daughters were traveling with him. and 13 grandchildren.

The Wrong David

David Eldridge received the White Elephant at the Homemakers Club party, rather than David Wallace, as

Harvest Time Close At Hand Yes, the golden harvest time is getting ever closer, with one or two combines planning to begin on clover seed

the latter part of this week. In the meantime, farmers have been working early and late putting up hay and preparing combines for the

coming harvest. Some early fields of barley and wheat are beginning to turn — and that means the harvest rush will beon. Some combines have already been working in the peas, and yields in this section, at least, are said to be about half the average.

Beans are looking very well, and farmers with this crop have been busy cultivating them.

HARRY A. BAKER, TEXAS RIDGE PIONEER, PASSES

Harry A. Baker, a resident of the Texas ridge and Kendrick area for impromptu program paid tribute to heart attack on Friday, July 15, the high heat of the day evidently proving too much. Mr. Baker had taken his pickup truck and gone to the Mead & Howard Saumill of the taken his pickup truck and gone to the Mead & Howard Sawmill at the Juliaetta, Lewiston, Idaho Falls west edge of Kendrick for a load of mill ends, and was standing talk-ing to E. R. Brown as a saw was being changed, remarked that he felt the Moscow area made the long trek "rather dizzy" and slumped to the palouse Washington or Lewiston ground. The local fire department re- Idaho, to obtain their flour, Arbuckle susitator crew and Dr. D. A. Christensen were called, but Mr. Baker was dead on their arrival.

Harry Alexander Baker, son of Thomas and Nancy Baker, was born of Mary Minerva McCroskey State Aug. 1, 1879, at Little Falls, Minne- Park, which park honors the pioneer sota. In 1905 he came west to Idaho and began farming on Texas ridge area in 1906. In October of that year he was united in marriage to Winnie will begin at 2:00 o'clock. In the early L. Tout of Deary, and to this union, were born four sons and one daughter. One son, Eldon S. Baker preceded him in death, giving his life for his country in World War II (Jan. of 1945).

In 1944 Mr. and Mrs. Baker moved to Kendrick, where he spent two years working for the Northern Pacific Railway, and he also spent some time doing maintenance work for the local school district.

At the time of his passing, July 15, 1955, Mr. Baker was 75 years, 11 months and 15 days old - although his erect body and alert mind be rushed to St. Anthony's hospital did not indicate such an age. He loved to "josh and kid" with his friends and acquaintences up and A. Deobald Mr. Cherry."

Capt. And Mrs. Mills Visit

Capt. and Mrs. Stanley Mills and diaughters Judy and Nita arrived here is Thursday to visit in the home of her parents, Mr. and Mrs. Ira Hahosts at the hosts at daughter, Mrs. Agnes Brown of Spokane, Wash., also four granchildren, and a host of other relatives.

Funeral services were held Monday afternoon, July 18, in the Kendrick Community Church, with the Rev. H. L. Deweber of the Kendrick Assembly of God bringing the message, assisted by the Rev. F. C. Schmidt. Soloist was Robert Lind, accompanied by Mrs. H. C. Schupfer, who also accompanied a trio composed of Mrs. R. Fifield, Mrs. Bob Smith and Mrs. A. W. Swan.

Pallbearers, old time friends of the deceased were E. R. Brown, Fred Gladen, Paul Lind, Fred O. Stedman, Carl Gustafson and Arthur Fos-

Interment was in the family plot at Out-of-town relatives and close friends attending the services included Mr. and Mrs. Don LaBolle, Ralph LaBolle, Horace LaBolle, Mr. and Bolle, L. A. Mallory, Mrs. Ella Miller give them. Red Cross Blood Drive

of Lewiston,

Mrs. A. W. Bailey, Juliaetta, member of the Red Cross Board, is where he was born in 1888 — but it in receipt of the following letter, which is entirely self-explanatory: Dear Board Member: The Regional Blood Center is asking us to sponsor a one-day summer blood drive, on August 9th. They have set the quota went to Spokane where he attended at 150 pints. We surely hope we can college, and had never been back meet this quota, as we have been since. He admitted he had had a falling a little short the last few

During the month of June our local

laid plans for a future get-together. August 9th may come fairly close Mr. Walker says that even though to the harvest, but because of the he has lived in Maryland since 1915, lateness of the season this date should be all right. The blood drawprefers the Northwest and beautiful ing will be held in the Elks Temple Werner came back Saturday, while Idaho. He wants to come back, and in Moscow from 12:00 noon until if nothing mars his plans he will be 6:00 p. m. Yours sincerely, George S. Tanner, Exec. Sec.

> Twin Daughters Are Born Mr. and Mrs. E. M. Dammarell remarell of Opportunity, Wash., that about "Mike" now having the keys they are the proud grandparents of Mrs. Alice Burch and two of her twin girls, born July 17, to Mr. and Mrs. Don Dammarell.

