I would greatly appreciate it if you would once again send the news to school for me via Hazel Lynne — so I can have news of everyone in this community. Things are getting busy now for all of us — so Please Help. This is your column — in your paper — and I'd like to include every one. Don't forget. Send that News!

**Grange Meeting**  
The Kendrick Grange will meet on Monday, March 8, when the Pinochle series losers will entertain the winners at a 6:30 dinner, which will be followed by the regular business meeting.

The remainder of the time will be spent in dancing.

Each Grange lady is asked to please bring a dish towel, with the Grange emblem marked in corner.

**Road Work Progressing**  
The Kneaston & Huntley crew engaged in building the new Bear Creek bridge and approaches at Kendrick is making steady progress. Another section of the bridge has been poured, leaving but one to go, and work on the approaches has made excellent progress this past week, under favorable weather conditions — and these approaches should stand up well — for they are being built mainly of rock blasted from the north and east slope of the schoolhouse hill, and some pretty heavy charges, judging from the ground shaking, have been used in this latter operation.

Preliminary fill work has begun from the edge of the Elton Wilson home, and is daily growing higher.

## JOHN SOUMAR, WELL-KNOWN RIVER AREA FARMER, DIES

John Soumar, 63-year-old World War I veteran, injured Thursday while raking weeds at his farm on the north side of the Clearwater river, near Myrtle, died at St. Joseph's hospital, Lewiston, Monday at 2:00 p. m.

He remained unconscious from the time he was hospitalized, suffering internal injuries, described by his physician as too severe for him to be moved for X-rays or further treatment. He was thrown from the rake when the team he was driving bolted and ran, dragging him across the open field. Jack Sampson, working nearby, said a wheel of the rake caught on a fence post, causing the runaway.

Mr. Soumar was brought to the Lewiston hospital in an ambulance after Sampson summoned help from Verner McKay, Myrtle storekeeper. His injuries included broken ribs, a fractured neck and possible skull fracture.

The deceased had lived in the Myrtle area since he was 14. He was a son of the late Mr. and Mrs. Thomas Soumar, who farmed in the Juliaetta area before World War I.

John Soumar was born at Pastigo, Wis., June 1, 1890, and served overseas with the army during World War I. He was a member of the Catholic church and Lewis-Clark Post of the American Legion, Lewiston. He never married.

He enlisted with the army, May 10, 1918, serving with the 31st Infantry. He was discharged with the rank of Pfc. Oct. 22, 1919.

Survivors include three sisters, Mrs. Frank Pavel of Lewiston; Mrs. Nick Demo of Lapwai, and Mrs. Charles Stehlik of Portland; two nieces, Mrs. Charles Straight of Lewiston and Mrs. Oscar Lawrence of Southwick.

Mr. Soumar, in addition to farming, often spent slack winter months running a trap line. He loved the out-of-doors and could tell many interesting things about the habits and doings of wild birds and animals.

Rosary was recited at 7:00 p. m. Wednesday at the Vassar-Rawls Funeral Chapel. Requiem mass will be celebrated at Our Lady of Lourdes Church, Lewiston, Thursday (today), with the Rev. Fr. Patrick Phelan officiating. Burial will be in Normal Hill cemetery, with Vassar-Rawls in charge. — Lewiston Tribune.

**Two Hundred Attend Dedication**  
Two hundred or more attended the organ dedication services and potluck supper last Friday evening in the Kendrick Community church.

The banquet room in the basement was filled to overflowing, as members and friends gathered round the gaily decorated tables for "pot-luck."

Following dinner all adjourned to the church sanctuary where the highlight of the evening took place.

The Rev. F. C. Schmidt, pastor, was assisted by Rev. A. K. Walborn of Culesac in conducting the dedication service. Mrs. Robert Magnuson played the musical prelude and the Junior Choir sang "Faith of Our Fathers," followed by an organ solo by Joyce Armitage.

The Senior Choir sang "A Song and a Prayer," Mrs. Herman Schupfer played organ solos and the organ in duet with Mrs. John Johanson at the piano. Mrs. Dennis Racicot was a vocal soloist, and Mrs. Oscar Slind the guest organist, she playing several numbers.

