

KENDRICK GAZETTE

VOLUME 60

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, MARCH 2, 1950

NO. 9

WHAT HAPPENED HERE TWENTY YEARS AGO

Harold Thomas Buys Hardware — The Kendrick Hardware Store, formerly owned by Walter Thomas, is being moved and on March 1, will pass to his brother, Harold, who will operate it in connection with his implement business — the Inter-national Harvester line. Mr. Dempsey will remain as a store employee.

New Arrivals — Mr. and Mrs. Wm. Thornton of Southwick are the proud parents of a son, born at the St. Joseph's hospital in Lewiston, Feb. 19th.

Home Burns — The farm home of Dave Schoeffler, who resides on Potlatch ridge, was completely destroyed by fire early Tuesday morning. Nothing was saved with the exception of a few articles of clothing.

School Notes — The following students in the fourth grade received 100 in their literature class every day last week: Wanda Johnson, Jean Bigelow, Joe Cardinal, Bill Schultz, Frank Rider, Tom Keene, Frank Abrams, Larry Langdon, James Langdon, Floyd Candler, Walter Frazer and Albert Frazer.

Light Snow — The Kendrick section was visited with a light snow Sunday night, the ground being barely covered. However, by Monday morning those in favor of spring were not discouraged, as it melted rapidly.

Recovered From Injury — Mrs. M. A. Deobald was in town Tuesday for the first time in several weeks. She has just recovered from a bad injury to her left foot which was caused when a pitchfork line placed that member as the fork caught in her shoe in such a manner that she tripped and fell, one of the tines running clear through her shoe and foot. Mrs. Deobald says she was her own doctor and nurse, chore boy and general roust-about during the time she was recuperating. She has been a resident of American ridge for nearly 37 years.

Working On Road — The road between Juliaetta and Arrow Junction has been receiving attention the past week, and it is now said to be in the best condition it has been for a long time. Grading is being done at different points preparatory to putting on a gravel surface, as soon as the roadbed is in condition to receive it. This is good news to those who travel the road between here and Lewiston — and there are many.

Southwick Items — Mr. and Mrs. Elton McCoy were dinner guests in the Wm. Henderson home. . . Mrs. Glenn Betts and daughter Adella and Amy Engle spent Saturday in the C. A. Betts home. . . Sunday guests in the Jack Travis home were Roy Southwick and wife, Dick Winegardner and family, Mrs. Clara Bateman and children, Rev. Groth and George Douglas. . . Harl Whittinger and wife and son James spent Wednesday in the Dave Schoeffler home. . . Mr. and Mrs. Roy Southwick drove to Lewiston Thursday to attend the teachers' and trustees' meeting there, returning Saturday. Mrs. Blewett, who has been visiting her daughter, Mrs. Ben Cook and family, went with them on her way home.

Arnie Cuddy and family and Howard Southwick have moved home, having spent the winter logging at the Farrington Mill.

Crescent Clippings — John Darby was a business visitor in Kendrick Tuesday. . . Word received from Alva Hudson, who was operated on last week, is very favorable.

Cavendish News Items — Walter Silfow and Clarence Hunt were Sunday guests of S. A. Sutton. . . Edward Pearson was a dinner guest of Mitch Blackburn, Monday. . . Mr. and Mrs. Chas. Pitcher were Sunday visitors of Mr. and Mrs. Reece.

Teakane Gossip — We haven't seen any birds yet, but we found some buttercups down on the hill side, and that looks like spring might be near. . . Wm. Groseclose and sons have been sawing wood for the past week. . . Joe Choate has been busy for some time in the timber making cedar posts.

Juliaetta News — About 40 people attended the card party given by the Rebekahs in the I. O. O. F. hall last Thursday evening. High scores for pinochle were won by Alice Cochran and Ernest Guthrie. Mrs. Arnold Behrens and Will Jones of Kendrick won the bridge awards. Lunch was served. . . Mrs. E. V. Adams and son Keith spent the week-end in Moscow with Mr. Adams. . . Mrs. Cecil Gruell and Mrs. Manford Nutt motored to Lewiston last Friday where Mrs. Nutt received medical aid.

Personal Mention — Mrs. L. J. Herres was in Lewiston a few days the first of the week. . . Mrs. Herman Schupfer went to Moscow Wednesday noon, returning that same day. . . Elbert Long, a student at the University of Idaho, spent the week-end here with relatives. . . Walter Thomas of Lewiston was a business visitor here Saturday. . . Miss Stump and Miss Deagen spent Tuesday evening in Juliaetta with friends. . . Mr. and Mrs. Harold Thomas, Mrs. R. H. Ramey and Mrs. Geo. Leith were Lewiston visitors Tuesday.

Potlatch Derby Scheduled — The Kendrick Volunteer Firemen are again going to hold their "Potlatch Derby" — this year on Sunday, April 16, and bills and tickets have been printed for this event.

It was a lot of fun last year — and there is no reason it can't be fun again this year.

Ben P. Cook, who was last year granted the "coffee concession" admits frankly that he "missed the boat" by not taking advantage of it — so we wonder what will happen in that line this year.

Grange Meeting Tuesday — The regular meeting of the Kendrick Grange will be held next Tuesday evening, March 7.

The Home Economics chairman, Mrs. Wm. Johnson, will lead the literary program.

Commercial Club Meeting

The regular monthly meeting of the Kendrick Commercial Club will be held next Wednesday evening, March 8, with the 6:30 dinner being served at the Kendrick Cafe.

Roads, of course, will be a subject of discussion, and it is hoped to have a report of the past special session of the Idaho Legislature from George F. Brocke, Sr., state senator from Latah county.

Remember the place and the date and plan to be there. It doesn't matter whether you are a member or not, you are welcome, and your presence can help to make the meeting a better one.

FARM INSTITUTE PROGRAMS PRINCETON AND KENDRICK

On Monday, March 6, sponsored by the Princeton Grange and the Latah county agent's office, a farm institute is scheduled, with the joint program for men and women being as follows:

The program for the men is as follows:

10:00 a. m. — Crop Varieties and the Importance of Good Seed, E. W. Whitman, Idaho Extension Agronomist.

11:00 a. m. — Control of Clover Insects and Cattle Parasites, R. W. Portman, Idaho Extension Entomologist.

12:00 Noon — Control of Mastitis and Scours of Calves, Dr. L. H. Scribner, Idaho Experiment Station Veterinarian.

1:00 p. m. — Potluck dinner.

2:00 p. m. — General Outlook for Farm Products, Virgil Kennedy, Idaho Extension Agricultural Economist.

For the women the program will be:

10:00 a. m. — Flower Gardens and Landscaping, Prof. Earl New, Dept. of Horticulture, University of Idaho.

11:00 a. m. — Style Trends, New Fabrics, Fabric Finishes, Miss Esther Nystrom, Idaho Extension Clothing Specialist.

There will be no afternoon program for the women.

Kendrick, Wednesday, March 15

Sponsored by the Kendrick Commercial Club, and the Latah and Nez Perce county agents' offices, as a joint undertaking:

For the men the program will be as follows:

10:00 a. m. — Crop Varieties and the Importance of Good Seed, Dr. K. H. Klages, head of Agronomy department, University of Idaho.

11:00 a. m. — Utilization of Forages Produced in Conservation Farming, by D. L. Fourt, head of Dairy department, University of Idaho.

12:00 Noon — Free "Bean Feed" by Kendrick Commercial Club.

1:30 p. m. — What is Agricultural Research?, by Dean D. R. Theophilus of the University of Idaho.

2:00 p. m. — Films.

For the women the program, in the morning only, will be as follows:

10:00 o'clock — Flower Gardens and Landscaping, by Prof. Earl New, Horticultural department, University of Idaho.

11:00 o'clock — "Women's Work in the World Today," Miss Marion Hepworth, Idaho State Home Demonstration leader.

Joint Meeting

It should be noted that the Kendrick meeting is sponsored jointly by the Latah and Nez Perce county agents' offices, as well as by the Kendrick Commercial Club, and all, regardless of residence, are welcome.

Give Your Old License Plates

Boise — Another move to combat the ravages of infantile paralysis was launched by the Idaho State Elks association when they organized a campaign to salvage the out-dated 1948 and 1949 aluminum automobile and truck license plates. These plates have a potential value of \$5,000.00 when used for the purpose of helping some unfortunate child, otherwise they have no material value to any one.

