INFORMATION ON PROPOSED NEW SCHOOL OF INTEREST TO EVERYONE

NEW PLANS CONTAIN INOVATIONS TO MAKE USE OF ALL FLOOR SPACE

PROPOSED ARCHITECTURAL PLANS NOW ON DISPLAY

The proposed new Junior and Senior High School building, according to present plans, will contain seven (7) ordinary classrooms, plus special service rooms for Commercial subjects, Science, Home Economics, Shop, Music, Library, Study Hall and Hot Lunch kitchen. A regulation size gymnasium floor with seating for 600 and necessary dressing and shower rooms for boys and girls.

The Science room will be of such size and design as to be adequate for the teaching of all high school science courses. This necessarily means a larger-than-ordinary room, with laboratory work counters for physics and chemistry, and tables for biology and general science. The chemistry and physics experiment areas will be equipped with necessary outlets for water, gas and electricity.

The Commercial department will be two rooms, separated by glass partition, so that the teacher can supervise typing practice while teaching bookkeeping or shorthand class in the other room.

The Music room will be just off the stage, which is at the far end of the gymnasium. This arrangement gets the necessary noise of the music department away from the classrooms. Another good feature of this arrangement, the music equipment need not be carried from one end of the school grounds to the other when a music program is being presented to the public.

The Cafeteria arrangement presents a unique feature that will result in a large saving of valuable space. The kitchen will be just off the Study Hall, and the study hall used for the eating area. It seems that this plan can be made to work and thereby save about 1,500 square feet of building space.

The Library and Study Hall will be side by side — in fact, it appears that the library is one end of the study hall, partitioned off with large windows. Our library materials, books, reference materials, etc., are up to date and adequate for a school of our size. The new building will place these materials where they are readily available to the students in the

HIGH TEMPERATURE; HARVEST; CLUB PICNIC, AND VISITING

High Temperatures
Temperatures have been steadily mounting this past week, bringing fall grain harvest into full swing. Farmers thought there would be a little lee-way between haying operations and harvest — but due to the sudden warm weather — harvest this year is considerably earlier than previous years.

4-H and Home Dem. Club Picnic
The annual Home Demonstration Club and 4-H picnic was held Sunday at the park in Kendrick. Swimming was available to members and leaders, both in the morning and afternoon.

Those attending the affair from this area were Mrs. Elmer Baumgartner and family, Mr. and Mrs. Rollin Armitage and family, and Mrs. Don Cantril and Sandra.

New Postage Rates
Our postmistress, Mrs. Edith Wells, reminds us our postage rates will increase, effective Aug. 1st, as follows: First class letters, 4c an ounce. Post and postal cards, 3c each. Air Mail (not exceeding 8 oz), 7c per ounce.

Air Post and Postal cards, 5c each. Third Class mail (including unsealed printed greeting cards) 3c first 2 oz. 1 1/2c each additional oz. Weight limit of third class mail is increased up to (but not including) 16 ounces.

Barbecue Supper
Thursday evening Mrs. Clay King and Mrs. Given Mustoe were hostesses at the King home at a barbecue supper for members of the Southwick Homemakers Club. A delicious supper was followed by a business session. Fair plans were the main topic of discussion for the evening.

General News
Mr. and Mrs. Jack Mustoe and Mark and Mr. and Mrs. Given Mustoe attended a family reunion picnic in Spalding park, Sunday.

Mr. and Mrs. Jack Pouttu of Kellogg visited at the Given Mustoe home Saturday afternoon and again on Monday. Mrs. Effie Stump of Juliaetta joined the group for dinner Monday.

Mr. and Mrs. Gary Gertje were Sunday dinner guests of Mr. and Mrs. Roy Craig at Leland.

Sunday, Mrs. Harvey Bales visited her mother and brother, Mrs. Annie Longeteig and Johnnie. That evening they were supper guests of Mr. and Mrs. Don Cantril.

Mr. and Mrs. Everett Lohman and family called on Mr. and Mrs. Elmer Lohman, Sunday evening.

Mr. and Mrs. Collin Biller and

THERMOMETER UP

This past week has seen some of the most torrid readings ever recorded by a thermometer in this section — at least for a long, long time.

Wednesday of last week the "official" thermometer recorded a high of 93 degrees; Thursday, 94 degrees; Friday, 94; Saturday, 97; Sunday, 99; Monday, 102; Tuesday, 97.

