

Village Being Re-Surveyed
Glen Davis, official representative of the Idaho Surveying and Rating Bureau, arrived in town Thursday of last week to make a re-survey of the Village in connection with fire insurance rates, water supply, fire fighting equipment, etc.

Mr. Davis met Thursday evening in a special session with the Village Trustees, and stated that in his opinion, with the present modern fire fighting equipment, the larger water mains and active volunteer fire department, that a substantial reduction in insurance rates was possible for Kendrick.

Mr. Davis expressed the opinion that another well of far greater capacity than that of the present one, together with matching pump, would be the answer to the water shortage problem during the summer, as well as possibly providing a still greater reduction in fire insurance rates.

NEWS ITEMS ABOUT LELAND RESIDENTS AND FRIENDS

Mrs. A. G. Peters and Mrs. Leonard Wolff were Tuesday afternoon callers at the Denzil Kuykendall and Arnie Cuddy homes at Southwick.

Mrs. Con Anders of Gifford and Mrs. Jennie Hund of Lewiston spent the past two weeks with Mrs. Walter Crawford and family.

Mrs. Dick Fordyce of Lewiston and Mrs. Burton Talbot of Anatone were Thursday over-night and Friday guests of Mr. and Mrs. Ervin Draper.

Weather Typically Fall
Weather this past week has certainly borne all the "ear-marks" of fall, with winter "just around the corner."

"We have been treated to hail, rain, wind, sunshine and frost. The rain squalls have been brief, but in many cases heavy, and there is adequate moisture in the ground to assure fall crops their needs.

Farmers have been unable to work in the fields since the middle of last week, so many have taken to the hills in search of big game, while others have been busy repairing fences and otherwise preparing for winter.

Please Help Correspondents
Well realizing that the lot of our country correspondents is often difficult we are talking the liberty of asking subscribers to help — by calling in the news to them, rather than waiting for the correspondent to call.

When you have guests from near or far, or take a trip, or something else of a "newsy nature," go to the phone and call your correspondent — give her the news. It will be a big help to her and to us, and adds to the "newsiness" of the paper for your friends near and far, as well as for the boys in the Armed Services.

And mistakes are sometimes made (he who makes no mistakes does nothing), so we ask your indulgence in this matter for ourselves as well as for any which may have been made or will be made in the future by ourselves or our correspondents.

Rather than "bawl out" our correspondent, call us. We will be glad to undertake any correction.

So, again, please help your local correspondent gather the news!

Cub Scout Pack Meeting
The Cub Scouts will hold their Pack meeting Monday evening, Oct. 22nd at the Community church basement — support your children with your attendance, says Ross Armistage, Cubmaster.

Dens are having a "Parent Attendance" contest, with the losers entertaining the winners — so, parents, please come with your Cubs. Everyone is welcome.

Fellowship Meeting Postponed
The Kendrick Community Church Fellowship Meeting, scheduled for Wednesday evening, Oct. 17, has been cancelled, due to the fact that the Leland W. S. C. S. is having their bazaar and dinner that night. David Coulter will meet with the group at a later date.

Mrs. Jesse Thornton accompanied Mr. and Mrs. George Baugh and son Norman of Orofino to Pasco on Friday, to visit with Mr. and Mrs. LaVern Williams and Mr. and Mrs. Allen Medalin, until Sunday.

Miss Vivian Draper and Norman Viles of Yakima were Saturday morning callers in the home of her parents, Mr. and Mrs. Robert Draper, and her brother, Mr. and Mrs. Ervin Draper and family.

Mr. and Mrs. Chas. Decker and sons, of Spokane, were week-end guests of Mr. and Mrs. A. G. Peters. Additional Sunday dinner guests in the Peters home were Mr. and Mrs. Elmer Peters and son Bobby of Lewiston, and Mr. and Mrs. Gordon Peters and daughters.

Mr. and Mrs. Robert Draper, Gary Draper and John Vincent were Sunday dinner guests of Mr. and Mrs. Billy Deebald at Pullman.

Mrs. Dora Heffel and Mrs. Roy Craig spent Monday afternoon with Mrs. Ervin Draper.

Mr. and Mrs. C. F. Grant of Procter, B. C. were Saturday over-night guests of Mr. and Mrs. Harry Smith. Mrs. Grant and Mrs. Smith are sisters.

Mr. and Mrs. Harry Smith and son Stanley, accompanied by their guests, Mr. and Mrs. C. F. Grant, were Sunday dinner guests of Mr. and Mrs. Wilmer Hanks in Lewiston Orchards.

STONY POINT NEWS

Oct. 16 — Lloyd Brown is in a critical condition at the St. Joseph's hospital in Lewiston. He is suffering with cancer. Mrs. Helena Brown and Mrs. Ernest Stegers, wife and sister respectively, are at the hospital with him.

