neth and family and assisting in the care of her new granddaughter.

Notes from the Meal Site

Oct. 15 our group surprised Ruth White, coordinator of the Meal-Site with a corsage and cake in observance of her birthday, Oct. 10.

Tuesday, Oct. 21, twenty-one seniors took the bus to Grangeville where we were guests of the Senior Citizens Dollar of the Month club We were served a delicious potluck dinner and entertained with beautiful music.

We presented the group with a bell which from experience, we are sure they will find very useful.

Wednesday, Oct 22nd, Steve Young music director for District 283, brought his concert choir to entertain us. We were happy to see it is now about 50-50 girls and boys. As always we enjoyed the beautiful music. Thank you, Steve, and singers, we

Friday, Oct. 24, was our Harvest Dinner. The tables were decorated with flowers and harvest vegetables. Following dinner we took the opportunity to honor Lillian Pitkin of Trov. who is retiring from her position of Out Reach Area Agency for the ageing of Latah County. She has held this position for six years and has been a tireless worker. She was presented with a lovely corsage made by Louise Pea (our cook) and a money-tree from the group. We wish Lillian much happiness in her new home in Clarkston.

The Don Springers Return From European Trip

Don E. and Kathryn Springer, of Springer Insurance Agency of this city, recently returned from the European Holiday' convention in the city of Dubrovnik, Yugoslavia. They were part of a group of over 1,200 insurance agents and their wives who attended the convention as guests of United Pacific and Reliance

Insurance Companies.

Don E. Springer qualified for the trip with superior insurance sales over a period of 18 months. Top producers who qualified for this convention throughout most of 1979-80, left for Dubrovnik October 3rd. United Pacific does business on

national basis with United Pacific Life Insurance Company recently expanding its operations to include most eastern states in addition to those in the West. It is a subsidiary of Reliance Insurance Company of Philadelphia with its corporate headquarters located in Federal Way, Wa

United Pacific serves the West with branch offices in Boise, Eugene, Fresno, Helena, Los Angeles, Phoe-nix, Portland, Salt Lake City, San Bernardino, San Diego, San Francis-co, San Jose, Santa Ana, Stana Bar-bara, Seattle, Spokane, Tacoma and

Note from Don: After the Dubroynik trip sponsored by the insurance company was over, Kathryn and I flew to Zagreb, Yugoslavia and then on to Zurich, Switzerland where we spent three days waiting for a bus tour to start. On Monday, Oct. 13 we joined the bus tour and toured through Switzerland, Austria and Germany coming back to Zurich and flying home on Oct. 19th.

Hill and Valley Garden Club Plans Future Projects

Fourteen members and two guests met at the Garden Club center on Wednesday, Oct. 22 at 1:30 p. m. Hostesses Mariam Cook and Ardythe Heimgartner served doughnuts, nut bread, cheese and appleslices and Hot apple cider and coffee.

After refreshments President Ann Nilsson opened the meeting. Roll call was answered by "What did you enjoy most from your garden or yard this

new variety of plants purchased at the Plant Sale last spring.

The boxes that the Garden Club planted for the Senior Citizen Center were taken care of beautifully and have been a joy to the community this summer. The Mini Park suffered from the loss of Marvin Long who so faithfully tended it for many

The Garden Club is going to plant a tree as a memorial for both Marvin Long and Adele Lublow. The one honoring Mrs. Lublow will be put in Juliaetta.

With the help of the FFA Club of Kendrick High School the Garden successful fashion, as they dropped Club plans to do some improvements to the LeBaron Park at Cavendish and the City Park in Kendrick during the winter and spring. Some of the things to be done are tables, signs, garbage can stands, etc.

Patti Silflow reported the Sunflower show at the Juliaetta school would be Friday, Oct. 24. This program in which the lower grades participate has created a lot of interest by many youngsters and should give them an incentive to enter in future shows on Locust Blossom day. The committee members for this project reports it is a delight to work on this project.

Next meeting date has been advanced to Wednesday, Nov. 19, It will be a work day starting at 10:30 a.m. Bring a sack hinch, scissors, pliers, glue guns, etc., as we will be making bows and dried arrangements for the Christmas sale in December, 1981 calendars will be for sale that day. Edith Wells, reporter.

Seven New Brownies Join Kendrick Group

Seven new girls joined the Brow nies at the first meeting for a total of 16 girls. We are meeting at the The Country Squires were hired for Fire Hall in Kendrick again this year on the 2nd and 4th Tuesday of he month.

