**HAVE YOU HAD YOUR POLIO SHOTS?**

When controversy leads to public enlightenment, we're all for it. But there are times when controversy results in public confusion, with disastrous results. This is particularly true when experts clash on technical points that cannot be grasped quickly by those of us without scientific background.

We fervently hope the recent controversy over the relative merits of polio vaccines will not discourage parents from seeing that their families are given a full series of Salk Shots immediately. This is the critical time of year when the unprotected are most exposed to the polio attack. The Salk Vaccine is available now. It is more than 90 percent effective in preventing paralytic polio. Those who have not been vaccinated are gambling against the possibility of being crippled for life through their own negligence.

Whether or not the Sabin live-virus vaccine is a better vaccine than Dr. Salk's is a matter for scientists and physicians to decide — later. The National Foundation, which financed all the research leading to both vaccines with funds contributed to the March of Dimes, gives the only (or so it seems to us) sound advice which parents can follow. It points out

said last week-end. Goodell has been athletic director and head football coach at Rim of the World high school at Lake Arrowhead, Calif., since he left the Vandal staff at the end of the 1956 season.

"We are happy to have Bud return to Idaho," Stahley said. "He will help with administrative duties and coach the freshman football team." Goodell succeeds Bill Knuckles, and gives the Idaho staff a full compliment of members. He is a graduate of Whittier College in California, and coached in high schools in that state most of his professional life.

for a start of 17 wild turkeys from the mountains of Colorado. The turkeys were released January along the lower Salmon river near Whitebird, with the hope that they will become naturalized in Idaho, will multiply, and eventually maintain a huntable population.

that, since no live-virus vaccine has yet been licensed for distribution, since you cannot get live-virus vaccine from your physician, and since the present polio "season" will be over before mass production, licensing distribution of the live-virus vaccine are completed, there is only one course of action for conscientious parents to pursue. Get your family started on a full series of Salk shots today — unless they have already completed the full course as recommended.

**\* FREEZER FACTS \***

Here are tips on "how to get the most out of your home freezer." Featuring Dorothy Smith and Peg Lewis of the Home Economics Department of the Washington Water Power Company.

Your original freezer ideas and recipes are solicited for this column. Mail your suggestions to "Freezer Facts," Home Economics Dept., The Washington Water Power Co., P.O. Drawer 1445, Spokane, Wash.

• Dorothy Smith says, "Buy your home freezer now and take advantage of the Gold Seal Freezer Bonus Offer. You'll receive a check for \$25 from the Inland Empire Electrical League when you select your freezer at any Electrical League dealer store featuring the Gold Seal offer. Do it now because this offer expires July '31, 1961."

• Peaches, plums, pears, strawberries, raspberries, peas, green beans and corn can all be frozen in convenient containers after only seconds of blanching. Actually plums and strawberries need no blanching.

• Open packages of biscuit mix, crackers, cornmeal, marshmallows and open cans of coffee keep better in the freezer—be sure to overwrap them.

• If cooked foods are to be baked or reheated in the oven before serving, pack in pie plates, baking dishes or pans, or aluminum foil freezer boxes. Then the food can go directly from freezer into the oven.

• How about this money saver—enjoy the best cuts of meat—choice quality, at prices you would usually pay for lesser grades.

• When you prepare french-fried potatoes be sure the potatoes are of a No. 1 quality and fairly new. Cut and scald the potatoes. The color of scalded potatoes after they are fried are much lighter. For frying, use a standard recipe and fry the potatoes to a light golden brown in good quality fat. Drain and cool at room temperature, immediately package and freeze.

• When ready to use french-fried potatoes spread them out on a baking sheet and place them in a 400° F. oven for 5 to 6 minutes.

• Here's a tip from Peg Lewis. When you have sandwiches leftover from a party or picnic, freeze them. When you need a quick lunch, take them out of the freezer, brush with melted butter and toast on a sandwich grill.

• To freeze melons, remove seeds, pare, slice or cube or make balls. Add light syrup. Several kinds of melons can be packed together for fruit cups.

