know my address has changed \_ for the last time — I hope. Thanks for the paper. It surely helps morale when a fellow is thinking of home. My new address is:

Sp/c Raymond L. Greene, US 56-240-516; Med. Det., 40th Tank Bn.; Fort Lewis, Wash.

# Farewell Fellowship Dinner

The Kendrick W. S. C. S. are sponsoring a fellowship pot-luck dinner in the church basement Sunday, Sept. 23 at 1:00 o'clock in the afternoon. The occasion honors Rev. and Mrs. F. C. Schmidt, who will be leaving soon for Alaska.

A cordial invitation is extended to all the friends of the Kendrick Community Church, and the Juliaetta and Leland Methodist churches. Remember: Everyone is welcome!

# SATURDAY, SEPTEMBER 29, 1956

Kendrick's Annual Sales Day will be held on Saturday, September 29, for the Auctioning of Farmers' Stock, Implements, Household Goods — in fact anything of which they may have a surplus and wish to turn into cash. The sale will start at 10:00 a.m. sharp with Roy Glenn, Auctioneer, crying it. Farmers are asked to bring in their articles in sufficient time to have them listed by Ed. Long. New merchandise will also be put up by local merchants. Auction fees are 5% with a minimum charge of 25c per sale.

# FLOWER AWARDS

Replacing the Vegetable and Miscellaneous Displays of the past will be a Flower Show — with the following categories and awards:

Annuals — Annual Asters, best bouquet\$2.00—\$1.00 Annual Chrysanthemums, best bouquet \$2.00—\$1.00	
Perrenials —	
Asters\$2,00—\$1,00	
Roses\$2.00—\$1.00	
Dahlias\$2.00—\$1.00	
Tuberous Begonias\$2.00—\$1.00	
Gladiola\$2.00—\$1.00	

Snapdragons	\$2.00—\$1.00
Stocks	\$2.00—\$1.00
Calendulas	\$2.00—\$1.00
Mixed Fall Flowers (any varities)	\$2.00—\$1.00

Grand Prize — Best Bouquet of the Exhibit — \$5.00

Rules Of Display — All flowers must have been raised by the exhibitor. All entries must have the owner's name or address attached and must be registered by Marvin Long (or exhibit attendant) on or before Sales Day. All prizes courtesy area business firms.

**NOTICE:** Display will be in the Fire Hall. In case of tie, money will be divided equally. Any person living in the Kendrick trade area is eligible to compete.

Bring in your articles. Buy and sell at the Auction. Spend the day visiting — see the FLOWER SHOW the PET PARADE, and the FOOTBALL GAME —Kendrick vs. Genesee. Auctioneer Glenn predicts a big crowd and plenty of items at the sale. Norla Callison will be the clerk.

The Auction Sale will take place on the street between the Kendrick Cafe and the Red Cross Pharmacy — or in the Auto Freight Depot, should the weather prove inclement. Flower display in the Fire Hall.

RULES: All articles purchased at the Auction must be settled for before being removed. All articles put up at auction must be sold! Cash in on your surplus goods at a low, low fee - 5%, with a 25c minimum.

# PET PARADE 1:30 --- PRIZES

THERE WILL BE A TREAT FOR EVERY ENTRANT

# SPECIALS GALORE AT THE LOCAL STORES!

Football Game at 2:30

### Foresee Billion Barrels Jet Fuel from Oil Shale

Jet engine fuel by the billions of barrels can be produced from the Green river oil shale formation in northwestern Colorado, Dr. J. D. Lankford, acting chief, of the United States bureau of mines oil-shale demonstration plant in Rifle, Colo., reports.

Low cost oil shale mining already has been found feasible, Dr. Lankford says, and he predicts that the present trickle of 100 to 300 barrels the formation will become a mighty

torrent as techniques improve. "It is estimated that 88 volume per cent of the crude shale oil could be converted into a hydrogenated product containing a premium Diesel oil and a high-quality jet fuel practically free of sulfur, oxygen and nitrogen compounds," Dr. Lankford stated. 'If desired, the hyrdogenated material could be converted easily to gasoline by standard petroleum refining processes.

"The United States bureau of mines oil-shale demonstration plant at Rifle, Colo., is engaged in an integrated research and experimental program to point the way toward the development of a tremendous natural resource, oil shale, for possible wartime emer-gency and for the ultimate peacetime production of liquid fuels by private industry.

"Billions of barrels of liquid fuels are potentially available from the oil shale of the Green river formation of northwestern Colorado. Research and development work will be necessary over an extended period of time to bring this great natural resource to the stage where utilization will be possible."

