Summer Is Here!

Summer seems to have arrived at last! Warmer temperatures have prevailed the past few days, with lovely blue, sunny skies.

Perhaps it was the weather, but it was most difficult to catch many near their phones to get news — most seem to be taking advantage of the good weather to work in their gardens and yards.

Spray planes have been busy over the area, some spraying for weeds, others for weevil. However, haying is about to start full steam — and of course this means everyone is plenty busy.

ROBBERY AT N. P. DEPOT FLAT FLOP

A night of frustration, toil and sweat were the only rewards of the burglars who staged a break-in at the Northern Pacific depot in Kendrick Saturday night.

Target for the burglars was a safe in the office of Miss Marilyn Ramey, depot agent, and judging from the work they performed, the yeggs evidently thought the vault contained a tidy fortune.

Entry into the depot was first attempted through a window, which was broken out on the south side of the building. However, though they succeeded in reaching in to release the catch, they found themselves still stymied — the window was nailed shut and wouldn't budge.

At this point the burglars should have called it a night, but that anticipated fortune in the safe proved to be too much to forget.

They gave up the window attempt, which they apparently classified as "professional" and entered through the unlocked door into the depot's waiting room. Then, forcing a panel of the door leading into the agent's office, they finally came face-to-face with the safe.

But again they ran into difficulty. The safe is estimated to weigh about 1500 pounds, and was a bit larger than any they were equipped to handle. However, they still didn't give up.

They forced the door into the old freight room to obtain a large hand truck with which to remove the safe from the building. Again they ran into difficulty.

In the process of loading the safe the hand truck became wedged on a wheel of the safe and nothing, neither hand truck nor safe, could be budged. This final problem proved too much of the yeggs and they departed — empty-handed!

The attempted burglary was discovered by Gilbert Sproul, track supervisor, at 7:00 p. m. Sunday.

The irony of the entire incident is that the hardworking burglars had three strikes against them, even if their efforts to remove the safe had succeeded — the safe, like old Mother Hubbard's Cupboard, was bare — not even a bone was inside!

They left by train Thursday and will be away three weeks. They were met by Becky's uncle and aunt, who live in New York.

NOW MOONSHINERS

Atomic techniques, enlisted in the war against moonshiners, helped the Department of Justice convince a federal judge that illicit whisky seized on a tractor-trailer in New York had been transported from a still in Georgia. Soil samples scraped from the bottom of the truck were subjected to irradiation and shown to match specimens collected from ground around a Georgia still. The new method is called actiation analysis.

MAKE IT WITH WOOL CONTEST IS OPEN

Entry blanks and information for the 1964 "Make It Yourself With Wool" home sewing contest are now available through the northern district director, Mrs. Maurice Johnson of Moscow.

An expense paid 14-day European holiday via Pan-American jet and a trip to Phoenix, Ariz., are among the incentives offered by the

sewing contest to girls and women who like to sew their own wool garments.

The garments must be entirely the work of the contestant and must be made from 100% wool loomed in America. The wool garments are judged the first time at a district fashion show, Oct. 17, in which the contestants model their garments.

The youngest group, Division A, ages 10 through 13; and the adults, Division D, 22 and over, may not go beyond this level. From Division B, ages 14 through 17, and Division C, ages 18 through 21, representatives are selected by the judges to participate in the state contest, which will take place in November at Pocatello. Division B and Division C winners from the 20 state contests will compete in Phoenix, Ariz., Jan. 14, 1965, to select winners for the European vacation.

Information may be obtained from Mrs. Maurice Johnson, 212 East 6th, Moscow, regarding the district contest which will be held Oct. 17 in Moscow. District contestants will compete for prizes including the ex-

pense paid trips, wool skirt lengths, wool blankets, sewing kits and other sewing aids. Vogue patterns and sewing books are also prizes.

J. EDGAR HOOVER WRITES ON LAW AND ORDER PROBLEMS

Is a poisonous bacteria being injected into the vital bloodstream of the American way of life? Are citizens being subjected to tranquilizing doses of subtle ridicule and calculated defiance of constituted authority, law, and order.

These questions loom particularly important at the moment because June is a time of hope and anticipation for thousands of American young people. Many high school and college graduates leave the cloistered atmosphere of homes and educational institutions and move into the ranks of our workaday society. We hear a great deal about their adaptability and whether they are prepared to cope with this significant milestone in life. Not much concern, however, is evidence over society's preparation to receive them. We might well ask ourselves if we have fully acquainted them with the time-honored principles which have made America great.

Actually, graduating seniors should have no questions as to the greatness of our way of life. But as we know, some do have questions. We do not and should not isolate and shield them from theories and ideologies which we believe to be contrary to the best interests of our country. As growing boys and girls, they have been exposed to the dubious theme running through much of our entertainment, movies, television radio, literature, arts, and theater which often depicts our orderly processes as inept, incompetent, and out of step with the times. This trend comes close to undermining the concepts and ideals on which our Nation was founded; and even in those instances when the age-old battle of "right versus wrong" is presented, "right," though usually victorious, is often tainted.

