LAND PATENT IS ISSUED AT BOISE

Boise — The first land patent conveying title ever issued by the Idaho office of the Bureau of Land Management was given to Lawrence V. Martin of Eden, Thursday afternoon of last week at a special ceremony in Boise. Orval G. Hadley, land office manager, signed the document which gave Martin ownership of 312 acres of former desert land east of Jerome on Sugar Loaf Butte. Witnessing the signing was Joe T. Fallini, BLM state director.

The President of the United States personally signed all land patents until 1833, when a full-time secretary was authorized by Congress to sign the President's name. The Secretary of the Interior was delegated this authority in 1948, and transferred the responsibility to the Idaho land office on Jan. 1, 1965.

Mr. Martin (left) is shown receiving his patent from Mr. Hadley. Mr. Fallini, state director (standing) witnesses the history-making event.

STUDENTS AND THE LABOR MARKET

U. of I., Moscow "We have made great strides in recent years in making high school students aware of their potentialities for various careers, but now we must see that they are better informed on the labor market."

This is a conclusion reached by Dr. Norman Nybrotten, associate director of the Bureau of Business and Economic Research at the University of Idaho, in a study on student career planning. His study, released today in a booklet issued by the bureau, is entitled "Labor Force and Career Plans of High School Seniors in Ten Counties of Southern Idaho." Statements of 3,654 high school seniors were analyzed.

"The study indicates that, if high school seniors generally follow the career plans they have indicated, some types of positions will go begging and others will be greatly overcrowded," Nybrotten said. "In the years to come, we can expect much keener competition in most professions. However, there are currently three professional categories in which there are prospects for shortages — accountants and auditors; authors, editors and reporters, and social and welfare workers."

Nybrotten said that more persons might also look to careers in management and in wholesale establishments, sales management, the U. S. postal system, city and state offices and food and nutrition services.

The overall problem of keeping the dynamic labor force in balance, Nybrotten pointed out, is associated with the rapid emergence of the female

worker as a permanent part of that force. The number of male workers in the nation increased only 6.1 percent from 1950 to 1964 whereas the female number increased by 36 percent. In 1950, women made up 10 percent of the labor force in the professions. Today they total 13 percent, and this figure is expected to continue to rise.

Another factor is that in 1950 there were about equal numbers of farmers and professional people, but in March, 1964, there were approximately four times as many professional and technical people as there were farmers. There were also certain types of unskilled laborers who were decreasing in numbers.

"These trends have probably been brought about mainly by mechanization and automation, and very likely will continue further," said Nybrotten.

F. B. I. TO HOLD RIOT TRAINING COURSE

Lewiston — Pursuant to a directive by President Lyndon B. Johnson, the F. B. I. is instituting a nationwide program to train local law enforcement officers in the latest riot control procedures.

Noting that the President instructed the F. B. I. to assume the leadership and coordination of this program, F. B. I. director J. Edgar Hoover stated that training schedules are now being drawn up and this instruction will be available to police officers in every section of the country. Mr. Hoover pointed out that these training classes would be conducted by Special Agents, graduates of the F. B. I. National Academy, local police officials and others who have had experience with this critical problem.

Robert W. Evans, special agent in charge of the Butte, Mont., office of the F. B. I. stated that special training classes in this area would be held on Feb. 8, 9 and 10, 1965, at the Idaho National Guard Armory in Moscow. Sharing the speakers platform will be members of the Idaho National Guard, officials of the Idaho State Police and Len Bielenberg, Latah county prosecuting attorney.

According to Mr. Evans the instruction for local police will cover the importance of preventative planning, the handling of unlawful assemblies, and other factors involved in riot control procedures.

Highlights of the U. S. Geological Survey's research activities in 1964 are published in a 367 - page summary. The report, describing the agency's notable scientific and technical accomplishments, may be obtained at cost of \$2.00 by writing the Superintendent of Documents, U. S. Government Printing Office, Washington D. C., 20402.

