

PERSONAL MENTION

day and Monday.

Mr. and Mrs. Roy Ramey returned Tuesday from an eight-day vacation trip up in the Canadian Rockies to Banff, Lake Louise and Radium Hot Springs, returning home by way of Kimberly, Creston, Nelson and Trail. It was an extremely rugged and beautiful trip with much snow on the higher points. The days were perfect but the nights might be called "nippy" the temperature varying from 17 to 25 degrees in the night, until sunrise. Black and brown bear, elk, moose and mountain sheep were seen along the route.

Mr. and Mrs. Jim Farrington spent the week-end at their home here. He is employed on a road construction job up the Lochsa river.

Rev. and Mrs. Don Fife and family of Pullman were Sunday dinner guests of the Howard Hoffman family.

Mr. and Mrs. Fred Stedman left Sunday morning for McMinnville, Ore., and will go on from there to Hebo, Oregon, to visit their son, Rev. and Mrs. Sam Stedman and family.

Mr. and Mrs. Jack Travis made a business trip to Lewiston last Friday.

Mr. and Mrs. Keith Thornton and family of Peck were week-end guests in the home of her parents, Mr. and Mrs. E. M. White. Mr. and Mrs. Harvey Dale and daughter of Lewiston joined the group Monday.

The lots owned by Kenneth Brown, situated across the alley from the Ed. Brown home, are being filled in to make a trailer court. Mr. and Mrs. Pete Ware and Mrs. Gloria Wilson will park their house trailers there when finished.

Mr. and Mrs. James Mullin and family of Kennewick, Wash., were week-end visitors in the home of Rev. and Mrs. H. L. Deweber.

Max Dammarrell and Oral Craig returned home from Pierce last week, where they have been employed on a road project, which is now completed.

Mr. and Mrs. Geo. T. Davidson of Pullman were Sunday callers in the home of Mrs. W. A. Watts.

Mr. and Mrs. Ray Hathaway and daughters of Spokane spent the Labor Day holidays here with her parents, Mr. and Mrs. Clifford Davidson.

Mr. and Mrs. Douglas Christensen and daughter of Tekoa, Wash., were over the week-end guests in the home of her parents, Dr. and Mrs. D. A. Christensen.

Mr. and Mrs. Hiram Galloway spent the week-end at Ephrata with their children, Mr. and Mrs. Loyd Israel. They also drove to Wenatchee to get peaches and pears.

Mr. and Mrs. Jonas Parshal and son Jonie of Pomeroy were Saturday over-night guests in the home of her brother-in-law and sister, Mr. and Mrs. Ben P. Cook.

Mr. and Mrs. Otto Schupfer returned home last Wednesday from Shelly, Idaho, where they had been visiting their son-in-law and daughter, Mr. and Mrs. Ken Samuelson. The Schupfer and Samuelson families took a trip through Yellowstone and the Grand Tetons while away — the Schupfer's logging some 1,900 miles.

Mrs. Elwood Pearson and Mrs. Don Millard and baby of Lewiston were week-end guests of Mr. and Mrs. Walter Silflow. Mr. and Mrs. Earl Hund and family of Lewiston were Monday afternoon callers.

Mr. and Mrs. Oscar Medalen and Mr. and Mrs. Alan Medalen and children, the latter of Orofino, spent Sunday at Lake Chatcolet. They launched the boat Oscar just finished building.

Mr. and Mrs. John Kite, Council, Idaho were week-end guests in the home of Mr. and Mrs. Floyd Millard.

Mr. and Mrs. Bud Fey and sons visited T. B. Denny in Spokane, Saturday, and Mr. and Mrs. Wallace Newman at Post Falls, then drove on to Lake Pend Oreille to spend Sunday there.

Randy Wallace returned from Portland Saturday evening, being met at the Lewiston airport by his grandparents, Mr. and Mrs. L. A. Wallace.

Mrs. Harry Baker returned from Spokane last week, where she had been visiting her son-in-law and daughter, Mr. and Mrs. Thomas Brown and family.

Mr. and Mrs. H. M. Barber and

BIG BEAR RIDGE

(Delayed)

Diane Emmett of Lewiston has been visiting her father, Roy Emmett and family.

Maurice Myers has gone to visit his sister in Denver, Colo., having spent the summer with his niece, Mrs. Claude Jones and family. Roger Jones drove there with him and returned home by plane.

Jackie Maynard of Lewiston has been helping his uncles, Bernard and Ray Jones, during harvest.

Mr. and Mrs. Wesley Beck and family of Spokane; Mr. and Mrs. Ray Lackner and daughter of Deer Park, Wash., and Mrs. Marion Rathbun of Moscow were recent visitors at the Mrs. Johanna Nelson home.

Arnold and Harold Halseth spent the week-end at their home here.

Mrs. Stanley Cox and children, Carol Lynn, Betty Ann, Edward and Donald returned to their home at Biloixi, Miss., having spent the summer with her parents. Mr. and Mrs. Ed. Halseth, s. th. Arnold-Halseth took them to Spokane.

Sherri Bennett has returned to her home at Spokane, after spending several weeks with her uncle and aunt, Mr. and Mrs. Claude Jones.

Robert Huffman of Oregon spent a few days here, taking the remainder of their household goods to their new home.

Suzanne Moline has returned to her home in Spokane, having visited her aunt, Mrs. Oscar Slind and family.

Mr. and Mrs. Ray Shoemaker of Connell, Wash., recently visited her brothers, Bernard and Ray Jones.

(This Week)

Rev. and Mrs. Manley Helleson and family of Pottlatch and Mrs. Peter Hesby of Deary were Monday visitors on the ridge.

Mr. and Mrs. George Jones, George Anne and Penny of Kennewick, Wn., were Sunday visitors in the home of his parents, Mr. and Mrs. E. H. Jones.

