THURBER'S

Senator Glen Taylor Here
U. S. Senator Glenn Taylor was a Kendrick caller last Friday, looking over the need for flood control here, federal flood money for roads, and meeting with local democratic leaders.

A Commercial Club committee composed of G. F. Brocke, Dr. D. A. Christensen, A. O. Kanikkeberg and Walter Brocke accompanied Senator Taylor on the tour.

Mr. Taylor stated that the federal flood control project here had been set up by army engineers and was ready to go as soon as the necessary money was appropriated — and that he would endeavor to immediately bring this before congress when it again convened.

Senator Taylor was also shown the road link under construction between Kendrick and Juliaetta, and agreed that there certainly was need for the completed road between these two towns, although he made no promises on the latter.

Tearing Down House

Warney May completed tearing down the garage on the old Martin Thomas property last week, and this week began the tremendous job of wrecking the old house — and when we say "tremendous job" we mean just that, for the whole interior is sealed rather than plastered — and the downstairs is doubly sealed with beaded ceiling over shiplap — and the whole nailed so heavily that one would almost believe they intended it for a warehouse rather than a home.

We understand that the house was built and then later remodeled by the late Tom Sturdevant.

Local Students Honored
U. of I. Moscow — Theodore Deobald, Kendrick, is president of the University of Idaho student chapter of the American Institute of Chemical Engineers.

Harold Brammer, Cameron, is junior representative on the engineers council for the University of Idaho student chapter of the American Institute of Chemical Engineers. He has been initiated by Sigma Tau, national engineering honorary.

Gay Deobald, Kendrick, was one of a group participating in a diet research study made at the University of Idaho home economics department.

Celebrate Golden Wedding
Mr. and Mrs. Harve Woodruff of Arrow were united in marriage 50 years ago — Dec. 2nd.

Mr. Woodruff was born at Roberts, Ill., in 1872, and moved to Wessington, S. D., in 1882.

Belle Scofield was born in Payette, Wisconsin in 1876 and moved to Wolsey, S. D., in 1882. That section was still a territory at that time, not becoming a state for some years.

Harve Woodruff and Belle Scofield were united in marriage at Virgil, South Dakota, Dec. 2, 1899, living there until November of 1904, when they came to Idaho, settling at Southwick, where they took up a homestead. They lived there until 1909, when they moved to Clarkston, Wash., where they lived for about 11 years, then purchasing their farm near Arrow, where they still reside.

The Woodruffs have one daughter and three grandchildren, all of whom make their home at Arrow. Their daughter and grandsons were with the Woodruffs on their Golden Wedding anniversary, but their granddaughter is attending Nazarene college in Nampa, Idaho.

The couple received many lovely cards of congratulations, and gifts. Jay Woodruff and family of Winchester, Idaho, and Eugene Woodruff and family of Genesee spent the day with them, bringing cake and gifts. They are nephews of the couple.

Christmas Decorations Up

Tuesday evening of this week the community Christmas decorations made their appearance, the local Boy Scout troop distributing and tying up 65 Christmas trees about the streets — all of which lends a really festive appearance to the town. It is the first time in several years that Kendrick has gone "all-out" in decking the town for Santa.

Bill and Dick White and Ed Nelson took a truck out to Cedar ridge and brought in the trees, as well as the big community Christmas tree for the city park — the latter an especially fine one, 27 feet high. The trees were donated by Clarence Weaver.

Strings of colored lights and Merry Christmas signs for street hanging are in the process of construction and will soon make their appearance.

HOUSEWIVES CHEER SOOTLESS FURNACES

Say, Housecleaning is a Breeze after "CHIMNEY SWEEP"
Destroys Soot in Furnaces, Flues and Chimneys!

Housewives, everywhere, report substantial savings in cleaning bills and housework after soot has been cleaned from furnaces. Homes where Chimney Sweep has been used thirty days or longer discover a remarkable absence of soot smudge on drapes, curtains, walls and woodwork.

Mrs. Rollo Weed, Columbus, Ind., stated: "I've never seen anything like the way Chimney Sweep goes to work on soot. Our home is much warmer, we're using less oil — but best of all, it seems my housework is cut in half."

"A neighbor told us about Chimney Sweep," said Mrs. W. E. Woodmansee, East Orange, N. J. "We tried it and found that Chimney Sweep is all the wonderful things we heard. Three weeks after we started using Chimney Sweep there wasn't a smidgin of smudge anywhere in the house."

