COMMERCIAL CLUB MEETING IS VERY WELL ATTENDED

The regular monthly meeting of business session at 7:30, presided over by Gerald Ingle, president.

across Middle Potlatch, and the other at Kendrick, across Bear creek, were on the 1953 program. And the Cavendish-Kendrick road was on the 1954 program.

Tom Long, for the Highway Committee, stated that recent rains had made possible satisfactory working danger of the unfenced pond adjoining the highway near the Jasper Nut-ting home and the big tree stump at the road's edge near the Leon

Branscon home, After a bit of roundtable discussion the chair asked the Highway committee to contact Clarence Perryman, local maintenance foreman, to see if these dangers could not be removed. For the Education Committee Ben

time as beginning Dec. 24th, and lasting through the 1st. However, school will be held on the following Friday, Jan. 2nd, and also on Saturday, Jan. 3rd, in order to get in the required number of teaching days.

Dennis Racicot, athletics coach, said that the first game of the season, held at Troy on Tuesday, was won by the A squad 52 to 25, and by the B squad 34 to 29. The band accompanied the teams and the stu-

dents had lots of fun. For Publicity W. L. McCreary reported that all was in readiness to advertise the coming of Santa.

R. L. Blewett, of the Merchants'

committee, stated that Santa would arrive in Kendrick on Saturday, Dec. 20th, at 1:00 p. m. And that following the distribution of treats to the children, a free show would be given for them and all other children (1 to 100 years in age) by the Kendrick

On Fish and Game Dee Miller reported that the hunting season was now over (big game) and that duck hunting had been the poorest in years. Less big game had been killed (at least by local hunters) than in many

There followed a round-table discussion of the Latah and Clearwater counties' big games season, with the opinion being expressed that the two should be identical — and shorter. In line with this. Frank V. Barton was appointed a committee of one to contact the Lewiston Sportsmen's association and present this opinion, in the hope of enlisting their aid.

Dr. D. A. Christensen gave the report for the Boy Scout Committee. He said the local troop, No. 149's Charter had been renewed, and that Henry Jones remaining as assistant leaders. Manning will also advise the new Explorer Scout unit. He added that Elmo Eldridge and Grant Bateman were the new Scout Commit-

Ben Cook recommended a vote or thanks by the Club to Mr. Onstott and Mr. Jones, and the following resolution was unanimously adopted:

"In as much as the Kendrick Commercial Club is the sponsoring organization for the local Boy Scout Troop, it feels that it should show in some small means its appreciation to those who have given so willingly and freely of their time to enable our Troop to become the success that it is: Therefore, the members wish Man-

ning Onstott and Henry Jones to know that they appreciate the sacrifice that they have made in the past in behalf of the boys of this community. We know that the troop is doing wonderfully well in its activities and that the individual Scouts are gaining considerable knowledge as a result of the effort of the Scout leaders. "The members feel that they should

be of more assistance to you, the chosen leaders, and that service to others should be one of their "high purpose" aims.

"Thanks for your effort - but perhaps the boys' achievements will observed — from Wednesday, Dec. mean more to you than our words. - Kendrick Commercial Club.

matter of the community advertising m. to 5:00 p. m., except when mail and mentioned in particular the big from Train 314 is being distributed, and mentioned in particular the big pictures of towns appearing on the for the sale of stamps. No articles back page of the Spokesman-Review will be registered and money orders once each week. He suggested that the Club secretary write the Spokesman, mentioning the unusual shape of Kendrick, which looks like a huge saxophone from the air. This the secretary was instructed to do.

Frank V. Barton, local attorney, said that his new office in the post office building was now in use, and Thursday would be his regular day

Next came a round-table discussion of a dinner honoring athletes of Kendrick High school, and a committee consisting of Arthur Foster, Tom Keene and Rev. F. C. Schmidt was appointed to look into the type of dinner and entertainment that would best suit the boys and school authorities.

January meeting a "Planning Meet- was taken until next January.

Farmers At Work Quite a number of farmers in this

area, but particularly on Potlatch ridge, have been busy this past week the Kendrick Commercial Club was plowing and seeding. CHRISTMAS SEALS PROVIDE MUCH IN RESEARCH LINE

"During the past five or six years a number of drugs have been introduced to be used as adjuncts in the of roads in this district, and that on the whole they were in good shape. Tyler, medical director of the Idaho Tom Keene then mentioned the State Tuberculosis Hospital at Gooding said this week. "The first and still most effective of these is streptomycin, but the latest drug, Isonicotinic acid hydrazide, is almost as effective. However, it is not the miracle drug that was reported through the press earlier this year. Both of these are generally used in com-bination with a third drug, P. A. S., which retards the emergence of resistant germs.

