The bride, escorted by her father, wore a gown of white Chantilly lace with a fitted bodice and full skirt. A crown of flowers held the fingertip veil of lace net. She carried a pearl covered Bible from Jerusalem with a large lavender orchid.

A reception was held immediately following the ceremony in the church basement, for over 100 guests. Logging Truck Crashes Store

A parked logging truck rolled across Main Street and into the side and front of a grocery store here Monday about noon.

Broken in the crash was the front window of the Juliaetta Cash Store, owned by Willis Howell, according to A. R. (Rich) Humphreys of Lewiston, state policeman who investigated the crash. One pillar holding a balcony on the two-story building was knocked awry.

About a year ago a vehicle crashed into the balcony supports, nearly causing it to tumble.

In the Monday incident, Blaine F. Hendrickson, 40, Orofino, said he had parked the unloaded 1956 Mack truck across the street and about 120 feet east of the store.

Hendrickson said he left the motor running and set the truck's emergency brake. He then walked across the street and entered a store. Humphreys said he tested the truck's hand brake and found it was in good condition. He speculated the vibration of the motor and transmission had caused the brake to slip free. The truck is owned by Ponzoso Bros. Logging Co., Orofino. Damage to the building was not estimated. The truck was not damaged.

Grocery Improved

Willis and Luetta Howell have been in the process of improving their grocery store for some time, and Sunday evening they made the remark that "Outside of a few minor repairs and bit painting, we are through." They were not very happy about the "Grand Opening" Monday at noon when the logging truck crashed into the corner, broke the big window, and moved the porch of the upstairs apartment over about eight inches.

Just a year ago this month a car leaving the Richfield station, plowed into the side of the store and completely demolished the steps going up to the apartments.

Lura Nelson, who operates the store for the Howells remarked: "Instead of Juliaetta Cash Store, it should be named Juliaetta Crash Store!"

Among The Sick

E. J. Walsh has not been improving as rapidly as had been hoped for, having suffered a back-set Sunday. He was doing very well for a time, and was seen occasionally on Main Street, walking about and visiting friends. All wish him a speedy recovery.

Mrs. Clarence Brown is slowly improving. She is now able to leave her bed and sit in a chair at times.

INDIAN SUMMER STILL WITH US

This past week has been one of the most glorious Indian Summers that anyone could wish — or even dream about.

Daytime temperatures have been in the low to middle 80's, and at night they drop to the high 40's or low 50's.

This wonderful weather has, of course, enabled the farmers to get in all their crops, even to late beans and in scattered instances, peas and barley — and to do fall plowing. Most, however, have done no seeding, preferring to wait until moisture falls.

Hunting parties are busily preparing to "take off for the tall timber" although many are awaiting the arrival of cooler weather.

DON'T FORGET TO TURN BACK CLOCK

We haven't been able to find anyone who could tell us whether Standard time becomes effective Sunday morning, or Monday morning for certain, but we, at least, presume it to be Monday morning, when all the schools in Idaho go to that schedule.

**The 10 Commandments
of Safety**

- 1 Treat every gun with the respect due a loaded gun. This is the first rule of safety.
- 2 Guns carried into camp or home or when otherwise not in use, must always be unloaded, and taken down or have actions open; guns always should be carried in cases to the shooting area.
- 3 Always be sure barrel and action are clear of obstructions, and that you have only ammunition of the proper size for the gun you are carrying. Remove oil and grease from chamber before firing.
- 4 Always carry your gun so that you can control the direction of the muzzle, even if you stumble; keep the safety on until you are ready to shoot.
- 5 Be sure of your target before you pull the trigger; know the identifying features of the game you intend to hunt.
- 6 Never point a gun at anything you do not want to shoot; avoid all horseplay while handling a gun.
- 7 Unattended guns should be unloaded; guns and ammunition should be stored separately beyond reach of children and careless adults.
- 8 Never climb a tree or fence or jump a ditch with a loaded gun; never pull a gun toward you by the muzzle.
- 9 Never shoot a bullet at a flat, hard surface or the surface of water; when at target practice be sure your backstop is adequate.
- 10 Avoid alcoholic drinks before or during shooting.

