"TAILORED" ELECTRIC HEAT

Phone 5691

Electric heat can be "tailored" to provide finger-tip temperature control in every room of your home.

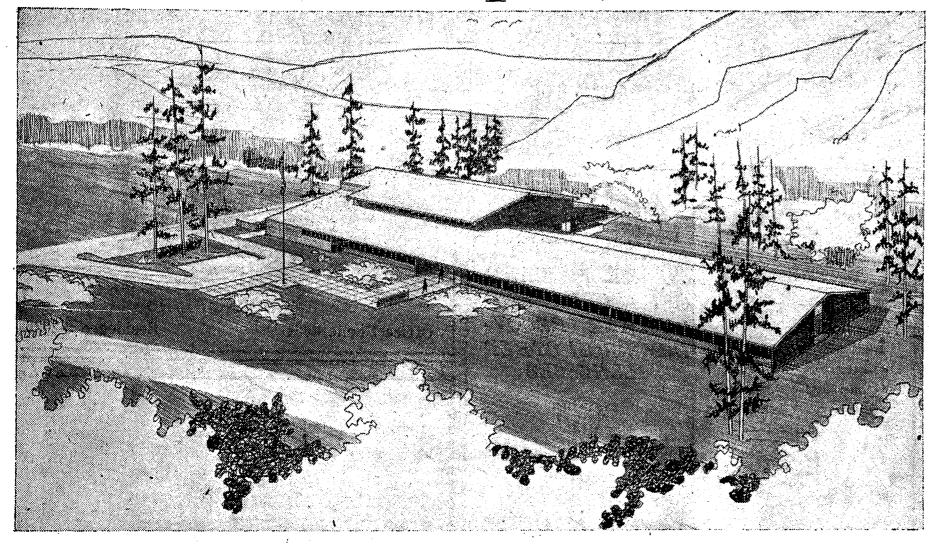

Only modern electric heat can be "tailor-made" to fit home and family. In the nursery or bedroom, kitchen or bath, electric heat delivers the kind of warmth you want, where and when you want it. If a room is not in use, it can be shut off and not heated. If a room is hard to heat, a separate, but permanent, electric heating unit can be installed to assist the old-style central heating system in offering extra warmth. Or, if a remodeling or expansion of your home is planned, additional heat requirements can be met by easy installation of individual electric heating units without disrupting the central system. Electric heat is healthful, clean and silent, it's "tailor-made" to fit your home and your family budget. Ask today about the advantages of "budget billing" for WWP electric heat customers.

actric heat is "Tailor-Made" for restaurants, cafes, businesses (large and small), offices, clinics, snops, apartments, factories, warehouses.

The State Highway Department refinancial crisis.

The department released details of road program costing \$33 million from combined sources. This was \$6,100,000 less than the amount spent on all Idaho highway systems in

1958, the highest construction year. The state had planned a \$40 million program in 1959 but it was cut below \$20 million when the federal highway trust fund, which provides the greater amount of the money, ran out.

Most of the inter-state highway funds have been marked for projects in eastern Idaho so that the major route between Pocatello and Idaho live. Falls can be finished as soon as possible, the department said.

"This particular section, together with the interstate location across morth Idaho (the Lewis & Clark Highway), are considered to constitute the most critically deficient sections of state highway systems which now exist," said the department in its statement.

The 1960 program planned by the struction contracts, engineering work and acquisition of needed right-of-way:
