

KENDRICK GAZETTE

VOLUME 60

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, FEBRUARY 9, 1950

NO. 6

WEATHER MODERATES; GREETED WITH RELIEF

After days of sub-zero weather, dry powdery snow and bitter east winds, the mercury began a rise Friday night, and Saturday morning the column read 22 above zero — to the relief of everyone.

Thursday morning of last week the column indicated 22 below zero, to equal the coldest we have seen here in many years.

Friday morning it had climbed to a mild 14 below — and Saturday 22 above.

Sunday, the sun made an occasional break-through and touched a high of 38 above, with the dirty gray icy blanket covering the ground, beginning to soften. Many local residents took advantage of the "first warm day in weeks" to "dig out the family vehicle" and go down to see the ice jam along the Clearwater river. It is not as spectacular as in some years past, but mixed with logs, as it is, presents as great, if not greater danger to residents along the river, to highways and buildings.

Monday was even warmer than Sunday, the mercury climbing to a high point of 44 degrees above, accompanied by a wind that caused roofs to spout water and icicles to drop almost continually.

The thawing created a deep slush on Kendrick's streets, and every car that passed threw up a "V" of sloppy, dirty water. Most of it, however, was going into the ground, and the run-off in gutters was small in comparison to the melting that was taking place, as there is but little frost in the ground.

Tuesday morning thermometers read 28 degrees above zero, and the slush on the streets and sidewalks was frozen into an icy crust that caused cars to skid most any time and pedestrians to pick their way with extreme care.

As thawing continues, the detour around the new road work between Kendrick and Juliaetta, already described as a "dilly" will get worse, for ruts will deepen, and the alternate freezing and thawing will keep it slippery at all times.

In line with the freezing and thawing situation, Bill White, village marshal, warns all local residents to watch for frozen pipes, as thawing has a tendency to drive the frost deeper into the ground, increasing, rather than decreasing the danger of freezing. He advises that there is an ample water supply, and faucets should be allowed to drip where there is any danger of freezing.

Frank Abrams, of the Volunteer Fire department, also warns of increased fire dangers, as oil and coal stoves are often "stoked heavily" in the chill of early morning, and then forgotten — and right now, as well as during bitter cold weather, would be a very poor time to have a fire. So watch your stoves. Oil stoves, in particular, are apt to be "carboned up" as a result of long winter burning, and should be very carefully cleaned at the earliest opportunity. Flues, too, should be examined for soot, as oil soot, should it catch fire, makes a very hot blaze and has a tendency to shower sparks.

Water Runs Into Building

Tuesday morning when employees of the Kendrick Bean Growers opened up for business, the discovered the floor of their new building covered with water, as a result of the melting snow of Monday. So high is the snow piled where it has been shoveled off of sidewalks, and so deep was it packed in the streets that the gutters were powerless to carry it, and as a result it ran over the sidewalk and into the building.

A bulldozer was pressed into service to clear the snow so that gutters would have a chance, and now mountains of the dirty white stuff are piled on each side street in such a location that the run-off can do no damage.

Missed It A Long Way

Tom Keene, dispenser of thermometers, barometers, humidity indicators and like "trappings" of the weather enthusiast, is alleged to have predicted to Jacob Brandt, instructor in Science at our local school, that Kendrick would have a mild winter, as the one a year ago was unusually severe.

Well, to tell the truth, Mr. Brandt "alleges" that Tom missed his temperature predictions by about 40 degrees, and his snowfall by three feet — and suggests that Tom procure a new line of "instruments," perhaps geared to the wishes of the Lewiston Chamber of Commerce.

Entertain Pinocle Club

Mr. and Mrs. Frank Abrams entertained the Pinocle Club in their home Thursday evening.

Mrs. Ross Armitage and Tom Keene were awarded high scores; Mrs. Charley Candler and Walter Brocke, low. Mrs. George Brocke was awarded the "galloping goose." Delightful refreshments were served by the hostess at the close of the evening.

Local Students Honored

U. of I. Moscow — Theodore Deobald, Kendrick, was in charge of advertising for the dance given by the Associated Engineers organization of engineering students at the University of Idaho.

Reverly Schunfer, Kendrick, has been elected vice president of Forestry hall at the University.

David Coulter, Kendrick, has been chosen community service chairman for the Wesley Foundation. Methodist students' group at the University of Idaho.

Commercial Club Meeting

The regular monthly meeting of the Kendrick Commercial Club will be held Wednesday evening of next week, with the 6:30 dinner being served at Burt's Confectionery.

There are a number of matters to come before the group, and all members are urged to be present. Included will be a road report, and a discussion of the army engineers' flood control project, which it is hoped to have completed by next fall.

The business session will be at 7:30 in the city hall for those who are unable to attend the dinner.

FLOOD CONTROL APPROVED; KENDRICK INCLUDED IN LIST

Six proposed projects in the Tri-State area are included in an Interior Department-Army Engineer plan for Columbia river development which President Truman is said to have approved.

The announcement of the president's approval was made Thursday morning of last week at Washington, D. C., by Secretary of the Interior, Chapman, according to the Associated Press.

The program will be submitted to the senate soon, Chapman indicated. He said it was approved by the budget bureau, also.

Projects announced as approved for "authorization without objection" include the following:

Corps of Engineers: Middle and lower Snake river — Whitebird creek, South Fork of Clearwater river, and Kendrick, in Idaho; Palouse river in Washington and the Grande Ronde river in Oregon.

Complete details are lacking at this time on the proposed projects on Whitebird creek; the South Fork; Palouse river; Kendrick and the Grande Ronde. But in November of 1948, the army engineers recommended a \$3,000,000,000 program for development of the water resources of the Columbia basin. Known as the "Revised 508 Report," it made the following recommendations for the Kendrick Area — High flows of Potlatch river cause extensive damage to the town of Kendrick. Desired protection can be obtained by construction of a levee along a railroad embankment at an estimated cost of \$50,000.00.

Our Note: This project has long been near and dear to the hearts of businessmen up and down Kendrick's Main street, as well as to all home owners in the town. A great deal of time and correspondence and time has been expended on this matter by the Kendrick Commercial Club as a whole, but more particularly by George F. Brocke, Sr., A. O. Kanikkeberg, Wade T. Keene and E. T. Long, who not only represented the club as a committee but expended a great deal of time individually, gathering data, preparing reports, digging out the history of past floods, etc.

We understand that this matter is still subject to Senate approval, but there seems little if any doubt that the project will be approved.

Receives Personal Letter

In connection with the above, Geo. F. Brocke, Sr., has received the following letter from U. S. Senator Glen Taylor, under date of Jan. 28: Mr. George Brocke Kendrick, Idaho Dear George:

Since returning to Washington, I have done considerable work on the Kendrick Flood Control Project and I want to bring you up to date on the present outlook for construction.

As you know, there are two ways in which this can be achieved. One is through direct authorization of the project by the Congress and I have a bill pending in the Public Works Committee to accomplish this. However, this involves a very slow process and it is immediate construction that we desire. Consequently, I am concentrating on the other course, that of achieving early construction under the Emergency Flood Control program. Since the project did not receive a priority rating high enough to place it on the current fiscal year program, I am now endeavoring to secure a deficiency appropriation that will enable this construction to be done before the next flood season starts. I have already contacted General Pick asking that such a request for additional funds be submitted as soon as possible to the Congress.

I will keep you advised on the progress of this request and you can be sure that I will do everything possible to secure appropriation of these much needed funds at the earliest possible date.

Best personal regards.

Sincerely yours, GLEN H. TAYLOR.

KENDRICK SCHOOL NOTES

School re-convened Monday after several closures due to snow-blocked roads and extreme cold weather. Attendance has been exceptionally good on days when school was held during the past three weeks, and nearly all students are in attendance now, with but little sickness reported.

