New Low Diving Board
The Area Living War Memorial Swimming Pool has been a very popular place these past hot days. Not only have the kids swarmed over the pool, but many adults have made their appearance to enjoy a cooling dip.
A new aluminum (low) diving board was installed last Wednesday and has received a considerable work-out to date. This piece of equipment replaces the old wooden board that went to pieces last year in the middle of the season — and is indeed necessary in the swimming lesson courses which take place each morning under the direction of George Poulos, life guard.

CHARLES C. KEELER, AREA PIONEER, DIES THURSDAY
Charles C. Keeler, 69, one of this section's best known and best loved pioneers, died at the family home in Lewiston of a heart attack Thursday morning, July 15, at 8:45 o'clock. He had been in rather poor health for some time, but apparently was improving, and his sudden passing came as a shock to the many friends and relatives throughout this area.
Charles C. Keeler was born at Syracuse, New York, December 2, 1884. Later, as a young man he moved west to Nebraska, and then came westward. He was united in marriage to Millie A. Mann, in South Dakota in 1905, and in 1911, he with his family came to the Kendrick area, settling on a farm on the Little Bear Ridge bench. About 1925 the family moved to a ranch at the top of the Cedar Creek grade, and there resided until retirement in 1953, when he and his wife moved to Lewiston to make their home.

Survivors, besides his wife, at the family home, include three daughters, Mrs. Helen Landa of Lewiston; Mrs. Iris Vaughan and Mrs. Olive Hatt, both of Spokane; two sons, John and James Keeler, both living in California; 10 grandchildren and 10 great-grandchildren.
Mr. Keeler was a man who made friends, and kept them. He loved to joke and tease, and always had a smile and friendly word for everyone. Besides his farming he worked for many years for the Vollmer-Clearwater Co., and later for the Lewiston Grain Growers as a warehouseman—and here, too, he was ever popular with the haulers. For years he was the "man who took the sacks" from the table of the tramway at the Vollmer-Clearwater Co., hard work, if ever there was — but he loved it, and loved his contacts with fellow workers. Truly, he will be missed.
Funeral services were held Sunday, July 18, from the Brower-Wann Memorial Chapel, Lewiston, with Bishop David Barker of the L. D. S. church officiating.

Background music was furnished by Pauline Jacobs, organist, who also accompanied Bill Peterson, soloist, who sang "Going Home" and "My Task."
Honorary Pallbearers were Harley Perryman, Stewart Wilson, Wayne Arnett, Gil Erlewine, Lester Weaver and Al Peterson. Active pallbearers were Wade T. Keene, Phil Bahr, Wm. Zimmerman, Roy Morgan, George Smith and Arley Allen — all old-time friends of the deceased.
Burial was on July 19, at 10:00 a. m. in Normal Hill, cemetery, Lewiston.

Final Rites For Mrs. Claud Craig
Funeral services were held for Mrs. Claud Craig, beloved area pioneer, last Thursday afternoon at 2:00 in the Shaffer Funeral Home at Marysville, Wash., with the Rev. J. P. Porter of the Marysville Methodist church officiating.
Beautiful organ music accompanied the soloist, who sang: "Will There Be Any Stars in My Crown" and "Beyond The Sunset."
Interment was in the Cypress Lawn Cemetery at Everett, Wash.
A profusion of friends and flowers filled the funeral home, giving mute testimony to the high regard in which she was held. A beautiful spray, made of flowers from her own garden draped the casket — snap dragons, delphinium and roses were used.

Word From Orville Halseth
Mrs. Virginia Cantrell received word from Orville Halseth in Korea, saying he has been going to school; has now been promoted to the rank of Capt., and will start instructing in dismounted drill, next week. He likes his new work fine, and says it beats being at the front.
For the benefit of friends who may care to write, here's his new address: Cpl. Orville Halseth, U. S. 56122088, 14th Regt., N. C. O. School, A. P. O. 25, c/o P. M., San Francisco, Calif.

Field Day Is Scheduled

On Tuesday, July 27, at 1:30 p. m., at the Henry Wood ranch near Southwick there will be held an Experimental Field Day, at which time the test plots containing four varieties of wheat; six varieties of Oats and six varieties of Barley will be examined and explained to the public. These different plots and different varieties were treated with three different fertilizer rates of ammonium nitrate — and the results are said to be rather startling.
This field day is a joint effort of the Latah County Agent's Office, the University of Idaho Agronomy Dept. and Mr. Wendt.
All interested are welcome — and all farmers in this area are urged to attend.

