

KENDRICK GAZETTE

VOLUME 64

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, SEPTEMBER 16, 1954

NO. 37

INTERESTING NEWS NOTES FROM THE SOUTHWICK AREA

Mr. and Mrs. Horace Rodehaver of Plainwell, Michigan, and Mr. and Mrs. Richard Starling of Great Falls, Mont., were guests in the home of Mr. and Mrs. Russell Perkins and Mr. and Mrs. Leland Marvin, several days this past week.

On Sunday Mr. and Mrs. Russell Perkins entertained at dinner in their home for Mr. and Mrs. Lloyd Randall, Jr., and son Russell of Clarkston; Mr. and Mrs. Richard Starling of Great Falls, Mont.; Mr. and Mrs. Horace Rodehaver of Plainwell, Mich., and Mr. and Mrs. Leland Marvin and children, Darryl and Lesley.

Sunday evening Mr. and Mrs. Leland Marvin were guests in the Andrew Marvin home at Teakcan.

Last Wednesday Mrs. Leland Marvin and children spent the day at the home of Mrs. D. V. Kuykendall. That same day Mrs. Russell Perkins was a guest in the home of Mrs. Roy Martin.

The Syringa 4-H Club will meet Friday evening at the Rollin Armitage home to make final preparations for their booth at the Nez Perce County Fair at Lewiston. The girls are sending cooked foods, clothing, and records of their freezing projects. The Joint District No. 283 P-T. A. will meet at 8:00 o'clock at the Southwick Aid Hall here, Monday, Sept. 20. This will be a special meeting to introduce the teachers — and everyone who can possibly attend is asked to be present.

Mrs. Rollin Armitage visited on Monday in the home of her parents at Gold Hill.

Honoring the birthday anniversaries of Mrs. Alice Fry and Mrs. Eleanor Benjamin, Mr. and Mrs. Milton Benjamin entertained at dinner Sunday for Mr. and Mrs. Jim Townsend and daughters Jane and Lila of Clarkston; Mr. and Mrs. Bert Jeffries of Clarkston; Mrs. Ronald Benjamin and baby son, Mr. and Mrs. Verlin Benjamin and little daughter, and Mr. and Mrs. Ervin Fry and sons. Evening callers were Mrs. Lloyd Thornton and son Larry and Mr. and Mrs. Elton McCoy.

The Southwick Church Missionary Society will meet Thursday at the home of Mrs. C. A. Cuddy for an all-day session.

Miss Joyce Armitage of Kendrick spent a few days last week at the home of her grandparents, Mr. and Mrs. T. J. Armitage, helping her grandmother, who is recuperating from a recent illness.

Callers at the T. J. Armitage home Sunday evening were Mr. and Mrs. Harve Triplett.

Mr. and Mrs. C. A. Cuddy are enjoying a visit from their grandson — a son of Mr. and Mrs. Dave Cuddy of Clarkston.

Mrs. Martha Rodgers has returned to her home in Moscow, after visiting for several days with Mrs. Millie Harris.

Guests at the home of Mr. and Mrs. Jack Mustoe Saturday evening for dinner were Mr. and Mrs. Otto Schoeffler of Kellogg; Mr. and Mrs. Harry Johnson and sons of Lewiston; Mr. and Mrs. George Brocke, Jr., and son Dean of Kendrick, and Mr. and Mrs. Given Mustoe. The occasion observed the birthday anniversary of Mrs. Schoeffler and of Dale Johnson.

Mr. and Mrs. Given Mustoe entertained at dinner Sunday for Mr. and Mrs. Otto Schoeffler of Kellogg; Mr. and Mrs. George Brocke, Jr., and son Dean of Kendrick, and Mr. and Mrs. Jack Mustoe.

Mr. and Mrs. Tom King and family were dinner guests of Mr. and Mrs. James Reece, Sunday. All attended the ball game at Lewiston that evening.

Mr. and Mrs. I. J. Longteig of Lewiston visited Sunday at the home of Annie and Johnny Longteig. Stanley and Joan Davis and Elvora Swinney left last week for El Monte, Calif. where they will be students at the Pilgrim Holiness Bible College for the coming year.

Mrs. Ronald Benjamin and son left Lewiston by plane Tuesday morning to join Mr. Benjamin, who is attending Bible College in California.

Those attending the rodeo from Southwick were Mr. and Mrs. Don McIver, Mr. and Mrs. Chester McIver, Mr. and Mrs. Roy Gertje and Mr. and Mrs. Rollin Armitage and family.

Mr. and Mrs. Howard Southwick visited Sunday afternoon at the home of Mr. and Mrs. Lee Davis in the Lewiston Orchards.

Mr. and Mrs. C. A. Cuddy took their grandson, Stevie, home to Clarkston on Sunday, and were guests for dinner in the home of Mr. and Mrs. Leonard Cole at Lewiston.

Mr. and Mrs. Virgil Harris and family of Lewiston Orchards visited Sunday at the homes of Mr. and Mrs. Chas. Harris and family, and Mrs. Millie Harris.

William Cowger is driving a new Mercury car — the very lucky young man!

Mr. and Mrs. Don Cantrell went to Lewiston Tuesday. Mrs. Cantrell attended the 4-H Club Leaders meeting at the Thomast pavilion. In the evening Mrs. Rollin Armitage and Mrs. Russell Perkins also attended the meeting.

News is very scarce. Everyone is busy from morning to night!

P-T. A. Monday Evening
Joint District No. 283, P-T. A. will meet next Monday evening, Sept. 20, at 8:00 o'clock, in the Southwick Aid Hall.
This meeting will be in the nature of a reception for the teachers — and all parents in the district are urged to come out and meet the teachers.

Sales Day Date Set

Date for the Annual Sales Day has been tentatively set for Saturday, Oct. 9, by the Kendrick Community Lions Club, sponsors of the project.

It had been hoped to hold it at an earlier date, but due to inclement weather, which delayed harvesting; the Lewiston Roundup; Latah County Fair, and Troy Community Days dates, Oct. 9 seems to be the only day left suitable for the annual affair — and that day is not "too good," for it comes right in hunting season, when many of the men have taken to the "tall timber."

NEWTON G. BATEMAN, AREA PIONEER, DIES WEDNESDAY

Newton Grant Bateman, 56, Kendrick area farmer and businessman, died at the St. Joseph's hospital at 3:25 Wednesday afternoon of bronchial pneumonia, following major surgery about ten days previously.

Mr. Bateman was born at Coronado, Kansas, on July 10, 1896. He lived there until 1916, moving that year to Southwick, where he lived until 1930. He moved to Park, Idaho, in 1930, and after six years residence there moved to Clarkston. In 1940 he moved to Kooakia, and in 1942 to Kendrick, purchasing a ranch near the outskirts of town, and where he lived until 1953, when the family moved to the Gold Hill section. That fall they purchased the Kendrick Table Supply, and again moved to Kendrick, where he made his home until his passing.

He was united in marriage to Jessie M. Foster, at Gold Hill, Idaho, Nov. 7, 1917.

Mr. Bateman was a member of the Woodmen of the World; the Kendrick Grange, and the Kendrick Community Lions Club, being a charter member of the latter organization.

Survivors include his wife, Jessie, three daughters, Mrs. Kenneth Trout of Lewiston; Mrs. Glenn Hough of Colfax, and Mrs. James Morrison of Lewiston; two sons, Donald Bateman of Headquarters, Idaho, and Gerald Bateman, at home.

Mr. Bateman was a man who made friends easily, and who kept them. In his years in this area he farmed, worked as a "woods boss," and timber cruiser in logging operations, and later operated the Kendrick Table Supply. In all these things friends made life easier — and he loved to joke and joke with them. He took a keen interest in Grange and Lions Club work, and he will be greatly missed by these two organizations.

Funeral services were held at 2:00 p. m. Saturday, September 11, at the Kendrick Community Church, of which he was a member, with the Rev. F. C. Schmidt, pastor, officiating. Singing were Mrs. D. A. Christensen and Mrs. Jud Lee, accompanied at the organ by Mrs. Oscar Slind.

Honorary pallbearers were Marvin Vincent, Earl Whitinger, Frank Bencoster, Robert Draper, Ed. Kent and Weyer Weyen. Active were Ross Armitage, Wm. Johnson, Elmo Eldridge, E. M. White, Manning Onstott and Herman Johnson. Interment was in Normal Hill cemetery, Lewiston.

Grain Harvest Nears End

Harvesting of small grains in this area, neared an end this past week, with an estimated 95 percent now under the roof. Some late-sown spring wheat and barley still remains, and quite a few days of fine warm weather will be needed for this if it is ever to be harvested.

The painting of the church, begun progress this past week, with sunny skies and a warm wind aiding the farmers. The cool, moist mornings are just right for cutting, as the pods are then damp and tough and do not shatter. Then, the warm afternoon is perfect for combining.

It is estimated that about 50 percent of the white beans are now in warehouses, and the cutting on red ones getting into full swing. If all the beans are to be saved, however, some three weeks more of fine weather will be needed. Let's hope it holds.

Church Painting Completed

Last Friday morning eight members of the Kendrick Community Lions Club, under the direction of Carl Mattoon, completed the painting of the Kendrick Community Church — covering the exposed basement walls, stair rails and chimney with grey concrete paint.

