JOINT P.-T. A. STUNT NITE PROVES FUN FOR EVERYONE

Due to the large number of participants and the originality shown, members of the P.-T. A. felt the Fun Fest or "Stunt Night" very worth while. We hope to omit no one who participated by such may the activities and how they were ball to reach the Potlatch river carried out:

The women's division chose the will determine the "Derby Time." "Mother Goose" theme with Mrs. The big ball may be seen at Burt's Confectionery. For "ringside" Bob Magnuson as Mother Goose, the narrator. Of course many of the seats or other details, contact any of the local Volunteer Firemen. tales were "twisted and improvised to fit the modern setting and the townspeople.

"Rubba Dub Dub was done by Mrs. Wm. Johnson, Mrs. Elmo Eldridge and Ruth Hoffman, although some difficulty was experienced with tubs and dollies. Little Tommy Tucker yodeled for his supper — with Mrs. Floyd Millard doing the vodel-

Two very comely beggars were Ione Ambrose and Dorothy Swears, while Inez Armitage introduced the serious sport by taking us "Out to the Ball Game." Engineer for the whole program and for these numbers was Mrs. Bill White, who portrayed "Casey Jones."

Midst a flurry of costume changes Arydthe Lindor portrayed "Simple Simeon" very well.

Guess who were Jack Spratt and his wife? — Mrs. Henry Jones and Mrs. Harry Benscoter! — And we can't imagine why Ester Young was promoting the Raby Hotel unless it was to play the part of "Peter Peter," and "Curley Locks" was just the part for Carol Peters. "Hippity Hop to the Barber Shop" was Dixie Browning — to buy herself a lollypop, and how "Yankee Doodle" ever got to be a doctor is a new one, but we had no doubt about it when Allie Jones appeared on stage and Dorothy Swears isn't like the typical story plumber — forgetting her equipment

The baby-kissing, hand-shaking politician was represented by Ruth

No doubt the most inspiring costume was "Humpty Dumpty," played by the local heavyweight, Nellie Fry. Mrs. White and Irene Millard must have practiced lapping milk for days to learn to meow so well - and their "Kitty" song went over with

Those back-stage stood ready to extinguish any possible blaaze from

appearance and Esther Young did Wee Willie Winkle."

Yes, that was real water dripping off that cat, so mistreated by A1leen Johnson and Marjorie Eldridge - played, of course, by Tom Keene and Lyle Trout.

Other live props included a dog carried by Miriam Cook as "Old Mother Hubbard." (He looked as if the cupboard was full yesterday).

Finally "Little Boy Blue" appears — wonder where that "baah" came from — one of the sheep? And we wonder if Little Boy Blue and Little Red Riding Hood knew each other? Maybe not, since "Grandma" was there. The latter two were done by Mrs. Walter May and Mrs. Andy Cox — and last, and longest to be remembered, the "Old Woman Who Lived In a Shoe."

Master of ceremonies for the men was Ben Cook. He introduced that noted entertainer, Eugene Taylor, who portrayed the most unusual of scientists of "Centralized Thought."

For instance the guinie pigs, Ross Armitage, Jasper Nutting, Lewis Lindquist and Asa Calvert were unable to control the extent of their handshaking, couldn't keep warm nor cold, as Mr. Taylor suggested temperature changes - also they found it impossible to step over a certain twig - no doubt helped by the demonstrator. His method seemed worthwhile in at least one aspect, that is, discovering unknown talent — such music you never

heard! Asa Calvert switched from the inaudible piano he was playing into his own concert on the cello - (a remarkable what can be done with Steigers, Cheerylane; one son, Robpiece of craftsmanship in itself)

McCarthy) Taylor did a ventro-Stevens, San Raphel, Calif. quilist act (but we could see their lips move). There was a little moral to their performance: "Although you may hold all the strings, you want for the loss of a good neighbor and to be sure you know which ones you

The last act, and very well done, floral offerings and the large atwas a quiz show, "Truth or Consetendance Monday afternoon at the quences." And, since it was impossible to get the truth "in edgewise" the consequences were most el with the Rev. George F. Calvert interesting — and whoever baked el with the Rev. George F. Calvert those pies for Jim Armitage and Miller was the organist and Lois Charles Westendahl must surely feel flattered by the way they disappeared, for the boys couldn't answer their questions and had to eat their pies with their hands tied behind

We learn something new every day one fact, plumber's wives can drive three nails faster than teachers, at least so it was with Mrs. Lindquist and Miss Welker. Can you tell Ratliff of Seattle, Wash., were among us what a quadrant is, with someone "talking at you hard and fast?" attended the funeral services for And finally Gerald Ingle and Jas- Mrs. Steigers.

per Nutting missed a rather lengthy quotation and had a family man's carried by on the train the above duty to perform - or at least we item failed to reach us until too all thought they were family men late for publication last week. The until we saw them try to put "three envelope showed an "ample time" cornered pants' 'on dolls.