Sherri Emmett has returned home, having spent the summer with her father in Oregon.

Miss Maxine Slind of Spokane spent a few days at her home here.

Misses Gwendolyn Lackner and Patricia McNab of Spokane returned to their homes on Thursday after visiting at the Mrs. Johanna Nelson home.

Mrs. Loren Hoisington has been helping her parents, Mr. and Mrs. John Maund, move to Juliaetta.

Mr. and Mrs. Orville Halseth and daughter of Lewiston and Mr. and Mrs. Boyd Leland and daughter Lisa Rae of Clarkston were Sunday visitors at the Ed. Halseth home.

Mr. and Mrs. Roy Emmett, Dale and Steven were Sunday visitors at Ahsahka.

Edwin and Miss Bertina Forest were Lewiston visitors on Wednesday.

Mr. and Mrs. Alex Larson of Leland are making some improvements to their newly purchased home here before moving.

Ernest Helmgartner and assistants are making good progress in the building of the new home for Mr. and Mrs. Cecil Chamberlain.

The Mesdames Walter and Harry Benscoter and Nora Callison, all of American ridge, attended the pink and blue shower honoring Mrs. Frank Hoisington at the Community Hall on Thursday afternoon.

Visitors at the Robert Arrasmith home Sunday were Mr. and Mrs. Arthur McMillian of Cloverland and Mr. and Mrs. Pearl Hazeltine and daughter. Monday visitors were Mr. and Mrs. Roy Autrey and sons of Asotin and Mrs. Susan Starling of Dayton, Wash.

Mr. and Mrs. Robert Arrasmith visited Mrs. Floy Parnell at Colfax, Saturday.

The Happy Home Club will meet at the Community Hall next Tuesday at 2:00, with a pot-luck lunch to be served.

There is no substitute for good food, and you will find every kind to tickle your palate at Blewett's Grocery in Kendrick. 1-adv

little granddaughter Robyne Barrett, of Coeur d'Alene, were house guests in the home of their son-in-law and daughter, Mr. and Mrs. Bob Watts, Monday through Friday of last week.

FIX RIDGE NEWS

The Juliaetta Lutheran Missionary meeting will be held Wednesday, Sept. 11th, at 2:00 p. m., in the church basement. Mrs. J. M. Hedler will be the hostess.

Elder and Mrs. Estil Richardson and Buddy of Woodland, Wash., visited over the week-end with Mr. and Mrs. Wallace Clark.

Alex Weaver of Kendrick and Mrs. Joyce Jarrell and children of Clarkston, were Wednesday supper guests of Mr. and Mrs. Adolph Denner.

Mr. and Mrs. Adolph Denner and daughters were Sunday dinner guests of Mr. and Mrs. Lselie Heimgartner on Stony Point.

Mr. and Mrs. Ralph Richardson and family of Eugene, Ore., are visiting relatives and friends on the ridge this week.

Sunday dinner guests of Mr. and Mrs. Tom Denner were Mr. and Mrs. Ben Cummings, Miss Burneda Cummings and Mr. and Mrs. Earl Arnold, all of Spokane; Mr. and Mrs. Geo. F. Denner and daughters and Mr. and Mrs. Dale Laird. Mrs. Eleanor Denner was an afternoon visitor.

Mr. and Mrs. Fred Brazier of Genesee visited Sunday afternoon with Mr. and Mrs. Oliver Clark.

Mrs. Geo. Denner and Linda visited Sunday evening with Mrs. Walter Koopp at Cameron.

Mr. and Mrs. Virgil Post and daughters of Genesee visited Friday evening with Mr. and Mrs. Ernest Denner.

Mrs. R. C. Woodruff and Mrs. Martin Poleson and son, all of Lewiston, were Saturday supper guests of Mr. and Mrs. Geo. Giese.

Mr. and Mrs. Ralph Richardson and family visited Friday evening with Mr. and Mrs. Adolph Denner.

Debra Denner visited from Tuesday to Friday with Mr. and Mrs. Kenneth Denner in Lewiston.

Florence Post of Genesee visited over the week-end with Shirley Denner.

Mr. and Mrs. G. F. Denner and daughters, Mrs. Adolph Denner and daughters and Mrs. Wallace Clark were Lewiston visitors Tuesday.

Mr. and Mrs. Oliver Clark were in Lewiston on business, Wednesday.

Mr. and Mrs. Bennie Weatherby and Jimmy camped and picnicked from Wednesday to Friday on the Selway, Red River Hot Springs and Buffalo Hump.

Mr. and Mrs. Dick Carlton of Lindwood, Wash., and Mrs. Gladys Rukgaber of Darby, Mont., visited over the week-end with Mrs. Caroline Carlton, and attended the wedding of Billy Carlton, Saturday evening.

Mr. and Mrs. Lawrence Slead visited Monday evening with Mr. and Mrs. Adolph Denner.

Mrs. Wallace Clark attended a party honoring the birthday anniversary of her mother, Mrs. Leah Cardinal, at Kendrick, Thursday afternoon.

Mrs. William Hartung of Spokane and son Donald Hartung of Portland, were Thursday dinner guests of Mr. and Mrs. Walter Denner.

Mrs. Walter Denner and Judy visited with Mrs. John Schwarz in Cameron, Sunday afternoon.

Mrs. John Chapman and daughter and Mrs. Annie Weaver, all of Kendrick, visited Thursday afternoon with Mrs. Adolph Denner.

Mrs. Walter Denner and Judy were Lewiston visitors on Friday.

Elmer Weaver returned to his home

Saturday after spending the summer vacation helping Adolph Denner with farm work.

Mr. and Mrs. Kenneth Denner of Lewiston visited over the week-end with Mr. and Mrs. Adolph Denner.

Family Reunion Sunday

Mrs. Elsie Deobald had as house guests over the Labor Day week-end her sister, Eleanor Wegner and her mother, Mrs. Emma Wegner of Twin Falls.