All of the money derived from the sale of these plates, with no expense deductions of any kind, is to be used in connection with the operation of the state Elks Convalescent home.

Collection receptacles have been placed in all Elks lodges, county assessors' offices and all service stations and garages throughout the state and the scheme is that everyone, after they have changed their plates, put their old plates in one of these receptacles so that they may easily be gathered up.

The county assessors' offices are the central collection depots for each county. From there they will be taken to one of the five state depots — Pocatello, Shoshone, Boise, Lewiston or Coeur d'Alene. From the state depots the plates will be transported, free of charge, to the Kaiser Aluminum and Chemical Corporation at Trentwood, Wash., where 12 cents a pound will be paid for them. This price is practically double that of any other bids received — so the entire lot will be delivered to them, plus any other aluminum salvage items that may be donated during the course of the drive.

The deadline for the purchase of 1950 plates is March 31st — so no plates will be removed from the state depots until after this time, but it is earnestly urged that all plates be turned in before this date.

So don't throw those old plates away — donate them to a worthy cause.

KENDRICK TIGERS DEFEAT WEIPPE IN MONDAY PLAY

Orofino, Kendrick, Genesee and Grangeville, four tournament favorites, chalked up a victory each toward the district championship as the second district class B high school basketball tournament whirled into high gear at the Northern Idaho College of Education, Lewiston, on Monday.

Orofino, Kendrick, Genesee and Grangeville teams, all champions of their respective leagues, turned in victories which brought them a step closer to the coveted district title and a berth in the state tournament, which begins in the same gym. on March 8.

Each of the winners held an impressive majority over its opponent. Orofino, defending state class B champions and the tournament favorites, ran up the highest score of the day by trouncing Lapwai 60-26.

Kendrick rolled over Weippe 45-23; Genesee defeated Cottonwood 44-31; and Grangeville dumped Potlatch 51-31.

Tigers Maul Weippe

The Kendrick-Weippe game, second tilt of the afternoon, played at 3:45, was a walk-away for Kendrick, with the Tigers holding the Gorillas to two points in the first frame and one in the third. Weippe rallied in the second and fourth periods, but the 13-2 margin rung up by Kendrick in the first stanza was too great to overcome, and the Gorillas went down to a 45-23 defeat.

The loss of first-string players hurt an otherwise good ball club. Larry Nygaard, Dwain Blenden and Vern Gardner left the Weippe lineup on fouls during the second half.

Luther Parks paced the Tigers with 9 points. Nygaard led Weippe scoring with 8.

Kendrick (45) (23) Weippe
Parks, 9 F. 1 Webster, 7
Fey, 6 F. 8 Nygaard, 8
Halseth, 7 C. 3 Blenden, 7
Clemenhagen, 7 G. 4 Peterson, 7
Ware, 2 G. 0 Smolinski, 2

Kendrick subs: McCreary 4, Smith 4, Walsh, Dammarrell 7, Knight 1.
Weippe subs: Gardner 2, Hanson 2, Allgood, Jackson 2, Davis 2.

Score by quarters:
Kendrick 13 21 29 25
Weippe 2 11 12 43
Officials were Perry Williams and George Tyson.

A paid attendance of more than 800 persons was reported Monday by the tournament ticket sellers. Greatest attendance was during the first afternoon game between Orofino and Lapwai. An estimated 1,000 persons were in the gym, including paid attendance, players and officials.

Tuesday's Games

Top-notch teams of two conferences in the second district met Tuesday as the second round of the school basketball tournament at the N. I. C. E. gym in Lewiston. Orofino humbled Kendrick 38-30 and Genesee defeated Grangeville 42-24. Kendrick won the Valley sub-district tournament and Grangeville emerged on top of the South Prairie contests. Potlatch and Weippe were ushered to the sidelines, Lapwai eliminating Weippe 46-26 and Cottonwood ousted Potlatch 48-38.

Kendrick Loses To Orofino

Orofino pulled away from Kendrick during the third period. The Tigers were but two points behind at the half-time mark, 14-16, and at one time in the second period had a 13-12 lead. The score was knotted several times during the first half, Kendrick scoring the first point.

Charles Brown of Orofino opened the second-half scoring with a field goal and his teammate, John Hutchinson, scored from the floor as the lead. Kendrick kept their score moving steadily, however with three free throws and a field goal by Bou Ware.

The third period ended with Orofino ahead 31-21, and the Maniacs were able to hold at least a 6-point lead despite the threat of losing regulars because of personal fouls. Four Maniacs had four fouls against each of them and Coach Wilbur Montgomery went into a zone defense in an effort to reduce the chances of his players fouling out.

Two of them finally did — Pat Hayes and Jack Williams. But Kendrick also lost Luther Parks and Orville Halseth by the same route — but only in the closing seconds of the game.

Orofino (38) (30) Kendrick
Nygaard 9 F. 7 Parks, 9
Hayes 9 F. 6 Fey, 9
Brown 11 C. 6 Halseth, 11
Williams 4 G. 5 Clemenhagen, 4
Hutchinson 5 G. 5 Ware, 5
Orofino subs: Dammarrell, J. Smith, McCreary.

The score by quarters:
Orofino 8 16 31 38
Kendrick 7 14 21 30
Officials were Bob Williams and Perry Williams.

Announcer Liked Game

The announcer from radio station KRLL was high in his praise of both teams, saying it was by far the best game that had yet been played during this tournament.

Kendrick Meeting Lapwai

As we go to press (Wednesday) Kendrick is meeting Lapwai on the N. I. C. E. gym floor — with the loser eliminated.

Remember — There are no parking meters on Kendrick's streets — and the snow is gone. Local merchants and businessmen welcome you.

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Mr. and Mrs. John Samuels of Lewiston were visiting friends and transacting business in Kendrick last Friday.

Dr. J. H. Coulter attended a church business session in Pomeroy last Friday.

Mr. and Mrs. Orville Trout were Spokane business visitors on Friday, making the trip by train.

Mr. and Mrs. Jack Travis, Mr. and Mrs. Ben Cook, Mr. and Mrs. Ervin Lohman, Mr. and Mrs. Roy Ramey and Mr. and Mrs. Ernest Brammer attended the basketball game in Moscow, Friday evening.

Mr. and Mrs. Werner Brammer are busy moving these days to their home just west of town, occupied for the past several years by Mr. and Mrs. Henry Brammer.

Mrs. Mary McCall of Juliaetta, who has been visiting in Lexington, Oregon, for the past several weeks, has returned to her home in Juliaetta.

Mr. and Mrs. Thomas Brown of Portland, arrived here early Monday morning from Seattle, where they had been called by the illness and passing of his mother, Mrs. Emulus R. Brown.

Dwight M. Goss Troy, Oregon, left Sunday for his work there, after spending some time visiting in the home of his parents, Mr. and Mrs. Lewis D. Goss and family.

Mrs. Elma Scott, Seattle, is here visiting her daughter, Mrs. Everett Fraser and family.

Mr. and Mrs. Bob Fraser accompanied Mr. and Mrs. Everett Fraser to Lewiston, Monday.

Mr. and Mrs. Herman Hartung and family of Clarkston were Sunday dinner guests of Mr. and Mrs. Walter McCall.

Walter McCall, Sr., has received word from his uncle, Harry Hechtner of Walla Walla, saying he and his wife had been in a head-on car collision last week, and that Mrs. Hechtner had been injured, but not seriously.

Mr. and Mrs. Jack Travis visited Sunday in the Earl Rayment home at Gold Hill.

Mr. and Mrs. Irvin Halseth and baby of Craigmont were callers in the R. L. Blewett home Saturday.

Mr. and Mrs. Geo. Havens and sons drove to Moscow, Saturday, where they were dinner guests in the Ira Havens home. The dinner honored George Havens' birthday anniversary.

Teddy Havens, son of Mr. and Mrs. Geo. Havens, has been quite ill this week with tonsillitis.

Mr. and Mrs. Tom Greene of Lewiston were guests of her parents, Mr. and Mrs. Walter Benscoter, over the week-end.