"The basic treatment of tubercu P. Cook reported the school vacation losis is still bed rest, carried on in a tuberculosis hospital for month after month until all evidence of active disease has disappeared," he added. "This is the only way a successful cure can be effected."

"Drugs have their only effective use when administered at the most opportune time in the complete program of treatment of the patient, after bed rest has been started. And the choice of a combination of drugs to be used must consider the age of the individual, the type of tuberculosis involvement, and other factors."
"Total treatment always starts with a rigid process of bed rest, usually followed by some combination

of drugs and local collapse or relaxation of the involved lung. When this is necessary, a certain combination of drugs has to be used," Dr. Tyler said. "Through your purchase of Christ-

mas Seals much has been done to provide the research that discovered these drugs."

V. F. W. - Auxillary Meeting The V. F. W. and Ladies Auxillary

of District No. 2, meeting, was held in Kendrick, Sunday, Dec. 14, in the Fraternal Temple with 72 representa los for Kamiah had next high tives from Lewiston, Lapwai, Moscow and Kendrick present.

The meeting was opened by Commander Joseph Forest of Kendrick, Walter Wolff, 4; Ernest Heimgartwho gave the gavel over to District ner, 9, No. 2 Commander George Bingman of Moscow. Commander Bingman introduced the Department of Idaho officials who were present, as fol- urday night, scored the first points lows: James E. Durrant, Department and were never headed throughout Commander of Ririe; H. R. Harpt, the game. The half-time score was Sr. Vice Commander of Emmett: El- 25 to 22, Kendrick, and the final mer Moe, Jr. Vice Commander, Wal- tally 45-36, Kendrick. at a recent meeting Manning Onstott had resigned as leader, and been replaced by Jess Mizer, Manning and Chief of Staff Rivie S M Lind In Chief of S M spector, Lewiston,

The main topic of the meeting was a discussion of the dangers of Communistic activities within the United Herman Hinrichs, 1. States.

The District No. 2 Auxillary meetng was presided over by Ruth Sprouse, president, from Moscow. Department officers were introduced as follows: Mrs. Zoe Hull, president, Glens Ferry; Mrs. Ruth Harpt, Conductress, of Emmett; Mrs. Ethel Remaklus, Civil Defense Chairman,

Mrs. Remaklus presented a talk on Civil Defense, it's need of volunteer helpers and the place women can take in this work. She had recently attended a school on Civil Defense at St. Marys, California.

Mrs. Margaret Cox was initiated into the Kendrick Auxillary. Preceding the business session the Kendrick Auxillary served a turkey dinner. The success of this venture was assured by the very able supervision of Mrs. Bill White.

Open Longer Hours

To aid in the mailing of Christmas packages and greeting cards, the Kendrick postoffice will remain open until 6:00 p. m. daily, except Sunday, on which day regular hours will be

17, through Tuesday, December 23. Also as an added service, the stamp Tom Keene then brought up the window will be opened from 4:00 p. will not be issued or cashed.

The use of your box keys would be greatly appreciated at all times, and especially during the holiday season

Television At Southwick

Mr. and Mrs. Don Cantril of Southwick, owners of a television set they brought with them from California several months ago, are now enjoying it — as something besides a decorative piece of furniture — for last Thursday they received the KHQ-TV test patterns perfectly, and we understand they are now enjoying the regular evening telecast from that station.

ing" with all activities to be discussed Another discussion was held on and finances laid out to meet them. Club finances for the coming year and it was decided to make the come before the group, adjournment There being no further business to report on the meeting. An effort

SANTA COMES TO KENDRICK SAT.

Yes, at the last meeting of the Kendrick Commercial Club, arrangements were completed for the arrival of Santa Claus at 1:00 p. m., Saturday, Dec. 20th with treats for all the little children. He is expected to make his appearance on the city fire truck.

After distributing the treats, he will depart and the children (from 1 to 100 years old) will then be the guests of the Kendrick Theater at a Free Show.

So — plan your day accordingly!