Air conditioners have proven very popular, and most business houses do not bother to shut them off at night, taking advantage of the cool morning air.

The high heat and low humidity have hastened harvesting activities, although they have not yet reached their peak.

MRS. CARL KINZER DIES FRIDAY MORN.

A former north central Idaho resident, Mrs. Carl (Arie Myrtle) Kinzer, 69, died early Friday morning at the Tri-State Memorial Hospital at Clarkston. Death was attributed to a heart attack.

Mrs. Kinzer, who had made her home in Miami since 1928, and her husband were visiting relatives in the area when she became ill a week ago.

She was born on American ridge, near Kendrick, Feb. 6, 1889, to Mr. and Mrs. George Dougharty. The family moved to Juliaetta in 1914, and in 1915 she was married to Carl B. Kinzer.

They resided at Lewiston, Colfax, San Diego, Calif., and Lewiston again, until they moved in 1928 to make their permanent home at Miami. At an early age she joined the Methodist Church, but after permanently moving to Miami, Florida in 1928 she joined the Christian and Missionary Alliance Church there, and the Pythian Sisters. She used her talents as a musician in the church and the lodge.

Survivors include her husband, and two brothers, Clarence Dougharty, Kendrick, and Lawrence Dougharty, Moscow.

Services were held Monday at 10 a. m. in the Juliaetta Methodist Church with the Rev. Ernest Gates, pastor, officiating. Music was furnished by the church choir which sang "In the Garden" and "Good Night and Good Morning," accompanied at the organ by Mrs. M. C. Halliday.

Pallbearers were Harold Roberts, Matt Johnson, Ira Havens, Clifford Davidson, Ed. Groseclose, E. A. Deobald. Interment was in the American Ridge cemetery.

Mr. Kinzer left Wednesday of this week for his home in Miami, Florida.

New Juliaetta Correspondent

Mrs. E. W. Mabbott began this week as Juliaetta's new correspondent. Her willingness to serve her community is evidenced by taking on this activity. Be sure to help her by calling in your news. She will appreciate it — so will we — yes, and so will the readers of this column.

ADULT BEGINNERS SWIMMING CLASS AT MEMORIAL POOL

SWIMMING COURSES END SAT.; MANY GET CERTIFICATES

Enthusiasm was high at the Area Living War Memorial Swimming Pool Saturday as the final tests were given telling whether "you passed or not." It has been a busy two weeks and really serious, too. For everyone wants to learn to swim — and if you have dropped by the pool during lessons you'll know what we mean.

It has been a project for the whole family, arranging to have the children at the pool in time for lessons. Some of the mothers from on the ridges told us it had been a real "scramble" to get the kids in during this busy season — but it's worth it if they learn to swim.

One hundred and forty-nine registered, but not that many got their cards, of course. But whether they did or not, they'll admit they learned something.

It's a long process and the instructors, Gerald White, Wanda Peters and Mrs. Wm. Johnson, say the first thing is to overcome fear of the water. The next step is to float, then dog paddle. After this comes the elementary back stroke and finally free style.

One of the most important things to remember is that just because you can swim across the pool — it does not make you an expert swimmer.

With steady teaching one can be taught to swim in ten hours.

— but at the pool they are taught in ten 40-minute periods. This way the instructors can handle more children at one time.

Following is a list of those receiving swim cards — meaning they passed the required tests:

RATIONING WORKS

The water rationing program devised by the "Village Dads" last week to meet the shortage has proven very satisfactory. The well and springs have been able to satisfy the curtailed demand, and keep a satisfactory reserve in the reservoir in case of fire.

True, lawns may not be as sparkling green as they previously were due to the extreme heat and curtailed sprinkling — but they still remain green and very presentable.

So far as we have been able to learn there have been no violations of the regulations, all accepting it in the spirit of necessity.

SCHOOL OPENING SET FOR SEPT. 1

The local schools will open Tuesday, Sept. 2nd, for the 1958-59 school year. Buses will run on the same schedule as last year. If in doubt as to the time they will pass your place, contact the driver. The Hot Lunch programs will operate from and including the first day of school, as in the past.

