WHAT HAPPENED HERE TWENTY YEARS AGO

W. C. Jones, superintendent, and a crew from the high school manual training class have just completed the stage in the new gym. It has been completely sealed overhead and a dressing room, installed on either side — yes — and the curtains are up, all ready for the Junior Glass play, Dec. 10.

The large shade trees that have graced the front of the school house for many years were removed last week — for the reason that the roots have grown into the sewer and caused a breakage in the line.

Installs New Homogenizer — The Kendrick Creamery, now operated by Oscar Medalin and son Allen took delivery of one of the very latest type milk homogenizers, a necessity in the making of ice cream, as it compresses the milk under terrific pressure and breaks up the little globules of butterfat so that they remain a part of the mixture, rather than separating.

It is a thing of beauty, in gleaming chrome, as well as being a necessity in a modern creamery.

The new machine will be put to use within the very near future.

Proposed W. W. P. Plant

Here is an artist's conception (top) and scenic location of the Washington Water Power company's proposed Cabinet Gorge hydro electric generating plant on the Clark Fork river in Bonner county, Idaho. The project would cost the private power firm upwards of \$40,000,000 and bring an additional 200,000 kilowatts of electricity to the power-hungry Northwest. Plans call for a dam 160 feet high between the canyon's rugged walls. The power house

would be on the north side of the river, with water being fed through 540-foot long tunnels to spin 70-500 horsepower turbines of semi-outdoor type vertical shaft generators. A 230,000-volt transmission line would carry the new power into Spokane connections of the WWP and the Northwest power pool grid. WWP awaits decision on its application to the Federal Power commission in Washington, D. C. If early approval is granted, the firm will be able to deliver power from the project by November of 1952.

Poem Is Noteworthy — The following poem is an original, written by Priscilla Benscoter of English I class:

The First Thanksgiving
If we should go back many long years ago,
We would see a small gathering in the midst of falling snow.
Thanking God for their new found land,
With a sound of friendliness to be heard on every hand.

Set before them the fruits of their labors,
The Indians had gathered to feast with their neighbors.
Looking deeper into the snowy haze,
We see Indians and Pilgrims singing His praise.

Thanking God for their freedom and love,
And praising the Almighty God above,
This was the beginning of a new nation's life,
To be gained only by God's love and strife.

MORE CORRESPONDENCE, BUT NO ACTION ON MAIL ROUTE

From the Lewiston Chamber of Commerce, under date of November 20, comes the following letter:

H. C. Schupfer
Kendrick Commercial Club
Kendrick, Idaho
Dear Mr. Schupfer:

We appreciate your club sending the telegrams to Mr. Denny, president of the Northern Pacific Railway Co., and Mr. John Redding, assistant postmaster general. Enclosed find copies of telegrams we have sent.

Since our problems in this respect are mutual, we will appreciate any suggestions your organization may have to offer that might assist us in helping to work out the equivalent service that was previously enjoyed.

Should you feel that we might have a joint meeting with Juliaetta and Troy on this subject, we will be glad to cooperate with you.

Sincerely,
Harry Hughes, Sec.

The telegram to the post office department follows:

November 10, 1950
John Redding, Asst. Postmaster Gen.
Washington, D. C.

This organization protests proposed routing of Star Route 2317 Spokane, Washington to Lewiston, Idaho. We feel mail service in and out of Lewiston and immediate trading area inadequate under this proposed contract for the reason mail leaving Lewiston to Juliaetta, Kendrick and Troy, Idaho, is too limited. Request stay of awarding contract until you can investigate. Urge you join us in requesting Northern Pacific Railway Co. to continue their mail service until acceptable routing is established. — Lewiston Chamber of Commerce, Lewiston, Idaho.

The reply of the postoffice department, under date of November 15, follows:

Lewiston Chamber of Commerce
Lewiston, Idaho
Gentlemen:

I have your telegram of November 10, 1950, relative to a proposed star route to operate between Spokane, Washington, and Lewiston, Idaho, in lieu of train service by the Northern Pacific Railroad Company. Your statement that the star route service would be inadequate and you are of the opinion that a further investigation should be made, is noted.