• You can save by freezing leftovers to serve weeks or even months later when the family has forgotten them as leftovers.

**THEY DON'T WANT MINORS TO WORK!**

From the Idaho Press Association headquarters at Boise, in its monthly bulletin, comes the following information:

"New Wage-Hour Rule Bans Minors Under 18 Years From Press Room — Minors under the age of 18 may not be employed in setting up, adjusting, oiling, repairing or cleaning a wire stitchee or stapler, circular or hand saw, corner cutter or mitering machine, corrugated or either single or double facing machines, envelope die cutting presses, guillotine paper cutters or shears,

horizontal bar scorers, laminating or combining machines, sheeting machines, scrap paper balers, vertical slotter, platen die cutting presses, platen printing presses or punch presses.

"Such a ruling was handed down by the Wage-Hour Division of the U. S. Department of Labor last October and became effective November 15, 1960. The order has been subsequently interpreted by the Wage-Hour Division to include the washing down of any type of press, even when the machinery is not in operation, or any immediate operation intended. Howard J. Peterson, Wage-Hour Area Supervisor, has expressed the view the order extends to cleaning or sweeping up around the above named equipment at all times. — (Georgia Press Association)."

tle, if anything, to the Gazette. We have no minor employees, either on a part time or full time basis. But the thought occurs to us — "the order extends to cleaning or sweeping up around the above-named equipment at all times!" When any of the above is imperative, there would be no more danger than the sweeping of the kitchen floor at home or washing the family automobile! The ruling just knocks some teenager out of a job!

When this writer was a teen-ager himself, he was employed in a garage after schools and on Saturdays — today that work is forbidden a youngster — operating machinery — and dangerous! Others in my class were employed by the telephone company, the electric light company, the grocery stores, at the warehouses — yet, today, the grocery stores are about the only ones left who can employ minors — the other classifications are pronounced as "too dangerous!"

Today, almost everywhere, there is the "teen-age problem." Judges, police, rehabilitation workers, and almost countless others are struggling to solve the problem. We firmly believe that a job — work — is the answer to most of it — but how can they work when the government says "No!"

**WEATHER REALLY SCORCHER!**

Little can be said of local weather conditions this past week except that it has been scorching hot!

After "floating along" the middle of the week with temperatures in the low and mid-nineties, Old Sol really went to work Friday, giving us a reading of an even 100 degrees!

Saturday he did a bit better, the indicator column reading 103 degrees — and top cap off the Saturday reading our usual evening breeze was completely lacking, the temperature going down only as the lack of sun permitted. At 1:00 a. m. on Sunday a "cool" 84 degrees was recorded. About 3:00 a. m. a few drops of rain fell, a bit of breeze appeared, and by 9:00 Sunday morning the mercury indicator was down to 74 degrees. By mid-afternoon of the same day 92 was recorded for the high.

During the same period Lewiston and Spokane had official readings of 107 and 97 degrees, respectively.

All are agreed that Saturday night was the "hottest one" they had ever seen in Kendrick!

The Potlatch river is a mere trickle these days, and can be crossed almost anywhere (provided you are a fair jumper) without getting your feet wet.

Lawns about town are losing their brilliant green, despite ample water supplies — the continued high heat taking its steady toll.

The hillsides and timbered areas hereabouts are tinder dry — and Norman Lewis, deputy state fire warden, Kendrick, asks everyone to be doubly careful with fire!

**BOYS AND AIR RIFLES**

E. M. White, village marshal, says he has received complaints of small boys armed with air rifles, shooting at birds, and making other indiscriminate use of the weapons.

Mr. White states that the killing of birds other than predators, such as magpies, crows, starlings, English Sparrows is prohibited by federal law, a law with which all parents should be familiar.