WINS HONORS FOR FOURTH TIME

U. of I., Moscow, The distinction of being selected for the fourth time to assist in the National Science Foundation under-graduate science education program was afforded this week to University of Idaho Professor Forrest H. Hall.

Professor Hall was selected to be a panelist at a meeting to be held in Chicago on February 8 and 9, 1965, to evaluate proposals submitted by the country's colleges, Universities, and junior colleges for partici-

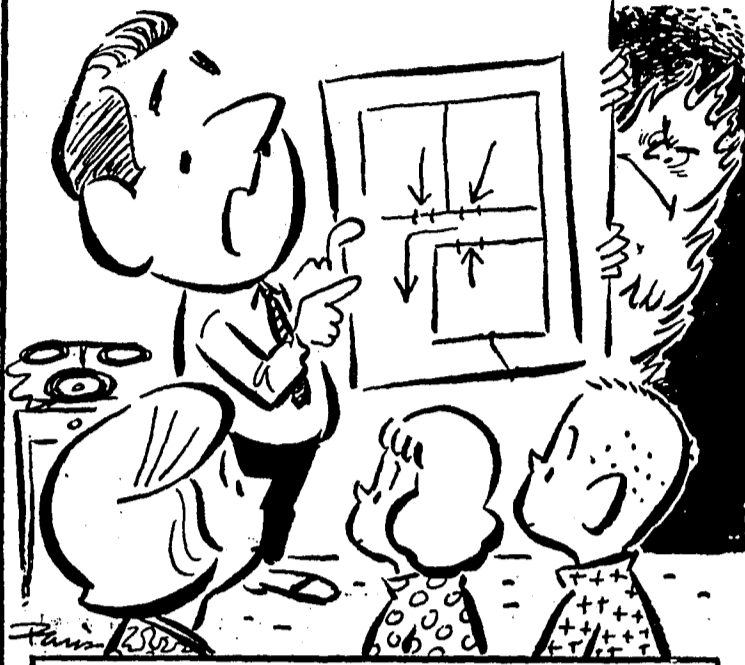

pation in the foundations equipment program.

"During the past three years, the foundation has been able to assist 805 institutions by providing matching funds for the purchase of equipment," Hall said. "In this period 2,097 grants totaling \$21.7 million have been made."

According to Hall the foundation receives many more proposals than can be supported with available funds. They select participants from throughout the country to serve on panels to review the proposals and give them priority ratings.

FERTILIZER TO PLAY DOUBLE ROLL SOON

U. of I., Moscow — For years Idaho farmers have applied fertilizer to their crops to increase production. One of these years, they may be able to plan a fertilizer program which will also control disease caus-

