-H'ERS PLAN PROJECT ON HOME FOOD PRESERVATION

Two vitally important 4-H projects emphasizing home preservation of food are being carried by club members in Idaho and 46 other tates this year. They are the 4-H Canning and Frozen Foods prorams, which are supervised by the Cooperative Extension Service.

Among their objectives is to put up home-grown products to provide well-balanced diet in nonproductive seasons. Thus the cash outlay for foods also will be appreciably reduced.

As incentives for outstanding records of achievement, county canning winners receive gold-filled medals Most Kendrick places of business of honor. The state 4-IH champion will be closed over the Fourth, some gets an educational trip to the National 4-H Olub Congress, Chichildren of Garfield, Wash, were since Kendrick is not celebrating cago, in November. These awards and six national college scholarhome of Mr. and Mrs. Harve Shep- taking full advantage of, for them, ships are provided by Kerr Glass. In Frozen Foods, county winners are presented gold-filled medals and the state winner's award is a 17-

Of course the bank, postoffice, jewel wrist watch. Four sectional winners selected from the state Bean Growers and Burt's Confectionchampions will receive all-expense trips to the Chicago Club college ery the 4th and 5th, and the Kenscholarships.

More than 217,000 4-H members participated in these two programs

Last year's state winners in Idaho were: 4-H Canning - Wilma Goff, Coeur d'Alene; and 4-H Frozen Foods-Laura Jorgensen, Burley. County Extension Agents will supply full information on these programs. FROM THE SOUTHWICK AREA

**Business Houses To Close** 

Mr. and Mrs. Elvin Carscallen and of them for even longer periods, callers Tuesday afternoon at the this year - most local business men herd. Buzz Nye and George Minden, a rather unusual holiday, as Ken-

from the 4th through the 8th.

Mr. and Mrs. Chester McIver were

sending him five diffirent and conpublic meeting was called to deterflicting pieces of "information" from mine action to be taken by the local five of its many bureaus.

Most people have heard that the sells and delivers for one cent actually costs the government two and one-half cents, or about \$30,000,000 a year. If these cards were used, as originally intended, as "the poor man's letter", it might make sense. But the fact is that 85 percent of them are used for business purposes.

The bureau of Indian affairs has one employee for every 32 of the 400,000 Indians which are its wards, and yet a large part of the Navajo nation, comprising about 55,000 Indians, is in such a state of finance that there is widespread malnutri- ington, going into that state from tion among them.

I won't oppress you with any more thousands of them.

Since the Hoover Commission's report was published some 35 percent of its recommendations have been enacted by congress. Today, as a result, we have:

Greatly improved unification of the Armed Services.

A reorganization of the state department which clarifies lines of authority and saves money by the streamlining of foreign service.

A saving of millions annually by the creation of the general services administration, which replaces the purchasing activities of four other agencies and unifies purchase, inventory and records management of the government.

reorganization act, under The which President Truman submitted 34 plans for government reorganization, of which 26 have been accepted by congress and only eight rejected. All told at least \$1.25 billions a year have been saved by the legislation already passed. We have now coordinated budgeting which will prevent senseless duplication and by the unification of the Armed Forces under the Tydings act, we entered the war with teamwork between the three branches of the military which in itself is of tremendous value.

So you see the Hoover report has not even scratched the surface. • The Idaho Granger.

#### Hot Weather Brings Work

The arrival of real summer weather, beginning last Thursday, and continuing into this week, has brought real work to the farmers.

continue having operations over the of law enforcement at Boise. Fourth — but most of them will The previous ruling, under do what everyone wants to do when it's not weather - picnic, fish, and just relax.

Strawberry picking is at its height - for the very few berries that the frost left.

## Cut Hand With Saw

Oarl Painter of the Kendrick Cafe cut his left hand rather severely last Monday afternoon, while doing some carpentery work. He was using a hand saw, which slipped, inflicting the injury. He was treated at Dr. Christensen's office, two stitches being required to close the wound.

waters. At a meeting in Boise last week postal card which the post office Mr. Oasebolt, Mr. Marineau and Mr. Wilson learned from highway authorities that a combination federal-state project was the only method of getting the road financed, since local highway districts were in no condition to meet their monetary part town, the past week-end. of any other plan.

