News is really scarce this week, but everyone is rushing to get in crops — taking advantage of the good weather.

## Area Pioneer Passes Tuesday

John M. Oylear, 91 years old, passed away Tuesday evening, May 11, at about 8:30 o'clock at the home of Mrs. Alma Betts, Southwick, where he had been cared for the past several months. Death was attributed to the infirmities of old age. Previous to moving to the Betts home he had lived with his daughter, Mrs. Fred Schoeffler and family for some six years.

Mr. Oylear came to Little Potlatch Ridge in 1878, later homesteading on Big Potlatch Ridge in 1881. That same year he was married to Sarah Walker, and to this union eight children were born, four of whom survive. They are: Mrs. Lesta Thompson of Lewiston; Mrs. Maud Pabst of Wallace; Ralph Oylear, Lewiston, and Mrs. Ada Schoeffler, Southwick. Fifteen grandchildren, 29 great-grandchildren and 13 great-great-also survive.

Funeral services will be conducted from the Brower-Wann Chapel at Lewiston, Friday afternoon. Interment will be in the Cameron cemetery, by the side of his wife.

## Grangers Visit Teakean

In response to a personal invitation and invitation from the Evergreen Grange at Teakean to visit them, 28 members of the Kendrick Grange drove out Saturday evening for a visitation.

Following the Grange meeting itself there was a varied program which included square dancing, readings, and singing, and of course the evening ended with delicious refreshments served by the host organization.

The Kendrick Grangers report a wonderful time!

## V. F. W. To Meet

The local V. F. W., Baker-Lind Post No. 3913, will meet Thursday evening at 8:00 o'clock in the Fraternal Temple.

Everyone is urged to be present, as business connected with Parade Day, May 22nd, will be transacted.

On Sunday, May 16, District No. 2 V. F. W. will meet at the Warner school in the Lewiston Orchards. There will be dinner at noon, with the meeting to follow at 1:30.

## Honored At Luncheon

Mrs. J. W. Olson of Minneapolis, Minn., who is visiting here in the home of her brother and his wife, Mr. and Mrs. John Johanson, was complimented at a 1:00 o'clock luncheon in the home of Mrs. Estella Leith, Tuesday, with Mrs. Roy Ramey as co-hostess. Other guests were Mrs. John Johanson, Mrs. R. L. Blewett and Mrs. W. L. McCreary.

## Lions Meet

The Kendrick Lions Club met last Wednesday evening at the Fraternal Temple with 32 members present. The small attendance was probably due to the holding of the Spring Music Concert at the High school — but such conflicts are bound to happen this time of the year with so many activities going on.

The main business of the evening was the report of the nominating committee for next year's officers. Balloting will take place at the next regular meeting, May 19th, if this meeting is held, since that is the evening of High School Commencement Exercises.

## LOCAL GIRLS NARROWLY ESCAPE DEATH SUNDAY

Nita Benscoter, daughter of Mr. and Mrs. Walter Benscoter, American ridge, was reported as "improving nicely" at the St. Joseph's hospital Tuesday evening, where she was rushed about 8:30 Sunday evening to receive treatment for injuries sustained in a pickup crash in which two of her teen-age girl friends also received injuries.

Nita Benscoter, 14-years old, and Marjorie Ingle, 14-year-old daughter of Mr. and Mrs. Gerald Ingle of Big Bear ridge, were passengers in a 1953 4-wheel drive pickup truck driven by Wanda Peters, 15, daughter of Mr. and Mrs. Gordon Peters of Leland, the accident occurring about 6:15 Sunday evening.

Peters reported his daughter apparently was blinded by dust from another vehicle and lost control of the truck about a quarter mile from the family home, as she and her two companions were driving to an M. Y. F. meeting at the Kendrick Community church. The pickup left the road, and struck a large pine tree, after going over about a five-foot bank. It remained upright.

Following the accident, which left all the girls injured, Wanda got her two unconscious companions out of the wrecked vehicle, stretched them out on the grass, and then walked back to the family home where she called her father at the home of her grandparents, Mr. and Mrs. A. G. Peters. Help was promptly forthcoming and the girls were rushed to Dr. Christensen's office at Kendrick. Here he administered first aid, and then sent Nita Benscoter directly to the hospital at Lewiston. The other girls were taken home by their parents.

Marjorie Ingle received facial cuts, on the forehead, about her chin, and also on her fingers.

Nita Benscoter received heavy facial bruises, a brain concussion from which she remained unconscious until Monday afternoon, and a very severe hip bruise.

Wanda Peters received a very deep gash on the forehead and another deep cut on one knee, and how she was able to walk the almost quarter of a mile from the accident scene to her home is something that will remain a mystery. It took real courage.

All the girls received in addition to injuries listed above bruises and scratches, as well as heavy shock. The pickup was considered a total loss.

