

IT HAPPENED WAY BACK WHEN

30 YEARS AGO

Wm. Roskammer, former Genesee resident, notified relatives Saturday by wire that he was safe at Pearl Harbor and liked his work.

Oscar Hoesel, son of Mr. and Mrs. Nels Bakken of Moscow and a grandson of Mrs. Annie Danielson, who has been at the Danielson farms for several years, is now at Jefferson Barracks.

John Luedke was re-elected president of the Genesee Farmers Union local at its meeting at the Legion Hall Monday afternoon. Elvon Hampton was elec-

ted vice president, and H. F. Koster continued in office as secretary and treasurer.

Miss Thelma Jones, daughter of Mr. and Mrs. H. B. Jones returned Dec. 6 from Chicago after 6 days in attendance at 4-H Club Congress.

Virgil Hove was honor guest at a stag party in honor of his birthday at the home of Wm. Christenson Thursday eve.

Ormand Hickman and Bob Schooler arrived in Genesee at 3 o'clock Thursday morning from Glendale, Calif where they went 3 weeks ago expecting to obtain employment. Llewellyn and Wayne Bershaw, who accompanied the above to California remained, the former accepting a position at Morgans Cafe in San Diego and Wayne employed as purchasing and stock clerk at Consolidated Aircraft Corp plant in San Diego.

50 YEARS AGO

Mr. and Mrs. Charles Grieser, Jr. have a new boarder at their home, who arrived Saturday afternoon for an indefinite stay.

Ernest Johnson, son of Mr. and Mrs. August Johnson is in Gritman hospital recovering from an operation for rupture performed last week.

Capt. Cody Rader and Private Fat Sampson say they are going to the shooting match at Pine Grove next week and give the natives a few pointers on the proper way to handle a gun. Capt. Rader says he can bring down more game with his gas-pipe gun than any other member of the club and is going to prove it.

Mrs. B. B. Caldwell was elected chm. of the women's auxiliary of the American Legion and Mrs. Chas. Geitz, vice chm.

A very pleasant surprise was carried out on Miss Blanche Hermann last Saturday night at the home of Mr. and Mrs. Joe Trautman in honor of her birthday anniversary.

Mr. and Mrs. Otto Kretschmer left Monday morning for Los Angeles where they will spend the winter.

From The Kendrick Gazette December 4, 1941

Miss Ruth Cuddy, daughter of Mr. and Mrs. Ray Cuddy of Southwick, and Rollin Armitage, son of Mr. and Mrs. Tom Armitage, also of Southwick, were united in marriage at 11 o'clock Monday morning, December 1, by the Rev. George Calvert, at his home at Lenore. Miss Joyce Lyons was bridesmaid and Elmer Cuddy, brother of the bride, best man.

Both are well known in this com-

munity. They will make their home at Southwick where the groom is in business. The best wishes of all go with them.

Mr. and Mrs. Frank Abrams are proud parents of a baby son, Lorn November 29.

Lohman Brothers of Potlatch Ridge were busy combining Robust beans Nov. 20. Some 30 sacks were put through the machine. It is unusual for cut beans to be immediately put through the machine—but the date of the operation is even more unusual.

December 11, 1931
Mr. and Mrs. Philip Johns are the parents of a baby girl born Sunday morning.

A nine-pound daughter arrived at the home of Mr. and Mrs. Wm. Spray Tuesday morning.

Honor Roll at KHS—Students with the 90 percent average requirement are: Seniors—Nona McAllister, Burneda Cummings; Lois Fry, Ruby Hefel and Ethel Cummings; Juniors—George Davidson, Jack Bailey, Hazel Reid, Mary Johnson, Elma Jones and Nettie Mae McDowell; Sophomores—Maxine Keene, Kathryn Emery, Lawrence Schwarz, Freshmen—Bud Carlson and Clem Lyons.

December 11, 1941

Grades School notes at Kendrick: Grades 3 and 4—The election for this month goes the following results: Patty Brocke, president; Deloris Crocker, Vice-president; Marilyn Schupfer, sec. - treas. Grades 5 and 6 election results were: George Brocke, Jr., president, June Brown, vice-president, Chloe McKeever, secretary-treasurer; Ellie Fry, librarian, Gilbert Candler, assistant librarian. Grades 7 and 8 are practicing basketball, tumbling and badminton. They will give a tumbling exhibition at the Orofino game Friday night.

