

INTERESTING NEWS NOTES FROM THE SOUTHWICK AREA

Community Church Hold Election

The Southwick Community church held its annual election on Sunday, for both Sunday School and church. Those elected were: Alice Fry, superintendent; Ruth Armitage, assistant superintendent; Myrtle Swinney, secretary; Christina Cuddy, treasurer; Myrtle Swinney, pianist. Milton Benjamin was again elected teacher of the adult class, and Ervin Fry of the Young People's class. John Lettenmaier was chosen secretary-treasurer of the church, and Alice Fry, pianist. The members of the board are Arnie Cuddy, John Lettenmaier, Milton Benjamin, Ervin Fry, Verlin Benjamin, Henry Davis, Rollin Armitage and Rev. Martin Swinney, who served in 1954, were re-elected for 1955.

The Missionary meeting of the church was held Friday at the home of Mrs. Milton Benjamin. Clothing was fixed and a package prepared to be sent to a missionary field. The ladies would like for everyone having Christmas cards they do not intend to keep, to turn them in to the Society, who will erase the names, whether in ink or pencil, and prepare to send them on to the Missions. They are used in teaching and as rewards for work in the fields. Foreign children greatly enjoy the colorful pictures and designs on the cards.

Do not forget the visit of Rev. Ernie Epperson to our church the 18th, 19th and 20th. He is a returned evangelist from Alaska, who will show films taken there and give talks on his work. He is a worker for the "Youth For Christ Crusade," and an interesting speaker. Do not miss him.

Homemakers Club To Meet
The Southwick Homemakers will meet on Thursday at the home of Barbara Hepler, with Virginia Cantrell as co-hostess. The meeting is the first one of the year — and Year Books will be given out — so all plan to be there for the entire day.

Committee Met Wednesday
On Wednesday the "Year Book" committee for the Homemakers Club met with Virginia Cantrell, president, at her home, to plan the "Year Books." Those helping are Christina Cuddy, Barbara Hepler, Agatha Perkins and Virginia Cantrell. The theme this year will be "Safety First," and some very interesting meetings are planned.

General News
Wednesday evening callers at the home of Mr. and Mrs. Russell Perkins were Mr. and Mrs. William Kachlemier.

Mrs. Edna King visited Sunday at the home of Mr. and Mrs. William Jennings, and later in the afternoon called at the home of Mr. and Mrs. Harve Triplett.

Mr. and Mrs. Wade Candler of Ahshika were visitors on Friday in the home of Mr. and Mrs. Aaron Wells. Mr. and Mrs. Leonard Cole and daughter of Lewiston visited with her parents, Mr. and Mrs. C. A. Cuddy, Saturday of last week.

Mr. and Mrs. Russell Perkins and daughter called at the William Kachlemier home Friday evening.

Mrs. Howard Southwick has returned from McMinnville, Oregon, where she had been for a medical check.

Guests at the home of Rev. and Mrs. Martin Swinney for dinner Sunday were Mr. and Mrs. Rollin Armitage and family.

Dinner guests of Mr. and Mrs. Deniz Kuykendall, Sunday, were Herman Kuykendall of Lewiston, and Mr. and Mrs. Russell Perkins and daughter Hazel.

Mr. and Mrs. Leland Marvin and son Darryl made a business trip to Troy, Oregon, the first of the week. Lesley Marvin spent the day with her grandparents, Mr. and Mrs. Russell Perkins.

Banks, Envelopes To Appear Under the Leadership of Mrs. Geo. F. Brocke, Jr., with Mrs. Irvin McGeechy as co-chairman, the annual March of Dimes Drive got under way locally this week, with "banks" to make their appearance in business firms, and gift envelopes to enter the mail.

This is one of the most worthy causes to which money can be given — so it is hoped that you will be more than generous!

Remember: Any gift to the March of Dimes is deductible from your income tax!

MARCH OF DIMES DRIVE IS NOW UNDERWAY

A Proclamation
Throughout Idaho, during the month of January, thousands of adults and children will once again participate in the continuing crusade against poliomyelitis. Their contributions to the annual National Foundation for Infantile Paralysis will speed the march toward ultimate victory over this dread disease.

In the past eight years, more than 1,850 residents of the Gem State have been stricken with polio. Ninety-nine percent of these victims have received medical treatment at a cost in excess of \$2,000,000 from the coffers of the National Foundation.

Last year, 2,800 Idaho children were inoculated with a new vaccine in a dramatic series of field trials designed to discover a foolproof means of treating polio sufferers and preventing disabling damage. In 1955, this vaccine will be made available to at least some children in nearly every county in our state.

The National Foundation for Infantile Paralysis has announced its annual drive for funds with which to carry on its worthy and effective program.

Now, therefore, I, Robert E. Smylie, Governor of the State of Idaho, by virtue of the authority in me vested, do hereby proclaim and declare January, 1955, to be March of Dimes Month, and urge upon our citizens a spirit of generous cooperation.

In testimony whereof I have set my hand and caused to be affixed the Great Seal of the State of Idaho at the Capitol in the City of Boise, this fourth day of January, in the year of our Lord, one thousand nine hundred and fifty-five, and of the independence of the United States the one hundred and seventy-ninth.

To Aid March of Dimes
Earle V. Miller, state highway engineer announced this week that all maintenance men in the state highway department have been requested to turn over empty bottles, trash, and other redeemable items picked up along the state's right of way during the month of January, to the local March of Dimes committee.

Miller said that a memorandum has been sent to all of the districts informing them that January was the "March of Dimes Month" and requesting the maintenance men to store bottles at the various maintenance sheds. "We are asking our resident engineers to make arrangements to have the Boy Scouts or some other group in the area, pick up the items at the sheds and turn the proceeds over to the March of Dimes," Miller said.

"We are only sorry that the drive isn't being held at a time when there is more litter along the roadway," he said. "Of course we always hope that there never will be much litter, but this is one time when the benefits could be turned to an extremely good cause."

Lions Club Meets Wednesday
The Kendrick Community Lions Club met Wednesday evening of last week in the banquet room of the Fraternal Temple, with the W. S. C. S. of the Community church serving the 6:45 dinner.

At the conclusion of the meal a short business session was held. The matter of a Lions sponsored coasting and skiing party for children, to be held sometime in the near future, was brought up by Ross Armitage.

After a bit of round-table discussion the matter was referred to the "Youth Committee."

Roll call showed 34 members and guests. For entertainment W. L. McCreary showed pictures the family took in Alaska a couple of years ago.

SHORT NEWS ITEMS FROM OUR LOCAL SCHOOLHOUSE

Thanks
Following the article on these pages a few weeks ago concerning our missing reference books, seven have come back. These completed two sets of our encyclopedias, leaving seven books still missing from three sets.

We wish to thank those concerned for the return of these books, and remind everyone that we still need seven volumes to complete three more sets.

Back At Work
The faculty and students have returned to the business of education after a ten-day break for the year-end holidays. Contrary to popular superstition most students seemed glad to get back to school, and a busy routine. Illness has kept several students from all three schools confined to their homes.

The Junior and Senior High School faculties have been working on and approved a new schedule to go into effect at the beginning of the new semester, Jan. 7th. The need for the major change has been the band period conflicting with classes in the Junior High department.

The new schedule, which is to be on a trial basis for this second semester, will put band practice at a time when it will not conflict with any subject in either the Junior or Senior High School. The band practice period will be from 8:15 a. m. to 8:55 a. m. with no other classes scheduled. This will enable interested students, who have not been able to do so under past schedules, to participate in the band program.

The new schedule will also eliminate the necessity of Junior High students missing part of their regular class work to take part in the band program. There will be a few more minor changes to eliminate conflict and assure a smoother operating program for the students.

The new schedule will place the Junior and Senior High lunch period in closer harmony with the lunch hours at home for those students who go home during that period. The new lunch time will be from 11:55 a. m. to 12:30 p. m. Morning classes will take up at 9:00 o'clock instead of the present 8:40, to give the band a 40-minute practice period. School will be out at 3:25, thus eliminating the present 20-minute wait for the buses.

Bus schedules will not be drastically effected. One or two will have to arrive 5 minutes earlier. All will leave at the present 3:30 p. m. time.