VOTE "YES" THURSDAY!

The statement: "Why don't they build a whole new plant?" has been heard many times recently.
Here is the reason: The valuation of this school district and the present state laws combine to make it impossible!! The law states that the School District can not bond for more than 10 percent of its assessed valuation, and our valuation at present is \$2,190,000.00 — which would make a maximum limit of \$219,000. It would require between \$350,000.00 and \$400,000 to replace the entire Junior and Senior High school plant. So — it just isn't possible, financially, to replace the entire plant!
Experts were called in and asked: "What should we do?" Their recommendations appear sound and you are being asked to vote the necessary finances to carry this program out.

This proposed Bond Issue is not going to increase taxes as much as some people are claiming. The increase in taxes on an average home in any of our communities will be about \$2.50 to \$3.50. Remember, in computing your tax to check your tax notice for the assessed valuation — it is considerably lower than sale value. On our farm land the tax increase should run about 14c per acre on land assessed at \$25.00 an acre.
Remember, too, all real estate taxes are deductible from your federal income tax.

You must come out and vote if your children are to have the educational opportunities they deserve.
—Robert L. Meserve, Supt. of Schools, Joint District No. 283.

Swim Meet And Band Planned

Tentative plans are being laid for a combination swimming meet, aquatic show and band program for one day the first week in August, with the date to be set later.
Tentative plans call for the swimming meet at 2:30 in the afternoon, the band concert at 7:15 in the evening, and the aquatic show at 8:00 o'clock.

Water events will be as follows:

The above event will be duplicated for girls.
For High School boys and girls — 50-yard Free Style; 50-yard Back Stroke; 50-yard Breast Stroke; 50-yard Side Stroke; 200-yard Medley Relay (again 4-member teams and again an event for boys, another for girls).
Open Race — Any age — 200-yard Free Style for Boys; 200-yard Free Style for Girls.
No one person may enter more than three events, which does not include the Medley Relay or the Open races.

Diving — Classifications to be worked out. However, one required dive shall be the "jackknife," the other of contestants choice (low board).
High Board — Open to all ages. Required dive again "jackknife."
Two Wins For Junior Leaguers
Kendrick's two Junior League Baseball teams won both games at Moscow, Sunday.
The 12-and-under group took their game by a 15 to 3 score. Batteries for Kendrick were Jerry Armitage and Gordon Garner. Richard Nelson was the leading hitter, with two for two.
The 12-and-under group took their a little harder, coming from behind with 9 runs in the last inning for a 15-13 win. Bob Dunham and Raymond Lockett hit homers, the latter coming with the bases loaded and the score tied in the last inning. Pitchers for Kendrick were Bob Dunham and Gene Foster — Foster being the winner.
These same teams meet this Saturday afternoon (July 24) at 1:00 p. m., at Armitage field.

Answer Two Fire Calls
The local State Foresters office has answered two "reportable" fires within the past few days.

First of these occurred Friday afternoon when the waste pile at the Lewis Sawmill, Kendrick, caught fire, evidently from a wind-carried spark from the burner. Jud Lee answered with a pumper outfit, and "cooled" down the blaze, which was later extinguished by bulldozing the waste to one side of the huge pile.

On Monday afternoon the pumper truck answered their first radio dispatched call of the season, and extinguished a blaze on the railroad tracks in front of the Irvin Swenson home in the east part of town — evidently set by a passing train.

The new two-way radio system is now in operation at the local Forestry office, although sets have not yet been installed in all the trucks — and the railroad fire proved its value on first use.

Two More Local Candidates
In apparent "last minute filings" two more local candidates have entered the political scene, both on the Democratic ticket.

George F. Brocke, Sr.'s name appears as a candidate for State Senator from Latah County; and John (Jack) G. Travis, as Justice of the Peace for the Kendrick precinct.

Neither one of these men need any introduction, both being very well known, and both having filled the offices for which they are now candidates, in a highly satisfactory manner.

Herb Millard Playing Baseball
Kansas City, Mo. (Official) — Pvt. John H. Millard of Bakersfield, Calif., a member of Company C in the 5th infantry divisions 11th regiment, is playing on his unit's baseball team in Germany.

Millard, whose wife, Nellie, lives at 2625 Fifth St., entered the army during October of 1952, and arrived overseas the following April. His parents, Mr. and Mrs. Floyd Millard, live in Kendrick, Idaho.

Baby Showing Improvement
Latest reports from the bedside of little Lowell Hoffman, 14-month-old son of Mr. and Mrs. Howard Hoffman, are encouraging.