### **Pocket Radiation Indicator** Developed for Average Man

An accurate pocket-size radiation indicator, so simple that the man on the street can learn to read it after a few minutes instruction, has been developed at the atomic energy project on the Los Angeles campus of the University of Cali-

The device was developed by Dr. George V. Taplin and Clayton Douglas of the U.C.L.A. medical school's atomic energy medical research staff.

It measures radioactivity by a color change of chemical solutions in small vials. The chemicals are inexpensive, and it is estimated that the instrument could be produced on a large scale very cheap-

The vials fit into a compact case about the size of a pack of paper matches, which could be worn around the neck like G.I. dog tags. They also could be adapted to a pencil-like container for the pocket. The new radiation indicator was specifically designed to measure large doses of gamma and X-rays

immediately after an atomic blast. It also lends itself to the development of important peacetime applications, says Dr. Taplin. For example, it could be useful in the calibration of such radiation equipment as fluoroscopes and X-ray machines. It might be used to measure radiation from radio iodine absorbed by the thyroid gland in treatment of hyperthyroidism.

# Origin of April's Fool

It was the habit of observing July as the beginning of the year that is said to have started the whole idea of All Fools' Day. From its reputed origin in France, it quickly spread to other countries. We have such varied terms as the English "noddies, gawbies and April gobs," the French "April Fish," and the Scottish "April Gowks." While there are other theories about April Fool's day, the calendar story located by research librarians with Childcraft seems that when King Charles XI of France adopted the reform calendar in 1564, many Frenchmen refused to go along with the new January 1 New Year's. When they continued to celebrate on July 1, they were made the butt of countless jokes-receiving mock party invitations, fake gifts, and pretended ceremonious visits of congratulation.

# United Nation's Building

Along the banks of East river on the Island of Manhattan between 42nd and 48th streets the Secretariat building of the United Nations is towering to the sky as workmen are rushing it to completion so that it can be occupied before the end of the present year. The structure will be 39 stories high. It is one of four units that will complete the headquarters as a "workshop for world peace." Contracts for the other three units have not yet been let but it is believed they will be completed during, 1951.

# Suggestion for Farmers

The average farmer spends 50 per cent of his time around the farmstead. This can be materially reduced by piping water to the point of use rather than carrying it. For example, consider what carrying water to a flock of laying hens involves. If the water point is 60 yards from the hen house, as it is on many farms, the farmer will carry approximately 10 tons of water a distance of 25 miles per 100 hens per year in addition to walking another 25 miles to the water

### Most Life Policy Benefits Go to Widows, Children

Reflecting the basic use of life insurance in family financial planning, wives, children and other relatives appear to be the directly named beneficiaries in more than 80 percent of all life policy death claims, the Institute of Life Insurance says. This is indicated by an Institute analysis of one month's claims in the United States.

Applied to the year's probable total of death claims, the one of gasoline and Diesel fuel from month's distribution would indicate that this year, wives, children and relatives will be beneficiaries of some 1,200,000 life insurance policies, with total benefits about \$1,400,000,000. Wives and children alone would account for \$1,225,-000,000. In addition, they will receive a considerable share of the 7 percent of claims and 14 percent of benefit payments which go to estates and other beneficiaries, excepting husbands.

> Husbands were shown to be beneficiaries in 11 percent of the policies, although they received only 4 percent of aggregate benefits, reflecting the smaller average size of policies owned by women.

> The month's claim analysis also revealed that, while the majority of death claims were paid on policies which had been in force a number of years, there was a large number in the early life of policies, even in the first year. Although great care is taken in selecting applicants, with those to whom policies are issued being in apparent relatively good health, nearly 5 percent of policies becoming death claims were found to be less than a year old. This would indicate that this year there will be some 70,000 death claims within a year of issuance of policies, with nearly \$100,000,-000 involved.

> Nearly one-sixth of all claims were shown to be under policies less than five years old. Almost 40 percent of the claims and just over 40 percent of the amount of benefits paid were under policies in force 20 years or more.

### **Preventive Measures Urged** As Safeguard Against Stroke

The best way to avoid a stroke, third among leading causes of death in this country, is to recog-nize its possibility and make physical readjustments that may help to stave it off.

In the absence of serious systemic diseases such as diabetes and syphilis, there is not much chance of the average person having a stroke before 45 years of age, according to Dr. William Bolton, associate editor of the magazine. Today's Health. But, virtually everyone past middle age is a possible candidate. The following precau-

tions were recommended. 1. Obtain prompt, active ment of systemic diseases.

2. Do not become or remain overweight. 3. Watch blood pressure that

tends to become high. 4. Obtain regular physical check-

"Strokes vary from widespread, devastating ones that bludgeon their victims into oblivion to tiny ones producing such vague, indefinite signs that they often escape immediate detection," he said. "The basic cause in both extremes is identical: escape of blood into the brain tissue. The amount of bleeding and its location near to or farfrom vital centers or important nerve pathways are the chief factors that determine severity in strokes.