Wheat Prices Up In Pacific Coast Markets. Cash wheat bid quotations at Portland on December 5, showed soft white at 94c; soft white (Rex not applicable) at 98c; white club at 99c; hard red winter at 93c per bushel; all basis No. 1 grade in bulk. Cash wheat quotations at Seattle showed soft white at 94c, western red at 99c; hard red winter at 93c and hard white (baart) at \$1.19½.

Mr. and Mrs. Henry Brammer of Southwick moved this week to their new home, which is better known as "the Compton place". Various improvements are being made by the Brammers.

New Edition Trophy Record Book
The sixth edition of Boone and Crockett book on Records of North American Big Game is available to sportsmen, hunters, collectors, conservation groups and all associated with such activities. It is the first since the 1964 volume, which is now out of print because of the raising of many minimum scores and the establishment of new world records.

Reduced Game Harvest Is Foreseen

Several indicators point to a decline in the harvest of deer and elk in Idaho this year. During the past dozen years the deer and elk harvest has rarely exceeded ten percent above or below the long-term average. This year may well be one of those years, according to indications from big game check stations, field checks and the return of hunter report cards.

Several factors contribute to the big game hunting picture this year. Last year's deer harvest of 83,000 was an all time high. This year after such a peak, is almost certain to be down, particularly since some units have shortened seasons and use of the extra tag has been restricted.

Another factor is reduced hunting pressure. The Fish and Game Commissioner placed a ceiling on the number of 1971 nonresident big game licenses to be sold. Out-of-state hunters are limited to 9,552 combination licenses and 3,821 deer licenses. This is 21 percent less than a year ago. By the end of October deer and elk tags were running considerably less than a year ago. Hunting license sales were also down, all of which means fewer deer and elk hunters in the field.

The storm that battered southern Idaho during the October 16 opening hunt also discouraged some hunters. This area includes some of the most productive deer units and opening week ends traditionally accounts for a large part of the year's total harvest. Stations checked for hunters and success were down that we kind compared to a year ago.

Recent reports show that hunting conditions have improved the past several weeks and the harvest is picking up.

Home Cookin' . .

White Fruit Cake and Refrigerator Bran Muffin recipes, both from the files of Darlene Wolff, and "we hear tell" that she is a mighty good cook. We appreciate your good readers taking the time to send in recipes to keep our column going. Next week, we have some from Mrs. R. W. Fairfield of Juliaetta.

Refrigerator Bran Muffins

1 cup shortening
 2 cups sugar
 4 eggs
 5 tsp. soda
 2 cups boiling water
 1 quart buttermilk
 2 cups 40% Bran
 4 cups All Bran
 5 cups flour
 1 tsp. salt
 Cream shortening and sugar; add eggs and beat egg mixture well. Dissolve soda in boiling water and add buttermilk. Sift flour and salt. Add liquids and dry ingredients alternately to creamed mixture. Mix just enough to blend. (Do not beat). Store covered in refrigerator until wanted. Bake in greased muffin tins at 425d for 12-15 minutes. Raisins, dates, nuts, marmalade may be added at baking time.

White Fruit Cake

1 1/2 cups butter
 2 cups sugar
 6 eggs, beaten
 1 cup grapefruit juice or 1 cup brandy
 1 quart flour
 2 tsp. baking powder
 dash salt; 1 tsp. vanilla
 2 cups nuts
 4 cups white raisins
 1 box (pint) mix candied fruit
 1 box (pint) pitted chopped dates.
 Bake 2 hours, 25d. It makes two loaf pan size and one angel food tube pan.

Here's a hamburger quickie, and delicious oo, and can be mixed together in a hurry. A boon to busy housewives, when so much is crowded in to her busy schedule right now.

Hamburger Chew Mein

1 lb. hamburger
 1 medium onion
 1 can corn of chicken soup
 1 can corn of mushroom soup
 1 cup cooked rice
 1 can chow mein noodles
 Brown hamburger and onion; add soups and rice; put in 2-q. casserole. Spread with noodles. Bake 350d, 45 minutes.

I'm Fine

(Ed's note—this item was found in the effects of Miss Eva L. Smith, long-time correspondent of the Gazette, who passed away last spring. The verse was sent to us by Mrs. Jody Smith, our Park correspondent)

There's nothing whatever the matter with me, I am just as healthy as I can be, I have arthritis in both of my knees, and when I talk, I talk with a wheeze.