He is still in the hospital but showing improvement and should be able to come home soon. Lowell was taken to St. Joseph's hospital 10 days ago, gravely ill with lobar pneumonia.

Democrats To Picnic Thursday

Harold Blood and Paul A. Eke, candidates for state representative on the Democratic ticket, will be among the speakers at the picnic and rally to be held by the Latah Democratic central committee at the City park, Moscow, Thursday, July 22. The picnic will be at 6:00 p. m. and the talks and program at 7:30.

Blood, a farmer in the Potlatch area, was born in Latah county, and received his education within the county. His background, too, is finance and agriculture.

"See what a new electric HOME FREEZER will do for your family,"

say Home Economists Jean Ensor and Dorothy Smith

"Just like you, we've heard a lot of claims about the value of an Electric Home Freezer: Can you save 30% to 50% on food costs? Does your family eat better with a freezer? Does it bring better living to your family?"

"The truth of the matter is: You can save time and food costs with an electric freezer, you can eat better and live better.

"But the most important fact about a freezer is: You get more out than you put in.

"First of all, you save money by buying foods in quantity when they're at their seasonal lows. By keeping alert for bargains, you can expect to save \$120 a year or more!

"You save time and effort by freezing pastries, lunches and whole dinners in advance, ready to be used when you want them. And you cut your trips to the store.

"And, perhaps best of all, you practically have a supermarket full of the most delicious, most nutritious fresh-frozen foods right at your fingertips—wonderful when unexpected guests drop in."

Freez 'n Save on Food Bills! There are many ways, including buying meats, vegetables and fruits in quantity when they're at seasonal lows.

Freez 'n Save Time! Shop when you want to—and less often. Make lunches and bake in wholesale lots. Cut your canning.

A supermarket in your home! Meal planning's a cinch... and you're always prepared for unexpected guests.

Low Cost Essential for Farm Building

Concrete Blocks Filling Farm Construction Needs

Concrete blocks are being used more and more in the construction of farm buildings, according to American Builder magazine.

They have been found very serviceable for dairy barn construction, low in first cost and in upkeep.

Attributes that contribute to concrete's value as a building material on the farm are its durability, cleanliness, and weather and insect

Dairy barn of concrete blocks and with a roof of fire-resistant asphalt shingles provides an efficient structure low in cost and in upkeep.

resistant qualities. Concrete foundations, masonry unit walls, concrete floors, and precast floor joists can be utilized to construct enduring farm structures and to repair old ones.

If a dairy barn is well-constructed and insulated, body heat of the cows would keep interior temperatures at 45 to 50 degrees in almost any kind of weather.

Lightweight aggregates in monolithic concrete or in masonry units, vermiculite floors and underlayers, hollow core walls, and masonry units with granular loose-filled cores all have qualities that can contribute to the efficiency of rural buildings.

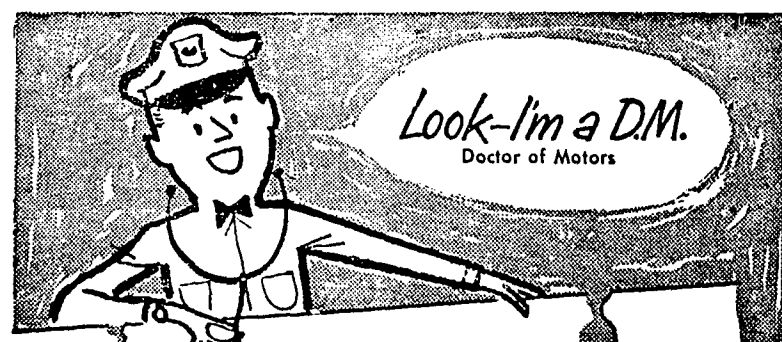

Less Than Half of U.S. Farm Homes Have Baths

Less than one-half of the nation's more than 4,000,000 farm homes have baths and only half of the rooms are heated, a study of rural housing accommodations revealed.

Excessive standardization to relieve early postwar housing shortages resulted in the building of mediocre farm homes of rectangular, box-like design with too small rooms, too little privacy and absence of adequate plumbing and heating facilities.

However, under impetus of a U.S. department of agriculture program, farm house plans have recently been developed that are expected to fulfill the fundamental requirements. The new plans call for space, equipment and storage facilities in proportion to the number of persons in the family.

Coupled with the benefits of a 10-year electrification program that has brought electricity to 75 per cent of the farm homes, this new home designing will open an untapped market for manufacturers of automatic equipment and home appliances.