Gerald White will be the principal at Juliaetta and teach the sixth grade, the position held by Asa Calvert, who has retired after 42 years of teaching. The other five teachers at Juliaetta are returning to their respective grades: Mrs. Lester Nelson, fifth grade; Mrs. Cecil Gruell, fourth grade; Mrs. Eugene Taylor, third grade; Mrs. Gil Erlewine, second grade, and Mrs. Harley Perryman, first grade.

Mrs. Winifred Kluckholm retired at the end of the last school term after teaching at Southwick for several years. Mrs. Noria Callison will take that position, teaching the fourth, fifth and sixth grades. Mrs. Darwin Tarry will continue as principal and teach the first, second and third grades.

The Junior High faculty will be: George Merrick, Principal, Science, Math and Social studies; Mrs. Claude Jones, Language and Arts.

In the Senior High school: Ben P. Cook, Principal and Math; Mrs. Elsie Deobald, Commercial and English; Dennis Racicot, Coach and Social studies; Mrs. George Merrick, library, French and English; Robert Hall, Science; Elmer Stitzlein, music in all three schools; Robert Meserve, Superintendent and American Government.

The Hot Lunch programs will be operated by: Kendrick — Mrs. E. M. White, assisted by Mrs. Edgar Dammarell; Juliaetta — Mrs. Wm. Carlton, assisted by Mrs. Lloyd Eckman; Southwick — Mrs. Abner Croeger.

ON HONOR ROLL

W. S. C. Pullman, July 29 — The spring semester honor roll at Washington State College announced this week, included one student from Kendrick.

Ranking high in scholarship was Roger Claude Jones, son of Mr. and Mrs. Claude Jones of Kendrick.

JULIAETTA DOINGS IN PAST WEEK

To Close Juliaetta Station
The Public Utilities Commission at Boise Thursday authorized the Northern Pacific Railroad Co. to discontinue operation of a station agency at Juliaetta.

The PUC said that there had been no protests to the proposed abandonment in the period of time allowed for them. The railroad had said there was not enough business originating at Juliaetta to justify maintaining the station. Another station is maintained at Kendrick, four miles away.

On June 22, when the company applied for the station closure, it said that "service provided at Juliaetta is not required by railway patrons and the cost of maintenance cannot be justified from an economic standpoint."

At that time, the railroad said that Mead & Howard Lumber Co., and Lewiston Grain Growers, the two largest shippers and receivers in car lot amounts at the Juliaetta station had expressed no written objections to the closure.

Mead & Howard has a mill and the Lewiston Grain Growers has an elevator at Juliaetta.

Under the railroad's proposal, Juliaetta will become a passenger flag stop on the Lewiston-Spokane line and there will no longer be a resident agent there. A passenger depot and freight handling facilities will be maintained at Juliaetta, however.

In asking for the closure the company said operating expenses at the station from April, 1957, through March of 1958, totaled \$5,166.62, and "total business" at the station amounted to \$31,087.00.

The Juliaetta station was constructed in 1886-1888.

FORESTERS INSPECT LAND

A group of foresters and soil conservationists called at the Johanna Nelson farm on Big Bear ridge last week, making an inspection of woodland practices in this part of the state.

They also visited the Clarence Morey farm, inspecting thinning practices used on timberland there.

Those in the party included Orlo W. Krauter, Portland, who is a Washington state forester; J. W. Thannum, Boise, Deputy State Conservationist for Idaho; Ken Ringsgard, Moscow, Work Unit Conservationist for Latah County; Mel Carlson, Moscow, forester for north Idaho for the Soil Conservation Service; Norman Lewis, Deputy State Forester, and Manning Onstott, Soil Conservation officer from Kendrick.

Following their tour all were guests at dinner in the home of Mrs. Johanna Nelson.

Mrs. Nelson is signed up with the Tree Farm Program, and is cooperating with them and the Forestry Service — who were marking the trees to be taken out and those to be left — for scenic purposes.

Everyone is busy harvesting — so there is mighty little news!

OVER 2,000,000 GALLONS OF WATER USED IN JULY

A report from the books of E. M. White, village custodian, show that Kendrick has doubled its consumption of water this month compared to a year ago.

Last year the highest month recorded showed 1,761,250 gallons of water were used. This month (July) after reading the meters on Monday and Tuesday, Mr. White reports the village to have used 2,191,866 gallons of water. Of this 1,491,430 was pumped, the rest came from springs.

No wonder rationing was necessary. The increase is attributed to the long, hot, dry spell.