Mrs. Albert Heimgartner underwent surgery Oct. 10 at St. Joseph's hospital. She is getting along very nicely at this writing.

The meeting of the Friendship Club, which was to have been held at the home of Mrs. Marion Stevens, October 18, has been postponed until November 1.

Mr. and Mrs. Newt Heath were host and hostess at a family gathering Sunday. Present were Mr. and Mrs. Gordon Heath and family of Coeur d'Alene; Mr. and Mrs. Forrest Gibbs and family of Spokane; Mr. and Mrs. Edgar Heath and family of Clarkston, and Inez Heath, a student at the University of Idaho.

Mr. and Mrs. Glen Stevens and daughters were guests of Mr. and Mrs. Ralph Williams Sunday, at Gifford.

Mr. and Mrs. Clifford Powell of Spalding and Carol Powell, a student at the Deaconess hospital in Spokane, were Saturday evening dinner guests of the Glen Stevens family.

Mr. and Mrs. Eldon Heimgartner were Sunday dinner guests at the Sam Gruell home.

Mrs. Emma Weichmann has been ill with influenza, but is better at present.

Mr. and Mrs. Leslie Heimgartner and family were Sunday dinner guests of Mr. and Mrs. Walter Zum Hofe and family.

Mr. and Mrs. Hugh Parks were Sunday dinner guests of the Earl Parks family in Lewiston Orchards.

Enrollment Over Three Thousand

U. of I., Moscow — For the sixth consecutive year the fall enrollment at the University of Idaho has topped the 3,000 mark. Registrar D. D. DuSault said today that total enrollment of resident students at the university of Idaho was now 3,002.

The university's fall enrollment went above 3,000 for the first time in history in 1946. That was the year when the big educational rush of GI's started, and enrollment jumped to 3,415, making an increase of more than 2,000 over the war-depleted enrollment of the previous fall — 1,430.

At the peak of the GI era, veterans made up 67 percent of the enrollment. During the last two years the GI's have been rapidly fading from the campus scene until now there are less than 15 percent, but enrollment has continued to hold steadily above the 3,000 mark.

Three divisions at the university show increases this year in enrollment of new students. They are the school of education, college of engineering and school of business administration.

Flying Farmers Elect

Boise — George Crea of Fenn, Idaho, was elected president of the Idaho Flying Farmers at their annual convention held at Moscow, Sept. 10-11. Otto Kutai of St. Anthony was elected vice-president; Stanley Hepler of Kendrick, secretary-treasurer.

The Salmon river route between Grangeville and New Meadows has long been accepted as the normal route for air traffic between northern and southern Idaho — it has also been conspicuous for its lack of landing field facilities. An emergency field was built earlier in the year by the Idaho Department of Aeronautics, located two miles below Freedom and directly adjacent and parallel to the highway. A second utility and emergency field is now under construction at Riggins. Both are currently closed until further notice.

Cars Tangle

Fender damage was suffered by cars driven by Mrs. W. B. Deebald and Fred Arnett, when they collided at the intersection at the post office last Saturday.

Chill Feed Well Attended

The chill feed given by the Julia-etta M. Y. F. last Wednesday night was very well attended, and that group sincerely appreciates the patronage.

People have asked... **"Oil Progress? Should that mean something to me?"**

The oil companies of America are now observing Oil Progress Week. Some people outside the industry have asked, "Oil Progress? Should that mean something to me?"

The answer is "Yes, indeed!" — for oil progress directly affects the lives of all Americans, and the rest of the civilized world as well. One indication of the strides the industry has made is a count of its products. Fifty years ago, we were getting only about a dozen different products out of crude oil. Now Standard produces more than 1100. What we ourselves produce, plus what's made with the help of products we provide, adds up to a seemingly endless list of things that make your life better.

Your car can be "like new" longer with a motor oil developed by Standard's scientists, using atomic energy. It cuts engine wear as much as one-half, compared with conventional oils.

Your cleaning chores are easier thanks to today's new detergents. Standard pioneered their development, now supplies a large portion of the nation's needs.

Your country's military strength is increased by jet fighters. Standard developed the first jet fuels used by the U. S. Our fuel progress continues with today's super-jets.

The growth of the industry over the years has meant the development of thousands of oil companies, large and small. All are needed — to serve you better, and keep the nation strong. As the industry progresses, the gain is yours... for your progress and oil progress go hand in hand.

Oil Progress Week... October 14 to 20

POWER "CHICKENS" HAVE COME HOME TO ROOST

The persistent efforts of the department of the interior to build a power inter-tie between the Pacific Northwest and vote-rich California is now injuring the entire power development of the Columbia and Snake rivers.

Latest blow to be struck was delivered by George Gunn, Jr., of Seattle, chairman of the industries committee of the state industrial development committee. Gunn is a successful business man in his own right. His words carry much calculated weight.

In his opinion, he said in Seattle, the proposed Hell's Canyon dam in Idaho in the Snake river, is designed to give power to California.

