Kootenai: First. 9: second, 21; third, 5; fourth, 17. Total, 43.

In the game of the afternoon just preceding, the Troy Trojans defeated the Rathdrum Panters 48 to 43 which meant that Kendrick would play Troy for the Regional Championship Saturday evening — their seventh meeting of the season!

### TIGERS WIN CHAMP-IONSHIP BY 46-44

The Kendrick Tigers earned the right to meet Mackay for the Idaho State Class B championship by turning in a thrilling 46 to 44 victory over the Troy Trojans Saturday evening in the final game of the Regional playoffs at L. C. Normal gym. in Lewiston. It was the seventh time the two teams have met this year, with Kendrick winning six of the contests.

The Tigers outscored the Troy Trojans 11 to 1 in the last quarter LOCKETT to stage a terrific comeback and take the 46-44 victory. Troy was possibly the victim of their own strategy.

## Telephone Meeting

A special telephone meeting was callled March 23, at 7:30 p. m. at the Aid Hall. The purpose of the meeting was to discuss "What can we do about our telephone line." Schupfer Brothers of Kendrick attended the meeting and were asked if they would take over our line after we changed it over. They refused, as it would necessitate put-

ting on more help to maintain it. It was decided to rebuild the line from Tschantz Bros. to the school house for the present, setting up cross arms on the General Telephone poles. This would make it possible for more lines to be added at a later date for the dial system. Schupfer Bros. were to contact General Telephone Co., and see what they would ask in selling price for the four lines they are now taking out, with Rollin Armitage to salvage all cross arms from here to Kendrick.

Another special meeting will be called in the near future, and it will be essential that every share holder be present.

## Easter Program

A special Easter program will be presented Sunday at the Southwick Community Church about 10:15. Sunday School will be held at the usual time. Everyone is invited.

## INQUIRY SEEKS CAUSE FOR FAILURE OF RECENT SCHOOL BOND ELECTIONS

CROSS SECTION OF AREA'S OPINIONS PRESENTED

### (By Tom Neal)

For the fifth time in a six year period the voters of Kendrick Joint School District No. 283 are being called upon to approve a bond issue for improved school facilities for the junior and senior high school stu-

dents of the district. construction of a new school, costing approximately \$285,000.00, plus approximately \$50,000.00 worth of equipment to furnish the building. The proposed school is to be located on property now owned by Bill Fry, but optioned for sale to the school district for \$3,500.00.

The proposed site is an area and the water of the proposed school site and the water of the school site and the water of the

The proposed site is an area approximately 475 feet long by 275 feet wide, located immediately north east of the junction of the county of the school, to Kendrick. That spring provides approximately 40 models and the county of water per minute according to Rear Creek and the county of water per minute according to the school of water per minute according to the county of the county of water per minute according to the county of water per minute according to the county of the county of water per minute according to the county of th road leading up Bear Creek and the gallons of water per minute, accordstate highway running parallel to ing to Abrams, which more than the Potlatch river on the northeast meets the requirements of 30 gallons corner of the Village of Kendrick.

It adjoins the Roy Glenn home. mean a new school to replace the actual dividing line on the west end declared inadequate and "fire trap" of the Bill Fry property bordering facilities now in use in Kendrick. Approval also would mean each property owner, no matter how large that a survey shows that the actual or how small, would pay increased line is 60 feet from the gabled, or taxes amounting to 10 mills, or one Clay King, a recent patient at the cent on the dollar of assessed valu-Deaconess Hospital, Spokane, was ation of the real property for a 20-

year period. are needed has not been disputed by of Kendrick will have to make anhas talked — in fact, every person questioned, feels that agreement exists within 100 percent within the Attention parents, friends and school district - that new school

The questions facing the voters in the forthcoming district election then are not: "Does the school district need improved facilities for the Mrs. Gary Eggers, were baptized at the Juliaetta Methodist Church Sunday by the Rev. Ernest Gates.

This one night takes hours, days the free language and even weeks of planning and junior and senior high school students?" (seventh through 12th grades) but, "is the new building the recommendation of the rec

the new school are the land-owning farmers living within the school district, and rightly so, because they will be bearing the brunt of the cost This is so because the state law covering taxation to finance new schools requires that the financing be done through taxes imposed on the assessed valuation of real property and, in most cases, the farmers own the most real property with-

in the district. Nearly every voter though, is concerned as to the suitability of the proposed site. Is the site big enough, and since it is so near two creeks. is it safe from flooding during periods of heavy water runoff? - are the questions causing doubt in the

minds of some voters. According to Gordon Peters, who farms on Potlatch ridge, and who heads the Citizens Fact Finding Committee, the site is large enough to

accomodate the school. "The proposed new school will be 304 feet long and the widest side of the building will be 125 feet wide, leaving 60 feet on the ends of the serve, Ben P. Cook, Dennis Racicot, building, and 75 feet on each side of the building, if it is placed in the lien, Robert Hall, Elsie Deobald. center of the lot," Peters explains.