Mrs. E. K. Beck, Bryn Mawr, Pa., reported, "It's amazing how clean everything stays since we started using Chimney Sweep. Before my husband put Chimney Sweep in the furnace the soot smudge would settle on our woodwork almost as fast as I cleaned it. Now that the soot is gone it's a wonderful relief not to clean the whole place every day."

Easy to use in Coal, Coke, Wood or Oil Furnaces!

Chimney Sweep goes to work on soot in much the same way that soap attacks dirt — by safe chemical action. The soot is loosened or "fluffed up" so that it is destroyed in the course of normal combustion. Two types of Chimney Sweep are available — Powder for coal, coke and wood-burning fireplaces, furnaces and stoves — and Liquid for oil or kerosene heating units. Powder Chimney Sweep is thrown directly on the fire, according to simple directions printed on every package. Liquid Chimney Sweep is poured into the fuel oil or kerosene storage tank. Chimney Sweep does the rest!

LINDEN ITEMS

(Delayed)

Thanksgiving Day dinner guests in the Marion Souders home were Mr. and Mrs. Claude Pippinger, Mr. and Mrs. Wayne Pippinger and sons, Mr. and Mrs. Leslie Ball and sons, all of Orofino; Mr. and Mrs. Melvin Garner of Lewiston Orchards; Mr. and Mrs. Edgar Bohn and Mrs. Geo. Burns and daughters of Clarkston; Mr. and Mrs. Louis Porter, Mr. and

Mrs. Arthur Foster and family and Mr. and Mrs. Arley Allen.

Mr. and Mrs. Jake Riebold visited his sister at Stites over the weekend. Ted Weavers stayed with Pearl Alexander while they were away.

Dinner guests in the Louis Alexander home Thanksgiving Day were Mrs. Sylvia Jenks, Mrs. Pearl Alexander and Mr. and Mrs. Joe Michaels, the latter of Forest Grove, Ore. The Michaels remained until Saturday, and Mrs. Jenks is still here.

Mr. and Mrs. Gene Mattoon and sons of Lewiston and Mr. and Mrs. Ted Vaughan and son were dinner guests in the Chas. Keeler home Thanksgiving Day.

Mr. and Mrs. C. A. McAllister and family and Mr. and Mrs. Al Pederson and family were dinner guests of the Lester Weaver family Thanksgiving. That evening the Pedersons motored to Coitax to visit their daughter, Inez. Mr. Pederson returned Friday, Mrs. Pederson remaining

until Monday.

Mrs. Annie Weaver, Dama, Clarence and Alex, Mr. and Mrs. Santford Weaver and children and Mr. and Mrs. Ted Weaver were dinner guests at the Adolph Denner home Thanksgiving Day.

Game Violations Heavy

Game violators are getting caught more frequently in Idaho, the fish and game department reports. Arrests during the month of October were a record 180, compared with the previous high for October of 140, set last year.

So far this year, 935 violators have appeared in court to answer charges of breaking fish and game laws. Total arrests in 1948 were 1,234.

The Idaho department now has the largest field force in history, and the increased patrolling is paying off in a steadily increasing number of arrests. T. E. Murray, director, said: "The past three years has brought definite need for more enforcement throughout the state. We hope that by vigorous enforcement, we can reduce violations enough so that the problems of poaching, trespass and other infringements of the game laws will become a minor factor in management programs."

He added that public apathy was a contributing factor in the upward spiral of violations. "The sooner public opinion realizes that violators are stealing wildlife from themselves and future generations, and places the game violator in the position of committing a crime instead of being a prankster, the more effective programs of wildlife conservation will be."