Troy Bows To Kendrick
Play in the first quarter saw the Kendrick Tigers very aggressive. As usual, they had several of their passes to men under the basket stolen. Troy did an excellent job of working the ball, but the Tigers proved too much for them.

Kendrick really started rolling in the last of the second quarter, and Troy lost several of their long-court passes out of bounds. Troy also had difficulty making their shots, as Kendrick seemed to be there most of the time to check when they tried to shoot. The half ended with the score 32-16 in favor of Kendrick.

During the third period Troy seemed to be better organized and their shooting ability improved. Even then Kendrick held a large margin, but the Trojans slowly crept up.

The fourth period was the most exciting and furious, with every spectator whooping it up for their team. The players were fighting hard to gain possession of the ball, and in such action spills and falls were frequent. Each team should be complimented for their sportsmanship and splendid teamwork.

When the game ended the Tigers showed grins of contentment because they had defeated the Trojans, who had beaten them by just a few points in their previous meeting.

The score by quarters: First, 17-9, Kendrick; half, 32-16, Kendrick; third, 45-32, Kendrick; final, 57-49, Kendrick.

Kendrick made 33 percent on their field goals and 44 percent of their foul shots. Troy hit 37 percent of their field goals and 52 percent of their foul shots.

The Trojans are coached by Ozzie Kanikkeberg; the Tigers by Dennis Racicot. Referees were Chose and Adams.

NEWS ITEMS ABOUT LELAND RESIDENTS AND FRIENDS

4-H Club To Meet
The 4-H Livestock Club will meet on Jan. 16th, at the home of Sandra Peters.

W. S. C. S. To Meet
The Leland W. S. C. S. will meet in an all-day session on Thursday with Mrs. Lloyd Craig, to study the book: "Under Three Flags."

Everyone interested in this study is cordially invited to attend.

General News
Mr. and Mrs. John Blankenship and family were Thursday evening supper guests of Mr. and Mrs. Emil Silflow.

Mr. and Mrs. Herb Schwarz and daughter, Mr. and Mrs. Marvin Silflow and family, Ernest and Ernie Heimgartner were Monday supper guests of Mr. and Mrs. Harold Silflow. The supper honored their wedding anniversary.

Mrs. Dora Heffel is a medical patient at the St. Joseph's hospital in Lewiston. At this time she is feeling a little better.

Mr. and Mrs. Roy Craig and daughter Paige were Tuesday supper guests of Mr. and Mrs. Jesse Heffel and family.

Mr. and Mrs. Jesse Thornton spent the week-end in Moscow in the home of their son, Mr. and Mrs. Willis Thornton and family.

Mr. and Mrs. Lloyd Craig and daughters were Sunday afternoon and evening guests of Mr. and Mrs. Wilbur Corkill and family.

Carolyn Skaggs and Sharon Lohman spent Friday night with Sandra Peters.

Mrs. Wilbur Corkill and Mrs. Lloyd Craig attended a Council meeting of the Home Demonstration Clubs in Lewiston, Monday.

Mr. and Mrs. Irvin McGeechy and family of Kendrick, and Mr. and Mrs. Willard Schoeffler and family were Thursday supper guests of Mr. and Mrs. Gordon Peters and family.

Mrs. Helen Hinrichs and son Herman of Big Bear ridge were evening callers.

Mr. and Mrs. Gordon Peters and Mrs. A. G. Peters visited Sunday afternoon with Mr. and Mrs. Elmer Peters at Lewiston.

Sandra Peters spent Saturday and Sunday with Carolyn Skaggs at Linden.

Mrs. Charles Hoffman was a Friday supper guest of Mr. and Mrs. Lloyd Craig and daughters.

It Would Be Appreciated

Ed. Brown, of the local state highway maintenance crew, said Tuesday morning that it would be greatly appreciated if local residents would not leave their cars or trucks parked on Main street over night during these times when snow plowing is a daily "must."

If no vehicles were parked on the streets in the early morning Ed. says it would be very easy to plow the streets from curb to curb, adding to the safety and convenience of local shoppers and motorists.

Village officials join with Mr. Brown in asking that those leaving parked vehicles over-night put them on the side streets or on vacant lots.

ICY ROADS BRING ON RASH OF MINOR CAR ACCIDENTS
Sunday evening snow began falling in this vicinity, and by Monday morning approximately 1 1/2 inches had fallen, adding to that already on top the hills, and giving the canyon area something on which to skate and slide — for by Monday evening it was indeed a glaze of ice.

Monday night another 1 1/2 inches fell — and then the real "skating began," marked by a rash of minor accidents, two of which occurred on the school house hill — which proved to be a real "booby-trap" for anything on wheels.

David Crocker drove his car out to go to work at Juliaetta, but as he turned down the hill the ice proved too much, the wheels turned into sled runners, and he slid clear across the Main street and down the hill between the Howard Hoffman and Walter Silflow homes. Here he thought he had his car under control — but it hit a rough place in the icy glaze, turned and centered a large light pole near the Hoffman home. The speed was slow, so damage was minor. Dave was not hurt.

Rev. F. C. Schmidt started down the schoolhouse hill Tuesday morning, his car equipped with chains, and planned to turn just above the Lester Crocker home — the next thing he knew his car was sitting in the Crocker front yard — undamaged.

The car belonging to Chas. Deobald and the pickup truck belonging to the Art Foster Dray line were damaged in a collision on the icy side street between the Abrams Hardware and Blewett's Grocery Tuesday morning. Mr. Deobald was driving down the street just as Mr. Foster started to back out from the curb. The ice prevented either machine from stopping. Damage was not great on either, as speed was slow.

Although details are lacking, we understand that the pickup belonging to E. O. McAllister, Southwick, skidded on the ice Monday and struck the railing of the Pine Creek bridge. Damage to machine and bridge was said to be minor.

At this time snow plows are a very popular item, and the state crew has been doing considerable sanding on icy spots on the Bear Ridge and Wauncher Gulch grades, although the continuing snowfalls soon cover it.

Tuesday morning Wm. Bamberg, village custodian, was busy distributing sand on the schoolhouse hill.

All traveling on wheels are urged to use the utmost caution at all times.

Town Team Wins Another
Kendrick's Town Team is indeed hanging up a splendid record in this season of play.

On Monday evening they journeyed to Asotin, defeating that team by a score of 65 to 57.

Thursday evening of this week they meet Culesac on the local floor.

Kendrick is in a tie for first place in this league, with a record of six wins and two losses.

PERSONALS AND NEWS ABOUT KENDRICK FRIENDS

Mrs. A. O. Kanikkeberg left Thursday for Seattle for a visit with her parents. Her mother fell some time ago and suffered a broken hip, but has now been released from the hospital.

Rev. and Mrs. F. C. Schmidt attended a Parsonage Club meeting in Moscow on Monday. They also visited in the home of their son, Mr. and Mrs. Warren Schmidt and daughters, who moved to Moscow last week to make their home. He will attend the U. of I. this coming semester.

Chas. Candler spent the week-end here with his family. He is now employed at the creamery in Orofino.

Mr. and Mrs. Frank Abrams and family spent the New Year's holidays with Mr. and Mrs. Tom Keene and family at Joseph, Oregon.

Mr. and Mrs. Charles Easterbrook drove to Joseph, Oregon, Tuesday of this week to visit Mr. and Mrs. Tom Keene and family.

Bob McCall left Tuesday morning for Spokane, where he will be inducted into the army. From there he goes to Fort Ord, Calif., for his basic training.

Mr. and Mrs. Bill Rogers had a Sunday evening dinner guests Mr. and Mrs. Wm. Johnson and family.

Mrs. Robert Meserve accompanied her brother, Walter Mallory of Deary, to Spokane Sunday, where they visited her father, Leslie Mallory, who is recuperating from recent surgery in a hospital there. She reports he will probably be in Spokane for the rest of the week, before returning home.

Werner Brammer returned on Thursday of last week from McMinnville, Oregon, where he had been a patient in a hospital there for the past ten days, receiving medical treatment. He says he is feeling better.

Walter Millard Dies At Lewiston
Walter Fred Millard, of 911 3rd St., a co-owner of the L & M Glass & Paint Co., died Tuesday at 8:15 a. m. at St. Joseph's hospital, four days after undergoing surgery for ulcers.