On November 14 the 2nd and 3rd year Brownies acted out the Brownie of paper brought home by the stu-Story. Brownies and presented them with their pin. The new Brownies are Jennifer Abrams, Lynn Heimgartner, Mindy Cook, Marnie Henson, Heidi Nobel and Rachael Sunderland.

At this meeting they also planned a Hallowe'en Party for the 28th at Lynn Heimgartner's house. We decided to have cake, ice cream, punch. and to go to the pumpkin patch and pick our own pumpkin and carve it.

The Brownies also made a Hallowe'en decoration and played Hallowe'en games. We also celebrated Juliette Low's birthday, the founder of Girl Scouts, which falls on Hallowe'en. I would like to thank the mothers who helped with the party. The calendar sale starts the first

of November. They sell for \$1.00 each. If you want one, please contact a Brownie Leaders, Barb Heimgarter 276-4581

Tigers Swamped C. V. 44 - 6

The Kendrick High School football heads into the Kibbie Dome Hallowe'en night, against the Kamiah Kubs, and if their game last Friday is any indication, they appear to be ready. The Tigers took on C.V. in their final White Pine League

game, and they came out on the good side of a 44-6 score.

An outstanding job by the offensive line of Kevin Fliger, Tony Moran, Fritz Fliger, Dale Wolff and Brian Von Bargen keyed the win. They paved the way for the backfield, which the way have the way for the backfield, which combined for 360 yards rushing, Junior tailback Terry Hudson danced for 157 yards, 20 of which came on a touchdown sweep down the right sideline in the third quarter, Hudson carried 22 times during

the contest, and his 157 yards puts him over 1400 yards for the season. Quarterback Darren Clemenhagen made it in the end zone three times, while seconding Hudson with 83 yards rushing. He had runs of 11, 1, and 4 yards for scores, Mitch Cuddy and Roger Warner added a Cuddy and Roger Warner added a touchdown apiece, Cuddy's coming on a 4-yard counter play, and Warner's a 5-yarder during which he ran right over three would-be tacklers

C.V.'s only score came on a controversial 70-yard run, where it anpeared the runner had been knocked out of bounds at the line of scrimmage.

Kendrick now owns a 5-3 record. They have won their last three games, and have outscored their opponents 114-12 in those games. Their game in the Kibbie Dome in Moscow is approximately scheduled for 8:00. Genesce plays Potlatch in the opener of a doubleheader at 6:30.

Kendrick vs. Kamiah, Genesee vs. Potlatch At Kibbie Dome Friday

Friday night Kendrick travels to Moscow to play Kamiah in the Dome. This will mark the first time any Kendrick team has had this chance. The team is really looking forward to this experience and would like to see as many fans as possible cheering them on Friday night.

Genesee and Potlatch play the first game at 6:30. Kendrick's game will follow starting about 8:30 p.m. Tickets are on sale at Phil's and Blewetts, prices \$1.00 students and \$2.00 adults. This game is being played on if it was a house game at played as if it was a home game at Kendrick and Genesee, Student activity cards and season passes will be honored.

Volleyball Team Out at State Tourney

squad ended their season in less than three consecutive games at the state tournament. But while their state performance was unsuccessful, it should be remembered that they had a fine season, as evidenced by the fact that they are the District Champions.

The girls left Thursday for Twin Falls and on Friday they played all three games. Against some fine competition, they bowed out of all three matches, but still ended their season with a sparkling 16-6 record. There were ony three seniors on the team. so next year they will have more experience to work with. Team members that traveled to Twin Falls were: Seniors Patty Heath, Gina Whitinger, Cynthia Millard; Juniors Teresa Howerton, Misti Colbaugh, Beth Harris, Jamie Lohman, Bronwyn, Manfull; Sophomores Lisa Vallum, Charlene Parks.

Congratulations are in order to them, and Coach Nancy Monroe for a fine and successful year. In the four years of District II Volleyball there has neved been a champion other than Kendrick. Look out for next season.

Attention: KHS Parents

This week marks the end of the first nine weeks. Report cards are being changed this year and haven't been completed to be used this nine weeks. The grades will be on a sheet invited the first year dent listing the classes and grades.

