KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, FEBRUARY 1, 1951

NO. 5

## WHAT WILL CONGRESS DO TO MR. TRUMAN'S REQUESTS

The country was prepared for a shock from Mr. Truman's budget message. It got a sharper one than most had bargained for.

The most striking part of the message lay in the way domestic projects were lumped with the defense effort. As a Wall Street Journal news account describes it: "President Truman is putting the Fair Deal into uniform. All the old familiar ambitions, from the Brannan farm subsidy plan and the St. Lawrence Seaway project to establishment of a fair employment practices committee and Federal health insurance, were injected into the gigantic 'defense budget' for 1951-52."

Everyone expected a very heavy increase in spending, due, of course, to the war situation. But Mr. Truman went farther than was generally anticipated. His budget envisions the spending of \$71,594,000,000 for the next fiscal year — as compared with about \$47,210,000,000 for the fiscal year which will end next June. And this is not the end of it. He wants actual appropriations of \$94,429,000,000 some of which will be spent over a period of several years. Then he asks more than \$4,000,000,000 to meet contracts which were entered into in the past.

Finally, Mr. Truman urged that this huge budget be balanced through heavier taxes. The new tax load, he intimated, might be as much as \$20,000,000,000 a year. By comparison, the major increase in taxes which congress voted toward the end of last year will produce only about \$8,000,000,000. In other words, the President wants tax increases which will be double, or more than double, those we have just taken.

So much for the message, which is set out in detail in a 1,009-page book for the education of Congress. What is Congress likely to do?

First of all, there seems hardly a chance that Congress will go along with the President in his effort to tie domestic and defense expenditures together as necessary to the national welfare and survival. A combination of Republicans and southern Democrats — with assistance from some northern Democrats — are all set to block that. Senator Byrd is one of the most forthright spokesmen for this group on budget matters. He declared that the President's message "represents the very height of fiscal irresponsibility." He further said that the proposed budget contains "a great many projects which are wide open for boondoggie exploitation by federal agencies, state and local agencies and fly-by-night business outfits all of which are trying to get into the 'defense act.'" This view is held by a large and powerful segment of Congress. Incidentally, Senator Byrd said on an earlier occasion that federal spending could be cut by \$7,000,000,000 a year without touching any defense appropriations.

Next, there is going to be a knock-down fight on the tax issue. Senator George, who, as chairman of the Senate Finance committee, is one of the most powerful men in Congress when it comes to fiscal legislation, recently expressed the fear that taxes may increase to the point where they would cripple our economy. No one doubts that taxes will go up, but it is extremely unlikely that they will be raised to the level asked by Mr. Truman. The tax problem has become further complicated by the fact that state and local taxes of all kinds have risen sharply since the last war, are still rising in many places, and the taxpayer has less and less left that the federal government can tap. And the present cost of living, which is at an all-time high, has added more fuel to this financial fire.

The best guess is that Congress will shoot the works on defense, but do some very heavy cutting on non-defense items. It will carefully survey the whole tax structure. A national sales tax is finding support in some influential quarters. — Economic Highlights.

Out Note: We run the above as the best and simplest analysis of the present situation that we have seen. In no sense do we intend it as "politics."

## Thermometer Goes "B-o-l-d"

Following two of the most beautiful, spring-like days anyone ever saw during a winter — last Wednesday and Thursday — Friday showed lowering skies, a chill wind and a little snow, the thermometer decided it had been "upstairs" long enough, and Saturday night, accompanied by a stiff breeze, the mercury column dropped with a "thud" to an even 10 above.

Sunday night it fell still further, hitting an even zero at daybreak on Monday morning, with the cold felt all the more, due to the accompanying wind.

Monday night it dropped another degree, hitting 1 below zero.

It is believed that the severe cold has caused thousands of dollars damage to winter wheat and barley, as there is no snow covering to protect it, except in a few north-slope spots. The weather, however, made loggers smile, for it froze the ground solidly, permitting them to haul a job which had been impossible due to soft roads and load limits.

The cold also bit deeply into a number of water systems in town and in the country, and the Kendrick thawing machine was a popular item on Tuesday. Of course, there were plenty of cars that wouldn't start — and checking anti-freeze was a very popular pastime at local garages.

Wednesday morning a reading of 2 below was recorded — and the weather man said Monday that it was due to "warm up."

## Fire At Farrington Home

Tuesday, about 12:30 p. m. the local fire siren blew, and in short order the Kendrick Volunteer Firemen were fighting a roof and attic blaze at the James Farrington home in the west part of town.

The fire evidently began near a chimney, and was held to the roof and attic by the local firefighters, with a spot about the size of a wash-tub centering most of the damage by flame, although smoke and water did the most harm, despite the fact that only the small booster tank on the local fire engine, and the small fog nozzles were used — plus some fire extinguishers.

It was the first test of the local equipment in winter weather. No estimate of the damage done to the Farrington home and contents is yet available.

## INTERESTING HAPPENINGS FROM THE JULIAETTA AREA

Mrs. Edward Miller, Coeur d'Alene, was a week-end guest at the home of her parents, Mr. and Mrs. Gordon Swears.

Mr. and Mrs. Willard Clark and Gale, of Lewiston, were Sunday dinner guests at the Lloyd Knight home.

Mr. and Mrs. E. O. McAllister, Mr. and Mrs. Milo Calvert, and Mrs. Viola Browning were Sunday dinner guests in the Asa Calvert home.

Mr. and Mrs. Neil Candler moved to Lewiston last Thursday, where he is employed.

Mr. and Mrs. Roy Whittum were business visitors in Lewiston on Monday.

Mrs. Duettry of Craigmont, visited in the home of her son-in-law and daughter, Mr. and Mrs. Milo Calvert a few days last week.

Mr. and Mrs. Carl Cox of Enterprise, Oregon, were over-night guests Friday at the home of Mr. and Mrs. Wallace Clark.

Bruce Murdock, Deary, was in Juliaetta Wednesday, visiting old friends and transacting business.

Karen Nelson was an over-night guest in the Gordon Peters home at Leland, Tuesday night.

Harold Freeman and children, who have been living in Moscow, have returned to their home here.

Miss Violet Osborn, Lewiston, spent the week-end here with her parents.

A group of friends gathered at the Lura Nelson home Wednesday evening to help Macie Nye celebrate her birthday anniversary.

Mr. and Mrs. George F. Calvert of Lenore visited relatives here on Friday.

Mrs. Amanda Alexander, old-time resident here, who is a patient at the Gritman hospital, Moscow, is reported as slowly recovering.

Mr. and Mrs. Clinton Clark drove to Lewiston Monday night to see the N. I. C. E. - N. N. C. basketball game.

Herb Millard and Mrs. Vada McAllister were Lewiston shoppers on Monday.

Art. Coston left Monday to spend a few days in Spokane.

Mrs. Anita Brant has seen several spring birds in the yard about her home — with Cedar Waxwings and Robins among them.

Mr. and Mrs. Clinton Clark and daughter Kathy were dinner guests at the home of Mr. and Mrs. Wallace Clark, Saturday evening. The occasion was Clinton's birthday anniversary.

The W. S. C. S. met at the home of Mrs. E. O. McAllister for its regular meeting, Tuesday afternoon. Irankie Peters, Armetha Sams and Peggy Hadley visited with Mr. and Mrs. Neil Candler in Lewiston, Saturday.

Mr. and Mrs. Eugene Taylor and son Charles were Sunday visitors in the Ralph Magnuson home at Kamiah.

David Beadles and Bob Bonnett, Moscow, were dinner guests Sunday at the Laura Groseclose home.

Arlene Glenn of Fairview was an over-night guest of Karen Nelson, Monday night.

Mrs. E. O. McAllister and Macie Nye were Lewiston visitors on Thursday.

Word was received here Monday that Mrs. Mary Adams, Moscow, well-known former local resident, had fallen an injured a leg quite seriously.

## Cub Scout Meeting Held

Cub Scouts and parents of Pack 149 met in the Community church basement Monday evening.

Cubmaster, Ross Armbrage opened the meeting with the Flag Salute.

Rivers being this month's theme, each Cub displayed a map showing his chosen river. Parents were given a map of Northern Idaho and asked to put in all the river and towns. Manning Onstott won (and why not, after living here some 50 odd years). His prize was to tell the group how he knew so much.

Cubs were presented with their Awards. "River" songs were then sung and games played. At the close, all joined in giving the "Living Circle" and the "Grand Howl."

