

**KENDRICK'S NEW FIRE FIGHTING EQUIPMENT**

Pictured above is Kendrick's new fire truck, a modern and efficient piece of equipment — but equipment which everyone hopes will not have to be used — but should it be needed, it is ready to go. This modern pumper, a full description of which appeared in last week's issue, provides fire protection on the schoolhouse hill, as well as in the down-town district, for its powerful pumps can throw a stream of water high into the air, and at full operating pressure two men are hard-put to hold a single nozzle. Practice with the new equipment is being held each week by the Kendrick Volunteer Fireman.

**Free Free Free**  
**Saturday and Sunday Morning Only**  
**OCT. 1 AND 2**

We have a limited supply of 144 HAWAIIAN ORCHIDS which we will give away FREE OF CHARGE, on the above dates, with each purchase of a 95 cent tube or jar of Silque Creme Shampoo. Each orchid is already in a small lapel vase — ready to wear. No limit is placed on the amount you may receive — but HURRY — as our supply is definitely limited.

REMEMBER: An orchid is the choicest of all flowers, and you may have one absolutely FREE OF CHARGE.

This is another of several real "big town" opportunities that your local drug store is bringing right to your community.

Try to be the first one here on Saturday morning, as our "Number One" Customer will get a bonus of two extra Orchids!

**PERSONAL MENTION**

ily are moving to Lewiston this week-end, where they will make their home.

Fred and Otto Sillow and Marvin Long left Tuesday afternoon on a two-day fishing trip.

Eiva Mae Stuart and Rex South of Lewiston were callers in the home of her sister and family, Sunday, Mr. and Mrs. Kenneth Brocke.

Mrs. Hugh McDowell went to Boise last Thursday to get her baby son, Bobby, who has been in the Orthopedic hospital there the past six weeks receiving treatment. They arrived home, Saturday.

Rilla Davidson returned Saturday from Spokane where she had been visiting the past two weeks in the home of Mr. and Mrs. L. J. Herres.

Mr. and Mrs. Howard Rukgaber and little daughter, accompanied by Mrs. E. R. Brown, left for Seattle, Wednesday, where Mrs. Brown will visit and receive medical treatment.

G. V. DePeel, Ritzville, is visiting at the C. G. Arnett home.

Mr. and Mrs. Phillip Daberco and daughter of Juliaetta have moved into the Williamson apartment.

Mr. and Mrs. Earl Eldridge of Dixie, Wn., and Mrs. Julia Davenport of California, visited in the W. W. Eldridge home, Sunday.

Mr. and Mrs. Elmo Eldridge and family visited in the home of her sister, Mr. and Mrs. Fred Zimmerman at Belmont, Wn., Saturday. On Sunday they drove on into Spokane to visit her mother, Mrs. C. E. Chase at the Deaconess hospital, who is recuperating from a major operation.

Mr. and Mrs. Bob DePeel of Lewiston were Sunday guests in the Ralph Reed home.

Ira Foster was a Lewiston visitor on Saturday.

Mrs. W. W. Eldridge was a guest in the Harry Benscoter home Tuesday.

Mr. and Mrs. Edgar Long were guests in the Silvie Cook home in the Lewiston Orchards, Sunday.

Mr. and Mrs. Forrest Wetterow and daughter were Lewiston business visitors, Wednesday.

Mrs. Herman Pabst of Gifford was a Tuesday night guest in the home of her sister, Mrs. Ross Armitage and family.

**Girl Scout News**

Wednesday of last week the Kendrick Girl Scouts met at the home of their leader, Mrs. Howard Hoffman. One new member, Lottie Wilson, joined our group.

For Girl Scout Week, which begins Oct. 31, there will be a committee for displays, one for each day of the week.

On September 29 there will be a Court of Awards, when the Gardeners will receive their badges.

Sales Day, Oct. 8, we plan on operating a chili and hot dog stand.

