### Man-Made Light Moves Ahead By New Inventions

There is nothing to show that our anthropoid ancestors used candles to find their way around among the trees after dark, but there is ample evidence that the hairy cave man used fire to scare away prowling beasts.

Man-made illumination has come a long way since those remote days. By far the greatest strides have come in the past 75 years—greater progress than through all the thousands of years before. From the cave man's torch to electric light, the flame was the only source of illumination.

Within recent weeks, a new source of artificial light has been announced wherein electricity appears to serve merely as a match to light a wick. Powdered phosphor on a sheet of glass emits a mellow glow of its own under electric impulse. Your house of tomorrow may have these panels installed in walls and ceilings. It is claimed the cost of maintenance will be so low that the only need for switches will be to turn lights off when you want darkness. Clockfaces, stair risers and other incidentals will be permanently connected.

With this revolutionary development in man-made light comes wonder as to how it all started. Archaeologists have concluded among the earliest to whom the cave man passed his flaming torch were the ancient dwellers of Mesopotamia where lamps, fashioned from terra cotta, were found to have been used during 7000-8000 B.C. Copper and bronze lamps were used by the Persians and Egyptians in 2700 B.C. Homer described a "Festival of Lamps" in 950 B.C. The Romans were using lanterns a century before Christ.

The candlesticks of Biblical times and the lamps of the vestal virgins used animal and vegetable oils. Pliny mentioned the use of a mineral oil for lamps in 50 A.D. The Phoenicians appear to have been the first to use wax for candles in 400 A.D.

### Atom Disaster Would Demand Many Trained 'Mass Feeders'

"In case of enemy attack or atom bombing, the disaster would demand more trained persons for mass feeding than we can hope to have today," two Red Cross workers who conducted an emergency feeding program during the flood disaster in Kansas City last July, warn in an issue of the Journal of Home Economics.

"Disaster feeding at best is a hodgepodge affair because there are never enough experienced people and survivors to do an ideal job." Jane Griswold, assistant national director of the American Red Cross Food and Nutrition Service, and Kathleen Kienstra, director of the Midwestern Area division of that service, explain in an article pointing out that experience in the flood disaster indicates what the situation would be in event of enemy attack. While urging the home economists to be ready with their professional help, the authors pay great tribute to the work of the community organizations who carried out the feeding program during the Kansas flood.

"It is encouraging to see the common purpose that draws people together when disaster comes to a community. The simple, basic, practical things that people can do for each other helps to ease the impact of catastrophe and turn the mind from despair," the authors conclude in the article, "Red Cross Fights Flood Disaster."

### Treating Addicts

Law enforcement, education of the public and treatment of the individual are the three most important factors in combating the alarmingly increasing dope addiction among teen-agers, according to an article in Today's Health, published by the American Medical Association. "Regardless of where the upsurge of addiction started, it has jumped racial, economic and social boundaries," said the author of the article, Dr. Victor H. Vogel, medical officer in charge of the U. S. Public Health Service Hospital at Lexington, Ky. The hospital is one of the two federally operated for the treatment of drug addicts. Dr. Vogel reported that admissions at the two federal hospitals for drug addicts rose from 2,700 in 1949 to 4,500 in 1950, with an estimated rate of 4,200 in 1951. "An alarming part of this increase was due to the admission of addicts under 21, which jumped from 22 in 1947 to 440 in 1950—an increase of 2,000 per cent," Dr. Vogel stressed.

### Early Inventors

Among the early American inventors who founded great industries, few struggled against adversity more desperately than Gail Borden (1801-1875), who was the first to obtain a patent (August 19, 1856) on a process for condensing milk. His first invention was a meat biscuit for which he was granted a prize at the International Exposition of London in 1851. Returning from London he was anguished by the death of infants on the ship who had been fed milk from sick cows. As a result of this experience, he spent years of experimentation to invent a process that would preserve milk under wretched conditions.

**Squirrel Provides Big Part of Nation's Yearly Game Bag**

Although it is generally recognized as a prolific game species of extensive range, comparatively few people realize the truly important part the squirrel plays in the nation's game bag.

Several years ago the Remington Arms Company, Inc., conducted a survey of national wildlife resources and sportsmen's hunting preferences. The survey revealed that the squirrel ranked second only to the rabbit as the most sought-after game species in the country.

A recent analysis of "Hunters' Scorecards" returned to the office of the Mississippi Game and Fish commission placed the squirrel in an outstanding position in the hunting activities of the sportsmen of the Magnolia state. The analysis brings to light the fact that 79 percent or 150,000 of the licensed hunters in Mississippi sought squirrel during the 1950-51 hunting season. The cotton-tail rabbit and the Bob White quail practically tied for second high rank, with the rabbit nosing out the quail by the slight margin of 47.15% to 47.12%. Next in line was the lowly 'possum with the somewhat surprising score of 23.08%, topping the dove's rating of 21.58%.

A breakdown of the analysis in hunting activity percentage and estimated total statewide kill follows: deer 6%, 1,370; wild turkeys 1.35%, 249; quail 47.12%, 2,119,532; squirrel 79.83%, 2,418,574; rabbit 47.15%, 900,360; coon 18.2%, 208,712; 'possum 23.08%, 386,145; dove 21.58%, 522,876; ducks 8.97%, 182,317.