His statement was made in response to remarks of government officials who returned to this country recently from a tour of Russian hydro-electric dams and power transmission systems.

"The investor-owned utilities are investigating extra high voltage connections in several parts of this country," he said. "In Pennsylvania there is a 13-mile line operating at 460,000 volts as part of the utility's regular system. In Colorado a test line of voltages up to 500,000 volts at altitudes of 10,500 feet is being established to determine the effect of high altitudes on high voltage transmission. And in Pittsfield, Mass., experiments are continuing on a 750,000 volt line; in Apple Grove, West Virginia, 775,000 volt transmission has been achieved.

"The utility industry will be spending \$8 billion in the decade of the sixties to provide new transmission facilities," Brunzell said. "These line will strengthen the in-

terconnection groups that supply nearly all the electric power in the nation.

"Washington Water Power is rapidly adding to its already large high voltage transmission system," Brunzell said. "The final section of the Lolo-Wanapum 230,000 volt transmission line extending from Walla Walla to the Wanapum dam is ready for construction. Practically all rights-of-way for this 107 mile line have been obtained, materials have been ordered, and construction is scheduled to start in November. This line is a joint project of WWP and Pacific Power & Light Company. The first section of the line, approximately 85 miles long, was placed in operation in April, 1962."

All of the aluminum used in manufacturing the many thousands of feet of transmission cable for the Lolo-Manapum-Walla Walla line came from Spokane aluminum plants at the specific request of WWP.

STRIPPING EGGS FROM STEELHEAD

Fish and Game Department personnel stripped 200,000 steelhead eggs for eyeing-up at the Sweetwater station near Lewiston, and planting in artificial hatching channels in tributaries of the Clearwater and Lemhi rivers.

This is an experimental program which may restore spawning runs to these streams in years to come. Here fisheries helper Rex Starks of Lewiston strips eggs from a big female steelhead for use in the project.

SCHOLARSHIPS TO 32 IN IDAHO

U. of I. — Thirty-two students will attend four Idaho institutions of higher learning under \$5,750 in scholarships provided by the Hecla-Bunker Hill Scholarship Fund, it was announced today by trustees of the fund.

Twenty-eight of the 32 scholarships will attend the University of Idaho; one, Idaho State college; two, North Idaho Junior college, and one, Ricks college. The awards are made annually from a \$100,000 fund established by Hecla Mining company

and the Bunker Hill company in 1951. University of Idaho students named to receive the awards are:

Barbara Austin, Robert Barrett, John Chisholm, Samuel Cummings, Gayle Miller, Frank Phillips, Joann Pietarski, Roger Severson and Frank Winiarski, all of Kellogg; Dennis Mix and Agnes Wilson of Pinehurst; Frank Erickson of Smelterville, and Claudine Becker of Wardner.

Susan Almquist, John Noordam and Luella Wolfe, all of Mullan; Helen Beck, Osburn; Sandra Fernquist, Francis Sprute and Bessie Turner, all of Wallace.

Alan Van Stone and Warren Yeakel, all of Sandpoint. Sandra Clark and Merle Newell, both of Moscow; Jonathan Mabbutt, Shoshone. Studying at Idaho State College will be Patricia Hellemons, Wardner. Going to North Idaho Junior College will be Judy White, Cataldo, and Jo Ann Naiman, Kellogg.

Attending Ricks College will be Gayla Hertzog of Pinehurst.

The Hecla-Bunker Hill Scholarship Fund was established primarily as "an investment in youth," the trustees said. The trust agreement for the fund provides that "it shall be applied without discrimination as to race, sex or creed." Each year an increasing number of students has been helped, and this year, each student will receive from \$100 to \$250 depending on need.

Scholarships are awarded to sons and daughters of employees of the companies and to their student employees, without stipulations to the winners regarding specified fields of study. The trustees added that worthy students who are majoring in mining, geological or metallurgical engineering, as well as related fields, may also be eligible for scholarships, regardless of where they or their parents are employed.

