**Heart Artery Used Successfully In Repair of Throat**

LOS ANGELES — A promising new repair process for cancer-ravaged throats in which the large artery of the heart is used to restore the esophagus has been reported from the University of California Medical School, Los Angeles.

Dr. Joel Pressman, UCLA professor of surgery, described the new technique last week before the Southern Section of the American College of Surgeons in Palm Springs. The research has been supported by the U. S. Public Health Service.

The technique was developed during several years of animal experimentation, the UCLA surgeon said. It has been performed successfully in two human cases.

The large artery, known as the aorta, is the main exit of blood from the heart. It is obtained from a human artery bank where it is stored in a dehydrated state in a sealed tube.

The aorta may be used as an intact tube to replace the entire section of the esophagus situated in the neck. Or a portion of it may be used to "patch" the cervical esophagus, depending on how much of the organ has been removed in cancer surgery.

Actually the aorta serves as a "form" around which the body's natural repair processes rebuild a new esophagus. The artery may remain in place for many months but is eventually absorbed and replaced by new tissue.

The elastic tissue of the large artery seems ideally suited to the body's repair processes, Dr. Pressman said.

**'57 Savings Rate Topped Debt Rise**

NEW YORK — For the second time in the current decade, the American people last year added more to their "nest egg" in life insurance and other accumulated long-term savings than they expended their debt indicating a growing restraint on the part of the typical consumer in response to the growing impact of inflation on the family budget and the adjustment trend in the economy.

It is true, that the people at large went deeper into debt to the tune of more than a billion dollars a month as an average for 1957 in their borrowing to buy homes, cars, and other goods and services. The combined total of mortgages on one-to-four family nonfarm homes, consumer credit, farm mortgage and non-real estate debt, and life insurance policy loans increased by an estimated \$12½ billions for the year.

As against this, however, the total of accumulated long-term savings of individuals in life insurance, savings accounts, savings and loan associations, and current redemption value of U.S. Savings Bonds owned by individuals, rose by an estimated \$13½ billions during 1957.

**Roaches Held Potential Carriers of Diseases**

WASHINGTON — Cockroaches are highly dangerous potential carriers of human disease. This is stressed in a report of the Quartermaster Research and Engineering Center, recently issued by the Smithsonian Institution.

At least 18 species of cockroaches known to inhabit houses have been incriminated, naturally or experimentally, in transmission of infectious agents, or have been claimed to bite man. Several of the commonest species have been captured repeatedly in sewers, cesspools, and septic tanks and have been found migrating from sewers and dumps into nearby buildings. The predilection of cockroaches for human food is notorious. Thus, the scientists point out, the mechanism certainly exists for transference of disease organisms to man and domestic animals.

**Mathematics Returning To Former Eminence**

LOS ANGELES—Mathematics is finally returning to the position of eminence it held more than 4000 years ago, according to a professor emeritus of Latin and Greek.

Dr. Arthur Patch McKinlay of the University of California, Los Angeles, said statements by college deans throughout the country that the demand for college mathematics by students is at its highest peak evoke only a calm "I told you so" from the linguists.

"The linguists know that when our words were being worked out some 4000 or more years ago, the word mathematics meant 'learning,'" Dr. McKinlay said.

Broken down, the Greek word mathematics is composed of "matha" (learning), "mat" (what results in), and "ics" (pertaining to).

**Life Insurance Investments Upped During Past Year**

NEW YORK — The five East North Central States showed the largest regional dollar gain in life insurance investments in the most recent analysis released today by the Life Insurance Association of America.

The analysis, covering investments by geographic region at the start of last year for companies representing 86 per cent of total life insurance funds, showed a one year rise in these five states of \$834,805,000. This brought total life insurance investments in these states of the companies surveyed to \$14,995,773,000, nearly double the investment at the end of World War II.

The three Pacific States accounted for the second largest gain, the year's increase of \$753,001,000 bringing total investments in the region to \$9,312,868,000, about three times the 1945 figure.

In the four West South Central States, the year's increase was \$620,117,000 and the new aggregate \$8,797,723,000, up about 130 per cent from 1945.

In the three Middle Atlantic States, which lead the United States regionally in total life insurance ownership, the year's increase in life insurance investments was \$383,985,000, bringing aggregate investments of the life companies to \$14,218,915,000 or about 50 per cent over the 1945 figure.