As to the site being safe from floodwaters, it is bounded on the LIONS, LATAH CHAMsouth by the state highway which forms a high enough dike between the Potlatch river and the school site to prevent water from the Pot-

latch every reaching it. The biggest flood concern then, comes from the possible rampages of munity Lions Club held a joint meet-Bear creek to the west of the site. | ing in the Kendrick Fire hall Wedlage of Kendrick says though, that being the regular meeting night for by the time the Army Corps of Engi- both organizations. neers finish the planned dredging of Following a delicious fried chicken main channel of the Potlatch river dinner served by the Good Doers 4-H through the village and deposit the Club, the business of the evening dredged material along the east was taken up. bank of Bear Creek, to form a dike, the danger of flood waters reaching of the Lions Club, serving in the abthe school site will be abolished. "In fact," Abrams adds, "I be-

lieve there is no danger even now over to the Latah County Chambers of that land being flooded." R. L. of Commerce, with W. T. Marineau, Meserve and Peters echo Abrams' sentiments.

Further questions concerning the proposed site include the fact that meeting, Mr. Marineau called on Geo. at the present time the site (Fry) F. Brocke, Latah county represent-Mrs. Harvie Shepherd and Mrs. 4-H week, the affairs were post- is not within the corporate limits of tive at the recent session of the the Village of Kendrick, hence high- legislature. er insurance rates. LIVING IS GOOD LIVING WOOD it will be here tomorrow... The modern manufacturing methods used in the production of lumber products add to the natural beauty of wood and assures longer life. These advantages, coupled with the economical factor of wood, both in actual building and over-the-years maintenance, is another reason to say that "WOOD LIVING IS GOOD LIVING." general offices POTLATCH FORESTS, INC. LEWISTON, IDAHO

We left Spokane Oct. 4 by train, changing trains in Chicago and going on to New York and our embarkation center, which was Ft. Hamilton. We lost two suitcases enroute, but a Grand Central Station policeman was able to locate them so we signed in to Ft. Hamilton on time. We felt almost lost in this station, as there were so many people coming and go-ing everywhere, but again with a good policeman's help we located the right bus, etc., into Ft. Hamilton. We were processed here and assigned to the U.S.N. Upshur, which was scheduled to leave Oct. 9th for Germany.

I called Marie (Havens) Mills when I found a few minutes and she came to see us at the Guest House. We all went by subway back to her apartment on Governor's Island. This was our first subway ride and quite an exciting one as we really whizzed along. Then we crossed on the Staten Island Ferry to Governor's Island where Marie lived on the base. We had a nice visit and dinner and they brought us back through New York City. From Ma-rie's porch we could see the Statue of Liberty very well, which thrilled the girls. The skyscrapers and all the lights were something to see. It would take several days to really go and see all the places we would have liked to, but it gave us an idea of such a tremendous city.

We sailed out New York Bay with the band playing farewells and people waving goodbyes on Oct. 9. Our accommodations aboard ship were wonderful—fine food, obliging waiters, a lounge for reading and games. Movies and decks for walking and giving us all something to do. A small P.X. for snacks and necessary articles. We even had a daily ship's articles. We even had a daily ship's newspaper telling us of our progress each day, the change of time and all special events, including a fire drill We looked forward to this paper as each day went by to keep us posted. We had church services each Sunday. We arrived in Southampton, England on 17 Oct. We had a few hours stop here so several families went ashore. We hired a taxi and toward Southampton and nearby toured Southampton and nearby Winchester. It was very beautiful this time of year here, but quite a cold wind was blowing so walking would have been too hard for us all. Queen Elizabeth and Prince Phillip have a lovely summer home in Winchester with a stable for Queen Elizabeth's riding horses. We were told this was her hobby and they come there often to get away from routine and relax. From there we went to see the "Ramsey Abbey" -- a large stone church which has stood for many years. It was a very large grey stone building or church. In side were rows and rows of straight chairs and several stone statues of their important people of the past. It was terribly cold with no heating facilities. As we entered we signed our names in a large book. I looked back many pages, thinking I might see a name I knew, but I didn't. We were told that the Queen and Prince Phillip go to church here whenever they are in Winchester. The taxi driver told us England was much better off now and doing quite well. He spoke of Queen Elizabeth and Margaret a great deal, and said his heart went out to Margaret. I tried to telephone my husband from England before we had to board ship again, but the wait was too long so it didn't go thruogh. We left Southampton around 2 p.m. This ride up the English channel was really rough, but with plenty of fresh air and food we managed to not get really sick. We arrived in Bremerhaven, Germany, early in the a.m. of 19 Nov. We could not leave the ship until night, around 7 p.m. as our train to Frankfurt left at that time. Our train was a German train used by our troops for transportation to their stations throughout Germany. We had an overnight ride to Frankfurt and arrived around 8:30. My husband met us there and we drove to our apartment in Weisbaden. The weather was nice and many gardens were still blooming. The city is nice, with fairly modern streets and stop and go lights. Some modern stores with lovely china and silver and many antique shops. Several good eating places with very excellent

My husband has a traveling job and is gone all the time, so is really seeing the world. Is to be in Tripoli and Athens, Greece; and several other places this time. We should finish this job in July if all works out. We want to make a trip to Norway to visit relatives and friends there, so plan to make it at this time.