Students Taking Training

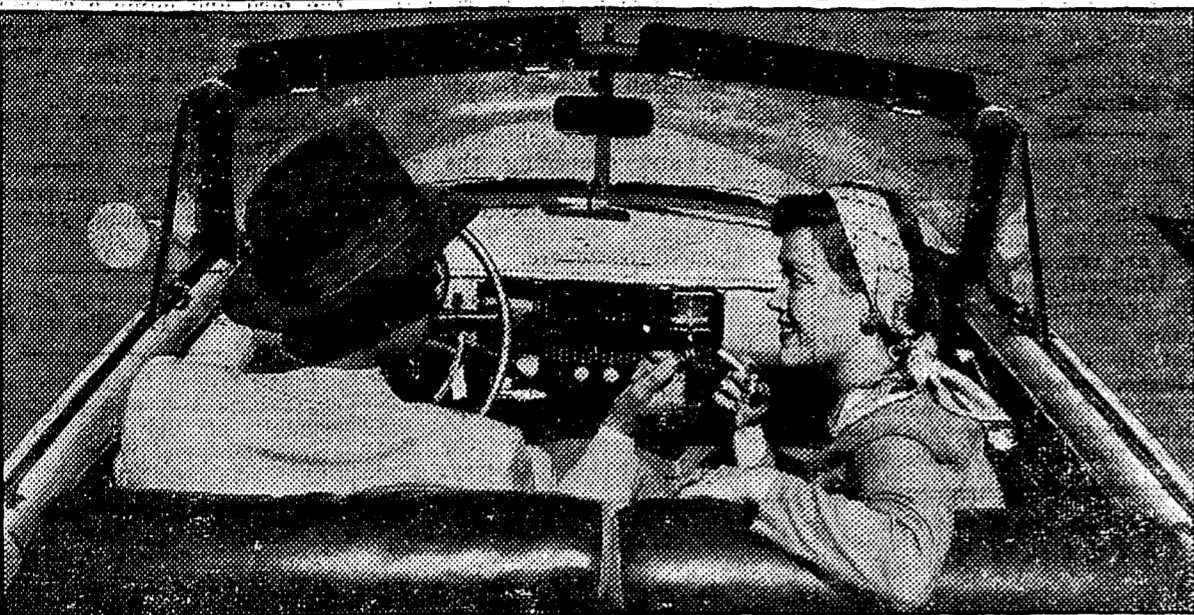

U. of I., Moscow — Students enrolled in the Air Force R. O. T. C. at the University of Idaho include John Deobald, David Coulter and John (Herbie) Millard, Kendrick, and Vernon Choate, Southwick. Choate was also in a group of U. of I. geography students who made a field trip to the Lewiston airport weather station.

Ozzie Kanikkeberg, Kendrick, was in charge of collections from Phi Gamma Delta for the University of Idaho Campus chest fund.

To Build New Barn

U. of I., Moscow — Construction of a new sheep barn at the University of Idaho will start immediately, J. E. Buchanan, president, announced this week. Cost of the new building will be \$25,975.00. The new barn will replace one destroyed by fire.

Safety Expert Revamps Courtesy Code

Because safety is involved, no well-mannered woman, says Traffic Expert Slutz, will accept a light from a man while he's driving a car.

Man has been helping woman through doors for centuries. But she should not permit it, according to Slutz, when the courtesy forces a man to enter or emerge from a car on the side of flowing traffic.

Don't point! It may distract masculine attention from the wheel.

DON SLUTZ, managing director of the Detroit Traffic Safety Association, has laid out a code for women auto passengers. It violates many accepted standards of chivalry but, Slutz explains, "I think women would prefer a discourteous escort to a gallant corpse. "My basic rule for women passengers," says Slutz, "is not to take offense at a male driver's disregard for the little considerations normally due her sex." In the accompanying pictures the Chevrolet Motor Division has illustrated some of the Slutz ideas on manners.

The story of the Foolish Dog*

Do you remember the story?

A dog, with a piece of meat in his mouth, was walking beside a pond. Looking down, he saw his reflection in the water. Thinking it was another dog with a piece of meat, he snapped at the shadow. His own real piece of meat dropped into the water and was lost!

Don't let the shadow of "something for nothing" deceive you! The American way of private enterprise gives you and your children MORE goods and services, MORE freedom and opportunity, than any way of life the world knows! TAKE A STAND NOW against socialist control of your electric service. REMEMBER, in England "socializing" of the electric industry was followed by socialistic government monopoly of one industry and profession after another. PREVENT that happening here!

*Grasp at the Shadow and Lose the Substance.

THE WASHINGTON WATER POWER COMPANY

A SELF-SUPPORTING, TAX-PAYING BUSINESS ENTERPRISE

Gifts for every purse and person

War Prisoners Recall Pies Concocted From Dry Milk

The average "ex-kriegie" (prisoner of war in Germany) probably has had many delicious desserts since returning to the United States, but it is doubtful that any dessert ever will taste quite as good to him as his first "kriegie-pie" after being released from solitary confinement.

Prisoners of War received the majority of their food from Red Cross parcels. Each parcel contained a can of dry whole milk which came to be one of the most important items, valued not only for its nutrition, but for the many diversified foods which could be made from it.

At first, prisoners used the dry milk according to directions, for drinking purposes, but it wasn't long before it was discovered that dry milk had many other uses. It isn't known who discovered that dry milk, mixed with butter or oleomargarine, and whipped until fluffy, then sweetened and flavored, made a rich and satisfying pie filling. However, it wasn't long before all "kriegies" were having dry milk pies for dessert, and any person who drank his milk was considered extravagant.

