Mrs. Cora Thornton has returned home after spending a week visiting at the home of Mr. and Mrs. G. C. Danforth.

#### School Meeting to Be Held

Of definite interest to those in this District is the voting on the school house program this coming Friday for District 283. There will be a meeting for the benefit of all in the Mr. and Mrs. Ernest Brammer, Mr. district at the Southwick School on Thursday evening at 8:00, according to Mrs. Russell Perkins, 1954-55 president of the P.T.A. While it is a busy season it is never too busy to have the interests of the children for whom we are working in mind and heart. Come on out and ask questions of those competent to answer them so there will be a complete understanding of the school problem, and Friday get out and vote your conscientious and sincere opinions, for the benefit of our children, schools and community.

Register Now for Swimming Class Registration is now open for swimming classes at the local swimming Instruction will begin July 5 and will be held four days a week. There will be classes for beginners,

#### School Bond Issue

People Asked to Restrict Water Use Residents of Kendrick are asked This coming Friday the qualified to limit themselves in the use of waelectors of School District No. 283 er, especialy for sprinkling lawns, will be able to vote "yes" or "no" as according to an announcement made coday by E. M. "Bill" White, village water commissioner. The reservoir to whether or not they want the is getting very low because of hot, and enlarged. dry weather and until cooler weather REMEMBER, if this Bond issue is comes people will have to take it easy on the use of water. If the sit-

going to pass, EVERYBODY who is Ernest Andrews as hostess. eligible to vote must vote. The polls will be open from 8 A.M. to 8 P.M. at the Village Hall in Kendrick. Surely, for the sake of our future citizens of tomorrow, you can take the few minutes necessary to make an X in the space after "Yes". 'The ARE DOING THESE DAYS students in the district want and need the school buildings renovated, and since they are going to be paydaughter of Deary visited Mr. and ing the taxes in a few years anyway, Mrs. Noah Deschamp of Juliaetta on they should have the educational facilities they need now.

#### Details of Building Program

Why does School District No. 283

need a building program? The elementary School at Juliaetta desperately needs additional classroom space. The proprosed building program will provide a three room wing to contain a music room and two classrooms for the first and second grades.

The school that burned at Southwick a year ago last February has never been replaced. True, the stu- Mrs. Herman Schupfer went to spodents have a roof over their heads, kane on Tuesday to meet Beverly but it is far from adequate. This proprosed building program will proproprosed building program will provide a new two room school plus hot

### **Tuberculosis Cost Great—To Nation** And to Taxpayers

NEW YORK-To the taxpayer, tuberculosis means \$600,000,000 a year. That figure represents the cost of finding the cause of tuberculosis, of caring for the tuberculosis patients, of public health nursing for the tuberculous, of health education, rehabilitation, medical research, pensions to veterans with tuberculosis, and assistance to families whose wage earner or homemaker has tuberculosis.

These expenditures are largely from public funds, but also include expenditures of private, voluntary agencies engaged in the fight against tuberculosis. They do not include the cost of hospital construction or the cost of training professional personnel to care for the sick.

To the nation, too, tuberculosis means the loss of 1,000,000 working years each yèar.

The objective of the National Tuberculosis Association and its 3,000 affiliated associations (located in the U. S., Alaska, Canal Zone, Guam, Hawaii and Puerto Rico) is to prevent tuberculosis. With funds raised from the annual sale of Christmas Seals, the tuberculosis associations are trying to make it as difficult as possible for people to "catch" tuber-

One difficulty is that many people with active tuberculosis do not know they are ill and may be spreading the disease without even being aware of their own illness. Approximately 400,000 persons in this country are estimated to have tuberculosis but only 250,000 are known to health authorities.

#### **New Dental Drill** Truly 'Painless'

NEW YORK-The old gag about the so-called "painless dentist" is no longer a gag for millions of Americans, thanks to a new precision dental drill.