The Troop Committee for the ensuing year is comprised of Mrs. Nora Callison, Mrs. D. A. Christensen and Mrs. A. O. Kanikkeberg. If anyone has suggestions for the Girl Scouts, contact one of these women.

**Wonderful Fall Weather**

This area has truly been enjoying "Indian Summer," with daytime temperatures, under cloudless skies, hitting up into the high 80s, and at night falling to 40 to 45 degrees.

Farmers, however, are not too happy with the situation, as there is not enough moisture in the surface soil to make plowing easy, and as a result plow shears must be changed and sharpened very frequently.

Bean raisers with late crops, however, are not complaining, as they are thus being enabled to get every sack under roof with conditions ideal.

**Official Word At Last**

After many weeks of waiting, we at last have official word of the local Chinese pheasant and Hungarian partridge season, through the courtesy of Frank Abrams.

The dates, of the "jump" variety, are as follows:  
 October 14 (12 noon), 15, 16, 19, 23, 26, 30 — November 2, 6, 9 and 11.

Bag and possession limits for the Chinese pheasants are: 2 cocks; for the Hungarian partridges, 5 birds of either sex.

**Booster Night**

Kendrick Grange will hold their regular booster night program on Tuesday, Oct. 4, to which the public is cordially invited.

Beginning at 8:00 o'clock there will be a floor drill to seat the officers, then a portion of the regular Grange procedure, followed by a short program. After the meeting, there will be dancing and square dancing. Refreshments will be served at the close of the evening. Everyone is welcome to attend.

**Receives Gold Cup Award**

At the Latah County Fair, which closed last Saturday an Arabian colt, owned jointly by Dr. D. A. Christensen and Carlton Cummings of Moscow was awarded a gold cup as First place stallion colt and Grand Champion.

Dr. Christensen's Montadale sheep received four Firsts, two Seconds, and two Championship ribbons.

**Missionary To Speak Here**

Rev. Lehman of the Gold Coast, West Africa, will speak at a special Missionary Service at the Full Gospel church, Kendrick, Saturday evening at 7:45. Rev. Lehman is superintendent of a Bible school there. All are welcome.

**Asks Attendance**

Mrs. Robert Magnuson, Primary Sunday School superintendent of the Community church, invites parents to share in the Rally Day Service Sunday, which is "Promotion Day" for the children.

**Lewiston To Play Here**

Lewiston's Bengal B squad and the Kendrick Tigers will play Friday, September 30th at 2:00 p. m. on the Lapwai football field, the local field not being in shape at this time to permit a game.

**Parents Of Son**

Mr. and Mrs. Wm. Fry are the proud parents of a baby boy, born by caesarean section in St. Joseph's hospital, Lewiston, Wednesday morning of this week.

### Good Clean Pasture Helps Poultry Men

Home Grown Feeds  
Cut Operating Cost

Good clean pasture and plenty of home grown feeds for your pullet crop pays dividends in more eggs, lower production costs and bigger poultry profits. The use of range shelters, range feeders and barrel waterers makes such a program easily possible.

Missouri university tests show that pullets on well-fertilized alfalfa pasture consumed 17 per cent less feed than birds on bare range. The pasture-fed pullets needed less feed for each pound of gain. Birds on clean pasture were healthier

1935-39	1948
 3-12-12	 3-12-12
170 DOZ BUYS 1 TON	90 DOZ BUYS 1 TON

and more energetic. Mortality rate was lower and there were fewer culls. Out of 100 pullets at four weeks of age, 94 of the alfalfa-ranged birds later went into the laying house, compared to 70 of those raised on bare ground. Purdue university tests showed that ladino clover with corn and small grains provided a complete ration for laying flocks.

Getting good pasture and a cheap and plentiful supply of grain is a matter of putting farm soil in shape to produce bigger yields per acre. For this you need a rotation in which deep-rooted legumes and grasses are keystone. You need to build up the organic matter supply via plowed-under legumes, crop residues and manure. You need to feed the soil a good ration of plant nutrients, so it, in turn, can feed the crops. In such a program, fertilizer is an important member of the soil-building team.

