#### **NEW IDAHO LIABILITY LAW** REALLY HAS "TEETH" IN IT

Boise - "Proof of future ability to meet accident damage claims up to \$11,000 under a number of circumin honor of Mrs. Eugene Betts, with stances is required of Idaho owners Mrs. D. V. Kuykendall as joint host

stances is required of Idaho owners and drivers by the state's revised Motor Vehicle Safety Responsibility Law and the Motor Vehicle Code," Earle E. Koehler, commissioner of law enforcement declared here this week.

"The circumstances in which this penalty must be applied are failure to furnish proof of ability to settle damage claims within approximately one year following an accident and for conviction of a law violation which requires the suspension of driving privileges. The amount of future proof the law demands is \$11,000 and it must be maintained for three years."

"When the last session of the legislature greatly strengthened our Safety Responsibility law," Commissioner Koehler said, "it took note of the fact that far too often irresponsible motorists do not learn their public obligations out of one session with the law. So it wisely enacted a new provision, which will compel such owners and operators to provide and maintain such protection before their motoring privileges can be restored.

"Here is what the law provides:

"If the owner or driver of a motor vehicle is involved in an accident staturday evening at the Roy Martin Saturday evening at the Roy Martin

"If the owner or driver of a motor vehicle is involved in an accident which has resulted in the death or injury of another person, or property damage to another vehicle exceeding daughters of Red Fir came over Friday ovening to visit in the Stage." \$50.00, and his driving and registra- day evening to visit in the Stage tion privileges have been suspended homes. Kay Jones spent the weekfor failure to furnish within 60 days end here.

proof of his ability to meet damage claims not exceeding \$11,000, they may be reinstated if court action has not been filed against him within one W. S. C. S. booth — on which they

year.
"Before reinstatement can become effective, however, that person must file with the Departmet of Law Enforcement satisfactory proof that he or she is prepared to meet damage claims arising out of a future acci-will move Sunday from Long's apartdent. The amount required is \$11,000 ment to Moscow, where Charles will and it must be maintained for three enter the U. of I. He will be a senior.

"Should the suspended motorist succeed in obtaining a relase from liability, or a final court order of non-liability, or comply with the security provisions of the law in other ways, within a year, this proof other ways, within a year, this proof for the future proof is not required.

I hope this illustrates why, on a number of occasions in recent weeks, I have urged motorists to be prepared to the future proof occasions in recent weeks, I have urged motorists to be prepared to the future proof of the horses.

Mr. and Mrs. Bennie B. Cook left Monday for Pullman, where he will enter W. S. C. as a junior.

Mr. and Mrs. Harry Ruddel of Culders were supper guests Tuesday described by the following in the horse of Mrs. and Mrs. to satisfy our revised Safety Responsibility Law in one of the ways that Ben P. Cook, and later attended the have been carefully explained here-

tofore.

"I might also remind motorists who don't seem to get along with other laws that they, too, must furnish and maintain proof of financial responsibility in the same amount and for the same duration under our motor vehicle laws. This occurs when a motorist has been convicted or forfeited bail, violating any law which provides for the revocation or susprovides for the revocation or suspension of their driving licenses. I shall not attempt to list all of the violations for which suspension or revocation are either mandatory or

permissive, but here are a few: while under the influence of liquor or which he distributed around town, narcotic drug; failure to stop and After visiting relatives here briefly render aid following an accident; per- they went on to Lapwai to visit in jury or false oath applying to the the Jay Stout home. operation of a motor vehicle; habitualy reckless of negligent driving; habitual violation of traffic laws, and permitting unlawful or fradulent use evening in the Fraternal Temple with of a driving license. ### WE HATE TO DO IT -

BUT WE HAVE NO CHOICE!

Back "in the good old days" we purchased news print for \$88.00 per ton, f. o b. our floor in Kendrick. The last ton of news print we purchased cost \$202.00 f. o. b. Lewiston — almost (when delivered here) three times what it cost in pre-war days.

Back in 1942 were were forced to raise the subscription price of the Gazette from \$1.50 to \$2.00 when new print jumped to about \$110.00 per ton, and we have since held it at \$2.00 — taking a loss on subscription — in the hopes that the "water would be squeezed out" and prices would settle down at some stage approaching the pre-war normal.

However, prices are still on the rise, and we can no longer afford to take the subscription loss. So, as much as we dislike to take the step we are forced to announce that after October 15, 1955, the price of the Kendrick Gazette will be \$3.00 per year.

Any arrears subscription, and not more than one year in advance, will be accepted at the old price if paid before October 15th.

Too, local ads. (wants, for sale, etc) will go from 5c per line to 10c per line, with the minimum remaining at 25c.

Bill and Floy McCreary.