## Enter Hospital

Mrs. James Burns was admitted to St. Joseph's hospital, Lewiston, for treatment, Tuesday.

Mrs. Alfred Swanson, Southwick, also entered the same hospital Tuesday.

SCOUTS, FORESTERS, CONSERVATIONISTS REPAIRING

The Boy Scouts outdoor code: "Be Conservation Minded" was put into practice by the Kendrick Troop No. 149 and the Lewiston Troop No. 152, last Saturday. Led by Henry Jones, state forester, Manning Onstott, soil conservationist, and Mel R. Carlson, forester for the Soil Conservation service, the twenty-eight boys were taken to a recent logged off area owned by Mrs. Johanna H. Nelson, and operated by Roy Glenn, where erosion control practices were put to work.

Work was begun on a skid trail four miles above Kendrick on Potlatch creek, where logs had been skidded down from the benches above. The skid trail was very steep, being an estimated 35 to 40 percent grade, and water had already begun to concentrate and wash soil down to the creek. The Scouts were shown how to make check dams or barriers across the skid trail to divert the water off onto the grassy slopes. Barriers were constructed with shovels and pulaskis furnished by the State Forestry department. They were built 135 to 150 feet apart, depending on the steepness of that particular trail.

At noon lunch was eaten at a small side drainage high on the bench. Roy Glenn and his brother,

Albert Glenn and his son Eldon, met the group here, they having been seeding the skid trails and areas where the soil had been disturbed by the logging.

After lunch Mel Carlson, forester, talked to the group, showing the various instruments used in measuring the age, growth and volumes of trees. Also emphasized and discussed were the Scouts outdoor codes, which are as follows:

Be clean in my outdoor manner.

Be careful with fire.

Be considerate in the outdoors.

Be conservation minded.

Manning Onstott distributed grass seeds in small bags to each boy and showed the boys how to seed the exposed mineral soil to a grass mixture. He told the boys of the importance of seeding in areas like this so that the growing vegetation will protect the soil from washing. The seed was furnished by the Soil Conservation service.

Assisting the group were Del Kimball, Farm Home administrator and Scout leader Pontius, Lewiston; Roy Glenn, Albert Glenn and son Eldon. These men are to be commended not only for their work on the conservation problem, but for their interest and effort with the local youth of their communities.

## KENDRICK TIGERS WIN OPENING TOURNAMENT GAME

Kendrick got men in the clear under the basket for several easy lay-ups in the final period, which permitted it to go on to victory over Craigmont 46-39, in the first evening game of the Second District Class B basketball tournament at N. I. C. E. gymnasium, Lewiston, Monday evening.

The losers were a good match for the winners until that stage of the contest, Kendrick broke a 26-all deadlock with five minutes to play in the third period and was not again headed or tied. However, Craigmont lagged only a few points behind until Ernie Heimgartner bagged a long shot and Ron Craig followed with a fast-break goal resulting from Al Clemenhagen's lengthy pass.

That made it 36-30 for Kendrick and the Tigers romped to a 45-33 lead in short order. Craigmont closed with a rush to cut the final deficit to seven points.

Ron Lee of Craigmont got off the most sensational shot of the opening day barrage when he slickly canned one from some 35 feet out.

The losers might have made the finish much closer with more accuracy at the foul line. Six times Craigmont failed to score on either try under the one-and-one foul rule. Kendrick made at least one good every time it had an opportunity at the free-throw mark.

Jim Armitage of Kendrick bagged scoring honors with 15 points. Gary Thompson led Craigmont with 13.

The box score follows:

Officials for the contest were Ed. Williams and Dwight Church.

First round winners Monday, besides Kendrick were, Genesee, which defeated Clearwater High 59-26; Pierce took the measure of Troy 50-44 and Lapwai turned back Cottonwood 54-42. — Lewiston Tribune.