High users were Mr. and Mrs. E. A. Deobald, 45,000; Wm. Johnsons, 43,750; Frank Abrams, 41,000. Lowest user required only 450 gallons.

Water used in the swim pool and the park will run between 40,000 and 50,000 gallons a month, and does not go through a meter — hence would be above the mentioned figures.

RETURN FROM CONVENTION

Mrs. E. M. White and Mrs. Bill Carlton, the latter of Juliaetta, returned Thursday from Kellogg, where they attended a three-day session of School Food Service Assn., convention and school lunch workshop.

Newly elected officers for the coming year were a repeat of last years — Mrs. E. M. White, president; Mrs. Mavis Magnuson, vice president (of Coeur d'Alene), and Mrs. Zella Walker (Moscow), secretary-treasurer.

Marked The Spot
The fat man and his still fatter wife were returning to their seats in the theater after an intermission. "Did I tread on your toes as I went out?" he asked the man at the end of the row.
"You did," replied the other grimly, expecting an apology.
The fat man turned to his wife: "All right, Mary," he said. "This is our row."

**GOAL TO OPEN
MORE MARKETS
FOR IDAHO BEANS**

A research project which has as its ultimate goal increasing the per capita consumption and opening new markets for dry beans — a major Idaho farm crop — was announced by R. D. Ensign, associate director of the University of Idaho Agricultural Experiment Station.

Under a grant of \$16,945 from the western utilization laboratory of the U. S. Department of Agriculture, the Idaho station will conduct during the next two and a half years a comprehensive investigation of dry beans to determine the relationship of chemical composition to cooking characteristics.

Basic research on the chemical composition of beans is needed as a guide in developing quick-cooking dry bean products and in exploring other areas of bean utilization," explains Mr. Ensign.

The new project, officially approved by both the university board of regents and the U. S. Department of Agriculture was planned in cooperation with the Idaho bean industry. The work will be coordinated with activities of the new Idaho Bean Commission. Leaders of the Idaho bean industry regard this project as one of the most important fields in bean utilization.

"Because Idaho is one of the nations leading producers of dry beans, it was logical that its agricultural experiment station should be selected for this type of research," Mr. Ensign said. Dry bean production for the state runs nearly 3,000,000 bags a year with a value of nearly \$20,000,000.00. Principal production is in the Twin Falls district.

Chemical analysis and cooking tests will be made on the four major bean types grown in the state, pinto, great northern, red and small white varieties.

Three departments of the agricultural experiment station, agricultural chemistry, horticulture and home economics research will cooperate on the study. Project leader will be A. C. Wiese, head of agricultural chemistry.

DO YOU HAVE DIABETES?

Boise — A million Americans have diabetes and don't know it, according to a recent national study, and of the additional million known diabetics, roughly half are probably not getting the care they need. Despite much progress in the control of this chronic disease, diabetes remains a major health problem.

Diabetes is a disease that impairs the body's ability to get energy from sugars and starches. In a normal person, the pancreas secretes insulin to help convert sugars and starches into energy, but in the diabetic, the pancreas either secretes too little insulin, or else its effects are counteracted by over activity of other glands.

While diabetes cannot be cured, medical treatment of it now assures most diabetics productive and almost normal lives. Recent developments give promise of even greater progress ahead. Medical research has improved insulin that is taken by diabetics, and has discovered a synthetic pill that is effective in lowering the blood-sugar levels in some diabetics.

Diabetes is most often found in middle and old age persons, although it can also be found in the younger age groups. Trends in death from the disease have been steadily downward since 1940, but it still ranks high as the eighth cause of death in the United States, with 27,000 fatalities in 1957. There were 75 such deaths in Idaho in 1957, according to the Idaho Department of Health's Vital Statistics bureau.

Life insurance studies show that over-weight is associated with deaths from diabetes. Other factors implicated have been an individual's adaptation to stress, the higher standards of living with increased food consumption, and the trend to sedentary occupations.

Dr. Terrell O. Carver, Idaho Administrator of Health, points out that it is wise to have periodic checkup by your family physician, since prospects for greater life expectancy and better health for diabetics depend to a large extent on early diagnosis and proper medical treatment.

What causes an accident? Much as you hate to admit it, there's only one answer to that question. Drivers cause accidents, not highways, cars or weather.