Pull Out the Car

Although most farmers these days live on a hard surfaced road, there may be an occasion when it would be necessary to pull a car or tractor out of a ditch. The above illustration shows how to get out of that ditch with the least amount of effort. A tow rope hitched to the front end of the car and tied to a stake or tree at right angle at the side of the road, will give you the leverage to get out of almost any place without help.

Crested-Wheatgrass Seed Production Reported Up

The 1950 production of crested-wheatgrass seed is estimated at 5,330,000 pounds of clean seed. This is 5 per cent larger than the 1949 production of 5,000,000 pounds. Larger crops than last year reported for North Dakota, South Dakota, and Montana, more than offset the smaller crops indicated for Nebraska, Colorado and Washington. The Colorado crop was near failure in 1950.

Ask for More Trained Men For Animal Disease Study

Solution to some of the nation's most costly animal disease is being slowed by lack of highly trained research men.

There is urgent need for giving promising young scientists an opportunity to learn the techniques of animal disease investigation.

The only way this can be done is by a long range fellowship program.

Such a program has been sponsored by the AVMA for the past six years. Under this program, which will be expanded as funds permit, research-minded graduates of colleges of veterinary medicine get financial aid to engage in animal disease studies at leading scientific institutions. This gives them background, and experience needed for unraveling highly complex diseases.

Many livestock and pet owners who ask for "more research to solve disease problems" have given too little thought to how the job might be done.

Finding out what causes a perplexing animal disease isn't much different from tracking down a dangerous criminal, and neither is a job for anyone but a well-trained person.

The Federal Bureau of Investigation would not put a man on any of its cases without first training him in FBI methods. The same advantage should be given to people interested in disease investigation.

Funds for expanding the fellowship project should come from private sources rather than the federal government "because the nation already has gone too far toward dependence on federal hand-outs."

New Refining Plant Scheduled

Plans for the immediate construction of a second catalytic cracking unit at Salt Lake City, to increase the output of high octane gasoline was announced last week by T. S. Peterson, president of the Standard Oil Company of California.

The new plant, designed for a capacity of 8,000 barrels daily, will be an addition to facilities of the Salt Lake Refining Co., a subsidiary. It will convert residual fuels to high grade gasoline, for which demand has

been increasing in the inter-mountain region.

Contracts for construction of the new "cat" cracker, to be built at a cost of approximately \$2,500,000, is expected to be awarded in the near future. It is estimated that actual construction will begin early in July, with completion scheduled for early April of 1955.

There are more than 80 separate steps in making a gold pen point.

Mastitis Germs Live 5 Days on Broomstick

Harmless though it may look, that broom in the corner of the barn might be the means of starting a new case of bovine mastitis.

The germ responsible for most cases of bovine mastitis can stay alive for as long as 20 days on objects around the barn, and for as long as 20 days anywhere on a cow's skin. From these jumping-off places, the germ can eventually get into a cow's udder, where it starts the disease known as mastitis.

Survival time of the germ was observed after mastitis-infected milk was poured on manure, hair, wood, bricks, udder cloths, and other materials commonly found or used around dairy barns.

The germ stayed alive for 4 days on rubber boots, 5 days on a broom handle, 7 days on an udder-washing cloth, 8 days on a bucket, 13 days on hair, and 20 days on hay. However, when some of these objects were treated with a disinfectant before being smeared with infected milk, the germ didn't do so well. Enough of the disinfectant lingered to cut down the survival time to a day or less.

This research emphasizes the need for clean barns, clean cows, clean attendants, and prompt disinfection of any object that gets splattered with milk.

Use of Columbium

John Winthrop, Jr., who supervised the construction of America's first successful blast furnace at Saugus, Massachusetts, in 1643, found an unidentified rock fragment near his home. About 150 years later, an English chemist, Charles Hackett, saw this fragment in the British museum, analyzed it, and thus discovered the element columbium. Today, this element is playing an increasingly important part in the manufacture of stainless and heat resistant steels for such uses as jet aircraft engines.

Columbium is one of the most recent elements to find use in the steel industry. It was used commercially as an alloy in the 1930's, although experimental work had been done with it as early as 1920. Last year 632,000 pounds of columbium metal was consumed in the manufacture of steel.

Origin of Camouflage

The origin of the word camouflage has, it seems, been lost in the shuffle. One of the stories told in connection with it is that, during the Indian troubles in the Southwest, one Jacques Camou built a circular mud fort. This fort had large square openings at regular intervals around the walls. Through these, the garrison of the fort would fire. As the Indians' shots also found their mark through these openings, Camou painted the entire fort like a checkerboard — with large black squares on a white field. This confused the Indians so they were unable to determine at which dark squares to aim.