## Has Unique Doll Hobby

Of interest to friends of Mr. and Mrs. John Johanson is the story of the interesting hobby of Mrs. J. W. Olson, his sister, who is visiting here this week.

Making character dolls has become more than a hobby with her. For so real and life-like do they become after hours of painstaking detail that they seem like real companions. She makes each doll, and then dresses it.

All are elaborately costumed and life-like replicas of real people, taken from photographs or paintings, like "Whisper's Mother," "Grandma Moses," "Carmen Miranda," "Lincoln," "Sister Kenny," "Churchill," and many others too numerous to mention.

Since Mrs. Olson started her hobby in 1940, she has made and has over 150 dolls in her collection, no two alike.

Her specialty is grandmother dolls. Her first doll was a copy of her own grandmother, sitting at a spinning wheel, dressed in old fashioned costume of 1882, the year her grandmother came to this country from Sweden.

Mrs. Olson's collection has gained for her a wide range of publicity, she having appeared on television with her dolls, displaying the different characters and telling something of her technique.

## Pinocle Club Party

Members of the Pinocle Club enjoyed their annual "pay off" party Friday evening in the Firemen's Hall, when the lows for the year entertained the highs, with a smorgasboard and an evening of fun and films.

Floyd Millard erected a "ladder of success" which displayed on each rung the members names and their respective score — low at the bottom, reaching to a high at the top.

The evening was spent playing games and square dancing. Nolan Weeks and Mrs. Walter Brocke won at a novel card game.

High score for the year was held by Walter Brocke, and the low by Mrs. Floyd Millard.

Guests included Mr. and Mrs. Bob Magnuson, Mr. and Mrs. Arthur Foster and Mr. and Mrs. Frank Abrams.

## Latah Chambers Of Commerce

The attention of everyone is called to the meeting of the Latah County Chambers of Commerce, which will be held in the Fraternal Temple, Kendrick, tonight (Wednesday, May 12) with the 6:30 dinner to be served by the Grange ladies. You need belong to no organization to attend — but if interested in the welfare of your county, come out.

Dean Theophilus will be the speaker of the evening, replacing Prof. Hoffman, who was unable to be present.

Mr. and Mrs. Art Foster and family of Kendrick; Mr. and Mrs. Archie Garner, Juliaetta, and Mr. and Mrs. Leslie Ball and family of Ahsahka were the others going up.  
 Mr. and Mrs. Ted Grinolds and family were Sunday dinner guests of Mr. and Mrs. Asa Hill in Clarkston.  
 W. E. Simms of Clarkston was a week-end visitor in the Ernest Grim home.

**Church Attendance Large**  
 All the churches in this section of the country report large attendance for Mother's Day services, despite the fact that many drove to other communities to spend the day at the homes of relatives or friends.  
 In the Kendrick Community church five children were baptized: Jon Dee Miller, infant son of Mr. and Mrs. Wallace Dee Miller, Lewiston; Lowell Francis Hoffman, infant son of Mr. and Mrs. Howard Hoffman, Kendrick; David Allen Hutcheson, Sharon Hutcheson and Nancy Hutcheson, children of Mr. and Mrs. Robert Hutcheson of Juliaetta.  
 Adult members baptized were Marianne Soboski, Warney May, Jr., and Elizabeth Ann May.  
 Adults received into membership other than baptism were Mrs. Erwin Swenson, Karen Louden and Mr. and Mrs. John DeHaven.

**Grange Tuesday Evening**  
 Paul Torrell of Moscow, Weed Control supervisor for Latah county, will be present for the regular Kendrick Grange meeting on Tuesday evening, May 18, at 8:00 p. m. Mr. Torrell's talk will be open to the public.  
 Following his speech the regular Grange meeting will be held.