The above twins were born exactly 24 years (lacking four hours) to the day and hour of the birth of their uncle and aunt, Max and Maxine Dammarell, twin son and daughter of Mr. and Mrs. E. M. Dammarell!

The man who follows another never gets ahead.

STATE PARK DEDICATION

SET FOR SUNDAY, AUGUST 7

Pioneers of the Inland Empire are cocking eyes heavenward, studying the skies, and also weather charts. They won't mind rain around the end of the month, or even the very first of August — but sunshine is their hope for Sunday, August 7.

The formal dedication of Idaho's

Mary Minerva McCroskey State Park, which was postponed Sunday, July 10. due to inclement weather, has been re-scheduled for Sunday, Aug. 7. C. E. Talbott, president of the Latah County Pioneer Association which organization is sponsoring the day's program, announces the latter date promises to prove an even "bigger" day than Sunday, July 10. On that date, despite radio announcement that the dedication had been postponed, over 100 picnickers came, and in an

even Nigaria, Africa.

In pioneer days, homesteaders of the Genesee Valley (Cow Creek) and to Palouse, Washington, or Lewiston, coffee, housekeeping and farm supplies. On Sunday, Aug. 7, reminiscences may be exchanged as pioneers meet in the shade of the tall trees

women of the Northwest.

The formal dedication program, to be held after the noon picnic lunch, morning will be the formal raising of the flag by Boy Scouts, and a program of informal competitive events. The prizes for this are being awarded by the Moscow Chamber of Commerce.

The events are as follows: 1. The best "Barber Shop" quartette 2. The best "Sunbonnet Ensemble." (choir, trio or quartette). 3. The best horse shoe pitcher.

4. The knitter who can knit most proficiently the beginning of a sock in a given interval of time. 5. The picnicker who has traveled the farthest to attend the dedi-

cation

6. The picnicker longest a resident. of the Inland Empire. Everyone is cordially invited to at-

Gounds." SCHOOL BOND ELECTION

Some of the talk that has been heard lately concerning the forthcoming Bond Election is gratifying. Several of the voters who failed to vote last time have served notice that they intend to do so in the one on August, 3rd. The election failed by only 40 votes last time - so your vote is

important. Most of our neighboring communities have tried to keep pace with the times, and have constructed new and up-to-date school facilities. Certainly we are not so poor, in this area, that we cannot afford adequate educational plants for our children. Remember our future citizens and community leaders are today's school children and much of their success depends on the educational opportunities you

Another point to remember is that the students of today are going to be paying the taxes of tomorrow -Mr. and Mrs. Wendell Carlson, Bonner they are going to have to help pay the bill eventually, why should they not be allowed the use of adequate facilities now?

Ask the students about the present school plants (anyone of the three). They are the ones that have to live in them 1,204 hours per year. If the students that have to attend the schools were able to vote, they would pass the issue overwhelmingly.

Exchange Wedding Vows Ila Marie Crawford, daughter of

Mrs. Dave McIntyre, and Edgar E. (Billy) Dammarell, son of Mr. and Mrs. E. M. Dammarell, both of Kendrick, were married in Lewiston on July 14, in the Methodist parsonage. The Rev. Merritt Falkner performed the ceremony in the presence of the young couple's mothers, Mrs. Mc-Intyre and Mrs. Dammarell. Mr. and Mrs. Max Dammarell were the couple's attendants.

Both young people are well known here, having attended Kendrick High school last year. They have taken an

Bank Front' Being Remodeled

The front of the Farmers Bank at Kendrick is undergoing a remodeling at the hands of M. C. Halliday this week. The old double doors were removed, a new, wide glass door installed, and the sides of the opening bricked with glass brick, the whole adding greatly to the appearance of the institution.

During the process A. O. Kanikkeberg underwent considerable kidding to the bank, as it had to be solidly boarded up each night,

Goodly Crowd At Pienic There was a very good crowd present at the annual Lutheran Church

picnic on Big Bear ridge last Sunday - held in Slind's Grove. We might add that a cool breeze was blowing and the temperature was just right. Services were held following the dinner.

Inspection Tour Held Monday

Monday of this week several of the high officials of the Soil Conservation Service made an inspection and tour of Latah county in the official line of duty. Those making the tour were W. R. VanDersal, assistant administrator, SCS, Washington, D. C.; James tor, SCS, Washington, D. C.; James J. Coyle, director of engineering, S. C. S., Wash., D. C.; E. J. Peterson, chief of Safety & Training, S. C. S., Wash., D. C.; James Mallon, office of Sect. Benson, U. S. D. A., Wash., D. C.; R. N. Irving, state conservationist of Idaho; C. Dougal Hole, area conservationist, 10 Northern District of Idaho, and J. Bell area engineer. of Idaho, and L. Bell, area engineer for northern Idaho.

This was a routine inspection of the different areas and of the soil conservation practices applied.