**Alfalfa Club Is Just For Fun Group**

WASHINGTON—Ever since the days when Washington notables wore beards and sidebeards, they've gathered once a year to let down their hair.

Medium for the high jinks is the Alfalfa Club, with a membership limited to 150 of the nation's top diplomatic, executive, congressional, judicial, military, business, and professional men. They uphold tradition with an annual banquet, and with less formal get-togethers throughout the year.

The President, Vice President, and a quorum of the Cabinet are among Alfalfa's members. A World War II hero named Dwight D. Eisenhower was admitted to membership 12 years ago, long before destiny led him to the White House.

Despite its "Who's Who" composition, the club has no purpose beyond convivial fun. In a city where politics is a pervading, tensely serious business 364 days a year, the annual dinners give members an opportunity to forget political lines and lightly jibe at each other.

Climax of each Alfalfa banquet is a mock political convention. Members choose their own candidates for President of the United States. Needless to say, no candidate of the Alfalfa Party has ever garnered a single electoral vote—though many members have reached high office by both the Democratic and Republican routes.

**Egypt's Sphinx Gets Beauty Treatment**

WASHINGTON — There's nothing inscrutable about the Sphinx's present smile. The 4,500-year-old lady is getting a facial.

The Egyptian Department of Antiquities recently began cleaning and restoring the magnificent monument—an object of speculation, admiration, and mutilation since prehistoric times.

This is not the first time that the mysterious guardian of the pyramids has needed urgent care. King Thutmose IV ordered repairs some 3,500 years ago. It has received beauty treatments several times in the 19th and 20th centuries.

By and large, however, the colossal with a human head and lion's body has admirably weathered the erosion of old age and sand.

**Insecurity Is Often Cause of Insomnia**

CHICAGO — Physical contact—even if it's only your own hand touching your leg—helps overcome sleeplessness by providing a feeling of security, according to an Indiana sleep researcher.

Donald A. Laird, Ph. D., Lebanon, Ind., an industrial psychologist, said sleeplessness is frequently caused by some type of anxiety that keeps the person so "vigilant" that he can't go to sleep.

**Mountains at Sea**  
 WASHINGTON — The Atlantic Ocean hides the world's mightiest range of mountains, winding beneath the cold waters from Antarctica to the Arctic. Although peaks of the submerged chain average 10,000 feet, only the loftiest pinnacles emerge as islands above the sea.

## Science Makes Own Snow to Study Its Mysteries

WASHINGTON—Scientists have created miniature snow storms in their laboratories to unravel the mysteries of one of nature's greatest beauties.

No one has ever found two crystals of snow exactly alike, although thousands have been photographed. The six-sided crystals, as delicate as the finest lace, are copied by designers seeking exquisite patterns for dresses, china, and other objects.

A quarter of a century ago, Dr. Ukichiro Nakaya and his colleagues at Hokkaido University, Japan, began an intensive study of snow, the National Geographic Society says. By 1946 they had succeeded in duplicating in a cold chamber all the natural types of snow crystals.

After more years of research, Dr. Nakaya has reported that the variety in snow crystals is caused by differences in the temperature and the degree of humidity in the atmosphere. The discovery makes it possible for scientists to estimate upper-air conditions during a snowfall by examining the shape of snow crystals on the ground.

Snow forms through the condensation of water vapor on tiny particles of matter, such as dust, in the atmosphere. Each particle is only about five hundred-thousandths of an inch in diameter—so small that it can be studied only with an electron microscope.

In colder areas, crystals fall as individual units, but in warmer regions, crystals stick together while making their earthward journey. Such a group is called a snowflake, and, in extreme cases, it may grow to be four inches in diameter.

## Ocean Floor Holds Many Secrets

WASHINGTON—Scientists hope to pry open Davy Jones' locker to read the private diary of the earth.

Powdered rock, silt, plants, shells, bones, and meteorites have been dropping into the ocean abysses for billions of years. Layer after layer of sedimentary rock has formed, providing an eons-old chronicle of earthly happenings. In places this record may go back to the time when oceans were first formed.

A new branch of science has developed in recent years to study the history carved in stone at the bottom of the sea, the National Geographic Society says. Known as marine geology, it is so new that until 1948 there was no English-textbook in the field.