Basically, all the recipes for pies were the same. The crust was made in one of two ways. One method was to grind the crackers from the Red Cross parcels and, using this as flour, bake in the normal manner. The other method was to soak the crackers overnight in milk, then spread the swelled crackers to cover the bottom of the pie tin and set in the sun to dry. The latter method was preferred because of the fuel shortage and limited baking space.

Blood Replacement Cited For Reducing War Deaths

"Adequate timely replacement of blood was an exceedingly important factor in the reduced mortality of battle casualties admitted to hospitals in World War II," according to Dr. Howard E. Snyder of Winfield, the American Medical Association. Dr. Snyder states that observation and laboratory investigations revealed that transfusions of whole blood rather than of plasma, the liquid portion of the blood, were needed for battle casualty patients suffering from shock. "The advantages of adequate blood replacement with whole blood are manifold," states the author. "Mortality from shock is lowered. Prolonged adequate surgical intervention is possible when the replacement of blood is adequate. Operations which lasted three to five hours were not uncommon; in a number of instances they lasted even longer with satisfactory results. In the early days a few wounded persons lost their lives because surgical intervention was inadequate or was cut short due to the patient's poor condition and to the fact that gas gangrene later developed in an unbridled wound (one from which contaminated tissue had not been removed) or one inadequately debrided. It reduces morbidity. It permits early radical reparative surgical operations."

Revamped Communications

Forty years ago Lee de Forest gave his invention, the three-element electronic tube, to the world. It completely changed the methods of "wireless" communication. It took the place of the arc and spark for generating electromagnetic waves, producing beautifully uniform waves which made possible the use of voice instead of the Morse code for communication. It substituted also for the variety of inefficient detectors and made use of the loudspeaker possible, for it could receive, detect and amplify its own waves. Recognition extended to De Forest, in the form of financial reward of scholarly honors, has been very inadequate. Next to atomic energy the De Forest tube holds the record for the speed with which it was applied to an unnumbered array of purposes.

Sagging Mattresses

Sleeping continuously on a sagging mattress can cause a permanently curved spine which can be disfiguring and injurious to the general health as well as painful and crippling. Sometimes this results in one shoulder being higher than the other, in a tilted pelvic bone, vertebrae that are out of line or some other unbalanced bone shape. Only a level, resilient mattress can prevent this condition, for it properly supports the body, keeping the spine level throughout the long hours of sleep. While the sleep equipment of children, whose bones are more pliable, should be especially watched, damage can also be caused by adults sleeping on wornout mattresses or springs.

Delaware Flower

The peach blossom was adopted as the official floral emblem of the State of Delaware on May 9, 1895. Prior to the passage of this act there had been much sentiment among some of the citizens of the state who favored the golden rod as the state flower. As result of this sentiment agriculturalists and school children sent petitions to the legislature pointing out that Delaware had the reputation of being the "Peach State" since her orchards contained more than 800,000 peach trees, which yielded a crop worth thousands of dollars. These reasons prompted adoption of the peach blossom as the official state flower.

Have You Heard

The Latest One On Pat and Mike?

WE THOUGHT IT WAS TOO GOOD TO KEEP !!!

PAT SAYS:
"You know, Mike, I had the best darned luck last night."

MIKE:
"What kind of luck did you have, Pat?"

PAT:
"Well, suh, you know Tom and Dave keep that darned drug store open Every Evening until 8:30 o'clock for

CHRISTMAS SHOPPERS' CONVENIENCE

so I dunn took advantage of it — and By Golly am I glad! I had plenty of time to look around and I was able to buy a Swell Gift for everyone in my family as well as a Swell Box of Chocolates for my boss and Everyone in the Office."

MIKE:
"Pat, Boy, you ain't tellin' me nuthin'. I did a heck of a lot of lookin' around this year and by golly that joint has the Fairest Prices and Nicest Gifts I've seen anywhere!"

PAT:
"Yeah, but you know, Mike, the main thing I liked about buying there they gladly Gift Wrapped my purchases — and when I picked them up they thanked me and gave me a Smile of Appreciation — and that I liked — for it was genuine!"

MIKE:
"Yep, Pat, that's a good joint there."

Language Professor Renounces English In Present System

COLUMBUS, OHIO.—A University of Cincinnati language professor renounced the teaching of grammar here in address to the modern language section of the Ohio college association.

Dr. Chesley M. Hutchings, associate professor of romance languages in the UC college of liberal arts, told his colleagues:

"I hereby renounce grammar and all its works. Not 100 per cent, but at least substantially.