Thermal Snow Removal

Thermal snow removal from sidewalks and driveways by means of embedded piping is a new and interesting development in the heating industry. The snow is removed automatically and without effort by the heat from pipe coils installed under the surface of the pavement. Hot water, circulated through the coils, transfers its heat to the pavement, thus melting the snow and keeping the surface dry. Automatic snow removal is economical. There is no necessity for using snow shovels or chemicals. All the owner does is to turn the switch to start the system in operation when the snow begins to fall.

We "dug in" to help supply more oil to the Pacific Northwest

Standard's \$25,000,000 products pipe line* from Salt Lake City to Spokane was completed last year at the same time that new farms, factories and businesses were opening up in the Pacific Northwest. This wasn't just a coincidence. Standard long ago planned this project to meet the region's expansion. Take-off points along the 710-mile pipe line feed important areas of Idaho, eastern Oregon and Washington. This increases Standard's capacity to serve you, your industry and commerce better.

...and Standard has been first in service since cars came on the scene. Since 1907, when we built the world's first gas station at Seattle, we've worked to improve your motoring. Newest development is "Detergent-Action" gasoline. It stops carburetor deposits (major cause of engine troubles); ends rough idling, stalling; saves gas. It's yours at Standard Stations and independent Chevron Stations.

Helium Effect on Living Organism Reported at U.C.

Helium, argon and possibly other, inert gases—gases which do not combine chemically with other elements—are far from inert in their effect on living organisms.

This is reported by Dr. S. F. Cook, professor of physiology in the University of California school for medicine.

Dr. Cook has completed experiments in which he studied the reactions of small animals living in an artificial atmosphere consisting of oxygen and helium or of oxygen and argon.

The artificial atmosphere contained the same amount of oxygen found in the normal earth's atmosphere—about 20 per cent. But nitrogen, which forms nearly all of the remaining 80 per cent of the earth's atmosphere, was removed and the inert gas substituted in this same proportion. The ordinary atmospheric pressure of sea level was maintained.

When helium was used in such an atmosphere, the physiological processes of mealworms, lizards and mice were markedly changed. Similar, but less marked, changes were observed when argon was used.

The principle effects of the two gases were retardation of growth in the animals and an increase in the metabolic rate—a stepping up of the pace of work done by the body in the living process.

The research indicates that it may be useful to substitute helium for nitrogen in air used by men working in some tunnels, underwater construction projects, and some other conditions of high pressure.

Hard Pad Canine Disease Gives Dog Owners Scare

A serious distemper-like infection that leads to hardening of the foot pads and nose is being seen in American dogs, but there is no evidence that it is a new disease or that it is becoming more prevalent.

Alarming reports from England, where the so-called hard pad condition is reported to be widespread, have made many United States dog lovers overly fearful of the disease.

Thickening, hardening, and peeling of the foot pads and nose sometimes occur in advanced stages of distemper or distemper-like illness, but this condition always is seen in company with other symptoms—never alone.

Among theories as to the cause are:

(1) The canine distemper virus may undergo a change, under certain conditions, that causes it to produce symptoms that differ from those seen in typical distemper cases. "Hard pad" may be one of the symptoms so produced.

(2) In some cases, the pure distemper virus—which causes fever, respiratory distress, and diarrhea—may be accompanied by a second virus that brings on the changes in foot pads and nose.

(3) The severe illness caused by distemper or complicated distemper can lead to a temporary nutritional deficiency and loss of body fluids that may account for the thickening and hardening.

Immunization with biological products is the best means of preventing distemper and the hard pad condition.

New Course in Science

A revolutionary approach to the teaching of science which combines all the sciences in a single course emphasizing their relationship to man was described to the 118th national meeting of the American chemical society held in Chicago, by Dr. John Xan, head of the department of chemistry of Howard college, in Birmingham, Ala. Taught without a text, the course is designed to give students a broad acquaintance with the modern scientific world and an effort is made to stimulate their interest in scientific discoveries and periodicals by basing examinations mainly on knowledge acquired outside the classroom.

Dr. Xan reported. Ninety to 95 per cent of students finishing the combined general science course have voted for it in preference to the conventional type of science course.