"Not all strokes are the result of direct escape of fluid from blood vessels into brain tissue. Some physicians lean strongly to the belief that temporary spasm in a blood vessel may be a common cause.

"Another fairly common event is: formation of a clot within one or more of the tiny arteries in the brain.

"There is increased possibility of stroke in certain diseases."

Tough Case
Recognizing the fact that portable movie projectors are often carried into all sorts of climates and that they must withstand the hard knocks incident to travel, the manufacturer of one such machine has devised a special carrying case that is able to "take it." Built of birch and basswood, high frequency. radio waves are used to set the adhesive that binds the panels so they can never pull apart. The case is then dipped in a synthetic resin sealer that checks decay and minimizes moisture absorption. It is then primed, sanded, and painted with a spatter finish. Allowed to cure for three weeks, the finish is hard and durable. Even after years of intensive service, it does not become brittle or chip away from the wood.

# Pre-War Army

Six months before World War II began, the Army contained 29 infantry and cavalry divisions at nearly full strength, totaling more than 450,000 officers and men, plus an armored force of four divisions with a total strength of 40,000 troops. The Army history, "Washington Command Post: The Operations Division," credits mobilization of the National Guard and induction under the Selective Service Act for this rapid expansion of

### Oldest Living Thing in U. S. Has Rival in Olive Tree

Thousands of years from now California may boast of possessing two types of trees that were growing here in the 20th century. One of these is the Sequoia, or giant redwood, a few species of which already have grown in the Golden state for over 4,000 years. The other is the olive tree, a comparative newcomer to the T.S.

The olive tree, although estimated to have lived in Mediterranean countries for periods of time equal to that of the Sequoia, did not join this other ancient perennial in California until about 1769. It was in that year that Franciscan padres planted the first olive tree cuttings around their mis-

The modest efforts of these religious men to provide a little shade became the basis of an industry which, according to the California Olive Association, now nets some 2,200 growers in the U.S. about \$10,000,000 annually.

It was not until the late 1890's that olives were available commercially in this country, even in a limited amount. Then improve-ments in canning processes and development of the modern type metal container by the American Can Company gave olives a new life in the new world. During the last 60 years the olive orchard "population" has grown steadily from less than 1,000 acres to about 26,000 acres last year. They now produce an annual crop of over 40,000 tons of olives. Of the 25,000 tons sold for canning, 98 per cent go into metal cans, the remainder in glass containers.

The ripe black olive of Califorinia, gathered when fully matured, has a rich oil content and is marketed in nine different grades, ranging in size from "standard" to "super - colossal." According to Professor M. E. Jaffa, nutration specialist at the University of California, the ripe olive has about double the calorie value of the green

### Transfusions Through Arteries Said Life-Saving Measure

The rapid transfusion of blood through an artery, instead of through a vein as is usually done, has been described by two Washington surgeons.

Drs. Charles S. White and Donald Stubbs of the Research Foundation, Doctors Hospital, Washington, said the method has been found "safe, practical and life-saving."

Intra-arterial transfusion, they reported, has been found most effective in cases where the heart beat has stopped or has become almost imperceptible following a heavy loss of blood.

"It should be emphasized that transfusion except in those cases in ing strains. Although the biggest which the blood pressure is very crop comes from mid-to-late June, low, or cannot be recorded, or in plants will continue to produce arrest of the heart action from hemorrhage," they said.

"In the latter cases, blood introduced into the veins, even under in the spring as possible. pressure, has a long route and s slow one to reach the coronary arteries (supplying the heart), even if it could be forced or propelled in some manner through the right. chambers of the heart and lung. The tury", this ever-bearing type is said most direct route to the coronaries to fruit in about 60 days and prois the arterial highway."

The Washington surgeons said ries all season long. that with blood pressure at zero and no pulse to be felt, circulation was repeatedly restored "in an un-believably short time." They add-

ed:
"It is accepted generally that resuscitation is futile if more than seven minutes elapses after the heart action is arrested, as irreparable damage to the cerebral cells ensues, and if life is maintained the facilities remain permanently damaged. Some remarkable exceptions to this statement have been reported, but usually not well authenticated.

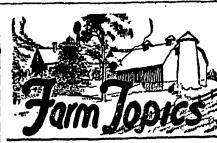

Fire in the Desert

Abadan, an oil city of some 140,000 people, only 40 years ago was a desert island in the sun-baked delta below the junction of the Tigris and Euphrates Rivers. In a great geologic trough beneath the Mesopotamian river basin waited a hidden treasure. It remained for an Australian wildcatter named William Knox D'Arcy to drill 1,180 feet through Iranian limestone and bring in a gusher in 1908.