The new ultrasonic drill does not cut or drill in the usual sense of the word, but removes the solid matter with miscroscopic precision -drilling by sound wave.

The absence of pain is probably explained by the fact that the drill never gets hot when it is drilling the patient's teeth. Much of the pain caused by standard rotating dental drills is caused by heat from friction.

The new dental drill has a metal head that moves up and down delivering more than 29,000 blo

#### Radioactive Pills Among **Future Atomic Wonders**

of the operation.

NEW YORK-Doctors of the future will carry radioactive pills in their little black bags to treat a variety of diseases.

Such is the prediction made by Dr. Willard F. Libby, recently appointed to the Atomic Energy Commission.

The study of radioactive materials has occupied most of the professional life of Dr. Libby, who invented the "atomic time clock" radioactive dating method. Among the first things Dr. Libby dated by the new technique was wood from Egyptian tombs. He has dated hundreds of samples, ranging from human hair to skin, lotus seeds and Biblical scrolls.

Peacetime applications of atomic energy will repay us for some of our worries, says Dr. Libby, who also predicts new methods for improving plastics by irridation, harnessing of the atom for electrical power, and control of normal day-to-day operations of industrial plants by applications of radiochemistry.

#### Case of Smuggled Whiskey Is Costly

SAN FRANCISCO - A case of tax-free whiskey Herbert L. Engstrom tried to smuggle in from a foreign country cost much more than the local product.

Engstrom, 55, marine engineer on a freighter, paid \$22 for a case of whiskey in a foreign port and tried to bring it into the U.S.

A federal Court assessed the following levies after he was caught: \$16.38 tax on the whiskey, \$16.38 penalties, \$50 fine; \$104.00 fine for the ship's captain for permitting him to bring the whiskey ashore, \$300 for the return of Engstrom's confiscated automobile. Total cost: \$501.16, plus lawyer's fees.

#### No Star Gazing WEST DES MOINES, Iowa-The ceiling in the new West Des Moines Methodist Church is made of standard acoustical board, but the holes aren't in a straight line

-they're scattered. Explains The Rev. H. Henry Teele: The committee chose the kind with the holes spattered across it. Now nobody who happens to glance up when he's in church will begin to count the lines of perforations and forget to listen to my sermon."

### **UN Report Says** Folks Around World **Are Living Better**

WASHINGTON-An insight inte the comparitive living standards of the United States and certain other countries for which statistics are available, and changes that have occurred since the late Thirties, are given in a special study made by the United Nations statistical organization.

In addition to the United States, the countries covered are the United Kingdom, Canada, Sweden, Norway, West Germany, Ireland and Japan. Belgian figures are given only for the post-World War II period. The study is based on the personal consumption expenditures for each country in their respective currencies, and gives a breakdown of outlays for food, shelter, clothing and a selected list of other goods and services. In most cases, the year 1938 is the pre-World War II base, while the latest figures are for 1952.

The study shows certain common tendencies in the personal expenditure pattern in all countries over the last decade and a half. For example, the proportion of total consumption outlays going for food in most countries has risen in the period. Part of this is due to higher prices, but the figures also suggest that people are eating better than before in other countries as well as in the United States.

Another common trend has been a decided decline in the proportion of personal expenditures on shelter, which includes the cost of fuel and light, furniture and household operation as well as rent.

#### 1960: More Pay For Less Work

NOTRE DAME, Ind.-By 1966, Americans will be earning 40 per cent more and buying 40 per cent more but working about five hours less each week, according to a prediction made here by a former presidential advisor teaching at Notre Dame.

Dr. Robert C. Turner, visiting professor in the University's College of Commerce, forecast that within 15 years the United States will have a total national output "in excess of 600 billion dollars" as compared with 365 billions in

A former member of President Truman's Council of Economic Advisors, Dr. Turner said that America's population will be nearing the 200 million mark by 1970. Although the size of the labor force will

grow, hours worked per week will probably decline to about 35, compared with just under 40 today, he said. Turner forecast a level of consumption 40 per cent higher than today, assuming that defense expenditures remain at the same absolute level as now and that other government expenditures and Lusiness investment expenditures maintain the same relative level as at present.