During the extremely cold weather the furnaces in the various buildings were fired to prevent freezing of pipes and plumbing fixtures.

The Juliaetta building escaped practically unscathed, and the Kendrick building escaped major difficulties due to the efforts of C. G. Arnett, Louis Lindquist, Bill White and Clarence Hiett, who were alerted continuously for four days during the worst of the weather.

Leland encountered some freezing difficulty, but Southwick, Gold Hill and Cedar Ridge schools are stove heated, and not only were heated — but also maintained school.

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Walter Sparber returned Friday from a two-week vacation spent with his father and sister at Chehalis, Wash., and with relatives and friends at Portland.

Mr. and Mrs. Arthur Fraser of Lewiston were Sunday dinner guests in the home of his parents, Mr. and Mrs. Everett Fraser.

Emulus Brown and son Jerry and Mrs. Lulu Brown left here for Palouse, Wn., Sunday, where they joined Mrs. Tempero, all going on to Seattle to be at the bedside of Mrs. Emulus Brown, who is gravely ill. June Brown left Thursday of last week by plane, and the group will join her in that city.

Mr. and Mrs. Ed Ingram of Boli spent Sunday at the home of Mr. and Mrs. Earl E. Harris.

Mr. and Mrs. W. L. McCreary and son Parker spent Sunday afternoon in the N. H. Rhodes home in Lewiston.

Edwin Coulter spent Saturday and Sunday with his brother David at the U. of I.

Quite a number from here drove to Big Eddy, near Lenore, Sunday, to view the big ice and log jam in the Clearwater river.

Mr. and Mrs. R. L. Blewett and son Billy and Mr. and Mrs. Ben P. Cook spent Sunday in Lewiston visiting with relatives.

Mr. and Mrs. L. A. Wallace have received word that their son, Lt. John Wallace, U. S. N., who has been stationed at Sandpoint Naval Air base near Seattle for several years, has been transferred to Lincoln, Neb. Lt. Wallace and his family left for that point Sunday, not even having time to stop for a brief visit with his parents.

Mr. and Mrs. Roger Maloney of Seattle arrived here Sunday night of last week to spend a couple of weeks with her parents, Mr. and Mrs. Wayne Kuykendall and family. Coming across Snowqualmie pass they elected to come by way of Yakima and Pasco. At Pasco the bridge was out, and they were forced to detour and ferry the Columbia. Near mid-stream the ferry broke away from one of its tugs, and went bobbing merrily down the river amid ice flows. It was soon picked up again, however, and a landing made on the Oregon side at a private landing. They finally completed the trip via Pendleton, Oregon.

SA 1/c Dick Kuykendall left Sunday morning for San Diego to report again for duty at that naval base after spending a 20-day leave here with his parents, Mr. and Mrs. Wayne Kuykendall, and other relatives.

Mr. and Mrs. Bob Magnuson and children, accompanied by Mr. and Mrs. Frank Abrams and family drove up the Clearwater Sunday to view the big ice jam, going on to Kamiah where they visited with Mr. and Mrs. Ralph Magnuson and family.

Mr. and Mrs. Harry Harris, accompanied by Mrs. C. E. Harris and Mrs. Earl Harris, were Lewiston visitors on Tuesday.

George D. Calvert of Umapine, Oregon, who is visiting with his wife and family at the home of her parents, Mr. and Mrs. John Frisbie, Juliaetta, was calling on old Kendrick friends Tuesday.

Mr. and Mrs. Forrest Wetterer returned Sunday evening from Great Falls, Mont., where they attended the wedding of his niece. The newlyweds, Mr. and Mrs. John Huff, accompanied the Wetterers home to spend a week here, then will return to Great Falls, where Mr. Huff, is S/Sgt. in the Army Air Corps, is stationed.

On Thursday Mrs. Ed. Nelson and sons Richard and Roger accompanied Mr. and Mrs. Otto Sillfow to Pullman to spend the day with Mr. and Mrs. August O. Wegner.

Mr. and Mrs. Ed. Nelson and sons spent Sunday afternoon in Lewiston with Mr. Nelson's sister, Mrs. Nellie Tannahill and son Teddy.

Edwin Coulter left Tuesday afternoon for Moscow and Spokane, from which latter point he will leave this week for Coulee Dam, Wash., where he has a position as engineers assistant.

Ed. Dammarell left for Spokane Sunday to spend a few days on business.

Archie May was a Moscow business visitor on Monday.

Bill Riley took the train for Moscow Monday on business.

Ray Jones was a Pullman visitor Sunday.

P. G. Candler visited in Troy Monday, going by train.

Mr. and Mrs. Dick Cuddy were Lewiston visitors on Wednesday.

Mr. and Mrs. L. A. Wallace and Randy drove to Big Eddy near Lenore, Sunday, to see the ice jam.

Mr. and Mrs. Bob Draper and Erma Lohman of Leland visited in the Oral Craig home Sunday afternoon.

Mr. and Mrs. Wm. Johnson and daughter spent Tuesday at the Herman Johnson home near Leland.

Chloe McKeever left for Moscow Sunday to enroll at the mid-year at the University of Idaho.

Mr. and Mrs. R. L. Blewett were Lewiston business visitors Tuesday. Mr. and Mrs. Kenneth Brocke were Lewiston visitors Tuesday. Kenneth attended an International Harvester Co. meeting at the Lewis-Clark hotel.

WHAT HAPPENED HERE TWENTY YEARS AGO

Well, we guess California hasn't anything on us, right now anyway. It has been so balmy the past few days that some have been heard expressing a desire to "dig in the dirt," while others have mentioned spring flowers, and others "shooting squirrels."

Students Win Typing Awards — Eldwa Jones received her proficiency certificate, and Eleanor Herres, a second year pupil, received her silver Underwood medal. To do this she had to write between 50 and 60 words a minute for 15 minutes, with not more than 5 errors.

Injured In Wreck — Friends received word last week from Mr. and Mrs. Harry Ameling, and Mrs. Bertha Eichner and son Harley, that they had been injured in an auto wreck while visiting at Long Beach, Calif. The above group were out for a drive when their car was struck by another machine and almost completely demolished. Mrs. Eichner and Mrs. Ameling and baby were hurt but enough that they spent several days in a hospital. Last reports are they are getting along nicely. No further details were learned at this time.

Parents of Son — Mr. and Mrs. Phillip Johns of Juliaetta are the parents of a son, born Feb. 2.

Leland — Mr. and Mrs. Bob Draper and children were Sunday dinner guests of Mr. and Mrs. Marvin Vincent. Gordon and Vera Peters visited in the Ed. Gertje home Sunday. Denzil Kuykendall and family called at the home of Mr. and Mrs. Errol Woody Saturday afternoon. Mr. and Mrs. Hugh Parks and family visited Sunday and were dinner guests at the home of Mr. and Mrs. Roy Morgan.

Cameron — Mrs. John Davis of Kendrick visited Tuesday with Mrs. Gustav Kruger. Elsie Elizabeth, infant daughter of Mr. and Mrs. Gustav Kruger, was christened Sunday. Week-end guests at the Geo. Wilken home were Mr. and Mrs. Wm. Johnson of Peck. August O. Wegner had the misfortune last Wednesday evening, while doing his chores, to suffer a severe injury to one knee, when the animal he was riding suddenly slipped, pinning him against the barn. He was taken to Lewiston Thursday morning by Herman Sillfow for medical treatment.

However, the doctor found no broken bones upon examination, just deep bruises and severe sprain. It will be two or three weeks before he can resume his daily work.