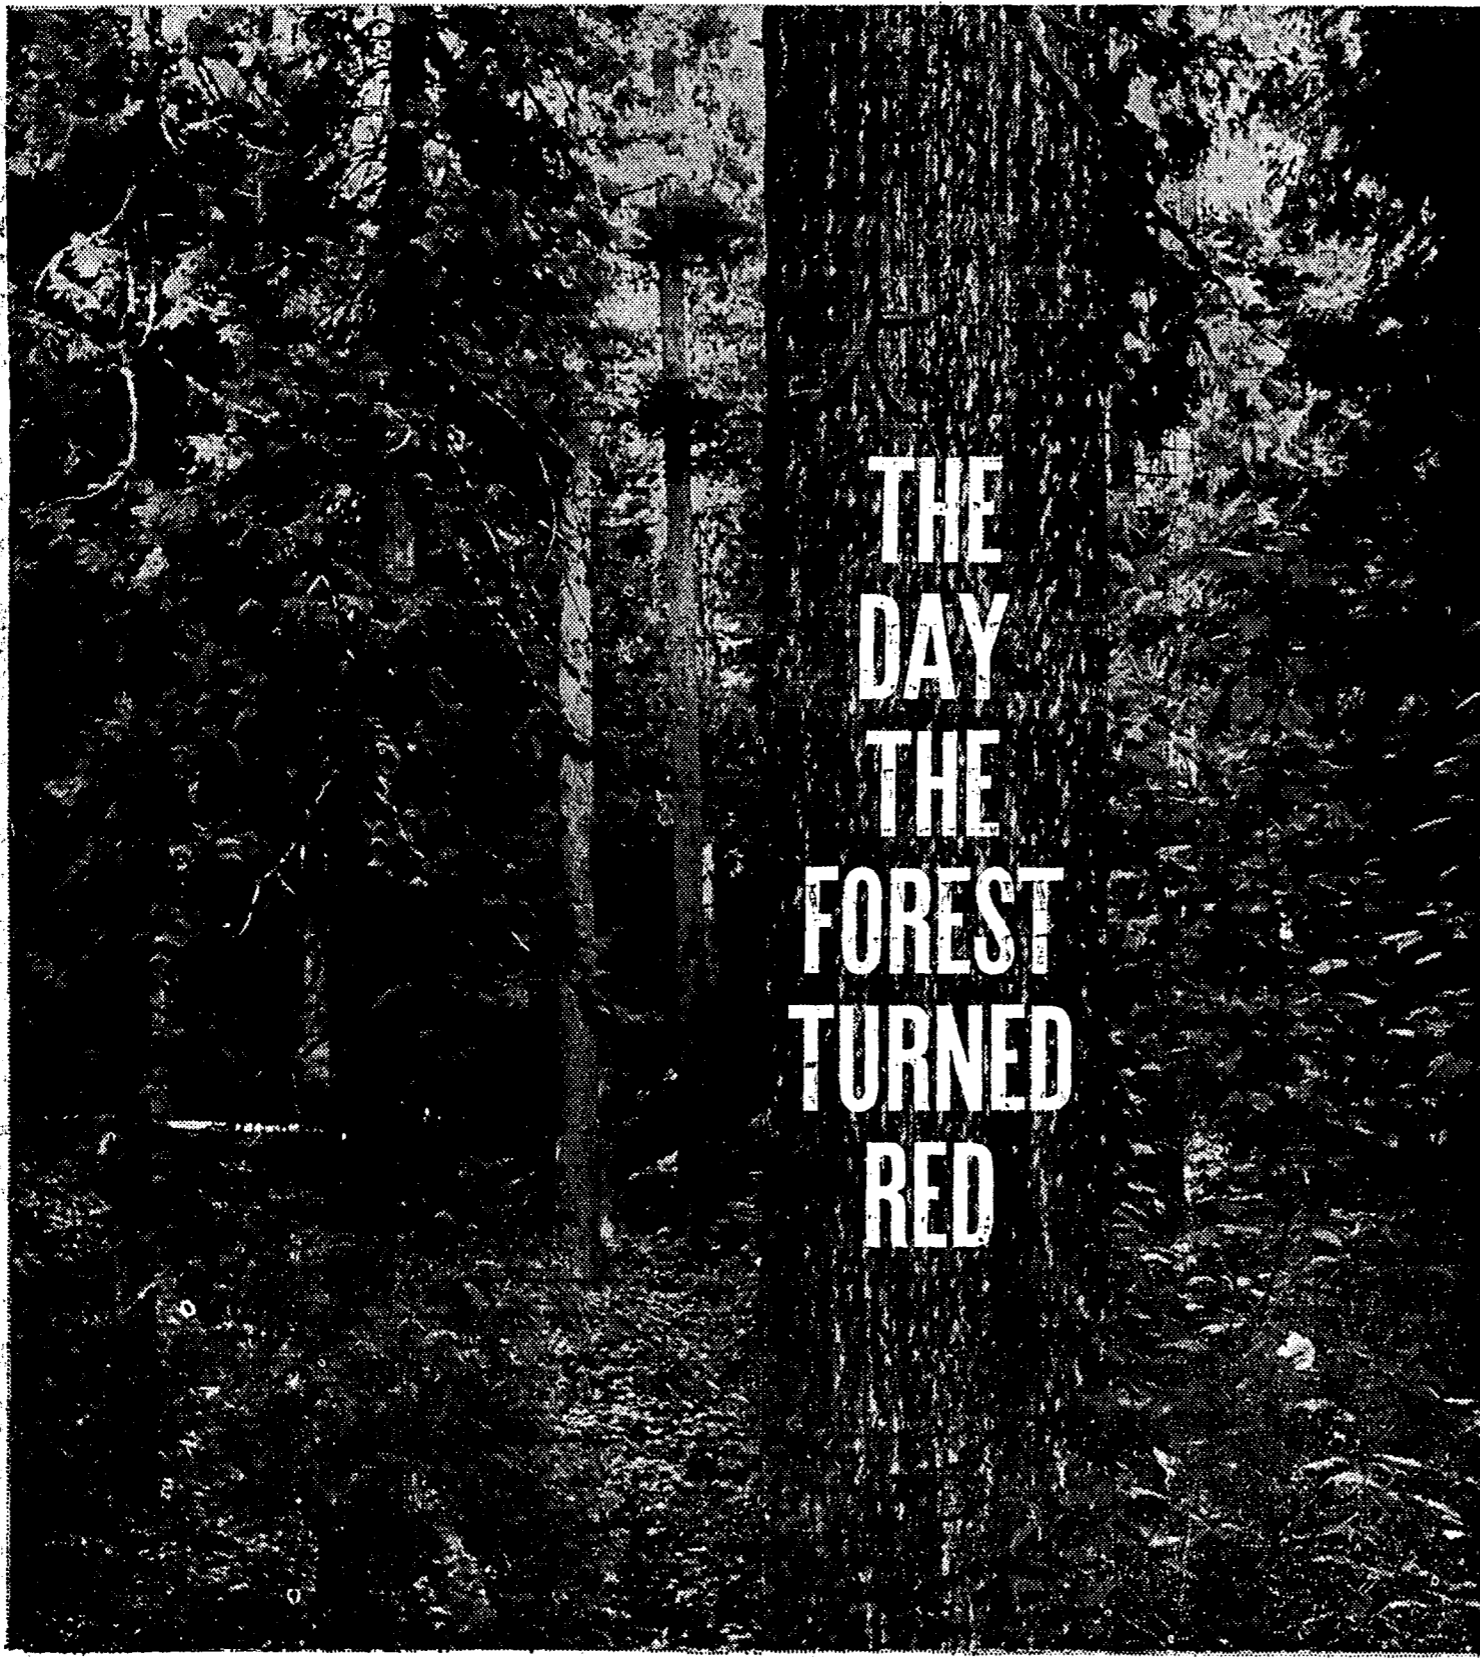

He also warns that the indiscriminate use of air rifles within the village is prohibited by law, and that parents can be held liable for any damage which might result!

Better check if your son is one of those carrying and using an air rifle, supervise it carefully.