"And in favor of what? Of the development of that feeling for the language which will enable the student to express himself fluently in the foreign tongue and read and write it without having to translate or in any way refer to the English."

Dr. Hutchings spoke of "recent tendencies in modern language theory and practice," which he subtitled "recantation of an ex-grammarian."

"I used to be, as most of us were, adherent to the old system of grammar drill and translation," Dr. Hutchings said. "It was the work we did at the University of Cincinnati with the GIs in their language and area training that converted me.

"We used the foreign language all the time. No conversation in English was permitted. We had debates, dramatized situations, divided the classes into groups for further conversational practice. And the results were astounding.

"All over the country, as a result of similar experiences, our teachers became converted to the oral-aural approach," he continued. "All recent tendencies in modern language teaching have been in one direction, to the oral approach, to the teaching of conversation and comprehension rather than grammar and translation."

Dr. Hutchings explained that the task in elementary foreign language teaching is to make the student so familiar with the basic words of the language that no translation is necessary.

"After a few weeks a student should be able to handle mentally whole sentences without translation."

Auto Dealer Provides Baby-Sitters for Buyers

FOREST HILLS, N. Y.—Eugene Dunn, a Long Island auto dealer, often found his efforts to demonstrate his cars blocked by the prospects inability to obtain a baby-sitter.

So Dunn started his own baby-sitting agency.

"He rounded up a carefully screened group of Jamaica girls, had them heavily bonded as an extra precaution, and they sat while papa and mama went for a leisurely trial ride with their mind free of worry.

"During the first month," Dunn said, "we closed at least eight deals directly creditable to our baby-sitting service."

Americans in Japan Said Going in for Native Sport

TOKYO.—From one end of Japan to the other, Americans are going native in sports. Soldiers turn up as sumo and archery champions, women employees as court dancers and judo experts. And they're beating the Japanese at these century old sports and arts.

Air force Lt. Orville W. Elmore is sumo champion of Hokkaido, Japan's northern island. Orville, a wiry 5 foot 10 inch man weighing 187 pounds, won his ornate woven gold and straw belt by throwing 295 pound Chinoyama (Man Mountain), a 6 foot, 5 inch.

Judo, the more scientific form of wrestling and self-protection, has attracted thousands of Americans. During the last two years, 569 have practiced at world judo headquarters in Tokyo. Others have joined judo clubs at army and air force installations. Eighty-two Americans have gained the first degree black belt and one has won the fifth. Even the first, the lowest of the degrees, is a mark of distinction.

One of the better American women judoists is Miss Ruth B. Gardner of Chicago. Her instructor is a Charlie Chan type of fellow with a long, thin gray beard.

Sgt. James W. Curtis of the 5th air force in Nagoya, and Lt. Ben H. Hazard of Los Angeles, one of Gen. MacArthur's intelligence officers, are both studying Japanese fencing. They have acquired cumbersome old Japanese fencing costumes.

Mother Hands Over Son In Probe of Chicago Grime

CHICAGO.—A mother turned her conscience stricken son over to police, saying:

"I don't want any kids going wrong in my family."

As a result, police detained two other young men for questioning about four robberies.

Mrs. Margaret Finn told police that her son, Edward, 17, got \$9 as his share of a \$30 Saturday night taxicab holdup and decided "it was not worth it."

She said Edward's conscience bothered him and he told her about it. She took him, still carrying his toy size pistol, to the police station. Police later detained Donald Kline, 20, and Eugene Collins, 18.

New Plastic Foam Used in Insulation

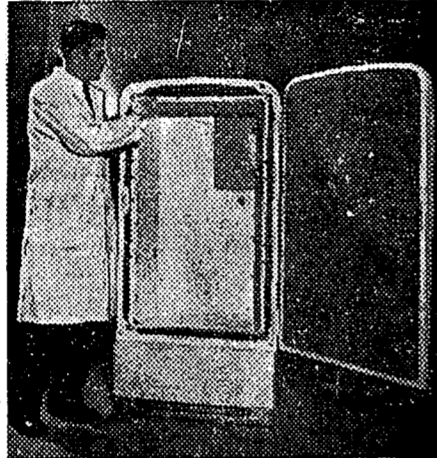

Material Is Called Lightest of Solids

The world's lightest solid an amazing plastic foam that swells up when baked like a cake to 100 times its original volume—has been developed by Westinghouse scientist for use as a new insulating material.

The new product is expected to find its way into many uses in appliances used in farm homes and about the farm.

Even lighter than some gases, the new material weighs from 10 to 20 times less than the fluffy meringue on a well-baked pie.