**SCHOOL NOTES**

**Had Fun On "Sneak"**  
 The Senior Class returned Sunday evening from their three-day "sneak" to the Bar-M Dude Ranch, about 30 miles east of Pendleton, Oregon. The 27 members of the class who made the trip, accompanied by Mr. and Mrs. Ben P. Cook and Mr. and Mrs. R. L. Meserve, reported a good time was had horseback riding, swimming, hiking, square dancing and eating.  
**Attend Lions Club Meeting**  
 Mr. Meserve and Nancy Callison were guests of the Moscow Lions Club at a luncheon Tuesday at noon in the Hotel Moscow. Miss Callison was presented with a \$50.00 scholarship to be used at the University of Idaho next fall. Nancy is Salutatorian of this year's graduating seniors.  
**Kendrick Bows To Lapwai**  
 In play on May 10, at Lapwai, the Lapwai Wildcats won the Southern Valley League Baseball title by defeating the Kendrick Tigers 17-1 in the first seven innings of a twin bill. In the five-inning second game the Wildcats came out on top again by a score of 12-3.  
 Lapwai collected 14 hits in the first contest and with the help of eight Tiger errors scored 17 runs. Eddie Madsen was the big gun for the Wildcats, with two triples and a double in four trips to the plate.  
 Kendrick scored its only tally in the fourth inning when Don Ingle walked and Jim Armitage hit a long ground-rule double over the left field fence. Armitage collected two hits in three trips, to lead Tiger batting. Ernie Heimgartner got the other Kendrick base blow.  
 Slickpoo of Lapwai was the winning hurler, giving up two hits, two walks, one run, and struck out six. Roger Christensen was the loser, making his season's record read three wins and two losses.  
 In the second game Lapwai continued to hit the Kendrick pitchers, Jim Armitage and Ernie Heimgartner, and scored 12 runs on 10 hits. Ben Arthur of Lapwai got a triple, a double and a single in three times at bat, to take batting honors for his team.  
 Kendrick scored its tree runs in the third inning, when Walter Wolff walked, stole second, advanced to third on Dick Lohman's infield out, then Leonard Gustafson reached first on a fielder's choice, Heimgartner hit a triple to drive in Wolff and Gustafson. Heimgartner scored on an infield out by Joe Cuddy. Heimgartner got a triple and a single, Joe Cuddy hit a double, and Don Ingle a single to round out Kendrick hitting.  
**Tigers Lose To Lewiston Frosh**  
 The Kendrick Tigers bowed to the Lewiston Frosh on May 6th, but it took an extra inning to decide the winner of this game, played at Harris Field, Lewiston.  
 With the score 8 to 4 in favor of Lewiston at the end of six innings, the Tigers rallied for four big runs in the top of the seventh to tie the score and send the game into an extra inning. The Bengal Frosh won in the bottom of the eighth when Mickey Woodland singled to drive in Larry Clark from third base, to end the game, 9-5, Lewiston.  
 Glen Wegner, Ron Craig, Ernie Heimgartner and Jim Armitage each collected a base hit for the Tigers. Jerry Deltz got two of Lewiston's six hits.  
 Kendrick scored four runs in the 7th frame when Roger Christensen and Ron Craig walked; Heimgartner and Ingle were safe on errors, and Glen Wegner got a long single.  
 Ron Craig, who relieved Christensen in the seventh inning was the losing pitcher, making his season record two wins and one loss. Chas. Frank was the Frosh winning hurler.

### FINANCING PLAN PREPARED BY UTILITIES COMPANIES

The Washington Water Power Co., local electric utility serving the Inland Empire, has joined four other neighboring utilities to finance and develop more hydroelectric power for the Pacific Northwest.

This was recently announced when five of the area's investor-owned utilities incorporated the Pacific Northwest Power Co., with \$50,000,000 of authorized capital stock. Initial plans would call for a \$500,000,000 construction program. The filing was made at Salem, Oregon.

Purpose of the company is to construct and operate large power developments needed to supply future power requirements of the 800,000 customers served by members of the five-company group backing the plan. They are: Washington Water Power, Pacific Power & Light, Mountain States Power, Portland General Electric and Montana Power companies.

Already under investigation by the group are two projects on branches of the Clearwater river in northern Idaho, which would produce 334,000 kilowatts of power. The new generating company will continue engineering investigations now being carried on by the companies on the Crooked Eddy and Penny Cliffs projects on the Clearwater.

Named as president of the Pacific Northwest Power Co. is Kinsey M. Robinson, president of W. W. P. Serving with him as vice presidents and members of the board of directors are J. E. Corette, president of the Montana Power Co., Paul B. McKee, president of Pacific Power & Light Co., T. W. Delzell, board chairman of Portland General Electric Co., and A. W. Trimble, president of the Mountain States Power Co.

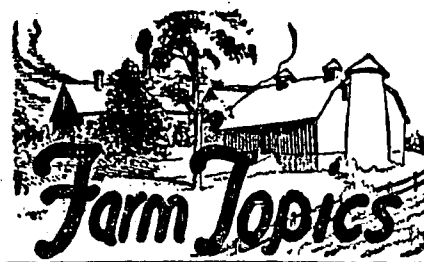

W. W. P.'s president Robinson said in Spokane that the five companies had proposed the program in keeping with the orderly development of the resources of the Northwest.

"This is a regional venture to increase power supply from large projects and will in no way change the independent operations of the participating companies. Sole function of the new enterprise is to develop future power supplies for the individual systems of the cooperating utilities," he said.

The five-company group serves over 800,000 electric customers, representing nearly 50 percent of all power users in Oregon, Washington, northern Idaho and Montana.

The companies together have a present installed generating capacity of 1,400,000 kilowatts and estimate a joint need for between 150,000 and 200,000 kilowatts of new plant capacity annual to meet the area's growth in power demand.