Linden — Mr. and Mrs. James Keeler arrived Monday from Alliance, Nebraska, for a visit with relatives. They are guests of Mrs. Sarah Keeler at the Smith home. Ben and George Smith and sister Miss Eva, attended the "Gold Diggers from Broadway" at the Lewiston Thursday evening. The home of Mr. and Mrs. Frank Lyons was the scene of a very pleasant party last Saturday evening when a large group of young folks gathered to surprise the boys, who were spending the week-end at home. Music and games were enjoyed until supper time, after which a song fest was held.

Big Bear Ridge — Mr. and Mrs. Wade T. Keene and children, Maxine and Tommy, moved to Kendrick this week. They will be greatly missed in this community, their many friends hate to see them go. Miss Neva Ware and Mae Freytag spent the week-end at the home of Mr. and Mrs. N. E. Ware. Mrs. Lou Myers of Lewiston was here last week visiting in the home of her daughter, Mr. and Mrs. Claude Jones. Everett Fraser, our mail carrier, has been driving a team this past week.

Crescent — Alva Hudson is slowly recovering from pneumonia. Jim Robeson is nursing a sore eye, as a result of an accident last week while decking logs. The following grades on State Examinations, just received, are: History, Bertha Loeser, 85; Marion Souders, 88; Marvin Souders, 91; Geography, Irene Kimbley, 81; Margaret Kimbley, 86; Physiology, Esther Swanson, 85; Irene Kimbley, 85; Margaret Kimbley, 89; Bertha Loeser, 90. We understand two Cedar ridge pupils passed also.

Aletha Israel in physiology and Kathryn Kent in Geography. Teakean — Orval Choate had the misfortune to get a piece of steel in one eye last week, and had to go to Lewiston to have a specialist care for it. We found some pussy willows up here this week, even if we are way up here where it's colder than anyplace else.

American Ridge — Mrs. Perry Mattoon has just returned from Lapwai, where she has been visiting her sister, who is quite ill. The Misses Amy Cummings and Edith Crosson spent the week-end with Ella Benschoter. Everyone on this ridge is concerned over the Minstrel Feb. 8th. Everybody come!

Frank Spray Passes Away

Frank Spray, 82, long a resident of Juliaetta, passed away Sunday afternoon at St. Joseph's hospital, Lewiston, where he had been a patient since Tuesday, Jan. 24, where he was taken following a fall on ice near his home that day. In the fall he suffered a fractured hip, and possible internal injuries.

The body was taken to the Kimbell Funeral Home at Palouse. We regret very much that further details are lacking at this time.

Valentine Party

The teachers of the Primary department in the Community Church will entertain the children with a Valentine party Saturday afternoon at 2:00 o'clock.

All are Invited.

March Of Dimes Extended

Due to the extremely unpleasant weather, which has greatly hindered drive work, the March of Dimes Drive has been extended through February 15, with the possibility for a longer extension later. All organizations or civic groups are urged to get all contributions in before Feb. 15 — and all money can be deposited to the March of Dimes Fund in the local bank. Remember, every dime helps in the fight against polio.

If you have not yet given — please do so. There is no cause more worthy.

TIGERS DROP PAIR TO OROFINO; THIRD LOSS OF SEASON

Friday evening of last week the Kendrick Tigers tangled with the Orofino Maniacs, defending Class B champions of Idaho — and came out on the little end of the horn.

In the eye-opening B squad game Kendrick drew first blood, but were unable to hold, and the first quarter ended 5 to 4 in favor of Orofino. The half saw Orofino in the lead 13-8; third quarter, 18-9 and final score board tally showed 25 to 15 for the Maniacs.

In the main event Kendrick again drew first blood, potting two field goals and a gift toss before Orofino found the hoop, and the first quarter ended 13 to 9 in Kendrick's favor. During the second half the Maniacs began tossing in baskets with regularity, and the half ended 20-20.

During the third quarter the Maniacs really began to "dig" and the score board at the end of that period showed them ahead 38-24.

In the final period the two teams almost swapped point for point, Orofino canning 16 for a total of 54, and the Tigers tossing in 15 for a total of 39.

The game was fast and clean, only one player leaving the floor on five personals. Very little substituting was done by either coach.

Despite the cold, the gymnasium was packed to the rafters with cheering fans, and many stood along the side lines.

Entertainment between the games and during the half-time mark in the feature event was furnished by the Kendrick band and majorettes.

Split Pair At Culesac

Monday evening the Tiger A and B squads journeyed to Culesac to meet the Wolves, and split a pair of games with them.

The B squad drew first blood on a field bucket, but from that point on the Wolves were never headed, and the final tally showed 20-17 in favor of Culesac.

In the A squad game, both teams had real difficulty in locating the basket during the first quarter. Kendrick drew first blood, but were unable to hold their lead and the quarter ended 7 to 6 in favor of Culesac. In the second quarter the Tigers began to claw, and half ended 20-17 in favor of Kendrick. The third quarter saw the Tigers adding 11 points to 5 for their opponents, and the end of the game showed 42 to 35 in favor of Kendrick.

Attendance was slim at this contest, and a great deal of dissatisfaction was expressed by the crowd at various decisions of the referees. The game was not what might be called rough, but hacking, holding, traveling, out-of-bounds, etc., went almost unnoticed.

Genesee Hero Friday

Final home game on the Tigers' schedule will be with their traditional rival, Genesee, next Friday evening, Feb. 10, when they meet the Bulldogs on the local floor.

In a previous engagement at Genesee the Tigers lost, and are therefore hoping to even the score tomorrow evening. The affair is a double-header, A and B teams, scheduled to begin at 7:00 p. m.

The Tigers have lost but three games this year, two to the Orofino Maniacs, and one to Genesee — so this game should be of real interest to all sports fans.

Receives Radio Award

Bennie Cook, son of Mr. and Mrs. Ben Cook, Kendrick, received the highest award for the state of Idaho in the 1949 "Long Distance" contest for radio amateurs.

The idea of this contest was to talk to foreign amateurs, and the "ham" who made the farthest contact, and the most, received the award — and Bennie won for Idaho. The 1950 contest will start this week-end, and he will try once again to "cop" Idaho's highest prize. Approximately two thousand amateurs throughout the world take part in these contests each year.

Final Rites For Elizabeth Steigers

Final services for Elizabeth Steigers were held at the Brower-Wann chapel at 1:00 p. m. Thursday of last week with the Rev. Edwin Smith of Juliaetta officiating. Lois and Louise Smith, also of Juliaetta, sang hymns to the accompaniment of organ music by Pauline Brigham. Pallbearers were Albert and Leslie Heimgartner, Glenn Stevens, John Maund, Byron Benedict and Charles Kerby. Burial was in Normal Hill cemetery.

Entertains At Birthday Party

On Wednesday, Feb. 1, Mrs. Ed. Nelson entertained with a birthday party honoring their son, Richard Nelson's, eighth birthday anniversary. Guests were Leonard Eldridge, David Jones, Randy Wallace, Denny Abrams, Jerry Armitage, Robin Magnuson.

Games were played and ice cream and birthday cake served the little guests.

NEWSY ITEMETTES FROM AMERICAN RIDGE AREA

Given Charivari

On Wednesday, Feb. 1, Mr. and Mrs. Henry Brammer were given a rousing charivari in honor of their 39th wedding anniversary by Mr. and Mrs. Werner Brammer, Mr. and Mrs. Ernest Brammer and Mr. and Mrs. Bill Brammer — to start the evening. After all was calm they took Mr. and Mrs. Henry Brammer to the home of Mr. and Mrs. Geo. Havens and family, where a real family gathering was held. At the close of the evening an anniversary cake baked by Mrs. Werner Brammer, sandwiches and coffee were served. All wished the couple many more years of wedded life.

Other News

Mr. and Mrs. Harry Benschoter and Walter Benschoter drove to Peck Sunday. The men visited their mother, Mrs. Frank Benschoter, Sr., while Mrs. Harry Benschoter visited her parents, Mr. and Mrs. Dan Lyle.