At semester a new report card will be issued showing first semester work. If you have any questions please call Gale Vallem at the High School,

Nature's Way-

With wildlife, it's different. Many four-footed creatures can-and must -run almost from the moment of birth. Because most wild annials are less protective of their offspring than humans, nature endows their newborn with a variety of defenses against predators-including the ability to run and jump when barely out of the womb.

This is one of many wonders of the animal kingdom examined in Living Wild, a new book on animal ly large proportion of the youngsters' almost constantly. behavior published by the National lives are spent in juvenile depending two years. Wildlife Federation in time for the ency. The most important factor in addition to the ency.

But Living Wild, with its 268 color But Living Wild, with its 268 color photographs of animal in the wild, is mother serves as a "walking text-book," says the NWF publication, "a chapters which examine the survival chapters which examine the surv its 208 pages David Robinson a Great Falls, Mt., naturalist and author, explores the dark burrows, the gurgling sea caves, and the windswept aeries of the planet to report on how animals actually live and why they behave as they do

He reports, (for instance, that although the calves of the wildebeast and the giraffe are almost born running, a newborn deer, lacking the speed to outrun its predators, must rely on two other remarkably effective defense mechanisms: a camou-flage coloring that make it almost

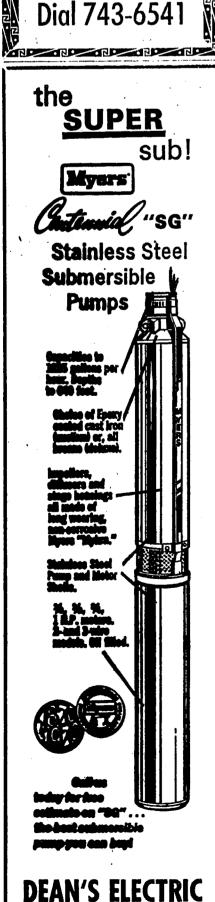

impossible to scent.

"A keen-nosed predator may stalk past the motionless little fur ball only a few feet away and never catch a whiff," says Robinson. Butjust as remarkable—a quickly as the fawn's running skills develop, so does a body odor.

Apart from mammals, most animals are born without a protective mother watching over them, and never know either of their parents. Parents who love and care for their children, in fact, are in a very small minority. It's much easier simply to abandon newley-laid eggs, and this is the most common practice in the animal kingdom. "It's also the most wasteful," Living Wild points out, "since without a guardian parent many eggs must be laid so that a few may survive. One female codfish lays so many that the entire Atlantic Ocean would be packed solid with codfish in only a few yars if all the eggs hatched and the young survived to adulthood."

The odds for survival improve dramatically when parents look after the egg-filled nest. A bird nestling on its eggs can be a fierce defender against all comers - even its own mate. To avoid squabbles, many

As long as Symms has been in Congress, he's never stopped peddling the idea.

There's a mammoth lockup being plotted called the "Sagebrush Rebellion." Beware of it. The movement is not limited to sagebrush, not by a long shot!

Congressman Symms wants "all non-wilderness public lands conveyed to state ownership within 15 years."

His idea is neither innocent nor inexpensive. If our rangelands and national forests were turned over to Idaho tomorrow, we would get stuck with an extra \$130,000,000 tax bill other Americans now help pay. That would require a 40%

The State government can't possibly afford to maintain the forest highways, access roads, campgrounds and trails as we now know and enjoy them. That's why Utah Senator Orin Hatch, national spokesman for the "Sagebrush Rebellion" recently admitted that the real purpose of the scheme is to transfer title "ultimately, to private citizens."

Could some of these "private citizens" turn out to be the billionaire Hunt brothers and other Texas moneymen who've already kicked hundreds of thousands of dollars into Steve. Symms' Senate campaign? The Wood River Journal recently reported, for example, that their investigation showed the Hunt brothers already have over 30,000 acres in leases around Magic

Frank Church knows the difference between a rebellion and a ripoff. So, he's fighting to keep Idaho's open spaces off the auction block by making the Forest Service and BLM more responsive to the needs of local users, and by pushing for full funding of the rehabilitation of our grasslands made possible by the Public Rangelands Improvement Act he authored.