## Aerial Crop-Control Is Booming Industry

### 25,000,000 Acres Were Treated in U.S.

A midwest wheat tract was so overrun with weeds that the farmer was about to plow it under. He decided, however, to try treating it with 2,4-D and hired an aerial crop-control specialist to apply the chemical at a cost of \$2 an acre. The result: at yield of 20 bushels of grain per acre.

Other instances: Aerial spraying of weed-killing chemicals enabled a southern cotton planter to cut hoeing costs from \$14 to \$6.50 an acre while a California citrus grower improved his lemon crop by spraying his orchards from the air.

Agricultural aviation is a booming new industry that is enabling the farmer to substantially increase

The above photograph shows aerial dusting of an orchard. This method of insect control is becoming more popular with farmers throughout the country.

crop acreage. L. J. Beemel, agricultural research director for the Freeport Sulphur Company, reports.

Beemel pointed out that more than 25,000,000 acres of U.S. crop, range and forest land were treated last year with chemicals sprayed or dusted by airplane.

Some 6,000 pilots are engaged in the aerial battle against insect pests, weeds and plant diseases. And they are doing the job faster, more efficiently and in many instances at lower cost than ground distribution of insecticides, fungicides and herbicides.

## Store Unused Tractors Under Shelter in Winter

If you want to ruin your tractor in a hurry, just let it sit outdoors, exposed to the weather, this winter.

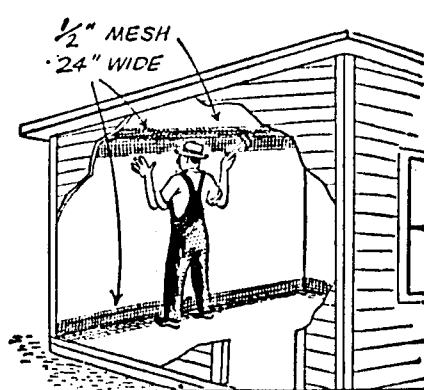

Farm machinery specialists say no amount of tough use will wear out your tractor as fast as leaving it out in the rain and snow.

Tractors are fairly expensive and may be hard to get. So, if you're not going to use your machine this winter, it will pay you well to find storage space for it in some building. Clean the machine thoroughly, especially the motor, and then store it in a dry protected place.

Block up the tractor to take the weight off the tires. Then drain the radiator, block, gas tank, fuel lines and carburetor. Put fresh oil in the crankcase and add a rust inhibitor.

Most important of all, remove the spark plugs and pour one-fourth cut of light oil or kerosene in each cylinder. Then turn the crank a few times to work the oil around the rings and pistons, and replace plugs. Cover the exhaust pipe and crankcase breather pipe with old rags to keep out dirt and moisture.

### Rodent Proof

If wire mesh is applied to joining sections of a poultry house, it will help keep the building free of rodents. The mesh is applied at the floor and ceiling as shown in the above illustration and should be well nailed.

## Farmers Are Advised To Store Fertilizer

Farmers are still being advised to buy and store sufficient chemical fertilizer to meet their needs during the next 12 months. The supply is expected to be somewhat limited. Be sure it is stored in a dry place where there is little temperature variation, don't pile it any higher than five or six bags, and never pile it on the ground or even a concrete floor—the ideal storage place is an elevated wooden platform.

### Can Make Fingers Fly

U. of L. Moscow — A young Korean woman who speaks very little English is one of the most advanced students in a beginning typing class at the University of Idaho.

She is Mrs. Heungwon Lee, a bride of only two months, who has been in the United States only since her wedding date. Joining her husband at the university of Idaho at the beginning of the second semester, Mrs. Lee already types at a rate of 33 gross words per minute with 97 percent accuracy.

Her instructor, Kenneth Puckett, teaching assistant in business education and secretarial studies, reported "her speed and accuracy are very good considering that she has been typing for only eight weeks. Incidentally, she knows the meaning of but few English words, let alone the spelling of them."

"I assumed that Mr. Lee, a graduate student in geological engineering, would come to the first class with his wife and act as an interpreter," said Puckett. But such was not the case.

"We could not communicate verbally," Puckett added, "so from that first day it has been a case of movement of lips, hands and fingers to indicate what is generally meant. The system works because there is yet to be a misunderstanding between us."

A native of Seoul, Mrs. Lee is taking typing and an office machines course which will give her an opportunity for employment in America. Her husband, who has attended college in Seoul and the University of Minnesota, plans to earn his masters degree from the University of Idaho in June, 1955.

Although taking two secretarial courses, Mrs. Lee is actually majoring in Home Economics.

"She is orienting herself very well in our clothing and art structure and design classes," said Prof. Margaret Ritchie, head of Home Economics. "She is learning to make typical coed outfits in our clothing class, and is progressing in her understanding of American home economics art problems."