On Sunday Mrs. Deobald entertained at a family reunion dinner in her home. Guests included her four sisters and their families, as well as her mother; Mr. and Mrs. Allen Sather and daughter Marilyn of Genesee; Mr. and Mrs. Gary Sather and children of Moscow; Mr. and Mrs. W. A. Deobald and children, Moscow; Mr. and Mrs. Roy Bohn of Pottlatch and their daughter Miss Irene Bohn of Spokane; Mr. and Mrs. J. C. Allison and Mr. and Mrs. Bob Lange and children, Spokane; Mr. and Mrs. Otto Schupfer, Juliaetta, and Mr. and Mrs. E. A. Deobald.

Mrs. Wegner and daughter Eleanor left for their home Monday.

Labor Day Very Quiet

Labor Day in Kendrick was one of the quietest days that anyone could imagine. As one resident put it, "you could fire a cannon down Main Street and not hit a soul," and that was all but true.

Service stations and garages were open, as was one cafe and the tavern — and of course the warehouses — for harvest must go on despite the desire of most to "take Labor Day." Warehousemen, however, reported a "below average" day's receipts, possibly due to some observing the holiday, but mainly to a slackening in harvesting operations as work goes down "the short side."

At Fort Chaffee, Arkansas

Fort Chaffee, Ark. (Official Army Pvt. Lorin L. Eggers, 22, whose wife, Madeline, lives at 527 27th St., Lewiston, Idaho, completed eight weeks of advanced individual artillery training Aug. 23, at Fort Chaffee.

He received instruction in the fundamentals of artillery and the firing of the 105 millimeter howitzer.

Pvt. Eggers is a son of Mr. and Mrs. George C. Eggers, Kendrick, and is a graduate of the Lapwai High school.

New Roof On Thurber Home

Workmen from the Mead & Howard Sales Co., Inc., have been busy the past few days putting a new roof on the L. S. Thurber home. A soft shade of silver green is being used and the results are most attractive.

To Expand Pipe Line Facilities
Salt Lake City — Plans for a major expansion of both the crude oil line and products line systems of the Salt Lake Pipe Line Co. were announced this week by P. N. Johnson, president of the company.
Johnson said 14,000 b/d of addition-

al capacity will be added to the Rangely, Colo.-Salt Lake City crude line by installing 100 miles of new 10-inch line and additional pumping facilities at existing pump stations. When complete, the crude oil line will handle 70,000 b/d.
Capacity of the products line, which

extends from Salt Lake City to Spokane, will be increased by 10,000 b/d between Salt Lake City and Boise, by installing additional pumping facilities. In addition, the carrying capacity of the products line from Boise to Pasco will be upped by 5,000 b/d by installing 80 miles of new 8-inch line. When construction is completed the new through-puts will be 56,000 b/d from Salt Lake City and 30,000 from Boise.

potential killer, escapes with only a \$50 fine. If he is only convicted of careless driving, the kind that usually wind up becoming involved in an accident, with death or injury to human beings, he can get off with a \$25 fine. Apparently some of our courts value a deer more highly than a human life. — Addison County (Vt.) Independent.

Laws Need Revision

In Vermont a man who illegally kills a deer may be fined from \$100 to \$300, as indeed several have this season. But a man who drives a car while drunk and thereby becomes a

Asparagus Cooking Suggestion

For variety in cooking asparagus, cook the stalks, and for each serving roll five or six stalks in a thin slice of cooked ham. Arrange in a baking dish, pour cheese sauce over it and broil until the cheese is bubbly brown.

Weather Bureau Seeks Protection Against Tornadoes

WASHINGTON—"Tornado Alley," the incubator of nature's deadliest storms, is being watched this year as never before.

Once a twister has bored down to earth, the only defense is to get out of the way. To save more lives, Weather Bureau scientists are devising new tools to quicken warning systems and learn more about the nature of the complex storms.

One new instrument forces potential tornadoes to flash their own alarm. Called a "pressure-jump indicator," it records the ominous rise in pressure that often signals the birth of a tornado in storm-breeding squall lines.

It is these long frontiers of thunder, wind, and rain that turn unstable air currents into roaring, spinning funnels of destruction.

This year, more than 100 pressure-jump indicators are being operated in the severe storm belt—Kansas, Missouri, Oklahoma, and Texas. The instruments have been set up in police stations, fire houses, city jails, and other places where attendants voluntarily keep an eye on them 24 hours a day.

If barometric pressure rises suddenly, a light goes on and a buzzer sounds until turned off. The observer alerts the nearest weather station by telephone.

Radar then starts tracking the dangerous squall line, according to Dr. Morris Pepper, chief of the Bureau's severe-storms research unit.

Planets Have Own Heating Systems

WASHINGTON—The giant planets of the solar system—Jupiter, Saturn, Uranus, and Neptune—have their own internal heating systems. Though they are far from the sun, the amount of solar heat they receive is enough to maintain a temperature of 225 degrees below zero on Jupiter, and somewhat lower temperatures on the others.

There is growing evidence that the sun is not the only source of heat these planets have, according to Dr. Gerard P. Kuiper, of Yerkes Observatory. The vast "weather" phenomena observed on these planets cannot be caused by solar heat alone, but may be explained by some form of internal heat, perhaps resulting from the concentration of mass toward the center of the still contracting planets, Dr. Kuiper points out in outlining still unsolved problems in the solar system astronomy.

In the atmosphere of Saturn, for example, clouds as large as the entire earth can be detected about once a decade. They are apparently due to major eruptions from the planet's interior, Dr. Kuiper says. Because different zones of the very thick atmosphere rotate at different speeds, the clouds soon stretch out into belts parallel to the Equator. Similar cloud formations are observed, somewhat oftener, on Jupiter. They vary in color—brick red, chocolate brown, blue, amber, and white.