SHORT NEWS ITEMS FROM . OUR LOCAL SCHOOLHOUSE

About Christmas Vacation

Christmas vacation this year will start at 2:00 o'clock on December 24th. School will resume of January 2nd, and will also be held on Saturday, January 3rd. This arrangement will enable us to have two days -April 2nd and 3rd, for a short spring vacation, and we will get out on May 22nd, at the end of the school

This will transpire — of course, if there are no interruptions such as fires, slides, floods, or an enforced 'snow vacation."

Basketball

There will be a game at Winchester on Friday evening — A squad and Girls, beginning at 7:00 p. m. Asotin plays here Saturday evening — A and B squads — at 7:00 o'clock.

Kendrick Defeats Kamiah

The Kendrick Tigers were hosts to the Kamiah Kubs last Friday evening — and fans saw a good game for the beginning of the season Kendrick emerging victorious 54

The half-time score was 20 to 18 in favor of Kamiah — but the Tigers warmed up to their work in the second half.

Ronald Craig was high scorer for the evening with 22 points. B. Nich-

Keep Room Lighted For TV

The eye specialists are pretty well agreed that television is less tiring to watch if you have a light on somewhere else in the room.

Such a light prevents the shock to your eyes of looking from complete darkness to the brightly lighted screen, and back again. One manufacturer has built-in lighting on four of its new models to accomplish the

same purpose.

Called halolight, it is a softly light. ed frame around the picture to provide the eye with transition from the brightness of the image to the darker areas around it. This feature also gives the impression of a larger image.

Car Skids - Forehead Cut Mrs. Ted Dorendorf was treated for a deep cut on her forehead early Sunday morning as a result of a car

The car in which she and her husband were riding skidded from the road, which was very icy, near Cavendish, about 4:00 a. m. Sunday. She was brought to Dr. Christensen's office for treatment. Further details are lacking at this time, but we understand their home is at Kellogg.

Honored At University

U. of I., Moscow — Douglas Christ_ ensen of Kendrick, was initiated last week into Alpha Zeta, agricultural honorary at the University of Idaho.

All District Band Here Burke Sower, music director for the local school district, announced

Monday of this week that the Alldistrict Band would be in Kendrick at the High school gymnasium on Thursday, Feb. 26 — and asks all to reserve that day.

Home From Service

His honorable disscharge in his pocket, Cpl. Jay Dee Wilson, son of Mr. and Mrs. A. C. Wilson, Big Bear ridge, arrived home from the service. He was a member of an antiaircraft battery, and stationed at Hanford, Wash., the greater part of his service time.

Sunday School Practice Saturday afternoon immediately following the free show at the local theater, there will be a practice for the Christmas program at the Com-munity church. Mothers are asked to help by seeing that their children are present by 3:30.

Oldest Living Thing in U. S. Has Rival in Olive Tree

Thousands of years from now California may boast of possessing two types of trees that were growing here in the 20th century. One of these is the Sequoia, or giant redwood, a few species of which already have grown in the Golden state for over 4,000 years. The other is the olive tree, a comparative newcomer to the V.S.

The olive tree, although esti-mated to have lived in Mediterranean countries for periods of time equal to that of the Sequoia, did not join this other ancient perennial in California until about 1769. It was in that year that Franciscan padres planted the first olive tree cuttings around their missions.

The modest efforts of these religious men to provide a little shade became the basis of an industry which, according to the California Olive Association, now nets some 2,200 growers in the U.S. about \$10,000,000 annually.

It was not until the late 1890's that olives were available commercially in this country, even in a limited amount. Then improve-ments in canning processes and development of the modern type metal container by the American Can Company gave olives a new life in the new world. During the last 60 years the olive orchard "population" has grown steadily from less than 1,000 acres to about 26,000 acres last year. They now produce an annual crop of over 40,000 tons of olives. Of the 25,000 tons sold for canning, 98 per cent go into metal cans, the remainder in glass containers.

The ripe black olive of California, gathered when fully matured, has a rich oil content and is marketed in nine different grades, ranging in size from "standard" to "super - colossal." According to Professor M. E. Jaffa, nutrition specialist at the University of California, the ripe olive has about double the calorie value of the green

Transfusions Through Arteries Said Life-Saving Measure

The rapid transfusion of blood through an artery, instead of through a vein as is usually done, has been described by two Washington surgeons.

Drs. Charles S. White and Donald Stubbs of the Research Foundation, Doctors Hospital, Washington, said the method has been found "safe, practical and life-saving."

Intra-arterial transfusion, they reported, has been found most effective in cases where the heart beat has stopped or has become almost imperceptible following a neavy loss of blood.