Mrs. Wade Keene is spending several days this week visiting her sister, Mrs. Rance Oglsby, in Lewiston.

Mr. and Mrs. Howard Rukgaber of Seattle, accompanied by June Brown, arrived here Monday night for the funeral services of their mother, Mrs. E. R. Brown.

Mrs. George Brocke, Jr., went to Kellogg over the week-end to visit her aunt, Mrs. Cleo Schoeffler.

Mrs. George Brocke, Sr., took the bus for Boise last Friday, where she spent the week-end with her husband. They returned Monday together, the special session of the legislature being over.

Mrs. Clifford Davidson returned Tuesday from Spokane, where she had been visiting her daughter, Mrs. Ray Hathaway and family. Her granddaughter, Carolyn, returned with her for an indefinite stay.

March Of Dimes Drive Over

The March of Dimes Drive came to a close February 16, with Kendrick, Juliaetta and surrounding communities contributing \$405.50 to the Latah County fund. This amount is slightly less than that contributed last year, there being \$427.18 raised in 1949. The difference probably was due to the extremely cold weather during most of the campaign.

Those making the larger contributions were:
Kendrick Grange \$131.00
Kendrick Theatre 55.00
Juliaetta Rebekahs 60.00
Schools 62.97
Numerous smaller gifts 96.53

Total \$405.50
All persons contributing to this fund in any way — we wish to thank. The money you gave will be used for curing some unfortunate person who has contracted infantile paralysis. — Jasper L. Nutting, Local Drive Chairman.

Picture In Seattle Times

Word was received here this week that Jack Easterbrook, little son of Mrs. Bonnie Easterbrook, who is in the Orthopedic Hospital at Seattle, receiving treatment, was chosen from all the patients there (about 300) to have his picture taken, a picture which will appear on posters and in the Seattle Times.

Jack's winning personality and wistful smile won for him the honor of a trip down town, where his picture was taken, which launched the Crippled Children's Drive for funds.

The Easterbrook family lived here for several years, and all their friends will be happy to hear that Jack can still smile, even though his legs are in casts.

He is said to be improving steadily.

How Much Is Seasonal?

In an analysis of present business trends in this country, Nation's Business says: "Peaks attained in 1949 are not likely to be duplicated in 1950, but trade and industry have shaken down to more realistic levels. When allowance is made for the seasonal, declines are not too great."

Snow Piles Melting Fast

The huge piles of ice and snow thrown up by bulldozers and patrols in the cleaning of Kendrick's streets, are rapidly disappearing, and as the dirty ice disappears, it gradually brings to light the winter's accumulation of junk — chief of which seems to consist of discarded beer and whiskey bottles, tree limbs from the Christmas decorations that once lined the streets, plus all the other accumulations of winter.

Well, everyone is tired of the snow and ice, and the few remaining piles are far from pretty to look at — so, the sooner it goes the better.

MRS. EMULUS BROWN CALLED BY DEATH AT SEATTLE

Mrs. Beattie Bernadine Brown, 53, wife of Emulus R. Brown, passed away in Seattle last Saturday evening, February 25, at 7:08 o'clock. She had been gravely ill for several months, being in Seattle since last September for specialized medical treatment, spending part of the time in hospitals and at the home of her daughter, Mrs. Howard Rukgaber and family.

Mrs. Brown was a daughter of the late Mr. and Mrs. George Brown of Southwick, where she born Feb. 5, 1897. She was united in marriage to Emulus Roy Brown on July 7, 1915, at Cameron, Idaho, and to this union were born six children, all of whom, with the husband, survive. They are: Mrs. Howard Rukgaber, Seattle; Mrs. Edgar Bortner, Palo Alto, Calif.; June Brown, student at the Northern Idaho College of Education, Lewiston; three sons, Jerry Brown, Kendrick, Thomas Brown of Seattle and Clarence Brown.

She also leaves to mourn their loss seven sisters and two brothers: Mrs. Earl Atkins, Lewiston, Ida.; Mrs. Frank Dygert, Clarkston, Wn.; Mrs. Fred Sapp, Weiser, Ida.; Mrs. Guy Walston, Yakima, Wash.; Mrs. Jessie Piplinger, Canada; Mrs. Jack Tempero, Palouse, Wn., and Mrs. Dallas Hepler, Southwick; Ed. Brown, of Kendrick, and Fred Brown of Los Angeles, Calif. One grand child also survives.

Mrs. Brown's body was brought to Moscow, Monday.

Funeral services will be held this afternoon (Thursday, March 2, from the Community Church, with interment in Normal Hill cemetery, Lewiston.

Many Trees Ordered

Idaho's farm families have ordered more than 118,000 trees from the university nursery this spring, according to records at the office of Vernon Burlison, extension forester, Moscow.

"Black locust lead the demand again this year as it usually does," Burlison said. "We had orders for some 42,000 of those. The next in demand was Russian olive with more than 15,000 ordered. Blue spruce came next with a few over 10,000, and orders for the others from that on down to 1,200 for lodge pole pine."

March 1st was the deadline for ordering. Trucks will deliver most of the trees to county agents' offices this spring as in the past. The nursery will begin filling the orders in April for delivery at planting time.

Entertain Pinochle Club

Mr. and Mrs. Ben Westendahl entertained the Pinochle Club in their home Sunday evening. High scores went to Wm. Johnson and Mrs. Floyd Millard; low for the women to Mrs. Tom Keene, with Floyd Millard and Walter Brocke in a tie for low for men. Tom Keene was followed home by the "galloping goose."

During the course of the play Wm. Johnson held 1,500 pinochle. Delightful refreshments were served by the hostess at the close of play.

Mr. and Mrs. Wm. Johnson were invited guests.

Local Students Honored

U. of I., Moscow — William A. Deobald, Kendrick, was a graduate of the school of business at this institution at the end of the first semester.

Gay Deobald, Kendrick, is in a class of University of Idaho home economics students who are living in the Home Management house as part of their practical training. Miss Deobald was in charge of refreshments at a tea given in honor of Founders' Day by Phi Upsilon Omicron, national home economics honorary at the university.

Gordon Cook, son of Mr. and Mrs. Ben P. Cook, Kendrick, has been elected intramural manager at Chrisman hall at the university.

First Buttercup

To Gertrude Onstott, daughter of Mr. and Mrs. Manning Onstott, goes the honor of finding the first buttercup of which we have heard, this spring. She brought a fully opened one into the Gazette office Saturday afternoon, and it was a nice big one, too.

She also reported that at their home two strawberry blossoms had been found.

At the Don Miller home snowdrops and crocus may be seen in full bloom — so there is a possibility that spring may be here.

Red Cross Drive March 1

Mrs. H. C. Schupfer, local drive chairman for the American Red Cross, announces that that drive is now underway. Letters of solicitation have been sent out, and gifts may be mailed direct to Moscow if desired.

However, solicitors will make personal calls locally.

The local quota has been set at \$225.00.

RAINS AND SUN RIP SNOW; ROAD CONDITIONS POOR

The steady rains of Wednesday and Thursday, plus wind and sunshine, have gone a long way toward removing all signs of winter from the Potlatch canyon — although these same rains and wind brought their problems.

The steady 24-hour rain of Wednesday, plus that of Thursday morning brought Potlatch creek awake with a bang, and the stream is estimated to have risen some four feet, bringing with it drift wood, rubbish, and even a few saw logs, but still lacking considerable of being at flood stage.

In the west part of town Brady Gulch came to life, pouring thousands of gallons of water down that draw and from the adjoining hillsides, to form a miniature lake, that threatened for a time to inundate the Earl Daniels home, as well as those of Mr. and Mrs. Wm. Johnson, Mr. and Mrs. John Darby and Mr. and Mrs. E. McDowell. The A. W. Jones home stands on slightly higher ground.

Again it was the old story of a lake and a sea of mud for motorists to drive through, the F. H. DeAtley Co., who hold the contract for the building of the new road section, having closed the state-dug drain ditch during construction work, as well as the end of the 18-inch city drain tile, which prevented any runoff.

By Thursday evening the detour as well as the new section of road that was in use, was a jumble of slime and rocks, and by Friday "getting stuck" in the mess was a very common occurrence.