Ingenious Insects Stay Dry Walking on Water

WASHINGTON—Water provides a dry home to a surprising assortment of creatures.

Through ingenious adaptations, they stay dry as they walk, eat, fight, and reproduce on the thin film that covers ponds and lakes, rivers and oceans.

Insects that live on the film have special equipment. They are light, and their feet are covered with tiny hairs, coated with water-repellent wax.

Some are heavy enough to bend the water into little dimples where their feet touch, but the film does not break. The depressions in the surface throw shadows on the bottom in shallow water, often seen more easily than the insect itself.

Americans Smoking More Than Ever Now

WASHINGTON—Americans are smoking more cigarettes than ever, despite reports indicating a link between smoking and lung cancer, a government tobacco expert stated.

It was indicated that Americans consumed 399 billion cigarettes in the fiscal year ending June 30, a 3 per cent increase over the preceding year.

The government expert said a decline in smoking in the 1953-54 coincided with newspaper stories, magazine articles and television programs concerning smoking and lung cancer. At that time, cigarette consumption dropped to 378 billion after reaching 397 billion a year earlier.

Big Business

WASHINGTON—The Forest Service of the Agricultural Department administers 181,000,000 wooded acres in 38 states, Alaska, and Puerto Rico. By the end of 1956, an estimated 50,000,000 persons had visited the national forests to picnic, swim, camp, fish, hunt, and ski.

Cost of Pensions, Retirement Plans, Rising Steadily

CHICAGO—The annual cost of private and public pensions and retirement programs has been rising steadily in keeping with the growth of these plans in recent years and added up to more than \$13 billions in 1956.

That sum represents the combined payments by employers and employees as contributions into the funds to provide the benefits under the various plans. On an overall basis, close to two-thirds of the payments were made by employers, including Government, for those on the public payroll; but the employer proportion is very much larger under private plans alone, insured and noninsured.

Indicative of the size they have attained and their economic impact, the combined pension and retirement program contributions in 1956 were the equivalent of about 4 cents of every dollar of total personal income before taxes last year. They figure out to approximately \$200 for every-body employed in the civilian working population.

With contributions of more than \$13 billions a year and still rising, and with combined assets that approached the \$75 billion mark at the end of last year, pension and retirement programs have become a major factor in the nation's savings and investment process though there are basic distinctions with regard to how private and public plans operate in this respect.

The size and scope of these plans, and the certainty that they will grow in the years to come, likewise point up one of the big stakes in the current fight against inflation and the efforts to prevent a further erosion in the buying power of the dollar.

Forestry Program Has Proved Merits

WASHINGTON—Forest industries of the United States are leaders in the greatest forestry renaissance the world has ever known.

An era of forest management, launched with the birth of the industry-operated American Tree Farm System just 16 years ago, already has seen timber growth brought back into balance with removal—for the first time in the twentieth century.

Industry's leadership in the Tree Farm movement reaches beyond the practice of good forestry on industry's own lands. It is reaching out to help and encourage the 4,500,000 small landowners whose holdings constitute the greatest potential timber source in the country.

With investments in plants, equipment and land conservatively estimated at more than \$20,000,000,000, the wood-using industries of the country have adopted good forestry practices as a matter of good business and good citizenship.

Wood Preservatives Can Make Furnishings Last

CHICAGO—Homeowners can add years to the useful life of wooden furnishings by treating them with a wood preservative.

Picnic furniture, swings and gliders, and other accessories to outdoor living are easily treated against wood decay by applying a preservative to dry unpainted or unvarnished wood. Paint can be applied over the preservative after it is thoroughly dry.

Two excellent, easily applied materials can be obtained in either concentrated or ready-to-use form, from hardware stores, paint shops or lumber yards. They are pentachlorophenol, often referred to as "penta," and copper naphthenate.

Both are sold under various trade names. The label will indicate when one of these chemicals is present and give directions for applying it. If a large quantity of preservative is required, it is less expensive to buy a concentrate and mix it, as directed, with a light diesel oil or fuel oil.

Engineer Output of Colleges Is Increasing

MINNEAPOLIS—In our technological race with Russia, U.S. schools have graduated an estimated 35,000 bachelors of engineering in the academic year recently completed. The annual output is up 50 per cent from the alarming low point of 1953-54 and will show a further increase of close to 10 per cent next year.

Over 5,000 additional men received advanced engineering degrees during the 1956-57 academic period. The size of this group of masters' and doctors' degrees varies little from year to year; it is offset by a closely equivalent number of four year engineering bachelors who remain in school for graduate study.

Now Standard refines a rare "rock" to give U.S. a new source of gasoline

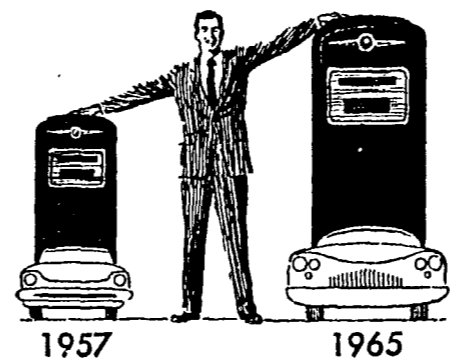

High pressure water jet shatters solid Gilsonite. Flume hose washes particles down mine floor to pipeline.

Petroleum products are now being made without crude oil. Standard found the answer in a rare hydrocarbon called Gilsonite. But it took \$16,000,000 and a vast research program to do it. Deep in the mountains of Utah our scientists worked out a better, faster way to mine Gilsonite. Meanwhile our engineers designed the nation's first pipeline capable of carrying solids suspended in water... over a rugged terrain to a spot 72 miles away.