A preliminary report has been received from our field officials stating that a further report would be forwarded as soon as the railroad company indicated the date of discontinuance of train service. It may be stated that the Department has no authority to require the railroad company to continue the operation of trains.

However, you may be assured that upon receipt of a further report the matter will be gone into very carefully before definite action is taken.

Sincerely yours,
G. E. Miller, Asst. Ex. Dir.

Our Note: The thing that surprises us, is the fact that no one in authority seems to know the date of the removal of N. P. trains No. 313 and 314 — a matter which has been general information locally for some six weeks. It must be that such information just gets lost in the masses of red tape that entangle every government operation.

Trains 312 and 313 Off Run — Northern Pacific railway service linking Lewiston with Spokane was cut in half at 2:50 Friday morning when train 313 rolled to a halt at the Camas Prairie railroad depot, Lewiston, for the last time.

Train 313, originating at Spokane, and train 312, which was made up at Lewiston, carried passengers, mail and express between the two cities and to other communities along the line, for more than 40 years. They provided service through the heyday of the steam locomotive and at their expiration were using diesel power part of the time.

The NP was authorized by the public utilities commissions of Washington and Idaho, and over the protests of many communities which the two trains served, to eliminate service on a plea that it was losing revenue. Dec. 1 was the date set for the last trip.

Train 312 left Lewiston on its final journey at 8:30 Thursday morning.

Two NP trains remain on the Spokane-Lewiston run. Train 314 will leave Lewiston at 3:40 each afternoon. Train 311 will arrive from Spokane at 1:45 p. m.

End of the train service also signifies the finale for morning mail service out of Lewiston to Juliaetta, Kendrick and Troy and the rural routes they serve. Mail to them will not leave Lewiston until 3:20 each afternoon. Distribution to rural areas will be delayed thereby.

The Lewiston Chamber of Commerce has protested this delay in service to the postoffice department. The postoffice department has provided a star route truck between Lewiston and Spokane as a substitute to the train service, but the contract eliminated the three towns on the return trip. — Lewiston Tribune.

Truck Mail Service Begins — Star route mail truck service between Spokane and Lewiston was started Friday night, Dec. 1 — under somewhat less than ideal weather conditions.

A mail truck fought its way toward Lewiston over icy highways and through gusts of snow Friday night. It was scheduled to pull in at the Lewiston postoffice at 3:15

Dial Phones At Juliaetta

The switchboard and other necessary equipment for the installation of the new dial telephone at Juliaetta, is now nearly all on hand, and Otto Schupfer, manager of the local Potlatch Telephone Co., is busy installing it in their recently completed building at Juliaetta.

The Potlatch Telephone Co. serves Juliaetta, Kendrick, Cameron, Leland and Southwick, but only Juliaetta will receive the new dial phones, at least for the time being.

The change-over will be made in February, to relieve part of the load now being carried by the operators at Kendrick — all calls from Juliaetta, as well as the surrounding towns, going through the Kendrick board.

Some of the phones now in use at Juliaetta can be converted to dial use, but others will have to be replaced entirely. There are about 100 telephone in use at Juliaetta, a number of which are business phones.

Otto says that the number of subscribers has not greatly increased, but that phones just seem to be used more.

The Potlatch Telephone Co. has an increase request before the public utilities commission at this time, to care for rapidly rising costs of maintenance, labor and equipment.

Injured In Truck Crash

Three trucks, including one vehicle belonging to the state highway department, were involved in a crash seven miles east of Lewiston on the North & Southhighway at 10:45 Monday morning.

The three trucks were all headed east at the time of the wreck, officers said. The state highway truck was in front and stopped for a rock in the road. The second truck, driven by Ed Nelson, Kendrick, slowed down, but was struck in the rear by the third truck, driven by Wayne L. Martin, Myrtle.

Martin was cited for following too closely and paid a \$15.00 fine and \$3.00 costs when he appeared before Justice of the Peace Ben E. Kelly.

Mr. Nelson suffered a deep gash on his left knee, receiving treatment at the hands of Dr. Christensen.