You, as a driver, can prevent accidents. Use more common sense and less horsepower behind the wheel and help prevent accidents. This message from the Idaho Traffic Safety Division.

**Medical Findings
Often Result Of
'Happy Accident'**

CHICAGO — Most "accident-prone" individuals are considered a liability in their work, but there are some "happy accident-prone" people who are pratty important.

They're the researchers, scientists, and doctors who accidentally discover some important thing while looking for something else, according to a special article in the Journal of the American Medical Association.

Among the most famous of medicine's "happy accidents" are Fleming's discovery of penicillin when he left a Petri dish uncovered and van Leeuwenhoek's discovery of bacteria when he focused a magnifying glass on a drop of water instead of on a fly's leg. Out of these grew the "penicillin age" and the science of bacteriology.

This ability to make some valuable or pleasant discovery without deliberately looking for it is called serendipity.

The most recent serendipitous event to make headlines was Dr. Winston H. Price's discovery of a common cold vaccine. This researcher at the Johns Hopkins School of Hygiene and Public Health was not looking for a common cold preventive, but was working on isolating influenza viruses.

Some of medicine's happy accidents include:

—The conquest of smallpox after Edward Jenner recalled the boast of a former milkmaid that she was immune because she had had cowpox—which then became the agent for mass immunity against smallpox.

—The development of the stethoscope after a Paris physician, Rene Theophile Laennec, saw children tapping messages to each other along opposite ends of a discarded plank. He recognized in the game the principle of the stethoscope.

**30-Ton Killer
Roams Coastline**

LOS ANGELES—A 30-ton killer, as vicious as a shark but as playful as a porpoise, roams the California coast, making forays into such well-known waters as Santa Monica and Monterey Bays.

This is the killer whale, which has been an object of special study by Dr. Richard Booloolian, zoologist at the University of California, Los Angeles.

Dr. Booloolian has observed these whales killing cormorants, apparently for the sheer pleasure of killing. They seize the birds, kill them, and spit out the bodies.

He has also seen the marine killer come in as close as four or five feet offshore, leaping out of the water, swimming on its back, and engaging in other playful antics much in the manner of a porpoise.

"There is no record of a killer whale killing a human being," Dr. Booloolian says. "People just don't stop to argue with them."

**Visual Checkups
Aid School Work**

CHICAGO — Approximately 450 textbooks have to be studied nowadays during the school years from first to twelfth grade. And from the grades to college more than 90 per cent of school failures can be blamed on poor reading ability. The startling fact is that from 60 to 70 per cent of the slow-reading pupils have normal or even superior intelligence but are handicapped by seeing problems.

When you read a page of print, your eyes make a series of stops. The number of stops depends on the number of words your eyes can grab at each fixation. The slow reader (150 words or less a minute) stops at almost every word and quickly tires. The fast reader takes in several words at each brief pause.

**Comics, TV Mix
With Good Books**

LOS ANGELES — Parents shouldn't hold books up to their children as "something good" while deriding television and comics as a "waste of time."

This attitude, according to Mrs. Doris Ryder Watts, visiting lecturer in children's literature at the University of California, Los Angeles, creates the impression in a youngster's mind that books, like castor oil, are good for you—but are most unpleasant.

This leads to erroneous conclusion that if suspense, excitement, and thrills are wanted, one must turn to the comics, TV, or movies.

Mrs. Watts believes there is no reason why young people shouldn't think of a book as a synonym for adventure.

Farm Acres Increase

NEW YORK—The typical American farm in 1940 contained 174 acres; by 1950 the average size had grown to 215 acres and that may go to 220 acres by 1960, according to a recent study.

SCIENTISTS STUDY ORIGIN OF IDAHO CLAY MINERALS

The origin of Idaho's clay minerals and clay deposits are being studied this summer by two University of Idaho scientists, Dean Earl F. Cook of the college of mines, says. Making the special research study are Dr. George A. Williams, associate professor of geology and Dr. Donald F. Clifton, assistant professor of metallurgy.

"Clay and clay minerals are growing in economic importance in Idaho," explains Dean Cook. "Because the geology and mineralogy of these materials have been neglected it was felt that a study of this type would be helpful as a guide in the future development of the state's clay resources."

Dean Cook points out that there is often but a short step from basic scientific investigations on the origin of economic minerals and how they are concentrated to commercial application of the results.