By Saturday, a bulldozer was in steady use pushing and pulling cars through the mess — to the accompaniment of smashed pans and fly-wheel housings, wet car interiors, and brakes so full of slime that they refused to operate — and so far as we know, the big Kendrick Auto Freight truck was the last vehicle to come through the mess Saturday night — and then on the end of a tow chain behind a bulldozer.

Sunday, a large sign was put up informing the public that the road was closed — although some ventured the trip, rather than make the long drag across the point of American ridge or up Sperry grade and down the Juliaetta grade.

The F. H. DeAtley Co. almost lost their big "breaker" portion of their rock crusher when the creek rose — as well as a very fine diesel engine power plant. They had these pieces of equipment on a "set" at the edge of the Potlatch — and as that river rose, it undermined the machinery and tipped it over on its side. The company rescued it Friday and Saturday, but the diesel must go to Spokane for a complete overhauling before it can again be put into use. In the meantime, we understand, a new crusher "set" will be made in Brady gulch.

Just now, several trucks and a power shovel are being used by the company in an effort to make fills that will reach bottom and again enable local residents to use the road. Many truck-loads of crushed rock from the company stockpile were dumped on the slimy, soupy new fill, and simply "vanished." As a result school busses were forced to take their loads as far as the W. W. Eldridge home, where the children took to the railroad track and walked to the Werner Brammer home, where they were met by busses from the other side, loaded and taken to the Juliaetta school, the same system being used in transporting high school students from Juliaetta to Kendrick.

The American ridge road, catching heavy traffic as a result of this road closure, was soon cut almost into impassibility, as it is very soft, the frost having just left in some sections.

We understand the F. H. DeAtley Co. wished this construction work as a "winter job" — and from all appearance, they have just that — plus several real headaches that aspirin might not help.

We are far from being road builders, any of us here in Kendrick, but it seems to everyone that rock — of which there are almost countless tons and yards readily available, would have made a much better fill than the dirt that was used — and the road could have been traveled, even though rough.

As the situation stood over the week-end and on Monday, protests on the situation had been filed by the village, by the school district, and by many car owners, not to mention residents of the west end of town.

Tuesday morning, following the application of many yards of creek rock and crushed gravel, the section was again passable, but care is advised!!

Improvements In Store

The Abrams Hardware has been receiving a thorough going over the past couple of weeks, with new paint and calamine, a whole section of new glass-backed shelving for display, and re-arrangement of the entire interior of the store taking place.

STONY POINT NEWS

Mr. and Mrs. Lawrence Heimgartner and family of Kendrick were supper guests Friday of Mr. and Mrs. Eldon Heimgartner.

Sunday dinner guests of Mr. and Mrs. Eldon Heimgartner were Mr. and Mrs. Sam Gruell, Mr. and Mrs. Don Gruell and Mr. and Mrs. Cecil Gruell, all of Juliaetta.

Mr. and Mrs. Floyd Heimgartner and Mr. and Mrs. Alvin Steigers were Sunday guests of Mr. and Mrs. Albert Heimgartner.

Mr. and Mrs. Billy Steigers finished moving their household goods to their new home near Gifford, Monday.

Mr. and Mrs. Loren Hoisington plan to occupy the house belonging to William Steigers, as soon as they can move in.

Mr. and Mrs. Geo. Coffland were Sunday visitors of Mr. and Mrs. Ernest Steigers.

Mrs. Almeda Deane, who has been staying with her daughter, Mrs. Ernest Steigers, went home Sunday afternoon.

High water running in Pine creek is undermining Lloyd Brown's barn in spite of all efforts to control it. Ernest Steigers suffered a painful bruise on his head when a support placed underneath the barn slipped and struck him.

Marilyn ZumHofe and Kenneth Steigers are out of school, due to illness.

Mr. and Mrs. Wayne Heimgartner and Harold arrived home from a two-month visit in California, Saturday night.

JULIAETTA NEWS

Mrs. E. A. Kirkpatrick and Nellie Biddison returned from Spokane on Thursday, where Mrs. Biddison underwent minor surgery at St. Lukes' hospital.

Mrs. Dave Harvey of Lewiston, who had been staying with Hazel Talbot during Mrs. Biddison's absence, returned to her home on Sunday.

Mr. and Mrs. Gordon Swears and daughter Beverly and Mrs. E. A. Kirkpatrick were Lewiston shoppers on Monday.

Visitors at the Nellie Biddison home on Sunday were Dave Harvey and daughter Carrol, and Mrs. Floyd Harvey and daughter Janie, all of Lewiston.

Mr. and Mrs. Ted Taylor and family of Fullman were week-end guests at the Laura Groseclose home.

Mrs. E. O. McAllister went to Albion, Wash., Friday evening, to be with her mother, who is very ill. She is 97 years old.

KEEN INTEREST SHOWN IN STATE GOVERNMENT

Twin Falls — Interest in Idaho state government by citizens in all walks of life has not been so keen in many years as it is now according to reports reaching the Idaho State Chamber of Commerce, H. A. Eloonk, president, declares.

"Members of the special session of the Idaho legislature have stated that they had more constructive suggestions from the voters of the state during the past special session than during the regular session," Eloonk said.

Much of the credit for this heightened interest in government is given to the series of meetings held in all sections of the state, for the purpose of discussing reports of the interim committees on re-organization of the state government and on highways.

"Our organization is proud of the leadership shown by local chambers of commerce throughout the state," Eloonk said. "In almost every section of Idaho meetings were held to which members of the legislature, merchants, professional men and farmers were invited. In many cases this was handled by special committees set up to study the interlun reports and in other cases, regular committees of the local chambers of commerce assigned to study legislative matters conducted the meetings.

Many questions raised by the interim committees are still unanswered and there remains a great deal of study and analysis to be carried on before the regular session in January.

"There is a growing tendency in congress to give attention to the suggestion that the states are now financially able to handle a great many activities carried on by the federal government. This makes it even more important that our citizens familiarize themselves with the details of state government; its taxing problems and the need for administrative efficiency in all branches. There is no more important task for local chambers of commerce than this, because development will be encouraged by low taxes and good government.

About Our Game Department

Most everyone has read of the investigations of the state purchasing department, liquor department, etc., during the recent special session of the Idaho Legislature, but in our opinion they overlooked one department that really needed such an investigation — the Idaho State Fish and Game department.

Mrs. Laura Albright, Nez Perce County Representative, evidently concurs in this belief, for we are in receipt of a copy of the "Idaho Outdoorsman," in which Mrs. Albright marked a number of passages, among them:

"Fewer Elk Taken In Lochsa Area — "At the close of the big game hunting season in the upper Lochsa river area, the check station records at Lolo Pass-Powell ranger district showed that 967 hunters had entered the area.

"A total of 304 elk were killed and checked out. Of these 160 were cows and 144 bulls. This kill represents a hunter success of 31 percent. Two black bear were checked out.

"During the 1946 season 1895 hunters were 50 percent successful in the area. In 1947, 1620 hunters were 50 percent successful. In 1948, 1965 hunters were 36 percent successful. The following section carries more light onto the big game hunting report:

"Gig Game Losses — "In part the committee report on big game losses

reads as follows: 'According to department statistics, areas of artificial feeding showed greater proportionate loss than area not fed.' The report also stated that big game losses for 1948 were 'unobtainable' and that 'future census may shed more light on the subject.'

"This section of the committee report deserves a little thought, and when analyzed revealed some interesting points well worth considering.

"Game Department Feeding Methods — I am sure many of our readers can remember the almost constant stream of publicity that came out through the press last winter telling us that Mr. Murray felt that feeding in such and such an area or locality was not yet needed for the game seemed to be in good condition and were not showing any signs of starvation.

One of the main reasons why the game department's feeding program was not more successful in many instances was due to the fact that such feeding was held up until too late. The animals were actually suffering from starvation by the time the feeding began. Under such conditions big game will not benefit from the feed and the death rate is bound to be high."

"Private Feeding — On the other hand, many deer and elk that were fed by private individuals suffered light or no loss. In such instances, the feeding began before the animals showed any signs of starvation."

And so goes on the report by Ted Trueblood. In other editions we expect to make further use of this information, for we know that almost without exception, sportsmen in this area are bitterly opposed to many actions by our fish and game department.