My pulse is weak and my blood is thin but, I am awfully well for the shape I'm in. My teeth eventually will have to come out and my diet I hate to think about. I am over weight and I can't get thin but, I am awfully well for the shape I'm in.

Arch supports I have for my feet or I wouldn't be able to walk in the street. Sleep is denied me every night, and, every morning I'm sure a sight. My memory is failing, my head's in a spin, I'm practically living on as-pir-in, but I am awfully well for the shape I am in.

The moral is, as this tale we unfold, that for you and me, who are growing old, its better to say, "I am fine" with a grin than to let them know the shape I'm in.

Maybe U.P. is bringing you something for Christmas!

Have you ever played hide-and-seek with a Union Pacific train?

It's a fascinating game, traveling thru Idaho, watching the sleek snake of freight cars disappear into a hill and then suddenly emerge from a distant valley or roar out of a canyon draw alongside the highway.

It's a game that "kids" of all ages enjoy, a game where everyone wins a magical moment or two to brighten his life. But in addition there is something pleasantly reassuring and steadfast about it all. Trains are important!

It's intriguing, too, just imagining what's in all those boxcars and on those

flatcars. No matter what you guess, you'd probably be right, because Union Pacific brings a big portion of the things you use in your home, office, school, church, or plant. Machinery and merchandise. Foods and fabrics. Televisions and toys. Just about everything that helps make life wonderful comes to you, at least part of the way, by train...the Union Pacific.

That's why you can just about be sure that Union Pacific will be bringing you something for Christmas.

Your 3000 Idaho neighbors who work for Union Pacific hope it helps make your Christmas happy!

Helping to build the economy of Idaho

Eagle Trainer On National TV Show

Did you know that a Golden Eagle plummeting out of the sky in a long, slanting dive towards its prey may reach the speed of 150 miles per hour? These majestic birds weigh 10 to 12 pounds and measure more than six

feet from wing tip to wing tip. It's all over in an instant for the jackrabbit at the end of that power drive when the great talons hit.

Despite the fact that federal law is supposed to protect them for many years golden eagles have been killed at a rate of 2,000 a year in Texas and New Mexico alone. Most of them are shot, the rest poisoned. A witness at a congressional hearing last August testified to the illegal shooting of 800 eagles in Wyoming and Colorado last year.

If an eagle is injured, perhaps wounded by a misguided hunter and can no longer hunt successfully, it will not fall prey to a coyote, wolf or other creature in the wild because even a crippled eagle is fierce enough to defend itself on the ground. Instead, the bird will slowly starve to death.

Contrary to the claims of some ranchers, it is very rare that an eagle will kill a lamb, and even then it will probably be a sickly animal that has fallen behind the flock. An eagle can barely lift six pounds, so stories of eagles carrying off sheep and lambs are pure myth.

The favorite prey of the golden eagle is the rabbit, a grass eater that competes with sheep for forage and hence, a real problem to ranchers. So the eagle actually performs a valuable service for the sheep ranchers.

A girl's greatest asset is a man's imagination.—Earl Wilson

Hatchery Work Varied During Winter

FRY 1 to 2 inches long

Trout of this size are released into some lakes and reservoirs.

FINGERLINGS 2 to 5 inches long

Trout of this size are stocked in lakes and reservoirs. Many are transported by aircraft and dropped into high mountain lakes.

SMOLTS 5 to 8 inches long

Year-old salmon and steelhead are released at this size because they are ready to go to sea. Best returns of adult fish are obtained from these releases.

YEARLING TROUT
Over 8 inches long

Released in heavily-fished streams and lakes to supplement natural production.

IDAHO'S 18 HATCHERIES are busy this winter producing more than a million fish of varying sizes and species for planting in lakes and reservoirs and heavily-fished streams to supplement natural production (see accompanying story).

Fish production at 18 hatcheries of the Idaho Fish and Game Department reached more than a million pounds this year and kept tanker trucks and trailers busy hauling and releasing fish into thousands of stream miles and hundreds of surface acres of lakes and reservoirs, according to Walt Bethke, state fish hatchery supervisor.

The transport units are idle for the most part this winter, but there is no work slowdown at the hatcheries. Cleanup and maintenance jobs can always be found. But the big job is raising fish of all sizes, shapes and species for next year.