"It should be emphasized that this type of transfusion is not a proper substitute for intravenous transfusion except in those cases in which the blood pressure is very low, or cannot be recorded, or in arrest of the heart action from hemorrhage," they said.

"In the latter cases, blood introduced into the veins, even under pressure, has a long route and a slow one to reach the coronary arteries (supplying the heart), even if it could be forced or propelled in some manner through the right chambers of the heart and lung. The most direct route to the coronaries is the arterial highway.'

The Washington surgeons said that with blood pressure at zero and no pulse to be felt, circulation was repeatedly restored "in an un-believably short time." They add-

ed:
"It is accepted generally that resuscitation is futile if more than seven minutes elapses after the heart action is arrested, as irreparable damage to the cerebral cells ensues, and if life is maintained the facilities remain permanently damaged. Some remarkable exceptions to this statement have been reported, but usually not well authenticated.

Fire in the Desert

Abadan, an oil city of some 140,000 people, only 40 years ago was a desert island in the sun-baked delta below the junction of the Tigris and Euphrates Rivers. In a great geologic trough beneath the Mesopotamian river basin waited a hidden treasure. It remained for an Australian wildcatter named William Knox . D'Arcy to drill 1,180 feet through Iranian limestone and bring in a gusher in 1908.

Wild tribesmen had ridden into Persia thousands of years before and found oozings of gummy black bitumen to fire their lamps and bind the materials of their buildings, tools and weapons. Alexander the Great marched through Persia, his horsemen collecting naphtha and pitch from evil-smelling pools to strike blazing terror among the war elephants of enemies he met later.

Habits Habits are easily formed, but not

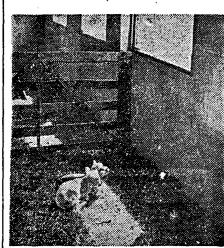

nearly as easy to break. According to Professor William James, Harvard psychologist, it is not just to decide to break a habit—one must decide whole-heartedly and not let a single exception occur. Habits should be broken off abruptly, and not gradually. Taking sleeping pills in a dangerous habit as well as an unnecessary one. Good bedding is all that's needed for sound, restful sleep as long as there are no physical ail-

Experts Say Barn Windows Practicable Sun Reduces Disease **And Barn Moisture**

Farm experts are urging farmers to make practical use of sunshine to solve some of their problems of moisture, sanitation and daylighting inside farm buildings by installing large windows.

Farm building windows in the past have been too small, have frosted over during cold weather so that sufficient sun energy could not get into the building to provide warmth. Also, little attention has

Lambs like these above, as well as other farm animals, are attracted to sunshine in a barn on a cold day. Large doublepane windows for better daylighting and moisture control in farm structures are becoming more popular.

been given to the germicidal effect of direct sunlight in the poultry house, dairy barn or farrowing pen.

Proper ventilation and sunlight not only helps to dry up moisture, but direct sunlight helps kill bacteria wherever they gain access to farm buildings.

As an example of the sun's heating power, in a central farrowing house in Iowa using insulated windows in the south wall, the inside temperature never dropped below freezing although the outside temperature hit 25 to 30 degrees below

Wheat. Corn Estimates **Below Last Year Yield**

The nation's 1951 corn and crops will fall short of 1950 production, according to the latest U. S. Department of Agriculture report.

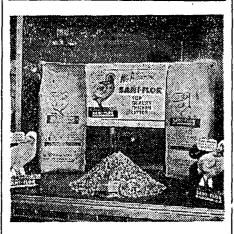

The corn crop for all purposes is estimated at 3,105 million bushels, a decline of 26 million bushels from last year's production, but above the 1940-49 average of 2,981 million bushels. The indicated yield per acre of 36.7 bushels is 0.9 bushels above the average of 33.9 bush-

Production of corn for grain this year is estimated at 2,789 million bushels compared with 2,845 million bushels last year.

Total wheat production is estimated at 994 million bushels, about 3 per cent smaller than the 1950 crop of 1,027 million, and 7 per cent smaller than the average of 1,071 million bushels.

Corn and wheat production, however, is expected to meet U.S.

Poultry Litter

A specially-processed vermiculite poultry litter has been put on the market for the first time. Poultry producers might find that it will fulfill their needs. Called Sani-Flor, it is fireproof, vermin-proof, an efficient insulator against cold, and a non-conductor of electricity. The product is being introduced to seed and feed dealers and hardware stores across the country. It comes in four cubic foot bags, weighing about 25 pounds.