The painting of the church, begun some weeks ago by the Lions Club as a community service has been "some time in the doing," as inclement weather, harvest rush and similar work stops have occurred. However, it is now complete, and a very neat, clean appearance is the result.

This job has been captained by Bob Magnuson, president of the local Lions Club, and done under the direction of Carl Mattoon, local painting contractor.

LIONS COMMUNITY CALENDAR

Kendrick Lions meet third Wednesday of July, August and September.
Grange — 1st and 3rd Tuesdays
Fireman — 2nd and 4th Wednesdays
Masons — 1st and 3rd Thursdays
Eastern Star — 2nd Tuesdays
Evening Circle, 4th Tuesday.
Rebekahs — 1st and 3rd Thursdays.
W. S. C. S. — 2nd and 4th Thursdays
1st Tuesday — Village Council meets
1st Wednesday — School Trustees
P-T. A. will meet Sept. 20, at 8:00 p. m., in the Southwick school.
V. F. W. Meets the second and fourth Thursday of each month.
Third Wednesday — Friendship Club meets, 1:30 p. m.
Notify W. L. McCreary of coming events for this calendar.

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Teddy Meyer leaves next week to enroll at P. L. C. Farland, Wash. His parents, Mr. and Mrs. Herman Meyer, will take him over by car the first of the week.

Walter Wolff left Monday for Moscow, where he will enroll at the U. of I.

Mrs. Bud Roach and son Dean, accompanied by her sister, Leone Parks, drove to Spokane, last week, where they attended graduation exercises for a class in Nurses Training at the Deaconess hospital. Mrs. Roach had taught some of the students. She also attended a banquet for the alumna at the Spokane Hotel following the ceremonies.

Lt. Col. and Mrs. Aaron Blewett and family arrived here Saturday evening enroute to Atlanta, Ga., and spent the week-end in the home of his sister, Mr. and Mrs. Ben F. Cook and family. On Sunday other members of the Blewett family came to join in a family pot-luck dinner and visit with the Aaron Blewett family before their departure. They left on Monday morning, and will again stop enroute at Leavenworth, Kansas, to visit his brother, Mjr. Rex Blewett, Lt. Col. Blewett will be stationed at Third Army Headquarters, Atlanta.

Mr. and Mrs. Bennie E. Cook returned Saturday evening from honeymoon trip to Oregon and California points. On Monday they went to Pullman, where Bennie enrolled at W. S. C.

Mr. and Mrs. Fred Stedman drove to Oak Grove, Oregon, and on Sept. 4th surprised his parents on their 57th wedding anniversary. They also visited with their son, Rev. and Mrs. Samuel Stedman at Hebo, Oregon, and with their daughter, Mrs. Bud Olson and family at Seattle. They arrived home Wednesday evening of last week.

Mr. and Mrs. N. H. Stedman arrived here Thursday evening from Oak Grove, Oregon, and will spend the winter in the home of their son, Mr. and Mrs. Fred Stedman.

Mr. and Mrs. Howard Rukgaber and daughter of Lewiston were Sunday visitors in the home of Emulus Brown and son Jerry.

Florence Shern and Alice Ring of Coeur d'Alene were house guests from Monday through Tuesday in the home of Mrs. Manning Onstott. They came down to attend the O. E. S. Friendship Night, Tuesday.

Mr. and Mrs. Weyer Weyen drove to Seattle last Wednesday, returning Saturday, where Mr. Weyen underwent a medical check-up — and the report was of the best — O. K.

Mr. and Mrs. Billy Weyen and daughters of Leland were Sunday guests in the home of his parents, Mr. and Mrs. Weyer Weyen.

Mr. and Mrs. C. G. Talbot of Potlatch, Idaho, spent the day Sunday at the Nellie Biddison home.

Mrs. Maude Biddison of San Diego, Calif., and Mrs. Vivian Cooley of Medford, Ore., spent Thursday of last week in the home of Mrs. Nellie Biddison.

Mr. and Mrs. Ed Nelson and sons spent Sunday in Pullman at the home of her parents, Mr. and Mrs. Wegner, honoring his birthday anniversary.

Mr. and Mrs. James Candler and three sons spent Saturday night and Sunday in Clarkston, visiting with friends.

Mr. and Mrs. Ralph Dieckrich of Scotts Bluff, Nebraska, arrived here Saturday, and will spend a couple of weeks visiting in the home of their son-in-law and daughter, Mr. and Mrs. Howard Hoffman and family.

Mr. and Mrs. Verles Mealhouse and children of Mullan drove down Tuesday to spend the day with Mr. and Mrs. Ernest Freytag.

Mr. and Mrs. Russell Smith and children of the Lewiston Orchards were Sunday dinner guests of Mr. and Mrs. Don Miller. In the afternoon all visited with friends around town.

Donny Travis and Montey Clark, both of Grangeville, were Saturday over-night guests in the home of Donny's grandparents, Mr. and Mrs. Jack Travis.

Mr. and Mrs. Rol Bryant of Trail, Oregon, arrived here Monday evening to spend a couple of days with Mr. and Mrs. Jack Travis.

Mr. and Mrs. Herman Pabst of Gifford, Idaho, and Mr. and Mrs. Alvin Shenamin of Moscow were Sunday callers in the home of Mr. and Mrs. Ross Armitage.

Arnold Woody of Boise is here this week visiting in the home of his uncle, John Glenn.

Mr. and Mrs. John Johanson were Sunday dinner guests of Mr. and Mrs. Oscar Knott at Potlatch.

Mr. and Mrs. John Wilson brought her father, Bob Cain, home from the Gritman Memorial hospital at Moscow on Monday. Mr. Cain is slowly improving and will convalesce at his home here. He remains in bed most of the time but is able to be up in a wheel chair for a little while each day.

Mr. and Mrs. Edgar Long and Mrs. Paul Lind spent Sunday at Elk River, visiting in the home of Mr. and Mrs. Bob Lind.

Mr. and Mrs. Leon Lind and children of Moscow; Mr. and Mrs. Robert Lind and daughter of Elk River, and Milton Eugene Lind of Lewiston were Saturday guests in the home of their parents, Mr. and Mrs. Paul Lind.

Rev. and Mrs. F. C. Schmidt attended a Parsonage Club meeting at Anatone Monday. A bountiful pot-luck dinner was enjoyed at noon.

Mr. and Mrs. Hans Ronning of Mullan, Idaho, arrived here Monday for a visit at the Ernest Freytag home, leaving for their home Wednesday.

Mr. and Mrs. Robert Garner, son of Mr. and Mrs. Archie Garner, Juliaetta, underwent a tonsillectomy at the office of Dr. D. A. Christensen, Monday morning. He is recovering nicely.

WHAT JULIAETTA FRIENDS ARE DOING THESE DAYS

Undergoes Tonsillectomy
Bobby Garner, five-year-old son of Mr. and Mrs. Archie Garner, underwent a tonsillectomy Monday morning, Sept. 13, at the office of Dr. Christensen in Kendrick. He is reported as recovering nicely.

General Homettes
Mrs. Jess Mundell, now of Cascade, but formerly of Juliaetta, is in town visiting with friends for a few days this week.

Mrs. Lizzie Bryant of Moscow was a week-end guest in the Frank Ballantyne home.

Kay Abrams, Kendrick, was a Monday over-night guest in the home of Jane Ralicot.

Norb. Uhlenkott began his annual two-week vacation on Monday. Kenneth Smith of Spokane is taking his place as depot operator during that time.

Mr. and Mrs. Amos Scherer and Mr. and Mrs. Jess Scherer, all of Chehalis, Wn., visited from Friday until Tuesday morning with their brother, Elmer Scherer, and their nephews, Mr. and Mrs. Ray Scherer and family, and Mr. and Mrs. Ralph Scherer.

Rev. and Mrs. Theo Meske and daughters of Camerun; Mr. and Mrs. August Brammer, also of Camerun, and Mr. and Mrs. Werner Brammer and daughters were Sunday visitors in the home of Mr. and Mrs. C. V. Strohm and family, on Monday, after spending the past few weeks in the Elmer Woods home in Moscow, where she has been under medical care. At this time it is not known whether surgery will be required on her injured leg, as it is still in the cast.

Saturday evening guests in the home of Mrs. Georgia Southwick and children were Mr. and Mrs. Abner Corkill, Jane Stephens, Clara Daberco and Lloyd (Pete) Ware, all of Troy; Philbert Daberco of Kendrick and Ray Taylor.

Mrs. D. N. Smith and daughter Charlene are here spending a few days in the home of her mother and brothers, Mrs. Rose Hadley, Fred and Billy.

Jeanette Bailey, SN, who has just finished her three-month course in psychiatry at Salem, Oregon, was here at the home of her parents, Mr. and Mrs. A. W. Bailey, the past week on vacation. Sunday the Baileys took Jeanette back to Pendleton, Oregon, where she will go on to complete her nurses training.

Little Cindy and Linda Candler spent a few days with their grandparents, Mr. and Mrs. W. L. Candler this week, returning to their home at Potlatch on Thursday.

The Don Candler family of Bovill, and the Wayne Thornton family of Leland, were Sunday visitors in the home of W. L. Candler.

Mr. and Mrs. Ernest Brammer of Southwick were Tuesday dinner guests in the home of his parents, Mr. and Mrs. H. E. Brammer.

Mrs. Mary Otosen returned last week from a visit at Tacoma and Seattle. The trip was made by plane. She reports a most enjoyable time.