## KENDRICK DEFEATS DEFENDING CHAMPS — GENESSEE

Tow-headed Ernie Heimgartner slipped in a free throw 10 seconds before the final gun and Kendrick triumphed 59-55 over Genesee, defending District champions, in the top Second District Class B prep basketball tournament game yesterday evening at N. I. C. E. gymnasium.

Genesee shoved off to a quick lead over Kendrick, following an opening-

seconds tie, and John Stout single-handedly ran the Genesee tally from 11 to 17.

Kendrick lagged behind 17-11 going into the second quarter, a margin Genesee had held since the first three minutes of action.

The winning Tigers began steadily closing the gap and just before the second period ended it was a 25-all deadlock — the first of 12 ties for the contest.

Play during the entire game — played before 1,700 fans — was keyed to a furious pitch and five players left the floor because of personal fouls. Three of these were Genesee men.

Al Clemenhagen earned another deadlock for Kendrick starting the last half with a fast-break goal that left it 28-all on the scoreboard. Lee canned a goal and a free throw for a new Genesee lead, but Walter Wolff's brace of long shots knotted the count at 34, and then gave Kendrick its first lead, 36-34.

Stout, who led Genesee scoring with 17 points, canned a lay-in and a free chance, but Ron Craig of Kendrick tied it again, this time at 37, with a foul shot. The teams battled to a 39-all score, then Genesee connected on two long shots by Lee and Bob Bennett's fast-break goal sent the Bulldogs out in front 46-44.

Stout had five consecutive points, Lee four in this stage of the battle.

Kendrick took its second lead — on Wolff's goal. Bennett scored twice again of only two points — at 49-47 in succession while Kendrick was getting a foul shot to throw the contest into a 50-50 deadlock. Gary Krier and Sather hit for goals to return the lead to Genesee 54-51, with four minutes left.

Wolff and Al Clemenhagen tallied from the foul line and Jim Armitage rebounded for two points to return the edge to Kendrick, 55-54. Bennett gave Genesee its final spurt with a goal and a brace of gift tosses.

That made it 58-55 for the Bulldogs with two minutes to play. Armitage tallied from the free-throw mark and Genesee began to stall. This failed, and Clemenhagen put up a shot from the side which was good, tying the score, and Genesee shot and missed.

While Kendrick was bringing the ball down court Heimgartner was fouled, 10 seconds remaining. He made good his first try, missed the second, but Kendrick recovered possession and easily waited out the clock.

## March Winds Arrive Early

March has a reputation for a "windy month", but to date February holds the record easily, there having been a great deal of wind the past week, beginning Wednesday evening, and continuing throughout most of the remainder of February. The wind has cut deep into the top soil excess moisture, and farmers report that some field work may be possible within the next week — although some have been spring-toothed and discing in the dryer spots this week.

The temperature has been quite mild, although at times the air has been laden with dust, presumably from the Pasco-Kennewick area.

## PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

**Limits Placed On Road Sectors**

A 30-mile speed limit and tightening of load limits for trucks and busses became effective at midnight, Saturday, on four stretches of highway near Lewiston, John Phelps, district engineer for the state highway department, announced Thursday of last week.

Affected are U. S. Highway 95, from Lewiston to Spalding, Winchester to Grangeville, and Whitebird to Riggins, and State Route 42 from Spalding to the Kendrick Junction at the foot of Bear Ridge grade.

**NOTICE OF ELECTION TO ORGANIZE CEMETERY MAINTENANCE DISTRICT**

NOTICE IS HEREBY GIVEN that on Thursday, the 11th day of March, 1954, at the City Hall in Kendrick, Latah County, Idaho, an election will be held for the purpose of determining whether or not the proposed NEZTAH Cemetery Maintenance District shall be organized as provided in Section 28-106 of the Idaho Code, which election will be open from 12:00 to 5:00 in the afternoon of said day.