### **Couple Maintain Isolated Lodge On Canyon Rim**

OMAHA-The nearest neighbors to the cabin of Louis and Violet Hillis are one mile away-straight down-but they can still lay claim to the title of America's most isolated household.

From October to May, the Hillises are the only residents at snowbound Bright Angel Point on the North rim of the Grand Canyon where its their job to maintain the lodge and facilities of the Utah Parks Company. To borrow a cup of sugar, Mrs. Hillis has a choice between snowshoeing 44 miles northward to Jacob Lake, Ariz., or taking a long step down the mile deep chasm to Phantom Ranch on the banks of the Colo-

The Hillises reside in a log cabin, elevation 8,500 feet, where they read in the evening by gas lantern and cook and keep warm by wood-burning stove. By day they keep warm and happy shoveling snow from roof tops, snowshoeing from cabin to cabin, and handfeeding the rare, white-tailed Kaibab squirrels.

In May, their peaceful routine ends with the influx of the first of the 180 employees and estimated 45,000 vacationists who by summer's end will have viewed awesome Grand Canyon from the north rim.

### Eyes Develop in **Preschool Years**

NEW YORK -- Human eyes go through their greatest period of development during the preschool years and it's then they are in a plastic state and are most vulnerable. Permanent damage can result if they're taxed beyond their strength at that time.

It usually isn't easy to detect the symptoms of visual trouble in a preschool child. He will rarely complain, because he doesn't know what should be expected of his eyesight.

A picture of the visual troubles most apt to be found in young children was evolved in a recent study of 100 cases of Kindergarten pupils. Examination of the children's eyesight was prompted in 68 cases by the school nurse, in 15 cases by the family doctor, in eight cases by the eyesight specialist because of an hereditary tendency, and in only nine cases by the patients' observation of symptoms indicating poor vision.

For training purposes, they were named Alice, Clara, Eleanor, Helen, Marie, Pumie, Susie and Trudy. They won't keep these names, however, but will assume ones decided after a naming contest to be conducted among St. Louis school children. .

Special costumes have been made for the elephants who are being trained to walk while holding one another's tails, to stand with front feet on one another's back, to form pyramids, dance and play musical instruments.

#### · How Much Money Is Billion Per Day?

MINNEAPOLIS — Our United States is a billion-dollar-a-day country.

Averaging up the predictions of leading economists indicates that "gross national product," or combined expenditures of the nation's .people, business and government, will total about 365 billion dollars in 1955, or a billion for every day in the year.

American consumers will spend an average of 645 million a day for goods and services. Construction of new homes, factories, highways, etc., will average 110 million dollars a day. The federal government is spending about 160 million doll..rs a day this year, most of it on defense goods and services. State and local governments are spending around 75 million a day. Business investment in new equipment and inventory build-up rounds out the daily billion for 1955.

#### **Britisher Sends** Paycheck by Pigeon

THORNTON HEATH, England-Bricklayer William Bergman sends his weekly wages home to his wife by carrier pigeon. In fact, he has been doing it for 16 years, he says.

Bergman said he gets paid early Friday before starting off on his day's work. So each pay day he carries along his carrier pigeon, straps the money to the bird's leg and turns him loose to fly home.

### Second Weapon

CEDAR CITY, Utah-When Daryl Shumway spotted a bobcat west of Cedar City he stopped his truck and reached for the rifle he always carries.

Shumway fired at the cat four times-and missed. Then, out of ammunition and out of patience, he picked up a rock and threw it at the animal.

The rock caught the cat between the eyes, and Shumway said he finished it off with a second rock.

THE CHIEF TO THE CONTRACT OF T

### **Ours Is Strongest Economic System** In World History

NEW YORK-America now has the strongest, most productive economic system in human history, easily capable of attaining by 1960 a total national output of \$414 billion and making possible an average family income of more than \$6,000 per year, with prospects of still greater growth in the years ahead.

This is one of the central conclusions of a major economic study issued by the Twentieth Century Fund.

Among the striking findings of the survey:

American productivity, meaning the average output per hour of work is increasing so rapidly that if present rates continue, in another century we shall be able to produce as much in one 7-hour day as we now produce in a 48hour week.

During the past century our rate of output has risen so fast that the average American worker today produces nearly six times as much in an hour of work as his greatgrandfather did in 1850.

At our present rate of growth, we shall have a population of 177 million in 1960. A total of 69 million should be at work or in the armed services and unemployment (principally shifts between iobs) should not average more than 5 per cent of the working force. Total national output should reach \$414 billion at current prices, yielding total personal income of \$215 billion, or an average yearly income of more than \$6,000 per household for the country as a whole.

### **New Toy Solves Ancient Problem**

NEW YORK-Newest toy-wonder on the market is a "mechanical bird"—the first successful solution to a problem that has baffled every aeronaut from Leonardo da Vinci on.