### New Hunting Seasons Set

The new elk and deer hunting seasons and regulations set last week by the Idaho Fish and Game Commission show a trend toward more uniformity in opening dates. Two extensive areas that were closed to elk hunting last year will be open this year.

The major change in regulation applies to hunting hours. This season it will be unlawful to hunt from one hour after sunset to one hour before sunrise. The previous regulation, based on clock time, was unsatisfactory because of the time zone change which crosses Idaho, and because of the seasonal change in the hours of darkness between the opening and closing days of the longer season.

Of particular interest to local hunters is the following: The Dent-Clarkia road becomes a boundary line between seasons. West of it, Latah county, with bits of adjacent counties, will be open to deer hunting November 1 to December 15. Nez Perce and Lewis counties and a part of Idaho county across the Salmon river will be open November 1 to 15.

### Creek Is Low And Clear

Potlatch river, as it is shown on maps, or Potlatch creek, as it is known locally, is unusually low and clear for this time of the year. Even the hard rains of Sunday night and Monday morning failed to roll it — which indicates that all moisture falling has been sinking right into the ground.

In all the years we have lived here never can we remember a fall, winter and spring season in which the creek has remained so consistently low.

We understand that there is very little snow left to melt and come down the Potlatch drainage. This is in direct contrast to the main Clearwater area drainage, where the snow is said to be deep and hard packed, and really high water expected with the coming of warmer weather.

Shop at Blawett's Grocery Market, Kendrick, for all kinds of fresh and fresh-frozen fruits and vegetables, fish and fowl. Serve yourself and save.

**Report Thorough Cooking Of Pork Cuts Down Disease**

Thorough cooking of fresh pork can help to reduce materially the incidence of trichinosis, an infection from diseased pork, it was shown in a report made public by Dr. Rodney R. Beard of San Francisco.

Dr. Beard credited that as one of the factors in an apparent two-thirds reduction in the incidence of trichinosis in San Francisco since 1936.

Trichinosis is caused by Trichinella spiralis worms which sometimes are found in pork. The worms lay eggs in the human intestinal tract. The embryos work their way into muscles, especially the diaphragm, where they develop. Diarrhea, nausea, colic and fever are the usual early symptoms of the disease, followed later by stiffness, pain, swelling of the muscles, fever, sweating and insomnia. The seriousness of the infection depends upon the degree to which the pork has been infected. Severe infections may cause death.

Dr. Beard cited a 1936 study in San Francisco of a random sampling of 200 human diaphragms taken at autopsy. Trichinosis worms were found in 24 per cent of the organs. A more recent study of 161 diaphragms, also a random sampling, showed only 8 per cent were infected—a decrease of two-thirds.

He first pointed out that federal, state and local regulations now assure adequate processing of pork products intended to be eaten without cooking. In San Francisco, for example, stringently enforced rules by the local Department of Public Health provide for adequate salting and drying of Italian style salami, an uncooked product, or possible prior killing of trichinae by freezing.

Another factor he mentioned was the reduction in the proportion of pork from garbage-fed hogs. War-time scarcity of labor, difficulties of transportation and other factors.

**Statisticians Report Life Safest Ages Nine and Ten**

Life in the United States is safest at ages nine and ten, according to Insurance Company statisticians, and less safe during the first year than at any age to and including 65.

This is based upon an analysis by the statisticians of mortality data for the general population in 1949, as reported by the National Office of Vital Statistics.

An all-time high of 67.6 years in expectation of life at birth registered during the year represents a gain of fully 4 years since 1940, the statisticians note, and a gain of 18½ years since the start of the century.

Our greatest gains in life expectation, it is pointed out, have been at the early ages. At birth the gain in life expectation for males during the decade has been more than three years, whereas at age 40 the increase was less than a year.

"This reflects the strides made in the control of the infections of early life," the statisticians explain, "in contrast to the limited progress which has been made in the control of the chronic diseases of middle and later life. Then, too, with an unchanged life span limit of about 70 years, the closer that limit is reached the smaller is the margin left for gain."

The extent to which women live longer than men is greater than ever before. According to mortality conditions prevailing in 1949, women outlive men by an average of 5.6 years, as compared with 4.5 years at the beginning of the decade.

Even if there should be no further improvement in mortality, most people now living in the United States can expect to live beyond the biblical three score and ten years, according to the statisticians.

**Finding Fingerprints**

Criminal investigators use various methods to make fingerprints visible, depending on the surface where the fingerprint is located, its age, and other factors. When one touches a surface with the fingers, the ridges on the finger tips usually leave an invisible pattern of perspiration. If the print is on light-colored paper, and not more than a few days old, finely powdered lampblack or graphite dusted over it will usually make it visible. On a dark surface a white powder would be required. For older prints, there are various methods using chemicals which react with the minute amount of salts, such as potassium and sodium chloride, left after the perspiration has dried. In one such method, the paper bearing latent prints is dipped in a weak solution of silver nitrate, which converts the chlorides into silver chloride.