The Latah County inspection tour began at Moscow in the work unit office. From that point John Nicklas, S. C. S., conducted the tour through the Moscow area. From there the group turned north toward Potlatch, where Harold Felenghaur, S. C. S. met the caravan and conducted the tour of that section.

Turning south the group was met by Manning Onstott at Deary, and he guided them across the ridge and through portions of the Kendrick S. C. S. district, to the Roy Glenn home, where all were guests at a chicken

dinner prepared by Mrs. Roy Glenn and Mrs. Manning Onstott. Following the dinner an inspection of the local S. C. S. office was made, and Mr. Onstott again guided them to Troy, where a tour of the Troy and Genesee S. C. S. district areas was conducted by Larry Sorenson.

On completion of the tour the officials took a plane for southern

Mr. Onstott said that comment made was that practices in Latah County were good, and that they wished the eastern farmers would do

Heat Increases Fire Hazard

Rain last week and the unusually heavy July rains this month have kept to a minimum fire danger in the local protective area, according to Henry Jones, deputy state fire war-

"However," warns Mr. Jones, "the hot weather of the past ten days has been bringing about a fire danger that must not be discounted, and logging and slash areas in this section will bring about a real fire danger in a short time - and all are warned to use real caution all the

Observe Birthday Anniversaries

Mr. and Mrs. Max Dammarell had as dinner guests Monday evening Mr. and Mrs. Wm. Brown. The occasion honored both Mrs. Dammarell and Mrs. Brown, whose birthday anniver-

saries fell on the same day. Later in the evening Mr. and Mrs. Edgar Dammarell, Mr. and Mrs. Billy Dammarell, Mrs. Frances Isom and Marion Rowden and family called to extend congratulations, and were served birthday cake and ice cream.

family.

Mrs. Robert Lind and children were visiting Wednesday with Mrs. Norman Logan in Moscow.

Mr. and Mrs. Leon Lind and children of Moscow were week-end guests in the home of his parents, Mr. and Mrs. Paul Lind.

Mrs. Geo. Wilken took Mrs. John Johanson, Mrs. H. C. Schupfer and Mrs. W. A. Watts to Cameron to attend a Missionary Tea at the Cameron Hell The Mrs. Taul Lind and children were week-end guests of the following Monday.

No Further Information
To date, so far as we know, there has been nothing new uncovered on the Wm. Darr murder here, or on the five robberies the following Monday.

A late model Hudson car, which at one time was believed to figure in the case, was released by the Sheriff's office to a finance company — so evidently no connection was discovered with the cases.

Were Well-Will Company — So evidently no connection was discovered with the cases.

Yep, We've Got The Language!
"This we've been waiting for!",
writes Editor E. L. Thompson in his own column in The Onida (S. D)

Watchman.

newspaper office he seemed a little embarrassed and turned and walked out, mumbling something or other to himself. . . When passing in front of the office he hesitated for a moment and looked up at the sign in the window, 'The Watchman'.

No doubt similar incidents have with horological names. By the same to his girl. Wrinkled pants might well find their way to the Press, and especially to the Free Press.

To the strangers in our midst, who are struggling with what we are told is about the most difficult language in the world (outside of Chinese) our idioms must seem slightly idiotic

... just as we know they are in other languages. But sooner or later, whatever the initial confusion, these people learn the newspaper can do more for them than any of the institutions they might possibly mistake it for.

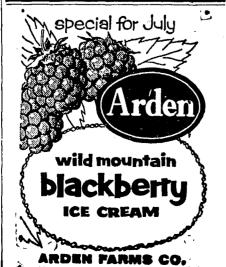

For most, it is the first and most startling symbol of American freedom. — Bob Taylor.

You and the West profit when Standard changes a dollar

\$ 3,293.34

.:\$ 5,409.89

A. O. KANIKKEBERG, Treasurer.

Like you and your family, Standard Oil Company of California has to have money coming in to keep going. And like you, we must divide every dollar of this income into quite a few pieces to keep the bills paid. Our budgeting is naturally on a large scale, but the result is about the same: most of the money Standard takes in goes right back into circulation. And when a sum like \$1,229,000,000 (our total income last year) goes into circulation, its benefits are broad and deep. Practically everyone in the West

shared, directly or indirectly, in Standard's good year. We thank you for your patronage that made it possible. And we'd like you to know that a sizable piece of change from each of our dollars goes for things that improve service to you: research facilities for development of better products at low cost; new plants to make them more available; widespread exploration for new petroleum fields to help keep America's oil barrel full. To do these jobs, now and for the future, here's how we changed a Standard dollar:

If you wish a copy of our Annual Report for 1954, write to-Standard Oil Company of California, Rm. 2162, 225 Bush St., San Francisco, 20, Calif.