"Candling" Eggs

Candling is used on practically all eggs before they reach the stores. An electric light is placed inside a box with a hole about the size of an egg, in which the egg is placed. In a darkened room, with some practice, it is possible to detect cracks, blood spots, developing germ and the size of the air cell. The latter is the most important criterion of freshness because it gets larger as moisture escapes and is replaced by air. By comparing a few eggs known to be fresh with others that are older, one may learn how to judge the size of the air cell and the age.

Changing "Hand-Me-Downs"

Giving "hand-me-downs" a new and different color via the dye-bath is one sure way of getting little sister or brother to wear them without resentment. Adding a hem, collar or belt will still further accentuate the "new look." Wash and thoroughly rinse all articles before dyeing, and also remove buttons, buckles and trimmings. Use color remover first, the bureau counsels, when the article is unevenly faded or spotted and when changing to a different color.

HOSPITAL BOARD AND ROOM

IMPORTANT NOTICE

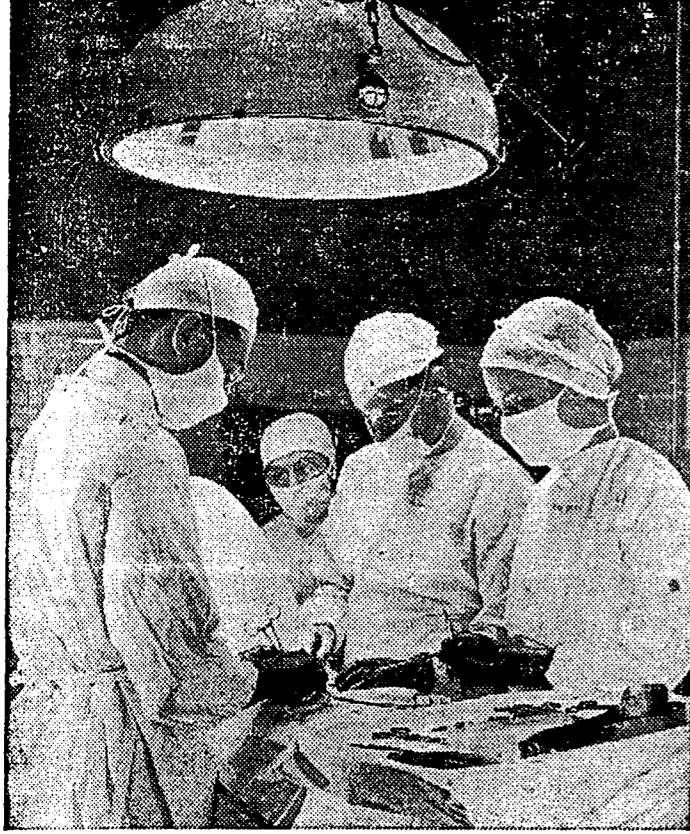

Interviews Will Be Conducted Here

For The

National Benefit Plans of Protection

Hospital Surgical Medical Nursing

All residents of Kendrick and Latah county who qualify will have the opportunity to have the National Benefit Plans of Protection. These famous Plans now protect many thousands of individuals and families against expensive hospital, surgical, nursing and doctor bills for either sickness or accident. The program to explain this protection to all residents of the county is now beginning and it will continue until all residents of the county have been contacted and the National Benefit Plans of Protection explained to them.

SURGERY

CHILDBIRTH

Two Great National Benefit Plans

PLAN "A" This is the tremendously popular Hospital, Surgical and Nursing Plan. It now protects thousands and thousands of individuals and families. If you and your family are not protected under this Plan you may now learn how it may be available to you if you qualify.

PLAN "B" This is the Plan that pays towards Doctor Bills in the home, at the doctor's office, in a clinic, in a hospital — in fact anywhere. It covers sickness, accident and delivery charge for childbirth. The benefits for doctor bills, operations and nursing will give added protection to the National Benefit Hospital, Surgical and Nursing Plan or to any other plan of protection.

County-Wide Program

We Are Pledged to Interview All County Residents. The National Benefit Plans of Protection Will be Explained to Individuals and Families . . .

During the time necessary to contact all county residents, representatives will be interviewing individuals and families. The National Benefit Plans of Protection will be explained by fully qualified, specially trained representatives. They are pledged to contact all residents and to make the plans available to all who qualify.

A FEW MINUTES TIME IS ALL THAT IS NEEDED

Just a few minutes of your time is need for you to receive a full explanation of the Plans. The representative who calls on you will arrange a time that is convenient for you to receive full information.

INCOME PROTECTION: Ask the representative who calls on you about the National Benefit Income Protector Plans that give you a monthly pay check when you are sick or injured.