**Aid for Key Losers**

Motor-car-key forgetters or losers will be interested to know that Edward J. Tobin of Norfolk has come to the rescue with his invention of a combination lock to take the place of keys for automobiles. With this dial on your instrument panel, you can forget your key, but not your combination. It works like the combination on a safe. National Patent Council suggests that the combination numbers be kept with your driver's license. Tobin's patent is good for 17 years, and by that time he hopes combination locks will be clicking in autos throughout a good part of the motor world.

**W. W. P. CO. SPENDS HUGE SUM FOR IMPROVEMENTS**

Spokane — The Washington Water Power company has spent \$77,000,000 since the end of World War II for the improvement and expansion of service in the Inland Empire, according to the firm's 64th annual report now being issued to nearly 20,000 W. W. P. stockholders.

The annual report, featuring highlights of 1953 — the company's first full year of independent operation since 1928 — disclosed that W. W. P. last year spent \$3,700,000 for new and improved facilities to serve its 126,679 customers in Washington and Idaho. This brought to \$29,000,000 the amount expended for such purposes in the eight years since the end of the War. Added to that figure was the more than \$48,000,000 involved in the building of the firm's 11th and largest hydro electric plant at Cabinet Gorge in northern Idaho. The company's gross plant account came to \$136,378,939 at the end of 1953.

The pioneer electric firm, which celebrated its 65th birthday this past month, reported a net income of \$4,261,269 after tax adjustments for 1953, a 3 per cent increase over the previous year. Total income increased 14 per cent to \$21,392,469.

During the year a total of \$3,811,683 was paid in dividends, the bulk of it to common shareholders. Such wages paid for capital at work in the company amounted to -1.57½ per share for common stock.

President of W. W. P., Kinsey M. Robinson, said the company intends to continue payment of quarterly dividends of 40 cents per share.

The report showed the company's state and local tax payments increased 26 per cent during 1953, to \$2,322,497. Another 643,333 was paid in federal taxes, with \$2,347,941 being deferred for later payment in accordance with a permit allowing the company to accelerate depreciation of the Cabinet Gorge project to the extent of 65 per cent in five years.

The report also pointed to what was termed a "big advantage of being a Water Power customer," with information pointing to average residential cost dropping during the past 10 years from 1.57 cents to 1.28 cents per kilowatt hour, which is half the average cost in the rest of the United States. In the same period, annual usage rose from 2,708 to 6,371 kwh, or nearly three times the national average.

Set off by striking photographs of the company's newly completed 230,000 kilowatt Cabinet Gorge plant in Bonner county, Idaho, the 16-page report presented detailed financial information and highlights of company activities which were said to "have blended together for the continued progress of the Northwest utility."

Language of the W. W. P. annual report pointed to continued expansion and outlined the formation of a five-company private power group to de-

velop new power sites in the area, including the sites of Bruce Eddy and Penny Cliffs on branches of the Clearwater river in Idaho. These projects are estimated at \$305,000,000 with a power potential of 536,000 kilowatts.

President Robinson added that the W. W. P. was continuing exploration of another hydro electric site at Nokon Rapids in Montana, stating that it was possible an additional 350,000 kilowatts of new power could be developed at that point.

He said the company expects to determine the feasibility of the Nokon Rapids site this summer.

Civic Center Group Formed  
Mrs. Raleigh Albright of Juliaetta, former Republican state representative from Nez Perce county, was elected president of the Spalding Civic Center, Inc., at its organizational meeting Monday evening. The 33 members met at the Spalding school house.

Purpose of the organization is to promote social and recreational activities in this area, members said. No building or building site has yet been obtained as a recreational center.

Other officers elected were Blonda Groseclose, vice president; Mrs. Joe Crawford, secretary, and Clifford Powell, treasurer.

Twelve were elected to the board of directors: George Glasby, Henry Wolff, Harry Smith and Powell will serve three-year terms; Mrs. Lou Watson, Earl Sampson, Mrs. Albright and Groseclose, two-year terms; and Joe Evans, Jr., Quincy Adams, Mrs. Ed. Laves and Mrs. Crawford, one-year terms.

Mother (crossly): "Shirley, be still. Why don't you be nice and quiet like Johnny? He isn't making a sound and you're jumping and waving your arms and screaming."

Shirley: "Sure. That's our game. He's daddy coming home late, and I'm you!"

**Who gets the money Standard takes in?**

**Goods and services**—from paper clips to professional services—cost us \$324,743,000. It was spent with thousands of firms, large and small.

**Crude oil** was a big item. To supplement our own production we bought \$135,600,000 worth—an important sum to crude oil producers.

**Wear and tear, depreciation** and upkeep cost \$157,834,000. Part of it will replace worn-out facilities, but millions went to workmen, technicians.