Sympathize with the fellow who belittles you — he is only trying to cut you down to his size.

A man wouldn't mind having his income taxed if he wasn't already taxed to stay within his income.

When it comes to home rule, dad may be the chief executive, but mother is usually the speaker of the house.

**THE DAY THE FOREST TURNED RED**

Beneath the fragrant pine and fir is a soft carpet of needles, fern and moss. Filtered sunlight dapples the hidden nest of a doe and her spotted fawn. Nearby, a bear fishes from a sparkling stream and the song of a hundred birds fills the still air. Then . . . a still-burning match or cigarette is tossed to the ground . . . a campfire is left untended.

The Green Forest, once full of life is now GONE! The charred remains . . . a monument to man's carelessness. It happened the day the Forest turned RED.

## HELLO, THERE, FOLKS:

Every say to yourself: "Wish I had an oil 'or grease' as the case may be, that would stay on the job? We'll bet you have — and we believe Union makes the product you need for that tough job. Why not come in or give us a call at 4251 — we'll be more than glad to help you solve that problem.

A woman got on a bus and took the only empty seat, next to a harmless-looking reveller. Soon he opened a map of Japan and began to study it. He gazed at the map for a while and finally addressed the woman: "Sure we're on the right bus?" he asked.

Can you get the kind of performance you want from your car, pickup or truck these hot days? If not, Union products may be the

answer. Royal Triton Motor Oil, Union Royal 76 gasoline or Union 7600 gasoline. Bring it for a real servicing any time. You'll like our products and our service.

Dandy Jim says: "I'm selling my small foreign car. It takes so long for it to run out of gas that my love life is suffering!"

Tires can't take it this hot weather? Then come in and talk trade or recap with us. You'll be surprised at how low our prices are!

"The new baby has its father's nose and its mother's eyes."

"Yes, and if grandpa doesn't stop leaning over the crib, it's going to have his teeth!"

Always travel "Union".

## CAMERON SECTION ACTIVITIES VARIED

BY MRS. HARL WHITINGER  
Phone R1835

Rev. and Mrs. Theo Meske and daughters returned home Friday from a fishing trip on the Salmon river, bringing home their limit. They were accompanied by Aaron Wells of Southwick.

Mr. and Mrs. Geo. Greene of Seattle, Wash., visited in the Aug. F. and Glen Wegner homes, Saturday.

Mr. and Mrs. Roy Silflow and family, Mr. and Mrs. Henry Lingenfelter and Mr. and Mrs. James Whiting and Janis spent Sunday evening with Mr. and Mrs. Otto Silflow in Julietta. The occasion honored Mrs. Otto Silflow on her birthday anniversary. Ice cream and cake were served.

Mr. and Mrs. Harl Whiting were Moscow visitors Sunday afternoon. Enroute they stopped in Kendrick and called on Mr. and Mrs. Walter McCall, also on Mrs. May McCall and a cousin from Alberta, Canada, Mr. and Mrs. Clifford McCall and family, all at the Walter McCall home.

Mr. and Mrs. Gus Kruger visited Mr. and Mrs. Wilbert Bruniek last Friday evening.

Mr. and Mrs. Eldon Glenn and son spent Sunday with her mother, Mrs. John Warren, at Leland.

Mr. and Mrs. Eldon Glenn and son and Mrs. Albert Glenn were Lewiston visitors, Thursday. They called on Mr. and Mrs. Clay Albright and Mrs. Blum.

Mr. and Mrs. Wilbert Bruniek spent last Tuesday in Lewiston, visiting with Mr. and Mrs. Clay Albright.

Mr. and Mrs. Stanley Hepler and son Donnie attended the Air Fair in Lewiston, Sunday.

Mr. and Mrs. Harry Newman and family fished and camped in the Buffalo Hump area last week.

Mrs. Otto Krugger and Mrs. Aug. Brammer visited with Mrs. Fred Newman Sunday evening.

Helen and Ted Mielke were Craigmont and Mohler visitors on Monday.