## To Show Alaska Pictures

The Kendrick C. C. Y. of the Community church will meet next Sunday evening, Feb. 4, in the church basement at 7:00 o'clock, with the Lapwai C. C. Y. as guests.

Rev. F. C. Schmidt will show pictures on Alaska.

This will be a special "Family Night" meeting, and all are cordially invited to attend and share with the young people.

This is the second series of pictures on Alaska that Rev. Schmidt has shown, and no one will want to miss them!

Refreshments will be served.

## SHORT NEWS ITEMS FROM OUR LOCAL SCHOOLHOUSE

### Kendrick Splits With Genesee

Last Friday evening the Kendrick High school Tigers fought their way to a near victory over the strong Genesee Bulldogs but were turned back by a "harrowing" 43-40 defeat in the final minutes of the game.

Backed by Jim Sather, an artist at the free-throw line, the Bulldogs overcame a 6-point lead in the final minutes, and finished on the long-end of the score. Twice the Genesee team was given two points when Kendrick players touched the net during attempts to make a field goal. The Bulldogs, therefore, were handed four extra points, which were not scored by a player.

The score remained close throughout the game — Genesee holding the lead most of play. Genesee held a 1-point lead at the end of the first period, and a two-point lead (26-24) at the half-way mark. Kendrick, still able to stay on even terms with the Bulldogs, tied the game up — 33-33 at the end of the third quarter. The final period proved the most exciting, as the score was tied three times and the lead changed hands three times in that stanza. Kendrick "got hot" and held a 6-point lead with only three minutes left in the game, but Sather canned three successive free throws to start the Bulldogs in a rally that put them in the lead in the final seconds of play. The score was tied ten times during the game.

Kendrick's Stanley Smith exhibited a "sharp-shooting" eye as he scored 20 points to lead all players in the game. Jim Sather scored 18 points for the Genesee squad — ten of these being made from the free-throw line. The Tigers tried 39 times to score on field goals and connected with 17. Genesee also tried 39 times, connecting with only 9. The Tigers were on the free-throw line 19 times and connected with only 6 attempts. Genesee had 32 attempts and made 21 — proving very accurate on "gift tosses." Genesee made 23 percent of their field shots and Kendrick made 46 percent. Thirty percent is termed "very good" shooting in high school basketball.

The statistics follow:

	FG	FT	PF	TP
S. Smith	10	0	4	20
Keith Thornton	3	3	0	9
O. Halseth	2	1	5	5
M. Clemenhagen	1	1	4	2
A. Clemenhagen	1	0	4	2
P. McCreary	0	1	3	1
C. Christensen	0	0	1	0
R. Knight	0	0	1	0
L. Arnett	0	0	0	0
D. Crocker	0	0	0	0
Total	17	6	28	40

The undefeated Kendrick "B" squad earned its tenth straight win when it dumped the Genesee Bs 41-39. The score saw the Kendrick boys in the lead at the half-way mark 24-22. Ira Havens scored 12 points to lead all scoring for the game and Borgen netted 7 points to lead Genesee. Action in this game was just as exciting as in the main event.

## Tigers Hammer Demons

On Saturday evening of last week three Kendrick basketball teams won victories over teams from Reubens in the local gym. Just one week before, the same teams traveled to Reubens — winning all three games there. In the main event of the evening the Kendrick junior varsity walloped the Reubens "A" squad 53-38. Kendrick led throughout the game and the score at the half-time was 20-14. The Tigers didn't get warm until the last half, but then some very accurate shooting was displayed, with nine out of the 11 men on the squad scoring for the Tigers. Burt Souders, Howard Wolff and Bud Clemenhagen scored 9 points each to pace the local boys, and Chuck Wood canned 18 for Reubens. The game was fast and clean — and exciting to watch, for there was some very unusual basketball exhibited.

In the second game of the Reubens series, the Kendrick Tigerettes defeated the Reubens lassies 33-25. Dorothy Glenn was the "big boost" for the Tigerettes, scoring 24 points in 32 minutes of play. The half-time score saw Kendrick in the lead 19-14. L. Skelton scored 17 points to lead the Reubens girls. Only two Reubens girls scored in the game. The Kendrick Tigerettes are to be congratulated in the very fine basketball they are playing this year.

The Kendrick grade school whipped the Reubens graders 21-12. The Reubens boys were held scoreless in the first period and the score at half-time was 16-3, with the local youngsters in the lead. Herman Hinrich scored 8 points for Kendrick, and Brackett netted 7 for Reubens.

## Water Pipe Bursts

Sunday evening about 11:00 o'clock, Gerald Becker, an instructor at the Kendrick High school, entered the building on business, and found that a water pipe in the Science room had broken, and was filling the room and school with water. He immediately summoned Ben Cook, Jasper Nutting and Ervin McGeachy, also instructors, and then went back to the scene of the "tragedy." All four men, along with the help of C. G. Arnett, school janitor, and Louis Lindquist, local plumber, worked like lightning to stop the spouting water. Soon everything was under control and a "clean-up" job was in progress.

After about 2½ hours of hard and fast work, the tired men "retired" to the school cafeteria, where all enjoyed a "soothing" cup of coffee. Considerable damage was done to plastering and interior decorating.

(Continued On Page 2)

## RED CROSS NEEDS BLOOD FOR FIGHTING MEN; OTHERS

Dr. Geo. W. McKeever, chairman of the local Red Cross Chapter, working in conjunction with Jasper Nutting, of the Kendrick schools, is working toward a "Blood Donor Day" in Kendrick during the month of February — with the day preferably Tuesday, Feb. 21; Wednesday, February 22, or Thursday, Feb. 22.

According to the information received, if 200 donors can be arranged for, a Red Cross mobile unit, will come to Kendrick to draw and process the blood.

If fewer than that number are promised, donors will be asked to go to Moscow, where, as is well known, a considerable quantity — was given by students and others, in the month of December, and within four days that blood was in Korea — saving the lives of our fighting men.

This blood bank, however, does not mean that all the blood will go to the Armed Forces. A certain percentage will be kept at hospitals in Moscow and Lewiston, where it will be made available, free of charge (with the exception of physician's services) to any who are in need of blood or blood derivatives.

The blood pledge cards are to be distributed through the local school system, as well as in other ways — and the fact that you may live in Nez Perce county has nothing to do with it — for the blood not sent to our fighting men will be left at Lewiston as well as Moscow.

It is felt that residents of the Kendrick-Juliaetta area are willing to do this part, and the giving of blood is a very important one. If the 200 signers can be secured, the donation can be made at Kendrick, probably in the gymnasium, where proper facilities and able medical attention will be furnished by the American Red Cross.

You will note that the card bears a place for "Credit", so you may "credit" the Grange, the school, your favorite lodge, or any other organization to which you may happen to belong.

Anyone between the ages of 21 and 60 is eligible to participate. Those between the ages of 18 and 20, inclusive are eligible with parents consent.

Each donor will receive a "pocket card" carrying his or her name, and blood type, with might prove of real benefit in an emergency.

In case you do not receive a donor card from the school, you may obtain one of these cards from L. D. Crocker at the Farmers Bank, or from Dr. Geo. W. McKeever.

Don't let the address on the card worry you — it can be Kendrick.

## Student Draft Status

U. of I. Moscow — Freshmen students at the University of Idaho are going to be notified sooner than they think of their selection for advanced army and air force ROTC training, which, under current directives, carries with it deferment from the draft.

Selection was originally set for the end of February, but under the speed-up program the freshmen will be notified within the next ten days. ROTC officials announced this week. The present program takes much of the guesswork out of a student's plans. As long as he remains in good standing in the ROTC and on the university, he is deferred until graduation. Upon receiving a reserve commission, he agrees to serve on active duty for two years if he should be called.

Under the navy ROTC program at the university, a student selected for the four-year course if deferred upon signing up for it.

## Clover Seed Identification

Boise — Uniform terms of identification apply to red clover seed raised in Idaho and other western states. Standard tag names have been adopted to clarify the situation for growers and dealers. Eugene W. Whitman, University of Idaho extension agronomist and state seed commissioner, and Carl Blackburn, manager of the Idaho Crop Improvement association, said Idaho had accepted the tag names "foundation," "registered" and "certified."

Only foundation and registered clover seed of the 1950 crop is eligible for replanting for certification, Whitman said. Certified seed is the commercial crop that will be used only for hay and forage production.

The terms, he pointed out, do not apply to any clover tagged in 1949. He advised growers or dealers holding seed from that crop to check with the crop improvement association representatives as to its eligibility for planting.

Most of Idaho's red clover is of the Kenland variety.

## Town Team Loses To Asotin

Monday evening, in the local gymnasium, only a few local basketball fans witnessed the very exciting game between the Kendrick Town team and the club from Asotin. Proceeds from the game were donated to the March of Dimes campaign.

Kendrick led throughout almost all of the game, but could not hold their leadership when the strong Asotin club put on a rally in the final minutes of play to win 44-43.

Kendrick led at the half 30-23, but the men from Asotin were determined to hold their first-place standing in the Lewis-Clark League by dumping the local boys. Hollenbeck led all scoring with 13 points for Asotin, and Kendrick's Denny Racket and Tom Peters each scored eight points to lead the local squad. The smelly crowd got their money's worth of basketball. Undoubtedly the cold cut deeply into attendance.

## Icy Spots On Roads

In general, roads in this section are in excellent condition — for winter, but occasionally there is to be found an icy spot, of which drivers should beware.

The head of the Wauchner Gulch grade is described as a sheet of ice" at this time, and chains are almost a "must" to negotiate this stretch.

There are also other brief icy spots on the Brady Gulch road, and on the Kendrick-Deary highway — but a bit of caution enables drivers to negotiate them easily.

These latter are said to be caused by culverts freezing up, due to the lack of snow covering, and the water then spilling out over the roadway. The road to Lewiston is bare and in excellent shape, although the driver would do well to keep watch for rocks which may roll down from the bluffs above.

## WHAT HAPPENED HERE TWENTY YEARS AGO

### Bear Ridge

The community here put up ice from the Claude Jones pond last Tuesday. Oscar Slind and sister, Mrs. Halvor Lien, were Lewiston visitors Wednesday. John and Dewey Galloway shipped a carload of cattle, sheep and hogs to Spokane this week.

### Crecent

Mrs. Rose Farrington treated the school to ice cream Monday in honor of her son Loyd's ninth birthday anniversary. Mrs. Bill Dorendorf and children spent Thursday with Mrs. Anna Kimbley.

### The dance given at the Axel Swanson home Saturday night seems to have been an enjoyable affair, as the guests didn't go home until morning.

### Teakem

Mrs. Wm. Groseclose and son Bruce motored to Lewiston last Thursday. Ed Choute has been hauling fence posts for the Lentie place. Mr. and Mrs. John Lind and Rev. and Mrs. Pike were dinner guests of Mr. and Mrs. Edgar Weakley, Sunday.

### Cavendish

Rev. Calvert is holding revival meetings in Tarry's hall. He is having very good attendance.

### Appendectomy

Miss Myrtle Gertje, daughter of Mr. and Mrs. Ed. Gertje, was operated on for appendicitis at St. Joseph's hospital, Monday.

### Baby Daughter

Mr. and Mrs. Elmer Stuart of Juliaetta are the proud parents of a baby daughter, born Sunday, Jan. 18.

### Birthday Surprise

Mrs. Edgar Leig surprised her son Roy on his 15th birthday anniversary with a party, which was held on Jan. 22, by inviting in a few of his friends — a 6:30 dinner was served by his mother. Guests were Johnny Kite, Garth Hill, Oscar Onstott, Karl Emery and Harold Abrams.

### Kendrick can boast a little, as Mrs. Clyde Daugherty brought in a big bouquet of pansies this week that were picked from her flower beds. Also, pussy willows are sprouting, several armloads have been brought to the Gazette office.

### There was a big turn out at the Gun Club Sunday. High scorers for the day were Frank Crocker 22, Wade Keene 22 and Herman Schupfer 21.

### Among those called to serve on the jury are the following: Kendrick: George Davidson, Ira Havens, Harry Bancroft; Bear ridge — Jim Nelson and K. D. Ingle.

### Mr. and Mrs. Herman Meyer have returned from a six-week trip to Missouri. Mr. Meyer says the dry weather is continuing there and is even worse than last year.

### Southwick

Mrs. Elwood Pearson was a dinner guest of Mrs. Ben McCoy, Thursday, on her way to Kendrick. Mr. and Mrs. Arnie Cuddy visited Tuesday with Mr. and Mrs. Roy Southwick.

### Thursday's Markets

Wheat: White, sacked, 47c; white, bulk, 44c; Red, 44c; red, bulk, 41c. Beans: White, \$3.00; reds, \$1.75; oats, 75c; barley, 80c.

## News Very Scarce

This is another one of those weeks when it seems as if there is just nothing going on that will "make news." Several of our country correspondents called, stating, "No news this week. It's so cold nobody has gone anywhere or done anything that is worthy of mention."

## W. S. C. S. Meets Friday

The Kendrick W. S. C. S. will meet Friday at 2:15 in the home of Mrs. Bob Magnuson.

Mrs. D. A. Christensen has charge of the program, and Mrs. Howard Hoffman will lead the devotional.

Co-hostesses for the afternoon will be the Mesdames Harley Eichner and Marvin Long.

## Work On Elevator Suspended

Pending the breaking up of the present cold snap, work on the new bins, chop house and roller mill at the Lewiston Grain Growers elevator in the west part of town has been suspended, as workmen say fingers got too numb to hold nails.

## P.-T. A. Study Group

The P.-T. A. Study Group will meet Monday evening at the home of Mrs. Bob Magnuson at 8:00 o'clock.

Attendance has been down — so all are asked to please be present.

## "Mother" Singers To Rehearse

"Mother" singers for the P.-T. A. program will rehearse at the Jasper Nutting home at 7:30 p. m. Feb. 1. Remember — all mothers who like to sing are urged to be present.

A study of windbreaks at Twin Falls, showed increases in crop yield of as much as 6 percent on a 40-acre field adjoining the windbreak.

## GRAIN MARKETS UNSETTLED; PRICE CHANGES IRREGULAR

Grain markets were unsettled during the week, just past, and price changes were irregular, according to reports to the Department of Agriculture. Uncertainty in respect to anticipated price ceilings and political developments in the Korean situation were principally responsible for the unsettled market, according to trade reports. Wheat prices strengthened as a result of smaller offerings and a more active inquiry to fill recent export sales. An advance of 2c to 3c per bushel occurred in central western markets and of about 4c per bushel in the Pacific Northwest. Feed grains fluctuated within narrow limits, reflecting principally local supply and demand conditions.

Stocks of wheat remaining in all positions, at the first of January, were the third largest on record and totaled 998 million bushels, which was about 90 million bushels more than on January 1, 1950. The larger stocks reflected the reduced disappearance, which for the first six months of the season, totaled only 454 million bushels, and was the smallest since 1942. Exports dropped about 56 million bushels below last season, while the amount used for feed was only about half that of the same period a year ago.

Supplies of wheat remaining for export or carry-over in the four important producing countries, including the United States, Canada, Argentina and Australia on January 1 were approximately 1,175 million bushels. Wheat supplies in Australia and Argentina this year are about the same as last year, with an increase in Argentina about offsetting the smaller crop in Australia. Exports of wheat, including flour, from the U. S. and Canada, to January 1, this season, were about 75 million bushels below the same months last season.

Marketings of wheat, for the country as a whole, dropped off materially during the week, partly as a result of a shortage of boxcars, and arrivals at terminals totaled slightly less than 5 million bushels. Milling inquiry was fairly active for choice milling wheat, while exporters were in the market for supplies to meet recent sales. Sales by the Commodity Credit Corporation under the International Wheat agreement, however, dropped to about 5 million bushels during the week, which brought the revised total to nearly 151 million bushels. The CCC purchased nearly 2,200,000 bushels of wheat in the Pacific Northwest during the same period. Prices in the cash market generally followed the trend in futures and were 2c to 4c per bushel higher than last week, with No. 2 hard winter wheat being priced at \$2.44 per bushel in Chicago.

Influenced by a continued active demand from exporters to cover recent sales and purchases of nearly 2,200,000 bushels of wheat by the CCC, wheat prices at Portland showed a net gain of 4c per bushel for the week. Country selling became more liberal as prices advanced and with the increasing shortage of rail cars the market displayed an easier tone at the close and values were down about 1c from the best levels reached during the week.

Receipts of wheat at principal Pacific Northwest terminals declined further and 824 cars arrived compared with 868 a week ago. Millers provided only a moderate demand following heavy buying earlier in the month. Current wheat prices reached the highest level since mid-1948 and were 11c above the loan value at Portland. Purchases by the CCC for the week were the first since March, 1950. At Portland, soft white, white club and ordinary hard red winter wheat sold at \$2.32 per bushel, all basis No. 1 grade, delivered coast, 15-day shipment. Spot wheat at Portland was nominally quoted at \$2.33 for No. 1.

The San Francisco wheat market was unchanged, with California No. 1 hard and soft white quoted at \$2.25 per bushel, bulk, delivered. Oregon-Washington No. 1 soft white was quoted at \$2.55 per bushel, bulk, delivered.

Oats prices in the Pacific Northwest continued on an upward trend, largely influenced by scarce supplies. The bid price, at the markets close, at Portland, for No. 2 white oats, 38 pounds, was around \$63.00 per ton, basis delivered coast, 15-day shipment. The same grade, traded at from \$64.50 to \$65.00 per ton at Portland. Demand continued good. Current market prices showed a net gain of \$1.50 per ton for the week. Receipts at the principal terminals totaled only 10 cars.

At Portland good feed barley was in fair demand and prices held about steady from last week, with No. 2 western, 45 pounds, trading at about \$60.50 per ton. The bid price for the same grade was unchanged at around \$59.50 per ton, basis delivered coast, 15-day shipment. There was a slightly improved inquiry for milling barley and dealer bids were generally steady at \$2.00 per ton higher than last week.

Trading was quite light with the growers displaying a strong holding tendency because of the higher prices for feed barley and other grains.

## With University Singers

U. of I. Moscow — Five students from Kendrick attending the University of Idaho appeared with the University Singers in their first concert of the new year. "A German Requiem" by Johannes Brahms was presented by the group, which includes Marilyn Cox, Patricia Schupfer, Patricia Long, Marilynn Brooks and Chloë Francisca McKeever.

### PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Mr. and Mrs. Roger Maloney, Seattle, arrived here Saturday from Seattle, visiting until Tuesday with her parents, Mr. and Mrs. Wayne Kuykendall, and other relatives. They report the Snoqualmie Pass in good condition, and road generally fine for winter travel.

Mr. and Mrs. Chas. Greenwood, who have been living at Coeur d'Alene for the past year, are now making their home at Juliaetta, following a visit here with her mother, Mrs. Grace Souders.

Mr. and Mrs. Herman Meyer have received word from their daughter, Miss Dorothy Meyer, a missionary in India, that she has a new address, and "was up to her ears" in work as well as learning the language of that country.

Mr. and Mrs. Ed. Halseth have received word from their twin sons, Gerald and Harold Halseth, that they have been transferred from Camp Cook to Fort Benning, Ga. Their new addresses follow: Ret. Gerald L. Halseth, U. S. 56089096; Service Co., 22nd Inf. Regt., Fort Benning, Ga. Ret. Harold G. Halseth, U. S. 56089102; 22nd Inf., Regt., Fort Benning, Ga.

Mr. and Mrs. Teddy Deobald and daughter of Kennewick, spent the week-end here in the home of their parents, Mr. and Mrs. E. A. Deobald and Mr. and Mrs. E. M. White. Mrs. Winnie Huff, Lewiston, arrived here Saturday for a visit in the home of her daughter, Mrs. E. M. White and family.

Pat McCreary, Spokane, spent the week-end at home with her parents, Mr. and Mrs. W. L. McCreary.

R. L. Blewett, Mrs. Ben P. Cook, Floyd Millard, Mr. and Mrs. Ross Armitage and Mr. and Mrs. Walter Brocke attended the basketball game in Moscow last Saturday evening — seeing Idaho defeat the Washington Huskies.

Mr. and Mrs. L. D. Goss have received word from their son, Pvt. Dale Goss, that he is now stationed at Cheyenne, Wyo., where he is attending a 30-week school on radio.

Mr. and Mrs. Bob Watts returned to Coeur d'Alene Monday, following a week's visit here with his parents, Mr. and Mrs. W. A. Watts.

### MORE SCHOOL NOTES

by the water, which trickled its way from the top floor to basement.

### Tigers Trim Panthers

Backed by the accurate shooting of Orville Halseth, center, the Kendrick High School Tigers romped to a 46-41 victory over the Asotin Panthers last Tuesday evening in the local gymnasium. The Panthers held the lead through the first half and the score board read 22-19, Asotin. However, with the beginning of the third "stanza" Kendrick soon took the lead and held it throughout the remainder of the game. Kendrick led at the end of the third quarter Kendrick's Max Clemenhagen went on a "scoring spree" by stealing the ball — netting 4 points in less than 20 seconds.

Orville Halseth acted as "king-pin" for the Tigers, scoring 23 points. Tetwiler dropped in 10 points to lead the Asotin scoring. The game was fast and clean, with Asotin using a "zone defense" and Kendrick the "man-to-man" system.

The undefeated Kendrick "B" squad won its 11th tussel as it outplayed the Asotin Bs 35-29. Kendrick led at the half-way mark 22-12. Ronald Craig scored 9 points for the local team and Van Pelt dropped in 8 for Asotin. Both Kendrick teams will see action against the two Troy teams this Friday evening in the Kendrick gym.

### New Students

Entering from the Moscow High school, Connie and Harold Freeman enrolled here Monday. Connie, a freshman, has boosted her class to a total of 38. Harold's enrollment increases the Junior class to 30 students. Both began classes on Monday.

### Gold Hill School Notes

Our mid-year tests were completed Thursday. Pupils receiving 100 percent in that Spelling test were: Second grade, Ellen Weaver, Freddy Foster and Jerome Pederson. Third grade, Frances Rowden. Fourth grade — Janice Foster.

The Fifth grade has completed "Working With Science" and has begun the new Health book, "You."

The Fourth grade has completed the Idaho History and are now studying "Visits In Other Lands."

The winners of the "Health" contest were entertained at a party by the losers, Friday afternoon.

Children having perfect attendance during the past nine weeks are: Janice and Gene Foster, Frances Rowden, Elmer Weaver and Douglas Pederson. Those having perfect attendance during the first half of the term are: Elmer Weaver, Gene Foster, Frances Rowden and Douglas Pederson.

Recently we combined all of our English classes for one period and all of the pupils joined in an "Amateur Radio Broadcasting Program" with each child learning a poem, song, or having something of interest to contribute.

Mrs. Perryman was unable to teach last week, being ill with the mumps, so Mrs. Erlwine taught during her absence.

We are beginning a Spelling contest.

### Work Train Leaves

The Northern Pacific work train which has been stationed here and at the siding below Juliaetta for the past several months, while the rebuilding of roadbed and track was in progress, left Wednesday morning of this week — its work completed. We understand that it will be located at Moses Lake, Wn.

Almost all of the roadbed and track from Arrow to Kendrick was rebuilt, including re-ballasting. We have no estimate of the cost, but the operations must have run into many thousands of dollars.

Get that fresh fish at Blewett's Cash Grocery every Thursday. Delicious, nutritious. 1-adv.

### Fur Coated Plants Studied By Smithsonian Botanists

A group of "fur-coated" plants is being studied by Smithsonian institution botanists. These plants have a dense, thickly matted, wool-like covering of long, tangled hairs on their leaves and inflorescences. In their native habitat—the northern Andes—they are known as "frailejones," because of the resemblance of their covering to the cloaks worn by some orders of priests.

The frailejones belong to the botanical genus Espeletia, a member of the daisy family. More than 60 species are known, according to the latest tabulation of Dr. Albert C. Smith, of the Smithsonian staff, who has specialized in them.

These strange plants range in the Andes from the State of Miranda in Venezuela westward and southward into the cordilleras of Colombia and into the northern part of Ecuador. In altitude they occur from an elevation of about 9,000 feet upward to more than 2½ miles, only one species being found as low as 5,000 feet. Different species are found on each complex of paramos, as the extensive areas of alpine meadows above timber line are called in the Andes. Some of the habitats are quite cold, but says Dr. Smith, the strange "fur coats" can hardly be considered an adaptation to cold. Many other plants of colder climates do not have such an adaptation.

The espeletias often grow very densely, in some places constituting the predominant feature of the vegetation. Some are simple-stemmed shrubs, twice as high as a man, with trunks a foot in diameter, while others are small herbs. Many have vivid yellow flower heads an inch or more in diameter.

### Study of Unicorn Designs Dismisses Fable Theory

The unicorn—fabulous beast of medieval art—was not entirely a product of the imagination. In the Muslim world, stretching from Moorish Spain to the famed cities of Bukhara and Samarkand in central Asia, its prototype almost unquestionably was the one-horned rhinoceros of India whose form became weirdly distorted in reports of travelers filtered through popular legend.