Conita Roberts spent the week-end with Mr. and Mrs. Ray Hatley at Moscow.

Mrs. Dick McCall, Lewiston, spent the week-end with her parents, Mr. and Mrs. Walter Benschoter.

Mr. and Mrs. Perry Mattoon and family spent Saturday evening with the Walter Benschoter family.

Mr. and Mrs. Bill Brammer and daughter Oraline are visiting this week with Mr. and Mrs. Geo. Havens and family.

Mrs. Bud Fey and children of Kendrick spent Sunday with Mr. and Mrs. Perry Mattoon. Mr. and Mrs. Earl Harris and daughter and Bud Fey joined the group that evening.

Mr. and Mrs. Bob Nelson visited his parents, Mr. and Mrs. Nelson, in the Lewville district, near Moscow.

Mr. and Mrs. Frankie Benschoter spent Thursday evening with Mr. and Mrs. Geo. Havens.

Most residents of this ridge attended the basketball game in Kendrick Friday evening.

Teddy Havens spent Friday night with Teddy Meyer at Cameron.

Mrs. Walter Benschoter and Jorene spent Wednesday and over-night as guests of her father, Ben Callison, in Lewiston.

Mr. and Mrs. Ed. Kent were Sunday dinner guests of Mr. and Mrs. Wm. Holt and family at Kendrick.

Mrs. Wayne Davis and son went to Pullman, Friday, called by the death of a relative, Mrs. Nettie Hansen. Mr. Davis went up on Saturday to attend the funeral and while there received word that his aunt, Mrs. C. Davis of Colfax, had passed away, with funeral services set for Monday. On Sunday Mr. and Mrs. Davis and son drove to Spokane, returning to Colfax for the services Monday, and home that evening.

Mrs. Harry Benschoter attended the Progressive Club meeting in Troy on Friday.

The road leading to the Norla Callison, E. P. Roberts and Mary Deobald ranches was plowed out for travel, Saturday.

Mr. and Mrs. Otto Schupfer and W. B. Deobald and daughter Gay were callers at the Mary Deobald home Sunday.

Harley Eichner and son Bud and Marilyn Schupfer were Moscow callers on Wednesday.

Clarence Dougharty and Leonard Roberts were in Lewiston Friday.

Mr. and Mrs. Clarence Dougharty called at the Mary Deobald and Ralph Arbuckle homes Sunday.

Mr. and Mrs. Geo. Havens and Mr. and Mrs. Bill Brammer and daughter Oraline were in Troy Tuesday. George looking after business while Mrs. Bill Brammer and Oraline and Mrs. Geo. Havens called at the home of Rev. and Mrs. John Bildt.

Mr. and Mrs. Clarence Dougharty were in Moscow, Tuesday. They also called at the home of Mr. and Mrs. P. L. Chaney in Troy.

Fire Destroys Home

Fire of undetermined origin, completely destroyed the farm home of Mr. and Mrs. Wade Candler at Teakean about 9:00 a. m. Wednesday of last week. The flames were discovered by Harry Dyke, a neighbor, who notified the Candler's. The blaze evidently originated from a defective flue, as the attic interior was a mass of flames, yet the roof, covered with snow and ice, was complete.

With the help of neighbors, some household goods and personal items were saved, and the Candler's greatly appreciate this help.

The Candler's will occupy another small house on the ranch until spring, when they expect to rebuild.

Thirty-nine At Grange

Thirty-nine Grangers were present for the regular monthly meeting on Tuesday evening. Following the regular business session Inez Armitage received the third and fourth degrees. The dance committee, Dick Cuddy, Frankie Benschoter and Herman Johnson reported \$131.85 netted by the March of Dimes Dance.

On St. Patrick's Day, March 18, an old-fashioned square dance party and basket social is scheduled. Overalls and sprit dresses are called for. It will be open to the public.

New Arrivals

Mr. and Mrs. Clinton Clark are the happy parents of a 7½-pound baby daughter, born Feb. 7 at the Davidson Nursing home, Kendrick.

A 7-pound girl was born to Mr. and Mrs. Dan W. Sullivan Wednesday morning at the home of Mr. and Mrs. Glen Wegner. Mrs. Sullivan and Mr. Wegner are sister and brother. Mrs. C. H. Fry is in the Werner home caring for Mrs. Sullivan and baby.

Hunt For Cougar

Frank (Cougar) Jones of Genesee and his son, plus a bevy of cougar dogs visited the Cedar creek area, Sunday, in search of the big cat, suspected of having killed some seven deer in that area — however, so many deer had been around the carcasses, plus a number of humans, inspecting them, that they were unable to pick out any tracks which would indicate the killer, and as deer are so thick they would not turn the dogs loose until at least some semblance of the killer's trail had been found.

We understand that a Mr. Eckman and his partner from Lewiston, also cougar hunters, with their dogs, visited the same territory Saturday, and were faced with the same problems.

Some suspect that the killing was done by coyotes, others by a lynx or bob cat — but in any event let's hope that no more of it happens — for the deer really are congregated in that section, as many as 57 having been counted by drivers from the L. A. Bartlett ranch at Pine Creek to the "lake" above the mouth of Cedar creek.

Planning Big Cattle Sale

The Lewiston Hereford association has selected 83 high quality bulls and 18 females from 37 registered herds in eastern Washington and north central Idaho for its Sixteenth Annual Show and Sale, to be held Feb. 21 and 22 in the sales pavilion at the Roundup grounds in Lewiston, according to J. W. Thometz, sales manager.

Emphasis has been placed on the selection of bulls that will help the range and cattlemen in increasing the weight of the calf crop in making faster gains in the feed lot. Seventy-one of the bulls selected are of serviceable age. They are well developed, good type and conformation and worthy of consideration.

Hard and range bulls to be sold at this sale are from reliable breeders that live in the community and guarantee the breeding of their animals.

The membership dinner and election of officers will be Monday, Feb. 20, at 6:30 p. m. in the Bollinger hotel.

Annual Stockmen's dinner and dance and awarding of Erb trophies will be at the Elks' country club, Tuesday, Feb. 21, at 6:30 p. m.

Game Warden Visits

Hal Ebling, local state conservation officer, was a Kendrick visitor last Friday, having come into this area to inspect the dead deer near the Porter logging camp, killed by coyotes or cats.

Mr. Ebling also brought some wheat for bird feed with him, and left a sack with our two local mail carriers. A sack won't go very far, but it will help.

Get fresh Salmon, Halibut and Oysters at Blewett's Grocery-Market, Kendrick. Mighty good. 1-adv.

"Hobo Day" Success

The Kendrick Girl Scouts started their "Hobo Day" activities on Feb. 4, and this troop wishes to thank you for co-operating with us. Our "Hobo" will continue for three months — every other Saturday.

Our troop discussed the costumes which the girls plan to wear for "International Day." We discussed the life and activities of Lord and Lady Baden-Powell, the founders of Boy and Girl Scouting, and prizes were awarded the girls answering the most questions following the discussions. Kay Abrams received illustrated pamphlets about ocean liners.

Our next "Hobo Day" will be on Saturday, Feb. 18. — Frances Dammarell, G. S. reporter.

Receives Splendid Writup

In the last issue of the Idaho Argonaut there appears a full-column write-up of Herbie Millard, Sophomore basketball player at the University of Idaho, and a son of Mr. and Mrs. Floyd Millard, Kendrick.

Herbie played four years of high school basketball at Kendrick, was a member of a district championship team two of those years, and of a state championship one — and from here went on to the University, to play his first year as a Vandal "Fup," and then to the regular Vandal squad.

Two pictures accompany the write-up, one of which shows Herbie in action on the floor against Oregon.

