DO NOT FOLD, SPINDLE OR MUTILATE. PEOPLE PROTECTORS. Did you ever think of ads as guardians of your individuality? They are, you know. In a time when the edges are being eaten off our personalities and we're all being reduced to card-index numbers, we need to hang on to some things. Like our freedom of choice. And that choice is yours only so long as competition and free enterprise and advertising are working for you. Guard them. For they stand between you and a dull and standardized life.

Highway Roundup For 1976; Plans For Next Year

Lewiston — In 1976 the Idaho Division of Highway District Four, comprising the four central Idaho counties, had an excellent construction year. Some of the more notable accomplishments were the contracts on the new Lewiston Hill route which completed the heavy grading on the majority of the hill. Contracts for the U. S. 12 — U. S. 95 Interchange at the bottom of the hill and the surfacing of the entire route are now underway.

The new Lewiston Interchange will be contour graded, have sprinkler irrigation, grass, shrubs and trees designed to be compatible with the present developed areas along the highway and to transition into the rural

vegetation of the Lewiston Hill. The City of Lewiston will maintain this new planted area.

In other areas throughout the District, the new section of U. S. 95 in the vicinity of Cottonwood is a welcome addition.

Fall weather was such that the last remaining section of gravel road between Bovill and Elk River on State Highway 8 was paved.

Another construction project widened and improved curves on a section of the Greer Grade on State Highway 11.

A contract has been awarded for paving 26 miles of U. S. 12 east and west of Lowell. Another contract involves paving 14.7 miles of U. S. 95 from Moscow to Potlatch Junction and constructing truck climbing lanes. Also, a contract has been awarded for reconstructing 4.6 miles of State Highway 7 from its junction with U. S. 95 easterly. These contracts will be underway next summer when the weather permits.

In addition to contract work, the District has been active in safety improvement and seal coating. Close to \$100,000 worth of safety improvement and betterment type work was completed in 1976.

At the present time, District Four is working closely with Nez Perce and Latah Counties on projects in their areas. A widening and safety improvement project is planned on Webb Road south of Lewiston. In Latah County the Department is administering a bridge replacement contract on three structures in the vicinity of Genesee, which are under the jurisdiction of the South Latah Highway District.

Over the past year the District worked with the North Latah Highway District, South Latah Highway District, the cities of Orofino and Grangeville, on Safety Improvement projects involving replacement and upgrading of signing on their respective roads and streets.

The District has also been working closely with the cities of Moscow and Lewiston with regard to formulating plans for major construction projects within their city limits.

A new maintenance building and yard was constructed this past summer at Twilligar Bar between Riggins and White Bird and should improve maintenance efficiency along U. S. 95.

Agreements are nearly complete for removal of the last two junkyards in District Four which are in conflict with the Highway Beautification Act. These are planned for removal in 1977.

Revegetation of roadway slopes by placing topsoil, mini-benches, and extensive seeding has been used on recent projects to prevent erosion and

First Security Bank Completes New Service Center

The 50,540 square foot Service Center of First Security Bank of Idaho, N. A. is now fully occupied and operational according to the Ralph J. Comstock, Jr., President. Consolidated services provided by the Center will serve the bank's branches throughout the state, thereby enhancing the efficiency of services to all Idaho customers according to Mr. Comstock.

Many operational activities for the bank will now be concentrated under one roof, including statewide BankAmericard operations, computer operations, central dictation, credit insurance and servicing for Time way loans, real estate loans and student loans.

For the Boise area the new service center will house proof and book-keeping departments, mail receiving and distribution, armored car service, warehousing, supply and record

beautify the roadside.

Of special note, according to District Engineer Marvin Lotspeich, was the number of informational meetings, design and location hearings conducted this past year to solicit input from Idaho citizens on the State highway program. These meetings have provided the Department with the important and necessary facts that are particular to any given area where an improvement may eventually be constructed. The information gained from the meetings is incorporated into final design to better meet the needs of the citizens in that locality.

Fish and Game Dept. Re-Writes Code Book

The revised Fish and Game laws become effective January 1, and the thinner code book is expected to clarify many gray areas found in the old code.

Dale Baird, chief of the department's Bureau of Enforcement said there are no big changes in the basic laws, but many of the cumbersome "therefores" and "whereases" have been deleted.

"We think we have a code book now that's easier to understand and makes finding a law less of a hassle," Baird said.

The code has been condensed from

storage.

The building is located on 3.53 acres at Elder and Shoshone Streets adjacent to Highway I-80N near the Boise Municipal Airport. It is constructed with reinforced steel columns and roof framing. Exterior walls are tilt-up precast concrete with exposed aggregate. Parking has been provided for employees and visitors.

The general contract for the building was in excess of \$1.3 million. McDermott Associates, Inc., was the architect, and Galey Construction of Boise was the general contractor.

An additional \$ 1/2 million was spent for furniture, fixtures, and landscaping. The interior of the building utilizes landscape partitioning, a system that provides complete flexibility in altering square footage of departments as needed. In addition to work areas for the various departments, the building contains several common areas, including employee cafeteria operated by the Canteen Corporation, employee lounges and meeting rooms. It is surrounded by 32,000 square feet of planting area, which has been professionally landscaped and will be irrigated by an automatic sprinkling system.

More than 140 people will occupy the building 24 hours a day, 365 days a year. The center is protected by an around-the-clock security system.

Manager of the center is Czeruy R. N. Shepherd, vice president.

Mr. Comstock has announced that the bank will hold an open house for bank employees and their families shortly.

Nothing Will Remove Wrinkles Say Doctors

It is as true today as it was in Cleopatra's — there is nothing that can be applied to the skin that will remove wrinkles.