The manufacturer says the device-it looks like a small model plane without a propeller-is a genuine orthopter (or ornithopter) described by Webster as a "flying machine propelled by flapping of wings . . .

The tear-proof, tapered wings (with a 15-inch spread) and tail are covered with one of the toughest of plastic materials. The toy bird is powered by several rub-

ber-bands inside the plastic body. These are connected to a simple drive unit under the wings. A small crank in the nose of the bird is used to put tension on the

Two opposing cams in the drive unit are geared directly to the wires which form the framework of the wings. When the rubbermotor unwinds, the cams convert the circular motion into alternate up and down flapping of the wings. Launched into the air, the synthetic bird swoops, soars and dives like a real bird.

### Ocean Fishes Differ Around the World

WASHINGTON-Fishes keep to their own sides of the sea.

The Smithsonian Institution has received a collection of more than 1,000 specimens of Liberian fishes, mostly from salt and brackish water, obtained over a two-yearperiod by George C. Miller, of the Fish and Wildlife Service of the Department of the Interior. This contains many species and varieties hitherto not represented in the national collections, but its particular interest is in the difference it shows between the sea creatures of the eastern and western Atlantic.

Superficially they may be quite: similar. When studied, however, they are found to represent quitedifferent types. Thus, an oceanturns out to be far from a "melting pot."

### **Ex-Justice of Peace** Fails at Robbery

RAYNE, La.-A 75-year-old former justice of the peace living on a \$55 - a - month old - age pension robbed a bank of \$9,800, was quickly caught and jailed by the sheriff, a lifelong friend.

Frail, gray-haired Albert Johnson was tackled by a customer as he backed out of the bank feebly waving a German P-38 automatic: Other customers pulled away his handkerchief måsk.

"I can't understand it," said Sheriff Walter Larcade. "I've known him all my life. He didn't have any kind of a record and it just doesn't add up."

### Female Persuasion

BERLIN-The Communists have asked East German girls to try to talk their boy friends into joining the army.

The newspaper of the Communist Free German youth organization Die Junge Welt, carried an appeal to young women to point out to their boy friends the necessity of becoming soldiers.

### **Defense Materials Top Expenditure** For Our Government

NEW YORK-A new look at the cost of running the Federal establishment has been taken by the U. S. Bureau of the Budget with the objective of providing a clearer idea of where the Government spending dollar goes.

The new analysis of Federal spending shows the relative importance of individual items in the make-up of the total. The biggest single item is defense material. For the 1955 fiscal year, this item is placed at \$12.6 billions, the equivalent of 30 per cent of the entire defense allocation for the year. Expenditures for planes alone represents more than half the total spending in this category.

Second in size in the entire budget is the pay and subsistence of the Armed Forces, which adds up to an estimated \$10.2 billions for the year. The third biggest item is the classification of repair, maintenance and operation of defense equipment and installations, which is placed at just under \$8 billions for the period.

These three defense items alone come to almost \$31 billions for the 1955 fiscal year, or nearly half of the whole budget for the year. These figures, however, represent reduction from recent peaks.

### **Physicist Designs New Blood Warmer**

SCHENECTADY, N. Y. - A physicist who normally specializes in neutron spectrometry, magnetic materials and computers has been cooperating with local physicians here in an effort to help save the lives of babies born with the wrong type of blood.

He has invented a blood warming device to lessen the shock which newborn RH-negative infants endure when new, but cool, blood is substituted for the original deadly supply with which they are born. The basic operationknown to physicians as an "exchange transfusion"-is one of the newer miracles of modern medicine developed by Harvard's Dr. Louis K. Diamond and others.

The blood warmer was prompted by an over-the-fence conversation between Dr. Steward C. Wagoner, Schenectady pediatrician, and Dr. Volney C. Wilson, physicist at the General Electric Research Laboratory. Dr. Wagoner felt it would be possible to save more than 90

per cent of these infants if some suitable way could be found to warm the blood, just as it enters the baby's body.

Dr. Wilson designed a blood warmer that has been used by Dr. Wagoner and Dr. Frank L. Marting in operations to save the lives of more than 20 endangered infants delivered at hospitals in Schenectady . . . with no fatalities or shock reported in any case.

### Under-18 Age Group **Greatly Increased**

NEW YORK - Children under age of 18 in the United States now number about 541/2 million, an increase of 13 million in the ten years since the end of World War

The increase for the 10-year period broke all previous records and was greater than the gain during the preceding 45 years.

The total number of children is expected to continue to climb, and it is estimated on the basis of projections by the Bureau of the Census that there may be upward of 63 million children under age of 18 in the United States by 1965.