Is it? Federal power administrators say no, and their opponents say yes. But more important, citizens everywhere in the northwest will say: "Let's wait a minute and see."

The federal boys have suffered a tremendous loss of prestige and voice in recent months. The actual decline set in when the fantastic scheme was first released to transport "surplus" water from the Columbia river to California.

Later it was a power inter-tie so "surplus" power in California could be sent north to firm up power in this state during slack seasons.

Everyone saw through that plan immediately. California is not a power producing state. Once the inter-tie was made the power would flow from Washington to California. Under the postage stamp rate, it is just as cheap to use Washington power in California as it is to use it in Washington.

We don't know if Gunn has raised the inter-tie bugaboo in this case to confuse the facts relating to the Hell's Canyon dam.

But we do know public sentiment on the inter-tie. It is the fleshy underside of the federal power advocates. They can't protect it and it makes them vulnerable to attacks by enemies.

Every fighter knows that his big string of victories doesn't win coming fights regardless of how imposing. He must trim his surplus fat, keep in shape and keep his guard up.

The public power boys forgot that basic lesson. Their eagerness to heap the fantastic upon the equally fantastic has lost them face.

All the crowing they do about yesterday's successes does not prepare them for tomorrow's. Their chickens have come home to roost — and what an odd assortment of birds they are.

In the meantime we are short of power here at home, and a "brown-out" stage has just been passed. — Pasco, Wn. Tri-City Herald.

Forest Lands Withdrawn

Forty-seven tracts of land in several National Forests in the United States and Alaska have been withdrawn from all forms of appropriation under the public-land laws, including the mining laws but not the mineral-leasing laws, for use by the Forest Service of the Department of Agriculture as administrative sites, recreational areas, and other public purposes, the Department of the Interior announced today.

The withdrawal order was signed by Secretary of the Interior Oscar L. Chapman on June 4, 1951. The authority to make withdrawals of public lands is vested in the Secretary of the Interior by delegation of the President.

According to Director Marion Clawson of the Bureau of Land Management, the lands to be used

as administrative sites will include stations and areas used in conjunction with the administration of the Forests. The recreation areas, he added, include public camp grounds, picnic areas, winter sport areas, organization camps, and vista points.

The withdrawals are designed to prevent mining operations in areas where mining operations would disrupt the principal activity for which the site is suited, that is, administrative or recreational uses. In so far as possible, however, the sites have been located where there is small likelihood of mineral discovery. The withdrawals will not prevent oil and gas developments, but such leasing will be subject to reasonable stipulations proposed by the Forest Service, Department of Agriculture, on a case to case basis. Oil and gas sources can often be reached by directional drilling, with-

out disturbing the surface.

The following are the National Forests affected by the withdrawal order in Region I of the Bureau of Land Management:

In Oregon 17 acres are reserved at Todd Lake in the Deschutes National Forest as a recreational camp, and 80 acres as a forest camp at Marble Creek in the Whitman National Forest.

Idaho has four withdrawals in the Payette National Forest—190 acres for a camp ground and summer home area, and 220 acres in the Burgdorf Administrative area. The Boardman recreational area, also in the Payette, covers 160 acres. In the Clearwater National Forest in the north fork of the Clearwater River 5,385 acres are withdrawn as a roadside zone and as right-of-way for the road.

In the Wenatchee National Forest in Washington 240 acres were reserved at the Swauk Creek recreational area.

Not Prepared

An advertising salesman bearded the Chief and took a roomette. He carried only a small grip, and the porter inquired of his other luggage.

"I have none," said the man.

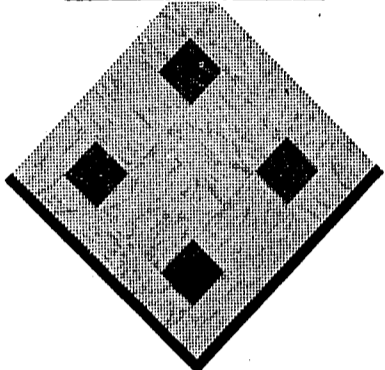

"Why, I thought you were a salesman," said the porter.

"That's right I am. But I don't need a lot of luggage. I sell brains."

The porter scratched his head and finally said: "Well, you're the first traveling man that ever rode this train without samples."

Pounded To Pieces
Just how much damage is heavy commercial truck traffic doing to our highways?
Any motorist can pretty well answer that with the evidence of his own eyes. And, in addition, he can substantiate that evidence with the

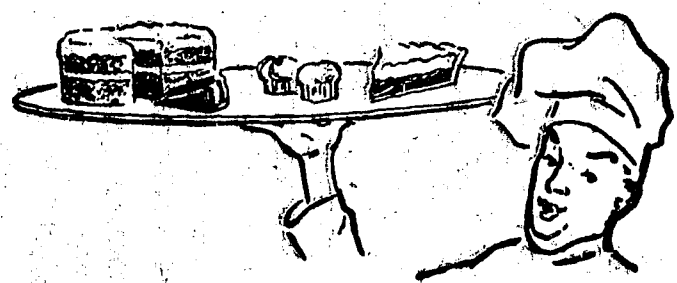

views of the experts.
In October, 1949, the American Association of State Highway Officials said in a resolution: "This ruinous practice of overloading our roads is destroying our primary highways faster than we can build or replace them."