All-in-all, it was an evening of fun

and frolic for all.

Kendrick is your town and mine. Remember: There are no parking Let's work and boost together to meters on Kendrick's streets!

Furacin Is Effective In Coccidiosis Control

New Chemical Proves Valuable to Poultrymen

Animal health, already in debt to human medicine for some effective help, now must acknowledge further aid from the same source. The thing for which acknowledgement is due is a drug called furacin.

Natural source of this drug is oat hulls, corncobs, bran and similar farm wastes. It is one of the furfural series of chemicals, some of which are used in trades and indus-

In the very first trial with cocci-diosis of chickens, furacin demonstrated that it was equal to the well-

known sulfa drugs in stopping losses. Further research proved that the drug is generally less toxic to chickens than the sulfa drugs, and that the growth of treated chickens is not retarded as much as in the case of those which have been treated with sulfa.

This chemical is as yet available only in small quantities, and still is high in price. Even so, the amount required to be effective against coccidiosis is so small that the cost of treatment is less than with the sulfa drugs. Before long, products containing this new chemical will be available to poultry raisers on a less limited scale.

DDT Emulsion Controls Flies in Poultry House

Spraying a 1 per cent DDT emulsion on poultry manure two days before the manure from the dropping boards, which were cleaned once a week, gave 100 per cent fly control at the Hawaii agricultural experiment sta-

The emulsion was applied at the rate of one pint per 30 square feet

The addition of lime twice a week to the manure before use of the DDT treatment reduced odor and moisture and reduced the number of flies, but apparently decreased DDT efficiency, in the opinion of poultry specialists.

All-Time Champion

Above is Bess Skylark Ormsby Dora, 2388170, new all-time champion junior four-year-old Holstein for the United States, being milked three times daily. With her, on the last day of her recordsmashing 365-day period, are left to right, three generations of her owners, G. F. Walters, Waterloo, Iowa; his son, Harold Walters, and his grandson, Robert Walters.

2.4-D Formulas Classed In Three Major Forms

Since 2,4-D itself is insoluble in water, it is made soluble by treating it with other chemicals. This results in the manufacture of many salt sprays.

Ester, amine and sodium salt dusts also are manufactured. The ester and the amine sprays are produced in liquid form, the sodium others as dusts.

The 2,4-D chemical is used extensively as a weed killer.

Zinc Coating Provides Protection From Rust

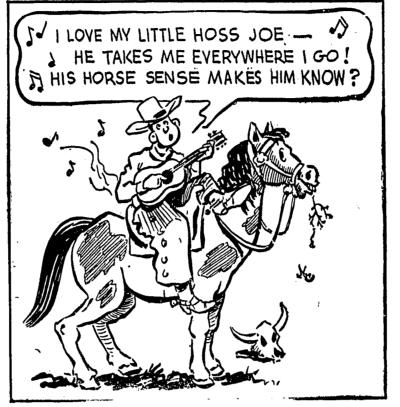

Ten year tests at Indiana indicate that wire having less than a half cent of the surface rusted during the period. Samples having more than one ounce of zinc coating showed no rusting. Stainless steel and copper clad samples showed no rust-Chairman. ing. Lead clad samples showed a third of the area discolored. New Assistant Coach

U. of I., Moscow - William D. (Bill) Godwin, 30, center of the Boston Yanks professional football for the University of Idaho Vandals, President J. E. Buchanan announces, following recommendation line play in both college and pro-fessional ball, was picked by Dixie Training may be resumed Aug. 16.

Average Crop Yield

Better Machinery and Fertilizer Aid Advance

Farms now are growing about a third more crops than in 1920 and getting the job done in about 10: per cent less time, according to U. S. department of agriculture statistics.

Several factors have made this record possible. One has been the research work of plant breeders in developing heavier yielding, hardier varieties of corn, small grains, root

legumes and vegetables. Another is the improvement in machines that helps farmers do more work in a day. A third has been the increasing use of commercial fertilizer and a better knowledge of

how to use it. Even with increasing use of fertilizer, the bigger per acre yields from improved crop varieties are being obtained at the expense of the soil's plant food and organic matter supply, warns Middle West Soil Improvement committee.