Birthday Anniversary Surprise

Mrs. Ed. Nelson was delightfully surprised on her birthday anniversary Monday, when a number of self-invited guests dropped in for supper, bringing with them well-filled baskets of food.

Those present were Mr. and Mrs. Emil Silflow and sons, Mr. and Mrs. Marvin Silflow, Dale and Carolyn, Mr. and Mrs. John Blankenship, Larry and Betty, Mr. and Mrs. Kenneth Wilken, Mr. and Mrs. Fred Silflow and Kathy Silflow.

Mother Passes Away

Dr. D. A. Christensen received word Wednesday evening of last week that his mother, Mrs. L. Christensen, of Salt Lake City, had passed away that day, following a lingering illness. She was 73 years of age. She had visited here a number of times and will be remembered by many.

Blocked roads, poor train schedules and cancelled air flights prevented Dr. Christensen from attending the final rites.

Canasta Party Held

Mr. and Mrs. Frank Abrams entertained at a Canasta party in their home Saturday evening, with five tables in play.

High scores were awarded Mrs. Tom Keene and Walter Brocke; lows went to Mrs. Billy Weyen and Jud Lee.

A "crab feed" provided a splendid climax for the evening's fun.

A New Policy Will Go Into Effect Feb. 1, 1950

There are a number of customers who have abused and ruined our system of credit. Therefore, A 30-DAY CASH BASIS has been forced upon us. If you are paid up, your credit is A-1. If not, we can not extend further credit to you.

We will extend our DUE ACCOUNTS UNTIL MARCH 1st — after that we must take action!

The machinery, parts, tires, etc., were sold to you as cheaply as possible. Our margin of profit is small — therefore we MUST HAVE OUR MONEY. Our business is not operated like some — we do not make the customer who pays — pay for those who do not.

This organization, The Kendrick Bean Growers, belongs to the farmers. The Board of Directors is only doing what is essential for sound business.

Confined Flocks Make More for Poultrymen Average 28 More Eggs Per Hen When Kept Up

Profitable chicken flocks usually lay about 20 per cent of their total yearly eggs during the last three months of the year. They produce one dozen eggs for each seven pounds of feed, have less than 12 per cent yearly mortality, and average 175 eggs or more per bird. Here is how poultrymen may achieve such records with their fall-housed pullets and insure themselves a profit:

1. More money will be made if the flock is kept confined. Figures show that confined flocks lay 28

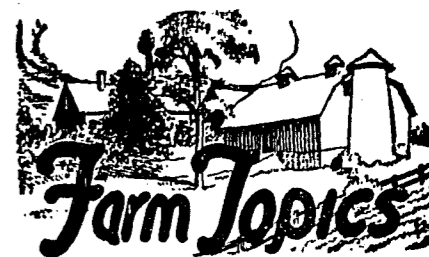

A homemade grain chute set at a tilt on an old truck makes quick work of feeding scratch to pullets on the Glendale poultry farm at Somerst, Mass.

more eggs per hen than those given the run of the farm. If it is desired to turn the flock out for part of the day, it should be done in the late afternoon—on a clean, graveled yard.

2. Supply plenty of floor space. Three to four square feet for each bird is about right.

3. Use a built-up litter on your chicken house floor. In starting a litter, use straw, wood shavings, sawdust, peanut hulls, peatmoss or any dry material available.

Flashlight Regarded 'Must' In Farm Homes Survey Shows Many Needs For Use in Rural Areas

Even a farmhouse with electricity doesn't have enough light to illuminate all the places in and about a home where darkness means danger.

This was apparent from recent surveys disclosing that inside as well as outside a flashlight is a farm "must" for nighttime safety as well as convenience.

The principal uses of flashlights:

A luminous flashlight is ideal for the denroom since it helps eliminate stumbling and groping for light switches.

revealed by the surveys have just been summarized in the following commandments for safety in the dark:

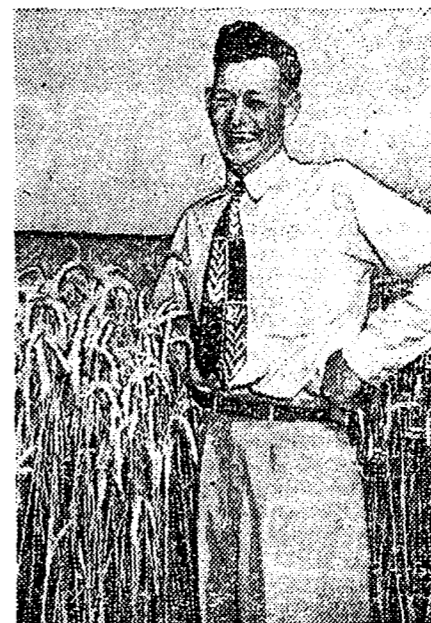

1. Carry Flashlights—On dark stairways to prevent falls. On highways at night. On your bicycle. In the car; one for changing tires, one for safety signalling by companion.

2. Keep Flashlights—Handy in the kitchen for outside chores at night or trips to the cellar. Near the bed; a luminous flashlight is ideal for the bedroom since it helps eliminate stumbling and groping for light switches. In the medicine cabinet; helps you find the right medicine, or to make a throat examination.

3. Use Flashlights—When gas fumes are suspected to be present. When you are changing a fuse in the fuse box. When checking the nursery or baby's crib at night.

According to W. S. Allen, general manager of the electrical division of Olin Industries, Inc., New Haven, Conn., the best general purpose flashlight is the two-cell, fixed focus type with a luminous case that glows in the dark. It can be located without stumbling or lighting matches. Under ideal conditions it will throw a beam 700 feet.

Champ Wheat Grower

Harold Pirtle, of Sullivan, Ind., shown above, was winner of the 1949 "pocket area" wheat growing championship in a contest sponsored by Purdue University and the Southwestern Indiana Wheat Improvement association.

He produced an average of 57½ bushels of wheat per acre on an 11-acre field. His prize-winning wheat was Vigoo, the new stiff-strawed, heavy-yielding red winter wheat developed at Purdue.

Certified Seed Said Need for Good Crops

Only by purchasing certified seed can a farmer make certain he is getting the best product available, says Dr. R. P. Moore, director in charge of the North Carolina crop improvement association.

Dr. Moore says seed are unique in that their breeding cannot be determined from appearance alone. To determine in advance the type of crop which a particular lot of seed can produce, it is necessary to know the history of the seed.

In the production of hybrid corn, the plant breeder probably will know much about the performance of the proposed hybrid before it is actually produced. After it is produced, it is put through a series of tests.

Diseased Livestock Costs Farmer Millions Yearly

Millions of dollars are lost every year in diseased livestock. Less than a dozen diseases are causing unbelievable losses in cattle, calves, hogs and sheep.

Pneumonia and pleurisy are most common, with pyemia, or blood poisoning, in third place. Immaturity alone claimed over one-fourth of the more than seven million calves slaughtered annually, according to the report.

Hockless Hog

This hockless hog, born near Danville, province of Quebec in Canada, keeps his nose to the ground at the farm of Gerard la France. Fated to go through life standing on his head, the pig was born without any hind feet and gets about in the acrobatic manner shown here.

Electric Brooders Nip Fire, Heat Problems

Getting rid of the danger of fire, and maintaining controlled temperatures, are the two big advantages of electric chicken brooders, according to most farm extension service engineers.

Farmers, too, it has been reported, have upheld these experts' findings in agreeing that birds feather over faster under electric heat than other types.

However, some caution must be observed in installing an electric chicken brooder. The brooder-house must be draft tight and, if possible, have a double or insulated floor. Electric brooders do not have enough heat to do a good job of holding an even temperature unless the brooder is free of drafts.