WATCH FOR THE MAN WITH THIS CARD

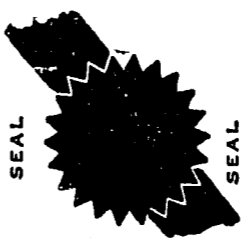

He alone is qualified to explain the plans, and carries a License Card issued by the Insurance Department of the State of Idaho.

These Famous Plans of Protection Provide In Specific Amounts For

PLAN "A"

HOSPITAL ROOM AND BOARD

In the hospital of your choice for either sickness or accident

HOSPITAL EXTRA EXPENSE

X-Ray, operating room, anesthetic, ambulance, medicine, iron lung, etc.

SURGEONS' BILLS

For operations performed either in the hospital or in the doctor's office.

CHILDBIRTH

Double benefits for twin births. Triple benefits for Caesarian birth.

HOME NURSING

For either sickness or accident

PLAN "B"

DOCTOR'S BILLS

For doctor's calls to your home. For treatment at the doctor's office or clinic. For visits in the hospital.

DOCTOR'S BILLS

HERE ARE A FEW REASONS WHY IT IS IMPORTANT FOR YOU TO HEAR A FULL EXPLANATION OF THE NATIONAL BENEFIT PLANS:

- * They Are a Safeguard Against Government Control of Hospitals and Doctors: Socialized medicine is unnecessary for you when you and your family are protected under National Benefit Plans.
- * Hospital and Medical Care Has Become Tremendously Expensive: If you or a member of your family has been recently hospitalized and has had expensive medical or surgical care you know the importance of a National Benefit Plan to prepay the cost of this necessary but expensive care.
- * One Person Out of Every Two Families Will Be a Hospital Patient This Year: The advanced medical techniques and the ultra modern Hospital facilities are being used now more than ever to safeguard health and prolong life. If you or a member of your family takes sick or meets with an accident you, too, may become a hospital patient. And 6 of every 10 hospital patients require expensive surgical operations
- * You May Prepay Expensive Hospital, Surgical, Medical and Nursing Care at Low Cost: National Benefit Plans of Protection are low in cost. You will be surprised at the small monthly deposits to keep them in force to protect you and your family.

IF YOU ALREADY HAVE A PLAN, HAVE YOU ENOUGH PROTECTION?

You possibly now have a National Benefit Hospital and Surgical Plan, or you may have some other Plan, or be protected through your employment in a Group Plan of some kind. GET A MEDICAL PLAN, TOO!

REMEMBER: National Benefit pays benefits direct to you, or to the hospital or doctor as you direct. Benefits are NEVER prorated or reduced on account of any other protection you may have or any payments you receive from any other source. A low cost National Benefit Plan will give you the protection you need.

LINDEN ITEMS

Mrs. Al Pederson accompanied Mr.
and Mrs. Verlin Benjamin to Lewis-
ton, Friday.

On Wednesday, Mrs. Benjamin and
daughter, together with her mother,
Mrs. Al Pederson, Douglas and Je-
rome Pederson made an afternoon
call on Mr. and Mrs. Gil Erlewine.
Jermone went home with his sister
that evening to assist with gardening.

Visitors last week in the Forrest
Grayson home were his daughter,
Mrs. Wileta Haugen and family from
Soap Lake. Mr. and Mrs. Reinhardt
Wahliders of Pomeroy came on Friday.
Mrs. Clarence Alexander and son
spent Tuesday with her grandmother,
Mrs. Arlie Allen.

Mr. and Mrs. Arlie Allen were Sun-
day visitors and dinner guests of Mr.
and Mrs. Harry Langdon in Lewiston
Orchards.

Saturday over-night and Sunday
guests in the Al Pederson home were
their son Edward and his fiancée,
Ethel Murphy, Lewis Ensey and Pat-
sy Heron, all of Spokane.

Mr. and Mrs. Lester Weaver and
daughter were Sunday evening callers
in the Al Pederson home.

Mr. and Mrs. Felix Holt and daugh-
ters Shirley and Nancy were visitors
on the ridge Sunday, calling at the
homes of the James Holt and Gil Erle-
wine families. Felix and Shirley fish-
ed in Cedar creek in the evening.

The Sam Weaver family were huck-
leberrying Sunday and reported very
good luck. The berries are quite
plentiful and large.

George Smith of Lewiston helped
Arlie Allen with his haying, Monday.
(I think that most of us are agreed
that haying up here is decidedly more
pleasurable than spending a day in
Lewiston, now).