Robert F. Sterling, 29-year-old chemist, and the man chiefly responsible for the new product, said

Shown here is a refrigerator completely insulated with the new plastic-foam insulation material. This is the way the refrigerator looked after the insulation job was done, but before door liner and other parts were put back in place.

it is the result of a three-year search for an effective insulating material that will fill large areas, yet weigh "next to nothing."

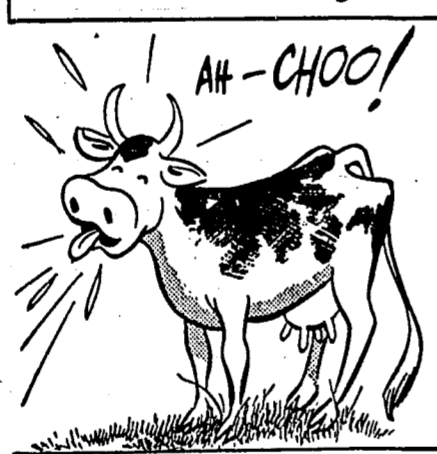

The foam is made by heating a molasses-like synthetic resin at about 350 degrees Fahrenheit until it expands to 100 times its original volume, then solidifies. Thousands of gas bubbles entrapped in the foam "buoy" it up and give the plastic its lightness.

Foamed into pre-fabricated metal wall sections, a two-inch thick layer weighing only 300 pounds would be enough to insulate a complete six-room house, Sterling said.

Resistant to fire, moisture, fungus growth and insects, the foam is low enough in cost to be practical for many applications and uses, the scientist said.

Not only do imprisoned air bubbles give the new plastic great lightness, but they also provide it with its excellent insulating qualities. So-called "dead air" is one of the best insulators known among commonly available materials, Sterling said.

Cover That Cough

"Cover that cough, smother that sneeze" is not only good advice for people in public places. It has practical meaning in the cowbarn, too.

Danger that coughing cattle may spread respiratory infections to their stablemates is highlighted in a research report from the American Veterinary Medical association.

The report describes an unusual case of tuberculosis of the eye in a heifer. A tuberculosis cow with a bad cough, stanchioned next to the heifer, is believed to have spread the disease.

AVMA points out that this case occurred in England, where bovine tuberculosis is widespread. Although tuberculosis has been reduced to a minimum in United States herds, coughers and sneezers are nevertheless a menace because they may spread all kinds of respiratory infections. Isolation of any animal showing respiratory symptoms is urged, therefore, to protect the rest of the herd.

Field Mice Destructive To Melon Crops, Seed

Untold damage is done each year to cucumber, cantaloupe and watermelon fields by mice destroying the seed which are planted and also the plants which are up and bearing fruit. H. A. Bowers, Clemson college crop specialist, says.

Bowers explained that the meadow mouse destroys the seed after they are planted, and the pine mouse cuts off the plants at the ground.

Farm Income Predictions

Boise — Most farm products are likely to be in fairly high demand next year, economists of the University of Idaho extension service predict in the December issue of "Economic Facts, a bi-monthly summary for Idaho farmers.

"General economic activity continues strong," said R. W. Wilcox and Virgil Kennedy in a forecast of what's ahead in '50, "although the trend has been slightly downward since last fall. Further slight reduction in economic activity appears likely. These statements assume no drastic changes in the international situation and no prolonged work stoppages."

Total crop production in the United States is at a record level, the report said. Crop production could be down in 1950 if yields are only average.

The downward trend in farm prices may put a squeeze on farm income, the economists said, in view of the fact that cost of goods and services the farmer must obtain will be slow to fall.

"There needs be deep concern," the publication said, "on farms where debts are heavy and savings slight that all spending be kept in line with probable income on the farm and in the home."

Outlook for various crops in a nutshell was presented as follows:

Sheep and lambs — Consumption of four pounds per person lowest in 1949 in more than a century. Sheep numbers may increase next year.

Potatoes — Little change. Production exceeds demand.

Dairy products — Domestic demand high.

Cattle — Numbers rising. Promise of more beef in future, but date indefinite.

Wheat — Moderate decline in price, with acreage allotments for the first time since 1943, and relatively favorable export demand.

"Substantial changes in farming practices will be necessary," the economists predicted, "if we get 10,000,000 acres out of wheat (U. S. figure). Included in the possible alternative uses of wheat acreage are seeding to grasses, to dairy pasture, change to other crops, and increasing summer fallow."

Students From Everywhere

U. of I., Moscow — All the counties of Idaho, 40 of the 48 states, three territories and nine foreign countries are represented by students at the University of Idaho, D. D. DuSault, registrar, states.