Mr. and Mrs. Cecil Gruell and Mrs. Mary Otosen drove to Waverly, Wash., Sunday, to attend funeral services for Mrs. Jennie Otosen, who was the wife of Mrs. Mary Otosen's nephew, Charlie Otosen.

Mr. and Mrs. D. E. Mabbott and daughter of Craigmont have moved into the Freeman apartment.

Mr. and Mrs. Jack Browning and children have moved into one of the Fowler duplex apartments until their new home can be completed.

Korean Clothing Drive On

The Kendrick Assembly of God church is sponsoring a drive for clothing for Korean relief. The following items are most acceptable: Woolen or cotton clothing, underclothing, (for all ages), stockings, socks, caps, gloves, mittens, rubbers, shoes and (no high heels). Cuban heels, however, are acceptable. Clothing must be in good, wearable condition.

Please leave your bundles at the Assembly of God parsonage in Kendrick, or at the Juliaetta Cash Store in Juliaetta.

Clean out that closet and old clothing drawer now! Give, that it may keep someone warm this winter!

Kendrick Canyon Club

The Kendrick Canyon Club met at the home of Clara Kuykendall Sept. 1. The roll call was answered with "Broiler Tips" or "An Embroidery Stitch and Its Use." An interesting talk on trademarks in clothing was given by Sue Craig and Gladys Wilson. The club also made arrangements for a booth at the Latah County Fair.

The "White Elephant" in the form of a pink and blue shower, went to Arlene Garner.

Parents Of Daughter

Mr. and Mrs. Kenneth Brown announce the arrival of a 7 1/2-lb. baby daughter, born to them Sunday, Sept. 12, at the Davidson Nursing Home, Kendrick.

A Son Is Born

Mr. and Mrs. Jerry Harris of Lewiston are the parents of a baby son, born on Sept. 9, at the Davidson Nursing Home, Kendrick. Mother and babe are doing nicely.

Undergoes Tonsillectomy

Robert Garner, son of Mr. and Mrs. Archie Garner, Juliaetta, underwent a tonsillectomy at the office of Dr. D. A. Christensen, Monday morning. He is recovering nicely.

Has Completed Training

Far East Command (Official) — Marine Pfc. Merwyn R. Emmett, son of Roy Emmett, Kendrick, Idaho, has completed a course of instruction in mine warfare at the First Marine Division school center in Korea.

The one-week course consisted of field and classroom training in laying and detecting mines, removal of enemy mines and fuses, and brief instruction on booby traps.

The mine warfare class is conducted by veteran non-commissioned officers. Upon completion of the course, the "Leathernecks" return to their parent organizations.

SHORT NEWS ITEMS FROM OUR LOCAL SCHOOLHOUSE

Schools Crowded
The school rooms throughout this district are crowded to capacity in all three schools, but classes have settled into their normal routines.

Latest enrollment figures show only a slight increase over last week. The over all attendance figures show the number of High school students to be down from the 120 of last year to 115 this year, due to "drop-outs" and transfers in the Junior and Senior classes.

Hot Lunch Serves Many

The Hot Lunch program report a higher daily serving record than that of last year, with averages of 150 at Kendrick, and 126 at Juliaetta. The Southwick program, also is up, but figures are not available at this writing.

The programs have received several shipments of food from the Federal government surpluses, including butter, shortening, cheese and peas. In past years these shipments did not usually make their appearances until October or November.

Driver-Education Car Here

The new Driver-Education car arrived here last Saturday, and is now ready for student instruction use. As was the case last year, it is through the courtesy of the McMonigle Chevrolet Co., Lewiston.

Jordan Kanikkeberg will again be the driver-instructor. There are quite a number who desire to take this course.

Football Game The 24th

The football team has been trying out under the new lights at Armitage Field in anticipation of performing before capacity crowds at their three night games here this year.

There have been practicing broken-field running, tackling, etc.

The boys state very emphatically that they will beat Deary, here, the evening of Friday, Sept. 24th. Let's all turn out and cheer the boys on.

Trustees' Meeting

At the last meeting of the Board of Trustees it was decided to have Hugh Richardson, architect of Lewiston, draw up plans for the possible remodeling of the Southwick gym to serve as classrooms until such time as a new building can be built. This action was taken after the call for bids for the foundation, moving and renovation of the Leland School building showed that the final cost would be more than the District could afford at this time.

Other business taken care of at the last Trustee meeting included the installation of Roy Heimgartner of Juliaetta, as the new member from Trustee District No. 1, replacing Norla Callison, who did not run for re-election.

Wilbur Tarbet, Gerald Ingie and A. O. Kanikkeberg were reinstated as chairman, vice chairman and clerk, respectively.

Band News

The Kendrick High School Band has accepted an invitation to march in the Latah County Fair Parade on Saturday morning, September 18th, and also to participate in a massed band as part of the half-time program at the Idaho-Oregon football game that afternoon.

The new uniforms that were ordered for the band this summer have not yet arrived. But since it was felt that it would be better to have the Kendrick area represented without the new uniforms — rather than not at all — the band will present their new marching routines during the parade — if not their new uniforms.

Burton L. French Dies Monday

A phone call was received by the Gazette Monday from Earl David of Moscow, telling of the death of Burton L. French, former United States Congressman from Idaho, and one of this area's best known citizens. Mr. French passed away at Miami, Ohio, on Monday, Sept. 13, and funeral services were held there on Wednesday.

However, Mr. French's wish was that he be buried in his beloved Idaho, and the body is now enroute to Moscow, where funeral services will be held for him on Monday, Sept. 20, at 2:00 p. m., from Short's Funeral Chapel.

Mr. French was undoubtedly the most famous man to ever claim Kendrick as his home.

V. F. W. Purchases Wheel Chair

It was decided at the last meeting of the V. F. W. Auxiliary to purchase a wheel chair for the Relief Fund. This will be used presently by Mrs. Anderson. The Post earlier had secured a walker which Mrs. Anderson has been using, and it is now available to anyone in need in the community.

Both pieces of equipment have been purchased as a service to the community, and anyone wishing the use of same is asked to contact any member of the Post or Auxiliary.

All are reminded of the next meeting, Sept. 23rd.

SOME FEW ADVANTAGES OF LIVING IN OUR AMERICA

Oil Down On The Farm
American farmers work only six percent of the world's tillable land. Yet they produce 45 percent of the world's meat; 65 percent of its corn, and similarly high proportions of other basic foods.

So outstanding a record is the result of many factors. One is the progress made in scientific land conservation and utilization. Another is the superbly efficient and economical machinery produced by the farm equipment industries. And another is something that every American uses every day in one form or another — oil.

The farmer is the world's largest user of trucks and tractors. He commands more mechanical horsepower than is used in all the rest of industry — but he'd have none at all if it weren't for gasoline and lubricants. To put the situation another way, a generation ago each farm worker had about 2.2 horsepower at his command. Now he has some 50 horsepower, and oil is the fodder that makes those particular horses go.

And power doesn't tell the whole story of oil's work in agriculture. Loss and damage from weeds, insects and plant diseases is very heavy on the farm, running into the billions annually. This waste has been materially reduced in late years through the use of sprays and dusts which are derived from oil, and are called petroleums. Agriculturally derived fertilizers are other important farm tools.

About "Partnership"
One of the best ideas developed by this Administration has been the "partnership" plan of electric power development. But it seems to us it has been widely misinterpreted.

Partnership does not mean the end of public power. It does not mean that great resources will be "given away" to ruthless private power interests for exploitation. It does mean, to the contrary, that the federal government, state and local government, and private enterprise will work together to develop needed projects in the quickest possible time and at the lowest possible cost — to the benefit of every consumer of the power. It means that important new sources of tax revenue will become available for government at all levels. And the work will be done under regulations, laws and contracts which will fully protect the interest of all concerned, and make exploitation of the public impossible.

It is a function of government to control floods and reclaim land. Electric power is a by-product of such operations. But it is not a function of government to go into the electric power business — any more than it is a function of government to provide us with any other commercial service or commodity. Under partnership, regulated private enterprise will do jobs which it is superbly fitted to do — and which the past socialist mania has prevented it from doing. The people will get more power at the lowest practical price. And the public treasuries will get the tax money they so sorely need.

Progress Against Handicaps
People in the United States enjoy the greatest retail service in the world. It is easy to see why, after reading examples of regulations under which Western European retailers live, as described by David Carson of the School of Retailing, University of Pittsburgh.

In the Netherlands a store keeper has to get approval of local Chambers of Commerce before opening a store. In Norway he must notify the police if he plans to advertise a clearance sale, other than the two seasonal clearances permitted by law. In West Germany stores are permitted to give away only souvenirs that bear promotional messages, and they are prohibited by law from advertising the event.

FAIRVIEW BRIEFS

Mr. and Mrs. Ed. Mielke, Cameron, were Tuesday evening guests in the Harold Parks home. On Wednesday DeAnn Mielke spent the day with Mrs. Parks.

Arnold Woody of Boise visited with his cousin and family, Mr. and Mrs. Fred Glenn, last week. John Glenn of Kendrick joined the group for dinner on Tuesday.

Mr. and Mrs. Paul Hall and family of Clarkston were Sunday evening supper guests in the Fred Glenn home.

Mr. and Mrs. Reg. Brookshaw of Vancouver, B. C., spent last week in the home of his brother-in-law and sister, Mr. and Mrs. Wilbur Corkill and family.