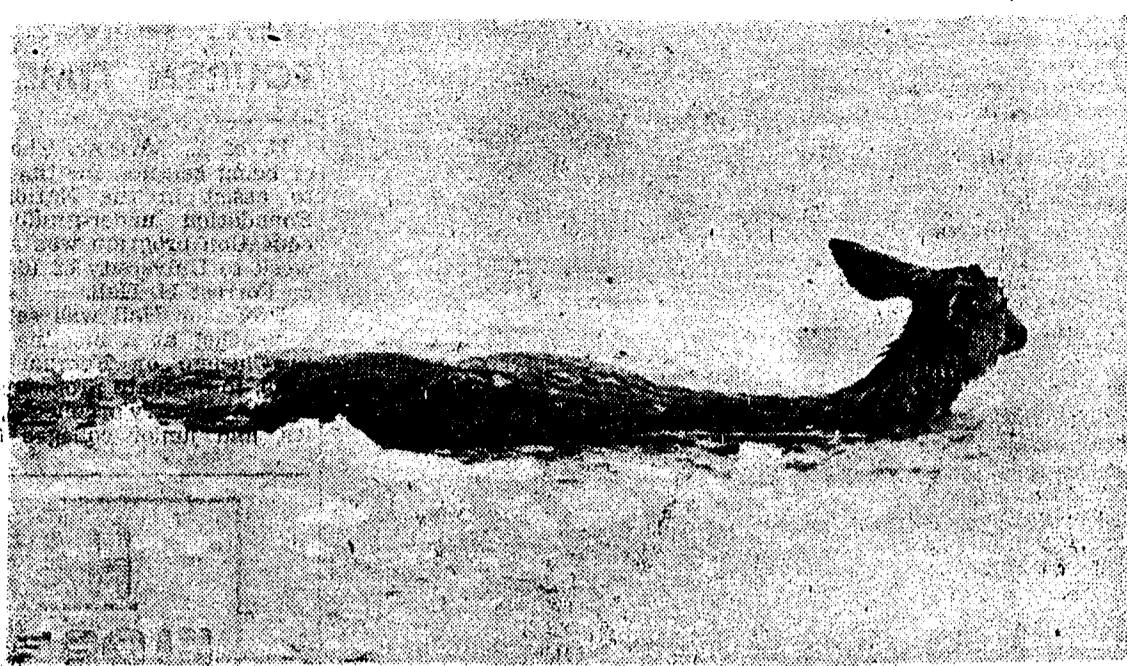

ing soil organisms. Studies by Don Huber, plant pathologist with the University of Idaho Experiment station, show there is a definite tie between forms of nitrogen fertilizer and plant diseases caused by soil pathogens. His work may lead to greatly reduced costs of plant disease control by recommending fertilizer use which will establish chemically the form of nitrogen in

soils. Huber's experiments indicate that nitrate forms of the fertilizer reduce activity of cortical pathogens — the kinds that cause such diseases as sharp eye spot in wheat and bean root rot. Ammonia and ammonium forms seem to increase the activity of these pathogens. The opposite reactions were observed for the vascular pathogens — the types which cause wilt diseases.

Huber does not know exactly why the fertilizer acts as it does, but he has found that it does not kill the soil organisms. "When we've had our best disease control we haven't always reduced the population of the pathogens," he explained. "This indicates we are affecting the ability of the organism to cause damage."