A major breakthrough occurred when a Swedish scientist, Dr. E. Kullenberg, invented the piston corer—a device for removing a long column of ocean sediment. So far, scientists have barely scratched the ocean floor with this promising technique, but they hope drilling will eventually help to answer such questions as "When did life begin?" and "How old is the earth?"

## Hospitalized Child Study Is Reported

CHICAGO — The personal handling of a hospitalized child by doctors and nurses is just as important to his parents as his medical care and treatment, according to researchers.

In a report on the reactions of 100 parents whose children were hospitalized, San Francisco researchers said that hospitalization is as hard on the parents as on the child and that modifications in hospital routine and adequate explanations by the physician, can do much to ease the parent's anxiety and their children's.

Of the 100 parents interviewed on the child's admission, all expressed anxiety regarding separation from their child. In 57 their anxiety was "overwhelming" and the parents "had such difficulty coping with their own fears and anxieties that they were unable to give support to their child," the authors said.

However, 44 of 68 parents interviewed on their children's discharge felt better about the hospitalization because of the "friendly personal handling" of their child by the hospital staff.

## Tree Farm System Has Grown Rapidly

CHICAGO — More than fifteen years ago the forest industries recognized the tree-growing potential of small woodlots and began doing something about developing them through the American Tree Farm System. Since that time the Tree Farm program has had solid support from the forest industries. Under sponsorship of the American Forest Products Industries it has spread to 45 states. More than 43 million acres of privately owned woodlands have been certified as Tree Farms.

## Accident Rate Up Among Nation's Pre-School Group

NEW YORK—In the past two decades the mortality from accidents among pre-school children in the United States has decreased only half as rapidly as the mortality from disease. While the death rate from diseases at ages 1-4 years was reduced by four fifths—from 417.3 to 82.4 per 100,000—between 1934-35 and 1954-55, the corresponding decrease for fatal accidents was about two fifths—from 56.5 to 33.1 per 100,000. Consequently, accidents as a proportion to the total mortality at the pre-school ages increased from about 12 per cent to nearly 30 per cent.

Currently, accidents take about 4,800 lives a year in our country among children 1-4 years of age; this is more than twice the death toll from pneumonia and influenza, which ranks second among the causes of death among pre-school children. Many more young boys than girls are fatally injured, with average annual accident death rates of 37.3 and 28.7 per 100,000, respectively, in 1954-55.

Motor vehicle accidents in recent years have accounted for about one-third of all accidental deaths among both boys and girls.

## Terrain Controls Migratory Flyways

BERKELEY, Calif.—Routes of migrating birds in the West may be determined largely by geological fault lines and mountain passes.

So thinks Dr. Loyal Holmes Miller, professor of biology emeritus of the University of California, Los Angeles, now connected with the Museum of Vertebrate Zoology at the University of California, Berkeley.

Much has been written concerning the pathways followed by migrating birds, Dr. Miller points out. But many of the routes are hypothetical, being drawn with a ruler laid down on a map. Too little is known of the specific routes followed.

Dr. Miller thinks that in the West two major influences are important.

(1) Geological fault lines: "My many camps along one or another of these lines have given me the feeling that they constitute fly-

lines for birds that are even more definite than some of the sky-ways of human aviators," he writes.

(2) Mountain passes. "Many observations have been made by aviators that record birds migrating at fairly high altitudes and quite independent of surface topography. On the other hand, I am inclined to believe that, all other factors being equal, the bird will fly at a moderate altitude if no barrier confronts him, and that mountain passes in the West have determined some very definite fly lines."

## Television Does Offer Benefits, Professor Says

UNIVERSITY PARK, Pa.—Many benefits may result from television, the favorite leisure-time pursuit of children, if we guide children to choose programs with greater discrimination and to associate this strong interest with other desirable activities.

So believes Dr. Paul Witte, professor of education at Northwestern University.

Dr. Witte said that in several studies it became clear that the amount of televising is not related closely to intelligence or scholarship. Excessive viewing of TV, however, seems to be associated with somewhat lower academic attainment.

"Although TV does not, on the whole, appear to influence educational attainment markedly, teachers and parents report undesirable effects in individual cases," Dr. Witte said. "On the other hand, there are children who have been stimulated to do better work because of interests engendered by TV."

### School Daze

NEW YORK — More than one young person out of ten today fails to complete grade school. Only about half of our young persons of appropriate age graduate from high school and only 14 per cent go through junior college or the first two years of college work elsewhere, notes a study recently made by the Twentieth Century Fund.