He had been a hospital patient for five days.

Mr. Millard was born at Juliaetta, Nov. 10, 1913, moved to Lewiston in 1925 and spent the rest of his life here. He was in the Navy as a reservist from 1943 to 1945, but did not go overseas.

Mr. Millard was associated with Zimmerly Air Transport Service for about six years, serving as assistant manager under the late Bert Zimmerly, and as manager after Zimmerly's death a few years ago. He later worked for two years in the paint department of the Erb Hardware Co., and in December 1952 he purchased the L & M Glass & Paint Co., 910 Main St., from Roland Little and Leonard Miller.

He was sole owner of the business until March of last year, when Pete Bonner became a partner.

He was a member of the Elks Lodge, the Rotary Club and the Baptist church.

He married Elve Solbert at Lewiston, Jan. 8, 1938, and the couple had a daughter, Vickie Jo.

Christmas Seal Report

Incomplete reports of Christmas Seal Sale returns from thirty of Idaho's forty-four counties show a total of \$34,607.59 contributed so far in the annual campaign to raise funds to fight tuberculosis. Idaho Tuberculosis Association officials announced this week.

An excellent response has been reported in nearly all of the counties in Idaho, according to A. E. Wheeler, treasurer and Seal Sale chairman for the state association. In expressing his appreciation to everyone who helped make the 1954 Seal Sale a success, Mr. Wheeler said that much of the credit for progress in the fight against tuberculosis must go to the "firm, steady support of generous citizens."

For the coming year the state and local tuberculosis associations are planning expanded services to the people of Idaho. If the county reports, which are still coming in, continue to show as favorable results as they have thus far, we should reach our goal and be able to go ahead with these programs.

Baby, It's Cold Outside!
On the outside, looking in, can be a frustrating thing, when it happens to be your pickup — with the keys locked inside!

That was the predicament that faced Mrs. Jack Kuykendall Tuesday morning after she had parked their pickup across the street from Long's to do some shopping. To her dismay she found she had locked herself out — the motor running and a full tank of gas!

Trucks hauling "short logs" and lumber are a regular sight, and this has contributed greatly to the continuation of local mills.

Local loggers have been going about their business under pretty satisfactory conditions the past few days with trucks operating pretty freely, although icy roads in some sections have made hauling rather hazardous if not impossible.

Trucks hauling "short logs" and lumber are a regular sight, and this has contributed greatly to the continuation of local mills.

Conservation officers from this section of Idaho said they failed to check a single hunter who had the limit.

Home From Hospital
Mrs. Ed. Brown has received word from their daughter, Mrs. Don Jensen, that their infant daughter, who has been ill with pneumonia in the Gritman hospital, Moscow, is recovering nicely, and that they now have her at home.

She was taken ill while visiting in the Brown home.

Grange To Install Officers
Next Tuesday evening, Jan. 18 will be the regular meeting of Kendrick Grange. Installation of officers will take place, with the Lapwai Grange performing the ceremony.

The meeting will begin at 7:30. All members are urged to be present.

Evergreen Friendship Club
The Evergreen Friendship Club will hold a meeting at the home of Mrs. Mabel Travis, with Connie Fey as co-hostess on Wednesday, Jan. 19, at 1:30 p. m.

All members are asked to be present to help in planning the club program for the coming year, and to choose "Sunshine Sisters."

Duck Season Over
The duck and goose hunting season in this area ended last week — and to our knowledge few, if any, ducks were bagged by local hunters, the weather being just too good throughout the entire season.

NEWSY ITEMETTES FROM AMERICAN RIDGE AREA

Hi-Hope Club
The Hi-Hope Club will entertain their husbands at a turkey dinner for the annual meeting, scheduled this year for Jan. 20, at the home of Mr. and Mrs. Harley Eichner. Any club member and her husband unable to attend, is asked to notify Mrs. Harley Eichner.

Mr. and Mrs. Ernie Andrews and family were Sunday dinner guests of Mr. and Mrs. Harry Andrews and family in Lewiston. James Andrews returned home with them to spend this week.

Cold Weather Egg Dish
A dish based on hard-cooked eggs is a cold-weather favorite of Mary Jane Hess, food specialist of the University of Idaho extension service. It has the Mexican name "Huevos Duranguenses," and it has a tang of peppers and onions to go with its nationality.

This is the recipe for four servings: Two tablespoons butter; two green peppers, cut in strips; one small onion, freshly chopped; one-half cup canned tomatoes or juice; salt and pepper to taste; two tablespoons flour; two cups milk; one-half cup grated cheese, and eight eggs, hard cooked and sliced.

Melt the butter, add peppers and onion and cook slowly. Add tomatoes and mix. Mix flour with one-quarter cup of milk and add to the mixture. Add rest of milk, salt and pepper to taste. Simmer five minutes so flavors blend. Add grated cheese. Serve hot over sliced eggs.

Announcement
There will be an executive meeting at 7:15, before P.-T. A., next Monday evening, at the Kendrick school. All members of the committee are asked to please plan to attend, as it is important. — Mrs. Russell Perkins, president.

Cheese of all kinds at Blewett's Grocery-Market, Kendrick. adv.

FIX RIDGE ITEMETTES

Mr. and Mrs. Henry Galloway and family visited with Mr. and Mrs. Newt. Morey and family Sunday afternoon.

Mr. and Mrs. Richard Benjamin visited in Princeton Sunday with Mr. and Mrs. Murray Benjamin.

Loyal Weber has moved from the Arnett ranch to Juliaetta.

Mr. and Mrs. Oscar Slind entertained with a waffle supper Sunday evening for Mr. and Mrs. John Johanson, Mr. and Mrs. W. L. McCreary and Mrs. Estella Leith.

Mr. and Mrs. R. L. Blewett and son Billy and Mr. and Mrs. Norla Callison and son Bobby called in the E. H. Jones and Ed. Halseth homes on Sunday.

Enjoys The Gazette

Accompanying a subscription remittance comes a note from Mrs. Minnie B. Wetmore at Pasco, Wash., that says in part:

"Still can't get along without the weekly from home. I'm always interested in the weather there and the doings of my old friends. We've had very little rain and mild weather with a lot of sunshine, and no freezing as yet — but January may bring something else."

THURBER'S

INTERESTING HAPPENINGS IN THE LINDEN AREA

Christian Endeavor

The Christian Endeavor Class of the Gold Hill church attended a "Youth for Christ" meeting at Lenore Sunday evening. Seventeen young people and their parents from here attended.

Film To Be Shown

Following Christian Endeavor Sunday, Jan. 16, "Sunday School Johnson" will present a film on the "Gallilian Home for Children." Everyone is invited.

Sunday School Election

Sunday School Election will be held during the Sunday School hour at the Gold Hill church this coming Sunday, Jan. 16th.

Friendly Neighbors Club

The Friendly Neighbor Club held its first meeting of the new year at the Dan Kechter home, with Betty Kechter, president, presiding over the business session. The year's program was planned by the group which will prove most interesting to all.

Delicious refreshments were served by the hostess.

Cedar Ridge 4-H Club

The Cedar Ridge 4-H Club met Saturday afternoon at the James Holt home. Main order of business was the election of officers for the coming year. Elected were: Ronnie Craig, president; Lee Grinolds, vice president; Judy Cuddy, secretary-treasurer; Doug, Pederson, reporter; Gene Perryman, Council delegate; Ellen Weaver, song leader; Jerry Pederson, demonstration leader.

Judy Craig gave the demonstration on how to make a "babushka."

Division I and II of Sewing learned to darn stockings, and Cooking I and II practiced judging cookies.

Refreshments of cookies and cocoa were served by Mrs. Holt and Mrs. Craig.

The next meeting will be on Feb. 12, at the Ted Grinolds home.

General Items

Dick Parsley, who suffered a heart attack Monday of last week, was taken to the St. Joseph's hospital Friday by ambulance. Latest report is that he is somewhat improved, though still seriously ill. All wish him a speedy recovery.

Mr. and Mrs. Dale Hughes and family and his mother, of Lewiston, were Sunday afternoon and evening callers in the Gil Erlwine home.

Mrs. Arley Allen is visiting this week in the Archie Garner home at Juliaetta.