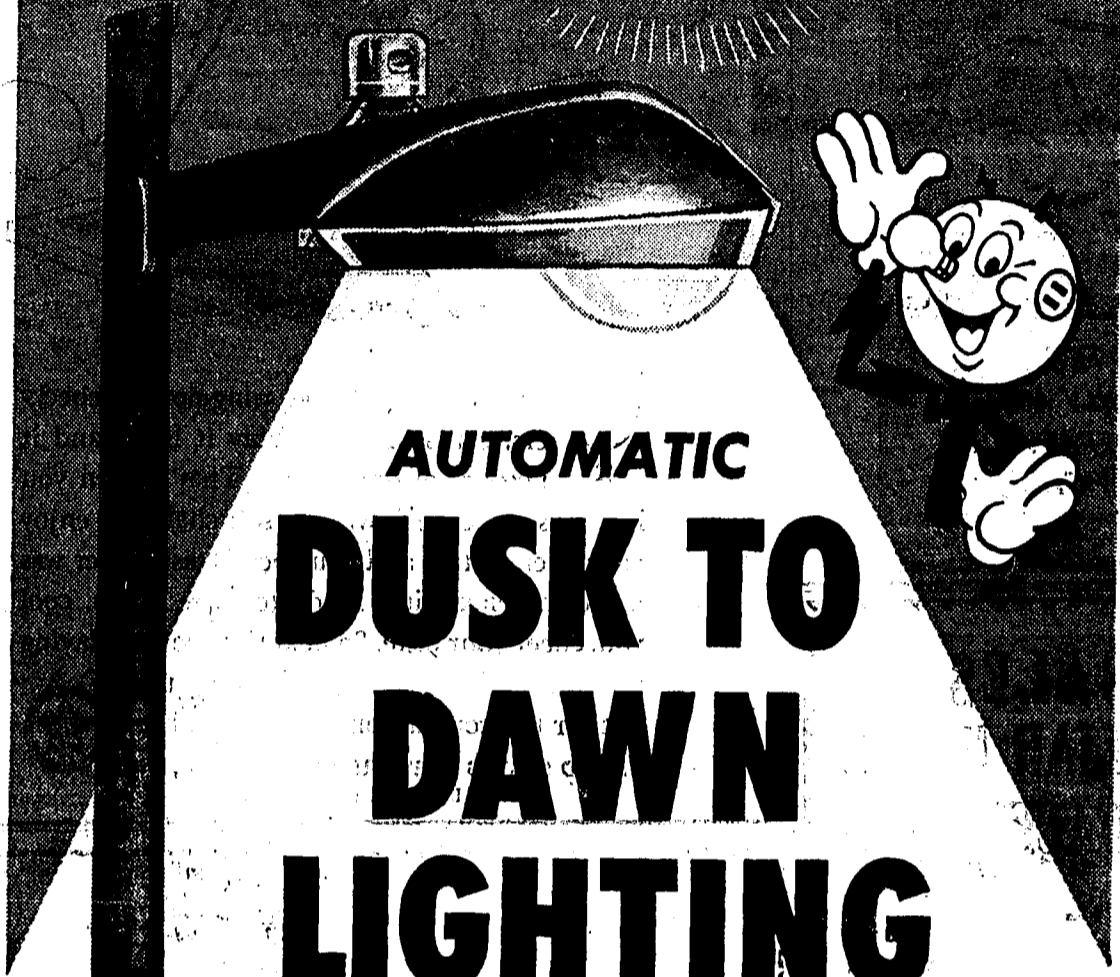

He believes the nitrogen indirectly affects the disease causing ability of the pathogens either by its influence on other soil organisms that react with the pathogens, or by its affect on the disease resistance of the host plant. The first, Huber says, seems more likely.

BR-R-R-R!

Boise — No cold shower will be needed after this bath, following a break-through on the ice at one of Idaho's numerous historic deer crossings along migration routes from summer to winter ranges. Some deer are lost every year because the animals cannot climb back on the ice which gave way beneath them.

The Idaho Fish and Game department is experimenting with equipment designed to agitate frigid water by pumping quantities of warm air beneath the surface at various depths to prevent freezing at deer crossings.

AUTOMATION AND MEDICINE TODAY

Computers will be used to help diagnose chest tumors. The University of Cincinnati is feeding information about tumors into a computer's memory center so that when medical information about the condition of a patient is fed into it, the computer can produce a list of the various possible diagnoses, and the likelihood of occurrence of each.

AIR and MORE AIR

The Ionosphere is being measured by the latest U. S. Polor satellite. The Beacon Explorer B, launched early in October, measures the elect-

ron density of the thick gaseous layer between the earth's atmosphere and outer space to determine its "mirror" effect in reflecting radio waves back to earth. This will help in unraveling the problems of long-distance communication

SMALLNESS SUPREME

A sensor so tiny it can measure temperatures inside a living cell without disturbing the cell's delicate balance has been developed at the University of Texas. It will help determine how heat is conducted from cell to cell in burn cases and assist in applying the knowledge in treatment of burn victims.

CANNING BLOOD

Whole blood has been successfully transfused into monkeys, after having been frozen and thawed, without any permanent adverse effects. The University of Michigan medical school says this may help in developing a means of freezing and storing human blood indefinitely.

GAS PROBLEM

Hardened steel can be cracked by molecules of hydrogen gas, and this can create welding problems. If hydrogen is present in appreciable amounts in gas, around a welding arc, individual atoms will diffuse through pores in the metal and then unite in the steel to form molecular hydrogen. Then, since the hardened steel cannot stretch to accommodate the pressure, it will crack if enough of the

gas accumulates. Special electrodes solve this problem in many welding applications.

FRESH AS SPRING

A sweet solution to a moldy problem has been developed by an American manufacturer, with introduction of a disinfectant that kills mildew-and-mold-causing household germs and "leaves a sweet, fresh scent." The spray is said to be 100 percent effective in destroying staph, strep and other household germs when sprayed on surfaces in kitchens, bathrooms, closets, basements and other places.