Trustees of the fund are L. J. Randall, president of Hecla Mining company; C. E. Schwab, president of the

Bunker Hill company, and D. R. Theophilus, president of the University of Idaho. W. C. Beamer, Wallace, is secretary-treasurer of the fund.

MEDICARES COST TO YOU

Lost sight of in the debate about the cost of putting medical care for the aged under Social Security is the dollar cost to the individual, Tax

Foundation, Inc., says.

For example, a 20-year-old entering the work force next year and working 45 years will pay \$9,798 into Social Security at present rates. If care for the aged is added, he will pay out \$11,199.50 during his 45 year career.

The measure's proponents estimate benefit payments and administrative expenses will be about \$1.1 billion for the first year. This will rise to about \$2.6 billion by the year 2006, they add.

Opponents have come up with different estimates. They say the first year cost will be \$2.2 billion, and that by 1983 the annual cost will be \$5.4 billion.

It happened 100 YEARS ago

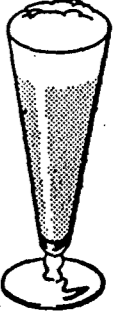

The oldest incorporated trade association in the country, the United States Brewers Association, was organized in 1862 . . . the same year that

IN IDAHO gold was discovered in the fabulously rich Boise Basin. In the great boom that followed, this area produced more gold than all of Alaska. Breweries, traditionally, became one of the first industries to be built in early mining cities of the West. The pioneer miners enjoyed beer just as Idahoans today continue to find pleasure in beer.

For then, as now, beer was the traditional beverage of moderation. But beer means more than enjoyment to our state. The Brewing Industry contributes more than 1 1/4 million tax dollars to Idaho each year — money that helps support our hospitals, schools and highways.

TODAY, in its centennial year, the United States Brewers Association still works constantly to assure maintenance of high standards of quality and propriety wherever beer and ale are served.

COLLEGE OF MINES OFFERS NEW DEGREE
 U. of I.—A new hydrogeology curriculum leading to a bachelor of science degree in geological engineering with an option in hydrogeology has been established in the University of Idaho College of Mines.
 "Students trained in this curriculum will be well qualified to work in ground-water resource studies," said Rolland R. Reid, head of the department of geology and geography.
 Water resources are rapidly becoming critical in the United States, he said. The Congress, the U. S. Geological Survey and the Department of Health, Education and Welfare have been devoting considerable time and effort to studies of water resource problems.
 "Many well-trained, qualified people will be needed in the future in water resource studies," said Dr. Reid. "The new hydrogeology curriculum is designed to provide some of those people."
DATE IS SET:
 The Cream Ridge Women's Missionary Ass'n. has set the date for their annual bazaar as Saturday, Nov. 3. A fried chicken dinner will be served, starting at 5:30 p. m. Everyone is welcome.

U. OF I. TO HAVE ART FESTIVAL
 U. of I. — A special invitation has been extended to art teachers in all Idaho schools to attend the sixth annual Art in Action Festival to be held at the University of Idaho October 5-7, sponsored by the Idaho Art association. Associate Professor Arnold Westerland is chairman of the event.
 Purpose of the conference is to develop skills and creativity in all school age children, especially with inexpensive materials on hand. Several members of the Central Washington State college will take part in the workshops, including Louis Kollmeyer, chairman of the art and industrial arts division at Ellensburg.
 Professor Reino Randall will show films which show various ways to teach children to master arts projects. Miss Ramona Solberg, well-known jeweler and educator, will have a show of her jewelry at the conference and will demonstrate jewelry making at the intermediate and secondary level. This will be done in a workshop to give teachers an opportunity to try their skills.
 One of the conference highlights will be the presentation at 8 p. m. Friday, October 5 in the Arboretum of the University of Idaho Vandaleers singing excerpts from the famed "Light on the Mountain" pageant, originally composed by Talbot Jennings. They will be directed by Glen Lockery. Readers will give various spoken parts directed by Jean Collette of the drama department.
 Workshops will begin at 9 a. m. on Saturday and run through the day to cover painting, pottery, weaving, jewelry, mosaics, sculpture, art education, city planning and urban design, and an exhibit of slides of Mexico.
 San Francisco art critic Alfred Frankenstein will speak at 7 p. m. in the Student Union on "Art Criticism, What It Is and What It Isn't."
 A number of paintings from various collections will be exhibited. Members of the association are urged to enter their work to compete