### Iron Countries

NEW YORK—Eight countries—the United States, Cuba, Brazil, France, the USSR, India, Southern Rhodesia, and the Union of South Africa—hold 90 per cent of the world's total reserves of iron ore. The United States and Southern Rhodesia together account for 60 per cent (24 and 36 per cent, respectively).

### NOTICE OF TAX LEVY ELECTION IN KENDRICK JOINT SCHOOL DISTRICT NO. 283, LATAH COUNTY, IDAHO

NOTICE IS HEREBY GIVEN. That a special meeting and election of the qualified voters of the above named School District will be held on the 12th day of April, 1958, at 1:00 o'clock P. M. to 5:00 o'clock P. M. at the Kendrick High School in said district, at which meeting it shall be determined by a majority vote of the qualified voters present and voting:

- Whether the Board of Trustees of said District shall be authorized to make a levy in some amount not exceeding five (5) mills, in addition to and above the levy which, as provided by law, the Board of Trustees may make without such election or authorization.

That the qualifications of voters entitled to vote at such meeting or election are:

- Electors of the State of Idaho.
- Residents of the District at the time of election.

In addition thereto said voters must possess one of the two following qualifications:

- (a) Parents or guardian of a child or children when such child or children are under twenty-one (21) years of age, and when such child or children are residents of the District at the time of election, or
- (b) A person who pays taxes within the district, and the husband and wife of such taxpayer if married. A payer of poll tax is not a taxpayer.

The election shall be by secret and separate ballot.

Dated this 12th day of March, 1958.  
A. O. KANIKKEBERG,  
Clerk of Joint School District No. 283, of Latah County, Idaho.

15-1

### High School Journalism Conference

U. of I., Moscow — Science reporting will be headlined at the 12th annual University of Idaho high school journalism conference to be held on the campus March 21 and 22, it is announced by Dr. Granville Price, chairman of journalism.

"High school students will have an opportunity to see a science reporter gather facts for a story and write it," said Dr. Price. "Later the students will turn reporter and interview another science expert and write a story for competition."

The two-day conference features workshops and meetings geared to the high school journalist and a banquet.

We feature Carnation Ice Cream. Select from our self-service freezer. Blewett's Market, Kendrick. 1-adv

The state of Vermont leads all others in the production of maple syrup and maple sugar.

### NOTICE OF HEARING

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah

In the Matter of the Application of WILLIAM ANTHONY ANTONELLI for Change of Name to WILLIAM ANTHONY DAWSON.

In the District Court of the Second Judicial District of the State of Idaho in and for the County of Latah.

In the matter of the application of William Anthony Antonelli for change in name.

A petition by William Anthony Antonelli, born June 24, 1932, at Brooklyn, County of Kings, State of New York and now residing at 113 East 8th Street, Moscow, County of Latah, State of Idaho, proposing a change in name to William Anthony Dawson has been filed in the above entitled Court, the reason for the change in name being: (1) That the name of William Anthony Antonelli is not considered by most people to be petitioner's real name and such fact is a constant source of embarrassment and frustration to Mr. Antonelli, your petitioner; (2) That petitioner's mother, pursuant to a decree of absolute divorce rendered in 1948, obtained and received custody of your petitioner, and your petitioner has used the name of Dawson, which is the said mother's name, as a result of the divorce hereinbefore mentioned, and ever since 1948, and that the said legal name of William Anthony Antonelli is foreign to your petitioner as well as his associates, and that your petitioner's present name of William Anthony Antonelli is a constant threat to smooth and amicable relationships with his present associates and prospective future employers; the name of petitioner's father is Anthony Antonelli, 1628 71st Street, Brooklyn, County of Kings, State of New York.

Such petition will be heard at such time as the Court may appoint, and objections may be filed by any person who can, in such objection, show to the Court a good reason against such change of name.

WITNESS my hand and the seal of said District Court this 11th day of March, 1958.

### NOTICE OF HEARING

In The District Court of The Second Judicial District Of The State Of Idaho, In And For The County Of Latah

In the Matter of the Application of WANDA MAE BOWERS for Change of Name to WANDA MAE BENDEL

In the District Court of the Second Judicial District of the State of Idaho in and for the County of Latah. In the matter of the application of Wanda Mae Bowers for change in name.