Because the day when Frank Church lets the special interests lock the gates and post the "No Trespass" signs which force the people off their own lands can be stated in a single word:

ELECT LAVERNE "VERN" NELSON

Latah County Commissioner

Republician

- LAVERNE NELSON, better known to a great many of you as VERN NELSON, is a native of Latah County, born in Moscow, graduated from Moscow High School, attended the University of Idaho. He is 'married and has four children.
- VERN has been affiliated with business within Latah County for the past twenty-five years and is well aware of the problems of the loggers, farmers, business people, educators and the county as a whole.
- VERN believes in sensible government for the people and by the people, not one to satisfy the hearty appetites of the bureaucrats. "We need less government and more individual responsibility."

NOTE NOV. 4

FOR THE MAN THAT WILL WORK FOR YOU AND WITH YOU --- LAVERNE "VERN" NELSON

Paid for by Vern Nelson Committee, Robert Gardner, Treas.

CONSTITUTIONAL AMENDMENTS

Two amendments to the Idaho Constitution will appear on the general election ballot. These have been proposed to the people for ratification

following action by the legislature. The amendment proposals, the Legislative Council's statements of meaning and purpose, and the statements for and against are listed as

S.J.R No. 112
Section 1, Article III, of the Constitution of the State of Idaho is amended to read as follows:

SECTION 1. LEGISLATIVE POWER

- ENACTING CLAUSE -REFERENDUM - INITIATIVE. The legislative power of the state shall be vested in a senate and house of representatives. The enacting clause of every bill shall be as' follows: "Be it enacted by the Legislature of the State

of Idaho.' The people reserve to themselves the power to approve or reject at the polls any act or measure passed by the legislature. This power is known as the referendum, and legal voters may, under such conditions and in such manner as may be provided by acts of the legislature, demand a referendum vote on any act or measure passed by the legislature and cause the same to be submitted to a vote of the people for their approval or rejection.

The people reserve to themselves the nower to propose laws, and enact the same at the polls independent of the legislature. This power is known as the initiative, and legal voters may, under such conditions and in such manner as may be provided by acts of the legislature, initiate any desired legislation and cause the same to be submitted to the vote of the people at a general election for their approval or rejection provided that legislation thus submitted shall require the approval of a number of voters equal to a majority of the aggregate vote cast for the office of governor at such general election to be

The question to be submitted to the electors of the State of Idaho at the next general election shall be as follows: "Shall Section 1 of Article III, of the

Constitution of the State of Idaho be amended to strike the requirement that an initiative be approved by a majority equal to a majority of the votes cast for governor and to allow an initiative measure to be placed on the ballot at any general election?"

LEGISLATIVE COUNCIL'S

STATEMENT OF MEANING

AND PURPOSE

S.J.R. 112
The purpose of this proposed amendment to Section 1, Article III, of the Constitution of the State of Idaho is to remove reference to the number of votes cast at a gubernatorial election for determination of the majority necessary to pass an initiative measure. Effect of Adoption

If adopted, this amendment would revise procedures relating to submission of initiative measures. Because the present language requires that an initiative be adopted by a majority equal to the majority of votes cast for governor, it is uncertain whether initiative measures may be placed on the ballot in non-gubernatorial general election years. With adoption of this amendment, this uncertainty would be removed and initiatives could be submitted in any general election year. Statements FOR the proposed

amendment: 1. The original language of Section 1, Articl. III, was adopted when the governor was elected every two years. However, the governor is now elected to a four year term; consequently this amendment is necessary to return to the original intent that initiatives could be submitted in any general election year.
Statements AGAINST the proposed

amendment: 1. The language which is struck by the proposed amendment deletes the extraordinary majority required for approval of an initiative, but does not state the majority which is to be required. There are two possible consequences of this deletion. First, the majority to be required may be determajority to be required may be determined by the Legislature which might exercise its option to enact an excessive majority thereby impeding the exercise of the initiative power. Alternatively, only a simple majority may be required and the intent of the original authors to require a specified extraordinary

majority is lost.
2. Adoption of this amendment could lead to a proliferation of initiatives because issues of the moment would result in ballot submissions, whereas the present waiting period assures that only issues of enduring importance result in initiative action.

Section 5, Article IX, of the Constitution of the State of Idaho is amended to read as follows:

SECTION 5. SECTARIAN APPROPRIATIONS PROHIBITED. Neither

the legislature nor any county, city, town, township, school district, or other public corporation, shall ever make any appropriation, or pay from any public fund or moneys whatever, anything in aid of any church or sectarian or religious society, or for any sectarian or religious purpose, or to help support or sustain any school, academy, seminary, college, university or other literary or scientific institution, controlled by any church, sectarian or religious denomination whatsoever; nor shall any great or denote the denomination of lend money or grant or donation of land, money or other personal property ever be made by the state, or any such public cor-poration, to any church or for any sectarian or religious purpose; provided, however, that a health facilities authority, as specifically authorized and empowered by law, may finance or refinance any private, not for profit, health facilities owned or operated by any church or sectarian religious

society, through loans, leases, or other transactions.