Pinochle Club Wednesday

The Pinochle Club met Wednesday evening of last week for their regular club meeting at the home of Mr. and Mrs. George Brocke, Sr., with five tables in play.

Invited guests were Mr. and Mrs. Jack Kuykendall, Mr. and Mrs. Geo. F. Brocke, Jr., and Mr. and Mrs. Ben F. Cook.

High scores went to Mrs. E. M. White and Floyd Millard; lows to Mrs. Jack Kuykendall and George F. Brocke, Jr.

At the close of play a surprise Pink and Blue shower honoring Mrs. Ross Armitage was held — and this in itself provided a great deal of merriment.

Delightful refreshments were served by the hostess at the close of the evening.

Big Improvement On Corner

Those traveling the road between Kendrick and Juliaetta cannot help but notice a big improvement at the corner just beyond the Werner Brammer ranch home. Here, taking advantage of a slide removal, the local state crew, Clarence Perryman and Ed. Brown graded the corner, and laid an oil mat several feet wider than before — and the result has been very satisfactory. It is now wide enough that vehicles can meet on the corner with ample clearance.

We still cannot understand why the state highway department will not widen and straighten all the road between Kendrick and Juliaetta, such as they have done on both ends!

Showing Steady Improvement

In a phone call Monday morning, Axle Swanson of Juliaetta, who is now a patient in a Clarkston Nursing home, stated that he was feeling much better, in fact, so much better that he had been able to accompany friends on a drive to Spokane last week-end. He added that the doctor there told him a great deal of his trouble was from nerves, and advised that on his return home sometime next month that calls from friends be cut to the very minimum — for himself, and his wife, too.

Grange To Meet Tuesday

The Kendrick Grange will meet next Tuesday evening, Sept. 21, at 8:00 o'clock. The evening will begin with the showing of a film on "Muscular Dystrophy," which will be open to the public. This is a new disease which medical science is now battling. It strikes adults as well as thousands of children, annually. Everyone is urged to see this film and learn more about this dread disease.

Following the film Grange will convene in regular business session.

Local Road Work Report

Lewiston, Idaho — On the Anshaka Kendrick project, grading in the Devil's Elbow section and laying pipe culvert is under way. On Monday the crushing plant began operations on its site in Wauncher Gulch, and graveling will progress as rapidly as possible.

The Kendrick state crew also repaired a number of pot-holes in the oiled surface of state highway No. 42.

Preparing Fair Booth

The Kendrick Grange ladies are very busy these days preparing that organizations booth at the Latah County Fair this week-end. Mrs. J. G. Travis, Mrs. Jack Kuykendall and Mrs. Weyne Weyne spent Monday at the Weyne home in partial preparation.

The local Grange has been a winner several times — and hopes to repeat again this year.

Big Bear Ridge 4-H Club

The Big Bear Ridge 4-H Club met at the home of Mr. and Mrs. Gerald Ingle on Monday, Sept. 13. Mr. Ingle signed the Forestry Record books. All members projects are now near completion. A discussion was held of plans for Club exhibits at the Latah County Fair which begins in Moscow Sept. 16.

Refreshments were served by the hostess, Mrs. Ingle, at the close of the evening.

Barber Shop Redecorated

Dick's Barber Shop has just received a complete redecoration at the hands of Carl Mattoon and helper — and now presents a shining front to the world.

Repainting Front

The front of Burt's Confectionery is receiving a coat of paint over the stucco at the hands of Carl Mattoon. It adds materially to the buildings appearance.

Dog Gone Fast

A couple of old timers were discussing the state of the local roads as they sat on the porch of the general store.

"Tell me," said one of them, "how is the road out past your place?"

The other chewed his tobacco thoughtfully, as he phrased his answer, then spat and said: "Well, I'll tell you. That road is so blamed good that sometimes in dry weather the cars go so fast the dogs can't even get a bark apiece at 'em."

Some Deal

He bid high for the parrot and finally it was knocked down to him. Paying his \$50, he asked:

"Does this parrot talk?"

"Who do you think was bidding against you?" the parrot inquired.

Cheese of all kinds at Blewett's Grocery-Market, Kendrick. adv.

Diabetics Can Live Long, Active and Normal Lives

The control of diabetes so that a person suffering from the disease may lead a long, normal and active life has become a reality.

In a study of 760 diabetic patients suffering from the disease 25 years or more, Dr. Elliott P. Joslin, of Boston, found approximately 80 per cent active and a few in perfect health.

"The patients in perfect condition are those whose treatment was initiated (with hardly an exception) with strenuous control of diabetes in their early years," Dr. Joslin stated, "this control being maintained for 10 years, more or less, to more than the usual extent and even then continued.

"In this series the evidence is overwhelming that strict treatment of diabetes pays and, moreover, that control of the disease is possible."

Of the total group studied, 23 patients had had diabetes for more than 25 years and yet had a sound body with urine free from albumin, eyes without diabetic complications such as hemorrhages and cataracts, and had arteries free from calcification.

Of these 23 patients, all of whom lived in unusually favorable homes and under comfortable social circumstances according to the survey, 13 inherited the disease, the age of onset ranging from 1 4/5 to 32 years. All take insulin. Seventeen married, resulting in 28 living children, all of whom are healthy.

"Corroborative testimony that diabetics are living long and — most of them — useful lives is afforded by 40 of our patients with diabetes of 30 to 35 years' duration whose onset was in childhood," Dr. Joslin stated.

Mosquitoes Eat Dog (Food) In Unique Clinic Studies

Three million radioactive labeled mosquitoes raised on tap water and finely ground dog food containing radiophosphorus or a phosphate derived from it, were recently used in experiments conducted by the Chemical Corps Medical Laboratories of the Army in order to determine insect flight ranges.

With the constantly increasing human activity in northern regions, the study of arctic and subarctic species of biting insects has assumed great importance. Control of the enormous numbers of mosquitoes that occur in most arctic and subarctic areas is difficult even with large scale spraying. Even after such spraying, it has been established that reinfestation from the surrounding territory may occur rapidly. Accurate knowledge of the flight range and dispersal patterns of the important types of biting flies is needed in order to increase the effectiveness of control measures.

In this particular research project the region near Churchill, Manitoba, was selected. This region is on the timberline, and has enormous mosquito populations which include both tundra and conifer forest species. Radioisotopes were used as tracers. Adult mosquitoes were also made radioactive by feeding them on radioactivated rats and rabbits, raisins, flowers, and sugar solutions.

Insomnia

Insomnia is a demon that has plagued people all through the centuries. Now there are so many individual remedies that if a person tried them all, he'd never have time to sleep. There are many ex-insomniacs, though, who swear by their own particular remedy, and if sleep really is elusive every night, then the person suffering from insomnia has nothing to lose by trying one or two which appeal most to him.

A word of warning, though! Don't be too upset or disappointed if a "guaranteed-to-stop-insomnia" cure doesn't work. Before he settles down to the long list of suggestions that friends are more than willing to thrust on him, the insomniac should make a thorough check of his bed.

First, he should see that his mattress is level, resilient and in good conditions — that is, no sags, lumps, humps or bumps. Then he should check his bedspring — if it is in good condition, it will have no broken coils or sags. Next comes his pillow. To provide adequate support it should be fluffy, buoyant, resilient and fill the gap between his shoulders and neck. If his bedding passes this test, then he is free to try some of the 1001 sleep inducers — and with the best wishes of all ex-insomniacs.

Another suggestion, perhaps more to the liking of the teetotalers, is to drink a glass of warm milk every night.

Lightning Bugs

The full details of how a lightning bug produces its light are not fully understood, although it is known to utilize a chemical reaction involving water, oxygen, a rather simple compound called "luciferin" and a more complex one, belonging to the class known as enzymes, called "luciferase." Probably the luciferin, after it has become properly activated, actually produces the light. The insect may exercise some sort of nervous control over the organs that produce light, perhaps in the same way that a nervous impulse controls the contraction of a muscle, and several scientists are engaged in research to find how this happens.

THE AMERICAN WAY

A New Member Of The Team

PERSONAL MENTION

Word has been received from Pvt. Clifford Cook, son of Mr. and Mrs. Asa Cook, Juliaetta, of a change of address. It now reads: Pvt. Clifford J. Cook, US 56240707, 6th Army Area F. S. S., Detachment 4, Fort Ord, Calif.

Mr. and Mrs. W. L. McCreary have received another change of address for their son, Pvt. Frank P. McCreary, US 56122984, Med. Det. 645th Eng. Bn. (C) (A), Fort Campbell, Ky.

Mr. and Mrs. Walter Heubner of Los Angeles, Calif., were visiting with friends around town Monday. She will be remembered here as Faith Barnes.

Mr. and Mrs. Marvin Long visited in the home of his brother-in-law and sister, Mr. and Mrs. J. E. Key, in Spokane, Sunday.

Mr. and Mrs. E. A. Deobald were Lewiston business visitors Monday afternoon.

Mr. and Mrs. Burton Souders, Sr.,

were in Lewiston on business Tuesday morning.

Beans Pouring Into Town
With the continuation of favorable weather beans may be said to be literally "pouring into town." Truck after truck, loaded with the new field boxes or sacks may be seen on Main street and at the warehouses.

The "Fruit of the Potlatch" is said to be of an excellent quality this year, although containing an unusually high percentage of wild oats. On this basis the cleaning plants have been working over time — and it was "business as usual" Sunday.

