Mr. and Mrs. L. S. Thurber returned Thursday from a month's acation From Portland they took the Shasta Daylight train to Oakland, Calif., where they spent several days visiting relatives in and around the Bay area. From San Jose they boarded the Coast Daylight on the scenic route above the blue Pacific surf for 113

miles on their trip to Los Angeles. From the latter city they went to Yuma, Ariz., where they enjoyed two weeks in sunshine with temperatures ranging from 85 to 90. Here they took several trips to scenic and historic points including the old Territorial Prison, built in 1875, which is now a museum, and filled with relics of the famed old west. They also visited

Old Mexico. The return trip was made by way of Salt Lake City, where they spent a week-end. From that city they went on to Ogden, Utah, where they visited the Ogden Knitting Mills, one of the suppliers of merchandise for their store for several years.

The trip concluded with a visit with relatives in Spokane. They report a most wonderful and enjoyable time.

Is Doing Nicely

Latest reports from the bedside of Don Lehman, son-in-law of Mr. and Mrs. John Johanson, who is confined to the Deaconess hospital,, Spokane, following a heart attack, are encouraging. He is responding to treatment and will likely go home in ten days.

Community Sing

The Joint District P.-T. A will hold a Community Sing in the Band room at the High school at 7:30 p. m., Tuesday, March 17th — and all interested in music are urged to attend. This is in preparation for the annual P.-T. A. Fun Night.

Missionary To Speak At W. S. C. S. Margaret Wadge, a missionary from Liberia will be the featured speaker on the program at the Kendrick W. S. C. S., Thursday afternoon

Mrs. Norla Callison is program chairman. Hostesses will be Mrs. Geo. Brocke, Jr., Mrs. Wm. Holt and Mrs. Geo. Merrick.

A welcome is extended to all.

Insurance Study Shows South, West **Are Faring Better**

NEW YORK - Life insurance policy benefits going into the South and West in recent years have been increasing at a much more rapid rate than in the rest of the country, the Institute of Life Insurance reports.

Last year's benefit payments under life insurance policies owned in the Southern and Western States were 60 percent greater than in 1950, while they were 38 percent greater in the rest of the country.

The increase from 1940 in death benefit payments alone in the South and West was nearly 175 percent, while for the rest of the country it was 107 percent.

"The increase in the flow of benefit payments is a direct reflection of the greater-than-average rise in life insurance ownership in those areas, which is, in turn, a reflection of the population and industry shifts of the past decade or two," the Institute said. "It demonstrates, however, the speed with which life insurance dollars follow our families in their changes of residence and improvements in circumstances."

Population in the West South Central, Mountain and Pacific States, combined, in 1955 was 44 percent above the 1940 level: in the East South Central and South Atlantic States it was up 23 percent and in the rest of the country 19 percent. Income in 1955 of families in the Southwest and West was 378 percent above the 1940 level, while the rise in the Southeast and South Central was 329 percent and in the rest of the country 251 percent.

1956 Turkey Crop Was **Record Production**

MINNEAPOLIS-One and threequarter turkeys for every family in the United States-that is what the record 1956 crop of over 76 million birds amounted to.

In 1950, we produced slightly more than one turkey-44 millionfor each U.S. family. Back in 1930, only 17 million turkeys were produced, a little more than one-half a bird for each family, the bureau

Thus, we produced in 1956 approximately four times as many turkeys as we raised a quarter of a century ago, Several factors have contributed to this enormous increase; new varieties which could. be marketed much younger; reduc-

tion in labor required and in bird mortality, through new scientific methods, which has made year around marketing possible; attractive packaging and display i ern food stores; and in the case of the 1956 spurt in production, a favorable feed situation and the memory of good profits on the 65million-bird crop of 1955.

Music Is Vital Part Of American Life

CHICAGO - America is experiencing a great new "Golden Age" in musical activity. More than ever before music is playing a vital part in our schools, in industry, in community life and in the home.

New teaching methods and technological advances make learning easier, turn it into an enjoyable social activity and greatly reduce the cost of lessons. The recognition that music is one of the greatest trainers of personality has led to a strong trend toward including music in a well-rounded education for successful living.

The American Music Conference estimates that more than one person in every six in the United States regularly plays some kind of musical instrument. Latest estimate on the number of persons who play an instrument is 27,-650,000. In 1936 is was 14,300,000.

Factory Worker Safer On Job Than at Home

NEW YORK-The American factory employee today is safer at work than he is off the job.

In 1926—the first year for which national figures are available there were in U.S. manufacturing industries. 24.2 lost-time injuries for every million man-hours worked.