The question to be submitted to the electors of the State of Idaho at the next general election shall be as follows:

"Shall Section 5, Article IX, of the Constitution of the State of Idaho be amended to empower a health facilities authority, as specifically authorized by the Legislature, to finance or refinance private nonprofit health facilities owned or operated by a church or religious

LEGISLATIVE COUNCIL'S STATEMENT OF MEANING AND PURPOSE

The purpose of this proposed amendment to Section 5, Article IX, of the Constitution of the State of Idaho is to allow a health facilities authority, when specifically authorized by law, to finance or refinance health facilities owned or operated by a church or religious society. Effect of Adoption

If adopted, this amendment would clarify the constitutional and statutory powers of a health facilities authority, by allowing the authority to provide loans for religiously affiliated health facilities, in the same manner as such loans are now available to other private, non-profit institutions.
Statements FOR the proposed

amendment;

1. The United States Constitution contains no similar barrier to this kind of financing proposal as does the Idaho Constitution; adoption of the amend-ment would make the Idaho Constitution consistent with the United States Constitution on this matter.

2. The state of Idaho makes no tax dollars available to a health facilities authority; all the money available to a health facilities authority comes from private sources. Thus, loans by a health facilities authority to non-profit health. facilities do not constitute lending the

credit of the state.
3. All non-profit hospitals, whether religiously affiliated or not, have the same basic philosophy of providing quality health care to people in need; this amendment will provide the necessary legal mechanism for an important group of religiously affiliated hospitals to receive financial assistance

through loans or leases.
4. The interest costs of capital expenditures for religiously affiliated health facilities could be reduced because of loans made by a health facilities authority; this reduction would help contain the rising cost of health care to patients.
Statements AGAINST the proposed

amendment: 1. There is no guarantee in this proposed amendment that facilities tinanced by loans from a health facilities authority would be open to the general public; however, open admissions and requirements of indigent care have historically been mandatory by epplicable governmental standards.

Grant to Aid Persons In Latah County

MOSCOW - Making severely dis-abled Latah County residents more independent is the aim of a multiunder a \$94,341 grant to the university of Idaho.

The grant, which runs for three years, will be used to provide inde-

At present, there is insufficient transportation available in Latah ounty, Berkler said. "The senior citizen van is committed to senior citizen

come a part of Stepping Stones Inc. This will insure consistency in the services for handicapped adults in Latah County.

Berkler said that when the grant

The money comes from the State faced program to be implemented Division of Vocational Rehabiltation and is part of a federal title fund

program. The program will attempt to expand services and opportunities for handicapped individuals ages 16 and over, Berkler said.

Improving transportation for disabled persons and increasing housing alternatives for them are among the program's objectives, she said.

Other objectives are to increase the personal independence of disabled persons by teaching them independent living skills, increasing the number of accessible recreational and social activities, increasing community awareness of the disabled population and educational skills, providing respite care services, increasing communication potential for the severely disabled and modifying the environment for increased independence.

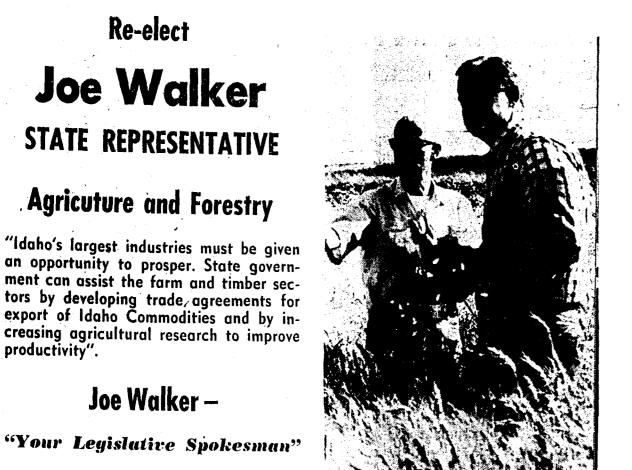

zens as a first priority," she said.