At current prices, eggs will buy nearly twice as much fertilizer as 10 years ago. It takes only 90 dozen eggs to buy a ton of 3-12-12 fertilizer today, whereas it took 170 dozen back in 1939.

### Check Work Stock

Owners of the 55,000 horses and mules on Maryland farms have been urged to "check intake valves, remove carbon from the cylinders, and adjust the carburetor."

Those terms aren't as mixed as one might think. Joseph M. Vial, extension animal husbandman, explained that a horse's mouth and teeth may be compared to intake valves on a tractor. The teeth need to be floated (just as the intake valve needs to be properly seated) if they are to meet evenly and let the horse chew his feed properly.

Just as tractors are troubled with carbon in the cylinders, horses may have trouble with internal parasites. These may be removed by any competent veterinarian and the horse will be a better worker during the coming summer.

The carburetor on the tractor adjusts fuel supply to the work load. For horses, this is accomplished by getting them in proper condition before the heavy work load comes. Vial recommends this be done by "feeding the horse a handful of oil meal with his grain at this time of year to keep him in good condition and by giving him as many jobs to do as possible; such as spreading manure or hauling logs."

Other recommendations include: "Keep water in his cooling system, keep his tires in good condition by having him properly shod and see that his harness fits."

### Farm Record Keepers Told of "Short Cut"

"It's easier to keep up than to catch up," advises Clara Leopold, extension home management specialist at the University of Nebraska, to the home and farm account recordkeeper. Another hint, she says, is to keep a pencil attached to the account records.

According to Mrs. Leopold, a certain time each day should be set aside to jot down the daily transactions.

### Easier dish washing... you'll find the secret in petroleum

It may seem like a long trip to your dishpan, but a good share of the "soapless soaps" you use started deep in the earth in an oil well.

These new cleaners, called detergents, actually make water "wetter"... attract dirt and grease almost like a magnet. They make dishes sparkle, work well with all fabrics in hard or soft water, clean cars, and they have many other home and industrial uses.

The practical means of making detergents from oil came out of Standard of California research... by risking substantial sums for experimentation and develop-

ment. The results: new products to make your work easier, new manufacturing and selling jobs, a company better able to serve you and all the West.

**Idaho's Valuation Way Up**  
Boise — Idaho's total assessed value for 1949 is \$506,574,599.00, or \$21,904,845 more than the 1948 valuation of \$485,269,754.00, the Associated Taxpayers of Idaho, through Max Yost, manager, has revealed.  
Real and personal property on the 1949 equalized roll adds up to \$357,880,238, with utilities assessed at \$118,464,044. Highest assessed value is Ada county with \$51,565,589. Butte county, with total assessed value of \$2,248,424 is the lowest. Second highest county in the state is Twin Falls with \$34,628,174.00 assessed value.  
Kendrick is home. Boost for it!

## 41 Per Cent of Land In U. S. in Herbage

**Grass Top Resource, Cattlemen Assert**  
Grass is one of the greatest resources of this nation. In the United States there are approximately 779 million acres of land which will grow nothing but hay, grass and other herbage unfit for human consumption.  
This great acreage represents 41 per cent of the total land of the nation. About 9 per cent of the lands in the United States are plowable but are used also to produce pasture, hay or forage crops. It can be concluded, therefore, that about 60 per cent of the United States would not be used if it were not for meat animals.

This little fellow, obviously so well-started in life, is symbolical of what good pasturage can mean to cattle and just how much cattle depend on grass. In the United States there are approximately 779 million acres of land which cannot grow anything but hay, grass and other herbage.

Of the total feeds consumed by beef cattle 78.7 per cent is grass, hay and dry roughage. A minimum of grain is needed to bring feeder steers from 700 pounds to 1,000 pounds when the principal part of the ration is made up of hay, ensilage or other roughage.