Here Are Timely Tips To Help Dairy Farmers

Three timely tips to help dairymen are passed along by C. S. agriculture. First, he said, the Rhode of the Illinois college of stalls in most barns are not wide or long enough for the larger cows. Second, cows should not be kept outside during cold rains. Third, harm is oftentimes done by the dairyman neglecting the feet of heifers and cows. They should always be trimmed properly.

Ask Those Questions

The next time you come to town to buy groceries and take the little woman on a shopping tour, you might drop in on your Soil Conservation agent as one more chore for this winter.

You might be surprised at the kind of fellow he is, if you haven't met him before. Ask him about some of the things you might want

to know. He won't know all the answers, and he'll be the first one to tell you so—but he might have the very information that you're needing—or at least he knows where to get it.

And you might talk over some of your plans for this coming spring. Crop rotations are something he probably has pretty well worked out for this area. He can tell you where

to have your soil analyzed to see whether you need a commercial fertilizer.

There are some new thoughts now and then in the permanent pasture business, too. Grasses that do fine in one section of the country are not so good in other sections. So, it might save time, worry and expense to get his recommendations on them. So, at all events, talk your prob-

lems over with him. He might be just the guy you've wanted to meet with just the information you need. Try it.

NO MATTER WHAT THE WEATHER

... YOU KNOW
YOU CAN COUNT ON
Reddy Kilowatt Service!

In the Inland Empire, building electric lines and "keeping the juice flowing" along those lines is no job for an amateur—and at Washington Water Power there are no amateurs on the job!

Yes, in spite of ice and snow-blocked roads, blizzard and flood, come what may, your experienced electrical servants at Washington Water Power keep the kilowatts coming to you—to provide you with the best in electrical living, at low cost!

Test for Drunken Drivers May Cut Highway Accidents

Drunken driving on the nation's highways may be reduced with the aid of an improved method of detecting alcohol in the body which was reported to the American Chemical Society at a national meeting.

A paper describing the application of the new test, which was said to possess somewhat greater specificity than conventional methods, was presented by John W. Sease, William H. Harris, and Sigmund Jaffe of Wesleyan university, Middletown, Conn.

The importance of a highly accurate test for intoxication is emphasized by a recent survey which, according to the National Safety Council, showed that 17 out of every 100 automobile accidents are caused by drunken drivers.

Used throughout the summer at the Connecticut state hospital laboratory on all legal samples submitted for alcohol analysis, the new method converts ethanol, or ethyl alcohol—the type used in beverages—into a compound called ethyl nitrite. Only ethyl and methyl (wood) alcohol form nitrites which are gaseous at room temperature. All other alcohols form liquid nitrites and do not interfere with the test. The nitrite gas is purified and its amount then determined by colorimetric means.

The test's results for urine alcohol have been exceedingly good, checking well with established methods, and permitting alcohol concentrations to be measured even in the presence of substances that interfere with conventional methods, the paper said.

The report termed results with blood "less satisfactory," with the nitrite method giving results 10 to 15 per cent erroneous when checked with present methods.

Milk in South Assumes New Economic Importance

Dairying is playing an outstanding role in the national soil conservation program.

In a southern county where cotton was the main crop, today dairying is the major enterprise on 100 farms and is a \$1,000,000 industry. A recent study of an average group of 10 families in this community shows that their farms pay 6 to 10 times more taxes than 10 years ago.

A significant fact is that nine of 26 children in a group of the families have become partners with their parents in dairy farming, 11 have married and gone into dairying themselves and three are still living at home and going to school. M. H. Brightman, executive secretary of the dairy institute committee, told a senate committee. Only three of the 26 have left the community.

A similar study of 10 families in a nearby community that depended largely on cotton showed very different results. Only eight had married and settled in the community and only two were still at home and going to school, but 23 had left. And there were no father and son partnerships.

Language of Science

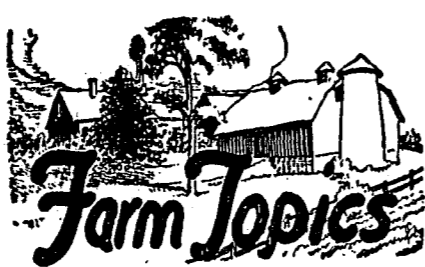

English is now the leading language of science, putting German and French in the background, according to a survey made by Fletcher S. Boig, professor of chemistry at Northeastern university, Boston, Mass. Russian, says Boig, was of very slight importance 20 years ago as a scientific language but now is a serious contender for honors as the leading foreign language. Among countries publishing scientific periodicals and articles, the United States has a comfortable lead, with Britain, France, Russia and Switzerland following in that order. Germany has lost ground, as has Italy and Russia. Fifty-seven per cent of all scientific articles are now published in English. French, German, Russian and Italian, in that order, account for the remainder.

Famous Men from Ohio

Ohio is a state of scientists. Thomas A. Edison and the Wright brothers, Wilbur and Orville, were Ohioans. The refining process of Charles Martin Hall made possible the aluminum industry. Charles F. Bush was widely known as an electrical inventor. Charles F. Kettering is known as the inventor of automotive starting, lighting and ignition systems. Thomas Midgley, Jr., invented ethyl fluid for automobile gasoline. George Sperti is the discoverer of biodynes (cellular metabolic factors) and the inventor of the Sperti sun lamp. Kari T. Compton is head of the research and development board of the national military establishment. These are representative Ohio scientists.

Origin of "hoodlum"

A reporter's poor handwriting is responsible for giving our language the word "hoodlum." During the gaslight era in San Francisco a reporter wished to coin a name for a gang of thugs. The leader of the gang was a man called Muldoon, so the young journalist took the name and reversed it—making it "Noodlum." There were no typewriters in those days and the type-setter couldn't read the reporter's scrawl. He thought the word was "hoodlum." The name caught on, and "hoodlum" is now commonly used when referring to a ruffian.

Ringold Lady Dora Is Champion Again Raises Litter of 10 To 447 Pounds Weaned

Ninety-six pigs raised to weaning age is the remarkable new record of America's champion production sow. She is Ringold Lady Dora, a purebred Hampshire owned by Meadowlark Farms, Inc. of Sullivan, Indiana, and the only sow of any breed to qualify for an 8th star in production registry books. The champion chalked up her new record this spring when she raised a litter of 10 pigs, nine of them eligible for registration, to weigh 447 pounds at weaning time, 56 days.

To qualify for production registry, conducted by the purebred associations, a sow must raise a litter of at least eight pigs to a minimum weight of 320 pounds within 56 days. They must be approved breed type, free from fault

Here is Ringold Lady Dora with her litter of 10 pigs which qualified her as an 8-star sow, the only sow having such designation in registry sows of any breed. This litter weighed 447 pounds at 56 days of age. Ringold Lady was fed a ration of corn, oats, pelletized milk products and alfalfa pasture prior to farrowing and during the suckling period.

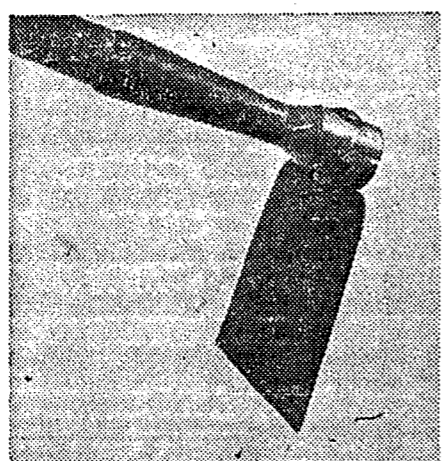

or defect and at least half of them eligible for registry. The sow gains a star in the production registry books each time she repeats the performance.

The champion has repeated it eight times, raising a total of 81 pigs to weigh a total of 3,183 pounds at the weaning age. Besides her eight litters which qualified for production registry, this sow has raised another 15 pigs in two litters which failed to qualify, or a total of 96 pigs since her first litter was farrowed in September, 1944.