Berkled said the project will cosperate closely with Health and Welfare and Vocational Rehabilitation services and "anyone else who is a ervice provider in this area."

She said Stepping Stones, Inc., a Moscow based non-profit group dedi-eated to providing more opportunities to the handicapped adult, has helped obtain spaces for nine Latah County adults in the Whitman County shel-tered workshop in Pullman. This is the first time these people have had aich an opportunity. That group is also working to develop a Shelter Home and an Intermediate Care Facility for developmentally disabled adults needing it.

The newly funded project will be-

LUTHER PARKS, Chairman MARILYN EICHNER, Clark
A. O. KANIKKEBERG, Treasurer

Who as Chairman of the Senate Aging Committee, authored cost of living increases in social security ineals on wheels, and a \$100,000 tax exemption for the sale of homes for senior citive is?

Frank Church

Who has voted, with a tiny minority, against increases in social security, emergency medical services, nutrition programs and the Older mericans Act?

Steve Symms

TRANK GELERGE His only special interest is Idaho's.

BETSY ENOCHS District 5

DEMOCRAT

Political candidates frequently talk about the preservation of the family when they run for office. But few understand what that means as well as

Betsy has devoted 14 years to working with families and helping them survive--as a medical social worker, a psychiatric social worker and director of information and eduation for Planned Parenthood. For the last 7 years she has worked in child protection and juvenile probation in Latah County. Elect a candidate on November 4th who recognizes the realities of families, someone for whom "family" is more

Elect BETSY ENOCHS to the Idaho House on November 4

Paid for by Enochs for the House, J. Wallins, Treasurer

Who have Idahoans counted on when they've needed legislation to revitalize the rangeland, prevent Idaho water from going to California, rebuild American Falls Dam, restore oral auction bidding on timber sales, update the old reclamation law, institute a national gasohol program . . . ?

Frank Church

After eight years in Congress, and as a member of the Agriculture and Interior Committees, who hasn't passed a single piece of legislation for Idaho's farmers, ranchers, lumbermen, outdoorsmen, or any other Idahoan?

Steve Symms

FRANK CHURCH Idaho never had a better Friend.

Paid for by Idaho for Church Committee, Garl Burke, Chairman.

5 | Animals Available for Adoption at Lewis-Clark Animal Shelter This Week

Listed below are the animals available for adoption at the Lewis-Clark Animal Shelter this week. Call 746-1623 or see at 930 Mill Road. SMILEY curls his lips back and gives you a big grin when he sees you trying his best to be charming and debonair enough to find himself. and debonair enough to find himself a home. He's a one-year-old German Shepherd Collie with a gruff

bark and a heart of gold. Gentle and a real sweetheart!

FOXY has only a few days left in his life if he doesn't find a home. He is our very favorite in every way and we don't want to see this ball of fluff have to die. He's large enough to be a super protector for you, yet small enough to hold in your arms. Foxy is intelligent, affectionate, alert and paced full of love and devo-

tion with a dynamite personality.

Please save his life TODAY!

AUSSIE is a 4-month-old male, brown Australian Shepherd. He's smart, very well trained, gentle and ever so eager for love. Aussie would be an invaluable asset to any home and family, as he loves children. JOE is our white eyed Australian

Shepherd, 6-months old, eager to please and very anxious for a new

master. He, too, is gentle, cuddly, loyal and full of energy.

VICTORIA is a regal, dark brown German Shepherd. She only 6 mo. old, yet extremely well trained, obedient, lovable and elegant. She is a VERY classy dog!

MURPHY is a beautiful pure Irish

setter, one year old, full of excitement and enthusiasm for life. He will make a devoted pet and you won't be sorry.
PRINCE, ourubred Golden Retri-

ver is a prince of a dog! He's young, full of energy, always happy and ready to do your every bidding. Prince LOVES children and LIVING. RANGER has a St. Bernard face with hair the color of flames. return for your patience he will give you years of undying love and absolute devotion. Adores people!

A Very Special Lady!

She was brought to us by a tearful owner who, through no fault of

her own, could no longer keep her. She's a black Lab-Setter with extremely good possibilities for being an excellent hunting dog. According to her owner, she returned some

fleeing chickens to their pen in her mouth, one by one, totally unharmed so we know she has the instinct.

She's a gentle and leveble girl and She's a gentle and lovable girl, very badly in need of a very good home.