In February, 1949, the American Automobile Association said: "Billions of dollars worth of the nation's finest highways are being pounded to pieces by overweight, overloaded and over-driven commercial vehicles."

Evidence of this character could be recited page after page. What, then, is the solution? First, loads should be kept within reasonable limits, and violators of the law should be severely punished. Second, the commercial users of our highways should foot their fair share of the bill for building and maintaining roads which are required to handle their heavy loads. Neither of those things is being done today. — Industrial News Review.

At the same time, Thomas H. MacDonald, U. S. Commissioner of Public Roads said: "We are overloading our highways in their traffic volume capacity and in their structural capacity. There is more than ample proof. . . . Prior to the war, damage had reached alarming proportions. With the marked increase in heavy loads since the post-war period began, the damage has become even more alarming."
— And these statements were made well over two years ago!

Ever notice how much more it costs to support one bad habit than many good ones?
Shop at Blewett's Grocery Market, Kendrick, for all kinds of fresh and fresh-frozen fruits and vegetables, fish and fowl. Serve yourself and save. 1-adv

Farm Commodities Pose Big Problem
Government Limited In-Selling of Stocks

At the moment the government owns approximately \$1,808,365,438 worth of farm commodities, purchased through the years to support farm prices, agricultural department officials report.

Products stored in government bins include 3.5 million bales of cotton, 145 million bushels of wheat, 167 million bushels of corn, 422 million pounds of linseed oil, 294 million pounds of dried milk, 79 million pounds of dried eggs, and quantities of various other items.

What's become of it all? It may be disposed of in various ways, but not dumped upon the

The government today has 167 million bushels of America's finest corn stored under the price support plan. The question is, what to do with it?

open market to compete with commodities now in private ownership. To do so would flood the market and depress the commodities offered far below support prices. The government would then find itself buying the commodities placed upon the market.

These commodities, however, can be sold should the market prices strengthen considerably above support levels.

The government has two methods at present of moving commodities. They are:

(1) Persuading the consumer to increase their purchases through normal purchasing channels, thus reducing the supply and raising the price to where government stocks can be put on the market. Also, reducing supplies to a point where support prices would become unnecessary.

(2) Many of the commodities in government stockpiles are being distributed to school lunchrooms, charitable institutions, Indian affairs, and needy groups.

New Corn Spray

Until recently, the corn earworm has prevented profitable sweet corn growing, especially in the South. Sometimes every ear in a crop is infested. Such corn cannot be sold.

Now the department of agriculture has developed a spray containing DDT, mineral oil, and

The new spray, when applied at the right times, will eliminate earworm and pay in growth of healthy corn on the American farm.

water that may be applied to silks and husks of developing ears. When applied at right times it kills worms before they attack and ruin the corn.

R. A. Blanchard, bureau entomologist, developed the method. He tested it in the field during three growing seasons in Texas, Mississippi, Missouri, and Illinois. Earworms were controlled in every instance, he reports.

January Exports Pass \$224 Million Mark

January agricultural exports totaled \$224,300,000, the agricultural department reports. Cotton topped the total with \$83,500,000.

Wheat and wheat flour were second to cotton, valued at \$47,300,000, while corn was in third place with \$14,700,000. Agricultural imports during the month were valued at \$290,700,000, or approximately 66 million more than exports.

Foresee Billion Barrels Jet Fuel from Oil Shale

Jet engine fuel by the billions of barrels can be produced from the Green river oil shale formation in northwestern Colorado, Dr. J. D. Lankford, acting chief, of the United States bureau of mines oil-shale demonstration plant in Rifle, Colo., reports.

Low cost oil shale mining already has been found feasible, Dr. Lankford says, and he predicts that the present trickle of 100 to 300 barrels of gasoline and Diesel fuel from the formation will become a mighty torrent as techniques improve.

"It is estimated that 88 volume per cent of the crude shale oil could be converted into a hydrogenated product containing a premium Diesel oil and a high-quality jet fuel practically free of sulfur, oxygen and nitrogen compounds," Dr. Lankford stated. "If desired, the hydrogenated material could be converted easily to gasoline by standard petroleum refining processes."

"The United States bureau of mines oil-shale demonstration plant at Rifle, Colo., is engaged in an integrated research and experimental program to point the way toward the development of a tremendous natural resource, oil shale, for possible wartime emergency and for the ultimate peacetime production of liquid fuels by private industry."