Rainbow trout eggs hatch in 24 days at 55 degrees; brook trout in 35 days. Newly hatched fish, called "swimup" fry, are kept in rearing tanks for about a month before being moved to outside raceways for rearing until needed for planting to the streams and lakes of Idaho.

Like people, fish of the same age do not all grow at the same rate. The habit of big fish eating small ones is cut down by frequent grading and sorting by size to prevent such cannibalism.

Hand Sewn Zippers Give A Custom Look To Clothes

Handfinishing a zipper gives a custom finish to your garment. Many persons prefer a hand-sewn zipper, regardless of type of fabric used. A number of fabrics call for a zipper application to be more flexible and less conspicuous than can be accomplished by machine stitching. Among these are napped and pile fabrics such as velvet, corduroy, velveteen, fur fabrics, and some wools, knit fabrics, such as double knit jersey, tricot, and hand knits, hard surface and other sheer fabrics such as taffeta, lace, crepe, organdy, organza and chiffon.

Both lapped and centered applications can be sewn by hand according to Janice Buckner, University of Idaho extension clothing specialist.

Follow application instructions in the package, but substitute a backstitch for outside stitching. To reinforce handstitching, zipper tape may be machine stitched to the seam allowance only. This stitching will not be visible on the outside.

Do handstitching from the right side of the garment. Bring the needle through on the surface from underneath the bottom of the zipper. Take a stitch back about one yard of the fabric then bring needle forward and up through the fabric one-fourth inch ahead. Continue, a stitch back and then a stitch forward. Do not pull the thread when forming stitches. Use a single thread for silk thread or buttonhole twist, and use double thread for mercerized thread. Use beeswax on the thread to strengthen it. Have no fear about the strength of this method. It is most durable. After your first hand sewn zipper, you will probably never machine-stitch a zipper again.

Leo D. Heppner Wins MTD Awards

In a special ceremony attended by supervisors and branch chiefs of the Aberdeen Proving Ground's Material Testing Directorate, Col. Paul A. Troup, MTD director, presented the organization's 3 top annual awards to 2 civilian employees and one member of the military last week.

From a group of 13 top men selected from their respective fields, and MTD committee chose the trio to receive the coveted honors which included the Director's Award, the Crozier Award and the Groak Award.

From among the runners-up for the Director's Award, the panel of judges named Leo D. Heppner, a mathematician in the Technical Support Division. A resident of Havre deGrace, Heppner has 23 years of Federal service.

The Director's Award was established to accord recognition for an outstanding technical achievement, on projects related to the MTD mission, by working professional project engineers and technical staff personnel.

Boy handing report card to parent: "Look this over and see if I can sue for defamation of character."

Cattle Grazing Plays Range Management Role

Seasonal use of livestock as a big game range management tool is of prime importance in producing good quality beef cattle and maximum numbers of elk, antelope, deer and moose on the Sand Creek Wildlife management area in Fremont county.

The Idaho Fish and Game Department says big game range investigations started in 1968, even before all pasture and water developments were completed on the Sand Creek area. Four pastures of approximately 400 acres each were developed and a grazing sequence worked out for a total of about 150 cows, yearlings and calves to forage at certain times of the year.

According to Les Trout, game re-

search biologist, good range management, to get efficient use of forage on big game ranges for the production of wild life, must be based on sound knowledge of range plants, soil, climate, animal nutrition, habitat requirements, and management, associated use of the land, and economic soundness of the practices employed.

He adds: "The use of big game range by domestic livestock has been a point of concern to wildlife managers. The competition for available forage between livestock and big game animal's has often resulted in deteriorated range condition, reduction in the number of animals using the range, or both."

"Limiting the use of any one class of livestock to a given segment of range is not recognizing the multiple use concept of range management," Trout explained. "Range research must consider

these multiple uses where they are implicated and develop management techniques advantageous to all land functions. Proper grazing of domestic livestock on game ranges may be used to the advantage of game managers by rejuvenating decadent stands of wild-life forage. To develop methods to achieve this goal is one aim of the big game range investigation."