Dead Tree Perils Are **Acute When Winter Hits**

Alive, trees are considered among the householder and farmer's best friends. Dead, they become his most dangerous enemies. Trees that succumb to insects or disease have a way of developing into serious menaces long before owners are aware of their peril. These woody foes should be removed before winter storms hit. Snow, sleet and howling winds make them acutely dangerous.

Is Your Car Winter Safe? The state traffic safety director warns the motorists of Idaho to make sure that their lighting system is in good working condition. Many rear-end collisions can be prevented if both the stop light and tail light

illuminate properly.

Winter weather means less visibility, and your car must be sufficiently lighted to reveal a person on the highway at a distance of 200

Be courteous and obey the law. Tilt your beam when meeting an oncoming car, or when following one. If your car is equipped with signal lights, make sure that they are in proper working order. They must shut off when your turn has been completed.

Big TV Investment

The federal communications commission calculates the capital investments in the 108 televaion stations which were operating the United States this past summer was \$480, 500,000.00.

Tip to motorists: Say it with brakes and save the flowers.

Don't fuss and fume over out-of-season items. Visit Blewett's Grocery's Frozen Foods Case.

Make sure you can make more money from ZOVA farm land!

Step-Ramp Loading **Chutes Are Safest** Many Livestock Yards Are Remodeling Ramps

Livestock markets across the nation are continuing in their program of modernization and the installation of step-ramp chutes to replace old wooden chutes that cause great damage to animals.

Cattle prefer steps to the oldstyle cleats. Many animals are injured and much meat lost from bruising due to the constant prodding necessary to get the animals up and down the old ramps, cattlemen have reported.

The Chicago stock yards recently opened 12 of the modern step-ramp chutes. Of concrete and steel construction, the new chutes are designed to ease the task of unloading stock, and insures safe and

Cattle prefer steps to the oldstyle cleats and amble safely down a ramp of the new style unloading dock without the usual prodding. This type of ramp is becoming very popular in markets across the nation.

efficient operations. Galvanized steel fencing and grates add to the safety features of the dock area. Waffle-grid concrete floorings provide safe footing for animals during the penning process.

The first truck to unload over the ramps brought 24 head of Hereford and Angus steers shipped by Carroll Snola of Onslow, Ia.

Cracked Corn Found Best Feed for Suckling Lambs

Tests made at the University of the cheapest and best ration for the creep-feeding of suckling lambs.

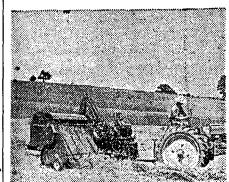

Experiments carried on over a period of nine years compared cracked yellow corn with mixtures of feeds. These included cracked corn, crushed oats and pea-sized linseed oilmeal; cracked corn and commercial milk substitute, and a third ration composed of "sweet feed" made of corn, oats, bran, linseed oilmeal, molasses and salt.

The experiment was conducted under the most controlled conditions possible, Kentucky educators reported.

The conclusion of the experimenters: "None of the three more costly mixtures showed any consistent or significant superiority to corn alone in rate of gain, efficiency of gain or market finish of the lambs."

The experiments were not designed to answer the question of whether creep-feeding pays, but rather to determine what rations are best for creep-feeding under Kentucky conditions.

Baler

This automatic baler is a good example of how machinery is saving manhours on the farm. The baler can package a ton of hay in less than half the time needed by hand methods. With only the tractor driver in the field, this machine automatically picks up hay, slices it, presses it into compact packages and then ties the bale with two strands of twine. Further information is available at local machinery dealers or in the local hardware stores.

Rice Is Most Important Food in the World Today

Although most Americans believe the most important food crop in population. In recent years the cultivation of rice has increased in this country, but in Asia it is the

Life Insurance Funds Going To Nation's Defense Plants

Life insurance funds are moving to the aid of the defense activities of the country in increasing volume, and loans made by the life insurance companies in support of the defense program may reach \$3,500,000,000 for 1951, according to the Institute of Life Insurance.

"In keeping with the usual policy of directing new funds into channels where they may be most useful for the national economy, the current trend in life insurance investments is towards meeting the capital needs of the preparedness program," Holgar J. Johnson, Institute president, commented. "This is in line with the voluntary credit restraint program under which defense needs have precedence over all other elements in the economy. Defense financing now accounts for the greater part of the life insurance company placement of policy-holder funds in business and indus-

More than \$1,000,000,000 has been loaned by the life insurance companies so far this year to defense plants and indications are that a like amount may be loaned in the remaining months of the year.