To Make Use Of Gift Farm

U. of I., Moscow — Production of foundation seed stocks of potatoes and grain, fertilizer studies on 57 weeds, range re-seeding and parasite control of goatweed constitutes the program for the Jacob Monson farm in Idaho county, announces Dr. J. E. Kraus, research director for the University of Idaho agricultural experiment station.

Upon his death in January, 1947, Mr. Monson bequeathed his 440-acre farm near Winona, 140 acres of tillable land and about 300 acres of pasture, to the college of agriculture for use beneficial to the farmers and stock raisers of that section.

"Our program for the Monson farm represents experimentation on a regular farming basis in cooperation with a resident operator," Dr. Kraus explains. Operating the Monson farm on a lease is George Turner, formerly with the forest service.

"The university is fortunate in having him on the farm," states Dean D. R. Theophilus of the university agricultural division. "He is a fine co-operator, very much interested in the problems being worked out at the farm."

W. S. C. S. Friday

The Kendrick W. S. C. S. will meet Friday afternoon at 2:00 p. m. in the home of Mrs. Forrest Wetterow. Assisting hostesses are Mrs. J. G. Travis and Mrs. Kenneth Brocke.

Mrs. Howard Hoffman has charge of the program, the subject being: "Christian Advance in Japan."

The ladies of the community are cordially invited to attend. The study group will meet at 12:30 prior to the above meeting.

Bottled Cola, Orange, Upper Ten Sparkling Water and Ginger Ale in quarts is available at Blewett's Grocery-Market. 1-adv

N-O-T-I-C-E!

A New Policy Will Go Into Effect Feb. 1, 1950

There are a number of customers who have abused and ruined our system of credit. Therefore, A 30-DAY CASH BASIS has been forced upon us. If you are paid up, your credit is A-1. If not, we can not extend further credit to you.

We will extend our DUE ACCOUNTS UNTIL MARCH 1st — after that we must take action!

The machinery, parts, tires, etc., were sold to you as cheaply as possible. Our margin of profit is small — therefore we MUST HAVE OUR MONEY. Our business is not operated like some — we do not make the customer who pays — pay for those who do not.

This organization, The Kendrick Bean Growers, belongs to the farmers. The Board of Directors is only doing what is essential for sound business.

Forest Fire Damage Cut By 'Keep Green' Program

Citizens of the state of Washington are organized to prevent any repetition of forest holocausts like that which occurred in the state in 1902 causing millions of dollars worth of damage.

In eight years this public spirited group operating under the banner "Keep Washington Green" has worked wonders in helping to reduce the number of forest fires, acreage burned, and resulting dollar loss to the state.

Gov. Arthur B. Langlie of Washington in a speech before the annual meeting of the Keep Green group pointed out that in 1941 a total of 1,446 man-caused forest fires burned 46,000 acres. Last year, he said, less than 500 fires, including those caused by lightning, burned a little more than 6,000 acres.

He gave credit to all the forest protection forces in the state working to prevent and suppress timber fires, but particularly stressed the splendid work the state and local organizations of Keep Washington Green has been doing in educating the public on forest fire prevention.

The Keep Green program idea was launched in 1941 in Washington to enlist citizens' support in reducing the state's forest fire damage. Since then it has spread to 25 other states under banners of Keep Florida Green, Keep Maine Green, etc. The program is sponsored nationally by American Forest Products Industries, an organization supported by the lumber, pulp and paper, and plywood industries.

Do not Blame the Shipper For Poor Quality Potatoes

If potatoes found on the retail market are of poor quality, the fault is probably centered around the conditions under which they were grown and harvested. The tubers suffer very little from the handling they receive in transit and merchandising, investigations conducted by W. A. Lee and M. J. Caraccia, agricultural economists of the Pennsylvania agricultural experiment station, indicate.

Numerous inspections were made last fall of potatoes originating in nearby counties and destined for the Philadelphia markets. Eighty-five lots inspected at shipping points averaged 5 per cent grade defects; 121 lots in wholesale warehouses, 5.6 per cent; and 138 lots in retail stores, 5.8 per cent. External defects of these potatoes ranged from 93 to nearly 100 per cent of total defects. Old cuts, bruises and sunburn accounted for almost three-fourths of all defects.

In a midwinter investigation conducted in Philadelphia stores a year ago 1,242 lots were inspected, which averaged 14 per cent external defects. These potatoes originated in various parts of the United States and only 20 lots had no external defects. Only 3 per cent of the external defects consisted of new cuts and bruises.

Our Weight on Moon

How much would a person who weighs 200 pounds on the earth weigh on the moon and other planets? He would weigh about 33 pounds on the moon, 58 pounds on Mercury, 172 pounds on Venus, 74 pounds on Mars, 528 pounds on Jupiter and 234 pounds on Saturn, while at the surface of the sun his weight would be about 5580 pounds. This depends both upon the mass of the planet and its size. Jupiter, for example, is about 318 times as massive as the earth but the surface of Jupiter is about 11 times as far from the center as we are from the center of the Earth. This reduces the net effect, so that the force of gravity on Jupiter is only about 2.64 times that which we experience.

It's No "Cow Town"

Long famous for its livestock and meat packing industries, Fort Worth, Tex., continues to be the largest livestock market and packing center in the South, and now is the largest sheep market in the nation. It also claims an industry of the imminent present—the most important military aircraft production in the world. It has the world's largest aircraft factory, Consolidated-Vultee, and is also the headquarters of Convair. Adjacent to Convair is Maj. Gen. Roger M. Ramo's Eighth air force. This air force, employing the giant B-36 superbomber, is the only atomic bombing military organization in the world.

"Air-Conditioned Capital"

Phoenix calls itself the "air conditioned capital of the world"—and with justification. All homes, restaurants, office buildings, theaters, hotels and motor courts are cooled by refrigeration or air conditioning, assuring complete comfort at all times. Motorists traveling over state highway 87 and those on U. S. highway 80 and 89 certainly should pause to visit the Casa Grande national monument, located only a few miles from the town of Coolidge. Those funneling into the state from the east on U. S. highway 60 pass through the very heart of the Fort Apache Indian reservation, offering sights seen nowhere else.

10 Rules for Foot Health To Improve Nation's Feet

The Ten Basic Rules for Foot Health, which have been accepted as the official rules of the U. S. post office department, and which are being widely used in industry, are:

1. Wash Frequently! Bathe your feet once or twice a day, dry them thoroughly and use foot powder afterward.
 2. Change Often! Never wear the same pair of shoes two days in succession, and change socks or stockings once or twice a day.
 3. Trim Right! Cut your toenails straight across and not shorter than the flesh.
 4. Wear Right! Wear all-leather shoes, both soles and uppers, and pick the right shoe for the right occasion.
 5. Fit Right! Be sure you have the proper size of shoe, and the proper size of sock or stocking (half-inch longer than the longest toe.)
 6. Exercise! Limber up your feet at intervals—they have muscles too, remember. Wiggle your toes!
 7. Keep Dry! Don't needlessly get your feet wet and don't let them stay wet from perspiration.
 8. Walk Right! Cultivate good posture and give your feet proper support with all-leather shoes.
 9. Don't Neglect! Examine your own and your children's feet at frequent intervals to guard against ailments.
 10. Take Care! Don't be a "bathroom surgeon." If your feet need attention, consult a qualified chiropodist or podiatrist.
- These rules have been compiled by the National Foot Health Council.

Chicken Tuberculosis Test Described by Veterinarian

A new test to detect tuberculosis in chickens was described at the American Veterinary Medical association's national convention at Detroit.

Developed to provide a quick means of determining if chickens are infected with the disease, the new test makes use of a drop of the bird's blood.

Added to this drop of blood is a drop of an antigen prepared from tuberculosis germs. An antigen is a bacterial suspension or extract used in the diagnosis of infectious diseases.

If the bird is infected, a substance precipitates from the drop of chicken blood. If not, nothing happens.

The veterinarians doing the research work, Dr. A. G. Karlson and Dr. W. H. Feldman, both of the Mayo foundation's division of experimental medicine, and Dr. M. R. Zinober of the U. S. bureau of animal industry, found that the test showed positive in all cases where the regular—and slower—tuberculin test showed positive.