A petition by Wanda Mae Bowers, born November 16, 1936, in the County of Latah, State of Idaho and now residing in the County of Latah, State of Idaho, proposing a change in name to Wanda Mae Bendel has been filed in the above entitled Court, the reason for the change of name being: (1) That the name of Wanda Mae Bowers is not considered by most people to be petitioner's real name and such fact is a constant source of embarrassment and frustration to Miss Bowers, your petitioner. That the said legal name of Wanda Mae Bowers is foreign to your petitioner as well as her associates, and that your petitioner's present name of Wanda Mae Bowers is a constant threat to smooth and amicable relationships with her present associates and prospective future employers; the name of petitioner's mother is Gertrude Bowers Nampa, County of Canyon, State of Idaho; and that petitioner's father is dead.

Such petition will be heard at such time as the Court may appoint, and objections may be filed by any person who can, in such objection, show to the Court a good reason against such change of name.

WITNESS my hand and the seal of said District Court this 27th day of March, 1958.

BESSIE BABCOCK, Clerk  
WILL S. DEFENBACH  
Attorney for Petitioner, Residence and Post Office Address:  
Moscow, Idaho.

## HELLO, FOLKS:

The time for spring work is drawing closer. Are you ready? Do you have an ample supply of diesel fuel, gasoline, motor oils, lubricants? If not, pick up your phone and call us at 1251. We'll be right out with that order — of Union Oil Co. Products.

Tom: "Did your wife have anything to say when you came in late last night?"  
Jim: "No, but that didn't keep her from talking for two hours!"

How about that stove oil tank? Are its contents sufficient to see you through till summer? If not, pick up that phone and call us at 1251. We deliver — we hurry!

Despite the high price of whiskey a ten-cent drink of it can still

be purchased in some remote parts of the country — a recent autopsy report shows!

Are your tires ready for summer driving? Or are you still running on those sawdusts? In any event, come in and let's talk trade. You'll be surprised at how cheaply you can own new, safe tires.

Blonde: "Men are such contemptible beasts!"  
He: "Yeah, I know. That's why I always run around with women."

Let us service that car, pickup or truck for you. We'll use the correct grade and amount of Union Lubricant for every moving part. The price is low, satisfaction high.

Always travel "Union".

## CAMERON SECTION ACTIVITIES VARIED

### STUDENTS ON VACATION; MISS HERMINA MEYER HOME

**Easter Vacation At Home**  
Glen Wegner, Jr., Teddy Meske and Teddy Meyer all spent their Easter vacation here with home folks and friends. Glen Wegner, Jr., gets a week's vacation, while the other boys were forced to return to P. L. C. on Monday morning, where they are attending college.

**Hermina Meyer Returns Home**  
Miss Hermina Meyer returned home last Wednesday, being met in Spokane by her parents, Mr. and Mrs. Herman Meyer.

They stopped on their way home and visited Mr. and Mrs. Carl L. Wegner in Pullman. That same evening they were supper guests of Mr. and Mrs. Marvin Silflow.

Hermina has been on an around-the-world tour and spent some time in India with her sister, Dorothy, who is a missionary there.

**Funeral Services In Cameron**  
One of the largest crowds ever known gathered at the Cameron Church Saturday afternoon to pay their final tribute to Leon A. Wolff. The entire community expresses its deepest sympathy to the bereaved families.

**Infant Baptized**  
Little Peggy Sue Lohman, daughter of Mr. and Mrs. Dick Lohman, was baptized at the Emmanuel Lutheran Church Sunday morning. Sponsors were Mrs. Shreffler, a grandmother; Loeda Meyer, Gary Lohman and Monte Lohman.

**Losers Entertain Winners**  
A Sunday School contest party was given last Wednesday evening in the Cameron Hall. The losers entertaining the rest of the class. Judy Lohman, Fonda Schoffler and Elaine Weyen were the hostesses.

**General News**  
Mr. and Mrs. Henry Lingenfelter of Tekoa, Wash., spent the week-end here with their son-in-law and daughter, Mr. and Mrs. Roy Silflow and sons.

Mr. and Mrs. Ernest Brammer and Jolene visited with Mr. and Mrs. Kenneth Wilken Friday afternoon.  
Mr. and Mrs. Ted Vaughn and family of Spokane were Saturday night

and Sunday guests of Mr. and Mrs. Glen Wegner and family.