In addition, some \$800,000,000 has this year been invested in loans to utility companies and railroads, which are basically involved in all defense activities. This amount may be nearly doubled by the end of the year. Thus, the total of financing made available during the entire year for defense industries or defense-supporting activities may come to \$3,500,000,000.

The loans for defense or defensesupporting purposes represent twothirds of all loans made in the first six months by the life companies to business and industrial concerns, and the ratio has been increasing since mid-year.

Contrary To Superstition, Oysters Edible Year-Round

Contrary to superstition, oysters are edible in all 12 months. Hot-weather shipping problems helped to build the R-month legend. The taboo remains appropriate even with modern refrigerated transportation, however, since May to August is the natural spawning season. The adult female oyster's feat of discharging as many as a halfbillion eggs in this season leaves her a bit too thinned down for prime succulence.

Shad were surpassed only by cod and salmon among U.S. commercial fisheries before the turn of the century. Overfishing, industrial pollution, and high dams barring the way to upstream spawning grounds Kentucky experiment station indicate cracked yellow shelled corn is list now. Although the Chesapeake have forced shad far down on the Bay still accounts for one fish out of three, the total catch is less than one-fifth that of 19th century peak

Crabs, alewives, rockfish, croakers, sea trout, and menhaden all figure importantly in Chesapeake Bay commerce. Like oysters and shad, they are studied for rehabilitation purposes by such organizations as the Chesapeake Biological Laboratory at Solomons, Maryland, and the Chesapeake Bay Institute, Baltimore.

Pearls and Pipelines

Iranian nationalists have laid verbal claim to Bahrein, oil-rich island across the Persian Gulf where Arabian dhows put in bearing huge milky pearls from the floor. Persia has been claiming Bahrein without avail since 1783, however. An independent sheikdom under British protection, Bahrein is the site of an American oil field and refinery. Saudi Arabia's oil wells were joined with the Mediterranean coast in 1950 by the competition of Tapline, a 1,068-mile, 30-inch pipeline across the burning Arabian desert. American and British engineers proposed to build next an even bigger "Middle East Inch" (34-36 inches in diameter) from Abadan to the Mediterranean. Iran's oil would thus be linked by a tunnel of steel with the Western world-if the hot desert wind from Tehran does not blow the project

Turbans In a survey of "fashions down through the ages," made by The Book House For Children the turban was found to be a favorite head covering of many ancient peoples, among them, the Armenians, Baby-Ionians, and Phoenicians. Today's favorites include variations of the cloche, beret, and "beanie," a small disc of felt or straw that is anchored to the head, usually with hatpin or

Color Blindness

veiling.

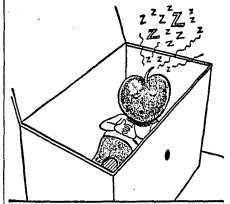

Most common in color blindness is the confusion of red and green, which may affect as many as 80 men and 5 women per thousand population. One person out of several thousand has trouble with yellows and blues. Very rare is complete color-blindness, in which everything is seen as black, gray and the statement exaggerated, rice is white. Not more than a hundred such cases have been reported in the world today. It is the basic food the scientific literature. Even a of more than half of the world's partially color-blind person usually learns to name colors properly a great deal of the time. For example, one with red-green deficiency important crop because it is virtu- may learn by experience that what ally the only food millions of people he sees as dull dark yellow is really have—their means of sustaining red, while a light yellowish-gray is what other people call green.

Controlled Storage Keeps Apples Prime Regulated Atmosphere System Is Recommended

The answer to whether apples will taste as good in May as they do in September is "yes"—if they are apples from specially constructed controlled-atmosphere storage. That is the opinion of Prof. R.M. Smock, of Cornell university's agricultural experiment station.

More than 100,000 bushels of apples are in 15 such storages in New York state, the first of their kind in the country. "When they come

It sort of puts the apple to sleep and it never wakens until brought out into store temperature.

out in April or May or June," Smock says, "the apples are expected to be of prime quality."

Results of 10 years of experiments show that controlled-atmosphere storage will double the ordinary storage life of McIntosh, provided the rooms are properly constructed and operated. Good results also were obtained with Delicious and Northern Spy when the varieties were stored separately.

Sweet Potatoes Make Valuable Farm Crop

Many North Carolina farmers who have never planted sweet potatoes for market should be able to increase their farm income this year through the cultivation and sale of this root crop, according to H. M. Covington, extension horticulture specialist for the state college extension service.