Tuesday callers in the Ray Cuddy home were Mrs. Rollin Armitage of Southwick; Mrs. James Holt and son Stephen, Sylvester Konen and Phil Bahr.

W. M. A. will meet Thursday afternoon with Mrs. Al. Pederson. Everyone is welcome.

Helium Effect on Living Organism Reported at U.C.

Helium, argon and possibly other inert gases—gases which do not combine chemically with other elements—are far from inert in their effect on living organisms.

This is reported by Dr. S. F. Cook, professor of physiology in the University of California school for medicine.

Dr. Cook has completed experiments in which he studied the reactions of small animals living in an artificial atmosphere consisting of oxygen and helium, or of oxygen and argon.

The artificial atmosphere contained the same amount of oxygen found in the normal earth's atmosphere—about 20 per cent. But nitrogen, which forms nearly all of the remaining 80 per cent of the earth's atmosphere, was removed and the inert gas substituted in this same proportion. The ordinary atmospheric pressure of sea level was maintained.

When helium was used in such an atmosphere, the physiological processes of mealworms, lizards and mice were markedly changed. Similar, but less marked, changes were observed when argon was used.

The principle effects of the two gases were retardation of growth in the animals and an increase in the metabolic rate—a stepping up of the pace of work done by the body in the living process.

The research indicates that it may be useful to substitute helium for nitrogen in air used by men working in some tunnels, underwater construction projects, and some other conditions of high pressure.

Hard Pad Canine Disease Gives Dog Owners Scare

A serious distemper-like infection that leads to hardening of the foot pads and nose is being seen in American dogs, but there is no evidence that it is a new disease or that it is becoming more prevalent.

Alarming reports from England, where the so-called hard pad condition is reported to be widespread, have made many United States dog lovers overly fearful of the disease.

Thickening, hardening, and peeling of the foot pads and nose sometimes occur in advanced stages of distemper or distemper-like illness, but this condition always is seen in company with other symptoms—never alone.

Among theories as to the cause are:

- (1) The canine distemper virus may undergo a change, under certain conditions, that causes it to produce symptoms that differ from those seen in typical distemper cases. "Hard pad" may be one of the symptoms so produced.
 - (2) In some cases, the pure distemper virus—which causes fever, respiratory distress, and diarrhea—may be accompanied by a second virus that brings on the changes in foot pads and nose.
 - (3) The severe illness caused by distemper or complicated distemper can lead to a temporary nutritional deficiency and loss of body fluids that may account for the thickening and hardening.
- Immunization with biological products is the best means of preventing distemper and the hard pad condition.

New Course in Science

A revolutionary approach to the teaching of science which combines all the sciences in a single course emphasizing their relationship to man was described to the 118th national meeting of the American chemical society held in Chicago, by Dr. John Xan, head of the department of chemistry of Howard college, in Birmingham, Ala. Taught without a text, the course is designed to give students a broad acquaintance with the modern scientific world and an effort is made to stimulate their interest in scientific discoveries and periodicals by basing examinations mainly on knowledge acquired outside the classroom. Dr. Xan reported. Ninety to 95 per cent of students finishing the combined general science course have voted for it in preference to the conventional type of science course.

"Candling" Eggs

Candling is used on practically all eggs before they reach the stores. An electric light is placed inside a box with a hole about the size of an egg, in which the egg is placed. In a darkened room, with some practice, it is possible to detect cracks, blood spots, developing germ and the size of the air cell. The latter is the most important criterion of freshness because it gets larger as moisture escapes and is replaced by air. By comparing a few eggs known to be fresh with others that are older, one may learn how to judge the size of the air cell and the age.

Changing "Hand-Me-Downs"

Giving "hand-me-downs" a new and different color via the dye-bath is one sure way of getting little sister or brother to wear them without resentment. Adding a hem, collar or belt will still further accentuate the "new look." Wash and thoroughly rinse all articles before dyeing, and also remove buttons, buckles and trimmings. Use color remover first, the bureau counsels, when the article is unevenly faded or spotted and when changing to a different color.

Step-Ramp Loading Chutes Are Safest

Many Livestock Yards Are Remodeling Ramps

Livestock markets across the nation are continuing in their program of modernization and the installation of step-ramp chutes to replace old wooden chutes that cause great damage to animals.

Cattle prefer steps to the old-style cleats. Many animals are injured and much meat lost from bruising due to the constant prodding necessary to get the animals up and down the old ramps, cattlemen have reported.

The Chicago stock yards recently opened 12 of the modern step-ramp chutes. Of concrete and steel construction, the new chutes are designed to ease the task of unloading stock, and insure safe and

efficient operations. Galvanized steel fencing and grates add to the safety features of the dock area. Waffle-grid concrete floorings provide safe footing for animals during the penning process.

The first truck to unload over the ramps brought 24 head of Hereford and Angus steers shipped by Carroll Snola of Onslow, Ia.

Cracked Corn Found Best Feed for Suckling Lambs

Tests made at the University of Kentucky experiment station indicate cracked yellow shelled corn is the cheapest and best ration for the creep-feeding of suckling lambs.

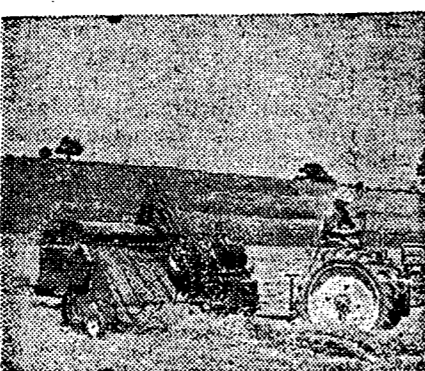

Experiments carried on over a period of nine years compared cracked yellow corn with mixtures of feeds. These included cracked corn, crushed oats and pea-sized linseed oilmeal; cracked-corn and commercial milk substitute, and a third ration composed of "sweet feed" made of corn, oats, bran, linseed oilmeal, molasses and salt.

The experiment was conducted under the most controlled conditions possible. Kentucky educators reported.

The conclusion of the experimenters: "None of the three more costly mixtures showed any consistent or significant superiority to corn alone in rate of gain, efficiency of gain or market finish of the lambs."

The experiments were not designed to answer the question of whether creep-feeding pays, but rather to determine what rations are best for creep-feeding under Kentucky conditions.

Baler

This automatic baler is a good example of how machinery is saving manhours on the farm. The baler can package a ton of hay in less than half the time needed by hand methods. With only the tractor driver in the field, this machine automatically picks up hay, slices it, presses it into compact packages and then ties the bale with two strands of twine. Further information is available at local machinery dealers or in the local hardware stores.

Rice Is Most Important Food in the World Today

Although most Americans believe the statement exaggerated, rice is the most important food crop in the world today. It is the basic food of more than half of the world's population. In recent years the cultivation of rice has increased in this country, but in Asia it is the important crop because it is virtually the only food millions of people have—their means of sustaining life.

Ask for More Trained Men For Animal Disease Study

Solution to some of the nation's most costly animal disease is being slowed by lack of highly trained research men.

There is urgent need for giving promising young scientists an opportunity to learn the techniques of animal disease investigation.

The only way this can be done is by a long range fellowship program.

Such a program has been sponsored by the AVMA for the past six years. Under this program, which will be expanded as funds permit, research-minded graduates of colleges of veterinary medicine get financial aid to engage in animal disease studies at leading scientific institutions. This gives them background and experience needed for unraveling highly complex diseases.

Many livestock and pet owners who ask for "more research to solve disease problems" have given too little thought to how the job might be done.

Finding out what causes a perplexing animal disease isn't much different from tracking down a dangerous criminal, and neither is a job for anyone but a well-trained person.

The Federal Bureau of Investigation would not put a man on any of its cases without first training him in FBI methods. The same advantage should be given to people interested in disease investigation.

Funds for expanding the fellowship project should come from private sources rather than the federal government "because the nation already has gone too far toward dependence on federal hand-outs."

Mastitis Germs Live 5 Days on Broomstick

Harmless though it may look, that broom in the corner of the barn might be the means of starting a new case of bovine mastitis.