#### Heart Disease, Cancer Second to Accidents

NEW YORK-Only heart disease and cancer cause more deaths than accidents among American men at the principal working ages of 15 through 64. At ages 15 through 39 more men die through accidental injuries than from any other cause.

More than 40,000 accident fatalities each year occur among men under 65.

A leading life insurance company says nearly half of the accidental deaths among policyholders are the aftermath of motor vehicle mishaps. Falls, ranking second as a cause of fatal accidents among the insured men, accounted for one-ninth of the fatalities, and drownings for nearly as great a loss of life as falls.

Altogether, the three leading causes-motor vehicles, falls and drownings-were responsible for about seven out of every ten accidental deaths in this insured

#### Saws Smuggled In **During Open House**

SPRINGFIELD, Ohio - When Open House was held at Clark County Jail recently it seemed everybody wanted to get in-or out-of the act. When guests had departed deputies found three cell bars partially sawed and uncovered a nest of hacksaw blades and crude weapons.

Some 1,000 residents toured the jail as part of a campaign to push a \$495,000 bond isrue for a new jail. Deputies decided to shake down the inmates to make sure nothing had been smuggled in.

Extended Honeymoon

KEY WEST, Fla. — Keith and Joan McDonald, who started a honeymoon trip in March, 1952, from New Zealand by motorcycle, arrived here recently on a ferry from Cuba.

They say they have covered 55,-000 miles in 40 countries on six continents. They planned to continue to Miami, thence to New York, Montreal, Alaska and then back to New Zealand.

### **Culture of East** And West Meet In Puerto Rico

CAYEY, PUERTO RICO-High in the hills of interior Puerto Rico a private and personal good-will campaign is bringing together the cultures of east and west.

Ever since Mitsue Shigeno Klotzbach moved to the Commonwealth with her family a year ago, the area around this picturesque mountain agricultural center has been treated to a taste of

Mitsue is the wife of Kentuckian Carroll L. Klotzbach who had to fight Congress to get her into the United States. She is the first Japanese woman to have been permitted to enter the country after the war to marry an American citizen-and it took a special private law to get her in.

Klotzbach met Mitsue in 1948 in Chofu, Japan, where he was givilian chief of the Army's largest hydroponic farming unit in Japan. When he returned to the states in 1949, his attempts to bring Mitsue to this country were hampered by the fact no machinery had been set up for Japanese nationals and the War Brides Act, pertaining to servicemen, had ex-

pired in 1947. Then living in Florida, Klotzbach took his plea to Governor Spessard L. Holland who introduced the Special Private Law in the Senate. The House passed it on February 7, 1950, and Mitsue soon joined her husband in Wash-

Now, while her husband manages a hydroponic unit being advanced to teach the science to Puerto Rico's farmers, Mitsue dresses herself and two children in kimonos and prepares pungent sukiyaki for visiting guests.

#### Titanium Strong, Stubborn Metal

WASTUNGTON - Titanium, recently added to the United States strategic stockpile, is a real modern "wonder metal" whose potential for war or peacetime industry is equalled only by its problems and contradictions.

Although distributed throughout the world, titanium is found in low concentrations, invariably mixed with other elements.

It is one of the most abundant structural metals in the earth's crust, after aluminum, iron and magnesium. It is light, strong, and resistant to heat, shock and corrosion. Yet its disadvantages, par-

ticularly its tendency to absorb gaseous impurities at high temperatures, make it a stubborn, costly material to process.