That hour has constantly declined, until today it stands at less than half that rate-11.9 for the second quarter of 1956.

The greatly reduced rate of total lost-time injuries gains even greater significance when it is considered that the 1926 rate applied to less than 10 million employees, while the 1956 figure applies to almost 17 million employees.

Cartons Can Sell

CHICAGO - Folding box manufacturers are developing cartons with eye appeal for all sorts of products, one of the newest being a line of seafoods. Boxes containing attractive pictures in color of the particular product, making it easy for the consumer to identify as well as reminding her that it is an appetizing menu item.

Warns Idaho Residents

"The people of the state have ex-

pressed their desire to have as much

money per child invested in their

children's education as is the case in

surrounding states. They have also

said they went the teachers of their

children to receive salaries commen-

surate with the average of our neigh-

accomplish these desires has been determined to be \$28½ million. This is

not a 'padded' figure. It is the amount

boring states.

education in Idaho.

Television May Help Solve Our **Teacher Shortage**

NEW YORK-One of the most troublesome problems in developing new teachers is the fact that many adults who like to teach cannot afford the necessary additional academic work. For many it means quitting a job and going back to school many miles from home. Relatively few people have a college or university near enough to allow them on weekends or in evenings to complete the requisite classwork.

However, the Texas Education Agency has a brand new approach to this problem which it will try out this fall. This is to prepare liberal arts graduates for teaching by open circuit television. This project has the cooperation of 51 colleges and universities, leading school systems of the state, eight TV stations, the Texas Association of School Board Members. Parent-Teacher Associations and Junior' Leagues. Texas thus makes education courses available right in the homes and blankets the state with them at no cost or travel inconvenience to the teacher-pros-

Another new project using television is planned by the University of Alabama through its extension division. The Alabama educational TV station is able to reach approximately 95 percent of the people and schools-a larger percentage than can be reached by an educational TV station in any other

Water Important To Rural Home

CHICAGO-Whatever other problems a move to the country may seem to pose, water supply no longer is one of them.

Thanks to modern well drilling techniques and efficiency of electrically-powered pumping equipment, the homeowner who has to provide for his own water supply can count on a source every bit as satisfactory as city-supplied water.

But-before buying a lot and building in the country, determine the availability of ground water in the area. Once this is settled, the papers signed and a general contractor engaged to do the building, the next step is to choose a competent well drilling contractor to develop a water source.

When the well is delivering water and has been tested for capac-

ity, it is time to decide on a pump pump can deliver water faster than the well can supply it. It is unwise to size a pump entirely on the basis of current requirements. Needs are bound to grow as fami-Lies increase in size.

Amazing Feature of Long-Preserved Body

CHICAGO - Autopsy of a body which was known to have been immersed in fresh water for six years revealed a "most amazing medical feature," according to a report in the Journal of the American Medical Association.

When first examined the body was in a "remarkable state of preservation," with the skin intact and the size, shape, consistency and location of all the internal organs appearing like those of a body freshly examined, Dr. Walter Lentino, a New York radiologist, said.

But when tissues from the various organs were examined microscopically, the amazing feature emerged. The individual cells and tissues were found to have completely dissolved, so that it was impossible to tell from which organ the tissue came.

Wage-Salary Share of National Income Is Up

Wage and salary payments and supplements represent 70 cents of every dollar of national income, according to an anlysis of data compiled by the U.S. Department of Commerce. This is a new high proportion, and compares with a ratio of 64 cents in both 1950 and 1940, and with less than 60 cents

The seasonally adjusted figures at annual rates show that compensation of employees made up \$237.2 billions of the \$338.7 billions of national income in the second quarter of this year. Nearly \$14 billions of the compensation total consists of supplements to wages and salaries, largely employer contributions to private and public retirement and welfare funds.

Waste of Energy

CHICAGO - Two Massachusetts researchers say that general warming - up - including massage, hot showers, and general exercise aimed at raising body temperatures - does not improve athletic performance.

Peter V. Karpovich, M.D., and Creighton Hale, Ph.D., based their observations on a series of experiments they ran on athletes at Springfield College, Springfield,

Young and Elderly Most Frequently **Are Fire Victims**

CHICAGO - Most frequent victims of clothing fires are children and elderly people.

Children's clothing catches fire when they are playing with matches, playing around stoves or heaters, and too close to outdoor fires. Elderly people's clothing catches fire when they use stoves carelessly, warm themselves at fireplaces and radiant heaters, or fall asleep while smoking.