This is the conclusion of Dr. Richard Ettinghausen after an intensive study of unicorn designs on medieval luster tiles, silver-inlaid bronze vessels, Persian miniatures, and Indian carpets in both America and Europe.

The unicorn is pictured variously as a one-horned cow, lion, antelope, and horse. Sometimes it is represented with wings. Representations in both Muslim and Christian medieval art often roughly resemble each other, but Dr. Ettinghausen confines his study to the former, which are much less known than the western variety often found on tapestries and illuminated manuscripts.

The one-horned rhino was, of course, well known in India, and it was natural that various accounts of it should have been brought back to the near east and Europe. Few of the travelers who made the reports, however, actually ever saw one of the animals and they gave their imaginations free play.

### German Traffic Point

Helmstedt, Germany, check point for the Russians' off-again, on-again "slowdown" of Berlin-bound highway traffic, has seen European history made for more than a thousand years. Situated in what is now the British zone at its eastern boundary with the Soviet-held territory in north central Germany, Helmstedt is believed to have been founded about 900, notes the National Geographic Society. By the late 11th century, it was recognized as a settlement with civic rights. That Helmstedt's location was a strategic one on early European routes is shown by the fact that it became a member, around the middle 1400's, of the far-reaching alliance of trade centers called the Hanseatic League.

### Units of Length

Probably the smallest unit of length in wide use, to which a special name is given, is the angstrom. It finds employment in expressing the wavelengths of light and the dimensions of atoms, and it is equal to one ten millionth of a millimeter. There are about 253,999,800 angstroms in an inch. The largest unit of length is the megaparsec, used by astronomers in connection with the distances of remote galaxies. It is a million times a parsec, which is the distance that a beam of light (moving at 186,000 miles per second) will travel in 3.26 years.

### Electromagnetic Induction

Electromagnetic induction is usually demonstrated by a coil of wire connected to a sensitive meter for measuring electric current. If a magnet is pushed through the coil, the meter shows that a current is flowing. The effect is the same if the magnet is fixed, and the coil moved. This was discovered independently, about 1830, by Joseph Henry, in the United States, and Michael Faraday, in England. It was one of the basic discoveries in the history of science, and the principle is used today in all electrical generators.

PHONE 051 Frank Abrams KENDRICK

IDAHO'S STATE MARCH OF DIMES CHAIRMAN, Mr. Robert S. Overstreet, and David F. Weeks, State Representative for the National Foundation for Infantile Paralysis, examine the polio trends in Idaho and the nation prior to the Idaho March of Dimes campaign, to be conducted January 15 to 31st. National maps (from left to right 1947, 1948, and 1949) show major epidemic areas. The State map indicates cases reported during 1950, the third worst outbreak in Idaho history. Counties where figures appear indicate the number of cases reported while the county would not be considered an epidemic area. Since 1947, one out of every 502 Idahoans have been stricken with this disease. The Foundation and its local county chapters have expended over \$2,000,000 for financial assistance to Idaho polio patients.

#### A BIT OF IDAHO HISTORY

**Marriage and Divorce**  
Marriages may have been made in heaven during Idaho's territorial days, but they often wound up in matrimony heretofore and new ex-the legislature. It was the practice for a number of years for the Territorial Legislature to dissolve the bonds of matrimony; the members not only enacted laws, but sat as a divorce court. After hearing the evidence, the legislators passed an act which di-

voiced the couple and read like this: "Be it enacted by the Legislative Assembly of the Territory of Idaho, as follows:  
"Section 1. That the bonds of matrimony heretofore and new existing between Martin Fallon and Mary Fallon, his wife, be, and the same are hereby dissolved, and declared void.  
"Section 2. This act shall take effect and be in force from and after its passage."  
Approved February 9, 1881."

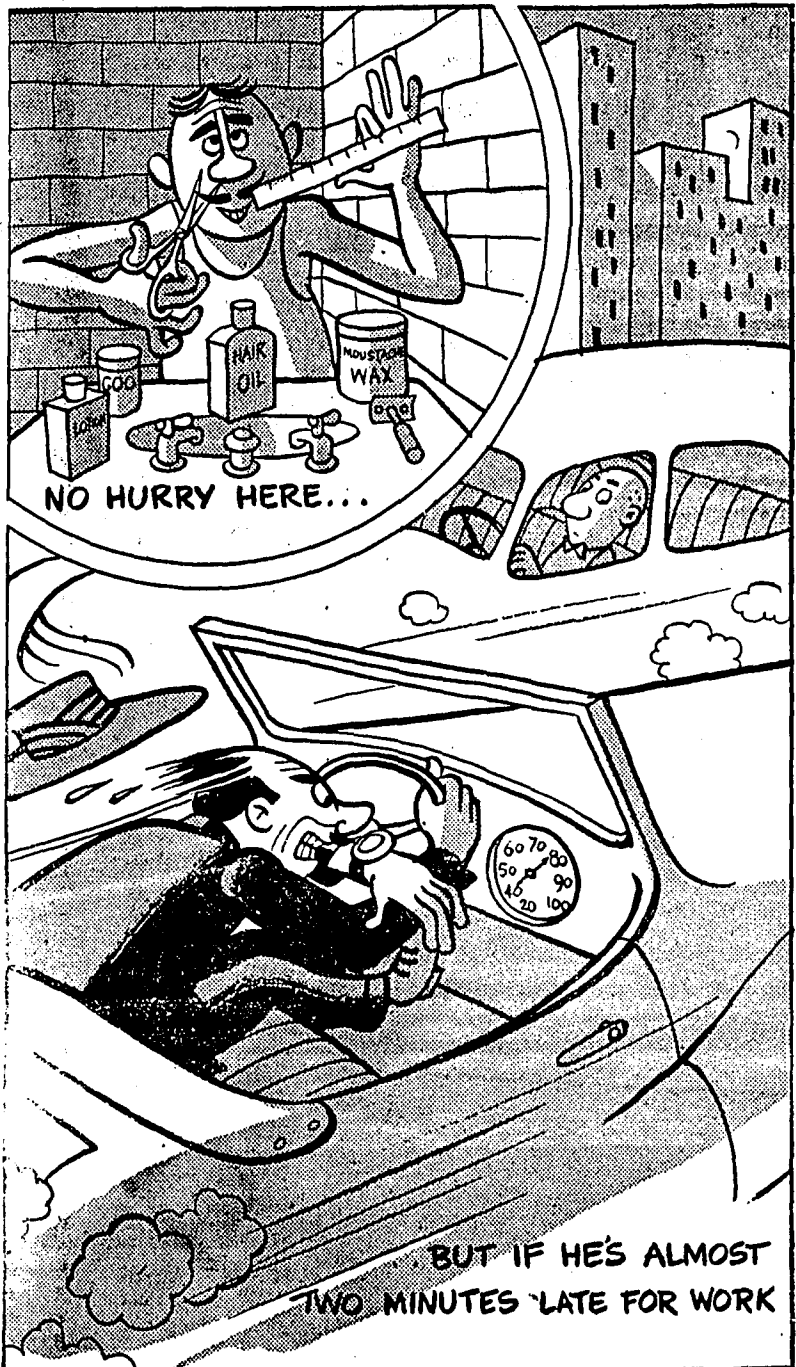

#### New Life When Railroads Came

After gold was discovered in 1861, the Territory of Idaho fairly boomed for a decade, with towns and cities springing up almost overnight. But since most of the mining was placer, the gold soon gave out for profitable working. By 1875 the Territory was in the doldrums, with thousands of people leaving the state to seek riches elsewhere.

Then came a new decade of progress and prosperity, from 1880 to 1890, when Idaho became a state. These years witnessed the most extensive and permanent improvements yet made within the Territory. These were the years of railroad building. During that time the Oregon Short Line was built through southern Idaho, with branches constructed into Hailey and the Wood River area as well as from Boise to Nampa. The Northern Pacific built across the Panhandle and the Moscow branch of the OVR & N came into use. Rails were laid into Wardner and Wallace, giving impetus to the development of the Coeur d'Alene mines, the most permanent as well as the richest development ever known in Idaho. New towns sprang up along these rail lines, replacing the old and fossilized mining boom towns.