Evergreen Friendship Club
The Evergreen Friendship Club will hold its next meeting on September 22, at 1:30 p. m. in the home of Mrs. Barbara Choate.

Mrs. Helen Hunter will present a demonstration on "Aluminum Etching."

Roll call will be answered with a "Good Use for Cheese."

Farm Scrap Harvest Reported a Success Farmers Can Sell All Scrap Iron and Steel

The national farm scrap harvest conducted between October 15 and November 15 has been termed a success by the steel industry, producing millions of tons of scrap iron and steel badly needed for making new steel.

Although the drive is over, farmers should continue to collect the scrapped machinery about their farms and sell it to dealers. It is a good way to keep the farm prem-

ises cleaned up and, although scrap does not sell for big prices, the financial return does mean something.

The steel industry continues to need the broken tractor parts, rusted and worn out implements, plow points, outdated horse drawn equipment, old cultivators, broken shovels and similar equipment that can be found on almost every American farm. There are about 25 tons of iron and steel on the average farm.

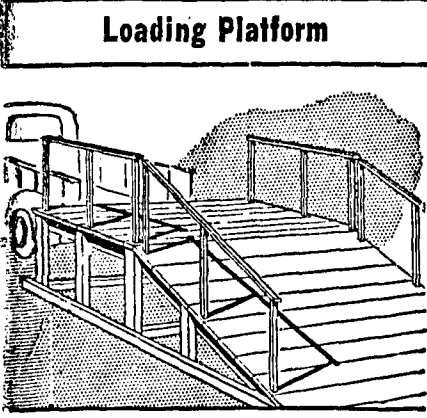

Farm scrap can be a major source of the 36,000,000 tons of scrap that are needed by the steel mills this year. It takes that much scrap to produce 110,000,000 tons of steel that mills in our country have as their goal for 1951.

Cheaper Way to Fatten Beef Cattle Outlined

G. A. Branaman, Michigan State College animal husbandry authority, reports that full feeding grain is the quickest way to get a steer to market, but it isn't necessarily the cheapest or the most profitable.

Plain cattle, for instance should be fed longer and more cheaply than well-bred steers of good type. "Corn silage full-fed along with protein supplement may replace all the grain for plain steers when fed a longer time," he comments. "Yearling steers usually are fed from 4 to 7 months, depending on their grade and quality, and the amount of grain fed. Calves require a longer time to fatten and 2-year-olds a shorter time.

Wintering calves on roughage, when pasturing for part or all of the summer without grain results in cheap gains. Under present cattle and feed prices it is possible to pasture cattle for two summers, feeding roughage in winter. These animals may be grain fed for a short time or sold as grass-fat cattle.

Loading Platform

The above sketch of a loading platform is one any farmer handy with tools can build. The main idea is to build it on skids so it can be moved about the farm as desired. The railing can be made detachable to make it easier for loading farm machinery. The uprights would require 4x4 lumber and the platform 2" planks.

Shearing Lamb Faces Will Increase Gains

Shearing the faces of heavily-wooled feeder lambs will increase gains, according to Graydon Blank, extension animal husbandry specialist at Michigan State College. Blank explained that lambs can see better without a heavy crop of wool around their eyes. After shearing they'll find the feed trough more quickly, will eat better and will gain much more rapidly, specialists report.

Life Insurance Funds Going To Nation's Defense Plants

Life insurance funds are moving to the aid of the defense activities of the country in increasing volume, and loans made by the life insurance companies in support of the defense program may reach \$3,500,000,000 for 1951, according to the Institute of Life Insurance.

"In keeping with the usual policy of directing new funds into channels where they may be most useful for the national economy, the current trend in life insurance investments is towards meeting the capital needs of the preparedness program," Holgar J. Johnson, Institute president, commented. "This is in line with the voluntary credit restraint program under which defense needs have precedence over all other elements in the economy. Defense financing now accounts for the greater part of the life insurance company placement of policyholder funds in business and industry."

More than \$1,000,000,000 has been loaned by the life insurance companies so far this year to defense plants and indications are that a like amount may be loaned in the remaining months of the year.

In addition, some \$800,000,000 has this year been invested in loans to utility companies and railroads, which are basically involved in all defense activities. This amount may be nearly doubled by the end of the year. Thus, the total of financing made available during the entire year for defense industries or defense-supporting activities, may come to \$3,500,000,000.

The loans for defense or defense-supporting purposes represent two-thirds of all loans made in the first six months by the life companies to business and industrial concerns, and the ratio has been increasing since mid-year.

Contrary To Superstition, Oysters Edible Year-Round

Contrary to superstition, oysters are edible in all 12 months. Hot-weather shipping problems helped to build the R-month legend. The taboo remains appropriate even with modern refrigerated transportation, however, since May to August is the natural spawning season. The adult female oyster's feat of discharging as many as a half-billion eggs in this season leaves her a bit too thinned down for prime succulence.

Shad were surpassed only by cod and salmon among U.S. commercial fisheries before the turn of the century. Overfishing, industrial pollution, and high dams barring the way to upstream spawning grounds have forced shad far down on the list now. Although the Chesapeake Bay still accounts for one fish out of three, the total catch is less than one-fifth that of 19th century peak seasons.

Crabs, alewives, rockfish, croakers, sea trout, and menhaden all figure importantly in Chesapeake Bay commerce. Like oysters and shad, they are studied for rehabilitation purposes by such organizations as the Chesapeake Biological Laboratory at Solomons, Maryland, and the Chesapeake Bay Institute, Baltimore.

Pearls and Pipelines

Iranian nationalists have laid verbal claim to Bahrain, oil-rich island across the Persian Gulf where Arabian dhow put in bearing huge milky pearls from the sea floor. Persia has been claiming Bahrain without avail since 1783, however. An independent sheikdom under British protection, Bahrain is the site of an American oil field and refinery. Saudi Arabia's oil wells were joined with the Mediterranean coast in 1950 by the competition of Tapline, a 1,068-mile, 30-inch pipeline across the burning Arabian desert. American and British engineers proposed to build next an even bigger "Middle East Inch" (34-36 inches in diameter) from Abadan to the Mediterranean. Iran's oil would thus be linked by a tunnel of steel with the Western world—if the hot desert wind from Tehran does not blow the project away.

Turbans

In a survey of "fashions down through the ages," made by The Book House For Children the turban was found to be a favorite head covering of many ancient peoples, among them, the Armenians, Babylonians, and Phoenicians. Today's favorites include variations of the cloche, beret, and "beanie," a small disc of felt or straw that is anchored to the head, usually with hatpin or veiling.

Color Blindness

Most common in color blindness is the confusion of red and green, which may affect as many as 80 men and 5 women per thousand population. One person out of several thousand has trouble with yellows and blues. Very rare is complete color-blindness, in which everything is seen as black, gray and white. Not more than a hundred such cases have been reported in the scientific literature. Even a partially color-blind person usually learns to name colors properly a great deal of the time. For example, one with red-green deficiency may learn by experience that what he sees as dull dark yellow is really red, while a light yellowish-gray is what other people call green.

Small Town Utility Serves Farm Folks Gas Made Available To Farms for First Time

The farm-folks within 20 miles of Antigo, Wis., have gone in for gas in a big way. This new interest of farm folks in heating and cooking with gas started over a year ago with the reorganization of Antigo's City Gas company.

The Antigo utility which manufactured gas from oil, coke and steam converted its plant to "propane-air" gas and offered service

Mrs. Dale Madison, a rural homemaker, has converted her kitchen to gas, and reports it gives her more freedom from kitchen duties.

to farm homes and rural firms within a radius of 20 miles.

The new rural customers have their own "backyard utility" in the form of storage tanks for large users and "bottled" installations for homes with smaller consumption.

Because they are a part of the Antigo utility system, country customers receive monthly fuel bill just like the town. Fuel consumption is recorded on a meter attached to their cylinders or tanks. Bad weather can't interrupt service, since a sufficient supply is stored on the premises in advance of use. Empty cylinders are periodically replaced by company service men.

Since the reorganization, rates have been reduced for town and farm users three times.

Contour Farming Cuts Soil Losses in Half

Iowa agronomists report that contour farming cuts soil losses in half, boosts corn yields as much as 7.4 bushels per acre and ups soybean production by 2.7 bushels.

Other advantages from contour farming include lower fuel and operating costs for tractors and other machinery and an increase in the length of corn rows.

The need for more contour cultivation will increase with the steadily expanding acreage of row crops to meet the nation's food needs.

While contouring is a vital step in keeping soil at home, other soil building measures are needed to keep farm land at high yielding levels. Every crop burns up organic matter and uses up plant nutrients. The organic matter can be replenished by growing well-fertilized deep-rooted legumes regularly in the rotation and by returning manure and crop residues to the soil.