Consequently, United States concerns have taken even less than the ten per cent of the limited supply opened to civilians earlier this

The metal is particularly suitable for high-speed, high-flying jets. It, also seems ideal for lightweight tank armor, gun parts, guided missiles and portable bridges. The Navy finds titanium's resistance to salt water invaluable for submarine snorke uses and the Atomic Energy Commission puts titanium to secret uses.

#### Lost Driver Also Loses Wife, Car, Trailer

RICHMOND, Va.-T. J. Richardson of Seattle, Wash., lost U. S. 1 on his way through Richmond to Florida and started a chain of events.

He stepped out of his car to look for a road sign, walked several blocks and lost his way. When he finally found a police station, he reported he now had lost one car, one 18-foot yellow trailer and a wife who couldn't drive.

Police found the wife, car, and trailer-then Mrs. Richardson reported she had lost in the meantime one wallet, a pocketbook, a pair of glasses and a set of false

#### **Best of Six Husbands Turns Sour From Sweet**

DETROIT—Sweet can change to sour awful fast, believes a local Judge.

When Roy M. Roy, 26, won a suspended sentence on a minor traffic violation last May, his wife, Sally, 56, told the court:

"Judge, he's sweet. He doesn't drink or carouse and he's the best husband I ever had. I oughta know. I've had six of them." Recently Roy and Sally were

back in court, Sally as the plain-She tenderly rubbed a bruised

Skillman: "Judge, he's awful. He's ornery and cheap and common. He's the worst husband I ever had."

mouth and told Judge W. McKay

#### Almost Saved It

LOUISVILLE, Ky .- A slip of the mind helped increase the thieves' loot at Robert F. Hughes' grocery

Before Hughes closed his store he put \$500 in a brief case to take home. He forgot the brief case and left it on a counter.

The money and merchandise valued at about \$240 were gone the next morning.

### Town's Volunteer Firefighters Pay For Tough Jobs

MADISON, W. Va.-On one winter's night the volunteer firefighters of Madison jumped out of their warm beds and, dressing as they ran, converged on the fire house. They raced more than a mile to a farm home, extinguished a blaze in the living room and were cleaning up-all within nine minutes.

Madison's firefighters actually pay for the privilege of such service. Themselves unpaid, they pay dues, receiving nothing in turn from their work except the thanks of the 2,000 citizens of Madison. Their uniforms, equipment and fire house and trucks never have cost residents a penny in taxes.

To perform this fiscal miracle, the volunteers have in the past three years built with their own hands a handsome fire house of concrete block and frame construction, and by collecting and selling metal scrap have raised the funds for two fire trucks, an emergency ambulance, the latest in oxygen equipment — a "Pheolator" - for reviving victims of breathing stoppages, and miscellaneous tools and appar-

atus. When the siren goes, day or night, an assortment of citizens converge on the firehouse - a truck driver, a former bomber pilot, a grocer, a printer, the mayor—all bound by a common purpose: To serve the community as good neighbors.

They have to be good neighbors, since they do it for free. Says one volunteer: "You can't pay a man (enough) for getting up in the middle of the night to go out in zero weather, over icy roads, to risk his life putting out

#### Plenty of Uranium Left to Discover

NEW YORK - Uranium prospecting in this country has hardly scratched the surface of the United States' potential, accord; ing to leading suppliers of atomic and geophysical instruments.

In spite of thousands of newcomers already in the field, and the vast new areas already prospected, the North East of the United States is practically virgin territory. Prospectors have been concentrating around Colorado, Utah, Wyoming in the past.

Now full-time and holiday prospectors are finding uranium in New York, New Jersey, Pennsylvania, Virginia, Florida and even in New England. Some of the "hottest" uranium-bearing ore in the entire continent was recently discovered in a New Hampshire stone quarry. The extent of the radioactive vein is being investigated.

Among geologists, the presence of uranium in New England is not unexpected since nearby Canada has long enjoyed the same vigorous interest in uranium prospecting as our own Southwest.