Some clothes, because of the way the cloth is made or because of the style of the garment, are more dangerous than others.

Therefore, beware of light weight, loosely fitting clothes, ruffles, flounces, kimono type sleeves, filmy nets and gauze. Also beware of sweaters with brushed long fibres for some ignite easily and burn intensely.

Remember that most clothing fires occur because of the wearer's carelessness. Train yourself and your family always to be careful in the presence of open flames, heaters, stoves and other sources of ignition.

Select the safest material available. If a safe substitute cannot be found, it will be possible to reduce the hazard of some fabrics by flameproofing.

Olympic Quiz Is Interesting

LOS ANGELES - Like to try a ten-second quiz on the Olympic

When were the games fixed by professional gamblers? When were contestants required to take an oath before being allowed to compete? What city supported its Olympic winners for life out of the public treasury?

All these incidents took place centuries ago when the games were the exclusive property of the Greeks. Origin of the games reaches back more than 3,000 years ago when the contests were held. on the plain of Olympia northwest of Sparta as a tribute to the Greek god, Zeus.

Dr. Arthur Patch McKinlay, emeritus professor of Latin at UCLA says strict rules were developed to stop-fixing of the athletic events by gamblers. A contestant convicted of taking a bribe was heavily fined and the money used to set up bronze images of Zeus.

Only Greeks of pure descent could take part in the games and oaths had to be taken by the contestants and their trainers promising to abide by the rules.

Olympic heroes from Athens got the best prize of all. They were supported for life out of public

Study Shows Athletes Live Long as Anybody

CHICAGO—Athletes live just as long and die of the same causes as do nonathletes, a Michigan State University survey has shown.

The effects of intensive athletic competition on the heart and other organs and on bodily resistance to disease have long been the subject of controversy and it was believed that athletic competition shortened life expectancy. Some studies have indicated that the life expectancy of former college athletes is greater than that of the general population, but shorter than that of college "intellectuals," while others have shown no difference.

The Michigan State study was set up because it was thought that a comparison of athletes to their classmates might give more valid information

There May Be Some Help for Nasty Cold

NEW YORK - With colds a' plenty this time of year, there is good reason to believe that, unlike taxes, relief is in sight. The hopeful prospect stems from the report of a new vaccine effective against one type of cold. Presently being mass tested, and not available commercially, the vaccine offers protection from one of the ten known forms of "grippe" virus. This one causes sore throat, laryngitis, swollen glands, conjunctivitis and about six-days' fever.

The "gimmick," of course, is that the vaccine will not prevent getting the common cold or, the eight other cold-like respiratory infections which afflict most of us. But medical science is now confident it is on the right track.

Plenty Anti-Freeze

CHICAGO-About 110 million gallons of chemical anti-freeze solutions were sold in 1955 to protect America's 60 million automobiles, trucks and buses from winter

freeze-up, a recent report shows. Nearly three-quarters of the total was in the higher-priced permanent, or ethylent glycol, type products, while the remaining 31 million gallons were of the methanol type. Retail value of the 1955 sales was estimated at least \$280 million.

"This is the year of decision for education in Idaho. The Delegate Assembly of the Idaho Education As-ECKERT Says -sociation, meeting in Boise on February 15-16 has directed me, as president, to make the following state-

The April Club meeting will be at

the Marvin Silflow home.

Dr. Born In Juliaetta

Dr. K. H. Collins of Craigmont, who was honored in a "This Is Your Life" program Saturday night at Craigmont after serving 25 years in that community, drew friends and relatives from near and far — that numbered 1,700!

Dr. Collins was born Nov. 9, 1896, to Joseph and Alvis Collins of Juliaetta, Idaho. The Collins family moved to Moscow in 1900, where Mr. Collins

operated a general store. The 25th anniversary tribute was held in the High School gymnasium

and was sponsored by the Community Presbyterian Church. Records show that Dr. Collins has delivered over 1,400 babies in the area. Many were brought into the world under difficult conditions, such as the stork becoming impatient and "making delivery in cars." Another arrived with just the lights of the Doctor's car shining through the win-

dows for light.

Hundreds of "his babies" and their families were present to honor him, as well as his associate nurses and

helpers. The celebration drew widespread comment throughout the area for the Phone 1231 Kendrick Doctor and his family.

Evergreen Friendship Club The Evergreen Friendship Club will dent of the Leland 4-H Livestock meet on Wednesday, March 20th, at 1:30 p. m. in the home of Mrs. Lester Crocker with Eula Miller as co-host-