"Billions of barrels of liquid fuels are potentially available from the oil shale of the Green river formation of northwestern Colorado. Research and development work will be necessary over an extended period of time to bring this great natural resource to the stage where utilization will be possible."

Pocket Radiation Indicator Developed for Average Man

An accurate pocket-size radiation indicator, so simple that the man on the street can learn to read it after a few minutes instruction, has been developed at the atomic energy project on the Los Angeles campus of the University of California.

The device was developed by Dr. George V. Taplin and Clayton Douglas of the U.C.L.A. medical school's atomic energy medical research staff.

It measures radioactivity by a color change of chemical solutions in small vials. The chemicals are inexpensive, and it is estimated that the instrument could be produced on a large scale very cheaply.

The vials fit into a compact case about the size of a pack of paper matches, which could be worn around the neck like G.I. dog tags. They also could be adapted to a pencil-like container for the pocket.

The new radiation indicator was specifically designed to measure large doses of gamma and X-rays immediately after an atomic blast.

It also lends itself to the development of important peacetime applications, says Dr. Taplin. For example, it could be useful in the calibration of such radiation equipment as fluoroscopes and X-ray machines. It might be used to measure radiation from radio iodine absorbed by the thyroid gland in treatment of hyperthyroidism.

Origin of April's Fool

It was the habit of observing July as the beginning of the year that is said to have started the whole idea of All Fools' Day. From its reputed origin in France, it quickly spread to other countries. We have such varied terms as the English "noddies," gawbies and April gobs," the French "April Fish," and the Scottish "April Gowks." While there are other theories about April Fool's day, the calendar story located by research librarians with Childcraft seems that when King Charles XI of France adopted the reform calendar in 1564, many Frenchmen refused to go along with the new January 1 New Year's. When they continued to celebrate on July 1, they were made the butt of countless jokes—receiving mock party invitations, fake gifts, and pretended ceremonious visits of congratulation.

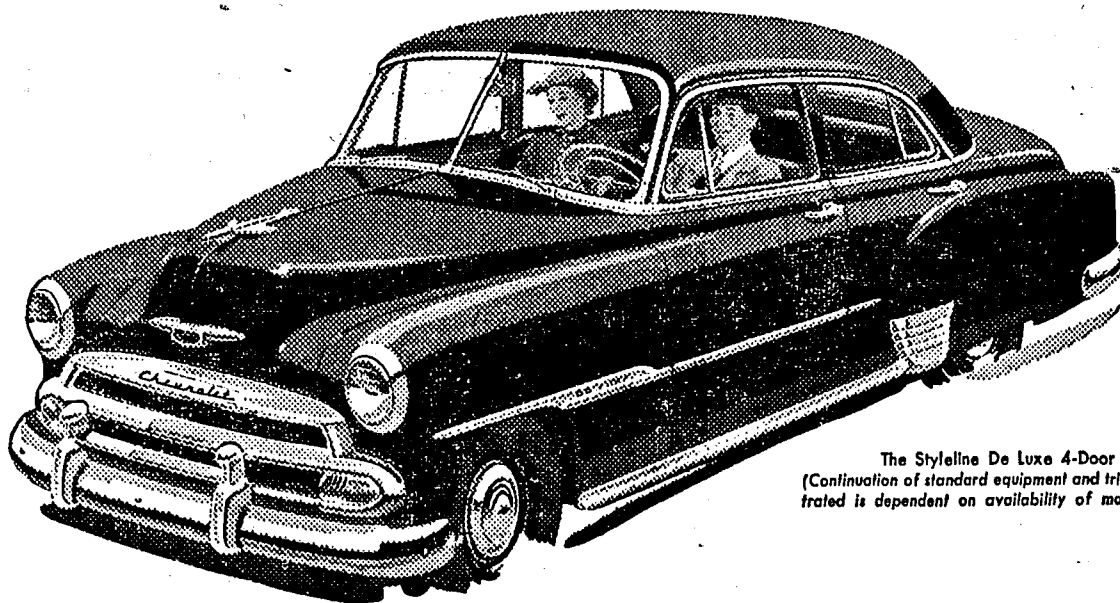

United Nation's Building

Along the banks of East river on the Island of Manhattan between 42nd and 48th streets the Secretariat building of the United Nations is towering to the sky as workmen are rushing it to completion so that it can be occupied before the end of the present year. The structure will be 39 stories high. It is one of four units that will complete the headquarters as a "workshop for world peace." Contracts for the other three units have not yet been let but it is believed they will be completed during 1951.

Suggestion for Farmers

The average farmer spends 50 per cent of his time around the farmstead. This can be materially reduced by piping water to the point of use rather than carrying it. For example, consider what carrying water to a flock of laying hens involves. If the water point is 60 yards from the hen house, as it is on many farms, the farmer will carry approximately 10 tons of water a distance of 25 miles per 100 hens per year in addition to walking another 25 miles to the water point.