STANDARD OIL COMPANY OF CALIFORNIA plans ahead to serve you better

Sugar Is Most Plentiful Compound Nature Gives Us

WASHINGTON-Sugar, one of man's basic foods, made big news twice during the past year-scientists learned how to duplicate it, and the world agreed on how to

Yet so commonplace is sugar that even such headlines are lost. A natural bounty known and sought for thousands of years, it has grown and produced in present form only in comparatively recent times, now ranking as the most abundant pure chemical compound man takes from nature.

Sugar is essential to life. Every green leaf touched by sunlight turns water from the ground and carbon dioxide from the air into sugar and oxygen. Any animal without sugar in its blood will soon drop dead.

Honey, fruits and succulent grasses satisified the ancients' sweet tooth. The origin of sugar cane is lost in the past, somewhere in the Orient. Probably it was first grown by man in India, where ancient legends and then the army of Alexander the Great in 327 B.C. spoke of the "honey-bearing reed."

Today the world produces nearly 40,000,000 tons of sugar in a year, 65 per cent from cane and 35 per cent from sugar beets. Americans alone consume over 8,-000,000 tons. For 30-odd years, per capita consumption in this country has remained nearly constant, averaging a hundred-pound bag per person per year.

Only in late 1953, however, after centuries of trying. did science succeed in making sugar in the laboratory from simpler compounds. And this year 40 countries put into effect an international agreement stabilizing sugar production and world prices.

Unique Treaty Calls Indians Back

FRANKFORT, Ky .-- One of the most unique treaties ever signed by the Indians and white men is commemorated once each year in the little eastern Kentucky town of Barbourville.

Under terms of the agreement, the Cherokee Indians are entitled to take all the cane they want from the Knox County breaks which they use in making baskets and articles at their tribal school in Cherokee, North Carolina. In return for this privilege, the Indians agree to return once each year-all expenses paid-to visit their Barbourville friends. In October of each year, their return marks the beginning of two days festivities known as the

Daniel Boone Festival. Daniel Boone is honored because the trail he blazed into the Kentucky country from Virginia passed through Barbourville . . . the Cherokees because of tribal claims owned the area until 1775 when Boone and Richard Henderson bought all of that part of Kentucky south of the Kentucky River from the Cherokees.

Potash Mine to Have **Longest Conveyor Belt**

STAMFORD, Conn. - A potash mine in Carlsbad, N. M., will soon be equipped with the longest conveyor system in the United States, extending seven and one-quarter miles underground.

The longest conveyor system row in operation is in a western Pennsylvania coal mine, measuring five and one-half miles.

The new, record-length "rubber railroad" will operate 1,000 feet down in a potash ore seam about four feet thick. Continuous mining machines will extract the potash ore from the working face of the mine and deposit it on shuttle type conveyors known as Mine-aveyors, which automatically transfer it by intermediate belts to the main line or "mother" belts. From there the potash will be carried more than five miles to a 3,000-ton underground storage picket from which it will be withdrawn as needed.

'Destitute' Refugee Loaded Down With Cash

BRAMPTON, Ont. - An apparently destitute refugee from Hurricane Hazel applied for admission to the Old People's Home.

Then in an old leather purse among her belongings, an official noticed a bulge in the lining.

The refugee, Mrs. Alice Barlow, said, "It's just some stuffing I sewed in."

The stuffing proved to be \$16,-000 in \$100 bills. Also, there was a bank book showing more than \$4,-000 deposits.

"I'was saving for my old age and for a trip to England," the 78-year-old Mrs. Barlow said, "but I didn't think I had enough money.

Pup Has Big Ears

SAN DIEGO, Calif.—A puppy got his head stuck in the hub hole of a discarded automobile wheel. Mrs. Eleanor Rowe and her four children couldn't get it out.

Sgt. L. C. Earnest of the sheriff's force folded the pup's ears back close and pulled it out by the tail. The ears (Cocker spaniel type) had trapped it.

Scientists Study Camel's Ability To Withstand Fever

DURHAM, N. C.-Two Duke University scientists who headed an expedition to the Sahara Desert have returned with new knowledge of one of the world's most astounding beasts-the camel.

The zoologists are Dr. Knut Schmidt-Nielsen and his wife Dr. Bodil Schmidt-Nielsen, who took their three children with them on an expedition to a desert oasis-500 miles inland from Algiers. The undertaking was financed by the Guggenheim Foundation, UNESCO and the U.S. Government.

Dr. Schmidt-Nielsen says the expedition gathered extensive data on the camel's heat regulation mechanisms, water conservation and kidney function.

The camel can stand increases in body temperature of as much as 11 degrees Farenheit, he says, an increase equivalent to critical fever in man and most animals.

Perspiration in human beings keep body temperature at constant level, the zoologist explains, while the camel begins sweating only after a considerable increase in body temperature and even then does not drip with perspiration. This stinginess with body moisture is one of the reasons camels cam go for weeks and months without. a drink of water.

The camel does not have a special compartment in his stomach, hump or elsewhere for storing water, Dr. Schmidt-Nielsen says, pointing out that the hump consists mostly of fat.

