies: scrap of linoleum; razor blade or sharp knife; patch of heavy cloth as ticking, canvas or denim; household cement or linoleum cement.

Carefully cut out worn parts of the linoleum with a razor or sharp knife to make a smooth opening. Follow the design of the linoleum or cut the hole with straight sides; then the new patch will fit easily into the space. Cut a linoleum patch which fits the hole, being careful to match designs.

Now cut a piece of firm cloth about three inches larger than the prepared hole. Spread glue or cement on the back of the linoleum around the hole; also, on the linoleum and cloth patches. Let stand a few minutes. Apply a second coat of glue or cement to both cloth and linoleum. Press linoleum on cloth patch and fit linoleum patch into place. Apply weights and let stand till dry.

If linoleum is torn, it can be repaired by glueing a heavy cloth patch (ticking, denim, sack) to the back. Apply full weight until dry.

Linoleum which is cemented to the floor can be patched in much the same way, except for this difference. The cloth patch may be omitted and the linoleum patch glued directly to the floor.

Annual Blue Geese Flight Offers Splendid Spectacle

One of the most spectacular concentrations of birds in the entire United States is the annual flight of blue and snow geese north through the Missouri river bottoms.

Each year the first flocks of these magnificent waterfowl reach Iowa about March 1st, stopping, first in the bottoms near Hamburg, then gradually moving northward, augmented by additional flocks from the south. The peak of the flight is reached about March 15, at which time the birds number some 500,000 in an area of a few miles. In the heaviest concentrations, single flocks often total more than 100,000 noisy individuals.

The birds spend from two to four weeks in the broad, flat fields of the Missouri river bottoms and grow fat on waste corn before moving on through Canada to their nesting grounds immediately below the Arctic circle.

The last few years the blue goose has become more important as a game bird in the fall. Where formerly the great flocks flew non-stop from their nesting grounds to the Louisiana and coastal marshes of Texas, the fall flight now disperses and stops to feed on waste corn over wide areas in the north-central part of the United States.

Carbon-Monoxide Poisoning

The active constituent of gas which causes death when breathed is carbon monoxide. This gas is so active a poison that as little as one or two parts in 1,000 parts of the air, if breathed continuously for several hours may cause death. Stoves and furnaces of all kinds are possible sources of carbon monoxide. An automobile is a well recognized source of carbon-monoxide poisoning, and it is never safe to run an automobile engine in a small, closed garage. Symptoms of rapid carbon-monoxide poisoning are lassitude and weakness followed by dizziness, and perhaps nausea and headache.

Facts About Black Bass

The black bass, which is actually a member of the sunfish family, has more than 40 nicknames throughout the world. Among these are green trout, chub, bronzebacker, green bass, linesides and mossback. Color of the largemouth will vary in different waters. Those taken in clear, sand or gravel-bottomed waters have green sides and are white on the belly. Those from mud or moss-bottomed waters will be almost black on the back and from gray to yellowish white below. Due to extensive transplanting the large mouth is now found in nearly every state in the Union, Canada and Mexico. It is a fish of lakes and ponds, rather than of swift streams, where the small mouth bass is more at home.

Cause of Tides

Attraction of the moon causes one tide, rotation of the earth causes the other. Ocean water rises in a bulge which follows the moon around the earth from east to west, and, since it takes the moon 24 hours and 50 minutes to go around the earth at the equator each day, the timing of the moon tide is the same. The earth rotates once every 24 hours, therefore the moon tide rises 50 minutes later each day. On the opposite side of the earth, 12 hours away, there is another water bulge. This is forced up by the speed of rotation. The sun, too, has an influence on tides, especially when the moon is opposite or in direct line with it. If there were oceans, seas or lakes on the moon, tides caused by the earth would be high enough to engulf the moon's mountains.

Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HELLO, FOLKS —

Are You Tired?

Do you often get weary from trying to think of what to serve your family for lunch or for dinner?