Too Many Uses For Money
 Carlie Grieser received a Grange Supply advertisement which included a letter written by a Grange customer who had been asked to meet his bill. The letter follows:
 "Dear Sir: I have your statement showing that I owe you \$769.80. I am

enclosing a check for \$5.00 for which please send me receipt. I am sorry I can't pay any more now but my living expense high and I believe I should look out for my family before worrying about the feed bill for my cows.
 "Will try and send you another

\$5.00 when I sell some calves in April but don't count on it to much because my daughter graduates from college in June and you know that takes quite a little money.
 "I thought I could send you a check last month but it took all I could take & scrape together to put in the Delco light as my wife didn't have electricity to run the separator, the sewing machine and vacuum cleaner, then to we had to build a shed for the ford as we had to put the new Cadillac in the garage so you see it takes all the money we got from the cows and chickens to get along on.
 "I can't send you the turkey money next fall as my boy is going to college and altho the lads of today are very economical about hats and sigaretes the coonskin coats costs the old man a lot and even junkyard fords come high by the time they are decorated for college.
 "I may send you the hog money but the missis & I have planned a trip to Honolulu and after her working hard all these years I think she deserves the trip. This is a terrible strain on my finances as the new Cadillac and the light system have to be paid for.
 "All the Farmers here are pressed financially with eggs this fall only 53c a Dozen and gasoline the price it is. Maybe next year things will look brighter and then I can pay you a little more on acct. but right now things are mighty black for the farmer but don't worry about this acct. as we are honest people and will pay you every cent we owe you.
 "Send one 1 ton millrun 2 tons alfalfa 10 sx cracked corn 10 sx wheat as cheap as you can. Very truly,
 "Your cooperative member

Farm Commodities Pose Big Problem Government Limited In Selling of Stocks

At the moment the government owns approximately \$1,806,365,438 worth of farm commodities, purchased through the years to support farm prices, agricultural department officials report.

Products stored in government bins include 3.5 million bales of cotton, 145 million bushels of wheat, 167 million bushels of corn, 422 million pounds of linseed oil, 294 million pounds of dried milk, 79 million pounds of dried eggs, and quantities of various other items.

What's become of it all? It may be disposed of in various ways, but not dumped upon the

The government today has 167 million bushels of America's finest corn stored under the price support plan. The question is, what to do with it?

open market to compete with commodities now in private ownership. To do so would flood the market and depress the commodities offered far below support prices. The government would then find itself buying the commodities placed upon the market.

These commodities, however, can be sold should the market prices strengthen considerably above support levels.

The government has two methods at present of moving commodities. They are:

(1) Persuading the consumer to increase their purchases through normal purchasing channels, thus reducing the supply and raising the price to where government stocks can be put on the market. Also, reducing supplies to a point where support prices would become unnecessary.

(2) Many of the commodities in government stockpiles are being distributed to school lunchrooms, charitable institutions, Indian affairs, and needy groups.

New Corn Spray

Until recently, the corn earworm has prevented profitable sweet corn growing, especially in the South. Sometimes every ear in a crop is infested. Such corn cannot be sold.

Now the department of agriculture has developed a spray containing DDT, mineral oil, and

The new spray, when applied at the right times, will eliminate earworm and pay in growth of healthy corn on the American farm.

water that may be applied to silks and husks of developing ears. When applied at right times it kills worms before they attack and ruin the corn.

R. A. Blanchard, bureau entomologist, developed the method. He tested it in the field during three growing seasons in Texas, Mississippi, Missouri, and Illinois. Earworms were controlled in every instance, he reports.

January Exports Pass \$224 Million Mark

January agricultural exports totaled \$224,300,000, the agricultural department reports. Cotton topped the total with \$83,500,000.

Wheat and wheat flour were second to cotton, valued at \$47,300,000, while corn was in third place with \$14,700,000. Agricultural imports during the month were valued at \$290,700,000, or approximately 66 million more than exports.

TVA States Lag In Growth
One of the principal arguments presented by advocates of a Columbia Valley Authority has been the "phenomenal" industrial development and growth of the states served by the Tennessee Valley Authority. Similar growth it was claimed would follow the creation of a similar bureaucratic control of the resources of the northwest.