The experimental work included weighing camels by means of a massive scale and canvas sling: analyzing blood and urine samples; and dissecting camels for study of stomach, kidneys, and other organs.

Remote 'Uncle' Not True Missing Link

WASHINGTON - An extremely remote "uncle" of mammals and man still survives after at least 300,000,000 years.

Such is the coelacanth, the ancient fish abundant as a fossili coeval with the earliest dinosaurs, two living specimens of which have been found in the Indian Ocean.

When discovery of the first living fish of this supposedly longextinct group was announced a few years ago, the creature was widely described as a "nussing link." This is far from true, says a report 'issued by the Smithson-

ian Institute. While they may represent a missing link in oneinal condition from which the landdwelling back - boned animals arose) and they do breathe air, they lack one important featurethe ability to breathe air through their nostrils. They could not adapt themselves to the land when their habitats started drying up and found shelter only in the sea. Indications were that they ventured into deeper and deeper water with the millenniums but underwent no major physical change. The refuge of great depths probably enabled them to survive.

Water Heater Potential **Bomb If Not Protected**

CHICAGO - The careful motorist, fully alert to the hazards of driving in heavy traffic, may, without knowing it, be running a far greater risk to life and limb where relaxing in the comfort of his own living room.

He may be sitting over a potential bomb in the basement if the water heater is overheating and building up latent explosive en-

Most explosions are caused by lack of the proper safety controls in the form of pressure and temperature relief valves. Some "protected" heaters may explode if the temperature safety valve has not been checked periodically to insure proper operating efficiency.

Coast-to-Coast Air Miles Shortened

WASHINGTON-On September 30. New York and San Francisco stood 2,600 air miles apart. Now the straight-line flying distance is only 2,260 miles.

East and west coasts have not moved closer together, nor have the airlines found a shortcut. The difference lies in the word "miles."

After five years of preparation, civil aviation in the United States has officially switched from statute or "land" miles to nautical miles: and knots in reporting distances and speeds. Pilots, tower operators and weathermen now use sea language, as military airmen of all branches have done since 1947.

Mauling the Masher

TORONTO-A 72-year-old grandmother told police how to handle men who accost ladies on the street at night.

Mrs. Tonette Fontaine said that when a "heavy-set fellow" grabbed her by the arm as shewaited for a streetcar, she grabbed a rock and hit him "as whack on the head he won't forget" and then got on her streetMerry Tiller®

Army Modernization Program Includes More Helicopters

WASHINGTON - The United States Army is due to have a new 3-D look by mid-1959 and the third dimension will be one of height.

In a modernization program designed to bolster the Army's aviation strength over the next 57 months, plans call for a six-fold increase in Army helicopter strength. In addition, greatly increased numbers of light utility aircraft will go into service for artillery spotting, reconnaissance, command and courier missions, column control, transportation of Army supplies and units, medical evacuation and aerial photography.

Experience in Korea and World War II already has resulted in establishment of a sizeable Army air service. Today, the Army operates 3,300 aircraft, with an additional 600 light planes assigned to the National Guard. These planes give the traditionally earthbound troops vastly improved mobility, freeing both men and equipment from the limitations of muck, mountains, morasses, and roads.

Emphasis will be placed on a build-up of Army helicopter strength, which now stands at less than 200. Under the present setup, most of the 200 helicopters are assigned to six Army transportation companies (each with 21 cargo and two utility 'copters), with the remaining rotorcraft distributed among the Army's 17 divisions.

By mid-1951, the Army's helicopter strength should rise to about 1,200. Twelve cargo battalions (36 companies) will account for 756 cargo and 72 utility helicopters. In addition, 26 to 28 helicopters and 16 fixed-wing aircraft will be assigned to each of the Army's di-

Eye Uses Vitamin A To Help Us See

CHICAGO-What sort of adjusting mechanism allows us to see in near-darkness? Science says it's due to a substance called "visual purple" or "rhodopsin," which the eye manufactures from Vitamin A in the circulating blood stream.

We're temporarily blinded by approaching headlights because light bleaches out the visual purple, turns it yellow, and converts It back into Vitamin A, until the eye makes up a new supply.

The retina at the back of the human eye contains an amazing network of millions of nerve ends,

"cones," because of their different shapes. The rods are spread over the entire surface of the retina, and respond without great detail to light of varying brightness and to form and movement. The cones are in the center only, and respond in finest detail to color, as well as to light, form, and movement. We see mainly with the cones in daylight, when the pupil opening is small, but the rods take over the principal job in dim light, when the pupil is wide open.

Railroads Speeding Up For Faster Travel

WASHINGTON-Railroad timetables are being revised to provide faster train service on major lines, thanks to diesel engines.