Size it up and you'll see why
More People Buy Chevrolets Than Any Other Car!

The Styteline De Luxe 4-Door Sedan (Continuation of standard equipment and trim illustrated is dependent on availability of materials.)

Longest of the Lot
Chevrolet looks longest, Chevrolet is longest . . . a swank and sweeping 197 inches over-all that tops any other car in the low-price field. Size up Chevrolet's greater length, and you'll find it hard to settle for less.

 held at the church at 7:30 p. m.,
 with Mrs. Ross Armitage in charge
 of the recreation program.

GOLDEN RULE

Oct. 16 — Mrs. Lyle Bashaw and
 daughters of Grangemont spent Wed-
 nesday night with her parents, Mr.
 and Mrs. Roy Martin. The daughters
 remained at the Martin home while
 Mrs. Bashaw attended the Teachers'
 Institute meetings in Lewiston.
 The Homemakers Club enjoyed a
 meeting with Mrs. Mary Lawrence,
 Thursday.
 Fred Stage and son Ralph, and
 George Finke were Troy visitors on
 Friday.
 Mrs. Irene Tarbert and children of
 Lewiston came up Friday night and
 stayed until Sunday with her par-
 ents, Mr. and Mrs. Roy Martin. Ish-
 mael and Mary Jane Martin of Lew-
 iston joined the group on Sunday,
 helping honor their mother's birth-
 day anniversary.
 Mrs. D. V. Kuykendall and Mrs.
 Glen Betts visited Mrs. Martin Mon-
 day — to help her celebrate her
 birthday anniversary.
 Sunday visitors at the Glen Betts
 home were Mr. and Mrs. George
 Christensen of Lewiston; Mr. and
 Mrs. Ray Christensen and daughter
 Shirley of Orofino; Mr. and Mrs.
 Don Christensen and children of
 Camp Y, and Jimmy Finke of Oro-
 fino.
 Mr. and Mrs. Loyd Livengood of
 Lapwai came up Friday night and
 brought her parents, Mr. and Mrs.
 Nick Deamo, to spend the week-end
 with another daughter, Mrs. Oscar
 Lawrence and family. They helped
 butcher several pigs.
 Joan Lawrence spent Sunday with
 Betty Blackburn.
 Oscar Lawrence and son Albert
 spent Thursday in Lewiston.
 Mrs. Glen Betts and son Eugene
 visited at the Fred Stage home Sun-
 day evening.
 A large crowd attended the P-T.
 A. Southwick Monday evening.
 The Southwick ladies, hostesses for
 the evening, served apple and pump-
 kin pies with whipped cream, and
 coffee.
 Mrs. Sylvia Peters and Mrs. Cora
 Wolf of Leland visited Mrs. D. V.
 Kuykendall, Wednesday.
 Mr. and Mrs. Chester McIver visit-
 ed at the Oscar Lawrence home Mon-
 day evening.

Elves and Leprechauns
Took Blame for Everything

It may not be on the official un-
 employment records, but the fact is
 that there are hundreds of shees,
 leprechauns, and elves out of a job.
 Since each one of them has a
 long history of diligent service to
 humanity, it seems a real shame
 they can't be put back to work.
 Each of us needs one to take the
 rap for the petty annoyances of
 daily living. These out of the way,
 we could devote ourselves to the
 big problems.

According to the Childcraft refer-
 ence library, our ancestors used
 the little people to full advantage.
 They let them take the responsibil-
 ity of souring the milk, rattling
 the windows and creaking the
 stairs, and breaking Aunt Nellie's
 best china.

A nice feature of the little
 scamps, too, is their wide range of
 nationality.

Did your parents come from
 Scandinavia? Then you will want
 to select an elf. This pint-sized
 creature will live in your home and
 help keep the kitchen neat. If he
 occasionally cracks a dinner plate
 or burns the toast, you can't very
 well complain. That's what you
 want him for, to take the blame,
 isn't it.

Pixies are your choice if you
 have British ties, and there is a
 fine assortment of shees for you
 Scottish folks. If you are Irish you
 may select between the revelry-
 loving shees and the rather dour
 leprechauns, who, incidentally, are
 apt to ignore you as they spend
 most of their time making shoes
 for the shees.

If you favor France you will have
 to get along with a goblin. But may-
 be he's better than a German pol-
 tergeist, who is downright rowdy.
 He will cause no end of commotion
 until someone bakes him a spice
 cake.

Just a word of warning before
 you adopt one of these little chaps
 — they believe in people, and defi-
 nitely expect people to believe in
 them.

JULIAETTA NEWS

Mr. and Mrs. Herbert Weber and
 family and Mr. and Mrs. Roy Weber
 spent Sunday with their mother,
 Mrs. Elsie Weber.
 Mr. and Mrs. Albert Singer left
 for their home at Chehalis, Wash.,
 Tuesday, after spending several days
 with Mrs. Singer's sister, Mrs. Elsie
 Weber.