Keep in mind Potlatch Chief Dairy Products and your worries will be over. Cottage cheese is an excellent dish to complete any meal. Served plain or with fruit, it's really delicious. No meal is a meal without golden, delicious, rich butter for buns, bread or biscuits, waffles or whatever you may be serving.

And, Too:

You should always keep plenty of good, fresh pasteurized milk on your table to insure good health for your family.

And:

For dessert what could be simpler to serve than ice cream? It's a favorite with everyone,

and with Potlatch Chief's large variety of flavors you can serve it often — with complete satisfaction for the entire family.

A Reminder:

You are asked to keep in mind that the Creamery's Annual Stockholders Meeting will be held on Saturday, June 26th — and plan now to attend this meeting.

A farmer who had spent his life in the country retired and moved to the city. On the first morning in their new home his wife said: "Well, Pa, it's about time you started the fire."
"Not me!" he replied, nestling down deeper in bed. "We might as well start right now getting used to all the city conveniences. Call the fire department!"

Mistress: "Were you entertaining a man in the kitchen last night?"
Maid: "Well, that's for him to say. I was doing the best I could."

WHAT CAMERON FOLKS ARE DOING THESE DAYS

Mrs. Fred Schoeffler visited with her husband, a patient in the St. Joseph's hospital in Lewiston, a few days of last week.

Dorothy Meyer, student at the Pacific Lutheran College at Parkland, Wash., arrived home Saturday to spend the summer vacation.

Mr. and Mrs. John Blankenship and Mr. and Mrs. Raymond Blankenship were fishing at Johnson's creek, Monday. We didn't learn their luck.

Marlene Siflow of Leland spent several days of last week here with her grandmother, Mrs. Ida Siflow.

Mrs. Clay Albright of Lewiston visited with her mother, Mrs. A. H. Blum, and sisters, Mrs. Wilbert Brunstiek and Mrs. Albert Glenn, on Monday.

Mr. and Mrs. Burton Davis were week-end guests of Mr. and Mrs. Elmer Lohman.

Mrs. C. H. Fry of Kendrick spent Sunday in the home of Mr. and Mrs. Glen Wagner.

Mr. and Mrs. Otto Siflow, Mr. and Mrs. Herman Siflow and Mrs. Walter Siflow and son Norman were fishing at Johnson creek last Tuesday. They reported good luck.

Mr. and Mrs. Fred Newman spent Sunday in the home of their son, Mr. and Mrs. Glen Newman, at Lenore.

Mr. and Mrs. Ed Mielke and daughters and Elsie and Dorothy Kruger were Sunday evening visitors in the home of Mr. and Mrs. George Wilken and family.

Kenneth Wilken and Roy Siflow were fishing at Elk River, Saturday.

Mr. and Mrs. Ray Whiting and sons of Lewiston Orchards spent Sunday with his parents, Mr. and Mrs. Earl Whiting.

SOUTHWICK NEWS

Mr. and Mrs. Frank Cantril and daughters; Mr. and Mrs. Don Cantril and Sandra; Mrs. Annie Longteig and son John, and John and Thor Meland were Sunday guests of Mr. and Mrs. Harvey Bales at Grangeville.

Mrs. Lizzie Lawrence spent Sunday visiting with Mr. and Mrs. Wm. Kauder and Mr. and Mrs. Gordon Harris.

Dick Watson spent the week-end in the Wilmer Hanks home.

Miss Carol Torgerson spent the past week in the Virgil Harris home. She is a sister of Mrs. Harris.

Mr. and Mrs. Tom Armitage visited with Mr. and Mrs. Gordon Harris Sunday afternoon.

Mr. and Mrs. Everett Neumann and son Larry of Pullman were Sunday visitors in the Carl Finke and Jake Neumann homes.

Mr. and Mrs. Commy Perry and family were visitors in the Glen Betts home Sunday evening.

