1. To start with: choose an Idaho "baker," the potato with the russet net-textured skin and uniformly oval shape. The qualities of mealy-dryness which make for fine baking are needed for superlative "French Fries."

2. To prepare: cut large or medium-size pared Idaho potatoes lengthwise, then crosswise into finger-wide strips. Put into cold water at once while the rest of the strips are being cut. Don't soak, because this lets the potato absorb water which prolongs the frying and makes the potatoes oily and soggy. Dry potato strips thoroughly with paper towels.

3. To fry (one stage method): fill the fry kettle about one-half full of solid shortening or oil. A 4-quart kettle or electric sauce-pan will take about 3 pounds of solid shortening or three pints of oil. Heat fat to 385-390 degrees F. using a deep-frying thermom-eter if you do not have an appliance temperature control. Leave fry basket in fat while heating. Raise basket; add raw potato strips to cover bottom of basket. Putting in too many strips at once brings down the temperature, lengthens cooking time, caus-ing fat to be absorbed by notatoes. ing fat to be absorbed by potatoes.

Lower basket into fat. Fry about 5 minutes or until strips are tender and golden-brown. Remove basket from fat; drain for a few seconds, shaking basket once or twice. Drain on paper towels placed on cake racks, in single layers. Sprinkle lightly with salt. Serve at once, very hot. Keep fried potatoes warm in 300 degree F. oven until all are cooked. Do not cover or stack.

4. In a hurry? Take a package of "grown-in-Idaho" frozen "French Fries." Follow the so-easy directions. Even when an "Idaho" is frozen, it has the same great flavor, grown in to stay in.