**New construction**, such as refinery facilities, to make more and better products, cost \$145,000,000. This helped meet builders' payrolls.

**Exploration** to replace our customers use is a vital operation. Our stepped-up search for new oil reserves cost \$79,000,000 in 1953.

**Employees' wages** for time worked took \$163,947,000 of our income. Another \$43,000,000 went for employee benefits for Standard Oilers.

**Taxes** paid by Standard to U. S., states, counties and cities amounted to \$106,300,000—enough to buy plenty of fire trucks, schools, bridges.

**112,000 shareholders'** profits came from what was left. They received about 5½¢ on each dollar's worth of stock. Total: \$86,020,000.

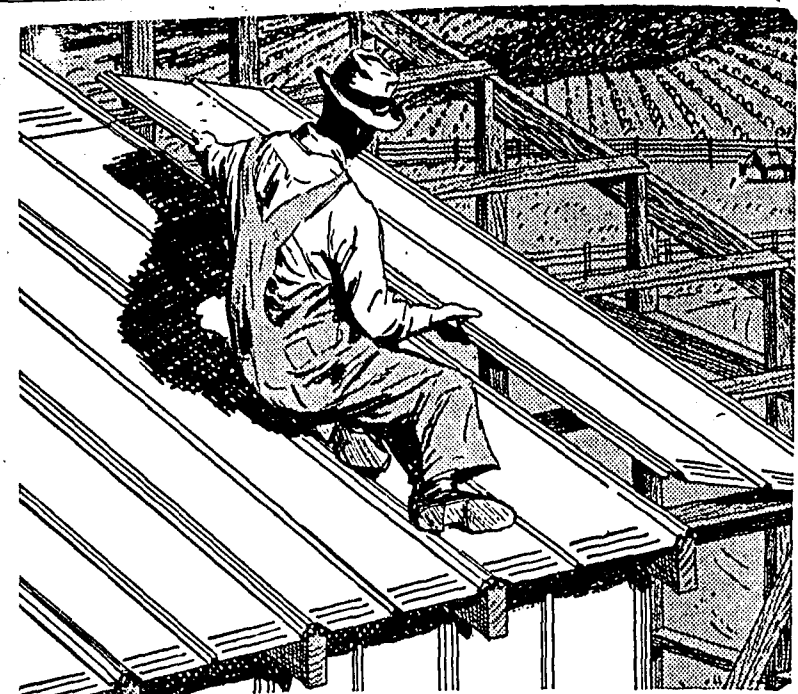

Your picture belongs here, too. Because most of the \$1,156,757,000 Standard Oil Company of California took in last year ended up with you—the public. Whether one of the hundreds of millions of dollars worth of checks Standard wrote last year was sent to you, or spent with you, or helped make possible better gasoline and oil for your car, you and practically everyone else in the West benefited. Thousands of merchants and professional people in hundreds of towns profited from the pay checks Standard Oilers spent. Our tax payments helped finance schools for your children, parks for vacationers, and bridges for motorists. Carpenters, steelmen, lumberjacks benefited from the facilities we built and the maintenance work we did. It all fits together: 1953 was a good year for Standard because so many of you thought our products well made and worth buying. And by making it a good year for us, you made it a good year for many others.

**Reduce farm costs with U S S StormSeal Roofing**

Leaky roofs can mean out-of-pocket expense... extra mess and extra work. And, of course, moisture can ruin stored grain and hay. When you roof with U S S StormSeal, the strong and permanent steel roofing, you seal out moisture, make your building weather tight. The only tools you need are hammer and tin snips. U S S StormSeal laid over slats spaced 12 to 18 inches, makes a stronger roof than other materials laid over solid sheathing. This extra strength also

results when StormSeal is laid over an old roof. Close-fitting, specially formed laps, stay tight and leakproof in the heaviest storms. Be sure of protection. See us today.

**Game Law Enforcement**  
Game law enforcement took to the  
air on a large scale in Idaho during  
April in order to cover more territory  
in less time and for less cost. One  
fish and game department conservation  
officer, riding in a small plane  
patrols selected areas, directing  
officers on the ground by radio. This  
method has been successful generally  
over District Four and in the Owyhee  
and Elmore county areas. It is now  
being extended to other parts of the  
state.

Outfitters and guides who have  
not yet applied to the Idaho Fish  
and Game department headquarters  
in Boise for their 1954 license, should  
do so at once to avoid possible  
disappointment. The license office  
says applicants should apply at least 30  
days before they expect to start  
their season's activities because of  
the time necessary for processing.  
Fees are \$5.00 per license, and  
outfitters are required by law to post  
a \$500.00 bond.