A Little Effort, A Lot of Savings

FREE SHOWER RESTRICTORS

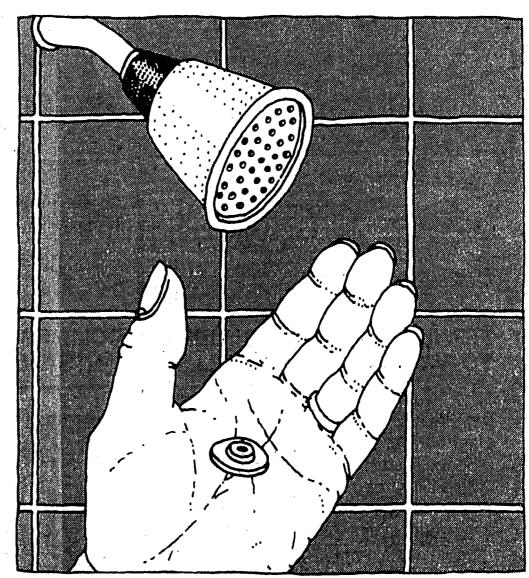

We'll give you a FREE water flow restrictor for your shower. It's one small energy-saving step. But it can add up to big savings for you.

The shower restrictor reduces the flow of water down to approximately 3 gallons per minute, while the shower continues to give off a good spray.

You can enjoy a satisfying shower and still save 2 to 3 gallons of hot water per minute, or up to 4,000 gailons of hot water a year. Of course, taking shorter showers will save you even more!

The shower restrictor is easy to install, and it comes with complete instructions. To get yours, just send in the coupon. Or stop by our offices.

WIN THE WASHINGTON WATER POWER COMPANY

I'm Ready To Save...

Please send me () free shower restrictor(s) and instructions for installation. I'm ready to start saving money and energy right now!

Stony Point

Helena Brown accompanied daughter Merle Cooper for a "day out" in Lewiston this past week. A bounti-ful meal was enjoyed at "21 Salads" old friends were seen, altogether a pleasant break.

New Neighbors at Cherrylane
Mike and Molly Mizer, with their
1-month-old daughter, Melissa of
Lewiston, have moved into the trailer home owned by Norma and Kenny Rugg. "Very nice people" is the comment of our Mildred Heath! We hope they will be happy here!

Comings and Goings

Gertrude Heimgartner and Erma Stevens were Tuesday, Oct. 21 afternoon visitors of Mildred Heath. Later that afternoon Flora Gibbs, accompanied by Mother Mildred, visited old friend Selma Sampson of Lewiston. Flora and husband "Frosty" Gibbs have departed, as of Friday, Oct. 24, soon to embark on their winter's travels. Norma and Kenny Rugg were Sunday A.M. callers of Mildred Heath and her Sunday dinner guests were Bill, Inez and Patti Inghram, Bill and Kenny bringing their "Mother-in-Law Day" gifts, a box of candy!

Mrs. Sally Munson, house guest of Evelyn Evans, flew back to her Orem, Utah, home after her visit here, and with other Heath family members.

Happy Baby Shower!

Honoring two mothers-to-be, Carlone Heimgartner and Charlene Lily, a double baby shower was held in Lewiston Wednesday eve, Oct. 22. The proud grandmother-to-be, Ruth Heimgartner, accompanied by Ardythe Heimgartner, attended from

Two Birthday Parties for Lynn! Miss Lynn Heimgartner, celebrating her 7th Birthday of Oct. 27, 1980, an Saturday at her home, entertained at the first party the following little people: First grade - Heide Noble, Kelly Longfellow, Rachel Sunderland and Marnie Henson, plus sister Leah and brother Cad! Birthday cake and

The second party on Sunday early eve were Adults Grandpa and Grand-ma Roy and Ardythe; Great grandfather C. F. Lyndor, with his walking cane; Great Uncles and Aunts Wayne and Ruth, Leslie and Delores, Tom and Ione Peters, and father and mother, Lee and Barbara! Again, but new, birthday cake and ice cream; This was Wayne's first Social Event since his troubles began! A double reason for celebrat-

Buy Day for Eldon, Gert and Erma! On Saturday, Oct. 25th after calling on Mother Mystie, the group visited in the Everett and Marie Custer home in Clarkston. Watching Scott Heimgartner, grandson of Eldon and Gertrude, playing in the Boys Club football team, provided excitement

Patti Celebrates Her ?th Birthday!