In addition, the new test gave a positive reaction on some birds which the tuberculin test indicated were not infected. Most of these chickens were found to have the disease, despite negative findings of the older tuberculin test.

The veterinarians recommended further study of the new test before it is put into general use.

Use for Shirt Boards

Shirt boards, those cardboard backing sheets used by laundries to protect shirts from the time they leave the laundry until they are stored away in dresser drawers by the housewife, have many uses in the home. Just pass them out to the youngsters some rainy afternoon along with pencils, rainbow-colored chalks and crayons, and let them scribble and draw on this easy-to-handle drawing board. If they want to dabble in water colors, this board will absorb more water than paper will. Children can make their own jigsaw puzzles, merely by pasting pictures on the discarded shirt board, cutting it up, and fitting the pieces together again. The board provides a backing for cut-out dolls or pictures of animals and can also be used for scrapbook covers.

Nation of Hunters

Seventeen million shooters! That is the amazing approximate number who use firearms for sport annually in the United States. These figures are revealed by the Remington Arms Company, Inc., Bridgeport, Conn., and were obtained from a hunting and shooting study recently made for Remington by the Psychological corporation, headed by Dr. Henry Link. The totals were reached through an analysis of 4,562 actual interviews with men and boys in 157 cities, towns and rural areas in fourteen states. The survey was made at the beginning of the 1948 hunting season.

Popular National Shrine

Although the term national shrine is often thought of in terms of considerable age, one of the most popular historic sites is among the newest. Franklin Roosevelt's birthplace and life-long home at Hyde Park attracts greater numbers of visitors than Mt. Vernon, or most other national historic sites and is becoming increasingly popular. Situated on the Hudson river, within a few hours of New York City, Hyde Park has become a mecca for tourists from all parts of the world.

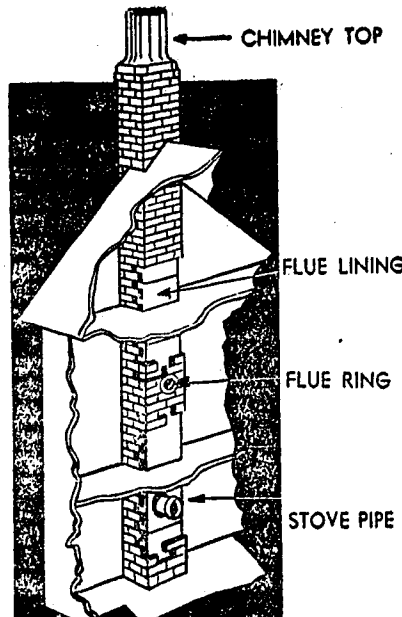

Danger of Fires Worse on Farms Suggestions Advanced For Preventing Blaze

Of an estimated fire loss of 11,000 lives and nearly 700 million dollars in property and resources indicated for the year 1949, a great percentage of these losses will be made up of fires on the farm.

Because of lack of fire protection or adequate fire-fighting facilities, farm fires in almost every case are the most disastrous, because of the almost inevitable complete loss which results.

Already the national board of fire underwriters has reported property destruction from fire in the amount of 398 million dollars, 8.9 per cent below the same period for 1948. But even if a downward trend should continue for the remainder

of 1949, this year's losses would approach the 1948 all-time high of more than 711 million dollars.

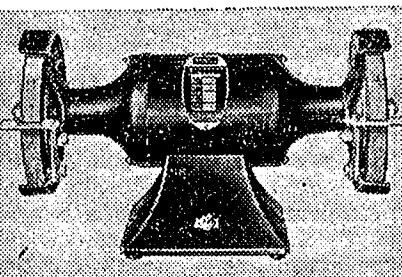

These figures mark 1948-49 as the most disastrous period in a decade that has recorded five billion dollars in fire destruction. Between 1940 and 1948, fire loss soared 132 per cent.

As the "prime cause" of most of the 800,000 fires annually, the Board lists "plain carelessness and misuse of heating and lighting equipment." The leading single cause of fire is careless smoking and use of catches, accounting for 16.68 per cent of the total destruction. However, over the past ten years, the combination of defective chimneys and flues, stoves, furnaces, boilers and their pipes, and sparks on roofs has been responsible for 20.47 per cent of all fires reported.

Proper safeguards in installation and maintenance of heating equipment, chimneys and flues, safety officials say, will prevent fires of this type. Many communities already protect their citizens with ordinances requiring the installation of flue linings in all new chimneys. One effective means of fireproofing chimneys involves the use of clay flue lining which forms a single, continuous noninflammable unit inside chimneys of all types. The indestructible clay lining prevents weather, heat and corrosive smoke and gases from eating away the mortar between the bricks of the chimney. This eliminates the danger of flames reaching combustible materials through cracks between the bricks.

Authorities urge homeowners to make a careful inspection of chimneys and heating equipment.

New Bench Grinder

This new bench grinder for farm, home and shop incorporates several outstanding features not usually found in a low-priced grinder. Manufactured by Electro Machines, Inc., Cedarburg, Wis., this grinder is designed to provide ample working areas in front of the motor frame and in the space between the frame and the inside of the grinder wheels.

Wheel guards are removable for easy attachment of buffing wheels and other grinder accessories. It is equipped with lifetime lubricated ball bearing for long, trouble-free service. All hardware is cadmium plated.

U.S. Agricultural Unit Helped Penicillin Use

Although the U.S. department of agriculture did not make the discovery of penicillin, its work made it practical to produce the antibiotic commercially. They discovered a new and more productive strain of the penicillin mold. Also as a part of their war research work they developed methods of feeding the mold and separating and purifying the product. A major contribution in itself.

A Third Party

The talk about labor forming a what of a set-back recently when a poll conducted among workers by a third political party received some prominent research corporation revealed that only 10 per cent of them favor such a move, while 47 per cent think labor should stay out of politics altogether. One-third favored labor working with the present political parties and the balance had no opinion.

Actually, the probability of labor setting out politely on its own is not nearly so great as union leaders would like to have Washington believe. But the results of this recent rank and file opinion on the matter take a good deal of the steam out of their veiled threats to set up a third political party.

While this survey shows that the mass of workers do not support some of the important views of their leaders, this fact was already pretty much in evidence. For instance, when Philip Murray so bitterly attacked

President Truman's fact-finding proposal, a poll of workers indicated that 70 per cent of them favored the plan.

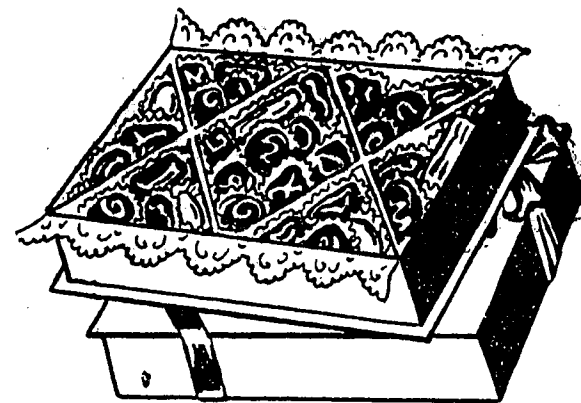

Well, it shows that the American working man is doing a good deal of thinking for himself. And that is as it should be.

AN INVITATION TO ALL WHO FARM: You're Cordially Invited to Attend...

JOIN DEERE "CATERPILLAR" DAY

THURSDAY, MARCH 9TH, 1950

IN COOPERATION with both John Deere and Caterpillar Tractor Co., we have arranged a big day—full of entertainment, refreshment and profit. Plenty of variety, that ranges from a movie on Western power-farming history, to a sparkling production on new tillage and cultivating equipment for western conditions.

Dollar-making farming ideas, like modern implement hitching, saving upkeep money, applying profitable new methods will be yours to take—and use. Equipment that fits this area will be on display, for you to look over. And your friends and neighbors will be here, so you can have some good visits.

Be here, for sure. We'll guarantee you'll be glad you did.

What Is Your Choice?

Socialism versus capitalism has become the biggest peace-time issue in this country. And yet voters have never had an opportunity at the polls to express a clear-cut preference. Everyone appears to be against socialism, European style. At the same time its physical manifestations here in our own land is steadily growing.