This system of rotation grazing on 4 pastures of about equal size providing some browse material for livestock use, has been substituted for the old practice of full-time use on all pastures. Early herbaceous material such as grass and weeds are used in the spring then bitterbrush and other shrubs. This produces thicker, heavier growth for animal forage in the future, thus improving the range. Livestock gains, which are of interest to ranchers, are being determined by actually weighing animals before going on pastures in spring, and when removed in the fall. Livestock weight gains are directly related to quality and quantity of available forage. Efforts are being made to evaluate these two factors. Soil moisture and temperature are continually being monitored throughout the grazing season and the forage species are collected periodically throughout grazing season to determine nutrient value.

Trout says that for many years attempts have been made to improve the Sand Creek range conditions. These past efforts have met with varying degrees of success. Reductions in domestic livestock and wildlife numbers have had perhaps the most far reaching, and

in many instances controversial effects. Considerable amounts of time and money have been spent over the past several years planting various shrub and herbaceous species in an effort to increase game range carrying capacities. The extent of these plantings, their success or failure, has not been fully documented. A need exists for an inventory of these habitat improvement projects together with an evaluation of their success if further attempts at range improvement are to be justified. This is the aim of the habitat improvement evaluation cooperative study between the Fish and Game Department of the U. S. Forest Service Intermountain Forest and Range Experiment Station, Boise.

Success of the "rotation" grazing system at Sand Creek Wildlife Management Area and elsewhere across southern Idaho has much to offer everybody. It satisfies the needs of the Idaho Fish and Game Department by increasing the carrying capacity of the range by producing more forage and allowing the maximum number of elk, moose, antelope and deer on this key winter range. It is acceptable to livestock raisers because the "rotation system" allows some browsing in one pasture or another under a grazing sequence plan. Cattle make maximum weight gains under the system.

OUR COMPETITION RECOMMENDS BRONATE®

Our competitors think so highly of Bronate as a broad-leaf weed killer in wheat and other grain crops that they want you to tank mix their products with Bronate.

While we appreciate the compliment, we don't necessarily go along with the recommendation.

Because while the addition of less effective herbicides to Bronate may help the other herbicides, it doesn't help Bronate. Matter of fact, it can hurt Bronate.

Unlike many other herbi-

cides, Bronate kills your weeds without damaging your wheat. And tank-mixing reduces Bronate's high degree of selectivity.

Also, unlike other herbicides, Bronate isn't restricted to any particular soil type or condition. And tank-mixing limits Bronate's wide range of application.

Use Bronate alone if your weed problems include Tarweed, Gromwell, Henbit, Dogfennell, Crowfoot, Purple Mustard, and the rest of the Mustard family. Or any of the

23 other kinds of weeds listed on the Bronate label.

Our experience has shown that Bronate, used alone has increased productivity for Northwest wheat farmers by as much as 20 bushels per acre.

Is it any wonder our competitors recommend Bronate?

For more information on how Bronate can help you, see your supplier or write Mr. R. P. Rich, Rhodia/Chipman Division, 120 Jersey Avenue, New Brunswick, N.J. 08903.

BRONATE® DOESN'T NEED ANY HELP.

**Local News
Of Kendrick**

Mr. and Mrs. Dean Brocke were in Coeur d'Alene Wednesday where Dean attended a fertilizer convention. They spent Thursday and Friday in Spokane. Deana and Burton were guests of grandparents, Mr. and Mrs. George Brocke and Mr. and Mrs. Roy Fey while their parents were away.

Mr. and Mrs. Robert Pratt were Sunday guests of his sister and husband, Mr. and Mrs. William Dodel of Lewiston.

Mr. and Mrs. Manning Onstott attended a Christmas party in Moscow Saturday evening at the home of Mr. and Mrs. Carrol Tyler.

Mr. and Mrs. Ed Brown were guests of their son-in-law and daughter, Mr. and Mrs. Don Jensen of Moscow Saturday. While there they also visited with Mrs. Fred Stedman who is a patient at Grifman Hospital.

Mr. and Mrs. Eldon Fey and son Jon were guests of his parents, Mr. and Mrs. Roy Fey. They returned to their home in Spokane Monday.

Sunday dinner guests of Mr. and Mrs. Dick Cuddy were Mr. and Mrs. Eugene Taylor and Mrs. Effie Stump.

Mr. and Mrs. Harold Wilson and family of Spokane were weekend visitors in the Robert Clemenhagen home. Mrs. Clemenhagen's granddaughter, Sherry Gunning of Halfmoon Bay, California, is also a guest in the Clemenhagen home.