Safety Plug

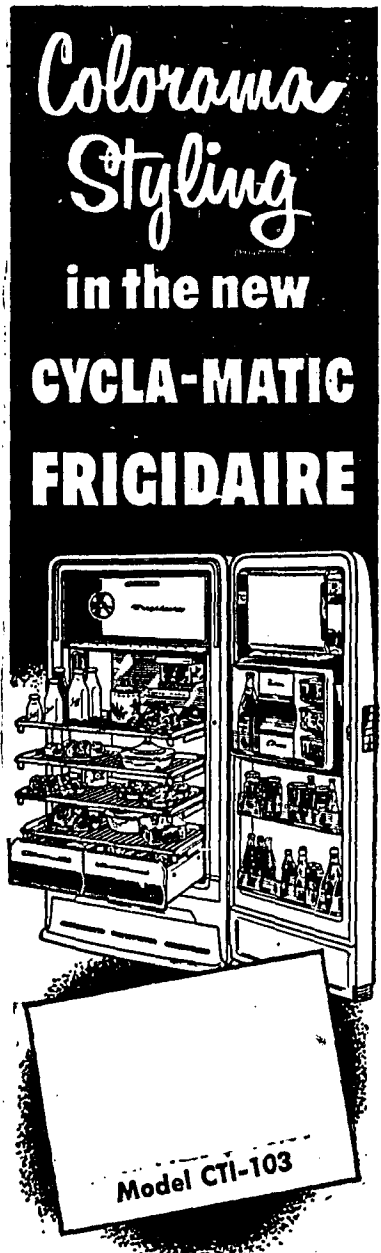

A new safety plug has been developed that should be of interest to most farmers. It has a tiny replaceable fuse. Electrical cords are connected to the plug exactly as they are connected to the wall socket itself. The fuse blows out should a short circuit develop in any connected cord. This prevents current from reaching the danger point, instantly cutting off the source of fire.

Nebraska Farmers Paid High Cost for Corn Crop

Nebraska farmers paid with two lives, 194 fingers, 18 hands, 10 arms, one leg, four toes and two feet in gathering approximately 225 million bushels of corn. That is last year's accident record. Failure to stop the cornpicker before trying to remove the stoppage of the machine accounted for almost every accident. Farmers should discuss safety problems with their harvest crews.

The man who follows another never gets ahead.

How to develop more power in your diesel engines

To make sure of full power and top efficiency from all of your diesel engines, use Standard Diesel Fuels. Made to exact specifications, they are always uniform so you can depend on even performance at all times. Completely distilled, they burn cleanly without waste. Standard Diesel Fuel is correct for most diesels. Where a higher cetane value is required, use Standard Automotive Diesel Fuel. Tell us the make of your engine and we'll deliver the fuel you need.

Adrenal Gland Plays Role When One Suffers Injuries

Another step forward in better understanding the important role played by the adrenal gland in helping the body recover from injuries has been achieved, a University of Michigan doctor states.

Dr. Jerome W. Conn, an associate professor of internal medicine, reported to the American Association for the Advancement of Science on research he has been conducting at the university.

His study has shown that the adrenal gland calls upon a substance in the blood known as cholesterol to help in producing the huge amounts of adrenal hormones needed in prolonged periods of stress which the body undergoes at the time of an injury.

Cholesterol, produced largely by the liver, is the basic compound of adrenal hormones, including cortisone, the hormone found to be beneficial in the treatment of rheumatoid arthritis, Dr. Conn says.

In his experiments, Dr. Conn found the cholesterol content of the adrenal gland could be reduced 70 per cent within three hours by artificial stimulation which produced conditions similar to those created within the body during periods of prolonged stress.

This artificial stimulation was achieved through use of ACTH, the pituitary gland hormone which causes the adrenal gland to produce its hormones.

The effect of this prolonged stimulation of the adrenal gland has important implications for future study of several diseases, including those of the heart, liver and kidney as well as hardening of the arteries, according to Dr. Conn. These diseases are all associated with an unusual production or use of cholesterol.

Wool Scarce; Give Blankets Extra Care for Longer Life

Treat your wool blankets with the gentle care that precious possessions deserve. Textile scientists of the U.S. department of agriculture have pointed out that U.S. production of wool this year is one of the lowest on record.

Frequent airing of blankets in use not only is good sanitary practice but helps them last longer and hold their fluffy warmth and comfort. When a blanket is thrown back loosely so fresh air reaches both sides, the wool has a chance to get back its natural springiness which makes for warmth. But care should be taken not to throw a blanket over anything sharp, such as a peaked bedpost, which may pierce or pull it, or on anything that may stain it. Loose bed springs, sharp metal corners or even roughened wood may also catch and tear blankets or other bedding.

For best service and comfort blankets should be large enough to come up well over shoulders and still tuck firmly in the bottom of the bed. Short blankets often wear out early because they take so much pulling and strain.

A blanket stays clean longer if the bed is made so that the sheet turns back over the top of the blanket 8 to 12 inches. If the sheet is too short, a strip of cloth, basted over the top or the full length of the blanket, is good protection against soiling the wool. A covering over the blanket, or even a third sheet used on top, gives added warmth because it holds still air in the fluffy wool.

For Pig Protection

A pair of clean rubber boots is worth more than any medicine in protecting pigs from a fatal intestinal disease called transmissible gastroenteritis. Best means of controlling it is to move healthy pigs as far away as possible from the sick ones. Many farmers do this, a veterinary medical bulletin points out, but they overlook the fact that their shoes can spread the infection. Attendants who have walked through infected hog quarters should put on a pair of clean boots before entering healthy quarters, the bulletin cautions. The disease, believed to be caused by a virus, is marked by severe diarrhea, vomiting, and rapid loss of weight. Young pigs are hit hardest, with death losses sometimes running as high as 90 per cent.

Finishes Pre-Tested

The term "industrial-finishes" is applied to the finishes used by manufacturers to enhance their products. Before being applied, they are subjected to many special tests based upon the kind of usage to which the article may be subjected. For example, in addition to tests for adhesion, and hardness, finishes for refrigerators, stoves and kitchen cabinets are tested for their resistance to various foods, such as lemon juice, butter, lard and vinegar—as well as to various cleaning materials.

Wooden, Aluminum, Ladders

The rung of a wooden ladder will bend downward about one-sixth of an inch for a 150-pound person stepping on its center. An aluminum ladder is constructed so that the deflection is much less. If it were built like the wooden ladder, the deflection of the aluminum rung would be about a ninth as much as for the wooden rung under similar conditions. This is because aluminum is nine times as rigid as wood (white oak).

Chile Produces Some Of World's Best Wool Three-Fourths of Crop Is Shipped to U. S.

The small American farmer has learned from experience just how profitable a small flock of sheep can be to his general farm program. And in the western part of the country great flocks are maintained by producers.

One of the greatest producers of wool, now selling at a record price, is Chile. The industry is valued at \$170,000,000 and employs more than 10,000 people.

Chile's first sheep were brought from Spain by the Spanish conqueror Pedro de Valdivia over 400 years ago. In 1877, 300 head were brought to the Punta Arenas area from the Falkland Islands.

The huge English Marsh Romney will produce 12 kilos of long staple wool, or 30 pounds. This type wool is often called the best in the world.

The industry specializes in the famous English Marsh Romney sheep which produces, according to many experts, the finest long staple wool in the world. Today, Chile has a total sheep population close to 7,000,000 head.

Three quarters of the nation's wool crop — about 15,000 metric tons — goes to the United States. England gets the remainder.

Farm Worker Crop Output Triples in Fifty Years

Fifty years ago a farm worker produced enough food for himself and five other persons. Today the crops raised by a single worker are sufficient for 15 persons.

Although machinery has had much to do with this spectacular productivity record, a major factor is the expanded use of fertilizers. The nation's farms last year consumed 18,346,132 tons of soil food—six times as much as in 1901—at a cost of \$744,000,000.

At the turn of the century 265 million acres of crop land, tilled by 13 million farm workers, were needed to supply the crops required by a population of 76 million. Now 10 million workers produce from 345 million acres of land the food required by twice as many Americans, as well as thousands of persons in other countries.

Agricultural authorities say that the use of fertilizer is responsible for roughly one-fourth of the volume of all crops.

The use of fertilizer is expected to continue upward for an indefinite period.

Seed Beds

It is a long time from planting seed beds, but gardeners and farmers might spend some of their spare time during the winter months making one. Seed beds with plastic covers are hailproof, shatter-proof and light in weight. A plastic-coated wire mesh, weighing less than glass, passes on to the plants most of the sun's ultra-violet and infrared rays. This material is available at most farm equipment dealers and hardware stores.

Poultry and Egg Eating Increases, Experts Say

Poultry experts report the American family is consuming more poultry and eggs and predicts the increase will continue during the rest of 1954. Forecasts indicate the average American will have eaten 30 pounds of chicken by the end of 1954, 10 per cent more than last year; 406 eggs, slightly more than in 1953; and about five pounds of turkey meat, approximately the same as last year.

Giant Industry Arising From New Patent Fibers

Ever since Adam and Eve left the Garden of Eden with nothing to wear, mankind has been clothed consciously. The Bible story tells us that Eve fashioned her first garment from a fig leaf — maybe it was leaves.

We wear clothes from the time we are born. It would take books to tell the progress of the clothes story down through the ages. Long ago it was found that the clothing of the cotton seed was better than fig leaves for human garb. For centuries we have used the skins and wool of animals, as well as the covering of the cotton seed, for our own clothing. Still we were not satisfied. We took the cocoon of the little silkworm for its silk.

But we can thank that same little worm for our modern system of producing fibers for textiles that do not necessarily deprive any other living creature of its coat. We learned that the silkworm extruded a fluid from a spinnerette near its mouth. The fluid became a stout silken thread on reaching the air.