WEATHER HURTS PRICE

Shrimp lovers, grumbling at the increased price of the delicacy, can blame it on the weather. This year's unusual series of hurricanes scattered the tasty crustaceans all over the ocean floor and kept fishing boats in port, causing an eight-million-pound reduction in the shrimp haul.

SNOW SURVEY FOR JAN. COMPLETED

Moscow — The February 1st snow survey was taken over a three-day period starting Jan. 29 and ending Jan. 31. It consisted of a drive on the first day to the Sherwin course between Bovill and Clarkia by F. Chugg and C. Swenson of the S. C. S.; a snow cat ride on the second day to two of the courses on Moscow Mt. by F. Chugg, George McKean and Harvey Warion of the U. of I., and due to mechanical failure of the snow cat, a long walk to the remaining three courses on the final day, by M. Chugg.

The snow pack on the Sherwin course was 16.2 inches less than the 85.9-inch record of last year, or 39.7 inches. The water content of the snow last year was 12.4 inches compared to this year's 12.4 inches, which indicates a difference of 10.6 inches.

The five snow courses on Moscow Mt. showed approximately 10 inches increase in snow depth over last month and are below last year's record snow pack.

The Moscow Mt. course had an increase in snow pack of 13.5 inches on top of the 35 inches recorded last month, to bring the total to this date to 48.5 inches, which is about 12 inches above the past seven years' average. Last year this course had a record depth of 60 inches, which is 11.5 inches more than recorded this year. However, the water content between last year and this year is nearly the same at 15.8 inches.

The West Twin snow course on the mountain showed the greatest increase in snow pack by receiving 15.4 inches to bring the total amount from 18.3 inches to 33.7 inches.

The remaining three courses are East Twin 34.8 inches of snow; Howard Creek with 18.3 inches, and Cruminate Creek with 24.6 inches of snow.

The snow survey will continue on the 1st of each month through May. It is conducted through the cooperative efforts of Prof. C. C. Warnick, U. of I. Engineering Experiment station; the Soil Conservation Service and the Latah Soil Conservation District supervisors.

Card Party

The Home Demonstration Club members are sponsoring a card party Feb. 13th (Saturday evening) for the benefit of March of Dimes and Heart Fund. It will be held at the Cameron Ladies Aid Hall, starting at 7:30. Everyone is invited.

Missionary Meeting

The Bible Study Group met with Mrs. Glen Wegner last Wednesday afternoon. Mrs. Doug Christensen gave the topic. Mrs. Wegner served dainty refreshments at the close of the afternoon.

Our Error

Sorry, but Mr. and Mrs. Wilbert Bruntsiek's names were not included with the group who spent the day, Jan. 19, at the Harl Whiting home.

Other News

Mr. and Mrs. Gary Lohman and Vicki spent Saturday night with his parents, Mr. and Mrs. Ervin Lohman. All attended the wedding that evening of Linda Denner, at Juliaetta.

Mr. and Mrs. Glen Wegner were Friday evening supper guests of Mr. and Mrs. Roy Craig.

Mr. and Mrs. Wilbur Tarbet spent Sunday evening with Mr. and Mrs. Glen Wegner.

Mr. and Mrs. Roy Silflow were Friday evening visitors of Mr. and Mrs. James Whiting and daughters.

Roy Silflow and Mrs. Henry Lingenfelter met her husband in Lewiston, Monday, he having been released from the Veterans Hospital at Walla Walla. He came to Lewiston by bus, and Roy took them on to their home at Tekoa, where he will recuperate.

Mr. and Mrs. Jack Mustoe and Mark spent Friday evening visiting Mr. and Mrs. Ernest Brammer and Jolene.

Mr. and Mrs. Wilbert Bruntsiek were Lewiston visitors Wednesday, at the Clay Albright home, and to see her mother, Anna Blum, at the St. Joseph's Hospital.

Mr. and Mrs. Ernest Brammer and Jolene visited with Mr. and Mrs. Walter Koepf Sunday afternoon.