The U.S. department of agriculture has requested farmers to increase their production of sweet potatoes by 12 per cent. Even if such an increase is planted, production would still be about 10 per cent under the 1937-46 annual aver-

Farmers who plan to increase their sweet potato acreage this year to have some for sale, should consider market outlets before planting, Covington states.

Automatic Defroster

A household device which automatically defrosts the refrigerator and is a fine electric clock has been put on the market.

The defroster, the company stated, eliminates the housewife's periodic, usually messy defrosting chores which are so often put off until she finds time and a thick, insulating coat of frost has accumulated on the freezing unit.

Automatically, the defroster turns the refrigerator off at 1 a.m. each day, and then, again automatically, switches it back on after the thin skin of frost is removed from the

During the shut-off periods, moisture created by the melting film is circulated through the box.

With the defroster, which is a precision timing instrument, any electric refrigerator, old or new, easily can be made self-defrosting.

Chlordane Is Effective Ant, Cockroach Killer

The newest and most effective insecticide against cockroaches and certain kinds of ants is "chlordane."

Two-per cent chlordane sprays. with oil or water base, now are for sale in many department, drug and hardware stores.

These sprays leave an invisible. odorless film on surfaces to kill pests which come in contact with

Man-Made Light Moves Ahead By New Inventions

There is nothing to show that our anthropoid ancestors used candles to find their way around among the trees after dark, but there is ample evidence that the hairy cave man used fire to scare away prowling

Man-made illumination has come a long way since those remote days. By far the greatest strides have come in the past 75 years—greater progress than through all the thousands of years before. From the cave man's torch to electric light, the flame was the only source of illumination.

Within recent weeks, a new source of artificial light has been announced wherein electricity appears to serve merely as a match to light a wick. Powdered phosphor on a sheet of glass emits a mellow glow of its own under electric impulse. Your house of tomorrow may, have these panels installed in walls and ceilings. It is claimed the cost of maintenance will be so low that the only need for switches will be to turn lights off when you want darkness. Clockfaces, stair risers and other incidentals will be permanently connected.

With this revolutionary development in man-made light comes wonder as to how it all started. Archaeologists have concluded among the earliest to whom the cave man passed his flaming torch were the ancient dwellers of Mesopotamia where lamps, fashioned from terra cotta, were found to have been used during 7000-8000 B.C. Copper and bronze lamps were used by the Persians and Egyptians in 2700 B.C. Homer described a "Festival of Lamps" in 950 B.C. The Romans were using lanterns a century before Christ.

The candlesticks of Biblical times and the lamps of the vestal virgins used animal and vegetable oils. Pliny mentioned the use of a mineral oil for lamps in 50 A.D. The Phoenicians appear to have been the first to use wax for candles in

Atom Disaster Would Demand Many Trained 'Mass Feeders'

"In case of enemy attack or atom bombing, the disaster would de-mand more trained persons for mass feeding than we can hope to have today," two Red Cross workers who conducted an emergency feeding program during the flood disaster in Kansas City last July, warn in an issue of the Journal of Home Economics.

"Disaster feeding at best is a hodgepodge affair because there are never enough experienced people and survivors to do an ideal iol Jane Griswold, assistant national director of the American Red Cross Food and Nutrition Service, and Kathleen Kienstra, director of the Midwestern Area division of that service, explain in an article pointing out that experience in the flood disaster indicates what the situation would be in event of enemy attack. While urging the home economists to be ready with their professional help, the authors pay great tribute to the work of the community organizations who carried out the feeding program dur-

ing the Kansas flood. "It is encouraging to see the common purpose that draws people together when disaster comes to a community. The simple, basic, practical things that people can do for each other helps to ease the impact of catastrophe and turn the mind from despair," the authors conclude in the article, "Red Cross Fights Flood Disaster."

Treating Addicts Law enforcement, education of

the public and treatment of the individual are the three most important factors in combating the alarmingly increasing dope addiction among teen-agers, according to an article in Today's Health, published by the American Medical Association. "Regardless of where the upsurge of addiction started, it has jumped racial, economic and social boundaries," said the author of the article, Dr. Victor H. Vogel, medical officer in charge of the U.S. Public Health Service Hospital at Lexington, Ky. The hospital is one of the two federally operated for the treatment of drug addicts. Dr. Vogel reported that admissions at the two federal hospitals for drug addicts rose from 2,700 in 1949 to 4,500 in 1950, with an estimated rate of 4,200 in 1951. "An alarming part of this increase was due to the admission of addicts under 21, which jumped from 22 in 1947 to 440 in 1950 an increase of 2,000 per cent," Dr. Vogel stressed.