Mr. and Mrs. Virgil Harris and sons and Carol Torgerson were Sunday visitors in the home of Mr. and Mrs. Geo. Brocke, Jr., in Kendrick.

Mr. and Mrs. Tom Armitage and Mr. and Mrs. Wm. Winters and son David were dinner guests of Mr. and Mrs. L. J. Southwick, Sunday.
Mr. and Mrs. Ray Cuddy, John Cuddy and children, and Elmer and Wilma Cuddy were Sunday guests of Mr. and Mrs. Rollin Armitage.

LINDEN ITEMS

Mr. and Mrs. Bob Burns and daughter of Orofino visited in the Arley Allen home Sunday. Mrs. Burns is a niece of Mrs. Allen's.
Miss Eva Smith and brother George of Lewiston were visiting with old friends on the ridge, Sunday.

Mr. and Mrs. Ben Smith and family came over from Park Sunday to spend the day in the Addison Alexander home.

Miss Aletha Israel, Don and Clem, Jr., visited with their mother Sunday in Lewiston, where she is under a doctor's care.

Today (Tuesday) is a beautiful day. Let's hope we have more of them — huh?

Local residents are just too dog-gone busy to go any place or make any news.

Highway Study Plans Rushed

Boise — Details of the plan and scope of the statewide highway study under way by the State Chamber of Commerce will be rushed to completion by members of the executive committee assigned this phase of the work, according to Farrell L. Hansen, Idaho Falls, chairman.

In addition to Hansen, other members of the executive committee named at the organization meeting in Boise last week are George Harsley, Boise, master of the Idaho State Grange, vice chairman; Earl W. Murphy, secretary of the State Chamber of Commerce, secretary; S. E. Brady, Pocatello; Perle H. Dye, Grangeville; Ted Kerley, Challis; J. R. McFarland, Sandpoint; W. R. Showalter, Nampa; Roscoe Williams, Moscow.

In conformity with the statement of policy adopted by the full committee, the program will include a "study and analysis of the legislative, administrative and fiscal changes necessary to give Idaho a better system of highways, roads and streets," Hansen said.

"The study will also include the administrative agencies" the policy statement continues, "having authority over all these different types of roads, the hope being that through the coordination of these agencies the highest possible level of efficiency will be attained, thus assuring a prudent spending of funds allocated to the highway program."

Joe D. Wood, former state highway director and for the past several years a member of the State Chamber of Commerce staff, will work with the committee and advisory council.

Idaho Industrial Importance Up

The growing industrial importance of Idaho is reflected in a recent signed article on the State of Idaho, prepared for the 1948 edition of the Encyclopedia Americana by Dr. C. J. Brosnan, professor of American history at the University of Idaho.

Dr. Brosnan, who has followed the state's development for many years, points out the significance of the large and expanding phosphate plant at Pocatello to manufacture products from Idaho's unpredictably rich phosphate fields. Until recently, much of Idaho's phosphate went to out-of-state plants for conversion into fertilizers.

Rapidly rising in economic importance are dairy products. The state annually derives a large income from the more than 16,000,000 pounds of butter and the 23,000,000 pounds of cheese produced. There are now 29 cheese factories in Idaho. One of these, a re-processing plant near Pocatello, has a world market. Dairy cows total 235,000.

beet sugar factories. Total value of the annual income to Idaho farmers from their sugar-beet crops, according to the latest federal report, reached the unprecedented total of more than \$14,000,000.
The annual value of Idaho's mineral products now stands at \$40,000,000. Idaho's "big three metals" are lead, zinc and silver. Leading the field in the non-metallic minerals is phosphate rock.
Third in value in prefabricated goods are wood products. There are now 374 sawmills in the state. The Potlatch Forests, Inc., plant at Lewiston is the world's largest electrically operated white pine mill. The top income wood products are white pine and ponderosa pine lumber, round timbers and presto-logs.