### Proper Milk Cooling Necessary for Grade Warm Milk Excellent For Bacteria Breeding

Milk must be cooled properly in order to be classed as Grade A. Unsatisfactory cooling can make good pasture, a healthy herd and observance of all health and management rules look mighty sick. To preserve quality, milk should be cooled to 50 degrees or lower soon after it is drawn. Milk is cooled in one of three ways on the farm: by water, ice and mechanical refrigeration. Electric milk coolers are thermostatically controlled and use from 25 to 30 KWH per month to cool 10

Farmer sets timer to operate an extra agitator on a conventional milk cooler.

gallons of milk per day. Even they, however, might be improved. One attempt to do this is illustrated in the accompanying photograph. It shows a farmer setting a timer to operate an extra agitator on a conventional cooler. By means of this special equipment, he starts building up the ice bank in the cooler the minute the milk cans are immersed. There is no waiting for the escaping heat from the milk to set the cooling mechanism in action.

### Small Acreage Farmers Practice Conservation

Small-farm operators are beginning to change their belief that soil conservation is a luxury they can't afford. Thousands of small farms are now practicing all-out soil conservation with exciting results. Back in the 1930's, a farming magazine recalls, farmers were told to cut down on corn and small grain. The idea was to keep more of the land in grass and most of the rest in hay crops most of the time. After giving soil conservation a try, thousands of operators of small farms have now concluded, the magazine finds, that one can raise more of everything. Some have doubled production in just a few years under soil conservation practices.

#### Broilers Need Water

Broilers need water to put on weight. Laying hens need it to maintain satisfactory egg production. And they need it all year round—winter and summer. In years past, poultry waterers required almost constant attention during the winter. Often the battle against ice was fought with steaming kettles of water. One method of overcoming this problem is presented in the accompanying illustration. It shows the installation of a heat lamp over a common type of waterer. The warmth produced is sufficient to keep the water free of ice as well as to prevent litter from becoming wet around the waterer.

### Dry Silage Sometimes Contains Few Vitamins

Dry silage, which has been subjected to long-continued, high heat of fermentation, has little carotene of Vitamin-A content left in it. Carotene usually is badly needed to supplement the other rations. The farmer with several silos to fill should start several days ahead of when the kernels have finished denting to avoid ending up the silo-filling with corn that is "rattle dry" as it is blown in.

**How to Make Home Piano Appear Less Conspicuous**

How to make your piano as decorative as if it is musical is often a problem in home decorations, points out Mrs. Kate C. Archer, extension specialist in home furnishings, Kansas State college, Manhattan. With the introduction of the new spinet-type pianos much better arrangements are possible, as well as novel ways of placing the old upright models.

"If your upright piano has a beautiful finish and a nice grace of line it is most pleasing with no decorative articles on it," says Mrs. Archer. "If any articles are placed on top of it, they should be low ones. The horizontal picture is best above a piano.

"However, if your upright is quite undistinguished you might consider painting it the same hue as walls, or picking up the background color of the wallpaper. Pianos can be used as space dividers between living and dining rooms or may be placed in an alcove in a bedroom."

Sometimes it is satisfactory to build in a space that fits the piano with wall space on either side given over to radio or record player or book cases. Such a musical group, with chairs placed for easy listening, is a nice solution.

A piano always appears larger when it is against a narrow wall space, particularly between two doors or two windows; when the end is close to an entrance; when it is against the best-lighted or most prominent wall when it is across, or when it stands alone against a long wall without other furniture near it.

**'Big Top' Grows Bigger, Circuses Become Scarcer**

Are new dangers looming for the high wire walkers of the circus, the daring bareback riders, and death-defying trapeze artists? Yes, say the "big top's" friends, but not in the form of the ever-present risks to individual performers. The fear is that a slow process of attrition may be menacing the circus itself.

A half dozen circuses have closed during the current season. Only 10 are left of the scores which once flourished in the U.S.

America's spangled show of feats and freaks, of wild animals and wistful clowns, has had many ups and downs since it first took to railway wheels more than three quarters of a century ago. Today the paradox of the "Greatest Show on Earth" is that, while numbers dwindle and costs mount, the remaining outfits grow bigger and more spectacular.

Last year the largest of the rolling shows travelled some 19,000 miles, used 32 railroads, and gave 415 performances before nearly 3,500,000 people. It carried motorized caravans of set-up seats, and spread the world's biggest piece of canvas—30,000 square yards of it—in a tent that can now be raised by mechanical stake drivers and tractor power.

**Early Railroads**

The earliest railroads in the United States were built of wooden rails capped with thin strips, or "straps," of iron to provide a running surface for the wheels. These were called "straprails." Iron rails 10 feet in length were imported from England as early as 1831. The first iron rails of American design were rolled in the United States in 1844. By 1850 most railroads were being built of iron rails. The first Bessemer steel rails manufactured in the United States were rolled at the North Chicago Rolling Mills on May 25, 1865, and by 1880 about 30 per cent of all tracks in the United States were laid with steel rails. At the end of another ten years, 80 per cent of the country's mileage was equipped with steel rails, and by the late 1890's steel had almost completely replaced iron.

**It's in the Finish**

Simulated pearls are no longer thought of as imitations, but as fashion accessories, acceptable in themselves. The impression of depth and softness in a pearl is the result of light reflections from a multitude of points within the pearly film, making it impossible to focus on any single layer. In simulated pearls, this effect is conveyed by layers of crystals incorporated in the finish which is applied to plastic and glass beads. The crystals used are genuine or pearl essence crystals. They are obtained from fish scales and are only 40 millionths of an inch in thickness.

**Gregorian Calendar**

In 1582, Pope Gregory VIII ordained a simple reform. Astronomers, showed him that the sun-year is some 11 minutes less than 365 1/4 days. In the course of a dozen Julian centuries, spring's first day had moved forward from March 21 to March 11.

To correct this, Gregory directed that October 4, 1582, be followed by October 15, and that leap-year days be omitted in the last year of each century except years divisible by 400 (as 1600). His reform reduced the annual error to 26 seconds, which will add up to one day by about 4900 A.D.

**TVA Not All "Honey"**  
 Much has been said regarding the "progress" that will come to the Northwest as a result of a CVA. The following brief article quoted from the Tupelo, Mississippi "Journal" which is in the heart of the TVA area (July 28, 1950), indicates that planned economy with almost limitless millions of taxpayers dollars to support it, does not bring the answer which is publicized:  
 "Thoughtful people of our area are deeply concerned about our rapid loss of population and our inability to provide jobs either for our boys and girls as they reach maturity or for our people being replaced by farm mechanization. During the last ten years between 125,000 and 150,000 more people have left the 21 counties of northeast Mississippi than have moved into them.  
 "Specifically, some of us are convinced that the TVA area of Mississippi is suffering from lack of any area-wide effort to attract or to develop new payrolls. The TVA area of Mississippi has been deprived of contracts with the outside world normally provided by the giant power networks, yet they have been offered no integrated substitute under the TVA power program. Even the municipal power systems, I am informed, are not permitted to spend money in a direct effort to obtain new industrial power users.  
 "The result is that northeast Mississippi is being sapped of her greatest resource, her people, at the fastest rate in history in spite of the fact that the TVA is making life easier and more pleasant for our area. Thus far the TVA has shown considerable concern over the loss of our soil but apparently none over the loss of our people—some 125,000 of them in the last ten years. What we feel is needed, therefore, is an all-out unified area-wide effort

both to develop payrolls from within and to attract them from without." Our Comment: It looks to us that what we need is a return to the good old system of free enterprise—the system that built America—and less of bureaucratic "planned economy!"

(A woman is said to be as old as she looks—a man as old as he feels.

University of Idaho experiment station farms produced 381,000 lbs. of certified seed last year.

Balanced farming is said to be "an attempt to balance farm earnings against family yearnings."

Remember—the busiest man is the happiest man.

the Railroads **RESPECT...**

the Labor Unions seek to **REPUDIATE...**

this agreement!

What is the **TRUTH?**

At various states in the present dispute with the brotherhoods of railroad operating employees ... the railroads agreed to arbitrate. The union leaders refused.

... the railroads accepted the recommendations of President Truman's Emergency Board. The union leaders refused.

... the railroads accepted the White House proposal of August 19, 1950. The union leaders refused.

Finally an Agreement was signed at the White House on December 21, 1950. Now the union leaders seek to repudiate the Agreement.

The railroads stand ready to put the terms of this Agreement into effect immediately, with back pay at the rates and date indicated.

The Agreement is given in full below.

(2)

8. Agreement embodying principles applicable to yardmasters to be entered into for benefit of yardmasters.

9. Effective October 1, 1950, the basic hours of dining car stewards shall be reduced from 225 to 205 hours per month; no penalty overtime to accrue until 240 hours have been worked, the hours between 205 and 240 to be paid for at the pro rata rate.