According to U. S. department of agriculture reports, the national average is less than 6.3 pigs per litter raised to weaning age. It would take more than average litters to equal in numbers of pigs raised to weaning age what Ringold Lady Dora raised in her eight qualifying litters.

Worth of her litters was proven recently when her sixth qualifying litter (farrowed February 13, 1948) consisting of seven boars and three gilts, was sold for a total of \$4,365.

Versatile Tool

This "adjusto-blade" tool is a time, space and money saver for the farmer and gardener and can be used at any season of the year. A product of the Coffing hoist company, the tool does the work of a hoe, an angle hoe, an axe, edger, trencher, sickle in summer and a scraper in winter.

The secret of its versatility lies in the adjustable blade which can be fastened securely in a number of positions. The head of the company which makes it, Fred W. Coffing, is the inventor.

The tool is sturdily made throughout, with blade made of heat-treated tool steel to insure extra toughness.

Grain Sorghum Grazing Cuts Farm Feeding Cost

The widespread use of grain sorghum for fall grazing has proved this crop to be one of the best grown for livestock, according to J. T. Graves, Clemson extension livestock specialist.

The grain sorghum gives grazing at a time of year that most other types of grazing are unavailable. It fits in very well between summer pastures and green winter grazing crops.

Early Horse About Size Of Deer, Scientist Says

The modern horse owes his long teeth and much of his appearance to the food his ancestors were forced to eat during the last 35 million years.

This is a conclusion of a study made by Dr. R. A. Stirton, associate professor of paleontology at the University of California.

Dr. Stirton says that 35 million years ago the horse was about the size of a deer, and, like the deer, had well-developed side toes on his feet. His teeth were small and low-crowned. He had all the potential for evolving into the modern horse; indeed, except for those characteristics, he looked much like the horse as he is known today.

In North America, this granddaddy of the horse lived in the present great plains area, which at that time was not a grass covered plain as it was known to the American pioneers. The ancient horse, called Parahippus by scientists, fed on softer plants instead of the harsh dry grasses on the recent plains.

Then there was a change in the landscape and a corresponding change in the horse's diet. Dr. Stirton says. The area developed, during a period of a few million years, into a great flood plain. Along with this change came domination of the plain by coarse, dry grasses.

As the horse munched on this grass, he found he had to chew the sand of the flood plain along with the tougher grass. This was a diet well calculated to bring about profound modifications of the horse's teeth. In addition to increasing the size and height of the crown of the teeth, the horse's jaw became more massive, giving him his present head shape.

Civil Rule Plan Heralds 2nd Big Chance for Guam

The plan to transfer the government of Guam from naval to civilian control by July 1, 1950, promises the second major change in this tiny American outpost since the end of World War II.

Conversion of Guam, southernmost of the Marianas group, from a sleepy tropical island into a key military and naval base was the first big postwar development undertaken. Although actually begun in the closing year of the drive on Japan, the program picked up momentum with the coming peace, which permitted development of a more substantial character.

Today Guam has two permanent air fields, both built on the level land of its northern plateau. Port Apra, the large natural harbor on the southwest coast, boasts mooring space for more than 40 ships, submarine pens, dry docks, and a breakwater to protect the new installations against destructive typhoons. Road improvements include four-lane highways, some the island's length.

This is a vast change from the pre-war Guam, whose defenses in 1941 were weaker than those in 1920 because the United States had honored the demilitarization terms of the Washington naval conference. Located about 3,750 miles closer to the Far East than Pearl Harbor, the island now plays a vital role as a supply base for American forces in Okinawa and Japan.

Franklin and City Planning

Benjamin Franklin added to the young, growing city of Philadelphia, the improvements of paved streets, better lighting, and street cleaning. He organized the first fire company there and reformed the police force. Moreover, he established the first library, the first academy, and was instrumental in founding the first hospital in the city. Franklin was always interested in city-planning. His earliest concern in civic welfare was the danger of fires in the unprotected, wooden town. He recalled with approval the volunteer fire companies in Boston, where he was born. To think with Franklin was to act, and, accordingly, he wrote a letter to himself and published it in his newspaper, the Gazette. This letter, which purported to be from an elderly citizen, discussed the Protection of Towns from Fire, and stressed prevention of blazes by caution in carrying coals and licensing chimney sweeps.

Variety Meat "Stretchers"

Many homemakers use variety meats to help stretch the meat dollar because they are less expensive than muscle meats. When meat with bone is bought for roasts, broiling, or frying, a serving for each adult is usually one-half pound and four to six ounces for children, depending upon their ages. On the other hand, about one-half of these quantities is sufficient when boned roasts, cutlets, hamburgers, Swiss or cube steaks, liver, tongue, heart, or kidneys are served.

To Press Woolens

Press winter weight woolens with a woolen cloth. An old pantleg—if you're sure it's all wool—makes a good one. Stitch a section, 15 by 24 inches, free from seams, to a piece of cotton, same size, from which all dressing has been removed. To use, wet cotton fabric, lay wool against garment cover with wet cotton cloth, and press. The woolen cloth holds the steam and aids in raising the nap of the garment.

FEBRUARY 13 'GOOD TIME TO VISIT CO. COMMISSIONERS

Monday, February 13, is the day set aside by law for the public review of the budget and tax bills for Idaho's 44 counties, reports Max Yost, executive manager of the Associated Taxpayers of Idaho, in the current issue of the group's Tax Bulletin.

"Many county officials have indicated their desire for taxpayers to appear and discuss the county operation. They want the taxpayer to understand the county program and welcome the opportunity to explain it to him. They want to have the taxpayer's approval of their program," the Bulletin declares.

"It is essential to make adequate provisions for necessary expenditures as it is to prevent the adoption of excessive requests," Yost stated.

He reported that plans to attend the public meetings have already been made in several counties and that attendance at the commissioners' public hearings in the county court-houses around the state will be the largest on record.

"Each year during the past three years, more interest in the county budget and taxes has been evidenced. More taxpayers have attended the meetings each February, and a greater mutual understanding has been reached because of this between the county officials and lay citizens."

The Bulletin also reported that Idaho, of all the 48 states, is the only one in which a tax reduction on the state level is apparently possible. In reporting this fact, the Bulletin urged that the special session of the legislature give consideration to making the reduction in the property tax field.

The ability to pay taxes fluctuates with profits or income. Income tax varies with income or profits, but property taxes are assessed whether there has been a profit or not. Actually, property taxes are the least flexible of all taxes and justifiably so, since about 80 percent of the revenue for local government comes from that field of taxation. Now a reduction is possible in state taxes, let the state first relinquish use of primarily a local tax field.

Yost reports that property taxes for Idaho taxpayers has increased steadily the last five years. Tax levies for 1949, payable by citizens in 66 representative Idaho communities were increased on an average of a little more than 30c per 100 of assessed valuation.

Engineer Was Dead

An Indian guide in the Canadian big game country was given a watch by an appreciative New York banker for favors received. One day the watch stopped ticking and the Indian took off the back to see if he could locate the trouble. He poked about in the works and finally found a dead bug. Hurling the watch away in disgust he grunted: "No wonder him no work. Engineer dead."

INTERESTING HAPPENINGS FROM THE JULIAETTA AREA

Johnny Schetzle came over from Cheney, Wn., last week, to spend a few days with his parents and to attend his uncle's funeral.

Rev. and Mrs. George D. Calvert and family from Umapine, Ore., are here visiting in the home of their parents, Mr. and Mrs. John Frisbee. They expect to remain here for some time to help care for Mr. Frisbee, who is quite ill. Mignon enrolled in the third grade at school, Monday.