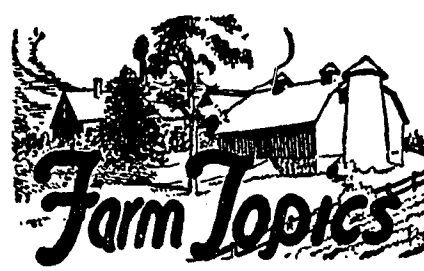

After reading carefully the following definitions taken from Webster's New International Dictionary, Second Edition, answer the questionnaire which follows:

Socialism: A political and economic theory of social organization based on collective or government ownership of the essential means for the production and distribution of goods.

Capitalism: An economic system in which capital and capitalists play the principal part; specif., the established economic ownership of land and natural wealth, the production, distribution and exchange of goods, the employment and reward of human labor, and the extension, organization and operation of the system itself, are entrusted to, and affected by, private enterprise and control under competitive conditions.

Questionnaire:

1. Do you favor socialism? Do you favor capitalism?
 2. Are existing proposals for all inclusive Federal social security on the British "welfare state" pattern socialistic?
 3. Are proposed Federal compulsory health measures socialistic?
 4. Do you believe socialism and representative government can exist together?
 5. Do you believe government can be economic boss and the people still preserve their religious and political freedom?
 6. Do you think a free press, free speech and socialism are compatible?
 7. Are regional Federal projects such as the Tennessee Valley Authority indicative of a trend toward socialism?
 8. Do you consider public ownership and operation of basic enterprise such as the electric industry socialistic?
 9. Do you feel that your personal liberty would be endangered if the business or profession in which you are engaged was taken over by government?
- Ponder the above well. A bit of deep thinking now may save you regretful voting later.

Corn Cribs Ease Storage Problem

Temporary Types Serve In Many Farm Areas

Much of the 1948 corn crop is still on the farm, filling many of the storage buildings which should be used for the 1949 crop.

Temporary or semi-permanent storage buildings are the answer if you lack space or money to build permanent cribs. These temporary-type cribs in some cases are good enough to meet requirements for government loans.

Here are some tips on building good, strong temporary cribs, as suggested by Successful Farming magazine:

1. Locate the crib on a well-drained site with exposure to prevailing winds.
2. Put a floor under the corn to

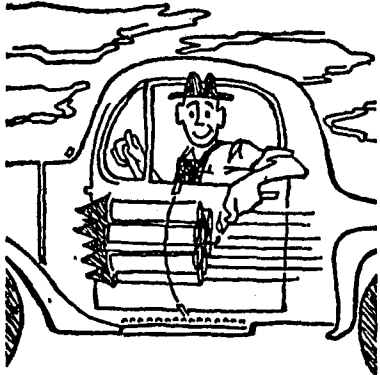

Correct attention to proper corn storing methods will help assure the farmer of excellent sow-and-litter results such as are pictured here.

keep it off the ground. A heavy, waterproof paper or roll roofing might be sufficient on high, well-drained soil. A strong, level floor, six to 12 inches above the ground, protects the corn against soil moisture, permits ventilation and discourages rodents.

Masonry blocks laid face down form a good foundation for the plank floor of a temporary crib. Rails, ties, logs or heavy timbers can be used instead of concrete blocks. If two-inch flooring is used, supports should not be more than four feet apart if the corn is to be 10 to 12 feet deep. If one-inch flooring is used, the supports should not be more than 24 inches apart. Floor planks should be placed one inch apart if you want a slatted floor for ventilation or artificial drying.

3. Make the crib sides vertical and build them so they will stay vertical. Be sure the sides are strong enough to withstand the pressure of the corn. Use rigid braces for the sidewalls and ends.
4. Make crib sides with at least 20 per cent of the wall area open for ventilation to speed up the corn drying process.
5. Put a roof over the corn that will withstand water and wind.

Moisture Needs of Trees, Plants, Shrubs, Explained

Every tree around your home needs 100 gallons or more of water per day, because that is the approximate amount that is evaporated from the leaves.

Many people water plants only by the sprinkling of a hose. After a few moments the ground looks wet but it is only on the surface. An inch below, the ground will probably be bone dry, as anyone would find if the soil is turned over with a spade or trowel.

It is the moisture farther down in the soil that gives the real benefit to shrubs, trees, and other plants, according to the American Association of Nurserymen.

If there are no local restrictions against using a garden hose during drought periods, the nozzle of the hose should be taken off and the water should be allowed to run in around the plant slowly long enough really to get down to the roots. This is especially true of shrubs and trees which have been planted recently and haven't had time to develop a large, strong network of roots.

To save both water and work the use of mulches is important after watering. In addition to prepared mulches, one simple mulch which can be used consists of grass clippings. An inch of sawdust provides another good mulch. Peat-moss is one of the more popular mulches.

Few people realize the enormous amount of moisture which plants need. The water is absorbed by the roots, is lifted up through the trunk and branches of a tree, then through the leaves, and finally is evaporated out into the air.

Better Acoustics for Home To Be Demanded by Public

In 20 years your radio cabinet probably will be about as obsolete as a wood-burning cook stove, according to Dr. Howard C. Hardy, supervisor of acoustics and vibrations research at Armour Research Foundation of Illinois Institute of Technology.

Dr. Hardy believes that radio sound systems will be built into the walls of houses within the near future and will become as much a part of any building as plumbing and electrical wiring.

"People are beginning to demand better sound reproduction and better acoustics in their homes," Dr. Hardy said. Architects, construction engineers, and the public in general are becoming increasingly aware that sound and sound reproduction are as important considerations in construction as are the other utilities. Radios, phonographs, and television units are becoming as essential in a home as a refrigerator.

Dr. Hardy, one of the nation's leading authorities on sound in general and acoustics in particular, believes that better sound reproduction and acoustics are not now common in American homes and other structures simply because the public hasn't demanded them. "And the public hasn't so far demanded them because very few people have ever really heard good sound reproduction except in a certain few theaters and auditoriums," he said.

Paint Tree Sprouts

Volunteer trees that come up in fence rows and other places where they are not wanted cause trouble by sprouting up after they are cut off. Grubbing them is expensive and inconvenient. A certain and economical method of killing them is to cut the tree off near the ground and paint the cut surface of the stump, wetting it liberally, immediately after cutting with a mixture of one part 2,4-D acid to three to six parts diesel fuel, says J. W. Lalinley of Kansas State college. This is equivalent to one part of 40 per cent ester to about one to two parts diesel fuel.

Rotary Clubs

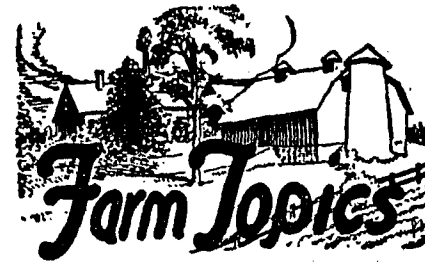

On February 16, 1949, there were 6,687 Rotary clubs in 79 countries and geographical regions with a membership of 323,000 business and professional executives. On that date, there were 3,994 clubs in the United States of America; 835 in Latin America; 649 in Great Britain and Ireland; 541 in continental Europe, Northern Africa and the Eastern Mediterranean region; 243 in Canada; 147 in Asia and 278 in other parts of the world.

Platinum in Early Days

"Unripe gold," Indians of the Andes highlands scornfully called platinum in the days of the Spanish conquistadores. They threw the supposedly inferior metal back into the streams to ripen. Men were hanged in South America and Tsarist Russia for attempting to substitute it for silver and gold. Even early United States gold pieces were counterfeited in platinum.

For Home Painters

On opening a new can of paint, pour out excessive liquid and then gradually stir it back into the original can until all ingredients are thoroughly mixed. Don't paint new plaster with oil paint for 30 days. Don't fail to allow plenty of drying time. Don't fill your brush too full. "Be Paint-wise."