The germ responsible for most cases of bovine mastitis can stay alive for as long as 20 days on objects around the barn, and for as long as 26 days anywhere on a cow's skin. From these jumping-off places, the germ can eventually get into a cow's udder, where it starts the disease known as mastitis.

Survival time of the germ was observed after mastitis-infected milk was poured on manure, hair, wood, bricks, udder cloths, and other materials commonly found or used around dairy barns.

The germ stayed alive for 4 days on rubber boots, 5 days on a broom handle, 7 days on an udder-washing cloth, 8 days on a bucket, 13 days on hair, and 20 days on hay. However, when some of these objects were treated with a disinfectant before being smeared with infected milk, the germ didn't do so well. Enough of the disinfectant lingered to cut down the survival time to a day or less.

This research emphasizes the need for clean barns, clean cows, clean attendants, and prompt disinfection of any object that gets splattered with milk.

Use of Columbium

John Winthrop, Jr., who supervised the construction of America's first successful blast furnace at Saugus, Massachusetts, in 1643, found an unidentified rock fragment near his home. About 150 years later, an English chemist, Charles Hackett, saw this fragment in the British museum, analyzed it, and thus discovered the element columbium. Today, this element is playing an increasingly important part in the manufacture of stainless and heat resistant steels for such uses as jet aircraft engines.

Columbium is one of the most recent elements to find use in the steel industry. It was used commercially as an alloy in the 1930's, although experimental work had been done with it as early as 1920. Last year 832,000 pounds of columbium metal was consumed in the manufacture of steel.

Origin of Camouflage

The origin of the word camouflage has, it seems, been lost in the shuffle. One of the stories told in connection with it is that, during the Indian troubles in the Southwest, one Jacques Camou built a circular mud fort. This fort had large square openings at regular intervals around the walls. Through these, the garrison of the fort would fire. As the Indians' shots also found their mark through these openings, Camou painted the entire fort like a checkerboard—with large black squares on a white field. This confused the Indians so they were unable to determine at which dark squares to aim.

Thermal Snow Removal

Thermal snow removal from sidewalks and driveways by means of embedded piping is a new and interesting development in the heating industry. The snow is removed automatically and without effort by the heat from pipe coils installed under the surface of the pavement. Hot water, circulated through the coils, transfers its heat to the pavement, thus melting the snow and keeping the surface dry. Automatic snow removal is economical. There is no necessity for using snow shovels or chemicals. All the owner does is to turn the switch to start the system in operation when the snow begins to fall.

Gun Safety Is Important

I wonder how many parents who buy guns for their sons this Christmas will realize that what the child does with his toy gun is forming habits that probably will affect the way he handles real guns later on. I don't mean, of course, that he will wave a .30-06 in his hunting partner's face, shouting: "Fall down, you're dead." It isn't what a person intends to do that causes accidents—it is what he does unintentionally. And a child who is taught to handle a toy as if it were a real gun is much less likely to shoot his first hunting partner than the one who handles a gun as if it were a stick of wood.

What better time is there than the weeks after Christmas for parents, teachers, or sportsmen's clubs to concentrate in gun safety training for youngsters—or for anyone who has a new gun to practice? Write the Idaho Fish and Game Department, Boise, for a pamphlet on "The Ten Commandments of Safety" to help with this training. — Ross Leonard.

Attention Farmers

I want to say a few words about my business—the building of the—

AIR-FLO GRAIN SAVER FOR COMBINES

Which Has Proven To Be EXCEPTIONALLY SATISFACTORY!

Do not compare these new units with any former AIR-FLO I built or any you have seen so far. It took me three years to make a perfect unit, and what I would like to do is sell the 200 I will build this year around close to Craigmont (100-mile radius) so that I can personally see that the units are correctly installed—and over half this number is already sold. If several will order from the Kendrick area, I will supervise the installation FREE! I know that when these units are put on right they work! If not put on right, you might as well hang them on a fence post as the combine!

I guaranteed every unit I sold last year to be absolutely satisfactory—and none came back. All were more than pleased. If you are in doubt, come up here and I will take you to farmers who own them. Sales talk was always cheap—but farmer to farmer talk "has teeth in it!"

The new auger I built has been used only on the Deere 55 to date—but I can put it on any combine which has a grain "drop off"—where grain can drop into the trough in which the auger lies—such as the new Massey 90, Case and Oliver. All machines with flat bottoms must have the AIR-FLO. Both of these devices are on combines in this area which operated all of last fall. Come over and talk to the farmers who have used them.

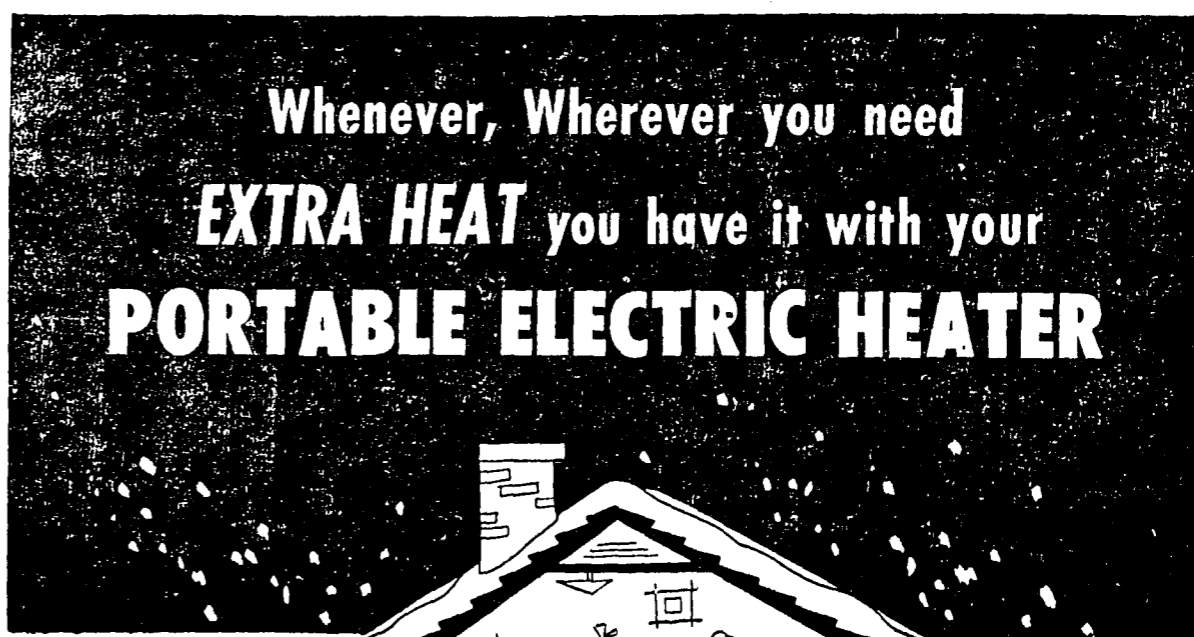

If these units did not work satisfactorily I certainly could not sell any here at home (Craigmont)—but most of my orders are from here right now!

W. F. BEHRENS

F. M. LONG,
Notary Public.

(SEAL)
My commission expires Jan. 27th, 1956.

All-Federal Power Loses Point

The federal-power, high-dam advocates have two strikes on them as the game now stands: (1) Congress has never been willing to vote the needed millions for a high Hells Canyon dam, and (2) the Federal Power Commission has recommended a license to private power for three low dams in that area.

The commission is not likely to reverse itself without some indication that the new, narrowly Democratic Congress favors what a previous Democratic Congress didn't favor in this field.

NOTICE OF MEETING

Notice is hereby given that the regular meeting of the shareholders of The Farmers Bank, Kendrick, Idaho, will be held at the office of the corporation in Kendrick, Idaho, at 3:00 P. M., Tuesday, January 25th, 1955, for the purpose of electing a Board of Directors to serve for the ensuing year, and the transaction of such other business as may properly come before the meeting.
A. O. KANIKKEBERG, Cashier.

NOTICE OF ANNUAL MEETING

Notice is hereby given that the Annual Meeting of the Latah County Farmers Mutual Fire Insurance Company will be held in the company's office in the Dutchie Building at Troy, Idaho, on Tuesday, the 11th day of January, 1955, at 1:00 o'clock P. M., for the purpose of electing three directors for a term of three years, and one director for a term of one year, and for the transaction of such other business as may come before the meeting.
Dated at Troy, Idaho, this 16th day of December, 1954.
H. PAULSON, Secretary.