For the third time within a few weeks our community has been saddened by the passing of a neighbor and friend. This time we lost one of our pioneers and best known citizens — Frank Spay. When he fell and broke a hip two weeks ago he was in the act of inquiring about a sick neighbor, and as soon as he was lifted into his chair he pursued his inquiry, which shows his unselfish and kind disposition, so typical of his entire life. The entire community extends heartfelt sympathy to the surviving family.

Mrs. Walter Finch from Albion, Wash., was an over-night guest of her sister, Mrs. E. O. McAllister, Sunday night.

Mr. and Mrs. Lester Klink are spending a few days here with her mother, Mrs. Frank Spray. Their home is at Moses Lake, Wash.

Rev. George F. Calvert from Lenore drove to Albion Saturday evening to visit his mother. He stopped here for his son, Rev. George D. Calvert, who accompanied him. Week-end guests at the Asa Calvert home were Mr. and Mrs. Chas. Starkey from Ahsahka, and Miss Marjory Butrey of Craigmont.

Mr. and Mrs. Howard Wunderlich of Orofino visited in the Lura Nelson home, Tuesday.

J. M. Mead was a Coeur d'Alene visitor on business several days last week.

Mr. and Mrs. Donald Candler and children of Bovill visited in the W. L. Candler home Sunday.

Mr. and Mrs. Neil Candler, Billie Gebhart and Ione Ambrose were Lewiston visitors Monday.

Dale Candler left Thursday for Oakland, Calif., where he will visit his sister, Mrs. Betty Courtier and family.

Miss Louise Peters has been seriously ill with the flu.

Fresh frozen Bird's Eye fruits, vegetables and juices are available at Blewett's Grocery-Market. 1-adv

Twins And Triplets Numerous

Lambing at the Christensen ranch is in full swing, and it keeps all hands busy caring for the fast increasing herd.

Dr. Christensen reports that despite the severe weather, they haven't lost a lamb to date — the "new-comers" averaging well over 150 percent. So far three sets of triplets and several sets of twins — \$9 "new arrivals" in all.

Entertain At Cards

Mr. and Mrs. Elmo Eldridge entertained at a card party Saturday evening in their home. Guests were Mr. and Mrs. Howard Hoffman and baby, Mr. and Mrs. Geo. Brocke, Jr., and Mr. and Mrs. Wm. Johnson.

Delightful refreshments were served at the close of play

Study Group

Mrs. John Darby, Study group leader of the Kendrick W. S. C. S., calls attention to the first meeting, which will be held Friday afternoon in the home of Mrs. Howard Hoffman, at 2:30 o'clock.

Writes Interesting Letter

Little Jack Easterbrook, a patient in the Children's Orthopedic Hospital in Seattle, has written an interesting letter to Ann White, and with her permission we reproduce it:

Dear Ann:
 How are you? I'm feeling fine. Thanks for the lovely gifts you have given me. I played with the barrel puzzle and can't get it back together. I get two shots a day and four pills a day. I will be here two months and three weeks yet, I think. We have a work shop and a play room here. I have school too. I got three out of the 20 puzzles together and apart. So sorry I didn't write before.

The nurse told me I was to open one a day, so that's what I'm doing. The cookies were very good. Thank you very much. — Jack.

Card Of Thanks

We wish to thank our many friends for the beautiful floral offerings and for the many acts of kindness in our behalf during our recent bereavement. Especially do we thank Rev. Earl Gaskill and Jim Carlton for their untiring efforts during the bitter cold weather and bad road conditions, in order to make the funeral possible. — Mr. and Mrs. Chas. Schetzle, Mr. and Mrs. G. W. Schetzle

STONY POINT NEWS

Mrs. Loren Ratliff of Seattle, Wash., and Mr. and Mrs. Henry Steigers of Tacoma, left for their homes Thursday evening, after a few days stay while arranging for and attending the funeral of Mrs. Elizabeth Steigers.

Sunday dinner guests of Mr. and Mrs. Albert Heimgartner included Mr. and Mrs. William Heimgartner, Frank and Eileen, Mr. and Mrs. Alvin Steigers and Leroy, and Mr. and Mrs. Floyd Heimgartner and children. Afternoon callers were Mr. and Mrs. Marion Stevens and family.

Mr. and Mrs. Eldon Heimgartner and family visited Mr. and Mrs. Sam Gruell, Sunday.

Rev. and Mrs. Douglas Field and Judy, Mr. and Mrs. Lloyd Butler and Linda, and Mr. and Mrs. Willard English, Larry and Joan were Sunday dinner guests of Mr. and Mrs. Glen Stevens, Glenda and Linda.

Mrs. Walter ZumHofe and infant son, Von, returned to their home Sunday.

Ed's Note: In listing the survivors of Mrs. Elizabeth Steigers in last week's issue, we listed Alvin Steigers of Lenore as "Melvin." Our apologies to the family.

Pull "Doggy Rescue"

Tuesday afternoon while busily engaged in setting type for this week's issue of the Gazette, the phone rang and Roy Ramey at the N. P. depot informed us that the McCreary family "pooch" Freckles was in considerable difficulty in the river, having slid into the water while playing along the bank or going for a drink.

At any rate there was the "pooch," forelegs spread out on the ice, and hindquarters immersed in the icy water, unable to get out, and "yipping" at the top of her lungs — a doggie "help call."

A large snow shovel belonging to the N. P. section crew was brought into service, sliding it across the ice Roy Ramey held the long handle while Bill McCreary lay on it — and so was able to reach the dog's forelegs and pull it to safety. Meanwhile Ward Helton stood close by with a rope, "just in case."

So cold was the dog when pulled from the water that it experienced considerable difficulty in climbing the bank of the river — but finally made it, got to the print shop and settled down by the stove with a long sigh of content to dry out.

There's an easier way

A Product of Standard of California

How would you like a heating oil that burns without waste... that gives more heat per gallon? Then you'll like Standard Heating Oils! There are no cleaner, more economical heating oils on the market today! Get Standard Stove Oil for circulating heaters... Standard Furnace Oil for furnace-type burners—and get rid of bothersome smoke and soot for good!

Clarkston.

Phil Southwick and Edwin Hanks
were Sunday callers in the Loyd
Farrington home.

This thawing weather and nice
Sun has surely been welcome after
such a long-drawn-out siege of zero
and below weather. Well, maybe it's
the end — let's hope!

LINDEN ITEMS

Mr. and Mrs. Frank Lyons, Clem
Lyons and Mr. and Mrs. Geo. Lyons
attended the Orofino-Kendrick bas-
ketball game at Kendrick Friday
evening at Kendrick.

Frank Lyons and Clem Lyons left
for Monrovia, Calif., Tuesday. Clem
plans to stay until spring and work,
but Frank will return after a visit
with his brother and family.

Mr. and Mrs. Arthur Foster were
callers at the Al. Pederson home
Thursday afternoon.

Mr. and Mrs. Lester Weaver and
Mary Ellen were dinner guests of
Raymond Whybark, Sunday.

Mr. and Mrs. Geo. Lyons drove to
Troy Sunday, to visit her parents.

Monday must have been "Cedar
Ridge Day" in Kendrick. Anyway,
those seen in Kendrick were Mr. and
Mrs. Harley Perryman, Mrs. Pearl
Alexander, Jake Blebold, Mr. and
Mrs. C. A. McAlister, Ken. Pederson
and Mrs. Al. Pederson.

Mr. and Mrs. Arley Allen were
Lewiston visitors on Tuesday.

Mr. and Mrs. Ted Weaver spent
the week-end in Lewiston with her
parents.

Dimes Dance Nets \$60.00

The March of Dimes Dance, given
by the Juliaetta Rebelah lodge at
their hall last Saturday evening net-
ted \$60.00 for the cause.

Johnny Miller and his Sunset
Ramblers Orchestra, donated their
pay for the evening to the March
of Dimes cause, a very fine gesture
on their part.