There Standard* built the nation's first privately financed refinery to make petroleum products from a material other than crude oil. Today that refinery turns Gilsonite into high octane gasoline for motorists, and the purest coke known for making steel, aluminum and other metals. In our country's search for new sources of fuel, the development of Gilsonite is a major breakthrough. It means the equivalent of 100,000,000 barrels of oil added to U.S. underground reserves—important help in meeting our country's growing petroleum needs.

Progress in the West means...

New sources of gasoline to fuel 5½ million more motor vehicles by 1965†

STANDARD OIL COMPANY OF CALIFORNIA
plans ahead to serve you better

Company's Unique Program Sending Many Kids to Camp

NEW YORK—Many underprivileged children went to camp this summer as a result of a unique program instituted by a Pennsylvania manufacturing company.

The company, the Niagara Therapy Corporation of Adamsville, Pa., recruited its sales force of more than 1,000 distributors, dealers and salesman behind the unusual campaign which it termed "Operation Holiday."

Owen K. Murphy, president of the company, said that each of his dealer and distributor organizations were asked to sponsor at least one or more children in their community for camp.

In describing the plan, Murphy said that each dealer organization set up a Crown Pin Club made up of local salesmen who have done outstanding sales jobs. The primary function of each club is to aid underprivileged children. Each member of the club makes a weekly contribution towards the maintenance of the organization.

"Many of our sales personnel have made the club their principal avocation," Murphy said.

"Not only do they finance the youngsters to camp, but they also visit, write, and send them gift parcels," he added. "For many of our people it's like going to camp themselves."

Completely subsidized by its members, each club holds regular meetings to consider and map plans for aiding the underprivileged children of the community. The organizations cooperate closely with local welfare agencies and civic organizations in placing the youngsters in camp.

'Dead' Languages Held Helpful

LOS ANGELES—If you want to put life in your English, then study the so-called "dead" languages.

With 27 per cent of English words derived from Latin and Greek, persons with even a primary knowledge of these languages are able to use English more intelligently and appreciatively, according to Paul Friedlander, professor emeritus of Latin and Greek at the University of California.

"Besides," he says, "it makes reading, writing and talking a lot more fun if you are aware of the family history of a word, such as the Greek origin of 'idea' and 'philosophy,' 'tragedy,' 'comedy,' etc."

"As science grows," Professor Friedlander declares, "so grows the use of Latin and Greek. Many new drugs and medical discoveries bear Greek or Latin names. And since popular magazines and newspapers now consider science a major news field, and since the terminology of psychology is now a household word, the public has more and more need to understand the words being used in order to avoid being confused."

Pen Not Mightier Than Typewriter, It Seems

LOS ANGELES—The pen may be mightier than the sword but the college student who uses it in preference to a typewriter is likely to get knifed when it comes to a term grade.

"In school work, business and private life the typewritten page is becoming the only acceptable form of communication," according to Dr. Allen Robertson Russon, visiting associate professor of office management and business education at the University of California, Los Angeles.

"The world is too big, busy and impatient to decipher bizarre handwritings," she said. "The typewriter has become an appendage of modern man's fingers and the ability to operate one is now as essential as handwriting used to be."

Yet, she said, many high school students who plan to enter college, where they must prepare volumes of term reports, essays and the like, aren't encouraged to take typing classes because they are studying an academic instead of a commercial curriculum.

Keep Kids Safe

CHICAGO—If you must store Junior's toys in the garage or basement, advises Toy Guidance Council, keep them as far as possible from your workshop equipment. Tools and machines usually attract youngsters who are not capable of handling them safely. Make sure your tools are out of their reach.

Cost Never Changes

PRINCETON, Mo.—When Mrs. Lorene Curtis, widowed Circuit Court clerk and recorder of deeds, filed out a marriage license for Ellis Wilcox, she charged him the usual rate of \$2, same as anyone else, even though she signed her own name as the prospective bride.

Litterbugs Have Been Around for Many Long Years

NEW YORK—Although "litterbug" may be a new word in the dictionary, the species is known to have existed at least as far back as the seventeenth century. But whatever its origin might have been, it is now more prolific than ever!

There is evidence that as early as 1612, warning signs were used in London to deter trash-tossers from their thoughtless deeds. And in 1784 Boston's Selectmen posted lengthy notices threatening prosecution for citizens whose littering habits they decried as being not only a public nuisance but also a health hazard.

But despite the conscientious efforts and local accomplishments of government authorities through the years, the litter problem in America today is more acute than it has been at any other time in history.

While the penalties for littering are not the same in the various states, and while considerable experimenting with different types of signs is going on, one significant factor has already emerged. The most effective warning sign is the type that says little—but says it forcefully!

Utah, for example, has a sign which is brief, but to the point—"299 Fine For Littering Highways." New Hampshire, the first state to post the specific amount of a fine, uses the following message: "\$25 Fine For Throwing Trash On Highways," while New Jersey signs say "Please! No Litter—Fine \$50."

Dogs Are Not Quite So Keen-Eyed

CHICAGO—Contrary to some opinion, dogs do not have very sharp or efficient sight. They use their eyes mainly to avoid obstacles, never to observe details. They get their chief pleasures through their other senses. However, vision helps them find their way home when they get lost.

The vision of different dogs may vary, even if they belong to the same breed. Some can see a moving object 800 yards away but can only recognize it at a distance of 150 yards. A large dog sees farther than a very small one. Quick recognition depends upon motion, and a dog recognizes its

master first by his gait—last of all by his face. Some of them can't recognize their masters at a distance of more than 10 yards, so it isn't surprising that, in hunting, dogs like to stay close to their prey.

Nearsightedness, farsightedness, and astigmatism occur among dogs in about the same proportions as among human beings, and eye diseases often attack them while they are yet young.

Women Workers Stay Home More Than Men

NEW YORK—When it comes to being stay-at-homes, more women than men fail to report for work in New York City offices on an average business day, but the score is about even in holding on to the jobs they have, the Commerce and Industry Association of New York, Inc., revealed following a year-long study of absenteeism and turnover among white collar workers.