Census bureau statistics do not bear out this claim. In fact, the four states of Kentucky, Tennessee, Alabama and Mississippi in which the CVA has a virtual monopoly of development, showed a gain in population between 1940 and 1950 of 658,139, or 6.1 percent. The states adjacent to TVA, Virginia, North Carolina, South Carolina and Georgia showed a total gain of 1,535,649 or 13.6 percent.

The Pacific northwest states of Oregon, Washington, Idaho, Montana, Utah, Nevada and Wyoming showed a gain of 30.2 percent. The total gain of Oregon, Washington and Idaho was 33 percent. Socialization of power plants and distribution lines now under way by driving out private development, is not only unable to meet the growing industrial needs of the northwest but actually by socialistic policies check-

ing its development, as the dead hand of inefficient bureaucracy always does at taxpayers expense.

Wintery Weather Is Here

Following a couple of rather chill days, snow began falling locally Friday evening, and continued until about an inch lay on the ground in the canyon, and as high as five inches atop the ridges.

Saturday it warmed up, and snow disappeared almost completely in the canyon. However, Saturday night it again began snowing, to be followed by rain, and by Sunday noon there was none of the "white and lovely" remaining. But again Sunday night snow fell on the ridges and rain in the canyon. Monday was clear and cold, as was Monday night, and Tuesday morning thermometer readings of 22 degrees were "standard."

To Receive Real Furlough

The department of Army has announced the suspension of scheduled training for troops in the United States during the period Dec. 23 to Jan. 1, inclusive. This period will utilize two legal holidays and two week-ends, with a minimum loss of training days to permit soldiers stationed at considerable distance from their families and home an opportunity to visit their homes.

"In meeting the rigorous standards of the current training program" the army said, "the trainees have shown a degree of progress which makes possible this short suspension of scheduled training. It was pointed out that the tempo of the program will be stepped up after the first of the year to the extent that further interruptions will be extremely unlikely."

Large Group Attend Supper

Stabs Self Instead Of Pig

Stewart Wilson, Cedar creek, stabbed himself in the right leg above the knee last Saturday, quite by accident, however.

With knife in hand Mr. Wilson was preparing to stick a pig, when the animal decided to run, and in the chase his aim somehow went wild. Several stitches were necessary to close the wound.

He Really Had An Idea

Lawyer, reading client's last will and testament to group of expectant relatives: "And so being of sound mind, I spent every damn cent I had before I died."

It Really Was!

The prize of all radio ads, was voiced by an announcer speaking for his sponsor, who built matseleums: "Ladies and gentlemen," he said in soft tones, "is seepage disturbing your loved ones?"

We say harsh things about politicians, and yet, if they were not in politics, we would doubtless be called upon to support them some other way.

Building supplies of all kinds are available at the Kirkpatrick Lumber Co., Julianna. Whether building a house or a chicken house, see them. 1-adv.

Potlatch Chief Sez

Published by the Kendrick Creamery

AS WE SEE IT:

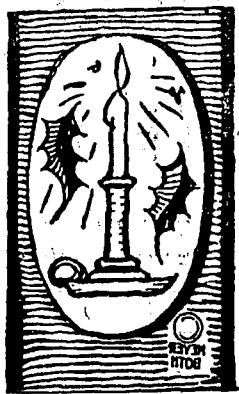

In 1942 this Creamery was organized as a co-operative unit — and steadily grew in volume, as well as turning out dairy products of which any firm might well be proud — under the brand name "Potlatch Chief." This was made possible by the loyalty of producers and patrons alike, co-operating in every sense of the word.

In 1950 it was decided to disband the organization and sell the business — and we, the purchasers, pledge ourselves to do all in our power to continue the policy of the company in products, as well as paying top prices for dairy items.

We are rapidly modernizing the plant to meet today's demands — and with your patronage we hope to serve the Juliaetta and Kendrick trade area for the coming years.

MORE ABOUT MAIL AND TRAIN

Saturday morning.

The truck replaces two Northern Pacific trains, 312 and 313, whose long service ended on Thursday when both made their last runs. T. E. Tucker, Spokane, holds the star route contract.