Of more than 3,500 students enrolled at the university, 2,792 come from Idaho, 67 from other states, and 39 from foreign countries. The Idaho county having the largest number of students is Latah, where

the university is located, with an enrollment of 609. Many married students from different parts of the state establish residences at Moscow while going to school. Next high county is Ada with 220 students.

The division with the largest enrollment is the college of letters and science with 1,070 students. Second is the school of business with 648.

The senior class is the largest, with 887 students seeking degrees in 1950. Other classes in order are freshmen, 880; sophomores, 798, and juniors 796. More than 160 students are enrolled in the graduate school and other special phases of study. Of the total enrollment, more than 1,000 are new students coming to the university of Idaho for the first time this year.

Dragline Shovel Leaves

The big dragline shovel of the N. P. railway company, which has been widening and deepening the creek channel at the upper end of town for the past week, completed its job Saturday, and Monday was loaded for shipment elsewhere.

The rock dug from the channel was used to form an embankment along the railroad track, and in a number of places is higher than the track itself.

It is to be regretted that the big shovel did not work all the way down the channel from the Bear creek bridge to the Sperry grade

bridge, but quit after it passed the Lewiston Grain Growers warehouse.

Want More Land

A special meeting of the Idaho Fish and Game commission will be held in Boise Aug. 29, 30 and 31, R. G. Cole, chairman, announced this week. The next regular commission meeting was not scheduled until October, but recent developments have necessitated special consideration of several factors.

A re-appraisal of big game and bird hunting seasons will be a major item on the commission agenda. Extremely dry weather and widespread fire damage have materially affected the bird and game conditions.

A consideration of fishing regulations to effect closures where needed in areas of drouth and fire, will be made, Cole disclosed.

Other business to be taken up by the game group include land acquisition, fisheries construction, federal aid, outline of construction projects for the coming year and personnel matters.

For every man over 85, there are seven women. But it's too late then.

Fresh frozen fruits, berries, juices, vegetables, fish and poultry are obtainable at Blevett's Grocery-Market. Remember: "For a Better Buy, Buy Bird's Eye." 1-adv.

Potlatch Chief Sez

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

HELLO, THERE FOLKS:

Getting Ready For Christmas?

We'll bet you are! Not only doing Christmas shopping, but busily planning that Christmas dinner — and that's where this institution enters the picture. What Christmas dinner would be complete without its hot rolls? And what hot roll would be complete without it topped with golden, sweet, Potlatch Chief pure creamery butter? Ah, there's a combination to please anyone. And of course, when you serve that hot mince pie, or apple pie for dessert, top it with a big scoop of Potlatch Chief vanilla ice cream. There's a dish that's fit for a king!

By the way, have you tried our new Vanilla Ice Cream? It's so smooth and tasty you can hardly quit eating it. Try a quart today! And of course, for that Christmas dinner salad you'll want Potlatch Chief Cottage Cheese. It's

fresh! It's delicious. And don't forget our coffee cream, whipping cream and pure pasteurized milk.

Nettie: "Don't let the people know that we've just been married."

Eddie: "O. K. You read a book and I'll go talk to the little blonde over in Section 7."

A disgusted parent wrote a note of complaint to the teacher and wound it up with this: "If all Herbert learns in school is to swear, I'll keep him home and teach him myself."

Man: A guy who can spot a trim ankle three blocks away while driving down a busy street at high noon, but won't notice, in wide open country, a whistling locomotive the size of a schoolhouse.

CRESCENT CLIPPINGS

(Delayed)

The home of Mr. and Mrs. Marion Souders was the scene of a happy family gathering Thanksgiving, when the following relatives gathered for dinner: Mr. and Mrs. Edgar Bohn, Mrs. George Burns and family, Mr. and Mrs. Melvin Garner and family, Mr. and Mrs. Clude Pippinger, Mr. and Mrs. Wayne Pippinger and family, Mr. and Mrs. Louis Porter, Mr. and Mrs. Arthur Foster and family, Mr. and Mrs. Leslie Ball and sons and Mr. and Mrs. Arley Allen.

Mr. and Mrs. Delno Babb and Ray Lee, Mr. and Mrs. Bill Babb and family were Sunday dinner guests of Mr. and Mrs. Wm. Babb, Sr.

Mr. and Mrs. Ray Stalnaker and grandson Ray of Clarkston spent the week-end in the Raymond Blankenship home.