The boundaries of said proposed Cemetery Maintenance District is as follows:

Beginning at the point where the East boundary line of Section 19, T 38 N, R 2 W, intersects the center line of Potlatch Creek; thence South along the East boundary line of Sections 19 and 30, T 38 N, R 2 W, to the quarter corner common to Sections 29 and 30, T 38 N, R 2 W; thence West along the East-West quarter line (or center line) of said Section 30 to the East boundary line of Section 25, T 38 N, R 3 W; thence South along the East boundary line of said Section 25 to the Southeast corner of said Section 25, T 38 N, R 3 W; thence West along the South boundary line of Section 25, T 38 N, R 3 W to the quarter corner common to Sections 25 and 36, T 38 N, R 3 W; thence South along the North-South quarter line (or center line) of Section 36, T 38 N, R 3 W, to the center of said Section 36; thence West along the East-West quarter line of said Section 36 to the East boundary line of Section 35, T 38 N, R 3 W; thence South along the East boundary line of said Section 35, T 38 N, R 3 W to the Southeast corner of said Section 35, which corner is on the boundary line separating Townships 37 and 38 North, R 3 W; thence West along said Township boundary line to the quarter corner common to Section 35, T 38 N, R 3 W and Section 2, T 37 N, R 3 W; thence South along the North-South quarter line (or center line) of Sections 2, 11, and 14, T 37 N, R 3 W to the point where said North-South quarter line intersects the North boundary line of the Nez Perce Indian Reservation; thence West along the North boundary line of the Nez Perce Indian Reservation to the East boundary line of Section 15, T 37 N, R 3 W; thence South along said East boundary line of said Section 15, T 37 N, R 3 W to the Northeast corner of Section 22, T 37 N, R 3 W; thence South along the East boundary line of Sections 22 and 27, T 37 N, R 3 W to the Southeast corner of Section 27, T 37 N, R 3 W; thence West along the South boundary line of Sections 27, 28, 29, and 30, T 37 N, R 3 W to the point where the South boundary line of said Section 30 intersects the center line of Potlatch Creek; thence Northeastly (or upstream) along the center line of Potlatch Creek to the point of beginning. All of said territory being that portion of the cemetery maintenance district situate in the County of Nez Perce, State of Idaho;

And also the following described land, to-wit:

Beginning at a point on the North boundary line of Section 21, T 37 N, R 3 W where the South boundary line of Latah County intersects the center line of Potlatch Creek; thence West on said South boundary line of Latah County to the Southwest corner of Section 13, T 37 N, R 4 W; thence North along the West boundary line of Sections 13, 12, and 1, T 37 N, R 4 W and the West boundary line of Sections 36, 25, and 24, T 38 N, R 4 W to the Northwest corner of Section 24, T 38 N, R 4 W; thence East along the North boundary line of Section 24, T 38 N, R 4 W and Section 19, T 38 N, R 3 W to the Southwest corner of Section 17, T 38 N, R 3 W; thence North along the West boundary line of said Section 17, T 38 N, R 3 W to the Northwest corner of said Section 17; thence East along the North boundary line of Sections 17 and 16, T 38 N, R 3 W to the Southwest corner of Section 10, T 38 N, R 3 W; thence North along the West boundary line of Sections 10 and 3, T 38 N, R 3 W to the Northwest corner of Section 3, T 38 N, R 3 W; thence East along the North boundary line of Sections 3, 2 and 1, T 38 N, R 3 W and Sections 6 and 5, T 38 N, R 2 W to the Northeast corner of Section 5, T 38 N, R 2 W; thence South along the East boundary line of Sections 5, 8 and 17, T 38 N, R 2 W to the Northwest corner of Section 21, T 38 N, R 2 W; thence East along the North boundary line of Section 21, T 38 N, R 2 W to the point where said North boundary line of said Section 21 intersects the center line of Potlatch Creek; thence Southwesterly (or downstream) along the center line of said Potlatch Creek to the point of beginning. All of said territory being that portion of the cemetery maintenance district situate in the County of Latah, State of Idaho, and a map showing the boundaries of such district is on file in the County Recorders Office, Latah County, Idaho.

Any person residing within the above named District and who possess all the qualifications of an elector under the general laws of Idaho is entitled to vote in this election. Said electors shall cast ballots which shall contain the following words:

Heavy vehicles are limited to 350 pounds per square inch of tire surface on these sectors.