Several women enjoyed a quilting bee at the home of Mrs. Robert Clemenhagen Tuesday afternoon.

Mrs. Emma Brocke entertained members of the Twin City Pals for their Christmas dinner and gift exchange on Tuesday.

W. D. Miller of Lewiston was a Saturday caller of his in-laws, Mr. and Mrs. Manning Onstott. Dee, the son of Mrs. Eula Miller, was recently elected president of the Greater Lewiston Chamber of Commerce.

**Genesee Drops 47-29
Decision To Lapwai**

Genesee's Bulldog basketball team had a 27-game winning streak snapped last Tuesday evening, December 7, as they were drubbed 47-29 on the Lapwai court by the taller, stronger Wildcats. The Bulldogs, undefeated state A-3 champions last year hadn't been beaten by a score like that in many years.

It looked like it would be a close game in the first period as the teams traded leads and Genesee, who could not get inside the Wildcat zone, kept up the pressure with long shots. LHS was ahead 12-11 at the end of the first quarter and then the Bulldogs took the lead 13-12 in the early part of the second quarter. But that was all there was for Genesee as the Wildcats poured on the steam and held Genesee to just 18 points the entire remaining game. Lapwai had it 31-18 at the half.

Bill Schlueter, Genesee's premier guard, was high point man for the Bulldogs with 8 points. Craig Busch put in seven for Genesee and Craig Kanikkeberg added 6 more. Big Jim Hermann was held to four points.

Genesee's game with Troy, scheduled for Friday evening was snowed out.

**Kamiah Nips Tigers
In Overtime Contest**

Kamiah's Kubs came up to Kendrick last Tuesday night and took a 48-44 overtime victory from the KHS Tigers on the strength of a pair of good free throws to edge the home team in a good, well-played contest.

Kim Trout had all four of Kendrick's overtime points as the regular game ended in a 40-40 tie.

Kim also paced the well-balanced Kendrick attack with 11 points total for the night. Frank Groseclose and Dave Hutcheson each got 9 points for the evening.

Kamiah took the B game 39-22.

Prairie Tops Tigers
The Prairie Pirates came up to Kendrick Saturday night and went home with a 68-56 victory over the winless Tigers despite a mighty 22 point effort by KHS's Kim Trout.

The Pirates went ahead early in the game and were leading 19-16 at the end of the first quarter and 35-30 at halftime.

In addition to Trout 22 point, Dave Hutcheson scored 12 and Dave Wilken 11.

Prairie made it a clean sweep by taking the JV game 86-46.

**Kendrick Frosh Top
Deary Frosh-Sophs 40-35**

The Kendrick Freshman basketball team got their season off on a winning note Monday night by defeating the Deary Frosh-Soph team by a score of 40-35.

Three of the freshmen are playing Junior Varsity ball and so were unable to participate in the win.

The team showed well-balanced scoring and a strong defensive effort. The game was tied at 35-all with two minutes remaining after Kendrick had led all the way.

From that point on Kendrick held Deary scoreless while Danny Steigers dropped in a field goal, Johnny Hedler hit a free throw and Mike Sillflow iced the game with a pair of free throws.

The next game is at Kendrick against a very good Prairie team. Game time is 8:00 p. m. There is no admission charge.

CARD OF THANKS

With sincere thanks and appreciation to my relatives and friends for cards, gifts, phone calls, visits received while in the hospital and now while at home, thanks so much.—Roy Craig. 50¢

CARD OF THANKS

My sincere thanks to all friends and neighbors for their telephone inquiries, cards and visits during my stay in the hospital and since returning home. I appreciated each kindness so much.—Gerald Schmidt. 49¢

**Trees Available For Farm
Windbreaks, Etc.**

The forest nursery at the University of Idaho has 30 kinds of seedling trees for windbreaks and other farm purposes.

Orders may be placed now, advises Vernon Burlison, extension forester. Lists of species and prices are available at the county agent's office. The little trees will be delivered next spring.

Available varieties include such evergreens as Scotch pine, Douglas fir, ponderosa pine, blue spruce, Norway spruce and grand fir. Popular broadleaf trees are Siberian elm, Russian olive, green ash, Siberian elm, golden willow and hybrid poplar.

Regulations restrict use of the trees to forest, windbreak and Christmas tree plantings. They must be planted outside corporate municipal limits and cannot be used for ornamental purposes.