Effective February 1, 1951, overtime at time and one-half shall accrue after 220 hours have been worked. The basic monthly salary to be paid for the 205-hour month shall be the same as that now paid for the 225-hour month. Except that four dollars and ten cents (\$4.10) shall be added to the present monthly rate effective January 1, 1951.

10. In consideration of above, this agreement to be effective until October 1, 1953, and thereafter until changed or modified under provisions of Railway Labor Act. Moratorium on proposals for changes in wages or rules until October 1, 1953; as follows:

No proposals for changes in rates of pay; rules or working conditions will be initiated or progressed by the employees against any carrier or by any carrier against its employees; parties hereto, within a period of three years from October 1, 1950, except such proposals for changes in rules or working conditions which may have been initiated prior to June 1, 1950. Provided, however, that if as the result of government wage stabilization policy, workers generally have been permitted to receive so-called annual improvement increases, the parties may meet with Doctor Steelman on or after July 1, 1952, to discuss whether or not further wage adjustments for employees covered by this agreement are justified, in addition to increases received under the cost of living formula. At the request of either party for such a meeting, Doctor Steelman shall fix the time and place for such meeting. Doctor Steelman and the parties may secure information from the wage stabilization authorities or other government agencies. If the parties are unable to agree at such conferences whether or not further wage adjustments are justified

MEMORANDUM OF AGREEMENT

Washington, D. C. December 21, 1950

1. Establish 40 hour week for yardmen with increase of 23 cents effective October 1, 1950, and additional 2 cents effective January 1, 1951.
2. Set aside 40 hour week agreement until January 1, 1952, and establish 6 day work week for yardmen. Effective with the first pay roll period after 30 days from the date of execution of the formal agreement, yardmen required by the carrier to work on the 7th day to be paid overtime rates except engineers who shall receive straight time rates for the 7th day. This does not create guarantees where they do not now exist. On and after October 1, 1951, three months' notice to be given of desire to go on 40 hour week. Provide for consideration of availability of manpower and 4 cents per hour if and when the 40 hour week actually becomes effective.
3. Settle rules for 40 hour week and 6 day week.
4. Grant yard conductors and brakemen other rules such as daily earnings minimum, car retarder operators and No. 81.
5. Settle following rules:
  - Initial Terminal Delay (Conductors and Trainmen)
  - Interdivisional Runs
  - Pooling Caboose (Conductors and Trainmen)
  - Reporting for Duty
  - More than One Class of Service
  - Switching Limits
  - Air Hose (Conductors and Trainmen)
  - Western Differential and Double Header and Tonnage Limitation (Conductors and Trainmen, all Territories)
6. Road men to receive 5 cents per hour increase effective October 1, 1950 and additional 5 cents per hour increase effective January 1, 1951.
7. Quarterly adjustment of wages on basis of cost of living index (1 point to equal 1¢ per hour. First adjustment April 1, 1951. Base to be 176).

(3)

they shall ask the President of the United States to appoint a referee who shall sit with them and consider all pertinent information; and decide promptly whether further wage increases are justified and, if so, what such increases should be, and the effective date thereof. The carrier representatives shall have one vote, the employee representatives shall have one vote and the referee shall have one vote.

11. If the parties cannot agree on details of agreement or rules they shall be submitted to John R. Steelman for final decision.

The usual protections for arbitrators, miscellaneous rates, special allowances, and existing money differentials above existing standard daily rates will be included in the formal agreement.

\*\* The foregoing will not debar management and committees on individual railroads from mutually agreeing upon changes in rates, rules and working conditions of employees covered by this agreement.

**ARROW HAPPENINGS**

Rev. Edwin Smith and his sister, Louise, are in Los Angeles, Calif., holding revival meetings.

Harry Sampson is installing a pressure pump and water system in his well, and putting a bathroom in his home.

Ed. Needham recently built a new garage.

Allan Schofield of North Dakota is visiting at the H. O. Woodruff home.

The B. B. railroad gang are doing some work on the railroad bridges at Arrow.

The Billy Smith family have completed work on the upstairs portion of their home, and have moved in. They have been living in the basement for some time.

Francis Broncheau spent last Thursday at the Ed. Groseclose home.

Thank You  
I wish to extend my sincere thanks to all my friends and neighbors for the many cheery cards and letters received during my recent illness. It is truly fine to be remembered. — Mrs. John Glenn.

**Tells Of Fairbanks Winters**

Mr. and Mrs. V. L. Dunham of Big Bear ridge have received two interesting letters from his sister and husband, Sgt. and Mrs. P. G. Paltz, who are stationed at Fairbanks, Alaska, and have kindly allowed us to use portions of these letters, as follows:

The first, dated Dec. 13, says: "We have had all kinds of temperatures since the last of October, when it went below zero. Most of November was cold, 20 to 30 below, and then down to 40 below Nov. 24, and 45 below the next night. Then it warmed right up to 22 above, and didn't get below zero for a week. Except for last Friday night, when it went to 34 below, it's been between 10 below and 15 above the rest of the time, which is quite pleasant. This is a dry cold and no wind, so it isn't hard to take. Our house is nice and warm and we wear warm clothes when we go out. I haven't worn my 'long-handles' yet, but I have some.

"Sure am learning the trials and tribulations of car operation in cold weather the hard way. From head-bolt heater to battery charger, I'm getting my experience the hard way. At night, remove battery and put on charger, and then in the morning re-install battery, hit the starter and hope the bendix kicks in. And sometimes does it ever hate to do just that. It's so cold at 40 below or so that the gas won't vaporize, hence the head-bolt heater. Transmission and rear end and steering gear cut 50-50 with kerosene. I had to do that as it wouldn't move or steer one morning. Thought I had it fixed, and the next morning it was 45 below and the dang front wheels wouldn't turn, so I repacked front wheel bearings at 32 below zero — and I had to pry the bearings off.

"So now I'm wondering what is next. Head-bolt heater, battery charger, comforter for the hood and radiator, gear grease cut 50-50, natural rubber inner tubes, de-frosters on front shields, on front windows, 2 new 180 degree thermostats, new hot-type spark plugs, and 5-W sub-zero oil. What's next? You tell me!

"No kidding, when it's 40 or more below, all this is necessary, or you might just as well ride the bus — and I expect to, plenty!

"When the temperature's down there the doors won't latch, light switch is frozen in, key hardly wants to turn, heater don't want to start up, and you, yourself, are boiling and sweating at 212 degrees — the boiling point of water. So she starts, and you finally shift gears by hauling and pulling, then you let up the clutch, and finally reach down and pull it up by hand. And you're off — riding on four tires which have a flat spot until you have gone a couple of blocks or so. Car feels like a truck, springs stiff, shocks froze and flat spots on the tires — all to ride three miles to work!

The second letter, dated Jan. 19, gives a brief resume of temperature readings as follows:

Thursday, Jan. 11. low, 70 below; high, 25 below; Friday, low, 24 below, high, 18 below; Saturday, low, 44 below, high 20 below; Sunday, low, 51 below, high, 44 below; Monday, low, 53 below, high, 48 below; Tuesday, low, 48 below, high 48 below. And last night when we went to bed (Wednesday) it was 60 below, right on the nose!"

**Correction Needed**  
From Mrs. Minnie E. Wetmore of Yakima, comes a correction for our article in the Jan. 11 issue regarding her son and beans raised in that area. She says, in part: "Harry is Water Master over a 60-mile stretch of the Roza project, from about Sunnyside toward Richland, rather than a 6-mile stretch. That job is field man over maintenance, as well as some office work. The ditch riders read the meters and measure out water to users. — And Ray's comparison was that dry-land grown beans have a much better flavor than irrigated ones, and to him, particularly, that means Potlatch beans."

Everything for building is available at the Kirkpatrick Lumber Co., Juliaetta. Low in price. 1-adv

**Milk Used as Plant Food in Experiment**  
**Scientists Report Milk Benefits Some Flowers**

Montana State college scientists report milk is as good as some flowers and vegetables as for babies.

The use of milk in horticulture, particularly in greenhouse operations, is new and still in the development stage. But many growers in the Pacific northwest already are reaping benefits.

Commercial flower producers say milk makes petunias grow faster,

Scientists report milk is good plant food for some flowers and vegetables, making them last longer, grow faster, and bear larger and more brilliant blooms.

last longer and bear larger and more brilliant blooms. It improves the color of roses, cinerarias and chrysanthemums. There are exceptions, including poinsettias and carnations.

Milk-fed vegetables also do much better than those grown under ordinary conditions.