Cooperating with the college of mines in the study will be the Idaho Bureau of Mines and Geology and the department of physical sciences of the college of letters and sciences. Industry cooperators will include the J. R. Simplot company and the Anaconda Copper Mining company. These concerns are active in the development of Latah county clay deposits.

NOW IT'S REPORT CARDS !!

Separate report cards will be issued with big game tags this year for use by hunters in reporting information about their hunt. You will all, no doubt, remember last year's paper tag and report card combination in which the report card worked fine, but the tag caused considerable complaint. This year the metal tag will be used again, and a separate report card furnished with it. The new card is a tough, flexible paper that will fold easily and fit into your billfold. Postage will be paid by the Idaho Fish and Game department.

The regulation establishing the system provides that the card must be carried in possession while hunting, and mailed with proper information within 15 days after the close of the season. However, it is hoped that cards will be returned by successful hunters as soon as they have made their kill. The promptness of these returns is one of their greatest values, and unsuccessful hunters also are asked to report as soon as possible after they are through hunting for the season.

Yeah, we know it's hotter than hot, and you are busier than busy — so why not let us solve your lubrication problems for you. Just pick up your phone and call us at 1251, and we'll be out in a flash with just the oil or grease you need to lick that particular problem — and of course it will be Union!

An enterprising real estate salesman in Texas finished describing his area to a prospect from the east by concluding: "All west Texas needs to become a garden spot is a little more water and some good people to settle on it."
"Yeah," replied the Yankee, "an that's all Hell needs, too."

Want the maximum in power

from your tractor these days? If you do, phone us at 1251 for those famous Union Diesel Fuels. We deliver.

Census Taker (to woman at door): "How many in your family?"

Woman: "Five. Me, the old man, the kid, the cow and the cat."

Census Taker: "And the politics of your family?"

Woman: "Mixed. I'm Republican; the old man's a Democrat, the kid's wet, the cow's dry and the cat's on the fence!"

Need gasoline that gives you the full power of your motor? Call us at 1251 for Union Royal 76 or Union 7600. We deliver.

There are no better products than Union. Try them.

HARVEST; MISSIONARY MEET; FAMILY REUNION; VISITING

Harvest In Full Swing

Everyone is really busy in the harvest fields. Fall barley is all but finished and the fall wheat is being harvested now — which will most likely be finished this week. Peas, lentils and clover will follow — and then the beans.

Missionary Meeting

Eight Missionary Ladies held their regular business meeting Sunday evening at the Herbert Schwarz home, with Mrs. Schwarz as hostess.

Brammer Family Gathering

Last Thursday evening a family gathering was held at the home of Mr. and Mrs. Aug. Brammer. Supper guests included Mr. and Mrs. Harold Brammer and family of San Jose, Calif.; Mr. and Mrs. Cecil Brammer and LuAnn and Mr. and Mrs. Wilbert Brunstiek.

Callers in the evening were Mr. and Mrs. Henry Brammer and Mrs. Carl Koepf of Juliaetta; Mr. and Mrs. Werner Brammer and daughters, Mr. and Mrs. Ernest Brammer and Jolene, Rev. and Mrs. Meske and family.

Miss Mildred Brammer and Miss Lucille Smeeder drove in at 9:30 from Morgantown, W. Virginia, and will spend a three-week vacation here. Mildred has a school at Ithaca, New York, and Miss Smeeder teaches at Morgantown, W. Va., again.

Merry Stitches Meet

The Merry Stitches 4-H Club met at the home of their leader, Mrs. Meyer, for an all-day meeting on Monday. Each girl brought a coffee-cake chow, which they prepared in the fire place. Mrs. Meyer served corn and blue berry muffins, also.

In the afternoon the girls worked on their Record Books and gave the following demonstrations: Correct Table Setting, Betty, Carol, Lalonda, Loeda, JoAnn and Kathy. Arranging Raw Vegetables, Kathy and JoAnn; Freezing Fruits and Vegetables, Lynn, Loeda, Carol. Making Gravy and an Illustrated Talk, Irene. Putting in a Zipper, Marga. Mrs. Meyer showed us how to make cream puffs.

Two mothers, Mrs. Schmidt and Mrs. Wilken visited in the afternoon. There were eight members present and one visitor, Lalonda King of Culesac.

The next meeting will be at the home of Marga Wilken on Aug. 11, at 1:30. — Betty Blankenship, reporter.