What Flavor Do You Like?
 Wisconsin cows are eating mol-
 asses made from wood, and like it
 just fine, according to University
 of Wisconsin dairy specialists. For two
 years now, they have been feeding
 this new development of the U. S.
 Forest Products Laboratory at Mad-
 ison to the unpretentious bovines of
 the University Branch Agricultural
 Experiment School at Ashland. As
 much as 25 pounds of the molasses
 was mixed with 100 pounds of grain.
 It was also found to be a good sil-
 lage preservative.
 But what we'd like to know, is
 whether to order our veal cutlets
 with the red cedar or yellow pine
 flavor?

Life Expectancy for Man
Reaches 65-Year Average

Man once shared the life expec-
 tancy of a pack-donkey, but over
 a 2,000 year period has attained a
 65-year average—almost rival-
 ling the 70-year expectancy of the
 whale, the longest-lived mammal
 in the life chart.

But this increased age has draw-
 backs in the form of cancer, dia-
 betes and heart disease.

The average Roman of about
 50 B. C. lived only 25 years. Mod-
 ern medicine and sanitation now
 give man at least 40 more years—
 and a greater chance of having
 one of the diseases usually asso-
 ciated with the aging of the human
 body.

Human progress up the life-ex-
 pectancy ladder is something of a
 triumph for man, who is not too
 well endowed with protective equip-
 ment. He is the only mammal in the
 higher brackets who is without
 some form of protective armor.
 For example, he ranks with the
 whale, 70; the elephant, 60; the
 hippopotamus, 40; and the alligator,
 40 years.

Domesticated mammals range in
 life expectancy from the dog, 10
 years, to the cow and horse, 20
 years, and the burro, 25. Lowest
 mammal in the chart is the mouse,
 who lives from 2 to 6 years.

"Breaking Up" Water
 Water, which consists of hydrogen
 and oxygen, can be broken up into
 these elements by electrolysis. If
 two wires, carrying a direct elec-
 trical current, are placed in water,
 bubbles of oxygen form around the
 one connected to the negative side
 of the battery or generator, while
 oxygen forms around the wire con-
 nected to the positive terminal.
 Usually a small amount of acid
 must be added to the water to
 make it conductive of electricity.
 Also, if water, in the form of
 steam, is heated to a very high
 temperature, around 3500 F., it sepa-
 rates into hydrogen and oxygen.
 These recombine to form water as
 the temperature is lowered again.

Longer Life for Sheets
 To lengthen the life of sheets
 follow these suggestions. Reverse
 sheets every other time by putting
 a bottom hem at the top. Cover
 bare springs with heavy sheet or
 sheeting to avoid snagging bed lin-
 ens. And check all beds for needed
 carpentry. Put a mattress pad be-
 tween the sheet and the mattress
 to avoid the abrasive action of
 the rough ticking against the sheet.
 Loosen the edges of the sheet until
 all around before stripping the bed.
 Use mild solution of bleaches and
 rinse thoroughly, or better still, let
 the sunshine do your bleaching.
 Always rinse thoroughly to remove
 traces of soap and soap powders.

Study Premature Babies
 An instrument corresponding to
 a miniature iron lung has been used
 by University of Michigan research-
 ers in studying premature babies.
 Object of the studies was to find
 out why premature babies breath
 irregularly—in gasps or jerks. The
 research has shown that the cause
 of this irregular breathing is that
 oxygen is not forcing the tissue
 of the brain center which controls
 respiration.

Kendrick Gazette

Potlatch Chief Sez

Published by the Kendrick Creamery

HELLO, THERE, FOLKS —

Now that the "cold season" is upon us in more ways than one — we feel that one of the best insurances against winter colds is an adequate diet — and an adequate diet includes plenty of milk. Every adult should have at least a pint a day, and every growing child at least a quart (remember these are minimum requirements). So be sure you are drinking lots of pure, pasteurized Potlatch Chief milk. It makes a cheap insurance against winter's ills.

Mother: "How many times must I tell you, Willie, that one must keep his eyes closed during prayer, so you can concentrate on what the minister is saying?"
Willie: "Yes, mamma, but how do you 'know I don't'?"

When your wife sets a big plate of hotcakes in front of you for breakfast, cover them liberally with "Potlatch Chief" Brand But-

ter. That pure, delicious, fresh flavor will give them zest. And you know Potlatch Chief is pure, for it's made from pasteurized cream. Eat lots of Potlatch Chief butter. It's nutritious as well as delicious.

In the course of a hot-tempered telephone conversation with a high-powered executive, a harried junior partner was moved to remark: "Take it easy, will you? If you're not careful you'll get ulcers."

To which the executive snarled back: "I don't get ulcers. I give them!"