The children like school fine, but surely have missed their friends in Kenrick, and they really enjoyed the time in school there and often talk about it. The schools here, I understand, try to keep 1 month ahead of American schools in the States so they can always catch up easily if some time is spent in traveling. They can take German, but it is not mandatory, however, the girls are taking it and it is quite hard. I hope by next fall to take it myself. There are many activities for them such as swimming, skating trips and scenic trips to interesting spots. Carol Lynn's class is planning a trip to Luxembourg soon. There are several famous "Ski Resorts" near here, Berchesgaden, and Garmische. Families can go, and they say one should go as it's a wonderful experience, so

hope to before we come back in 1960. We use a transformer here to cut down the 220 watt voltage so we can use our appliances, such as toaster, percolaters, radios, ect. The washers are furnished in the basement with a drying room with a blower. So actually it's better to leave dryers at home. Some do use their deep freezes to good advantage. The T.V. will have to be converted to German.

### MANY FLU CASES

may be the Type B influenza recently reported in the eastern United States by the U.S. Public Health areas affected are recommending

Early reports indicate that the daho Falls and Pocatello areas are hardest hit with the illness, which monia -- have been reported. apparently follows the usual signs of influenze—fever up to 103 or 104 degrees, aches, and infection of the upper respiratory tract of the body.

At Pocatello, the Southeastern District Health Department reported nearly 30 per cent of the school children were absent with the "flu" during the first week of March. At that time, the illness apparently had reached its peak among high school age students, but was increasing in

the juior high school age group. The illness itself generally is quite mild as influenza goes. For the New outbreaks of a flu-like ill- most part, persons getting the flu ness, particularly in eastern Idaho, are ill two or three days with fever, about four days of rest and bed care at home to prevent any relapse. Few complications --such as pneu-

The last big outbreak of influenza in Idaho was the "Asian" influenza epidemic in the fall and winter of 1957. This Asian flu, which was caused by a Type A influenza virus, was a more serious illness than the Type B influenza appears to be. The Asian flu epidemic resulted in nearly 20,000 cases of influenza in Idaho during 1957.

## What we already know about your 1963 car

The engine of your 1963 car will be lighter and will give you improved performance, including better gasoline mileage.

We know this because Standard's scientists are already developing gasolines of the future. To test them, we use experimental engines installed in current model cars. The engines are obtained from auto makers and modified in our laboratories to match engine design forecasts.

These future fuels are given the toughest possible workout — on the road, as well as on this "indoor highway." Here we can create almost any kind of weather or driving situation at the touch of a button.

Gasolines are tested at varying speeds and engine loads to simulate mountains, traffic, freeways . . . under climatic conditions ranging from 120° desert heat to 40° below zero cold.

Your car of the future may never experience such punishing conditions. But if it does, we'll be ready with gasolines that will deliver all the power and performance built into its engine. Research that leads to new and improved gasolines is one of the ways the people at Standard are planning ahead to serve you better.

### POULTRY MITES

of the birds and to keep them in prothe mites in check. Homer Futter, arms. Latah County Agent, recommends regular inspections followed by controls if the are necessary.

Mites retard the growth of poultry, reduce vitality, damage plumage, and reduce egg production. Severe infestations can cause death. Several varieties are common.

Insecticides that control mites are recommended in a federal agricultural bulletin, "Poultry Mites", just received by the county agent. For control of chicken mites the bulletin says to apply DDT or malathion dust to roosts, nests and inside wall surfaces. Give particular attention to Trade at home. Buy it in Kendrick cracks and rough spots. A second application may be needed in two

> Lindane at one-percent strength or malathion at three-percent strength can be used as a roost paint. One pint covers about 150 feet of roost. The insecticide kills mites crawing to the chickens. The fumes kill mites already on the birds.
>
> The bulletin recommends treating litter on the floor with four percent malathion dust if it is inferted.

> malathion dust if it is infested with mites. One pound will do for 40 square feet.

No parking meters are in Kendrick!

HELLO, FOLKS:

Well, we're still curious about how well you remember the li-cense number of your own car. So, if the owner of license No. 1L2111 will come in this week we'll fill up the cars gas tank. Can you beat that offer?

While waiting to be served in a fashionable restaurant, a customer tied his nankin around his neck in bib fashion. This distressed the manager so much that he told the waiter to indicate to the customer as tactfully as possible that this simply was not done in this restaurant.

The waiter walked to the table and in as polite a tone as he could manage he asked, "What'll it be, sir, shave or haircut?"

surely is. How about your supplies of lubricating oils, greases, diesel fuels, gasolines? Better check today and then call us at 4251. Tell us your neels, and we'll be there in a jiffy.

"So you were convicted of bur-

"So you were convicted of bur-glary twice, robbery with violence three times, and manslaughter once?" asked the judge.

"That's right, sir," replied the defendant. "After that I just seemed to drift into a life of

Looking into the future is what a little gal ain't doing when she falls off porches, out of trees, etc., and gets her knees all scarred up!

For some, roughing it means turning the electric blanket down to "medium!"
