Wheat Is Given
Seattle (Special) — The initial goodwill shipment of wheat for the Washington and Northern Idaho Food train arrived in Seattle on Oct. 19, via truck, as a gift from Davenport wheat growers to the CROP program for needy overseas, administered in this region by the United Overseas Relief of the Council of Churches, according to Chester S. Ramsey, director.
The truckload of gift wheat was given free transportation to Seattle through the courtesy of the Spokane Pacific Line.
"This first wheat shipment from the growers in this territory to the Food Train project, is indicative of the desire of farmers in the Northwest to help provide the food so badly needed in war-torn countries in addition to what rations they are receiving under the E. R. P. program," Mr. Ramsey said.
He emphasized that all donations to the CROP Food Train will be distributed abroad, free of charge, through church agencies strictly on the basis of need. The distributing agencies are providing food and clothing for the people in 43 countries under the CROP plan.

TEAKEAN GOSSIP (Delayed)

Frank Carey, Jr., had the misfortune, Saturday night, of having his home destroyed by fire. The cause of the blaze is unknown. The whole family was at home — no one was injured, but the blaze was so fierce the all furnishings were a total loss.

J. A. Harless of Waverly, Wash., is visiting his daughter, Mrs. Ethel Groseclose. Mrs. R. E. Brock met him at the Kendrick depot Sunday and brought him to Teakean.

A group of farmers who are interested in improvement of the Freeman creek road met with the county commissioners Monday of last week and asked for some culverts and gravel for the first two and a half miles of road. Ten culverts were delivered on Tuesday, Oct. 12, and were put in place that same day by Grover and Carroll Groseclose and Glen Montez. Mr. Montez used his TD-14 dozer in speeding the job and doing other necessary road work.

The Evergreen Grange is having their "Booster Night" on October 23rd. Invitations have been sent to non-members.

The Preussler family were Lewiston visitors Saturday of last week.

Mrs. M. Blackburn, who is confined to a Lewiston hospital, where she underwent eye surgery, is expected home in a few days.

U. of I. Enrollment Way Up

Moscow Skeptics, who commented in 1889, when the University of Idaho was founded, that an "8 by 10 room" would take care of all

the Idahoans who wanted to go to college, would raise eyebrows at the figures released this week by D. D. DuSault, registrar.

Following a policy of serving state students first, the university denied admittance to hundreds of out-of-state students due to lack of housing facilities. An all-time high enrollment of 3,667, however, was attained for the fall semester.

Idaho students make up 82.4 percent of the enrollment; out-of-state students 17 percent and foreign students 6 percent. All Idaho counties have students at the university.

Despite the limited number of out-of-state students permitted to register, 43 of the 48 states are represented, plus four territories and 10 foreign countries. In the out-of-state group, Washington has the largest representation with 208 students, followed by California with 78 and Illinois with 32.

\$250 Prize To Be Offered

Winner of a conservation poster contest conducted by the National Wildlife Federation this year will receive \$250. Theo. H. Wegener, Boise, president of the Idaho Wildlife Federation, announced this week.

A series of other prizes ranging from \$100 to \$10 will also be awarded. The posters will call attention to the need for conservation and restoration of organic natural resources.

Any student from the seventh grade through the last year in high school may enter the contest. Poster designs may be submitted in oil, watercolor, pastel, tempore charcoal or scratchboard.

Subject of the posters will be "Soil and Water, and Their Uses." A conservation slogan should accompany the art work, which may be on any one of several phases of soil conservation and use, forestry, wildflowers, plantlife, upland or aquatic animals, birds, fish, water resources, pollution, or flood control. Posters must be submitted to the National Wildlife Federation, Washington 10, D. C., not later than January 15, 1949.

Chink Season Opens Nov. 7
Scattergunners in Idaho will begin pheasant hunting in most sections of the state at noon, November 7. However, a jump date season has been set for Latan, Nez Perce, Lewis, Clearwater and Idaho counties, with the season opening at noon on November 7, and with ad-

ditional hunting dates on November 10, 11, 14 and 17, with a bag and possession limit of two cocks.