Wild tribesmen had ridden into Persia thousands of years before and found oozings of gummy black bitumen to fire their lamps and bind the materials of their buildings, tools and weapons. Alexander the Great marched through Persia, his horsemen collecting naphtha and pitch from evil-smelling pools to strike blazing terror among the war elephants of enemies he met later.

# Habits

nearly as easy to break. Accord- Depend on Type of Soil ing to Professor William James, Harvard psychologist, it is not enough just to decide to break a habit—one must decide whole-heartedly and not let a single exception occur. Habits should be broken off abruptly, and not grad-plowing is peferable on light soils. ually. Taking sleeping pills in a dangerous habit as well as an unnecessary one. Good bedding is all that's by spring. On heavier soils tests gerous habit as well as an unnecesneeded for sound, restful sleep as | show late fall plowing gives as good long as there are no physical ail or better granulation of the soil

# Five-Grass Mixture Popular in Indiana

# Pays Off in Higher Quality Hay, Pasture

Farmers in 12 northeastern Indiana counties swear by a 5-grass mixture that pays off in extra tons of high quality hay and pasture.

The combination includes, timothy, brome, red clover, Ladino clover and alfalfa, reports Walter Rusk, county agent of Huntington county. This legume-grass combination, he said, could profitably be used by farmers in other states.

When plenty of fertilizer carrying nitrogen, phosphate and potash is used at seeding time and plant nutrients are top-dressed each year, this 5-grass mixture has yielded as much as 3 tons of hay at the first

Five acres of the 5-grass mixture on the Norman Thompson farm near Huntington, Indiana.

cutting on many farms. One farmer in the area insists that 5 acres of the mixture provides more forage than he previously got from about 60 acres of pasture.

Norman Thompson, who farms near Huntington, Indiana, reports that he grazed 27 head of cattle, including 16 milk cows and 11 calves, as well as 100 small pigs and 16 sows for 5 weeks on a 5-acre pasture seeded to the 5-grass mixture.

Rusk points out that the well fertilized legume-grass mixture is doing an important soil building job, besides giving farmers a preferred position in forage supplies. The taproots of the legumes drill down deep to keep the soil open and well ventilated. They add organic matter to improve the soil's tilth and drainage. Large quantities of organic matter in the soil mean increased water-holding capacity. They also make it possible to get the best possible efficiency out of every ton of fertilizer used.

# Improved Ever-Bearing Strawberry Developed

- Strawberries from your garden this type of transfusion is not a from June to October are possible proper substitute for intravenous with the new, improved ever-bearenough for breakfast cereal and dinner desserts until frost arrives.

Planting should be done as early

Said to thrive in any type of soil, is a new high-yielding variety developed by plant breeders of the Westerhauser Nurseries of Sawyer, Michigan. Called the "20th Cenduce large, sweet, full-flavored ber-

Seasoned gardeners recommend picking off the first blossoms so as to enable the roots to develop plenty of strength. They point out that while you may lose the first few fruits, you will gain in much bigger yields later in the summer.

# Grand Champion

Iowa State College won the grand championship of the 52nd International Livestock Show with a 1,240 pound Aberdeen Angus steer, Toby. In 1950 Toby won the reserve championship and now is the only steer ever to return and capture the higher award. Shown with Toby are (left to right) Chief Judge A. D. Weber: W. W. Prince, president of the Union Stock Yards: Jess C. Andrews, president of the International Exposition; and George Edwards, herdsman for Iowa State College.

HELLO, FOLKS:

the state of the s

Well, we have certainly had two weeks of the most beautiful Indian Summer weather that anyone could want - but one of these days we're going to wake up and find 'the frost on the punkin' — and will you be ready? How's that stove oil tank? Is it full — can you say: "I'm ready?" If not, just pick up the phone and call' 1251 — and we'll be on the job to fill that tank!

The teacher was trying to make little Elsie understand subtraction and so she said: "You have ten fingers; now supposing there were three missing, what would you

have then?"
"No music lessons," said little Elsie promptly,

Thinking of going hunting? If many kinds. See our display.

so, you'll want the radiator filled with Prestone or some other good anti-freeze before taking off. So, just drive in that car, truck or pickup — and we'll do the rest.

Hotel Guest: "Pleash shend up a full length mirror."
Clerk: "But there's a half-length mirror in your room al-

ready." Hotel Guest: "Yesh, tha'sh right and twish I've gone out without my throushers!"

Let us remove the grime and dust of summer from your car. Let us wash and wax it (which includes vacuuming the interior) and so get the finsh protected for winter's traveling.

Yes, we stock car accessories of