Mr. and Mrs. Felix Babb had as their Thanksgiving dinner guests Mr. and Mrs. Wm. Babb, Mr. and Mrs. Delno Babb and Ray Lee, Mr. and Mrs. Bill Babb and family, Miss Phyllis Babb of Lewiston and Lee Babb of Colfax.

Mr. and Mrs. Alva Craig and children were Thursday afternoon callers in the Arne Kloster home.

Mr. and Mrs. Loyd Farrington and son John, Mr. and Mrs. Arne Kloster, Karl and Karen were visitors Sunday in the Rose Farrington home, the occasion being Grandma Keeler's 83rd birthday anniversary, and the Kloster's wedding anniversary.

Ed. Blankenship of Pullman was a Thanksgiving guest of his aunt and uncle, Mr. and Mrs. Raymond Blankenship.

Mr. and Mrs. Loyd Farrington and son Johnny spent Thanksgiving in the John Darby home in Kendrick.

(This Week)

Mr. and Mrs. Charles Baack were Kendrick visitors on Tuesday.

Mr. and Mrs. Ben Baker were Friday afternoon callers in the Alva Craig home.

Mr. and Mrs. Jim Farrington were Sunday evening visitors in the Loyd Farrington home.

Weyne Weyen called Sunday morning at the Ray Blankenship home.

Alva Craig is making good progress on his new home. The basement is now complete, the walls and roof up, and work is going forward on the chimney.

Mr. and Mrs. Marion Souders spent Sunday evening in Kendrick with Marion's mother, Mrs. Grace Souders.

Our community was covered with a blanket of snow Monday morning, so winter must be here for sure — but let's hope it never gets as bad as last year.

It's Blewett's Grocery-Market for frozen Bird's Eye Foods. 1-adv.

SOUTHWICK NEWS

Mrs. Harvey Bales of Lewiston was a week-end visitor in the home of her mother and brother, Mrs. Annie Longeteig and John.

Mr. and Mrs. Eveden spent Monday with Mr. and Mrs. L. J. Southwick.

Mr. and Mrs. Virgil Harris and sons spent Saturday night and Sunday with Mr. and Mrs. Earl Harris at Pullman.

Mr. and Mrs. Everett Neumann and son Larry spent several days in Lewiston last week in the home of Mr. and Mrs. Alan Neumann and children.

Mrs. Darwin Tarry entertained the teachers of Joint District No. 283, at the Southwick school house last Monday evening.

Mrs. Millie Harris was a Sunday dinner guest in the Given Mustoe home.

A large group of the Home Makers Club met with Mrs. Abner Cowger last Friday afternoon to learn to make Christmas candy. Everyone took part, and everyone felt that they had learned a lot. Mrs. Cowger had attended the home made candy work shop held in Lewiston last month and passed on the information to the rest of the club members. It was a most enjoyable and profitable afternoon.

Mr. and Mrs. Virgil Harris and sons and Mrs. Millie Harris were supper guests of Mr. and Mrs. Geo. Brooke, Jr., in Kendrick, Friday evening.

Mrs. Lyle Goffinet and children of Orofino were recent visitors in the Abner Cowger home.

LINDEN ITEMS

Sunday guests in the Harley Perryman home were Mr. and Mrs. Dan Kechter and son. Evening visitors were Mr. and Mrs. Ernest Grim.

Mr. and Mrs. Harley Perryman and son Gene were Moscow and Pullman visitors Saturday.

Guests at the Frank Lyons home on Thanksgiving Day were Mr. and Mrs. Baever and family of Troy, and Mr. and Mrs. George Lyons.

Rev. Nordbo and Ray Whybark were dinner guests at the Al. Pederson home on Sunday.

Editor's Note: Our apologies to our correspondent, Mrs. Pederson, and other Linden residents: The notes for last week reached us in time, but got covered up by other material and were not discovered until too late for publication.

Cedar Ridge School Notes

Our second grader finished her reader Nov. 30, and began her Science book.

Duane Chilberg finished his third reader Dec. 2, and has started his Geography.

The fourth grade have finished their Health book, had their review and test, and now have begun the study of "Visits In Other Lands."

The children were very glad when Mr. Nutting sent the Christmas Seals for them to sell.

Judy began work in her "Health Workbook" Thursday.

Move To New Home

Mr. and Mrs. Burton Souders began moving last Sunday to their new home in the west part of town, and are now getting settled.

Some interior work yet remains, but on the whole, the house is ready for occupancy.

Card Of Thanks

We wish to express our heartfelt appreciation for the kindness of our friends, the beautiful floral offerings, the singers and the pall bearers. — The Kuykendall Family; Mrs. Lillian Hill and Mr. and Mrs. E. Harrison.