The survey, which is the first to make definitive New York absenteeism and turnover figures available to employers as a measuring stick, was made by quarters covering the twelve months ended March 31, 1957. The 172 participating firms represent a complete cross-section of business and industry in the five boroughs, according to Thomas Jefferson Miley, Executive Vice President of the Association, and they reported on a total of 69,367 office workers—51.4 percent female and 48.6 percent male. The survey report showed:

During the covered year, the average absentee rate was 3.4 of each hundred women employees as against 2.0 of each hundred men.

Safe Operation

NEW YORK—New York Airways, operator of the world's first scheduled passenger helicopter line, has won a National Safety Council Award.

Since it began in 1953, the helicopter line has carried 100,000 passengers without accidents. It operates between New York's major airports.

Not Real Yogi

STOCKHOLM—An aide explained during Prime Minister Jawaharlal Nehru's tour of Scandinavia that the Indian leader is not a yogi.

Nehru begins each day by standing on his head for 3 minutes. This, the aide explained is not yogi, but 68-year-old Nehru's "elementary exercise to improve his blood circulation."

Weather Predicting Peculiar Knack of Seminole Indians

WASHINGTON—Still relatively primitive, the Seminole of the Florida Everglades predict hurricanes as much as a month in advance.

They have their own curious version of the great Flood of Noah and an even more curious creation legend in which the story of Cain and Abel is mixed incongruously with the Christian tradition.

Punishment for crime is usually in the form of whipping administered by a relative. For murder the penalty can be death at the hands of the family of the offender, if it is inflicted within 5 days. Otherwise the slayer gets a respite until the next "Corn Dance," which may be several months away.

These are among the beliefs and customs of the Seminole related by Dr. Frances Densmore, research associate of the Bureau of American Ethnology, in a publication on the music of these people issued by the Smithsonian Institution.

Ability of the Indians to predict disastrous storms far in advance puzzles weathermen. For instance, Dr. Densmore relates, the great hurricane in the fall of 1926, one of the worst ever to hit the area, was known to the Indians at least 4 days in advance. They were so certain of it that they persuaded the Indian agent to move all his charges to a safe place, and thus they were entirely prepared for the catastrophe.

Rare Disease Puzzled Doctors

CHICAGO—A case of "seal finger," a disease usually found only among Scandinavian sealing expedition members, has been reported in the midwestern United States.

The disease, called "Spekkfinger" (blubber finger) in Scandinavia, occurs so rarely in this part of the world that it has been described in American medical literature only once before.

The midwestern case occurred to a St. Louis fur company employee who worked as a blubberer scraping fat from the inside of seal skins during an expedition to the Pribilof Islands in the Bering Sea.

Near the end of the season, one of his fingers, which had been cut, began to swell and become painful. American doctors, unfamiliar with the disorder, unsuccessfully treated it with "hot soaks," lancing and draining, and finally penicillin. Eventually an older company official suggested it might be seal finger. Tetracycline was given and the finger healed.

Marquis Once Refused To Kiss Hand of Lady

WASHINGTON—A pair of gloves now in the Smithsonian Institution recalls an incident in the early history of Baltimore. They were worn by a belle when the Marquis de Lafayette visited the Maryland city. When he met the lady, the Marquis bent gallantly to kiss her hand, only to halt short of performance.

There, staring him in the face, was his own portrait, carefully worked on the back of the lady's glove. Lafayette could not, he explained, kiss his own likeness.

Many of today's gloves do much more than serve their basic purpose of warming and decorating the hands. Special gloves are now made for special purposes. To name a few, there are fireproof gloves, rubber gloves for surgeons and electrical workers, and electrically heated gloves. A surgeon's glove impregnated with lead has been perfected to allow doctors to work with their hands constantly exposed to x-ray.

Extra Leisure Time Changes Way of Living

NEW YORK—Increase of leisure time is bringing the United States and other modern industrial nations to a new stage of civilization, says August Heckscher, Director of the Twentieth Century Fund.

"The working day has been shortened," Mr. Heckscher notes. "Two decades hence the five-day work week is almost certain to have been reduced to four. Vacations have been lengthened, and meanwhile at both ends of the life span—in youth and in age—the period uncommitted to a regular occupation has been extended."

Free time—and perhaps leisure time—is now within the grasp not of a small group of society as it has been through most of history; it is promised for all, and all seem determined to pursue it as a goal, Mr. Heckscher says. "The consequence," he points out, "must not only affect the economic system, but the whole quality and texture of the country's life."

Texas Is Host

AUSTIN, Tex.—The State of Texas was host to 8,400,000 out-of-Texas visitors in 1956. They spent \$379,000,000 while in Texas. A survey by the State Highway Department indicates that the average visitor spent \$7.71 per day

State Dept. Needs Employees
Wash., D. C. — Africa, South America, Europe, Asia . . . an invitation to work in a foreign land is now being issued by Mrs. Mary Johnson and Miss Edythe Goellner, personnel officers of the United States Department of State, to residents of the Spokane area. The work, at one of 270 embassies, legations and consulates in 78 countries, offers travel, the prestige of representing your country abroad, and the chance to work with peoples of foreign lands.

If you are a high school graduate between the ages of 21 and 35, single with no dependents, in excellent health and have been an American citizen for at least five years, you may be able to make your dreams come true, but you must be willing to go anywhere in the world.

First step is an interview at the Washington State Employment Service office, S. 309 Howard St., Spokane, during the week of Sept. 3. Office hours are from 9:00 a. m. to 5:00 p. m. daily, until 7:00 p. m. on Wednesday evening, and from 9:00 a. m. to noon, Saturday.

New Diesel Locomotives

The Northern Pacific last week received the last of 40 new diesel locomotive units ordered for delivery during the last half of 1957.