This observation led to a man-made fluid extruded through a mechanical spinnerette which produced our first rayon thread. The device was called a "mechanical silkworm." This invention came from France about 70 years ago. During the past 15 or 20 years American inventors, encouraged to find new processes and products through the protection and rewards provided by our patent system, have devised new machines and new fluids to make many new kinds of fabrics for human clothing.

Coal, oil, various gases, glass, brine, and many organic substances such as wood, cornstarch, peanuts, and feathers provide the substances from which we now have fabrics that resemble wool, silk, and cotton.

'Won't Hurt' Boast Not Idle Promise to Army Blood Donor

It takes courage to give blood that will save a soldier's life, but your fears of pain or ill effects now are unwarranted.

Army medical authorities recognize that thousands of Americans who are willing to die for their country if necessary have a horror of seeing blood flow from their veins. Just as many shudder when they think of a needle just under the surface of their skin.

But ask anyone who has ever donated a pint of blood to help replenish the nation's seriously depleted stocks and chances are he will tell you there's nothing to it—no pain, no ill effects. But you will have a deep satisfaction that you have helped a fellow American in a critical hour.

If you have ever pricked your finger with a pin, you already have experienced all the pain you will suffer when you give a pint of blood. It's that simple.

If you are not physically able to donate blood, you will not be permitted to do so. You are given a thorough examination before the blood is taken from your arm.

A single drop of blood from your fingertip is all that is required for the tests that will determine whether you are able to donate blood. If the results of these tests are satisfactory, the remainder of the procedure is entirely painless.

You lie down on a bed and an attendant puts a little procaine on your arm. As the blood is drawn, you feel nothing. In five minutes, the bottle is full and ready for processing and shipment to the battle zones of Korea.

Within a few minutes you feel like your old self again — probably better, for you realize what a precious contribution you have made.

That Parallel

The 38th parallel in Greece ferries the legendary River Styx and passes close to Corinth and Athens. Dodging Aegean Islands, it borders the Maeander River south of Smyrna on the Turkish shore. It crosses the Turkish headwaters of the Tigris and Euphrates en route to Tabriz, metropolis of Iranian Azerbaijan. Across the Caspian Sea, it finds itself on both sides of the critical frontier between Russia on the north and Iran and Afghanistan on the south. At the Russia-China border, the parallel climbs to its greatest height on the shoulders of Stalina and Kungur, both 25,000-foot peaks. Touring China, it runs near the ancient Silk Route past Yarkand and the Takla Makan (desert). China's Great Wall crosses the 38th frequently near the cities of Yulin, Ningsia, and Wuwei.

Abe Lincoln

When Abe Lincoln was 21 he crossed the Wabash and encountered the first level land he had ever seen — the fertile prairies of Illinois. At two sites there he helped his father build log cabins. Then he struck out for himself, settling in the village of New Salem, 20 miles northwest of Springfield, Illinois. Lincoln received his first popular notice in New Salem. He was elected captain of a volunteer company in the Black Hawk War, and later was sent to the state legislature. Afterward he moved to Springfield, the state capital, and New Salem literally disappeared. Many of its log buildings were dismantled and carried to Petersburg, two miles north.

Eye strain begins when vacations end . . .

GUARD YOUR CHILD'S EYES WITH GOOD LIGHTING

Don't let your youngsters be handicapped at school by poor lighting at home . . . Overstraining is easy for a boy or girl trying for good marks.

Check the lighting in your home now . . . You need plenty of good reading lamps, plus enough indirect lighting to create a bright, cheery atmosphere.

To improve your home's lighting, buy one or more new BEAUTY-PLUS Lamps, now featured at many Inland Empire stores. BEAUTY-PLUS Lamps are certified by the Electrical Industry to guarantee you best possible lighting, combined with the beauty of modern styling.

LOOK FOR THIS BEAUTY-PLUS TAG WHEN YOU BUY LAMPS

Must Have Been A Small Town
 The collection department of a Chicago firm tried a new method on a slow-paying account in a small southern town.
 "Dear Mr. Smith," the letter began, "what would all your neighbors think if we came to your town and repossessed your car?"
 In due course the letter came back with the message written across the bottom: "I have taken up this matter with my neighbors, and they all think it would be a lousy trick."

Kendrick is your town and mine. Let's work and boost together to make it a better one.

CARD OF THANKS
 The recent bereavement which has visited our home has brought to us a greater appreciation of our friends. Such kindness and neighborly thoughtfulness can never be forgotten. And to those who gave their blood, a special "Thank You." — Mrs. Grant Bateman and Jerry; Mr. and Mrs. Kenneth Trout and family; Mr. and Mrs. Glenn Hough and family; Mr. and Mrs. James Morrison and family; Mr. and Mrs. Donald Bateman and family. 1tp

BIG BEAR RIDGE NEWS
 Mr. and Mrs. Olive Reinimer (nee Ollie Morey) of Dishman, Wash., were week-end guests in the home of her sister, Mrs. Ed. Galloway and family, and also visited other relatives here.
 Mrs. Stanley Cox (nee Margaret Halseh) and children of Clarkston, spent the week-end here with her parents, Mr. and Mrs. Ed. Halseh.
 The Misses Dollie Smith and Caroline Ellefson of Moscow were week-end guests of Mrs. Johanna Nelson.
 Mr. and Mrs. Paul Carlson of Moscow were Sunday visitors in the K. D. Ingle home.
 Mrs. Howard Bailey of Orofino spent last week in the home of her daughter, Mrs. Roy Emmett, becoming acquainted with her new grandson.
 Mrs. Ed. Hinrichs spent Monday with her mother, Mrs. Alex Larson, at Leland.
 The Happy Home Club will meet at the home of Mrs. Johanna Nelson, Tuesday afternoon, September 21st.
 Mrs. Helen Hunter will demonstrate "Aluminum Trays."
 Verne Dunham returned to Enterprise, Oregon, Tuesday, having harvested his crop here.
 The farmers are completing their harvesting operations, and bean cutting has started. The weather has been perfect for their ripening the past week.
 Sunday School began at the Lutheran church Sunday morning. All children are most cordially invited to attend.

Democrats Make Plans
 Moscow, Sept. 10 — The Democratic Central committee and the Latah County Democratic Women's club officers held meetings Thursday night and planned for special activities in the November election campaign.
 Plans for opening county headquarters were discussed, campaign teams outlined, and reports made by representatives who attended the Democratic state platform convention at Idaho Falls, Chm. Lee Brannan; secretary Paul Eke, and state committee-woman Kay Pell, reported.
 A dinner meeting for the central committee is slated with gubernatorial candidate Clark Hamilton on Monday, Oct. 18.
 The V. F. W. Auxiliary has purchased a hassock which will be given away on Sales Day, Oct. 9. Further, all members are asked to leave their fancy work at the home of Mrs. Wm. Cuddy.

Fresh and cured meats, fresh frozen Bird's Eye foods and other eat's Grocery Market in Kendrick.

Ask for More Trained Men For Animal Disease Study
 Solution to some of the nation's most costly animal disease is being slowed by lack of highly trained research men.
 There is urgent need for giving promising young scientists an opportunity to learn the techniques of animal disease investigation.
 The only way this can be done is by a long range fellowship program.
 Such a program has been sponsored by the AVMA for the past six years. Under this program, which will be expanded as funds permit, research-minded graduates of colleges of veterinary medicine get financial aid to engage in animal disease studies at leading scientific institutions. This gives them background and experience needed for unraveling highly complex diseases.
 Many livestock and pet owners who ask for "more research to solve disease problems" have given too little thought to how the job might be done.
 Finding out what causes a perplexing animal disease isn't much different from tracking down a dangerous criminal, and neither is a job for anyone but a well-trained person.
 The Federal Bureau of Investigation would not put a man on any of its cases without first training him in FBI methods. The same advantage should be given to people interested in disease investigation.
 Funds for expanding the fellowship project should come from private sources rather than the federal government "because the nation already has gone too far toward dependence on federal hand-outs."

Mastitis Germs Live 5 Days on Broomstick
 Harmless though it may look, that broom in the corner of the barn might be the means of starting a new case of bovine mastitis.
 The germ responsible for most cases of bovine mastitis can stay alive for as long as 20 days on objects around the barn, and for as long as 26 days anywhere on a cow's skin. From these jumping-off places, the germ can eventually get into a cow's udder, where it starts the disease known as mastitis.
 Survival time of the germ was observed after mastitis-infected milk was poured on manure, hair, wood, bricks, udder cloths; and other materials commonly found or used around dairy barns.
 The germ stayed alive for 4 days on rubber boots, 5 days on a broom handle, 7 days on an udder-washing cloth, 8 days on a bucket, 13 days on hair, and 20 days on hay. However, when some of these objects were treated with a disinfectant before being smeared with infected milk, the germ didn't do so well. Enough of the disinfectant lingered to cut down the survival time to a day or less.
 This research emphasizes the need for clean barns, clean cows, clean attendants, and prompt disinfection of any object that gets splattered with milk.

Use of Columbium
 John Winthrop, Jr., who supervised the construction of America's first successful blast furnace at Saugus, Massachusetts, in 1643, found an unidentified rock fragment near his home. About 150 years later, an English chemist, Charles Hackett, saw this fragment in the British museum, analyzed it, and thus discovered the element columbium. Today, this element is playing an increasingly important part in the manufacture of stainless and heat resistant steels for such uses as jet aircraft engines.
 Columbium is one of the most recent elements to find use in the steel industry. It was used commercially as an alloy in the 1930's, although experimental work had been done with it as early as 1920. Last year 632,000 pounds of columbium metal was consumed in the manufacture of steel.

