Juliaetta News

# Mrs. Millie Mabbott

Vacation Bible School Scheduled Vacation Bible School is scheduled at the Juliaetta Church of the Nazarene July 24 through 28 with sessions running from 9 to 12 each morning. Another interesting time of Bible study, singing and crafts is planned. Children from 4 through 14 will be included in the graded classes. All children from the Juliaetta-Kendrick and surrounding area are welcome. Any mothers who can help out by transporting children from Kend-rick to Juliaetta each day will be much appreciated.

Mrs. Donaldson Injurs Hip

Mrs. Ella Donaldson a former Juliaetta resident fell and injured her hip the Fourth of July. Her daughter, Mrs. James Bower, now of Deary, was notified that morning that she was taken to Tri-State Memorial Hospital in Clarkston and after surgery the 6th of July is recovering as well as can be expected. Mr. and Mrs. James Bower of Deary and Mr. and Mrs. Rufus Fairfield have spent several days at her bedside the past week.

Mrs. Marjorie Whittum returned Thursday night from several days visit with relatives in Anaconda, Montana.

Mr. and Mrs. Larry Foreman and Pam spent a week visiting relatives in Sacramento, Calif. They returned Sunday leaving Pam there for an extended visit. Carolyn returned with them. While in Sacramento, the Fore-man's attended the wedding of Mrs. Foreman's brother, Charles E. Moore. Randy Horney of Sacramento is visiting this week in the Larry Foreman home. He arrived Monday.

Mr. and Mrs. Doug Pederson and three daughters of Zillah, Wn., arrived Saturday to spend a few days in the home of his mother, Mrs. Gert-

Mr. and Mrs. Onal Cope spent last week vacationing on the Lochsa. Mr. and Mrs. Eugene Taylor and Mr. and Mrs. James Morley camped

and fished on the South Fork for a week and visited with friends. On the way home they stopped at Grangeville and spent the weekend with Morley's son-in-law and their daughter, Mr. and Mrs. Danny Baldwin. Holiday visitors in the J. M. Murray home were Mrs. Hugh Fuller, Seattle, Mr. and Mrs. Clark Fuller and family, Orofino and Mr. and Mrs. Vernon Granlund and family, Troy,

The town of Genesee and apparently only the immediate surrounding area was battered by a brief, but severe hall storm late Thursday afternoon. For a period of about a half hour the town was subject to hall and rain with hall stones ranging from small to almost an inch in diameter

The hall came with a violent rain, thunder and wind storm that swept across the area shortly after five Thursday afternoon.

While the hall battered gardens in town it seemed to be localized in the immediate area in Genesce. Don Springer of Springer Insurance Agency said he received fifteen claims for damages, all very close to the city. Springer said conversation with some of the farmers indicated that damage from the hall would not

be too great. Kendrick and Juliaetta escaped the hall, but were subjected to heavy rains for a short period of time.

**Fever Blisters** 

Fever blisters, cold sores and canker sores are familiar names to most people. To medical science they are a disease called herpes sim-plex, and few disease are as baffling to physicians. It is estimated that nearly half the 111 My 24

11

population suffers herpes simplex at one time or another, according to the Idaho medical association, yet much remains to be learned about its cause, treatment or prevention. It is a highly contagious viral in-fection which produces yellow blis-ters that are often quite painful. They may occur singly or in large numbers, and they frequently occur when the patient has a cold or fever hence the reference to "fever blister" or "cold sore."

Fortunately, herpes simplex is self-limiting. Regardless of treat-ment, the blisters and general illness subside in 7 to 14 days. But un-fortunately, the disease can recur, perhaps in a few weeks or in several vears.

The principal treatment includes pain reducing agents, avoidance of smoking and other chemical and ther mal irritants the elimination of highly seasoned foods, and ample rest to build up resistance.

Bear Attacks Provoked When black bear are fed in close proximity to human activity and come in daily contact with "bear wat-chers", they lose their fear of man and become bolder in their search for food. He either smells food there or associates the smell of man with food. A bear which wanders into a tent is looking for food. Any human injury which might result from this contact, occurs when the bear either is frightened or cornered.

It cannot be overemphasized that black bears—especially those which habitually frequent camping areas in search of food—lose their natural fear of people and are dangerous and should be treated with respect and evolded if people. avoided if possible. Campers in bear country should

avoid cooking in tents whenever possible; storing food in tents; taking midnight snacks into sleeping bags: and sleeping in tents should be avoid-ed "Nuisance bears" are live-trapped by department personnel whenev-er possible and moved from camping to wilderness areas.