Students as well as other Americans recognize and accept the long-standing custom in our society of satirizing public officialdom. The mere fact that this practice has become a part of the American scene is a tribute to our freedoms. Obviously, no one seriously suggests that all Congressmen, judges, prosecutors, law enforcement officers, city officials, and other authorities are jelly-brained nincompoops as frequently featured. While some may question the degree of such jest, none can question the privilege to do so.

The real danger lies in the more subtle, low-keyed, so-called objective, and serious castigations of principles involving "out" way of life. This is no complaint against the inherent rights of public criticism and freedom of expression. My objection is against the wholesale defilement and universal downgrading of our treasured freedoms and institutions — the time-tested attributes of democracy which are manifested in a representative government ruled by law.

A well-known editor and columnist some months ago, speaking on this topic, stated, "I am tired of seeing America debased in the eyes of foreigners. And I am genuinely disturbed that to the idealistic youth in many countries the fraud of communism appears synonymous with morality, while we, the chief repository of real freedom, are regarded as being in the last stages of decay." BIDS FOR BUILDING RENOVATION IN

U. of I., Moscow — Low basic bids for the renovation of the University of Idaho's 40-year-old Science building into a modern Life Science building totaled \$863,011, it was announced last week by Arthur Warren of Boise, State Commissioner of Public Works, who opened the bids here.

Low bid for the general contract was entered by Sceva Construction Co., Spokane, \$109,717; for the mechanical contract, Lewiston Plumbing & Heating, \$225,739, and for the electrical contract, John's Electric of Lewiston, \$17,556.

The building, which has provided quarters for both physical and biological sciences for more than half the life of the university, is to be renovated with construction of new laboratory and classroom facilities for the biological or life sciences. Physical sciences — chemistry and physics — are now being moved to the new Physical Sciences building.

Other bids for the renovation were: General contract, Commercial Builders, Moscow, \$112,370; and Hollibaugh Construction Co., Orofino, \$125,000.

Mechanical contract: W. R. O'Rourke Co., Walla Walla, \$248,432; Bingham Mechanical, Moscow, \$248,788; Powell Plumbing & Heating, Moscow, \$252,000; Warren, Little & Lund, Spokane, \$257,460; Peck & Gale, Spokane, \$275,510; McClintock & Turk, Spokane, \$318,811.

Electrical contract: Stoddard Electric, Orofino, \$19,900; and Power City Electric, Spokane, \$44,283.

Bids were also opened on the construction of an Engineering Isotope laboratory and storage warehouse at the university. The low bid of

\$69,500 was entered by Hollibaugh Construction Co., Orofino. Other bids were: S. G. Morin & Son, Spokane, \$71,484; Commercial Builders, Moscow, \$73,166; Sceva Construction Co., \$73,723; C & S Builders, Pullman, Wash., \$79,300; Hazen & Clark of Spokane, \$79,732.

FOOD FOR REAL ECONOMIC THOUGHT

Says the Flemington, N. J., Democrat: "Will the economy live up to its promise — The 1962 tax revision which is helping industry to meet the challenge of obsolescence, is now having some impact on the economy. The 1964 tax cut may produce a rise in consumer spending — the important question is the attitude of the economic planners, the men in Washington who shape policies of the future. Will they support sound expansion, through free enterprise and private investment? Or will they revert to the restrictive 'planned economy' and 'pump priming' of the 1930's?"

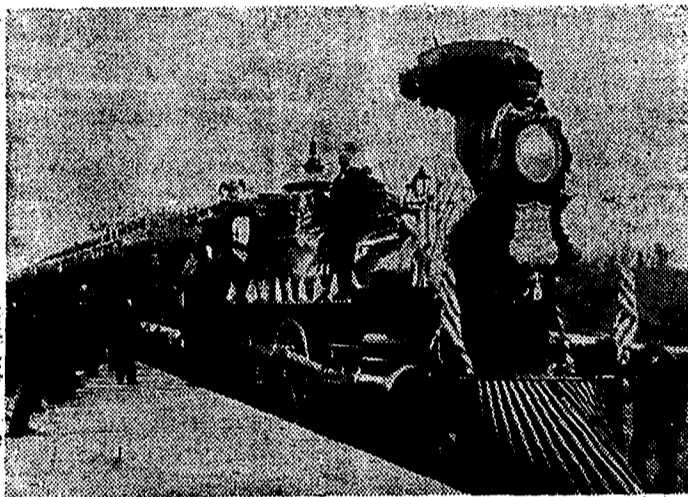

TRUE, VERY TRUE

When you get to heaven You will likely see, Many folks whose presence there Will be a shock to you!