The partnership idea, under which local public and private agencies will be welcomed as participants in financing power projects, is likely to appeal more, rather than less, to a growing eastern sentiment that eastern taxpayers have been hit hard enough in providing power for western areas. The western areas are going to welcome the chance to finance and control their own power development.

In their emotional contention that lack of federally developed water power is the sole key to further industrial development in the west, the federal-power advocates seem to be overlooking the fact that steam power is still, and will be increasingly, the main source of electrical energy. This, however, is not overlooked by those responsible for our power policies.

The evolution of atomic energy and, possibly, solar-supplied energy is going to provide a lot of new facts which will affect the power policies of the future. — Albany (Ore.) Democrat Herald.

Synthetic Sow's Milk Is Used Successfully
3,000 Piglets Raised On Experiment Formula

The development of a synthetic sow's milk, made possible by the wonder drug terramycin was announced recently by Herbert G. Luther, research scientist associated with the Pfizer & Co., laboratories of Brooklyn, N. Y.

The formula, called Terralac, was tried on 500 piglets at the company's laboratories. In addition, 3,000 piglets have been raised successfully

Piglets on test in the laboratory of Chas. Pfizer & Co. For this photograph the front of each of the top two cages has been removed. Bottom shows normal setup.

without sows on several large pig farms which cooperated in the testing of Terralac.

Luther contends the formula may revolutionize the swine-raising industry. In the first place, his experiment reduced infant pig mortality to an astonishing 5 per cent, as contrasted with the national average of 21 to 33 per cent. It also largely solves the problem of the runt, long a bane to hog-raisers, by making growth-stimulating terramycin and milk equally available to all pigs in the litter.

Luther emphasized that good pig farm management is essential for the successful use of Terralac. Constant temperature must be maintained, either via the use of heat lamps or by blowing warm air. And it must be prepared properly and fed at regular intervals.

Average U.S. Farm Bigger As Number Falls

The Bureau of the Census reports a decided trend toward fewer but bigger and better equipped farms between 1940 and 1950.

The number decreased by 713,000 in the decade, the bureau reports, but the average size unit grew from 174 acres in 1940 to 210.5 acres in 1950. There were 5,384,000 farms in 1950, against 6,097,000 in 1940.

The sharpest decrease came in the five years between 1945 and 1950, when the number of farms dropped by 475,000.

Other statistics in the report included: About 870,000 fewer persons were working on U.S. farms in 1950 than in 1940.

Less than one-third as many horses and mules were on farms in 1950 as in 1920.

In 1950 there were 59,764,000 cattle and calves more than 3 months old on farms as compared to 60,674,736 in April, 1940.

The number of chickens on farms was 2,500,000, or 0.7 per cent more than in 1940.

Plenty of Pull

One of the newest aids to farmers is the power curve tire developed by B. F. Goodrich engineers to provide maximum traction and prevent bogging down of heavy tractors and combines in the sticky mud or sandy soil of rice fields. The tire is reported to be the first suitable for use in all types of soil used for growing rice.

Veterinary Group Sets Up New Defense Committees

A nation-wide network of defense emergency committees has been set up by the veterinary medical profession to help safeguard this country's livestock health and food production in case of war, the AVMA reports. The committees will assist on defense measures in case of biological warfare, atomic warfare, atomic blasts, or other wartime emergencies concerned with the nation's animal population.

Foresee Billion Barrels Jet Fuel from Oil Shale

Jet engine fuel by the billions of barrels can be produced from the Green river oil shale formation in northwestern Colorado, Dr. J. D. Lankford, acting chief, of the United States bureau of mines oil-shale demonstration plant in Rifle, Colo., reports.

Low cost oil shale mining already has been found feasible, Dr. Lankford says, and he predicts that the present trickle of 100 to 300 barrels of gasoline and Diesel fuel from the formation will become a mighty torrent as techniques improve.

"It is estimated that 88 volume per cent of the crude shale oil could be converted into a hydrogenated product containing a premium Diesel oil and a high-quality jet fuel practically free of sulfur, oxygen and nitrogen compounds," Dr. Lankford stated. "If desired, the hydrogenated material could be converted easily to gasoline by standard petroleum refining processes."

"The United States bureau of mines oil-shale demonstration plant at Rifle, Colo., is engaged in an integrated research and experimental program to point the way toward the development of a tremendous natural resource, oil shale, for possible wartime emergency and for the ultimate peacetime production of liquid fuels by private industry.

"Billions of barrels of liquid fuels are potentially available from the oil shale of the Green river formation of northwestern Colorado. Research and development work will be necessary over an extended period of time to bring this great natural resource to the stage where utilization will be possible."

Pocket Radiation Indicator Developed for Average Man

An accurate pocket-size radiation indicator, so simple that the man on the street can learn to read it after a few minutes' instruction, has been developed at the atomic energy project on the Los Angeles campus of the University of California.

The device was developed by Dr. George V. Taplin and Clayton Douglas of the U.C.L.A. medical school's atomic energy medical research staff.

It measures radioactivity by a color change of chemical solutions in small vials. The chemicals are inexpensive, and it is estimated that the instrument could be produced on a large scale very cheaply.

The vials fit into a compact case about the size of a pack of paper matches, which could be worn around the neck like G.I. dog tags. They also could be adapted to a pencil-like container for the pocket.

The new radiation indicator was specifically designed to measure large doses of gamma and X-rays immediately after an atomic blast. It also lends itself to the development of important peacetime applications, says Dr. Taplin. For example, it could be useful in the calibration of such radiation equipment as fluoroscopes and X-ray machines. It might be used to measure radiation from radio iodine absorbed by the thyroid gland in treatment of hyperthyroidism.

Origin of April's Fool

It was the habit of observing July as the beginning of the year that is said to have started the whole idea of All Fools' Day. From its reputed origin in France, it quickly spread to other countries. We have such varied terms as the English "noddies, gawbies and April gobs," the French "April Fish," and the Scottish "April Gowks." While there are other theories about April Fool's day, the calendar story located by research librarians with Childcraft seems that when King Charles XI of France adopted the reform calendar in 1564, many Frenchmen refused to go along with the new January 1 New Year's. When they continued to celebrate on July 1, they were made the butt of countless jokes—receiving mock party invitations, fake gifts, and pretended ceremonious visits of congratulation.

United Nation's Building

Along the banks of East river on the Island of Manhattan between 42nd and 48th streets the Secretariat building of the United Nations is towering to the sky as workmen are rushing it to completion so that it can be occupied before the end of the present year. The structure will be 39 stories high. It is one of four units that will complete the headquarters as a "workshop for world peace." Contracts for the other three units have not yet been let but it is believed they will be completed during 1951.

Suggestion for Farmers

The average farmer spends 50 per cent of his time around the farmstead. This can be materially reduced by piping water to the point of use rather than carrying it. For example, consider what carrying water to a flock of laying hens involves. If the water point is 60 yards from the hen house, as it is on many farms, the farmer will carry approximately 10 tons of water a distance of 25 miles per 100 hens per year in addition to walking another 25 miles to the water point.

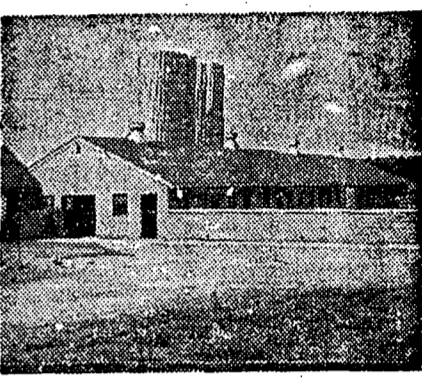

Low Cost Essential For Farm Building
Concrete Blocks Filling Farm Construction Needs

Concrete blocks are being used more and more in the construction of farm buildings, according to American Builder magazine.

They have been found very serviceable for dairy barn construction, low in first cost and in upkeep.

Attributes that contribute to concrete's value as a building material on the farm are its durability, cleanliness, and weather and insect

Dairy barn of concrete blocks and with a roof of fire-resistant asphalt shingles provides an efficient structure low in cost and in upkeep.

resistant qualities. Concrete foundations, masonry unit walls, concrete floors, and precast floor joists can be utilized to construct enduring farm structures and to repair old ones.