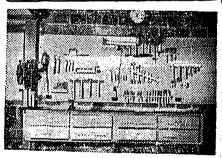

"Unless this drain is offset by fertility building practices that put back needed nutrients and replenish organic matter," the committee says, "worn out soils and lower yields will be the eventual result on millions of farms."

Vitamin D Will Prevent Development of Rickets

Like the old fallacy about locking the stable after the horse is stolen. treating calves for rickets after they have them is not the same as preventing the disease.

A nutritional disease, rickets are caused by a deficiency of vitamin D in the diet. The animal is unable to store sufficient mineral in the bones, which thus become soft. The bones bend under the weight of the animal, causing bowed legs, knock knees, roached back, low loin, dropped tail head and depression behind the withers. Once these deformities occur, they cannot be cor-

Hay Prod Thermometer Permits Constant Check

To reduce danger of a barn fire from spontaneous ignition of hay, Fred Roth, farm safety specialist at Michigan State college, advises construction of a simple hay prod thermometer.

When hay is stored with more than 20 per cent moisture content, danger of heating in the mow is present unless a mow drier is being used. Even small amounts of damp hay, if concentrated in one spot, may cause heating in a limited area.

As heating of the hay can extend over a considerable time, continual checking is advised for two months after hay is put into the mow.

An inexpensive hay prod thermometer consists of 10 feet of one-half inch electrical conduit with an oak or ash point on one end to permit driving into the hay. Six one-quarter inch holes should be punched in the conduit above the point. A dairy thermometer on a string then is put into the conduit. A rubber pad at the bottom of the tube will keep the thermometer from breaking.

Fresh Paint Will Cause Lead Poisoning in Cattle

Painting time on the farm may mean lead poisoning time if cattle get near freshly painted buildings, University of Illinois veterinarians point out. Paint is by far the most common source of lead poisoning in cattle. Cows and calves are fond of licking paint, especially fresh paint from barns, stables, fences or even paint cans and buckets. Old paint cans should be disposed of.

HELLO, THERE FOLKS:

About Baby Chicks:

Folks, this gorgeous spring weather may have given you "spring fever," but you should "spring fever," but you should "snap out of it" long enough to seriously consider those baby chicks, for it takes time for them to grow into big platters of golden-brown, piping hot fried chicken — or into those egg producers, that bring in the "pin money" or even pay the grocery money" or even pay the grocery bill. So think to order your needs from us on your very next trip into town, or phone us.

Remember, we handle Irving's Winlock Hatchery blood-tested chicks, thus assuring you what you want, when you want it.

About Ice Cream:

Warmer days bring thoughts of cooler desserts, or quicker desserts, as you spend more and more of your time out of doors. So don't waste any time worrying about what to serve. Get a quart or two, or a gallon of Potlatch Chief Ice Cream, and please your family as well as your guests. And if you like sundaes, get a few cans of "Little Toppers," which come in most all flavors. Make those sundaes at home.

Drink Milk For Health:

With the coming of warmer weather, don't slack up on drinking milk, for it is high in the food values that we need from day to day. And remember: "Potlatch Chief" brand milk is pas-teurized. We do not sell raw

Essay Contest Announced Mrs. Andrew Cox, Master of the Kendrick Grange, announces a na-tion-wide essay contest on "Conser-vation of Our Soil Resources" will be conducted by the National Grange and American Plant Food Council, ending June 15, with state and national prizes totaling \$15,000 for young men and women through 20 planned in honor of the Poststham young men and women through 20

"The contest is open to any young man or women, regardless of Grange membership, who will not be more than 20 on June 15." Mrs. Cox explained, "but all entries in this area should be sent to the Kendrick Grange at Kendrick for processing by June 15.

Secretary of Agriculture Charles F. Brannan is chairman of the National Board of Judges which includes Dr. Hugh F. Bennett, chief, Soil Conservation Service, USDA; Mrs. Malcolm Byrnes, president, National Home Demonstration Council. Ethel, La.: Dr. W. T. Spanton, chief, Agricultural Education Service, U. S. Office of Education, and Dr. M. L. Wilson, Director of Ex-

tension Work, USDA. The following national and state

prizes are offered: National — First prize, 1949 Buick Super 4-door sedan automobile; second, Chevrolet DeLuxe 4-door sedan; third, \$750, and fourth, \$250.

State — First, \$150; second, \$75
and third, \$50.