But keep very quiet Do not even stare, Doubtless there'll be many folks Surprised to see you there!

There is no substitute for good food, and you will find every kind to tickle your palate at Blewett's Grocery in Kendrick.

EARLY DAY TRAIN OF N. P. RAILWAY

On July 2, 1864, Abraham Lincoln signed the charter creating the Northern Pacific Railway — first of the northern transcontinental lines. Pictured above is one of the four trains which carried Henry Villard and his many guests to Gold Creek, Montana, where Northern Pacific's last spike ceremonies were held on Sept. 8, 1883. — Haynes Photo.

WEATHER? A VERY UNHAPPY TOPIC

The weather over this past few days has been as "like and unlike" late June as anyone could imagine.

Last Wednesday the thermometer read 90 degrees; Thursday it read 87 degrees — Friday it read 84 degrees, with a very high humidity — so high in fact, that many questioned the accuracy of thermometers, as it was, as one resident put it "real sweatin' weather!"

Late Friday afternoon a dust storm arrived, and the canyon was gray with the stuff, evidently coming in from the Columbia river basin. The dust filled the air until well into the night hours, when a cool breeze arrived and brought with it a few scattered drops of rain.

Saturday was fair, but cool, with a reading of 80 degrees.

Sunday morning dawned with a low reading of 44 degrees, and a high of 76 was recorded for the day.

Monday morning also read 44 degrees, and again the high reading was a mere 76.

According to the official records of the Lewiston weather bureau, the 44 degree readings, which also was theirs, equalled the all-time low readings for that date.

A RELIEF

A motorist lost control of his car and ran into a telephone pole. When he came to he was on the ground clutching telephone wires.

"Thank goodness," he murmured "it's a harp."

JOANN SCHWARZ TELLS OF 4-H TRIP TO WASH., D. C.

On June 2, 35 members of the Nez Perce County 4-H Junior Council started for Washington, D. C., to attend the Citizenship Short Course. I (JoAnn Schwarz) was lucky to be one of them. The Junior Council had been thinking about this trip for four years, but only in the last two years have been working on it.

We were the first county in Idaho to do this sort of thing. The Junior Council had many money raising projects for funds for this trip. Each of the members attending had to furnish \$150 of his own money, and the Jr. Council paid about \$80 for every-one going.

We had three chaperones, Mr. and Mrs. Charles Thomas (Mr. Thomas is our County Agent), and Mrs. Geo. Meachem, a 4-H leader, all of Lewiston.

The Jr. Council chartered a Greyhound bus. The driver was L. P. "Hoot" Gibson of Spokane, who also is a 4-H leader. He drove us all the way and became as a counselor to all of us.

Before we left Mr. Thomas and the bus company had set up a schedule so that we would make about 450 miles a day. We had an hour for breakfast and dinner, and supper was eaten in the city where we stopped for the night.

Our group left the Lewiston Court-house at 7:00 a. m. We went up the Clearwater river and over the Lolo Pass into Montana, which was the most scenic part of the trip. The first night was spent in Bozeman, Mont. The 4-H Club there had a party for us. We square danced and had a hootenay.

We usually got up about 5:00 a. m., ate in a near-by motel restaurant and were on our way.

The second day we stopped at Custer's Battlefield, but it was raining so hard we didn't stay too long, and spent the second night in Newcastle, Wyo.

The third day we saw Mt. Rushmore. No one really knows how wonderful this monument is until you see it. That night we stayed in the Sioux Falls, S. D., where we saw the Pathfinder Atomic Electricity plant. At Pathfinder we saw only models, because the real plant was in use.

The fourth day we spent in travel, but in the evening we had a picnic by the Mississippi river, with some of the 4-H'ers in Dubuque, Iowa, where we spent the night.

During the fifth day we stopped in Chicago to visit the National Science and Industry museum. We were there nearly two and a half hours, and I saw only very little of the first floor — and there were seven floors. By this you can see how wonderful it was. The evening was spent swimming in the motel pool.

The sixth day we stopped at Gettysburg and saw many of the statues there. That night we stayed in Washington, D. C.

We stayed in the National 4-H Center in Chevy Chase College, in Maryland, which is about four miles from Washington D. C. The Center was at one time a girls' school, but closed because there weren't enough students to keep it open, so the National 4-H Foundation, which is composed of the 4-H Club of America, bought it. Each room is furnished by a state and called the "States Room," such as the "Idaho Room," because it is furnished by Idaho. There are three large rooms where the assemblies were held, all the rest are bedrooms, which are also furnished by states. The total capacity of the Center is 400, but there were only about 150 there for the Short Course.

Every morning and usually in the evening, we had assemblies on citizenship. Some of the titles were: "Citizenship and You," "Citizenship Toward New Horizons." One of the talks I thought most interesting was entitled "Here Am I, Send Him."