**Patients On Salt-Free Diet Given Hope for Meal Variety**

Patients on a monotonous salt-free diet were given the hope of adding more variety to their meals in two reports on further experiments in the recently developed exchange resin therapy. Exchange resin compounds have been administered to patients having congestive heart failure, cirrhosis of the liver, or kidney ailments which cause excessive fluids to collect in the system. The resin compounds eliminate the sodium which locks in the fluids. Because of this action, it becomes possible for the patient to take more sodium in his diet than would otherwise be possible.

In a report on resin therapy presented by Drs. Carl Voyles, Jr., and Edward S. Orgain, Duke University School of Medicine, Durham, N. C., it was concluded that, "Resin therapy is a useful adjunct to conventional therapy in the management of chronic congestive heart failure, and it can be used safely in conjunction with strict sodium restriction in patients who are followed closely. Resin therapy also makes possible the addition of sodium chloride in amounts sufficient to render the diet more palatable," the report added, and it facilitates the action of mercurial compounds that help in fluid elimination.

The second report on exchange resin therapy reviewed studies by Drs. B. L. Martz, K. G. Kohlstaedt, and O. M. Helmer, at the Lilly Clinic for Cardiovascular Research, Indianapolis.

**Sleep Anywhere**

One of the most energetic causes of sleep is fatigue. It is said that prisoners upon the rack have slept through sheer exhaustion while undergoing the horrors of torture. In a like manner, if one is tired enough he will be able to sleep on the floor or on any manner of uncomfortable bed, although he will not thoroughly relax. To the person who has known the luxury of sleeping on a good quality bed, though, sleeping on a worn out, sagging mattress and spring is almost as much torture as going to sleep on a prisoner's rack.

**War and Peace**

Development of the flame thrower, which first became a military weapon during World War II and has been used extensively by the Army in Korea, led to the peacetime perfection of a highly proficient weed killer. Tests at the Army Chemical Corps Center, at Edgewood, Maryland, proved that a thin jet of burning, jellied gasoline would kill weeds between rows of plants without harming the plants themselves.

**Deciding Issue**

If it had not been for the magic of the name "George Washington" the fabulous Phineas T. Barnum may have lived out his life in obscurity as a poor country storekeeper. One day, the man who was to become known as "the greatest showman on earth" heard an interesting story of a remarkable Negro woman, Joice Heth, who claimed to be 161 years old. When he went to see her, purely out of curiosity, she asserted that she had been the nurse of George Washington. Barnum became so excited upon discovery of documentary evidence to back up her claims, he decided to sell his store and exhibit the strange old woman in the east. The tour proved so successful, and stirred up so much interest, he was inspired to engage in other similar ventures. Finally, he formed the partnership with James A. Bailey out of which grew the most famous circus in America.

**COCONUT JAM BARS**

NANCY HAVEN

SOMETHING NEW AND DIFFERENT for the cookie jar . . . there are three parts to this special bar-type cookie, full of rich, chewy goodness. Prepare the delicate topping while the bottom layer gets a 10-minute baking.

**Bottom Layer:**  
 1/2 cup Beet Sugar  
 1 cup sifted all-purpose flour  
 1 teaspoon baking powder  
 1/4 teaspoon salt  
 1 egg  
 1/4 teaspoon grated orange rind  
 1/4 cup butter or margarine, melted  
 1/4 cup tart red jam  
 Sift together Beet Sugar, flour, baking powder and salt.  
 Beat egg until thickened; stir in orange rind and sifted dry ingredients. Blend in melted butter or margarine.  
 Spread soft dough evenly in 8-inch square pan and bake in a moderate oven (350° F.) 10 minutes. Remove from oven and spread with jam.

**Topping:** Beat 1 egg and 1/2 cup Beet Sugar together well; stir in 1/4 cup melted butter or margarine and 3/4 cup shredded coconut. Pour mixture over jam layer, smoothing out to edges. Return pan to moderate oven (350° F.) and bake 25 minutes longer. Cool in pan. Cut into bars. Makes 18 bars.

**Don't Be A "Litterbug"**

The Idaho Fish and Game department this week appealed to fishermen and picnickers to renew their campaign against the litterbug.

Department specialists described the insect as "a two-legged form of pest which emerges from hibernation with the first warm days of spring and starts scattering trash along roadsides, in streams and through cultivated fields." The species also damages fences, cuts deep ruts in croplands, and uses posts, signs and other property as rifle or shotgun targets.

The department said the Idaho Landholder-Sportsman Council has repeatedly cited the litterbug as one of the chief causes for the increasing number of "No Trespassing" signs that are being posted on private lands

in this state. "Sportsmen and picnickers who stop at the owner's home, ask permission to go on the land and respect the owner's wishes are usually welcome guests," the department pointed out.

The department also reminded that landowners may prosecute trespassers for any damage they may cause.

**Added Flavor**

A government crop inspector visited a Kentucky farm and began asking questions.

"Do you people around here have trouble with insects getting in your corn?"