Early Inventors

Among the early American inventors who founded great industries, few struggled against adversity more desperately than Gail Borden (1801-1875), who was the first to obtain a patent (August 19, 1856) on a process for condensing milk. His first invention was a meat biscuit for which he was granted a prize at the International Exposition of London in 1851. Returning from London he was anguished by the death of infants on the ship who had been fed milk from sick cows. As a result of this experience, he spent years of experimentation to invent a process that would preserve milk under wholesome conditions.

NOTICE OF PRIVATE SALE OF REAL PROPERTY

In The Probate Court of Latah County, State of Idaho

In the Matter of the Estate of Margaret Lucken, Deceased

Notice is hereby given that the Mrs. Ernest Coundersigned administrator of the and Joe Owens. estate of Margaret Lucken, deceased, M. of said day at the office of Abe McGregor Goff in the Idaho First National Bank Building at Moscow, Idaho, all right, title or interest of the above estate and of said decedent the

Lots Six (6), Eight (8), Nine (9), and Ten (10) in Block Forty three (42); all of Block Forty three (43); Lots One (1) to Five (5), inclusive, in Block Forty four (44); Lots One (1), three (3), Four (4), and Five (5) in Block Forty five (45); all of Block Forty six (46).

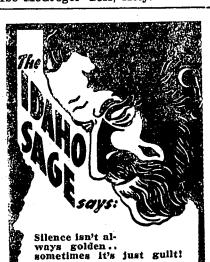

The D. V. Kuykendall family, Alma Betts and son Eugene and Doris and Steven Christensen were among the Lewiston visitors Saturday.

Mr. and Mrs. Lewis Kazda and son Steven of Pomeroy; Miss Evelyn Kazda and Albert Lawrence of Lewiston spent Sunday with their parents, Mr. and Mrs. Oscar Lawrence and family.

The foregoing property is all located in the Original Town of Kendrick, Latah County, Idaho. The terms of said sale are cash, ten (10%) per cent of the purchase money to be paid to the administrator and accompany each bid on the day of sale and the balance of the purchase price to be paid on the day of the confirmation of the sale by the Probate Court. Abstract at the expense of the purchaser. Said administrator reserves the right to re-

ject any and all bids. Bids must be in writing and may be left at the office of Attorney Abe McGregor Goff at Moscow, Idaho, or delivered to the administrator personally, or may be filed in the of-fice of the Clerk of the Probate Court at any time after the first publication of this notice and before the making of the sale.
Dated this 1st day of December,

ED. HALSETH Administrator of the Estate of Margaret Lucken, deceased. First pub. Dec. 4, 1952. Last pub. Dec. 18, 1952. Abe McGregor Goff, Atty.

That's why our industry doesn't try to hide the fact that 1951 special taxes against trucks poured \$1,300,000,000 into federal and state coffers.

CANNED MILK — Morning, Carna-

GOLDEN WEST COFFEE —

HELLO, THERE, FOLKS —

Well, here it is almost Christmas time again — and local stores are jammed with fine gifts of all kinds. But, you, Madame Housewife — are probably busier planning that Christmas dinner in your mind, than with gift selections..

So why not let us help you plan that meal? With the hot rolls, see to it that the butter dish is carrying a bountiful supply of "Potlatch Chief" pure golden butter, and when the mashed potatoes are served, see to it that a big lump of "Potlatch Chief" Butter is melting in the middle. It gives a wonderful taste as well as adding to the attractiveness of the potatoes.

Aunt Nellie: "Well, Bobby, did you see Santa Claus last Christ-Bobby: "No, auntie. It was too dark. But I heard what he said

when he hit his head on the fireplace mantel"!!

How about dessert for that Christmas dinner? Top off that mince pie with a big scoop of delicious "Potlatch Chief" ice cream!! Man, there's a dessert to please the most fastidious!!

Kitty: "I must tell you, darling. I'm engaged to Frank."
Katty: "I'm not surprised, dear. When I turned him down last week he said he didn't care what became of him."

Be sure that cream pitcher contains "Potlatch Chief" cream when you put it on the Christmas dinner table. Makes good coffee bet-

Despite the high prices of whiskey, a nickel drink of it is still available in the South — a recent autopsy shows!