YOUR GAME DEPARTMENT By Jim Humbird Idaho Fish and Game Dept. Egg Production Increased Egg production from Japanese green

pheasants has been increased significantly since the relocation of the brood station from the Jerome game farm to Post Falls near Coeur d'Alene Difference in climate, chiefly humidity, between northern and southern Idaho, probably is the greatest reason for the increased egg production Most of the green pheasant hens are located at Post Falls and the eggs are shipped to Jerome for incubation and rearing to about seven weeks of age. The chicks are returned to northern Idaho where they are re-

leased.

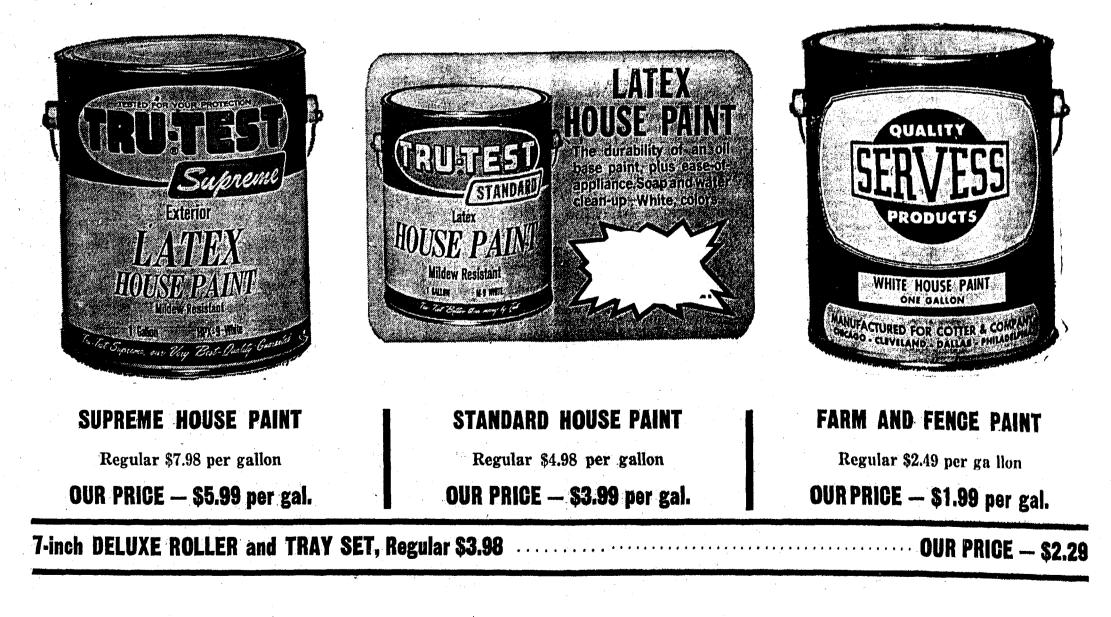

# **PEOPLE PROTECTORS**

Did you ever think of ads as guardians of your individuality? They are, you know.

In a time when the edges are being eaten off our personalities and we're all being reduced to card-index numbers, we need to hang on to some things.

Like our freedom of choice. And that choice is yours only so long as competition and free enterprise and advertising are working for you. Guard them. For they stand between you and a dull and standardized life.

> Some of the best trout in the world is found in Idaho, and with proper

field care these fish have no superior anywhere for flavor. The main thing in field care of fish