**SEED SLANTS**  
No garden is complete without  
stringless beans. Whether you plant the  
tall pole varieties, or the dark green  
stringless in the bush beans - or the  
golden pod wax beans - we carry the  
leaders in these varieties.  
In pole beans we suggest the  
"Blue Lake," which is a green pod-  
ded stringless bean, very crisp, tasty,  
and a very good freezer. For a long  
podded bean we have that old stand-  
by, "Kentucky Wonder." Another  
good pole bean is the "Oregon Giant."  
Our Number One Variety of bush  
bean is "Top Crop." This is a dark  
green podded bean of the stringless  
type, pods are long and slim, very  
crisp and tender. Developed for the  
freezing trade. It is ideal for Home  
Freezing - also very good for can-  
ning.

The old standby of bush beans is  
"Burpee's Stringless Green Pod." This  
is one of the leading beans of the  
country. Fine for table use, a  
good bean for freezing or canning.  
Heavy producer.  
One of the bush beans that is used  
by many home gardeners is "Tender-  
green." This bean produces a medium  
length pod, crisp, tasty, stringless.  
A good freezer or canner. "Tender-  
green" is always free from fiber. The  
pods are very meaty.  
For wax beans we recommend  
either "Golden Wax" or "Brittle  
Wax." "Golden Wax" grows a 5-  
inch pod, golden yellow in color -  
tasty, ideal for table use. "Brittle  
Wax" grows a 5 to 6-inch pod, yellow  
in color, a good all-purpose wax  
bean. Ideal for freezing or canning.  
For a variety of beans always seed  
a row or two of wax beans.  
All our bean seeds are of the  
very highest quality. "Bettergrow  
Treated."

**Huge Load Of Logs**  
Monday afternoon Kendrick was  
treated to the sight of a big logging  
truck loaded so high with logs that  
it was necessary to travel a zig-zag  
course down Kendrick's Main street  
to miss the electric signs, television  
coaxial cables and telephone wires  
strung across the street. Observers  
estimated the height at from 16 to  
18 feet - and some went so far as  
to say 20 feet - although the latter  
seems a bit far-fetched.  
At Juliaetta we understand the  
same maneuvering was necessary to  
get down their Main street.  
The truck law is very plain: "Eight  
feet in width and not more than 14  
feet in height." We understand very  
well that the Idaho State Police are  
spread far too thin - but neverthe-  
less, this was a wonderful opportunity  
for the state to do a bit of collecting  
to help repair the damage such a  
load would do to a highway!

**New Bridge Soon Be Used**  
The new bridge across Bear Creek  
is complete, but the railroad track  
crossing and the installation of the  
railroad crossing signals have yet to  
be changed to their new location -  
which is expected to be done some  
time before the end of the month.  
In the meantime, the village is  
busy installing a cable support for  
the water main across Bear Creek,  
which was formerly carried by the  
old bridge.  
However, we understand that the  
old, or temporary bridge, is to be  
removed as soon as the new one comes  
into use, so the water main must be  
supported by cable.  
In line with this heavy timbers are  
being set on concrete and concrete  
anchor blocks are being poured to  
form the necessary supports and ties  
for the cable.

**W. S. C. S. Thursday**

Christian Service will meet Thursday

**Another Week "Shy News"**  
 This is another of those weeks when local news of interest seems to be at a real premium. Farmers have been taking fullest advantage of the past week's "good farming weather" for field work, there have been no large scale gatherings, weddings, etc., to furnish news — so local happenings are "just plain scarce."

"If we desire to secure peace, one of the most powerful instruments of our rising prosperity, it must be known that we are at all times prepared for war." — George Washington.

Mrs. Fred Schoeffler and daughter Mrs. Irene Jerry of Clarkston, and granddaughter, Judy Choate, visited her father, John Oylear, Sunday.

Mrs. Roy Martin accompanied Mrs. Lyle Bashaw to Orofino, Monday.

Mr. and Mrs. Ernest Cowger and family spent Monday at the Alma Betts home, while Ernest assisted with some spring work.

Miss Evelyn Kazda, Norville Nantik and his father, Frank Nantik of Lewiston, were Sunday visitors at the Oscar Lawrence home.

Albert Lawrence leaves Orofino on Tuesday (today) for Spokane, to take his pre-induction physical examination.

**Locust Trees Leafing**  
 The big locust trees which abound throughout Kendrick, are now beginning to leaf out, which is a sure sign of spring, as they are generally the latest to acquire their summer coat of green. Maples, sycamores, and other trees are in almost full leaf. Lawns are now a brilliant green, and the clack and clatter of lawn mowers and complaints about how fast the grass grows can be heard from most any home owner — most any evening.

Bill Bamberry, village custodian, says he will be mighty glad when the locust trees are in full bloom, as then, for a short time, they will cease their everlasting shedding of pods, twigs and general litter for which they are famous, and of which he removes many truckloads every year. He says Kendrick may be a small town, but its locust trees are bountiful producers.