Phelps said these stretches of road are showing the effects of the weather and the heavier vehicles traveling there are aggravating the road breakups caused by thawing frost.

The 30-mile limit signs were posted Thursday night of last week.

Speed limits had been from 50 to 60 miles and these sections and total load limit was 7,200 pounds, in the past.

More road sections are soon to be posted, according to Phelps. — Lewiston Tribune.

Our Comment: We understand that some of the truck operators, particularly those operating the big logging trucks operating from Texas ridge to Spalding, were protesting, claiming that the new limit didn't even allow them to operate an empty truck upon the road.

But that as the case may be, the way some of the drivers boomed through Kendrick, it would seem to have been more of a "speed" desire than "load desire" that raced the heavily loaded machines through town. And evidence of damage be-

**Pumping For Irrigation**

That Idaho has barely scratched the surface of its potential in land development by deep-well pumping is apparent from the reports of two Idaho Power company representatives at the state's first farm electrification short course at the University of Idaho this past week.

During the past five years, reports B. E. Berry of Twin Falls, 166,162 acres of land have been brought under irrigation in the Snake river by pumping units. Of this acreage, 49,-

700 acres came into production last year.

Biggest development unit to date has been north of Rupert, where 132 wells provide water for around 35,000 acres. Berry said that investigations to date indicated ample underground water for a far greater reclamation development.

Wells in the Rupert area go down 130 to 360 feet. Of the 35,000 acres reclaimed, about 20,000 acres are under sprinkler irrigation. In this development is the largest sprinkler irrigated farm in the world, covering more than 7,000 acres.

Rapid expansion of deep-well irrigation is expected in the Pocatello district during the next several years. In the area between American Falls and Blackfoot, on the west side of the Snake river, around 25,000 acres were irrigated last year, reports

Thomas Spofford of Pocatello. Wells in this section go down 130 to 150 feet. Surveys indicate that about 65,000 acres of land, dry-farmed in the past, could be brought under irrigation with deep wells. Water supply here also appears adequate for the vast development in prospect.

**Light Bulb System Hastens Vegetables**

**Speed Up Development In Backyard Hotbeds**

Burn 25-watt light bulbs in a backyard hotbed and you'll eat your own early June peas next May.

That advice for home gardeners comes from Robert L. Zahour, Westinghouse lamp engineer. Such miniature "greenhouses" warmed by low-power bulbs hurry vegetables to the table 10 days ahead of regular seed plantings outdoors. Flower seeds started in hotbeds are brought to bloom one month earlier, he added.

The 25-watt bulb is best for hotbeds because higher wattage bulbs are more apt to create hot spots in

Seedlings cocooned in electric hotbeds like these hurry vegetables to the table 10 days earlier and bring flowers to bloom a month earlier.

the soil, stunting seed growth or scorching the tender young plants.

The cost of a bulb-heated hotbed averages only three-tenths of a cent per plant for electricity during the entire six-weeks season in northern United States, the engineer calculated. This is 30 per cent less than the cost of soil heated by electric cable and only half the cost of manure. Manure, which requires soil preparation such as digging into frozen ground, depends upon fermentation for its heating effect in a hotbed.

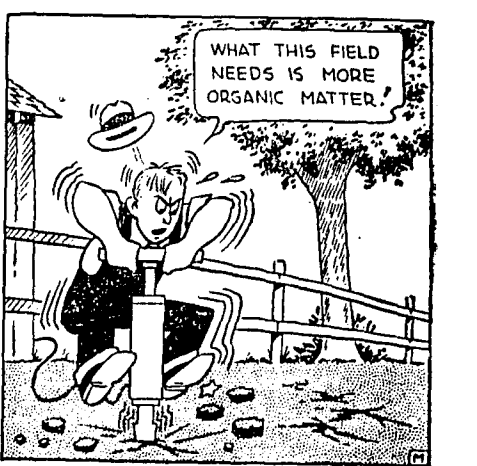

**Term 'Hybrid' in Swine Applicable to Offspring**

The term "hybrid" has come to mean superior producing ability to the corn grower. It is natural, therefore, that the terms "hybrid hog" and "hybrid boar" should interest corn belt pork producers.