The process of producing beef cattle normally involves the following steps:

1. The purebred operator who produces the sires and females which are the foundation of beef animal production. This branch of the cattle industry is one that requires heavy investment and efficiency in management.
2. The commercial breeder who produces the calves which are the offspring of commercial herds of female and purebred sires.
3. The pasture cattleman who grows the animal from the weaning or yearling stage to two years old, taking his profit from the poundage gained on grass and hay.
4. The feeder who "finishes" the animal from grass stage to slaughter condition, disposing of a large percentage of roughage.

### Crop Rotation

Crop rotation with deep-rooted legumes, plant food and good management methods are the "gas, oil and lubricants" that keep your soil's crop producing machine going on high.

Each of these has a job to do. Each needs help from the others. They all have to work like a team.

Valuable as a good rotation is in balancing soil - building legume crops against soil-robbing row crops, it has to be backed up by wise land management methods. Cropping in even the best rotation drains the soil's supply of phosphate and potash.

And even if your good management program puts back every scrap of barnyard manure, plows under the legumes and returns straw, corn stalks and crop aftermath to the soil, you still ship away hundreds of pounds of plant food in the grain, beef and milk you sell every year.

### Good Pasture Increases Dairy Herd Production

With 2.5 million fewer cows on farms now than in 1945, possibilities for profit in dairying are greater if labor-saving, high value pasture is the center of the production program. Good pasture can increase milk output and cut production costs. That means a bigger profit margin. Getting bigger pasture yields is a matter of feeding the soil plant nutrients so it can feed legume-grass mixtures.

### Mummies Found at Saqqara Throw New Light on Egypt

The patchwork story of ancient Egypt, gradually emerging through dusty finds in tomb, temple and pyramid, is richer by 10 more mummies, discovered in deep-underground, rock-walled tombs at the Saqqara cemetery of Egypt's old capital, Memphis.

This burial ground by the long-vanished fountainhead of early Egyptian power already has yielded a rich store of detail for the historians, notes the National Geographic society. On the Nile about 15 miles south of Cairo, it saw the beginning, in 1930, of epoch-making searches into the secrets of the First and Second Dynasties of 6,000 years ago.

Archeologists' "digs" at Saqqara have revealed complex patterns of royal and other burial structures, significant inscriptions, and thousands of personal articles hinting at life during various periods of Egyptian development. The recently explored tombs, buried near the famous and far older Step Pyramid, have been attributed by the experts to the Twenty-Sixth Dynasty, about 600 years before Christ.

The tombs and their valuable contents were turned up in connection with the extensive pyramid project of the Egyptian antiquities department. One of the mummies has been identified as a scribe in the temple of the god Ptah. Another is believed to have been his wife, whose wrappings contained a golden heart buried with her.

### Sod and Mulch Culture Recommended for Orchard

Grass and legumes should play a prominent part in an orchard management program, says Dr. H. B. Tukey, head of the horticulture department at Michigan state college.

"In apple and pear orchards a system of sod and mulch culture has proved successful in most parts of Michigan," Dr. Tukey states. "Of all the things a fruit grower can do and be wrong in the doing, he is least likely to be wrong when he mulches."

A 20-year experiment at the college was used to compare the cultivation-cover crop and sod-mulch systems of soil management in apple orchards. Although the trees in the cultivation-cover crop plot started faster, the trees in sod and mulch were larger and had produced the greater total acre yield at the end of the trial.

The cultivation-cover crop method is more popular in peach, plum, and cherry orchards, Tukey points out. However, some growers are successfully producing these fruits in a permanent sod-mulch program.

Soil erosion in orchards can be effectively controlled with grasses and legumes, whether permanent or temporary. In addition, these covers will add very important organic matter to the soil.

Mulching materials can often be produced right on the farm. Alfalfa, smooth brome, and other crops can be grown on land too rough for other use.