Skip Koepf, Coeur d'Alene, spent from Thursday until Sunday here with his parents, Mr. and Mrs. Walter Koepf.

Mrs. Albert Glenn returned home Thursday after spending several days with her brother-in-law and sister, Mr. and Mrs. Clay Albright, and to be near her mother, Mrs. Anna Blum, who was in the hospital.

Mrs. Thelma Meyer, Loeda and Ted visited with Mr. and Mrs. Wilbert Bruntsiek Sunday evening.

Mrs. Anna Blum was released from the hospital Monday, and Mrs. Albert Glenn went down to spend a few days helping care for her mother. They are at the home of Mr. and Mrs. Clay Albright.

Mr. and Mrs. Eldon Glenn and family and Mr. and Mrs. Wilbert Bruntsiek were Sunday dinner guests

of Mr. and Mrs. Albert Glenn. Mrs. Warren, Kendrick, spent Sunday night with her son-in-law and daughter, Mr. and Mrs. Eldon Glenn and family.

Mr. and Mrs. Fred Newman were Thursday evening supper guests of Mr. and Mrs. Harry Newman, honoring David Newman's birthday.

Mr. and Mrs. Ed Mielke were Friday over-night guests of their son-in-law and daughter, Mr. and Mrs. Charles Havens, in Clarkston.

Mr. and Mrs. Ed Mielke were Saturday over-night guests of their son-in-law and daughter, Mr. and Mrs. Chas. Parks, Cream ridge.

Stanley Hepler worked with the Air Posse Saturday and Sunday, helping with flood relief duty at Culdesac.

Mr. and Mrs. Dan McKinzie of Deary were last Tuesday dinner guests of Mr. and Mrs. Stanley Hepler and Don.

Mr. and Mrs. Stanley Hepler attended a Gun Club meeting at Troy, Sunday.

Mr. and Mrs. Henry Wendt spent Monday evening visiting Mr. and Mrs. Wilbert Bruntsiek.

Dr. Christensen was a Friday morning caller at the Harl Whiting home. Mrs. Whiting has been on the sick list.

CEDAR RIDGE

AND LYNDEN
MRS. ROBERT PRATT
Phone 289-5338

Mrs. Jack Parsley has been spending the past week at Lewiston to be with their infant daughter, who is a heart patient in the hospital. Her condition is described as "very serious."

Mr. and Mrs. Alfred Cann, Pierce, were Sunday visitors of Mr. and Mrs. Phil Bahr. Billy Wilson and son were Sunday dinner guests. Mr. and Mrs. Jack Guler and Joe called that evening.

Mr. and Mrs. Richard Schliefer of Lewiston were guests of her parents, Mr. and Mrs. Sam Weaver, a week ago Monday.

Mr. and Mrs. Cleon McAlister attended a farewell dinner Sunday at the Juliaetta Nazarene Church for Mr. and Mrs. Harold Gilliam of Juliaetta, and Mr. and Mrs. Verlin Benjamin and family of Southwick.

Mr. and Mrs. Denny Kiele and son of Kooskia were Saturday over-night and Sunday morning guests in the Sam Weaver home.

Mr. and Mrs. Billy Wilson and son were Monday evening dinner guests of Mrs. Lillian Wilson and W. H. Weyen, Kendrick.

Mr. and Mrs. Doug Johns, Juliaetta, were Friday evening dinner guests of Mr. and Mrs. Neil Grinda.

The W. M. A. met with Mrs. Sam Weaver, Thursday afternoon.

Peggy Wright, daughter of Mr. and Mrs. Vern Wright, Whitebird, is spending some time with her grandparents, Mr. and Mrs. Wayne Wright.

Appreciation Day

FASTER, EASIER WINTER STARTING

Heavy-duty engines start in seconds with Chevron Pressure Primer System — even in sub-zero weather. Safe, simple system uses pressurized steel cartridges of priming fuel, discharger and metal tubing to intake manifold. Reduces engine wear, lengthens battery life.

Avoid fuel line icing. Just pour a little Chevron Ban-Ice® Fluid in your gas tank.