It seems quite clear, most agriculturists are agreed, that "hybrid vigor" eventually will increase greatly the efficiency of livestock production. Informed breeders, however, believe that there are not yet available adequate dependable sources of boars for producing hybrid hogs.

Furthermore, the name "hybrid" in the accepted sense of the term should be reserved for the litters produced by the market-hog farmer.

**Organic Matter Loss**

Maybe you don't need a trip-hammer to work your land. But if you have a hard time plowing the ground, don't blame it on the weather or your implements. The trouble may be due to loss of organic matter from the soil.

G. P. Walker, Purdue University extension agronomist, says that when soils can't take plowing readily, it's a sign they are dangerously low in organic matter.

Walker's advice is more sod crops in the rotation to give the soil an easily worked texture. Sod crops well fed with nitrogen, phosphate and potash put life in the soil and build up its organic matter supply. They improve structure and tilth.

**Farmers Given Warning Of Newcastle Disease**

Bold Ellis, poultry specialist of the Wyoming agricultural extension service, discloses that many farmers may be acquiring a false sense of security over the threat of Newcastle disease to their poultry flocks.

He pointed out that the disease has spread to every state in the union, and although there is less talk about it today than there was casualties are still very heavy.

**Farallons, Bird Refuge,  
Now Closed to Civilians**

California's Farallon Islands, whose 1950 U.S. census count of an even 30 inhabitants was reported complete before the April 1 official census started, found human traffic there far greater in the 19th century than it has been in the first half of the 20th.

Russian sealers occupied the bleak group, 26 miles west of San Francisco's Golden Gate, from 1812 to 1833, notes the National Geographic society. Drafting Indians and Aleuts as labor, they reduced seals from abundance to scarcity, taking close to 200,000 skins for the China trade. Sir Francis Drake had restocked his vessel with seal meat at the Farallons in 1579.

During the 1849 gold rush in California, food was scarce in San Francisco. Egg-gathering from the nests of gulls and murres on the Farallons became profitable and well organized, and the traffic continued for many years. Finally, bird lovers stepped in, and the islands are now a bird refuge, closed to civilians from April to August.

The Farallons, known but little even to mainland Californians, consist of three pinpoint groups of rocky islets spreading over seven miles of the Pacific ocean on air and water lanes of trans-Pacific travel. Paradoxically, although they are officially part of the City of San Francisco, the mayor and other city officials may not set foot on them without special permission.

The permission must come from the 12th coast guard district based in San Francisco. It provides the personnel that maintains the powerful beacon 358 feet above sea level atop Southeast Farallon, the only inhabited island of the group.

The lighthouse - keeping families live in neat, white houses at the foot of the high beacon cliff. A radar station and an automatic fog-signal horn complete the island's important navigation aid equipment.

**Human Regard for Criminal  
Modern Idea, Says Educator**

The idea that the legal offender shares a common humanity with his nonoffender brother is a relatively novel conception and regards the criminal as a human being and not subhuman, specialhuman, superhuman, infrahuman, robothuman, or extrahuman, Dr. Robert Lindner, clinical psychologist at Harlem Lodge, Catonsville, Maryland, told the first session of the third annual institute on crime and delinquency which University of California extension held in Los Angeles recently.

Declaring that "offenders, too, are human," Dr. Lindner pointed out that the modern view of the criminal historically succeeds the primitive, theological, philosophical, mechanical, and psychiatric views. "The modern view is based on a total approach to the offender, including the whole person and his history in the world; it is based upon scientific knowledge that is reaching a level of maturity; its sources are biological, anthropological, sociological, and psychological. Among these, the psychoanalytical appears to be the most fruitful and comprehensive."

**Study Hydrogen Bonds**

While other scientists the nation over concern themselves with hydrogen bombs, Dr. Joseph W. Ellis and Dr. Leonard Glatt of the physics department of the University of California are busy with hydrogen bonds—a study more closely related to everyday life. Hydrogen bonds are links which assist in holding together the long molecular chains found in many of the substances we use in our daily life. These links are formed by the sharing of a proton (hydrogen nucleus) between two units of the same or different molecules. Examples of substances that bind together are liquid water, proteins, and many plastics, including nylon.