There are two major causes of wrinkles in the skin.

The first is loss of fat or muscle tissue beneath the skin, resulting when one loses a good deal of weight. The second reason for wrinkles is the weakening of elastic tissue which helps attach the skin to the body. A certain amount of this weakening is inevitable with advancing years, notes the Idaho Medical Association.

Cosmetics can cover wrinkles, but no creams will remove them.

If reducing is planned, ask a physician to set up a diet so that you will lose weight gradually. This will allow tissues to readjust, at least to a certain degree.

If you exercise, along with dieting, some muscle tissue may develop to counteract the loss of fat.

I set out to find a friend, but couldn't find one; I set out to be a friend, and friends were everywhere.

57 chapters to 21, he said, and related laws have been grouped together within a chapter or included in nearby chapters. Repetitions have been deleted.

Added to the new code book is a chapter on definitions, and Baird said this chapter probably clarifies many of the gray areas of the old code book.

One such gray area was the definition of the "possession limit." The new code says the possession limit concept covers fish or game being transported from where it was hooked or shot to the hunter's or fisherman's residence, Baird said.

To make clearer the old law against party hunting, the new code book spells out that a bag or possession limit cannot be interpreted as allowing a person to take more than his own limit, Baird stated.

"If one hunter or fisherman shoots or catches his limit, then tries to help someone else fill his limit, he can be cited," Baird said.

There is nothing in the new code that prevents Idahoans from carrying arms, but the code says an "uncased firearm" can't be carried in the field without a hunting license, Baird said. He said a holstered pistol is a cased firearm.

With Passbook Savings
at First Security Bank

At First Security our compounded continuous interest program on passbook savings works for you all the time — not just daily — but continuously.

By compounding your interest continuously, the rate of 5% per annum yields 5.13% per annum, when both principal and interest are left for a full year. Accounts are insured to \$40,000, of course.

You can add to or withdraw from your account at will. Your money earns from Day One. And, all the time it's on deposit, it has earned interest from continuous compounding. You can also make deposits by mail and transfer arrangements between checking and savings accounts are available.

Come in now and start your money working for you everyday

The Kendrick School
 'Principal's Corner'—

By Bill Tracy
Student Handbook
 One of the responsibilities delegat-
 ed to me by the Superintendent and
 Board of Directors was to draft a
 Student Handbook for the Jr.-Sr.
 High School this year. The most
 time consuming part of this task
 was becoming acquainted with the
 past student guidelines, very little
 of which, had been reduced to writ-
 ing. Once in mind, these student
 policies were then expanded to in-
 clude all aspects of school life and
 revised as necessary to fit the unique
 needs of our school system.

The first draft of the handbook
 has been completed and I feel very
 fortunate to have been able to for-
 mulate policy, which before, had been
 rather vague in several areas. Bill
 LaMunyan and Marilyn Bejers
 provided me with input and valuable
 assistance in developing the first
 draft of the handbook. I wish to
 thank them for their help.

I have submitted copies of the
 handbook to the Associated Student
 Body Officers, a committee of teach-
 ers and the Superintendent for sug-
 gestions, additions and corrections so
 that the first draft may be revised
 before being reviewed by the School
 Board for adoption. Hopefully, this
 process will yield a handbook of
 student policies, services, and rights
 and responsibilities which will be in-
 formative and beneficial for every-
 one.

Intramural Program
 Dick Ruark has initiated an intra-
 mural program at noon for our high
 school students. The kids have really
 become involved in the activity and
 the competition appears to be pretty
 stiff. Right now students are partici-
 pating in a doubles and mixed dou-
 bles badminton tournament. This
 kind of organized recreation at noon
 is a great way to release energy for
 those involved and is also entertain-
 ing for those who just want to watch.

Due to the intramural program
 there has been a direct decrease in
 the amount of noise and horseplay
 in the halls. I would like to com-
 mend Mr. Ruark for his extra time
 and work in organizing this noon-
 time activity for the students.

Plan Development
 The Elementary Staff and I have
 been busy trying to develop upon a
 plan that will resolve the student
 needs established by the Elementary
 Needs Assessment Study last year.
 Our deadline for preparing a plan and
 its evaluation for submission to the
 Board of Directors and State Board
 of Education is April 15. Thus far,
 we have developed a list of possible
 solutions for resolving the following

Identified needs:

1. More emphasis on Basic Math Skills.
2. More emphasis on Communica-
 tion Skills
3. More emphasis on Basic Read-
 ing Skills

We have also selected a chart of
 product outcomes in each of these
 areas, that is, what a student should
 know or be able to do upon comple-
 tion of the 6th grade. This informa-
 tion will help us formulate an objec-
 tive to meet each need.

Much work lies ahead, but hope-
 fully when it's all over, we will be
 able to improve the education of our
 elementary school children in a way
 consistent with the desires of the
 community.

The next regular Kendrick Jr.
 School Dist. Board Meeting will be
 held at the High school January 13
 at 7:30 p. m.

FOR SAFE DRIVING
 Safe, Dependable Winter Driving Requires
 Extra Care and Maintenance

A leaky or faulty muffler or exhaust system can be
 deadly on a car or truck in the wintertime when the
 windows are closed tightly most of the time.

Worn or poor snow tires can cause dangerous
 driving conditions when winter snow and ice are on
 the roads.

Brakes that grab or are out of adjustment
 could cause you to lose control of your vehicle
 when streets are icy.

Worn out points or spark plugs can make your car
 hard to start, especially on these cold mornings.
 And, an old, weak battery just can't give you the
 power you need in cold weather.

Good Anti-Freeze in the proper amount can mean
 the difference between complete protection and
 or a costly repair bill.

See Us for Dependable, Reliable Service