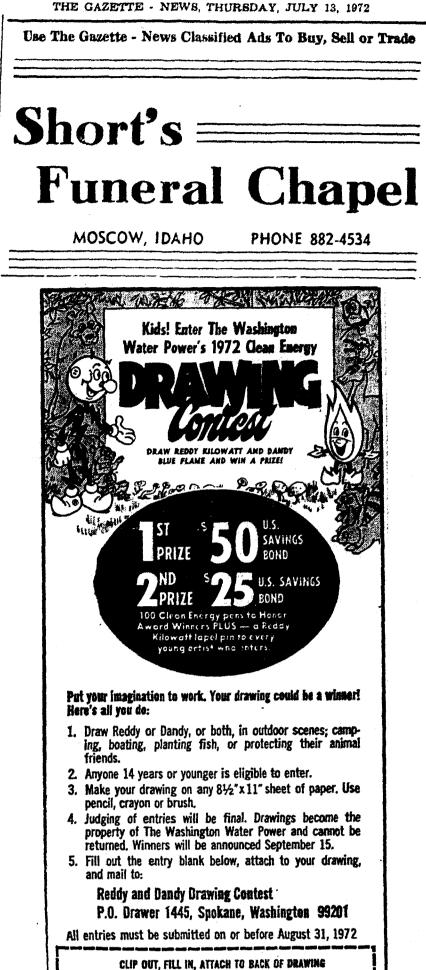

10.00 is to keep them cool and dry. Bac-641.19 teris, the principal agent of meat and fish spoilage, requires moisture and warmth. Thus fish should be killed as soon as it is caught and cleaned at once. Remove entrails and gills, and scrape out kidney tissue along the backbone. Fish need wash-ing only just prior to cooking. A leaflet available to the public from the Idaho Fish and Game De-

partment stresses that the big thing in properly caring for fish or game meats in the field-under any conditions-keep it clean; keep it dry; and keep it cool.

After cleaning, wipe the body cavity dry with a cloth or paper towel. Do not place in water or in green leaves or grass (as these heat up). If wearing a creel, line it with dry grass and place in a way that they won't touch each other. If fish must be kept several days

without refrigeration, hang out at night so that fish will cool, dry and "glaze." Wrap in newspapers dur-ing the daytime hours, and then in blankets or down sleeping bag to in-sulate against heat and keep out flies.

Some anglers dry fish overnight, then place in plastic bags and seal the ends with rubber bands. These are wrapped in wet burlap bags. Plastic bags keep fish dry and evap-

day afternoon with Mr. and Mrs. Wallace Clark in Lewiston.

WILDLIFE VIEWPOINT Dee Hibbert

Idaho Fish and Game Dept LITTERING On several trips to the mountain ar-

eas this spring and on a recent trip with my family to the mountain lakes during the Fourth of July holiday, I was constantly amazed at the un-thinking and inconsiderate animal United States and the states animal thinking and inconsiderate animal states are the states the states are states animal states and the states are states are states are states and the states are called the "litterbug." I am convinced there are three species of the animal: 1. The deliberate "litterbug" sackfuls or truckloads. 2. The ca- of Idaho. sual "litterbug" who throws a trashat the Fairground Park in Moscow, bag out of a car or tosses it near a Idaho. Descendents of the late Autrash can or just plain isn't careful

members of the family. Prizes were may not even be aware that he is lit-given to Mrs. Marion Campbell of tering. This is the one who flips a 622 Main Street Hudson Falls New York who traveled gum or candy wrapper out of a car Post Office Box 573 window, or tosses his empty bever- Lewiston, Idaho 83501 age bottle can or bottle down when he 743-4471 finishes drinking, never thinking that pub date: July 13-20-27, 1972 he is the worst "litterbug" of all.

Who are these "litterbugs?" I'm

bread wrappers or an aluminum picer or other farm machinery causing hearing and smell make up for any damage and loss to the farmer. Many sight deficiency, tines have been ruined by broken bot-

tles discarded years before. There are many ways we can fight the litter problem, but one fact we must face we that we, the people must pay for it. There are several ways we may pay-by letting some-one else clean up our litter and pay

by taxation by paying the cost ourselves and cleaning up or by a loss to our environment by the continuous littering.

I believe one solution is to pay for the taking care of our litter when we buy the product. An example here would be used car bodies. Very few people want them or can take care of iston were Saturday supper guests them for recycling back into useful of Mr. and Mrs. Adolph Dennler. Mr. metal. Therefore, they are abandoned and accumulate in unsightly junk yards It is difficult to make the last owner pay a fee to have them and Mrs. Ernest Dennier Mr. the last owner pay a ree to have there back visited with Mr. and Mrs. Leslie to the factory. But if an additional Heimgartner and Mrs. Lena Zumnew to be set aside to pay the cost of disposing the body when junked, the problem would be much better

Whatever methods are used we must all become "anti-litterbugs" if we want Idaho to remain worth livhandled ing in.

# What does it cost

to build a new school

# or fix the streets

# in your town?

The public has a right to know what it costs to build or improve a street or building in your town. Your local newspaper is the publication where you find that information.