This brings the number of diesel units acquired this year by the N. P. to 80. Cost of the fleet of new locomotives, built by General Motors, is nearly \$14,000,000.

Of the units just received, 12 1750-horsepower road switchers and five

12000-h. p. switchers have been assigned to the St. Paul division. Twelve road switchers and seven switchers are slated for service on the Tacoma division, while four road switchers have been assigned to the Yellowstone division.

Steam locomotive operation on the N. P. is now confined to portions of the railway's Lake Superior and Yellowstone divisions and the Twin Cities yards. Complete dieselization is expected by 1959.

WINTER IS COMING

Now's the time to install **Electric Heating**

"ROOM-BY-ROOM" temperature control gives complete comfort throughout the home. Get ready for winter NOW

Now's the time to "go modern" . . . switch from fire to wire for the kind of convenience, comfort, and safety you never dreamed possible in home heating. Electric's "Room-by-Room" temperature control provides gentle, steady heat when you want it, where you want it, without muss, fuss, or bother. Electric can be installed in new or old homes for less than old fashioned kinds of heating. Maintenance costs are practically eliminated once and for all. And with low, low WWP rates, the cost of heating electrically is so much less than you probably realize. See your favorite dealer. Get a free estimate on modern electric heating for your home.

GOLDEN RULE
Sept. 3 - Mr. and Mrs. B. A. Kite were Tuesday dinner guests of Mr. and Mrs. George Finke.

Mrs. George Wilken of Kendrick spent Wednesday with her sisters, Alma Betts and Mrs. Kite. The three held a chicken cleaning bee.

Altha Rathbone, Daisy Stage and Mrs. D. V. Kuykendall were among the callers at the Oscar Lawrence home the past week.

It's "back to school bells" for the majority of youngsters this morning - and the oldsters are wondering what became of the summer!

Mrs. D. V. Kuykendall and Jerry went to Spalding Sunday to the Pat Holiday home to attend a pink and blue shower given in honor of Mrs. Bob Emerich, who is a sister-in-law of Mrs. Holiday.

Mr. and Mrs. Vester Daniels visited Alma Betts Tuesday evening. Mrs. Daniels was preparing to go back to her school teaching duties at Deary.

Mrs. D. V. Kuykendall and son Jerry were Lewiston shoppers on Thursday - preparing for school.

Mr. and Mrs. B. A. Kite went to Orofino Friday, where he will build a fireplace for Mr. and Mrs. Don Christensen in the new home they have under construction there.

Lois Vaughn visited with Mrs. D. V. Kuykendall Friday afternoon. Kathy and Randy Elben of Lewiston are spending the holiday weekend with their grandparents, the Roy Martins, while their parents are on a fishing trip.

Mr. and Mrs. Marion Rowden of Kendrick and Mrs. Gail Aldin, a niece, of Seattle, visited Mrs. Rowden's father, George Ring, at the Alma Betts home, recently.

Mrs. D. V. Kuykendall spent Tuesday with Mrs. Russell Perkins, preparing for the Grange food booth at the Orofino Fair, Sept. 20, 21 and 22.

We Still Like Them
The carrot is considered an excellent foodstuff - and perhaps it has seen service above and beyond the call of "vegetable duty."

What To Do About Stink Bugs
Local residents are being plagued this year by hordes of stink bugs which are on potatoes, tomatoes, corn and many other garden vegetables.

There is no need for an annual furnace cleaning, for example. With no dust and dirt circulating through the ductwork, the necessity for periodic painting and redecorating is lessened.

FOR SALE - 6-room house, \$3,800. Harlan Fey. Phone 073. 35-1f
ANNOUNCEMENT - The Pat Cor-kill School of Dance is now open for enrollment of students 4 1/2 years and older for tap dancing and baton twirling classes.

SPACE CAN BE SAVED BY USING ELECTRIC HEAT

By eliminating bulky central heating plants from basements or utility rooms, many Inland Empire builders are offering as much as 150 additional square feet of useable living space to buyers of homes in the \$10,000 to \$20,000 bracket, recent Washington Water Power Co. surveys show.

WWP says the space gains are made possible by installation of wall, ceiling or baseboard-type electric heating units which do away with the traditional furnace, forced-air fans, ductwork and fuel storage facilities.

One of the most attractive features of electric heat is the fact that it can be installed with individual thermostats to provide individual, room-to-room control.

There is no need for an annual furnace cleaning, for example. With no dust and dirt circulating through the ductwork, the necessity for periodic painting and redecorating is lessened.

Control: The application of 1/2 lb. actual parathion or 5 pounds actual chlordane per acre as an emulsion spray is very effective.

True - Only Too True!
A man recently bought a foreign-made automobile and after careful computation over a month came to the conclusion that he was not getting the phenomenally high mileage so often credited to such cars.

BIRTH ANNOUNCEMENT
The birth of a new car, the Edsel, is announced by Ford Motor Company of Dearborn, Michigan.

FOR RENT - House. Available on Sept. 1st. Mrs. Asa Cook. 34-3
FOR SALE - 6-room house, \$3,800. Harlan Fey. Phone 073. 35-1f

THE Bull itin

Published Weekly by the Union Oil Service at Kendrick
W. L. "Bill" Rogers, Editor

HELLO, FOLKS:

Remember the old saying: "Never mind how old you are, it's how you feel that counts." Well, the same thing applies to your car, pickup or truck. It doesn't matter how old it may be, as long as it's in good mechanical condition — that is, if you're a user of Union's fine products. They work miracles in performance. Try them, won't you?

A drunk asleep in a bar began to show signs of life, so one of the customers smeared a little limberger cheese on his upper lip.

The drunk awoke and walked out the door. In a few minutes he came back in. Then he went out again only to return in a few more minutes.

Shaking his head in disgust, he said: "snow ush — the whole

world stinks!"