Mrs. Charles Parks and sons of Kamiah visited her parents, Mr. and Mrs. Ed. Mielke, several days last week.

Mr. and Mrs. Ernest Brammer and Jolene, Mr. and Mrs. Roy Ramey and Mr. and Mrs. L. S. Thurber spent Sunday evening with Mr. and Mrs. Walter Koopp.

Eva Wilken visited Tuesday afternoon with Jolene Brammer.

Everyone is busy harvesting, with most of the farmers threshing fall wheat this week. As a result, news is scarce. If you have any, please phone the items to me as early as possible.

## YOU CAN STILL RIDE A STEAMBOAT IN IDAHO

Boise — During the summer you can still ride a steamboat across northern Idaho's Lake Coeur d'Alene and up the shadowy St. Joe river.

From the town of Coeur d'Alene, a lake-side community that grew up around a wilderness army post, the excursion goes to St. Maries and

back, making a day-long trip through some of the state's most magnificent scenery.

Half a century and more ago, when men first started mining and logging in the timbered hills drained by the St. Joe, steamboats were undisputed queens of the water. They carried people and freight in and out of the woods, providing the cheapest and fastest transportation then available.

Railroads, modern highways and airplanes sounded the death knell of the paddlewheelers, however, and the era of the steamboat passed away forever from the St. Joe, and the long, narrow lake.

The excursion boat follows the route of the old-timers to the southern end of the lake. Here the St. Joe enters after winding its way between two small, shallow lakes. Only the banks and bed of the St. Joe separate the two lakes, making it appear as if river, banks and all were afloat.

The entire southern end of the lake and the St. Joe's mouth are included within Heyburn State Park, a 7,838-acre vacation and sightseeing preserve. Although heavily forested, the place is well provided with overnight and picnic camping facilities. State Highway No. 5, which runs along the park's southern boundary, connects with U. S. No. 95 on the west and Alternate 95 on the east.

For 15 miles upstream to St. Maries and beyond, the St. Joe is calm and peaceful, catching and reflecting trees, hills and farms. Farther up, though, close to the towering Bitterroot Mountains, where the stream is born, it comes racing downhill through the forest. No man can take a steamboat up there, although one or two tried in the old days.

As a matter of fact, no man can take a car all the way into the St. Joe back country. You can get pretty close to the headwaters on a dirt road that follows the river from Avery, a little town upstream from St. Maries.

Fishermen use the road to get within hiking distance of a string of seldom-fished trout lakes. These lakes, all well-stocked by the Idaho fish and game department, lie close against the forested ridge that separates the St. Joe and Clearwater river drainages. You can drive to the Red Ives Ranger Station and then head south from there. Some of the lakes are within a couple of miles of the road, others are farther.

## HOG RAISING IS POPULAR 4-H ITEM

Chicago — Among the nation's hog growers are 4-H Club members who are learning how to breed, feed, show and market the animals. Last year nearly 170,000 members raised more than a half million hogs in the 4-H swine program, reports the National 4-H Service committee.

Pork ranks second in the tastes of American meat eaters. The average consumption is 64.5 pounds compared to 85 pounds of beef. The 1961 production and consumption is expected to reach a new high and 4-H swine projects have expanded accordingly.

Both boys and girls are enrolled in this program. One of the six national scholarship winners last year was a 17-year-old Kansas Miss, who also won the Miss Duroc Princess title in 1957.

She is Connie Reder, who lives on a farm in southeastern Kansas. Connie has had swine projects throughout her nine years of 4-H membership, and like other state and national champions, has served in various club offices and as junior leader.

This year six new national winners will be named by the Cooperative Extension Service, along with state and county winners.

Awards will again be provided by the Moorman Mfg. Co., Quincy, Ill. They consist of \$400 scholarships, expense paid trips to the National 4-H Club Congress in Chicago, and gold-filled medals.

## BITS OF TRUTH

Remember to leave your blood at the bloodbank — not on the highway.

With the cost of living so high today, a great many people find they can't afford to work for what they're worth.