For centuries, people have recognized the right of the community and of the individual to be put on notice.

Many citizens don't understand what a legal notice is, or why they're printed in your local newspaper. Many people don't read them until it's too late.

Legal notices keep a citizen informed on all school, city and county action by official bodies. Legal notices also give a citizen an opportunity to do something about some proposed action that may affect his rights.

Your local newspaper is a long established medium for such notices as provided by law or by official designation. And, it's one of the many public services provided by this newspaper.

NEWSPAPERS DELIVER THE LOCAL STORY.

taken care of. The solution: A new boon to the salmon fishermen. These excess salmon are being transplanted back into the streams to again run the gauntlet of anglers, giving them another chance to catch these fine game fish. During the past eight years, the Rapid River hatchery has been trapping the salmon that ascend the Vite

ping the salmon that ascend the Lit-tle Salmon River, south of Riggins, and then into Rapid River, all the Jack Salmon have been transported Jack Salmon have been transported upstream on the Little Salmon River and released to be caught by sport fishermen. But this is the first time that adult chinook salmon have been fisher adult chinook salmon have been for that adult chinook salmon have been for that adult chinook salmon have been that adult chinook salmon have been that adult chinook salmon have been for the tage of the tage of the tage of the tage of the tage for the tage of the tage for the tage of tag This large run of lish lettin to holding ponds. the Snake River system of Idaho Parrish said he would increase the that adult chinook salmon have been rest time fenses cann seems to be up in all areas. How- Parrish said he would increase the of sufficient numbers to haul these Among large fish back into the stream to give anglers another crack at them. rates are plmost for are black-TB Salmon that are being hauled down the mouth of the Little Salmon River and released have the adjust for example nonwhites are black-TB in Nassau county in New York for In Nassau county in New York for example nonwhites represent only 4 percent of the population. But they percent of the population. But they have 30 percent of the TB. And old people, both white and nonwhite have higher rates than young people. The rates for white males who are 65 and over are eight times higher than for younger men in their late teens and early twenties. But rates for non whites who are 65 and over are still four times higher than for whites in the same age group. same time as the extention of the bag and possession and season limis on salmon fishing by the Idaho Fish and Game Department. Effective July 1,1972 the daily bag limit on chinook salmon has been raised to 2 fish and a possession and 7-day limit of 4 fish This has been doubled from the 1 daily fish and a possess-ion which was in effect this year. The ion, which was in effect this year. The yearly limit of 5 fish remains in ef-fect in all areas of the state EXCEPT in the Little Salmon River, where the yearly bag limit shall be ten salmon.

salmon that can be taken is to allow the sportsmen to take advantage of the large run of salmon this year. The Rapid River Hatchery was first

set up and paid up eight years ago by the Idaho Power Company as part of the attempt to save and transfer the salmon runs that ascended the Snake River above Hells Canyon. When the Brownley-Oxbow and Hells Canyon Dam complex went in, the salmon were trapped below the dams and the eggs taken to the Rapid Riv-er Hatchery. The smolts were re-leased there and the salmon then returned up the Salmon River and Rapid River instead of going on up the Snake River.

Snake River. Each year the goal has been to re-lease 3,000,000 young salmon into Rapid River. The remaining fish and eggs are used in other areas around the state, such as the Clear-water River System, Hayden Creek and the Pakimaron River This and the Pahsimeroi River. This year's large run to Rapid River seems to be the result of this artificial propagation of salmon from the Hatch-

# WHEN IT GETS REAL HOT OUTSIDE ir cond & BE REAL GOL INSID

That's our daddy, all happy and smiling. Before we got air conditioning in our house he wasn't as much fun. Now he likes to come home where

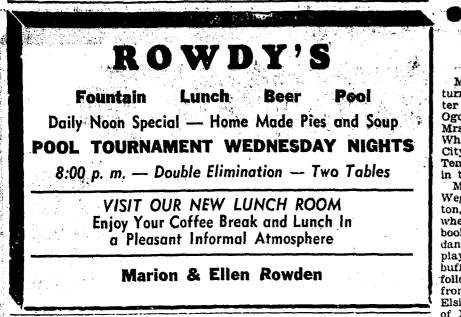

it's cool every day and what he calls humidity is just right. Mom feels better, too, without all that dust and sneezy stuff.

We're glad our dad made our home nice for summer. Yours can, too, by calling an air conditioning