Origin of Camouflage
 The origin of the word camouflage has, it seems, been lost in the shuffle. One of the stories told in connection with it is that, during the Indian troubles in the Southwest, one Jacques Camou built a circular mud fort. This fort had large square openings at regular intervals around the walls. Through these, the garrison of the fort would fire. As the Indians' shots also found their mark through these openings, Camou painted the entire fort like a checkerboard — with large black squares on a white field. This confused the Indians so they were unable to determine at which dark squares to aim.

Thermal Snow Removal
 Thermal snow removal from sidewalks and driveways by means of embedded piping is a new and interesting development in the heating industry. The snow is removed automatically and without effort by the heat from pipe coils installed under the surface of the pavement. Hot water, circulated through the coils, transfers its heat to the pavement, thus melting the snow and keeping the surface dry. Automatic snow removal is economical. There is no necessity for using snow shovels or chemicals. All the owner does is to turn the switch to start the system in operation when the snow begins to fall.

THE Bull itin

Published Weekly by the Union Oil Service at Kendrick
W. L. "Bill" Rogers, Editor

HELLO, FOLKS:

Still busy with the harvest rush, but you know your car, pick-up or truck needs servicing? If so, don't worry about it. Bring it to us. We'll grease it, vacuum the interior, wash it, and if you desire, polish or wax it. And, in that grease job we'll use those special Union Lubricants, that assure real protection to the moving parts — and fill that motor with Union or Royal Triton Motor Oil. You will get real satisfaction in every way.

A doctor was testing a girl's reflexes and asked: "Do you ever wake up in bed with a jerk?" "No, doctor," she replied. "All my friends are perfect gentlemen."

Winter is coming, and "banana peel" tires are far from the right thing for muddy, snowy roads —

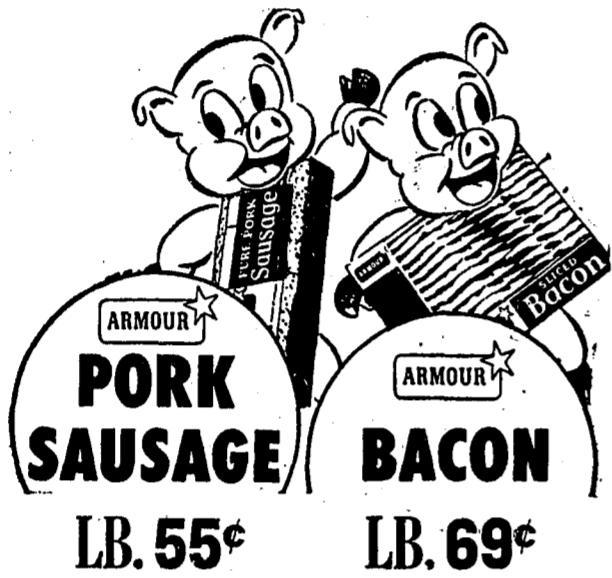

or that hunting trip. Just come in and let us discuss the problem with you. There's a U. S. Royal Tire to fit every need, from your car to truck. And what we sell we service!

A cowboy visiting a neighboring ranch was invited to stay overnight. He retired to the bunkhouse late in the evening. Because of plans to drive cattle to the railroad, everyone was routed out of bed at 3:30 the next morning. "Humph," yawned the visitor, "it shore don't take long to stay all night here!"

Chilly mornings remind us that fall and "fire time" is at hand. Phone 1251 and we'll deliver a tank of Union Fuel Oil. It's tops!

Let us wash and grease your car

WHAT CAMERON FOLKS ARE DOING THESE DAYS

Home Demonstration Club
Mrs. Herbert Schwarz was hostess at the September meeting of the Home Demonstration Club, on Tuesday afternoon. Mrs. James Whiting gave an interesting and instructive talk on "Fall Flowers and Bulbs." Mrs. Harl Whiting was a guest. The next meeting will be held at the home of Mrs. Harold Silflow.

General Items
Mr. and Mrs. Herman Meyer took their son, Teddy, to Parkland, Wash., Sunday, where he will enroll as a freshman at Pacific Lutheran College.

Rev. and Mrs. Meske and daughter Ann were Spokane visitors on Tuesday.

The Leland Homemakers Club met at the home of Mrs. Harl Whiting on Wednesday.

Mrs. A. H. Blum returned to Lewiston Sunday to stay with her son-in-law and daughter, Mr. and Mrs. Clay Albright, after spending the summer with Mr. and Mrs. Wilbert Brunsiek and Mr. and Mrs. Albert Glenn and son.

DeAnn Mielke visited with Mrs. Harold Parks Wednesday.

Rev. and Mrs. Theo Meske and family were visitors in Genesee Sunday afternoon.

Mr. and Mrs. Walter Koepf and family attended the Lewiston-Vancouver baseball game at Bengal Field, Sunday evening.

Fonda Schoeffler spent Sunday afternoon with Patricia Mielke. Mr. and Mrs. Willard Schoeffler and daughters Fonda and Marcia spent Sunday evening with Mr. and Mrs. Ed Mielke and daughters.

Mr. and Mrs. C. H. Fry and Mr. and Mrs. Ed Mielke and daughters were Saturday evening dinner guests of Mr. and Mrs. Glen Wegner.

Mr. and Mrs. Marvin Silflow and family, Mr. and Mrs. Harold Silflow and Kathy; Mr. and Mrs. Fred Silflow of Juliaetta; Mr. and Mrs. Virgil Felton of Lewiston, and Ernest and Ernie Heimgartner were Sunday dinner guests of Mr. and Mrs. Emil Silflow. The dinner honored Mrs. Fred Silflow's birthday anniversary.

Mrs. John Schwarz and Mrs. Herbert Schwarz were the honor guests at a Sunday afternoon birthday anniversary party in the home of Mrs. Herbt Schwarz. Other guests included Mrs. Ida Stoneburner; Mrs. Walter Dennler and daughter Judy of Fix ridge; Helen Mielke, Emma Hartung, and Mrs. Fred Newman.

FIX RIDGE ITEMETTES

Friendship Club To Meet
The Friendship Circle Club will

meet at the home of Mrs. Adolph Dennler Friday evening at 7:30. Roll call will be answered with a recipe for a "Gelatin Salad." The salad recipe is to be written out and given to the hostess.

Missionary Ladies Meet
The Juliaetta Lutheran Missionary Ladies met at the home of Mrs. Adolph Dennler last Wednesday afternoon with 14 members present. Mrs. Nora Clark and Mrs. Bulah Peters of Juliaetta were guests. Following the meeting Bible games were played, with Mrs. Phyllis Dennler and Mrs. Tom Dennler winning. Mrs. Fannie Hedler was awarded the "White Elephant."

General Short Items
Mr. and Mrs. Lawrence Slead and children visited Tuesday evening with Mr. and Mrs. Adolph Dennler.

Little Mark Dennler received quite a severe cut on his head Tuesday afternoon, while he and his brother Johnny were at play.

Mr. and Mrs. Ralph Richardson and children left Saturday for their home at Eugene, Oregon, after spending a couple of weeks here at their ranch, harvesting.

Mr. and Mrs. Bennie Weatherby and son Jimmy attended the farewell dinner Sunday honoring Mr. and Mrs. Rick Johnson, which was held at the home of Mr. and Mrs. James Freeman at Moscow.

Howard Hutchinson was very pleasantly surprised Monday afternoon, when Arnold Woody of Boise stopped to visit with him. This was the first time the two men had seen each other in over 30 years.

Mr. and Mrs. Adolph Dennler and children were Sunday dinner guests of Mrs. Katherine Dennler, in the Lewiston Orchards.

Mr. and Mrs. Walter Dennler and family were Sunday dinner guests of Mr. and Mrs. John Schwarz at Cameron.

Mr. and Mrs. G. F. Dennler and daughters attended the Roundup in Lewiston Sunday afternoon.

Mr. and Mrs. J. O. Knudson of McCall, Idaho, visited from Thursday until Monday with their son-in-law and daughter, Mr. and Mrs. Bennie Weatherby and family.

Mr. and Mrs. Wallace Clark attended the ball game at Lewiston Sunday evening.

Mr. and Mrs. Leonard Weber of Lewiston were Thursday evening visitors in the Adolph Dennler home.

Mrs. Adolph Dennler and daughters visited Thursday afternoon with Mrs. Geo. Giese.

Like A School Without A Teacher
"A small town without a newspaper would be like a school without a teacher or a church without a pastor!"

This striking opinion comes from Prof. John H. Casey of the Department of Journalism of the University of Oklahoma. He went on to say this: "In the aggregate, the country newspaper determines the outcome of more elections, exerts a greater influence for constructive community progress, is read by more members of the family, and constitutes, with its millions of circulation and quadrupled millions of readers, a better advertising medium than any other group of newspapers or periodical publications."

"Through service to its community, the country newspaper will not merely survive; it will continue to flourish..." — Industrial News-Review.

There's No Second Place
There is no second place in the Hall of Fame. Consider the case of Methuselah's grandfather, Jared. He is said to have lived 962 years — just seven years less than his famous grandson. However, it wasn't good enough. He remains to this day unknown, unhonored and unsung.