Currently about seven million children — almost one-seventh of the total-live with only one parent or with neither parents, mainly because of family disruptions through death, divorce, or separation. Of these, about 4.1 million live with their mother, 600,000 with their father, and the remaining 2.4 million under a variety of other arrangements.

#### Posing as Capitalist **Brings Red Troubles**

HONG KONG-Posing as the son of a wealthy capitalist is a bad thing. It cost a young Chinese Communist his membership in the party, despite the fact that he did his "pretender" in two separate affairs of the heart.

A Shanghai dispatch said the ousted Red, Lo Heng, was first "put under observation" by the party for using the pose in an effort to win a "bourgeois" girl.

Later, the dispatch added, he used the same approach in trying to win a "fish-market comrade." For this, he was expelled as "hope-lessly corrupted," the dispatch

### Fresh From Farm

TOKYO-They aren't trying to keep 'em down on the farm over here.

The Tokyo Metropolitan Government recently in a class employmen brought 158 farm girls, aged 17 to 25 to the city and assigned them jobs as housemaids.

Prospectors Bulletin Available

Publication of a much-needed bullesity of Idaho.

The bureau's bulletin No. 102, is entitled "Prospecting for Uranium, Thorium and Tungsten In Idaho," and was compiled by Dr. Earl F. Cook. It may be obtained on request by sending \$1.50 to the director of the Bureau of Mines and Geology, University of Idaho, Moscow.

was a heavy backlog of demand for ultra-violet lamp.

### **Daylight Saving** Time Gradually Gains New Friends

WASHINGTON-Despite almost constant opposition, daylight saving time grows and takes over a larger share of the nation each

New York City has voted to join most of New England in 1955 in extending summer's hour-ahead time through October, instead of ending it on the last Sunday in September.

Massachusetts, Rhode Island, Maine and New Hampshire, plus a few communities in Vermont, tried carrying daylight time over into fall last year and liked it.

That hour of daylight shifted from morning to evening gives pleasure to millions, saves substantial amounts of power in lighting streets and homes, and cuts dusk traffic accidents, proponents

Daylight "saving" time, still less than 40 years old, has stirred up storms of sound and fury-but has been adopted from Newfoundland to British Borneo.

Ben Franklin reputedly first thought of moving the clocks of Paris ahead to save wax candles. Paris laughed him down. Not until 1907 was the idea revived by an Englishman, William Willett. A decade later it found an American champion in a businessman named Robert Garland.

Garland fought much the same battle in the United States. Congress passed daylight saving time in 1918, but it lasted only two years. President Wilson was not in accord, but the measure was repealed and did not turn up on the national scene again until 1942, in a second war.

### **Teachers Are Paid** For Going to School

WASHINGTON - High school science teachers, who occupy a strategic position for encouraging young people to consider scientific and technical careers, are going back to school and getting paid for it, at some of the nation's top universities.

Twenty-four universities have set up a pilot run program of summer study for high school science teachers to work as research assistants with some of the leading scientists in the nation. In most cases the teachers receive free tuition for course work and approximately \$400 compensation. This step is being taken to sharpen interest in scientific research since

there is an increasing shortage of well qualified technical personnel in industry and in defense establishments as well as in educational institutions.

### Number of Widows Up 90 Per Cent Since 1920

NEW YORK - Widows in the United States now number more than 7,400,000, which compares with the 5,700,000 in 1940 and less than 4,000,000 in 1920.

Since 1920 the number of widows has increased by almost 90 per cent while the number of adult females in the population showed a gain of 63 per cent.

Although the number of widows has been mounting rapidly, the proportion of women in the population who are widows has been decreasing at every period of life. This is a result, statisticians explain, of the marked decline in

mortality. At the ages under 45 the proportion widowed in the female population has declined by twofifths since 1920, and at ages 45 to 54 the decline has been almost one-third. At the older ages there were also decreases in the proportion widowed, but the relative changes were small.

#### No Breakfast Makes For Bad Disposition

MINNEAPOLIS - Lady, if you wonder why that pretty salesgirl snarled at you, when the store had just opened up . . .

Mister, if your stenographer makes silly "boners" in the morning but sharpens up after lunch...

The chances are that the poor girls' breakfasts were no more than a cup of coffee and a few drags at a cigarette.

The Family Economics Bureau checked the breakfast habits of 1600 Minneapolis white - collar workers. It found that 45 per cent of the women under 25 habitually eat little or nothing before going to work. Yet for good health and alert mental performance, a fourth of the day's total food should be eaten at breakfast.

### Good for Gander

BUENOS AIRES-Not long ago President Juan D. Peron quit smoking after many years of chain-smoking black eigarettes.

Shortly after the Argentine Government announced that 22,000 doctors have been enlisted in an educational campaign against excessive use of tobacco. It is designed to convince youths they should never start the habit.