"One of the big reasons for the road," said H. C. Schupfer, Kendrick Commercial Club president, "is to relatives. bring more money to the state. It is a well-known fact that a large percentage of our north and south bound traffic now travels in Washthe top of the Lewiston hill - and such traffic buys gasoline. motor of such examples, but there are oils, etc. Only gasoline sold in Idaho Monday. helos Idaho — and we feel that the proposed U. S. 95E would keep traffic in Idaho."

The resolution and endorsements will be sent to the state highway departmen't and appropriate federal agencies at once — in the hope that action will be taken soon.

This route was first surveyed in 1931 — and in fact the state highway department, under the urging of Moscow, had such a road in mind when they ended the 1939 oiling program on the Juliaetta side of the middle Potlatch bridge — leaving rendrick to eat dust for many years. Now, however, since an oiled road connects the two towns, making area ccess much easier. full support can be given the project.

## Cancer Crusade Goal Exceeded

BOISE-Thirty-two Idaho counties have exceeded their self-assigned goals in the 1951 Cancer Crusade. This was revealed today by Leo J. Falk, president, Idaho division, American Cancer Society.

"Final returns are not yet in from all counties." said Falk, "but it now appears that the state as a whole will just about equal the performance in last year's Cancer Crusade when better than \$90,000 was given to continue the work of already justified itself. Yet we have the Cancer society in Idaho and to assist in financing the extremely vital national research and other programs."

**KENDRICK, IDAHO** 

Woodpeckers, nuthatches, adees, brown creepers and jays are meateaters. They like "meat" such as suet or any kind of fat in their diet. Peanut butter because of its oil is a good substitute. The vegetable eaters are the

ful bark insect pests.

finches, cardinals, song sparrows, tree sparrows, juncos, chickadees, jays and nuthatches like sunflower seeds.

A feeding shelf or station may be a flat board a foot or more square hung from a tree or held by a pole. If it is surrounded by a coping an inch or two high, there will be less likelihood of food being scratched away. The shelf may have a simple roof, but enclosures on the side will scare away birds.

## Suede-Like Flock

The "wooly" lamb of the greet-ing card or in a child's book is made possible by a "flock" finish. This is produced by spraying or sifting fibers of such materials as rayon, cotton, silk or wool upon an undercoat of special finish while this finish is still wet and sticky. In addition to being employed for decorative and novelty use, these Abrams Hardware Phone 051 Frank Abrams ticles to prevent scratches on furniture. They are also utilized in lining boxes, drawers and jewelry cases. Still other uses include card tables, phonograph turntables, toys and backgrounds for advertising displays. Flock finishes resemble suede and are made in many colors.

## Sugar Beet Tops

Feeding of sugar beet tops that have been exposed to frost, wilting, drying, and other damaging conditions has been responsible for cattle deaths, the American Veterinary Medical association reports. The poisonous factor is an accumulaion of nitrate in the leaves. In one Canadian herd of 70 cattle, 41 sick-Canadian herd of 70 cattle, 41 sick-ened and 19 of them died from this cause last year. Under ordinary conditions, beet tops can be fed without harm to livestock, the AVMA points out. But caution is in order if wilting and drying have occurred, as these conditions favor the accumulation of nitrate.

## Three Most Popular Birds

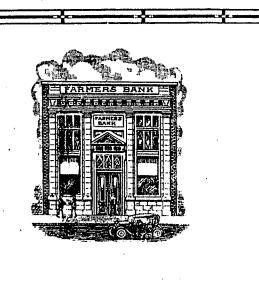

The American cardinal, the western meadowlark and the mockingbird are the most popular birds in the nation. They can cite the law-books to prove it. Of the 33 states that have adopted an official bird by legislation, seven have picked the cardinal. Virginia, acting early this year, made the latest addition to the cardinal camp which now in-cludes Kentucky, Illinois, Indiana, Ohio, West Virginia and North Carolina. Kentucky, first state to vote an official bird, started the cardinal parade back in 1926.

entists Work With Cancer Society SEATTLE, Wash. — An Idaho ntal surgeon today told the eighth acific Coast Dental Conference in eaths from cancer of the head and ssociation and secretary-treasurer the American Cancer Society's aho Division, said that dentists coupled a position of "important sponsibility" in detecting cancer. "With this in mind, then," he id, "there are certain necessary

"The dentist needs to know the