### True Color Complements

Of all the patterns for color harmony, the easiest to determine are the true complements. These are the two colors directly across the color wheel from each other: red and green, orange and blue, yellow and purple. Each of these pairs represent all the colors in the visible spectrum range, or completeness of color. Take the complements, red and green, for instance. In green, blue and yellow are combined. That means that red and green together contain the three primary colors — completeness of color in other words.

### Swine Erysipelas

In areas where there are outbreaks of swine erysipelas, it may be necessary to take immediate steps to protect newly farrowed pigs, according to livestock health authorities. In such cases, pigs often are vaccinated against this disease on the day of birth, so as to prevent losses. Owners are cautioned that it is easy to confuse swine erysipelas with other diseases, particularly navel ill, hog cholera, allergic conditions, and nutritional deficiencies. Because of the rapid spread and deadly nature of erysipelas, and the danger of its transmission to other animals and human beings, swine growers are urged to place suspected cases immediately under the care of a veterinarian.

### Add Tomatoes to Meat

Tomatoes hold a large share of their vitamins and fine flavor when canned. Adding them to meat dishes is a popular way to get them into family meals. Miss Grace Armstrong, nutritionist, University of Illinois college of Agriculture, suggests pouring the canned tomatoes over a pot roast about an hour before the end of the cooking period. The tomatoes seem to help tenderize the meat, and they add flavor to the gravy. For extra flavor, add a very small amount of garlic and just a trace of thyme along with the tomatoes.

# SALES DAY KENDRICK SATURDAY, OCTOBER 8, 1949

Kendrick's Annual Sales Day will be held on Saturday, October 8, for the Auctioning of Farmers Livestock, Implements, Household Goods—in fact anything of which they may have a surplus and wish to turn into cash. The sale will start at 10:00 a. m. sharp, with Auctioneer Roy Glenn crying the sale. All goods will be auctioned **ABSOLUTELY FREE OF CHARGE!** Farmers are asked to bring in their articles in sufficient time to have them listed by Ira Foster at the City Hall. No goods will be auctioned for town residents until all farmers' goods are sold — then only if time permits.

### EXHIBIT PRIZES AND RULES

**Vegetable Awards:** Largest table squash, \$2.00 first prize; \$1.00, second. Largest cow pumpkin, \$2.00 first prize; \$1.00 second. Largest potato (any variety) \$2.00 first prize; \$1.00 second. Largest ear of field corn (any variety) \$2.00 first prize; \$1.00, second.

**Field Crop Awards:** Best pint jar Small White dry beans, \$2.00 first prize; \$1.00 second. Best pint jar Small Red dry beans, \$2.00 first; \$1.00 second. PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

**HELLO, THERE FOLKS:**

**About Those Cows And Cream:**  
You know, folks, it seems as if we write the same line week after week about cream and dairy products, but after all that is what we are interested in — and you should be.

We know that this ideal fall weather has not been too conducive to cream production, due to the dryness of pastures, but at the same time, now that harvest is over, it's time to begin cashing in on the money old Bossy can bring you. See to it that she has plenty to eat, all the fresh, cool water she can drink, and plenty of salt — and you'll be surprised at the income she will bring you.

And, of course, we want to buy that cream. No quantity is too large, none too small, and bring or send it in often. Sell to us — the co-operative way.

A woman missed her gloves as she was leaving the restaurant where she had dined with her husband on New Year's Eve. Asking him to wait, she hurried back to look for them, searching first on the table, and finally peering under it.

The waiter who had served them hurried up to her. "Pardon me, madam," he said, "but the gentleman is there by the door."

If you are one who worries about women drivers, a Michigan prof. has just discovered that the Romans passed a law in 205 B. C. prohibiting women from driving chariots.

"You can never talk to Mrs. Yufelum without hearing a long story about her ailments." "Yes, you might almost call it an organ recital."

A husband may lay down the law in his home, but the wife supplies the amendments.