After the opening day, shooting hours open one-half hour before sunrise, and close at sunset. Game birds cannot be hunted with a rifle, pistol or air rifle. Hunters are reminded it is unlawful to hunt from an automobile or power boat, to shoot from or across a public highway, or to hunt with artificial light. Removal of feathers is unlawful in the field or in transit to the place of storage or consumption, if evidence of the sex of the bird is destroyed.

Choice fresh or cured meats are always available at Blewett's Grocery-Market. And remember, too, that the place to get those Bird's Eye Frozen vegetables, 1-adv.

1 1/2 Billion Dollar Road Block!

RAILROADS MUST OPERATE around the clock every day and night of the year.

Although they know this, leaders of 16 railroad unions are demanding a five-day, Monday through Friday, week for one million railroad employees.

They want 48 hours pay for 40 hours work — in itself a 20% wage increase.

They also demand a minimum of 12 hours pay for any work performed on Saturdays, and 16 hours pay for any work performed on Sundays and holidays.

On top of all this they want an additional increase of 25¢ an hour for every employee!

You'd Pay the Bill!

Summing up these demands, they mean that these union leaders seek to force the railroads to give one million employes an annual raise which would average \$1500 per employe!

The total cost of this would be no less than 1 1/2 billion dollars per year, which is more than twice the expected net income of the railroads this year.

You'd pay the bill, because if these increased costs are forced on the railroads, they must have still further rate and fare increases.

Demands Unreasonable

These employes have had substantial raises during and since the war. Their average weekly earnings are higher than the average weekly earnings of workers in manufacturing industries. They have more job security than the average worker in American industry. They also enjoy paid vacations, a retirement system and other advantages more generous than the average worker receives.

In contrast with the demands of these 16 unions, which add up to the equivalent of 48¢ an hour, the Conductors and Trainmen recently settled their wage request for an increase of 10¢ an hour.

Railroads Run for Everybody— Not Employes Alone

The railroad industry must serve not one but many groups—producers, businessmen, shippers, passengers and the general public—night and day, every day of the year. These unions are proceeding in utter disregard of this important difference between railroads and other industries. Industrial plants can be shut down over weekends and holidays, but freight, mail, express and passengers must continue to move. *Everybody who enters railroad employment knows this.*

Strike Threat

On September 18, 1948, the leaders of these 16 unions began taking a strike vote. *But the threat of a strike will not alter the opposition of the railroads to such unreasonable demands!*

Demand Drivers' Examination

Boise — Idahoans next year may not be able to plunk down a dollar and obtain a driver's license good for two full years. Such a simple method may give way to examinations and tests to determine how expert and capable the applicant may be as an automobile driver. Such, at least, is the observation of safety groups, automobile associations, newspaper editors, and others surveyed last week, the Idaho State Chamber of Commerce reveals.

The office of the state safety director, under the commissioner of law enforcement, reports that letters, editorials and other requests continue to pour in, demanding more rigid licensing of drivers. Following double holidays and other occasions when traffic accidents are exceptionally high, there is a considerable increase in these requests.

Editorial comment in newspapers throughout Idaho also indicates a rising interest in stricter licensing of automobile drivers. Many editors have pointed out that anyone who can pay 50 cents a year for a license is "qualified" to drive a car on the highways of Idaho today. These editorials are accepted as reflecting public sentiment in the communities where the newspaper is published.

As January, 1949, draws near, there is increasing evidence that the legislature, which will convene at that time, will be called upon to write a new auto drivers' license law. Resolutions passed by both farm and city groups call for physical examinations, eye and color tests, and actual road tests before a driver's license is granted.

Recently a group of optometrists pointed out that color-blindness was one of the contributing causes to hunting and road accidents and urged color tests before either type license was issued. In Texas 10,613 out of 250,000 applicants were denied driver's licenses because of inefficient vision.

Southwick

October 12 the children had a bingo party in honor of Columbus Day. Those winning prizes were Margie Kazda, who received a bag of marshmallows and Johnny Davis, who received a model airplane.

There will be no school for the children on Thursday and Friday, Oct. 20 and 21, as the teachers will attend Teachers' Institute.

The Public Health nurse was up Monday, Oct. 18, to give typhoid shots to the children in the school. Those taking them were Charles Cuddy, Beverly Miller and Lee Swanson, all from the upper room.