Sell your cream. There's no waiting for can or money, and we return a steam-sterilized, ready-to-use can. It's not even necessary to wash it!

Need a locker box? We have one to fit every purse and need. Come in and look them over —

INTERESTING HAPPENINGS IN THE LINDEN AREA

Mrs. Al Pederson spent the greater part of last week with her daughter, Inez, in Colfax, returning home on Friday.

Mrs. Marion Rowden substituted for her husband in the Blewett Grocery at Kendrick last week, during his illness.

Mrs. Alice Zimmerman was hostess at a "Stanley Party" on Wednesday afternoon of last week, with 16 ladies in attendance.

Virginia Zimmerman spent Thursday night with Jeanette Rowden.

Sunday night supper guests of Mr. and Mrs. Clement Israel and daughters were Mr. and Mrs. Herbie Millard of Moscow; Mr. and Mrs. Norman Fry, Mr. and Mrs. Dick Fry and Mr. and Mrs. Bob Fraser and daughter, all of Kendrick.

Mr. and Mrs. Louis Alexander were Sunday over-night guests of her mother, Mrs. Jenks, in Lewiston.

We have just learned that Pfc. Neil Erlwine has been transferred from Camp Cooke, Calif., to Camp Roberts, for an eight-week course of schooling.

Al Pederson and sons Douglas and Jerry called on Frank Lyons Sunday afternoon.

Mr. and Mrs. Art Foster and children were callers in the Gil Erlwine home, Saturday.

Allen Chilberg, son of Mr. and Mrs. Bob Chilberg, entered the Davidson Nursing Home at Kendrick Saturday for treatment of a leg infection. He is showing improvement.

Mr. and Mrs. Lester Weaver received word Monday from their son Theodore, at Lewiston, that he and Mrs. Weaver are the very proud parents of twins, born Monday morning — a boy and a girl.

Mr. and Mrs. Adolph Swenson of Lewiston spent several days last week with their daughter, Mrs. Bill Zimmerman and family.

Lillie Wilson and Jessie Erlwine spent Friday with Clara Alexander, assisting her with the marking and framing of a quilt upon which quilting will be begun by the W. M. A. group on Wednesday, in order to have it finished for the fall bazaar.

Mrs. George Lyons was the hostess at a "Pink and Blue" shower on Sunday afternoon, honoring Mrs. Theodore Weaver of Lewiston. She was assisted by her sister-in-law, Mrs. Benfell. Games were played by the 16 attending ladies, after which Mrs. Weaver opened her many lovely and useful gifts. Refreshments were then served by the hostess and her volunteer helpers.

Mr. and Mrs. Marion Souders and daughter and Mrs. Arlie Allen spent Thursday with Mrs. Leslie Ball and family at Orofino, the occasion being Mrs. Ball's birthday anniversary.

Mr. and Mrs. Frank Lyons returned Thursday evening from a hunting trip in the Salmon river country. They bagged no game, but reported a very enjoyable trip and time spent with Mrs. Lyon's sister and other relatives, who joined them at the hunting grounds.

Mrs. Clarence Wilson and children spent Thursday and Friday in the home of his parents, Mr. and Mrs. Stewart Wilson.

Gold Hill School News (Delayed)

On Friday during Art period we made room decorations, consisting of black cats, witches and jack o'lanterns. Our room now presents the "spirit of Hallowe'en."

Our sand table project for the month was an Indian village, made and assembled by the fourth grade history class.

Miss Brown, county Health nurse, visited our school Thursday afternoon.

We have begun studying and practicing for a short Hallowe'en program to be given in connection with a pie social the evening of Oct. 26. Proceeds will be used for purchasing Christmas treats.

The sixth grade history class has completed the study of "Early Nations in Southwest Asia."

The third grade class in "Social Studies" is studying cotton silk and rayon, and are completing their posters on cotton and leather.

We received a new football, soft ball and several playground balls recently.

BIG BEAR RIDGE NEWS

Mr. and Mrs. E. H. Jones, Miss Minnie Jones and their house guests, Mrs. Jones' sisters, Mrs. Grace Thorne and Mrs. James Fulton of Iowa, are spending the week at the George Jones home in Kennewick, Wash., and at the Everett Hammond home at Moses Lake, Wash.

Mr. and Mrs. Joe Bowers of Clarkston spent Sunday at the A. Kleth home.

Mr. and Mrs. Hoffman of Clarkston were Saturday afternoon visitors at the Oscar Slind home.

Mr. and Mrs. Martin Ziellnske of Los Angeles, Calif.; Mrs. Ingvald Aas, Mrs. Gunda Fite and Mr. and Mrs. Clarence Swanbeck of Clarkston visited at the Mrs. Johanna Nelson home and called on old-time friends and neighbors here, Wednesday.

Mr. and Mrs. Ervin Halseth and daughter Vickie Jo of Craigmont, and Mrs. Pete Halseth of Deary are