In recent tests a new dieselelectric train called the Talgo reached a top speed of 102 miles an hour over the New Haven railroad's shore line. Officials hope to have the new equipment in operation sometime in 1955, maintaining an 85-mile-an-hour average between New York and Boston, which would cut more than one hour from the New Haven's present four-hour running time.

Fastest regular schedule now is the Chicago, Burlington and Quincy Railroad's Zephyr, run between East Dubuque, Ill., and Prairie du Chien, Wis. The train covers 54.6 miles at an average speed of 86.2 miles an hour.

The Illinois Central Railroad averages 81.8 mph. on a 53.2 mile run between Effingham and Cen-

Woman Asks Police to Make It Stop Raining

OGDENSBURG, N. Y.-Except for one entry Patrolman James E. Doe made on the police blotter during a recent rainy day, things were mighty dull.

The entry went like this-"Attention: Mark Twain! At 10:51 a.m. E.D.T. a telephone call was received at this station from a person (female) who refused to offer any identification and who demanded in a stentorian tone that the department take immediate action to prevent further rainfall."

No Ten Per Cent Here DALLAS, Tex. — Mrs. Lucille Gregory, 44, a gray-haired waitress at a drive-in restaurant will confirm the fact that they do ev-

erything big in Texas. Mrs. Gregory said a customer left her a \$151 tip for serving him

a \$1.50 steak. She said a "nice looking man" in his 50's came in during the rush hour. She found the tip under a plate after the man left,

NOTICE OF SPECIAL BOND ELEC- In order to vote at said election a TION WITHIN KENDRICK JOINT voter must be: SCHOOL DISTRICT NO. 283 OF NEZ PERCE, LATAH AND CLEARWATER COUNTIES,

NOTICE IS HEREBY GIVEN that a Special School District Bond Election will be held within the foregoing School District on WEDNESDAY AUGUST 3, 1955, at which election there will be submitted to the qualified taxpayer electors of said School District (who are otherwise qualified and entitled to vote at said election as by law provided) the question whether the Board of Trustees of said School District shall be authorized to issue the Negotiable Coupon Bonds of said School District in the principal amount of not more than \$305,000.00, thereby incurring a school indebtedness in said amount, for the purpose, as expressed in the Resolution of said Board, adopted July 11, 1955, of obtaining funds to provide for and to pay the cost and expense of the following:

> (a) The construction of a two room Elementary School at Southwick, Idaho.

> (b) The construction of an addition to the present school at Kendrick, Idaho, to contain twelve classrooms, the repair of the present building, and the acquisition of land as a site for said addition,

(c) The construction of an addition to the present school at Juliaetta, Idaho, to contain three classrooms, and the acquisition of land as a playground adjoining the same.

and furnishing all of the above with necessary furniture, apparatus and equipment.

Said bonds of not more than \$305, 000.00 shall be of the denomination of \$1,000.00 each, and shall bear interest at a rate, or rates, of not in excess of four and one-half per centum (41/2%) per annum, which shall be payable semi-annually; and said bonds shall be amortized and payable in annual installments, commencing at the end of one year from and after the date of issue of said bonds, and annually thereafter, and the various amortized annual maturities shall, as nearly as practicable, be in such principal amounts as will, together with annually accruing interest on all outstanding bonds of such bond issue be met and paid by approximately equal annual tax levies for the payment of the prin-cipal of said bonds and the interest thereon during the twenty (20) year term for which said bonds shall be issued, and provision shall be made as required by law, for the levy and

collection annually of taxes upon all of the taxable property within said School District, in addition to all other taxes, sufficient in amount to provide for the payment of the interest and to create a Sinking Fund for the payment of the principal of said bonds according to their ma-turities and within the term thereof as stated above.

The Question to be submitted to said taxpayer electors shall be substantially as follows:

"SHALL THE BOARD OF TRUSTEES OF KENDRICK JOINT SCHOOL DISTRICT NO. 283 OF NEZ PERCE, LATAH AND CLEARWATER COUNTIES, IDAHO, IS-SUE THE NEGOTIABLE COUPON BONDS OF SAID DISTRICT IN THE AMOUNT OF NOT MORE THAN \$305,000.00, THEREBY INCURRING AN INDEBTEDNESS IN SUCH AMOUNT FOR THE PURPOSE OF CONSTRUCTING A SCHOOL AT SOUTHWICK, IDAHO; THE REPAIR OF THE PRESENT SCHOOL AT KENDRICK, IDAHO; THE CON-STRUCTION OF AN ADDITION TO SAID SCHOOL; THE ACQUISITION OF LAND AS A SITE FOR SAID ADDITION; THE CONSTRUCTION OF AN ADDITION TO THE PRES-ENT SCHOOL AT JULIAETTA, IDAHO; THE ACQUISITION OF LAND FOR A PLAYGROUND AD-JOINING THE SAME, AND FURNISHING ALL OF THE ABOVE WITH THE NECESSARY FURNITURE, APPARATUS AND EQUIP-MENT; SAID BONDS TO BE AMORTIZED AND PAYABLE IN ANNUAL INSTALLMENTS, COM-MENCING AT THE END OF ONE YEAR AFTER DATE, AND THE VARIOUS AMORTIZED ANNUAL MATURÍTIES SHALL, AS NEARLY AS PRACTICABLE, BE IN SUCH PRINCIPAL AMOUNTS AS WILL,
TOGETHER WITH ANNUALLY
ACCRUING INTEREST ON ALL
OUTSTANDING BONDS OF SAID BOND ISSUE, BE MET AND PAID BY APPROXIMATELY EQUAL ANNUAL TAX LEVIES UPON ALL THE TAXABLE PROPERTY WITH-IN SAID DISTRICT DURING THE LIFE AND TERM OF SAID BONDS; WHICH SAID BONDS SHALL BEAR INTEREST AT A RATE, OR RATES OF NOT IN EXCESS OF FOUR AND ONE-HALF PER CENT-UM (4½%) PER ANNUM, PAY-ABLE SEMI-ANNUALLY, AND THE ULTIMATE MATURITY OF SAID BONDS LAST MATURING SHALL BE TWENTY (20) YEARS AFTER DATE OF ISSUE THERE-OF, ALL AS PROVIDED BY RESO-LUTION OF THE BOARD OF TRUSTEES, ADOPTED JULY 11,

BONDS, YES BONDS, NO Said election shall be held at the following voting places within said School District, viz:

- At the School House in Juliaetta,
- At the School House in South-
- At the City Hall in Kendrick

The voting polls for said election will be open at the hour of 8:00 o'clock A. M., and will remain open for voting until 8:00 o'clock, P. M. on said date, at which time said polls shall

1. A qualified elector of the District: and

KENDRICK

THE SENSATIONAL NEW NUCLIOMETER

MODEL DR-299

THE MOST VERSATILE URANIUM DETECTOR EVER BUILT

The new DR-299 is truly a tremendous step forward in uranium detection. Not only will the instrument detect many deposits previously missed by other, less-sensitive instruments, it can be used to check individual specimens, to make field assay estimations and in airborne survey work.

CHECK THESE AMAZING FEATURES!

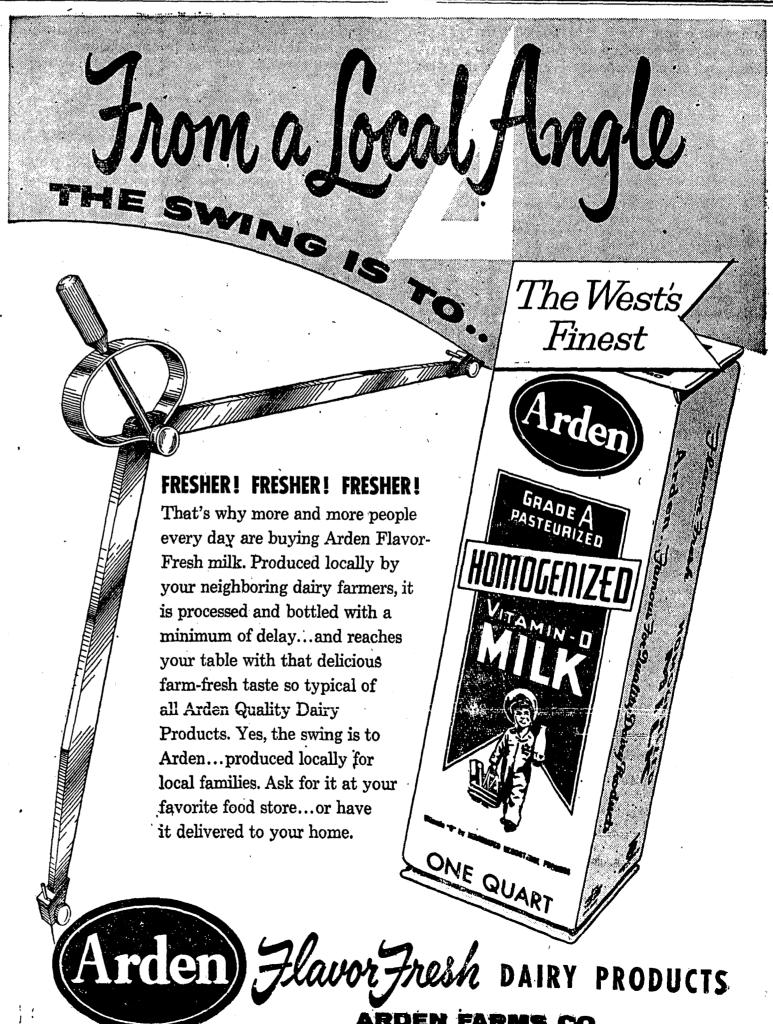

- 1. Reads directly in % of ore (with sample holder provided).