**From Everywhere**

The ingredients of paint products literally come from the world's four corners. Take, for example, a quarter pint can of varnish stain. It's packed in a shipping case made from fibre that may have come from Norway. The paper for the label may have come from the same place. The tin for the can probably came from either Bolivia or Malaya. The contents may consist of linseed oil that came from Argentina, the drier from Asia, tung oil from China, resin from Africa and dyes from England. Skillfully combined by American know-how, the user benefits from world-wide activity which he seldom realizes.

**Making Good Soils**

"Somehow the notion gets around," says Dr. Charles E. Kellogg of the U. S. department of agriculture, "that originally our farm soils were highly productive; that is, productive when first plowed. Many of them were, like the black lands in our Middle West and in central Eurasia, for example, and in some of the great deltas and alluvial valleys. But most soils are not. It is through liming and fertilization, drainage, irrigation, the introduction of legumes, and a host of other practices, that farmers have made their soils productive," explains Dr. Kellogg.

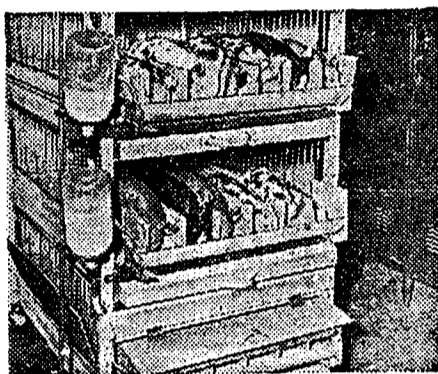

**Synthetic Sow's Milk  
Is Used Successfully**

**3,000 Piglets Raised  
On Experiment Formula**

The development of a synthetic sow's milk, made possible by the wonder drug terramycin was announced recently by Herbert G. Luther, research scientist associated with the Pfizer & Co., laboratories of Brooklyn, N.Y.

The formula, called Terralac, was tried on 500 piglets at the company's laboratories. In addition, 3,000 piglets have been raised successfully

without sows on several large pig farms which cooperated in the testing of Terralac.

Luther contends the formula may revolutionize the swine-raising industry. In the first place, his experiment reduced infant pig mortality to an astonishing 5 per cent, as contrasted with the national average of 21 to 33 per cent. It also largely solves the problem of the runt, long a bane to hog-raisers, by making growth-stimulating terramycin and milk equally available to all pigs in the litter.

Luther emphasized that good pig farm management is essential for the successful use of Terralac. Constant temperature must be maintained, either via the use of heat lamps or by blowing warm air. And it must be prepared properly and fed at regular intervals.

**Average U.S. Farm  
Bigger As Number Falls**

The Bureau of the Census reports a decided trend toward fewer but bigger and better equipped farms between 1929 and 1950.

The number decreased by 713,000 in the decade, the bureau reports, but the average size unit grew from 174 acres in 1940 to 210.5 acres in 1950. There were 5,384,000 farms in 1950, against 6,097,000 in 1940.

The sharpest decrease came in the five years between 1945 and 1950, when the number of farms dropped by 475,000.

Other statistics in the report included: About 870,000 fewer persons were working on U.S. farms in 1950 than in 1940.

Less than one-third as many horses and mules were on farms in 1950 as in 1920.

In 1950 there were 59,764,000 cattle and calves more than 3 months old on farms as compared to 60,674,736 in April, 1940.

The number of chickens on farms was 2,500,000, or 0.7 per cent more than in 1940.

**Plenty of Pull**

One of the newest aids to farmers is the power curve tire developed by B. F. Goodrich engineers to provide maximum traction and prevent bogging down of heavy tractors and combines in the sticky mud or sandy soil of rice fields. The tire is reported to be the first suitable for use in all types of soil used for growing rice.