#### Two-Year-Old Survives Near Tragic Accident

LOUISVILLE, Ky. - Two-yearold Philip Ray Hibbs can consider himself mighty lucky after an incident which happened not far from his back yard.

Philip was struck by a train, but suffered only a cut above

his left eye. His mother said the boy unlocked a rear screen door while she was in front of the house. A single railroad track is about 20 feet from the rear of their house.

A moment later Mrs. Hibbs heard a switch engine pulling several cars and heard Philip Ray crying. He ran to her, indicating by gestures that the slow moving train had struck him and knocked him down.

#### Some Days One Can't Seem to Get Ahead

PHOENIX, Ariz.—It seems that some days a fellow can't even make a dime.

A 65-year-old man was held here recently for investigation after a raid on a poker game in a

local park. Detective Gordon Selby said the man admitted overseeing the games for several months, selling packs of cards for 75 cents each, renting table covers for \$5 and charging 25 or 30 cents for a

seat. "What it amounted to was collecting rent off City property," Selby said.

He quoted the man as saying: "I'm just a poor man who has to make a living."

#### Caught Off Guard

BOONE, Iowa-During a talk on firearms before some 200 members of the Iowa State Policemen's Association convention here recently, W. H. Williams, special agent in charge of the Omaha F.B.I. office, asked for a revolver for use in a demonstration.

Not a single one of the officers present had his gun along.

Vote Will Affect Wheat Price

The outcome of the wheat market- LIVE program their support. ing quota referendum on June 25 will affect the price support level and de- LIVE concentrate on the period be-

According to Roy Emerson, Chair-business and recreational travel is at man of the Latah County Agricultural Stabilization and Conservation Second, because traffic fatalities Committee, if two-thirds vote "yes". the support for the 1956 crop will be 76 percent of parity. If more than one-third vote "no", the support will be 50 percent of parity. In any case, support will be available in the commercial wheat area only to those farmers who stay within their farm's wheat acreage allotment.

Another point which wheat area of the part of the year on the support of the year on the support of the year of the traffic deaths occur in less than one-third of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year — the 101 days between the part of the year of the year of the year — the 101 days between the year — the 101 days between the year — the 101 days between the year — the year

Another point which wheat growers should have in mind when they cast their ballot is that if the vote is favorable, marketing quotas will be in effect and those who exceed the farm acreage allotment will be subject to a marketing penalty of 45 percent of parity on their excess wheat. If the vote is unfavorable, marketing quotas will not be in effect and there will be no penalty for excess wheat.

Acreage allotments will be in effect for price support purposes even if marketing quotas are disapproved.

Chairman Emerson emphasizes that the marketing quota program applies only to wheat growers in the commercial wheat states who will have more than 15 accres of wheat on any one farm in 1956. Idaho is a commercial wheat state. Marketing quotas do not apply to wheat growers in states designated as non-commercial and there will be no referen-dum in those states. In the commercial states, only those growers who will have more than 15 acres of wheat for grain in 1956 will be eligible to vote. For the 1956 crop, the non-commercial states are Alabama, Arizona, Connecticut. Florida. Louisiana, Maine, Massachusetts, Mississippi, Nevada, New Hamp-shire, Rhode Island and Vermont.

#### -H'ERS WILL PUT MEAT ON TOMORROW'S TABLES

Today, fewer farmers than ever before are feeding more and more people, and the successful farmer must market livestock and poultry faster and cheaper,

New feeds and new methods require greater knowledge and skill in feed-ing, handling and marketing if the livestock operation is to be economically sound, Today's farm boys—tomorrow's farmers—must learn these practices if they are to adequately provide for increasing population

lation.

In 4-H Club work, boys and girls have this opportunity. Last year 530,000 4-H'ers grew over a million head of livestock and nearly 10 million fowl in the 4-H Meat Animal and Poultry projects.

While "learning by doing," 4-H'ers are eligible to participate in National 4-H award programs, which honor members for outstanding achievement in their project work.