Contest judges explained that each

entrant's treatment of conservation principles "may be based on information from textbooks, bulletins, winter." motion pictures, interviews or personal experiences, but practical apin the community, state or nation

in the judging of each paper."

Entries must not exceed 800 wo 55 points for effectiveness, 20 points for originality. 15 for practical application of subject matter and 10 for grammatical correctness.

About Old Days In Kendrick

Dr. E. C. Hall, Laurel, Mont., havanniversary, some three weeks ago, writes as follows:

"I was especially interested in a ing with the history of electric service in Kendrick and Juliaetta.

During the nine years that I lived in Kendrick — 1895 to 1904 — there never was any electric service in the town. There had been an electric few years, and certainly was not operating when we arrived there in the fall of 1895. One reason I know And spring may bring more grief light fixtures that had been torn down and stored away in various places. I remember how disappointed and perplexed we were when not one of the discarded lamps would light up when connected to an old telephone battery. The simplest electrical gadgets were new and strange to HAVE YOU TRIED Shopping at the most everyone in those days.

"I never learned just why the plant was discontinued, but it was un-

doubtedly due to financial reasons. "As I remember it, the engine of the early light plant had quite a history. It was kept in storage in an annex of a grain warehouse until about 1898, when it was purchased by Willis Arnold, who used it to run his sawmill, located by the famous old swimming hole under the cliffs. Then, in the spring of 1900, I believe it was, the Potlatch river went on a rampage and the engine was carried down-stream a few hundred yards. Also that was the time when Kendrick had a very disastrous flood. However, when the high water subsided the engine was brought back up and used to run the mill again. Later it was taken six or seven miles up the Potlatch to run another mill. It may still be in existence for all I know.

"For a small town there were some tragic and exciting times during the few short years that I lived in Kendrick. Why doesn't someone write a few more stories about the

early history of the Potlatch Valley?
— Sincerely, Earl C. Hall, M. D."
Note: The Gazette would welcome more articles of this type from old-timers, anywhere. Dr. Hall's article brings us back again to the question, just when and by whom was the early light plant operated?

Thirty-five At Grange
At Kendrick Grange meeting on Tuesday evening 35 members were present, including all officers. The picture on "Weed Control" was unavoidably delayed until next meeting. A very impressive "Thank You" letter was read from the family in

planned in honor of the Basketball Boys and their coach. They will receive an invitation to attend as guests of the Grange. The attend-

ance program is doing fine. A most interesting program was presented by the Home Economics chairman, Mrs. Melva Woody, the high-light of which was a scavenger hunt. At the close of the meeting delicious refreshments were served in the banquet room.

The Grange will serve refreshments at the auction sale. April 14, 15 and 16 at Travis Furniture Store.

Fishing May Be Poor

Idaho fishermen will probably feel the effects of the severe winter of 1949 in smaller catches taken from mountain streams during the next two seasons, James C. Simpson, fish culturist of the state fish and game department, said this week.

Simpson stated extreme cold and drifting snows combined to create a serious hazard for fish life in mountain streams at higher ele-vations. Many of these streams have frozen nearly solid, he explained. "Fish cannot live in only a tricke of water, which is all some mountain streams were running this

The fish culturist said catches this season will probably not be much plication of the subject to the land reduced by winter destruction of fish. He pointed out that the larger will be given special consideration fish, which will supply the bulk of the judging of each paper." deeper pools, which didn't freeze as done. Next year's fish will be fewer as a result of winter destruction of many fish three inches or larger this year, he predicted. These fish would have grown to legal size for next season, and were living in the higher mountain streams this year.

Game census crews have reported ing read our history of electricity in on returning from the deep snows of this area, as published on occasion the primitive areas in Idaho, that of the W. W. P. Co.'s 60th birthday many of the smaller streams have frozen upward, and in from the sides. Water has thus been diverted out of its natural channels, and in Gazette article of March 10th, deal- some cases, only a thin film is flooding over the solid ice bank in the stream channel.

A few larger holes have been drifted full of snow. Simpson said there is a possibility that some of the larger fish may have been smothlight plant, but it folded up after a ered when slush piled into these

is that we Kendrick kids used to to harried trout. A sudden heavy search along the alleys and dig out thaw could mean floods and mud old lamp globes and other electric which would destroy more fish, and be injurious to the pool structure of the flooded streams. The fish culturist said some suffocation loss in Idaho reservoirs could be expected, as water is extremely low, and ice formation was unusually heavy.