Boss: "What makes you think a mistake was made in hiring that new clerk?"

Chief Clerk: "Something's very suspicious. Notice that every time she puts a carton on the shelf she stops to wipe the fingerprints off it."

How's the fall work going? It will be easier if you use Union Gasolines or Diesel Fuel! Best by test. Call us at 4251.

The college sophomore had pestered his father, insisting on a new car. On a visit, his father

pointed out the ancient vintage of the cars in the campus parking lot.

"But, Dad," the lad protested, "those cars belong to the faculty."

Come in and see the new Union Minuteman Tire. The first tire good enough to bear our name. It is top quality — yet reasonable in price. Fully guaranteed. Sure, we'll trade. Come in today.

A wife pointed to her husband stretched out in a lounge in the sun, and said to her friend:

"Fred's habit is letting the birds watch him!"

Going hunting? Come in for a grease job and anti freeze before you go. Play it safe!

Use Union Lubricants — best!

Tuesday Lillie McCall and Mrs. Harri, Clarkston, visited Mrs. Mae McCall, in the E. J. Walsh home.

Mr. and Mrs. Arley Allen returned home Saturday night from a week's vacation trip. They drove over the Lewis-Clark Highway, through Montana to South Dakota, where they saw the Bad Lands and Mt. Rush-

more, thence to Wyoming, through Cheyenne to Denver and the Rocky Mountain National Park in Colorado. They stopped at Colorado Springs where they intended to do some sight seeing, but it was rainy and foggy, and on their drive through the Garden of the Gods they were able to see but a little of it. They drove from there to Salt Lake City, and back into Idaho. At Gooding they visited Miss Dorothy Foster and Mr. and Mrs. George Souders. They traveled some 3,258 miles — and say they are glad to be home.

Mr. and Mrs. John Surbaugh and family were week-end guests of Mr. and Mrs. Wayne Heimgartner and family, Sunday evening they called briefly at the Ernest Steigers home. Miss Carol Brown and Miss Christine Beck of Orofino called on Carol's aunt, Mrs. Ernest Steigers, Tuesday evening.

Merchants backed the 4-H sales wonderfully, and are to be commended on their fine public spirit. The 4-H members, parents and leaders are also to be commended for a fine job again this year.

Other interesting nature exhibits are spiders, brought by Glenn Lackey and Roger Candler; a green worm (now in his cocoon) brought by Rebecca Eichner; a frog brought by Roger Candler; a sparrow's nest by Betty Farrington; horsechestnuts by Rebecca Racicot and Debra Dammarell. She also brought a good collection of rocks and shells collected on the beach during her summer's visit with her grandmother in Tacoma. All of these things have made our Science more interesting.

Grade Two
Our specimens for Science have begun to collect. A bird's nest, woolly-bear caterpillars, a spider, moths, a pot of growing lentils and a gourd.

We hope our parents will help us remember our play clothes on Thursdays. That is our "Art Day," and we sometimes get a bit messy.

We will be working with paste now and then, and sometimes with paint. Standish Clayton brought a bear's claws and teeth to show us last Friday, and told us about the bear from which they were taken.

First Grade
Sept. 14 — Mrs. James Muscat sent treats of Dixie cups and cookies to the children of the first grade, honoring their daughter Sally on her sixth birthday anniversary. Judy Osborn also observed her sixth birthday anniversary that day.

Diane Wilkinson enrolled in the first grade Friday. We now have a total of 25 in our room.