If a dairy barn is well-constructed and insulated, body heat of the cows would keep interior temperatures at 45 to 50 degrees in almost any kind of weather.

Lightweight aggregates in monolithic concrete or in masonry units, vermiculite floors and underlayers, hollow core walls, and masonry units with granular loose-filled cores all have qualities that can contribute to the efficiency of rural buildings.

Less Than Half of U.S. Farm Homes Have Baths

Less than one-half of the more than 4,000,000 farm homes have baths and only half of the rooms are heated, a study of rural housing accommodations revealed.

Excessive standardization to relieve early postwar housing shortages resulted in the building of mediocre farm homes of rectangular, box-like design with too small rooms, too little privacy and absence of adequate plumbing and heating facilities.

However, under impetus of a U.S. department of agriculture program, farm house plans have recently been developed that are expected to fulfill the fundamental requirements. The new plans call for space, equipment and storage facilities in proportion to the number of persons in the family.

Coupled with the benefits of a 10-year electrification program that has brought electricity to 75 per cent of the farm homes, this new home designing will open an untapped market for manufacturers of automatic equipment and home appliances.

Pull Out the Car

STAKE OR TREE
ROPE
ROAD

Although most farmers these days live on a hard surfaced road, there may be an occasion when it would be necessary to pull a car or tractor out of a ditch. The above illustration shows how to get out of that ditch with the least amount of effort. A tow rope hitched to the front end of the car and tied to a stake or tree at right angle at the side of the road, will give you the leverage to get out of almost any place without help.

Crested-Wheatgrass Seed Production Reported Up

The 1950 production of crested-wheatgrass seed is estimated at 5,330,000 pounds of clean seed. This is 5 per cent larger than the 1949 production of 5,090,000 pounds. Larger crops than last year reported for North Dakota, South Dakota, and Montana, more than offset the smaller crops indicated for Nebraska, Colorado and Washington. The Colorado crop was near failure in 1950.

SCHOOL NOTES

recovering and scoring. Genesee was on top 64 to 34 when the buzzer sounded for the end of the game, an easy victory for Genesee. The score by quarters: First, 21-4, Genesee; half, 33-13, Genesee; third, 42-14 Genesee; final 64-34, Genesee.
High point man for Genesee was Danielson with 12. Charles Havens led the Tigers with 11.

Tigers Bow To Bulldogs
Last Friday evening the Genesee Bulldogs showed the Kendrick Tigers that their bark wasn't worse than their bite. The Tigers' bite seemed to be more than they could chew and they went down to defeat 63-51.

There wasn't too much scoring in the first quarter, and it took both teams some time to get warmed up enough to hit the basket. After Genesee got warmed up, however, they began hitting long shots from everywhere on the floor. The Tigers were unable to connect to any degree, and the quarter ended 13-6 in favor of the Bulldogs.

The second period of play remained fairly close, with Genesee enlarging their lead by just one point, the half ending 27-19 in their favor. The Tigers had trouble getting the ball off the backboard.
In the third quarter the Bulldogs tied the Tigers up almost every time they came off the backboard with the ball. The Tigers were really fighting, but it seemed as if the ball simply would not fall through the hoop. In the last part of the quarter Genesee "got hot" and began hitting long shots from way out in the court. The period ended with Genesee leading 49 to 38.

The Tigers really put forth their all in the fourth period of play — but Genesee matched them, basket for basket. Genesee was also very accurate from the foul line, to add a number of points. The final score was 63 to 51, Genesee.

Band News

Friday, January 14, will certainly be a "red letter day" for the Kendrick High School "Swing" Pep Band. For on that evening they have been invited to Moscow to represent the University of Idaho as Idaho's Pep Band. The occasion is the first home conference basketball game when the Vandals will meet the Oregon Ducks. The Pep Band will play for both the Freshman and Varsity games, with the first game scheduled to start at 5:45, and the Varsity game at 8:00.

This is quite an honor for the Kendrick community, as this is the first time a high school has been granted such recognition. Several families have indicated that they are planning to attend the game and help support the band, but if you can't attend, listen in on the radio and give the band your report on how they sounded.

Recipients Of Gifts

The Band and Band Uniform Fund have been the recipients of several gifts this week. Donations to the Uniform Fund have been received from the Kendrick Canyon Klub and the Leland Homemakers Club. A generous "Thanks" for your help.

John Larson of the Mezzanine

Music Shop in Moscow has also given a gift in the form of \$10.00 in music and music supplies to aid the band. These items are now in use by the band, and the music will be used at the next band concert, to be held on March 9.

Tigers Drop Culesac

Tuesday evening the Kendrick Tigers met the Culesac Wolves on the local floor, and Kendrick emerged victorious by a score of 53 to 47. A full account will appear in next week's issue.

W. S. C. S. Thursday

The Kendrick W. S. C. S. will meet on Thursday at 2:00 in the church basement. The topic: "The Family — Stewards of Christian Life," will be led by Mrs. Elmo Eldridge.

Hostesses will be the Mesdames Norla Callison, E. A. Deobald and C. Goan.
A warm welcome is extended to all.

DRIVE WITH CARE — EVERYWHERE — AND ALL THE TIME

There have been a great many slogans published throughout the nation encouraging proper operation of vehicles on the highways. Most of these slogans have been published by persons directly interested in motor vehicle laws.

A new slogan has suddenly sprung up, however, and it can be seen any time you are near a Union Pacific railroad freight train. If everyone who reads the slogan on the side of their cabooses, "Drive with care — everywhere" will practice careful driving, then we will see an improvement in the terrific accident rate in Idaho.

There has been reported so far 238 traffic fatalities in Idaho for 1954. Still, we do not pay a great deal of heed to the situation.

We feel that accidents only happen to the other fellow, so we speed along our way. We close our eyes to the fact that accidents can and do happen to anyone who is careless and they do not pick a certain spot or time to happen. Accidents do not just happen, they are caused by our foolishness or thoughtlessness.

Any driver who thinks he can relax his vigilance any time he is driving, is inviting trouble. We must "drive with care — everywhere," if we are to stay alive.

Our attention has just been drawn to an accident that happened in the eastern part of our state, where a large transport truck ran upon the top of a sedan and rode there for 450 feet before stopping. Someone had taken the situation for granted, and was not watching as alertly as they should. One person was injured in this accident.

Another accident which resulted in injury has been called to my attention. It happened in the western part of our state when a car was coming down a canyon and hit an icy spot in the road, then went out of control into the embankment. Three persons were injured in this accident, and inattention was the cause.

Still another accident has come to our attention from the north central part of the state. Three young fellows were driving along the road at a high rate of speed and failed to make a curve. They ended up in a river, having "skipped" on the water for almost 200 feet from the road. All three lost their lives.

One more accident comes to mind, having taken place in the northern panhandle of the state. Two persons were killed when the driver of one of the cars took the wrong set of lanes on a four-lane highway. He hit the other car head-on and both drivers were killed. Here was an instance where someone thought they could get away with driving when they were not in physical condition to be alert and fast reacting.

North, south, east and west, accidents are happening every day. People are being injured and killed and the destruction of property continues, because drivers are not being careful. Put the slogan: "Drive With Care — Everywhere" into practice, and protect yourself as well as others. — Dwight Crofford.

Safflower Is Success

Safflower can be grown successfully in the lower and middle Snake river valleys, according to Elbert McProud, county agent. He has information on the relatively new crop from Karl Klages, head of the agronomy department, University of Idaho. His bulletin, "Safflower Production," is just off the press. The county agent has copies for farmers.

Safflower has definite possibilities, Klages says. He believes "production of this crop would result in a needed diversification of the agriculture of the area because it would add to the number of cash crops." The plant is a coarse, mostly erect annual, varying from two to five feet high. Most varieties have sharp spines. Seeds are covered by heavy hulls. Oil content of the seeds runs from 25 to 35 percent. Protein ranges from 15 to 22 percent.

The crop is suitable for irrigated areas in parts of southern Idaho and in the Palouse area, but cold weather in the Palouse is a hazard to maturity. The plant is used mainly for feed and for oil. It provides excellent winter feed for game birds when grown for that purpose.