Many Cedar Ridge families and
neighbors of the Keeler family attend-
ed the last rites for Charley at the
Brower-Wann Funeral Home last
Sunday in Lewiston.

Mrs. Ernest Grim called on Mrs.
Bob Chilberg Monday afternoon.

The Ray Cuddy, Bill Cuddy and
James Holt families enjoyed a woods
picnic together, Sunday.

Several from here attended the
4H Club picnic in the Kendrick park,
Sunday.

David and Douglas Armitage spent
last week with their grandparents,
Mr. and Mrs. Ray Cuddy.

Several from here expect to go on
the Forestry Tour scheduled for all
day Friday, and in charge of Lon-
nie Williams. They will be accom-
panied also by the assistant county
agent. A visitation to a sawmill and
a lookout are on the agenda, and
there will also be a stop en-tour to
classify trees and shrubs.

Wheat Referendum Polls Set
On Friday, July 23, at eight dif-
ferent polling places, wheat growers of
Latah county will vote for or
against marketing quotas for the
1955 crop.

The referendum, according to Roy
Emerson of the Latah county Agri-
cultural Stabilization and Conserva-
tion committee, will determine wheth-
er or not the quota program now in
effect will continue for next year's
crop.

Two-thirds of those who vote must
approve quotas before they can be
put into operation. The current pro-
gram, which was voted on a year
ago, was approved by 87 percent of
the voters — 390,221 to 57,536.

Mr. Emerson urges every eligible
wheat grower in Latah county to vote.
A producer is eligible to vote if he
will have more than 15 acres of wheat
on his farm for harvest in 1955. In
other words, he can vote if he would
be affected directly by quotas, which
apply only to farms with more than
15 acres of wheat.

If quotas are approved, there will
be marketing penalties on any "excess"
wheat — produced outside the acre-
age allotment — and the full level
of price support authorized for 1955
will be available for those who com-
ply with their allotments. If quotas
are not approved, there will be no
quotas or marketing penalties, and
the price for those who stay within
their allotments will be 50 percent
of parity.

The following voting places in the
area adjacent will be open from 9:00
a. m. to 7:00 p. m., Friday, July 23:
Deary — Grange Hall, Thomas
Whybark in charge.

Troy — Grange Hall, George Smith
in charge.
Genesee — Legion Hall, Leon Dan-
ielson in charge.

Kendrick — City hall, E. H. Jones
in charge.

Emmett Bigham Killed

Bovill—Emmett Bigham, 37-year-
old bulldozer operator and chief of
the Bovill volunteer fire department,
was killed instantly at 8:30 a. m.
Monday when he was struck on the
forehead by a snag that fell 40 feet
from a tree while he was working on
a new road between Bovill and Elk
River. The accident occurred five
miles north of Cameron Spur.

Mr. Bigham was born in December,
1916, at Kendrick. He attended the
University of Idaho one year and later
married Margaret Zagelow at St.
Maries. He was a member of Elks
Lodge 249 at Moscow and of the
Presbyterian church.

Survivors include his wife and son
Stephen, 2, at the home; his mother,
Mrs. Henry Wandke, Bovill; his father,
Robert Bigham, Lewiston, and two
brothers, Oren Bigham, Richmond,
Calif., and Kenneth Bigham, with the
armed forces in Germany.

Published Weekly by the Union Oil Service at Kendrick
W. L. "Bill" Rogers, Editor

HELLO, FOLKS:

Are you so busy getting ready for harvest that you haven't time to take proper care of your car, pickup or truck? — If so, don't worry about it. Bring it in to us for that lubrication, wash job, tire change and all-around service that everyone knows is necessary. We are completely equipped to care for your equipment efficiently and to your satisfaction.

Papa Robin: "How did that speckled egg get in our nest?"
Mama Robin: "I did it for a lark."

Don't go into harvest with worn, thin, "banana peel" tires. Come in and let us show you the big husky U. S. Royals — for everything that rolls on rubber. Especially do we urge you to inspect the new

"Royal 8."

Sign in a window display of women's bathing suits: "The very latest in seat covers."

Let us figure with you on your harvest fuel and lubrication needs. We handle diesel fuel, stove oil, Union 7600 and 76 Gasolines — and a lubricant for every piece of your farm machinery, from the motor to the track rollers. And of course — we deliver.

Her: "Why do baby ducks walk softly?"
Farmer: "Because they can't walk hardly."

Money may not bring happiness, but if you have plenty of it you sure can make your own choice of a wide variety of unhappiness!