The scientists reported the milk was fed either in dry or diluted fluid form. Further experiments with milk as a plant food are necessary before it is out of the development stage.

**Iowa Farm Earns \$4.50 Per Acre Each Month**

The average Iowa acre is earning between \$4.50 and \$5.00 a month, cash, the Iowa development commission reports. Which means that the average 160-acre farm, under good management, is bringing in \$768, gross per month.

Last year Iowa farmers made \$59.40 for each of the 34 1/2 million acres in farms in the Hawkeye state. That figures out \$4.95 per month, per acre, or \$495 per month for each 100 acres of Iowa land being farmed.

In the first six months of 1950 — the leaner half of the farmer's year — Iowa farm income came to \$27 per acre, or \$4.50 per month, per acre. That still is \$450 a month for every 100 acres of farm land.

The commission hastened to repeat that the figure is gross income. Out of it the farmer must pay for power and machinery, labor, feed, feeder stock and breeding stock, before he arrives at his own salary.

On a farm where there are many hogs to feed ideas that will save labor usually are appreciated. The storage tank for hog slop, shown in the above illustration, has been used on a number of farms successfully. Materials needed include two pieces of 3-inch pipe 6 inches long, one piece of 3-inch pipe 12 inches long and two 3-inch elbows and assemble them as shown in the illustration. Mount the barrel on a box 30 inches high, placed close to the fence so that the pipe may go through into the feeding trough. Make a plunger out of soft wood.

**U.S. Consumer Demands Better Quality Meats**

The national economic picture and the more nearly equalized meat production in relation to consumption are putting much greater emphasis on quality or grade of meat animals than was true in the last several years of meat scarcity, livestock specialists report.

Live stock producers are now attempting to produce animals which nearly meet consumer demand for quality product.

**Powder Proves Potent**  
U. of I., Moscow — Archie the cockroach is in trouble. Serious trouble. He no longer will have the run of the house when he invades a home. He will stub his toe, and his fall will be great. Archie, if he can read, must see the handwriting on the wall, and it is not pleasant, although only one word, "Chlordane" may appear.  
H. C. Manis, entomologist at the university, says Archie used to be one of the hardest of insects to discourage. Mr. and Mrs. Archie and all the many, many little Archies came out at night, had a gala time in the kitchen, and did a disappearing act when someone turned on the lights. It was all such fun. True, old insecticides got some of them, and it may be that Archie's joy was dimmed at times when he thought of some old cockroach pal that was no more. But "life is fleeting," sighed Archie. For the most part, he led the life of Riley.  
But that is past. Now there is a lethal 5 percent chlordane sprayed in a fine mist of odorless oil. That's for the upstairs rooms, kitchen, bath, and Archie's better haunts. In the basement, there is nothing to give warning. Nothing but an unnoticeable white film. Cruel homeowners use a pound of 50 percent chlordane wettable powder there. It makes from eight to ten gallons of spray when the water is added. Archie seldom notices the thin, white layer of chlordane when the water is gone. When he notices, it is too late.

# Potlatch Chief Sez

Published by the Kendrick Creamery

**HELLO, THERE FOLKS:**  
Well, here it is February, and just plenty chilly.  
Now a chilly morning calls for a hearty breakfast — and what better one can you think of than hotcakes, with bacon, and eggs on the side. And, man, those hot cakes will be all the more delicious if they're topped with big lumps of pure, sweet Potlatch Chief brand butter! It's made from pasteurized cream — your assurance of purity and quality.

The transport was shoving off for the Orient. Two wistful looking young women were waving good-bye from the dock.  
"I think it's a shame," said one, "to send all those nice Marines away. What will they do there?"  
"What'll they do?" replied the other. "Ain't you ever been out with a Marine?"

Chill weather calls for plenty of "internal stoking." That's just

the spot where milk fills the bill. Every adult should drink at least a pint a day — every growing child at least a quart. But make sure it's "Potlatch Chief" milk — it's pure — it's pasteurized. The name is your guarantee of quality.

Shying away from the lamp post to which the beary-eyed gent clug, the prim old lady said: "Young man, are you drunk?"  
"Let us say, Madame," he answered thickly, "that this is one of those unfortunate days when all my strength seems to be concentrated in my breath."

Yes — We steam-sterilize your cream can. It's ready for use when returned to you.

Hotel Manager: "Did you find any towels in that man's suitcase?"  
Hotel Detective: "No, but I found a maid in his grip."

### WHAT CAMERON FOLKS ARE DOING THESE DAYS

DeAnn Mielke underwent an appendectomy at the St. Joseph's hospital at Lewiston on Monday. Her mother, Mrs. Ed. Mielke, spent Monday and Tuesday with her.

Roy Sillow attended the U. of I. Washington basketball game at Moscow, Saturday evening.

Harold Brammer, U. of I. student, spent mid-semester vacation with his parents, Mr. and Mrs. Aug. Brammer.

The March of Dimes card party was very well attended. There were 14 tables in play, with high scores being won by Mrs. Fred Newman and Aug. F. Wegner; second highs went to Mrs. Leo Lohman and Gordon Peters. The "galloping goose" prizes were awarded Mrs. Wilbert Brunstiek and Norman Sillow. A delicious lunch was served at the close of play. The sum of \$44.00 was taken in for the Polio fund.

Vern Spekter of Craigmont was an over-night guest of Mr. and Mrs. Ed. Mielke on Friday, and a dinner guest of Mr. and Mrs. Willard Schoeffler on Saturday.

Mr. and Mrs. Carl Whittinger were guests of Mr. and Mrs. Fred Whittinger in Clarkston, and Mr. and Mrs. Ray Whittinger in the Lewiston Orchards, for several days of last week.

Mr. and Mrs. Harry Newman and daughter Linda visited with Mr. and Mrs. James Whittinger Tuesday evening.

Mr. and Mrs. Roy Ramey and Mr. and Mrs. Ernest Brammer spent Sunday with Mr. and Mrs. Walter Koopp.

Mr. and Mrs. Ted Weyen and family were Sunday evening visitors in the home of Mr. and Mrs. Glen Wegner.

Mrs. Fred Newman spent Monday evening with Helen and Ted Mielke. Rev. and Mrs. Theo Meske and family, Mr. and Mrs. Aug. F. Wegner and sons, Mr. and Mrs. C. H. Fry, Mr. and Mrs. Dick Fry, and Mr. and Mrs. Wm. Fry and son were Wednesday dinner guests of Mr. and Mrs. Glen Wegner. The dinner was given in honor of Glen Wegner, Jr.'s birthday anniversary.

Mr. and Mrs. Geo. Wilken visited with Mr. and Mrs. Glen Betts and Rev. Finke, at Golden Rule, Sunday. News is pretty scarce — the fire "feels so delightful" these bitter cold days.

### GOLDEN RULE

Jan. 30 — A group of ladies enjoyed a "pink and blue" shower at the C. A. Cuddy home last Tuesday afternoon, in honor of Mrs. Iris Hansen.

Mr. and Mrs. Carl Finke spent Tuesday evening with Mr. and Mrs. Wilmer Hanks and family.

Mr. and Mrs. Chet McIver and Mrs. Oscar Lawrence went to Orofino on Wednesday to see Oscar Lawrence, who is a patient at the hospital there.

The Homemakers Club met at the home of Mrs. Alma Betts, Thursday, with about 18 ladies present. Miss Weber demonstrated "New Sewing Methods." It was decided that the ladies will give a program on Tuesday, Feb. 6, at 7:30, at the Southwick gym. Admission fees of 50c for adults and 25c for children will be charged (anyone willing to contribute more will be greatly appreciated). Cake, pie and coffee will be sold at the close of the program — with all proceeds to go to the March of Dimes.

Our next Homemakers Club meeting will be at the home of Mrs. Evelyn Central, Feb. 8th. It was decided to have the Valentine party at that time and all will then reveal who their "Heart Sister" was for 1950, and draw a new one for 1951.

Lewis Kazda and a girl friend visited his mother, Mrs. Oscar Lawrence, Sunday.

Mrs. Roy Martin and Mr. and Mrs. Ishmael Martin of Lewiston were visitors at the Martin Bros. home Saturday and Sunday.

Mr. and Mrs. George Wilken of Cameron visited at the Glen Betts home Sunday.

Miss Evelyn Kazda spent Tuesday in Kendrick, visiting school and friends.

Grandma Lawrence is visiting at the home of her son, Alex and family, for a time.

### Typographical Error

In a southern college newspaper appeared the following item: "Coach Rice is again active after being laid up for several days with a bad coed."