"We sure do," said the farmer, "but we jes' fishes 'em out and drinks it anyhow."

TO LEARN HER SECRET

This Sunday is Mother's Day, as many of us know. To some, it may be just another day; yet to others, a very significant day.

It is indeed fitting that one day is set aside to give her special recognition, showing our respect and gratitude for all she has done for us.

We can show our devoted expressions of thanks in a variety of ways: A beautiful card, a box of candy, flowers, or a special gift.

Some find it difficult to express their feelings in words on such occasions, to be sure. But even a simple and sincere word can go a long way.

Nevertheless, let us pause this Sunday from our daily routines and go to church, bringing forth our highest expression of gratitude.

POLIO VACCINATION SEEMS TO BE PROVING EFFECTIVE

There were fewer cases of polio in Idaho during the first four months of this year than any year since 1946, it is noted in a recent tabulation of polio incidence from the health department's division of vital statistics.

Although it is a little early yet to tell definitely, it does appear that the health department's stepped-up polio vaccination program during the past year has been responsible for lowering the polio incidence.

As has been pointed out before, virology studies have shown that the vaccine is effective in building up an immunity to poliomyelitis.

Well over a half million polio shots have been given in Idaho during the past year, and any appreciable decrease in paralytic polio - especially among the age group under 20, can be almost assuredly attributed to the effectiveness of the Salk polio vaccine.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION. In Kendrick Joint School District No. 283, Latah County, Idaho

NOTICE IS HEREBY GIVEN. That the annual school meeting of School District No. 283, County of Latah, State of Idaho, will be held on Saturday, the 25th day of May, 1957, at the Kendrick High School school house and the Juliaetta School house in said district.

NOTICE FOR PUBLICATION OF THE TIME APPOINTED FOR PROVING WILL, ETC. In THE PROBATE COURT OF THE COUNTY OF LATAH, STATE OF IDAHO

will be reflected best by disease incidence statistics for the peak of the "polio season" - July, August and September - but indications at this early date point to fewer cases for Idaho in 1957.

So far in 1957 there have been only two cases of polio reported - one in February and one in April. This time last year, 11 cases had been reported, and, going back another year (1955) 21 cases had been reported.

It is one thing to be taxed to give agricultural "charity" in the form of soil bank payments to a man who can not make enough money to feed his family.

It isn't time for a limit on payments? Wouldn't this \$61,000 have done a lot more good for agriculture in Colorado if 12 farmers had received \$5,000 each instead of one farmer getting \$61,000?

It's time farmers and ranchers demand some system for placing a ceiling on farm payments. If farmers, ranchers and their organizations don't do it themselves, their city cousins are going to wake up one of these days and do it for them.

To Calibrate A Weed Sprayer. The following suggested system of field calibration is so simple that anyone can do it. Just follow these directions:

WEED KILLERS! FOR SELECTIVE SPRAYING IN GRAIN AND GRASS 2, 4-D AMINE

FOR SELECTIVE SPRAYING IN PEAS - LENTILS - CLOVER METHOXONE

FOR NON-SELECTIVE CONTROL OF CANADA THISTLE AMINO TRIAZOLE

(washday) detergent. 2. Start the motor running and get a good mix. 3. Measure off distance of exactly 40 rods in the field you are going to spray or on ground that is similar (not smooth and hard as a road).

Repeat the calibration procedure with the mixture you wish to use. It will vary slightly from the previous run. Make the necessary adjustments until the desired mixture is obtained.

Spring Is "Bustin' Out All Over" Yes, that could well be the title of a report from "this canyon" as of Tuesday evening, May 7.

Correspondent Needed. Mrs. Frank Holsington, our present correspondent on Big Bear ridge, says that the rush of spring work will make it impossible for her to continue writing this news.

Are Scheduling Dance. The local V. F. W. Post and Ladies' Auxiliary are scheduling a semi-formal "Spring Ball," at the Kendrick High school gymnasium this coming Saturday evening, May 11, to begin at 9:00 o'clock.

## HELLO, FOLKS:

There's an old saying that "You can't make a silk purse out of a sow's ear," and it's very true. So you can't expect peak performance from your motor when using an inferior motor oil. However, to get the best, let us fill that crankcase with our famous Royal Triton — then you're set — you're safe — and can enjoy motoring with the peak performance of your car! One filling will convince you!

Judge (to witness): "Was your friend in the habit of talking to himself when he was alone?"  
Witness: "To tell the truth, your honor, I never was with him when he was alone."

Have you tried our Union Diesel Fuel? The fuel that gives you top performance from that diesel en-

gine? If you haven't, pick up your phone and call us at 1251, say "Fill 'er up," and we'll do the rest. It's clean burning, powerful. You'll like it.

A farmer wished to insure his barn and a few stacks of hay. "What facilities have you," asked the insurance man, "for extinguishing a fire should it start?" The farmer pondered for a little while. Finally he answered: "Well, sir, sometimes it rains."

Let us wash, wax, grease and completely service your car before you make that Mother's Day trip. The cost is low — results big!

Paratroop Trainee: "But what if the parachute doesn't open."  
Instructor: "That's what's called jumping to conclusions."