Mrs. Tish Erb, postmistress, said she would meet the incoming truck Saturday morning. It is scheduled to leave again at 3:45.

The big truck arrived at Lewiston at 7:00 a. m., almost four hours behind schedule.

T. E. Tucker drove the big truck over icy roads on the initial run. He said he was late because he had to make an 18 mile detour by way of Deary and down the Big Bear ridge grade. The route established by the postal transportation service follows American ridge to Kendrick, but this road was impassable.

Tucker is using a new GMC 12-ton semi-trailer to haul mail to towns along the route. He delivered 3,000 pounds of mail for Lewiston and Clarkston to the Lewiston post-office on the first trip, in addition to mail for the Camas Prairie railroad's Grangeville and Stites trains, delivered to the Lewiston union depot. — Lewiston Tribune.

Star Route Time Changes

With the elimination of the morning train up from Lewiston, there is no longer any advantage in holding the local star route, operated by Cecil Gruell, to Cameron, Southwick and Teakean (known locally as "Gruell's Lightnin' Express") so the departure time from Kendrick has been stepped up to 8:30 a. m. — and departure time from Southwick as soon as the connecting route, operated by Rollin Armitage, arrives, but in no event later than 11:30 a. m.

This letter change was made to enable mail to catch the noon train out of Kendrick.

Postmaster Fred Stedman says he is endeavoring to "pouch" all possible mail for truck shipment, in order to speed up its delivery — which will now be slow at best.

For example, a letter mailed here for Lewiston or other southern points will be "pouched," will go to

Lewiston by truck, and there await distribution.

For northern points it will be "pouched," loaded on the truck, hauled to Spokane, there worked, and then be returned to (say Moscow) by the noon train the following day.

We might add a trite comment to the above route: "some service, ain't it!"

Investigating Mail Delay

U. S. Sen. Glen H. Taylor said yesterday in a letter to the Lewiston Chamber of Commerce that he is investigating the delay in mail deliveries to the Kendrick-Juliaetta-Troy area.

Taylor said he had discussed the problem with Assistant Postmaster General John Redding and would advise the Chamber of any action taken.

Congressman Compton I. White also wrote that he would be glad to take the matter up with the postmaster general.

Marc L. Yenni Dies At Hospital

Marc L. Yenni, little two-year-old son of Mr. and Mrs. Wayne Yenni, Southwick, died Monday at the Gritman hospital, Moscow. He was born Nov. 13, 1948.

Funeral services, directed by the Short Chapel, Moscow, will be held this morning (Thursday) at 11:00 at the Brower-Wann chapel, Lewiston. The Rev. Edward Knight will officiate and burial will be at Normal Hill cemetery, Lewiston.

Survivors include his parents, Mr. and Mrs. Wayne Yenni, and a sister, Anne, Southwick; maternal grandparents, Mr. and Mrs. J. P. Haag, Spokane, and paternal grandparents, Mr. and Mrs. L. L. Yenni, Southwick.

Cub Scout News

The Cub Scouts have adopted as their theme for December, "Helpers" and plan to help Santa by collecting used toys for the Children's Home.

Anyone having toys they are willing to donate, either new or needing repair, please leave at N. B. Long & Sons store, or contact one of the Den Mothers — as the Cubs plan to rejuvenate them with paint, and make any necessary repairs, so they can be taken to the Children's Home before Christmas. Be sure to get your toys in before Dec. 18th.

The Pack meeting for December will be held Monday evening, Dec. 11, in the Community Church basement at 7:30. Everyone is welcome.

Senior Ball Greatly Enjoyed

The Senior Ball, an annual dance sponsored by the Senior Class of the Kendrick High school was held last Friday evening, and thoroughly enjoyed by those present — although the crowd was not nearly as large as one might expect for such an event.

The theme, "Come to the Mardi Gras" was carried out beautifully in the decorations within the big building, gay crepe paper, balloons and streamers forming a huge "tent" within. The back-drop, behind the orchestra, was formed of crepe paper, and depicted a couple dancing.

It is to be regretted that more people did not avail themselves of the opportunity to attend a really fine dance.