The main requirement for successful production, Klages said, is a fairly long growing season. Safflower likes sunshine. Cloudy days delay the opening of flowers. The plant is fairly resistant to drought. In its early stages it is not a vigorous competitor against weeds. That means fairly clean land should be selected.

Tests with plots at various Idaho places since 1940 show that safflower can take the place of a cereal in crop rotation. Wheat yields following safflower were somewhat higher than they were after a crop of oats.

Klages said the average yield of about 1900 pounds of seed per acre on the university farm at Moscow was satisfactory. A heavier crop is likely in some irrigated areas of southern Idaho.

Tire Squaling To Leave

One of the most familiar aspects of automobile and truck operation may soon be only a memory as major auto and truck tire producers announce the development of squeal-proof tires. That familiar noise of tires rounding a curve, particularly at high speed, or when coming to a sudden stop, is finally being eliminated.

Engineers explain that the ribs of old-type treads cause tires to squeal, as they act like tuning forks and produce the sound when vibrated. The design of the newly announced tubeless tires, which will be standard equipment on many 1955 automobiles, features a rope-like appearance of the two outside ribs on each side of the tread. A new rubber compound, together with built-in stabilizers and the locking action of the ribs on straight runs and around curves, eliminates this vibration and hence the squeal.

The new tires, with 70 percent more skid resistors, "were engineered particularly to provide safety and comfort for passengers and drivers of modern cars with power steering, power brakes, and high horsepower engines," say tire engineers.

THE Bull itin

Published Weekly by the Union Oil Service at Kendrick
W. L. "Bill" Rogers, Editor

HELLO, FOLKS:

Well, here it is "slipping" along toward the middle of January — and "slipping" certainly applies in every way — for more hazardous driving conditions would be hard to find — anywhere.

Now you just can't get away from some "slippage," but a good deal of it can be eliminated by letting us install a set of famous U. S. Royal Mud & Snow Tires on your car, pickup or truck. You'll notice a real improvement in safe driving.

Jim: "Did you give your wife that New Year's lecture on economy you talked about?"
George: "Yes."

Jim: "Any results?"
George: "Yeah. I've got to give up smoking."

Just because it's winter don't think that your car or pickup has to creak and squeak like an old sled. It don't. Just bring it in to us for a grease job with those wonderful Union Lubricants — and notice how smoothly and quietly it operates.

Pa: "Well, John, I hear you are courtin' a school teacher."
John: "Uh-huh."

Pa: "How're you doing?"
John: "Don't know for sure. She marked 14 errors in my last letter."

Phone 1251 and say "Fill up my fuel oil tank" — and we'll do just that. You'll like the clean, hot flame our fuel oils give. If you haven't tried our fuel and service yet — do so today — won't you.

WHAT CAMERON FOLKS ARE DOING THESE DAYS

Card Party Scheduled
A card party will be held at the Ladies Aid Hall on Thursday evening, Jan. 12, at 7:00 o'clock. Proceeds will go to the March of Dimes. Prizes will be given, and lunch served. The public is cordially invited.

Return From Vacation
Mr. and Mrs. James Whiting and Roy Silflow returned last week from a month's trip across the U. S. They visited with Mr. and Mrs. Carlson in Madison, Wisconsin; Mr. and Mrs. Nelson Hoffman in New Jersey, and Mr. and Mrs. Cecil Schoeffler in Cheyenne, Wyoming. Chicago, New York City, Washington, D. C., Detroit and Salt Lake City were among the other cities they visited while away. They brought back with them two new cars and a jeep, and report a very pleasant trip and a wonderful time.

Ladies Aid Meets
The Cameron Ladies Aid held their first all-day meeting of this winter on Wednesday, with Mrs. Theo Meske, Mrs. Ted Weyen and Mrs. Glen Wegner as hostesses.

General News
Mr. and Mrs. Herman Meyer honored their daughter Loeda, and Mrs. Theo Meske on their birthday anniversaries Thursday evening with a dinner. Guests, besides the honorees were Rev. Meske and family, Mr. and Mrs. Walter Koepp and family, Lyle Parks, and Carolyn Silflow.

Saturday evening dinner guests of Mr. and Mrs. Willard Schoeffler were Mr. and Mrs. Ed. Mielke and daughters.

Mr. and Mrs. Ernest Brammer visited with Mr. and Mrs. Henry Wendt Thursday evening.

Mr. and Mrs. Frank Harbert of Kettle Falls, Wash.; Mr. and Mrs. Walter Koepp and Mr. and Mrs. Ernest Brammer were Monday evening visitors in the home of Mr. and Mrs. Kenneth Wilken.

Mr. and Mrs. Fred Newman spent Thursday evening with Mr. and Mrs. Glen Newman, observing Glen's birthday anniversary. Other guests were Mr. and Mrs. Jack Lansing and fam-

ily, and Mr. and Mrs. Maurice Hudson and family.

Mr. and Mrs. Harold Silflow visited with Mr. and Mrs. Glen Wegner Thursday evening.

Mr. and Mrs. Walter Koepp and family were Sunday dinner and evening guests of Mr. and Mrs. Glen Wegner. Mr. and Mrs. Werner Brammer and daughters were Sunday afternoon and evening guests.

Mr. and Mrs. Herbert Schwarz and daughter, Mrs. Ida Stoneburner, Miss Emma Hartung and Mrs. John Schwarz and Lawrence and Ernest Schwarz were Sunday afternoon and evening supper guests of Mr. and Mrs. Walter Dennler on Fix ridge.

Mr. and Mrs. Glen Wegner and family were Wednesday evening dinner guests of Mr. and Mrs. Ed. Mielke and daughters.

Mr. and Mrs. Aug. Wegner and sons Wayne and Vern were Sunday visitors in the home of Mr. and Mrs. Dan Sullivan and family at Teakcan.

Mr. and Mrs. Walter Dennler of Fix ridge spent Sunday evening with Mr. and Mrs. Herbert Schwarz.

Mr. and Mrs. Herbert Schwarz were Tuesday evening dinner guests of Mr. and Mrs. Henry Wendt.

Carolyn Silflow was complimented on her fifth birthday anniversary Saturday evening when her parents, Mr. and Mrs. Marvin Silflow entertained with a dinner. Guests were Mr. and Mrs. Herman Meyer and daughter; Mr. and Mrs. Fred Silflow of Juliaetta; Mr. and Mrs. Ernest Heimgartner and Mr. and Mrs. Harold Silflow and daughters.

Mr. and Mrs. Frank Harbert and sons of Kettle Falls, Wash., are visiting with Mr. and Mrs. Henry Wendt and other relatives.

Mr. and Mrs. Henry Wendt entertained at dinner Sunday in honor of their grandson, Ronald Harbert's christening. Guests were Mr. and Mrs. Carl Koepp and Mr. and Mrs. Fred Silflow of Juliaetta; Mr. and Mrs. Frank Harbert and sons of Kettle Falls, Wash., and Mr. and Mrs. Kenneth Wilken and son David.

Mr. and Mrs. Albert Glenn entertained at dinner Sunday for Mr. and Mrs. Roy Glenn and daughters and Mr. and Mrs. Charles Easterbrook of Kendrick; Mr. and Mrs. Warney May, Jr. of American ridge; Paul Richardson of Juliaetta, and Mr. and Mrs. Wilbert Bruniek.

More Moisture Needed

Farmers were jubilant last week when the snow fell, as it afforded protection against freezing and thawing in the fields, as well as providing needed moisture. All are agreed that in this section moisture reserves are lacking. Farmers say that in unplowed ground the moisture line is about seven to eight inches in depth. In fall plowed, it is approximately 10 inches.

Ponds are very low for this time of the year, although springs and wells are holding up.

Fall-sown wheat is making a satisfactory growth.

Get that fresh fish at Blewett's Cash Grocery every Thursday. Delicious, nutritious. 1-adv

Why trust to luck..

when you can buy a MONY policy to protect your family?

Here's how little it would cost a 28-year-old father who can qualify for this unusual plan. For only about \$5.00 a week he can guarantee his family \$10,000 in cash plus a monthly income of \$100 until his children are grown — if something should happen to him.