**Veterinary Group Sets Up  
New Defense Committees**

A nation-wide network of defense emergency committees has been set up by the veterinary medical profession to help safeguard this country's livestock health and food production in case of war. The AVMA reports. The committees will assist on defense measures in case of biological warfare, atomic warfare, atomic blasts, or other wartime emergencies concerned with the nation's animal population.

• A HEALTHY FOREST INDUSTRY keeps Idaho prosperous •

**HERE'S A DECK  
THAT HOLDS  
FOUR ACES**

THE PILE OF LOGS beside a millpond is called a deck. Every deck of logs at Potlatch Forests, Inc. holds four aces:

**Continuous Production**, because the decking of logs builds a reserve of raw material to draw upon when needed.

**Steady Employment**, because Potlatch harvests trees and runs its mills the year around.

**Community Stability**, because year around employment and production has ironed out many economic ups and downs of the forest products industry.

**Satisfied Customers**, because orders for high grade lumber and other products can be delivered on time.

More products reach more markets, and more people are employed because Potlatch makes the most of each tree harvested. At Potlatch every log rates aces high.

At Potlatch, the best use for each part of the log is found in one of four ways: If it's a peeler, it goes into veneer and plywood; if a saw-log, into lumber and lumber products; if pulpwood, into the pulp and paper mill, which utilizes everything but bark; if bark, it is burned to generate power for the plants. This is planned utilization to eliminate waste.

**Assemblies Program**  
 National School Assemblies presented the sixth of their programs in this year's series last Wednesday morning at the Juliaetta school.  
 The DeVries, a Dutch musical trio, presented an entertaining program of Dutch folk songs and dances.  
 Last Thursday Ted Meyer brought a safety film: "Devil On Wheels" to school for showing to the Sophomores, Juniors and Seniors. This film, which ran an hour and 20 minutes showed the terrible consequences of reckless driving. It apparently was well worth the time spent, because the students are still discussing it.

**Seventh Grade News**  
 Diane King and Loeda Meyer recently showed interesting souvenir collections from the Orient and India, respectively. These displays showed some of the customs and usages of these countries.

The weekly class meeting was presided over by Mary Lee Westendahl, president. The latter part of the meeting was turned over to the program chairmen, Patricia Mielke and Loeda Meyer. A playlet on "Saving Stamps," "Future Unlimited" was presented. Those taking part were Connie Howell, Patty Corkill, Diane King, Albert Wendland, Jack Mabbott, Mike Tarbet, Dennis Lohman, Sandra Peters and Janice Foster.  
 A movie, "Stamp Day for Superman" was shown. This film was provided for our entertainment by Mrs. Robert Magnuson.

**Sponsoring "Essay Contest"**  
 The Latah Women's Conservation Auxiliary and the Latah Soil Conservation District Supervisors are sponsoring a brief completion of wording contest, the wording of which begins as follows: "To me, Soil Conservation means..."

Any pupil in the 5th, 6th, 7th or 8th grades in the school of Latah county may enter, except the children of Soil Conservation personnel and district supervisors.

This contest began March 1, and will close March 12. All entries will be collected on Friday, March 12.

Four prizes will be offered: A first prize of a \$50 Savings Bond for the best entry from the 7th and 8th grade group of the county. And a second prize of a \$25 Savings Bond for the second best entry from the 7th and 8th grade group. The same prizes will be given for the best and second best entries from the 5th and 6th grade group.

This contest takes the place of the "Poster Contest" held other years. All schools in Latah county are co-operating.

Rules for the contest may be obtained from the teachers of the 7th, 8, or 5th and 6th grades.

**Fractures Arm In Fall**  
 Mrs. Annie Murphy suffered a fractured left arm Saturday when she tripped and fell over a projecting piece of linoleum on their kitchen floor. Both bones in her forearm were broken.

Following X-rays, her arm was placed in a cast. Her daughter and her husband, Mr. and Mrs. Archie Clark of Sandpoint, came down Saturday to aid her mother. After a few days Mrs. Murphy will accompany them to Sandpoint to convalesce in their home.

Other callers in the Murphy home Sunday were Mr. and Mrs. Robert Haines of Moscow.