Cool weather lies ahead. Is your stove oil tank filled and ready to go? If not, pick up the phone and call us at 1251. Say "Fill 'er up," and we'll do just that. Better be safe than chilly!

"Your methods of cultivation are hopelessly out of date," said the youthful agricultural college graduate to the old farmer. "Why, I'd be astonished if you got even ten pounds of apples from that tree."

"So would I," replied the farmer drily, "it's a pear tree."

Let us grease, wash and wax your car. It costs very little to put it in peak appearance and performance.

Always travel "Union".

WHAT CAMERON FOLKS HAVE BEEN DOING THE PAST WEEK

Honored At Bridal Shower

Miss Leone Parks was honored at a bridal shower Monday evening at the Cameron Hall. Hostesses for the evening were Mrs. Herman Meyer, Mrs. Marvin Silflow and Mrs. Gerald Schmidt. Games were played with prizes going to Mrs. Dan Sullivan and Mrs. Charles Bowers.

Following this the bride-to-be was seated at the gift table to display the many lovely and useful gifts. She was assisted by her mother, Mrs. Homer Parks and her sister, Mrs. Harry Roach.

Dainty refreshments consisting of cookies, sherbet and coffee and punch were served at the close of the evening. Her grandmother, Mrs. Otellia Schmidt, poured coffee and her aunt, Mrs. Hugh Parks, served punch.

General News

Mr. and Mrs. Ted Weven and family spent Sunday with Mr. and Mrs. Willard Schoeffler and daughters.

Mr. and Mrs. Bob Lingenfelter and baby of Bremerton, Wash., were supper guests Saturday evening of Mr. and Mrs. Roy Silflow.

Mrs. Harl Whittinger called on Mrs. A. H. Bium and Mrs. Albert Glenn on Wednesday morning. On Thursday afternoon Mrs. Andy Cox visited with them. Mrs. Roy Silflow was also a recent caller.

Mr. and Mrs. Ernest Brammer and daughter Jolene spent Sunday evening at the Henry Brammer and Werner Brammer homes at Juliaetta and Kendrick.

Mr. and Mrs. Bob Draper spent Sunday afternoon and evening with Mr. and Mrs. Harl Whittinger.

Mrs. Walter Koepf and Mrs. Ernest Brammer and Jolene were Lewiston visitors on Saturday.

Mr. and Mrs. Aug. F. Wegner spent Thursday and Friday in Spokane with his brother, Arthur, later seeing him off on the plane, Friday.

Mr. and Mrs. Ed. Mielke and daughter Patricia and Mr. and Mrs. Dave Clayton and sons attended the barbecue at Kamiah, Monday. That evening the Clayton family were supper guests in the Ed. Mielke home.

Patricia Mielke spent Saturday with her sister, Mrs. Charles Parks and baby son at Juliaetta.

Mr. and Mrs. Ed. Mielke and Ted Mielke visited with her parents, Mr. and Mrs. L. S. LaHatt, in Pomeroy, Sunday afternoon.

Sunday visitors of Mrs. John Schwarz were Mrs. Walter Denner and Judy of Fix ridge; Mr. and Mrs. Lorin Westerman of Spokane; Mrs. Louise Cridlebaugh of Lewiston; Emma Hartung and Ida Stoneburner, and Mrs. Herbert Schwarz and JoAnn. That evening Mr. and Mrs. Wester-

man and Mrs. Cridlebaugh were supper guests of Emma Hartung and Ida Stoneburner. That evening the entire group called on Helen and Ted Mielke and Mr. and Mrs. Fred Newman.

Mr. and Mrs. Herman Newman and daughter Donna of Brush Prairie, Wash., spent the week-end at the home of Mr. and Mrs. Fred Newman. Those who visited Mr. and Mrs. Fred Newman Sunday evening included Mr. and Mrs. Herman Newman and daughter, Helen and Ted Mielke, Mr. and Mrs. Ed. Mielke and Patricia, Mr. and Mrs. Wally Newman and son, Mr. and Mrs. Geo. Allen and family, Mr. and Mrs. Harry Newman and family and Mr. and Mrs. Glen Newman and family.

Propose Firearms Registration

Wash., D. C. — Rep. Grace Pfof, has strongly objected to an Internal Revenue Service proposal to require registration of all firearms, and pistol and revolver ammunition manufactured and sold.

"If this regulation goes into effect it would penalize sportsmen and other law-abiding people everywhere in the hope of curbing a few citizens who use firearms for illegal purposes," she said.

Rep. Pfof voiced her objections in a statement prepared for hearings called by the Alcohol and Tobacco Tax division of the Internal Revenue Service to allow proponents and opponents of the proposed revision to be heard. She said the hearings had been called because many members of congress and others had registered protests when the proposed rule was first announced in May. She objected at that time.

The Idaho congresswoman said the new firearms regulation would increase record keeping for dealers and manufacturers, and would require sportsmen to sign for the guns and shells they bought.

"This would work a real hardship in Idaho," she declared, "because our large primitive areas which abound in game attract not only our own hunters but sportsmen from other areas as well."

"I am in sympathy, naturally, with the objectives of the proposed regulation," she continued, "but I am not sure it would successfully curb crime. Certainly it would tend to promote illicit sales, black markets in guns and ammunition, and other beyond-the-law practices."

Our Note: We thoroughly agree with Mrs. Pfof. The honest gun owner would register his — the others would not — and there would be absolutely no way of telling how many thousands of firearms would exist on which there was no record whatever. We in Idaho are pretty well satisfied with the present regulations under which we can obtain and use firearms. Let's leave it that way.

Yes, He's Still There!

The father played possum while his youngsters tried their best to rouse him from a Sunday afternoon nap to take them for a promised walk. Finally, his five-year-old daughter pried open one of his eyelids, peered carefully and then reported: "He's still in there."