 2. Brobe and cable for use as Geiger
- 3.Much more sensitive than scintillation counters using 1"x11/2"
- Extreme sensitivity (.01 Mr/Hr full-scale). 5. 4 time constants.
- 6. 6 operating ranges
 7. Zero adjustment.
- Simplicity of operation.
- 9. Standardization of parts. 10. Exceptional versality.
- Rugged and compact, (Not affected by heat and vibration).
 Stability of circuit.
- 13. Low-cost operation.
- 14. Grain leather carrying case and shoulder strap. 15. Radium calibration source.
- 16. 90-day parts warranty.

Medical School Enrollments Are Setting New Records

Medical schools of the United States in the last year took further steps to protect the future health of the nation by enrolling the largest

This was revealed in the 51st annual report on medical education in the United States and Canada, comto Hayden Lake, Sunday, taking their piled by the Council on Medical Education and Hospitals of the American Medical Association. The report was prepared by Dr. Donald G. Anderson of Chicago, secretary of the council, and his aides, Dr. Francis R. Manlove and Mrs. Anne

A total of 26,191 students were enrolled in 79 approved schools in the United States for the 1950-51 academic year. This compares with the previous high record of 25,103 in the year before, an increase of 1,088 (4.1%). Since 1941, when there was an enrollment of 21,379 students in 77 approved schools, the increase has been •4,812 (22.5%).

The report also disclosed that the current academic year will see a Salem, Ore.; Miss Naomi Hedal of continuation of this increase in Spokane, Alfred Hedal of New York medical education because of the enrollment of a record freshman class. It is estimated that about 7,400 new students will enter medical schools, compared with the previous record of 7,182 a year ago.

Also important from a future health protection standpoint was a survey which showed plans were under way in many states for the opening of additional medical schools and for the expansion of existing facilities.

"Significant progress is being made toward resolving the financial problems of the medical schools," the report also said. "Funds avail-able to the schools during 1951-52 will total approximately \$109,600,-000, which represents an increase of \$36,000,000 in the last four years.

Psychologist Believes Kids Aren't Bad-Just Problems

There are no "naughty children" or "problem children," in the opinion of one distinguished child psychologist, there are only "children with problems."

"In modern days, we should not talk any longer about 'the naughty child' or 'a problem child' but should try to find the reasons back of the problems of the child."

Dr. Reymert, who is Director of The Mooseheart Laboratory for Child Research at Mooseheart, Illinois, explores some of these reasons and finds that most of them are related to a lack of understanding of the child and his needs, on the part of the parent.

He observes that "one child may be naughty because he feels that he is being blamed and criticized too much. Another child may misbehave because he feels that his parents are not interested in him ar do not pay enough attention to him. A third child may use this means to rebel against excessive restrictions or confinements.

"It is toward removing the cause or causes for the child's naughtiness that we must turn our attention rather than toward even stricter and more severe discipline," Dr. Reymert points out.

Insomnia Although many people are troubled with various types of insomnia, there is no one who "just can't sleep at all" for any length of time. There is a type of insomnia where one can't get to sleep easily, but after he has fallen asieep, he sleeps soundly. In another type, the person awakens often during sleep and, although he seldom stays awake for long, things he is awake for hours. Still another type is the person who awakens early and can't get back to sleep. The person who "just can't sleep at all," however, is non-existent. It is impossible to live without sleep. Even though one is troubled with insomnia, if he has a good sleep foundation, he will doze off—although he may not realize it. On a good quality sleep foundation, it is impossible to resist sleep for long unless there is something physically wrong with a person.

Stop Sediment

To prevent the sediment that ac-cumulates in the bottom of a tea To prevent the sediment that ackettle from hard water, throw away immediately the remaining amount of boiling water which you are not going to use. Do not allow the boiling water to settle in the kettle. Installation of a water softener, to treat the hard water and get rid of the compounds that cause the sediment, would also eliminate the de-

Earth and Gravity The force of gravity is lessened

by the centrifugal force produced by the Earth's rotation because of centrifugal force. The effect of gravity at the equator is about one part in 289 less than it would be on a stationary Earth, or than it is at the poles, where there is no such force. The centrifugal force also throws the surface of the Earth at the equator about 13 miles farther than the poles from the center. This causes a further decrease in gravity, so a man who weighs 189 pounds at the pole would only weigh 188 pounds at the equator, as measured by a spring balance. Ordinary scales would not show this, since the weights used would be equally 29-2x affected.

Win Another Cattle Award A 15th Constructive Breeder Award

has been conferred on the University of Idaho by the American Jersey Cat-tle Club. The award is one of the higest awards made by the Jersey Breed registry which has its national headquarters in Columbus, Ohio.

To be eligible for the award the University of Idaho carried out a wellbalanced program of herd improvement and breed promotion. Its animals have met high requirements of both production and type, and a majority of the animals in the herd were Monday, where the boys will spend bred or owned by it for at least four a week at a boys' camp.