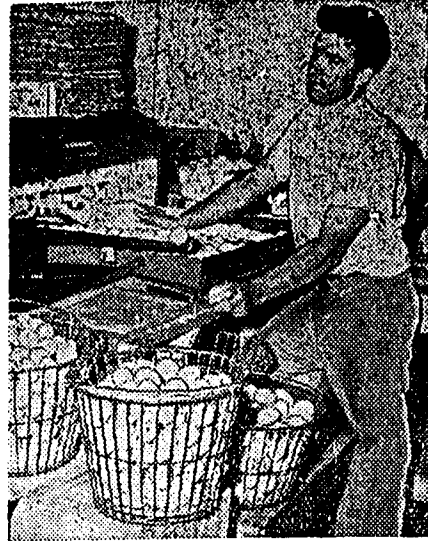

Milk Pelletizing Aids Poultry Feed

Milk Products Are Found Important to Egg Output

That milk products are still among the most important ingredients in a laying ration is indicated in results of a series of feeding tests conducted with high-producing flocks in New England poultry areas earlier this year.

The tests, which ran an average of 184 days, were conducted at a state agricultural college, a county vocational agricultural school and commercial poultry farms. Results showed an average additional profit of 26 cents each for hens fed

Joseph Ruzzo, Hope Valley, R. I., is shown at his egg candler-grading machine. Raising from 12,000 to 13,000 birds annually, Ruzzo says he has recorded a 12 per cent increase in egg production from his test flock which was fed pelletized milk products in the 1948-49 laying season.

milk products in addition to rations regularly fed on the test farms.

Nearly 3,000 birds. New Hampshire, Rhode Island Reds, Barred Rocks, and a Barred Cross were involved. On each farm flocks were divided into test and control pens. The control pen received the ration normally fed on the farm. For instance, the state college fed the New England college conference laying ration, the county school used its own formula ration, and the commercial poultrymen fed various commercial laying mashers. In each case test and control pens were of the same age and breeding, and received the same care and management except that the test pen was fed a pelletized dairy products feed in addition to the normal ration. Accurate feed cost and egg production records were kept. For purposes of making profit comparisons, 55 cents a dozen was used as an average egg price.

When results were tabulated and averaged, it was found that the test pens fed the milk product, laid an average of 8 per cent more eggs; and made an average of 12.3 per cent more profit. Egg production for test birds averaged 64 per cent throughout the tests, compared to 59 per cent for control birds. Average feed cost per dozen eggs was 29 cents for test pens, 28 cents for control pens. Culls and deaths in test pens averaged 15 per cent.

Highest average egg production was 74.4 per cent made by a test pen of Barred Rocks at the county school over a six-month test period. There the control pen averaged 69 per cent production. Birds in the test averaged \$3.06 net income per bird (eggs over feed), compared to \$2.71 per bird in the control pen.

Bumper Yield

This is the type of bumper wheat yields which may be expected by the farmer who practices good soil conservation procedure wherever such is necessary to full crop production. Soil conservation, selection of good seed and attention to good farming practices generally always pay dividends.

Animals, Fowls Experience Man's Disease Conditions

Teetotaling dogs, turkeys and chickens which drink nothing stronger than water sometimes get the same diseases which human beings develop from over-indulgence or high living. Veterinarians' records show that turkeys and chickens sometimes develop gout, and dogs and other animals get cirrhosis of the liver. Many other disease conditions of man also are common to animals.

GOLDEN RULE

Mr. and Mrs. Oscar Lawrence spent Tuesday in Lapwai visiting her mother, Mrs. Nick Deamo and family, and her daughter Mrs. Joe Evans, Jr., and family.

Mr. and Mrs. Ralph Stage and son and Fred Stage were recent supper guests in the Glen Betts home. Fred and Ralph Stage and Mrs. Glen Betts were among the Lewiston visitors Tuesday.

Mrs. Carl Finke and children spent a day recently with Mrs. D. V. Kuykendall, assisting her with quilting.

Carl Finke and R. S. Betts were Kendrick visitors on Wednesday. Mr. and Mrs. D. V. Kuykendall and son Gene were Lewiston visitors on Wednesday.

Mr. and Mrs. George Drube spent several days the past week at the Oscar Lawrence home. Mr. Drube is assisting Oscar with some wood cutting.

Mrs. D. V. Kuykendall and Mrs. Glen Betts were among those who attended the Homemakers Club meeting at the home of Mrs. Edna King on Thursday. Mrs. Graves and Miss Weber of Lewiston demonstrated "Needle Point Work and Accurate Measuring for Dress Making" and allied subjects, which were very interesting.

Grandma Lawrence, who is making her home with her son Oscar and family, had the misfortune to fall Friday morning and break a bone in her right arm. She was taken to Kendrick where Dr. Christensen reduced the fracture. We wish her a speedy recovery.

Carl Finke and family are among those attending some of the basketball games in Lewiston this week.

Ralph and Fred Stage were Kendrick business visitors on Tuesday.

The Abner Cowger family visited in the Glen Betts home Sunday afternoon.

Mrs. Glen Betts and Eugene visited at the George Wilken home Sunday afternoon.

Gene Kuykendall visited at the Elton McCoy home Sunday.

Some from our community helped "noisy serenade" Doyle Hayward and his bride, Tuesday evening.

Mosaic Proves Destructive Disease to Cabbage Plants

Nearly all the cabbage seed grown in the United States before World War II came from a single county, Skagit, in Washington, where the climate is favorable and farmers have picked up the "know how." Doubtless, much of it will continue to come from there—but it seemed doubtful for a time, because of the increase in cabbage plant diseases. Cooperative research showed that mosaic was one of the most destructive diseases. The workers were able to discover a vicious circle in the system of cabbage seed production—and to show how to break it. There was an overlapping of the old and new crops that favored just the kind of multiplication or spread of mosaic that had happened. The cabbage mosaic is carried from diseased to healthy plants by plant lice. Cabbage seed crops are managed in this way: The large seed companies contract with farmers to grow the crop. The companies furnish the plants for transplanting. To supply these plants, the companies sow their seed in beds in June and July. Transplanting begins in August. Cabbage plants must have time to develop well but not to form a head before winter. If cabbage is started too late, it may not "bolt"—send up a seed stalk—the following season. Plants overwinter in the fields and seed is ready for harvest in July and August. Thus, there is an overlap of from one to three months in the old and new crops. This gave the aphids opportunity to move from the diseased old plants to the seedlings in beds nearby—carrying the mosaic with them.

Central Part of England Is Agricultural and Industrial

The English Midlands, hard hit by devastating floods that followed record winter snows, are a blend of rural and factory life, of stone cottages with old-fashioned gardens, and smoking industrial towns whose specialty products long ago started on world rounds, from India to Argentina.

In the heart of the "tight little isle," the Midlands area includes a lowland triangle marked by the freshest-swollen streams of the Thames in the south, the Severn in the west and the Trent in the north, notes National Geographic society.

To the east, it merges with the flat, marshy fenland country, where large-scale reclamation work was accomplished during the war to help fill out the meager national diet.

Normally, the network of rivers and canals cutting across England's densely populated central regions offers valuable navigation routes and scenic background for its many villages, county boroughs and cities.

Beyond the long lines of row houses in big and little industrial centers, stretch broad grainfields, garden patches and pastures on which sheep and cattle graze.

Plant Infection

Virus ailments in plants have much the same range of seriousness that virus diseases do in humans, from deadly to merely damaging, from the dreaded polio to the common cold, says the department of agriculture. There are two relatively mild virus diseases, of carnations — mosaic and streak. Neither kills the plant, but each reduces the yield and quality of the flowers. Aphids spread the mosaic virus, and since aphids are not a serious pest of carnations, sanitation in carnation houses does not usually provide much protection from aphids. The result is that nearly all carnation stocks pick up the virus. It is as common as the common cold. The carrier of streak disease has not been identified, but it seems to be an insect more common outside than inside the greenhouse.

War Catastrophe

Among the tragic casualties of war are books and libraries. Such destruction in World War II "probably exceeds by many times the destruction of all previous wars and catastrophes put together," reports the Harvard Alumni bulletin.

A survey shows these losses: Poland: Estimated 70 per cent of all libraries destroyed or looted.

Russia: Fifty-five million volumes destroyed in the Ukraine alone.

Czechoslovakia: Half the libraries and archives gutted.

England: Some 30 great libraries severely hit.

China: Ninety-one out of 108 colleges occupied bombed out or seriously damaged.

The monks of the Abbey Van Verne in Holland hid their rarest volumes in farmhouses.