Patti Stevens, on Oct. 24th, had as guests for pizza at Juliaetta, Georgia Kerby and Jan Blewett, paid for and accompanied by husband Lloyd and son Brady. Husbands of Georgia and Jan were unable to attend. On their return, ice cream and birthday cake. baked by daughter Holli, was served at home, where Erma Stevens joined the party! Oh Happy Day!

Roger Harrer, wife Peggy and friend Karla Moore of Pocatello, Idaho, with Hunt Hatch of Kamiah, and Ken and Brant Steigers were Saturday's luncheon guests at his brief Monday A.M. callers at the Ernest Steigers home. The Harrer group had spent two overnights with Overnight Guests

Angie Hoisington spent overnight the Ken Steigers family, attending a seminar at U. of I. during the day,

Here is a complete list of Congressman Symms' successful fights for Idaho's future:

Now, here are just a few fights that Senator Church has won for Idaho's future:

- Fight for Idaho Farmers
 - National gasohol program that guarantees a market for all alcohol produced for motor fuel use, assuring new markets for farmers.
 - Moratoriums on diversion of Idaho water. Federal funding of American Falls Dam.
- Fight for Idaho Ranchers
- 1978 law to revitalize rangeland and implement a new, flexible grazing fee long sought by Idaho livestock producers.
- Fight for Idaho's Quality of Life
 - Legislation creating the Hells Canyon and Sawtooth National Recreation Areas.
 - River of No Return Wilderness, ending 15 years of controversy and assuring a stable timber supply and new mining opportunities.
- Fight for Idaho's Elderly
 - 1978 amendment providing a \$100,000 capital gains tax exemption for senior citizens who sell their homes.
 - Amendment guaranteeing Social Security recipients a annual cost of living adjustment to keep Social Security "inflation proof".
- Fight for Idaho's Lumbermen
 - 1978 amendment to restore oral auction bidding on timber sales, to protect Idaho's small, independent
- Fight for Teton Dam Victims
 - 1976 Teton Disaster Act to assure compensation for victims of the Teton Dam disaster.

When you deliver for Idaho the way Frank Church does you don't have to just promise.

Caldwell—A vaccine that protects mice in tests from the destructive liver fluke a parasitic flat-worm carried by water snails, has been developed into an experimental vaccine for cattle by UI researchers here and is now being tested.

The researchers involved hope to develop a long-term vaccine to protect both sheep and cattle from the parasite. If this work is successful it may have long-reaching effects even for human health. Other re-searchers may be able to use this vaccine to isolate an antigen and develop a vaccine against schistosomianother snail carried disease of blood-flukes that affects many people worldwide particularly in the

Great Grandmother
cattle rancher

Lt. Gov. Phil Batt supports chemical use

By Lt. Governor Philip E. Batt rare indeed.

There are those who will argue that the wide variety of chemicals used in the production of foods is a detriment to public health.

I don't agree. These substances are subjected to exhaustive laboratory tests before they can be used.

The cost of food would be sharply elevated if "organic" farming was our only method.

The high quality, disease and insect free products we are accustomed to finding in the supermarket would be

In bringing a crop of dry onions to maturity, one of the major expenses is weeding.

The fragile nature of the young plant makes mechanical weed control of only limited value. Thus the industry relies heavily on chemical weed control.

Some of the best of these have been furning agents such as sulfuric acid.

Their use has been largely abandoned because of the danger to applicators and the expensive corrosionresistant equipment involved.

been toward development of selective herbicides which leave the onion intact but stunt or kill the competing weeds. The only one of these in current use goes by the brand name "TOK".

this material for about ten years.

The chemical manufacturing companies continue to run tests after these products are originally certified as safe.

In one of those following tests, the TOK formulator determined that there could

Therefore the trend has be adverse effects if that such an exclusion pregnant females applied constituted the material.

> I emphasize that they were only referring to aplicators.

Those who apply insecticides or herbicides probably receive something Onion growers have used in the range of a million times more exposure to the material than do those who use the product later.

> The company issued a warning label proscribing application by women of child bearing age. But in California (where else?) a determination was made applying farm chemicals.

discrimination.

The company was left with no choice but to remove the product from the market. Unless effective substitutes are found, you will be paying more for your onions.

I don't think it is discrimatory to recognize the increased vulnerability of a woman when she is pregnant. In a sense, she is superior to a man by virtue of her ability to have a baby.

I have never seen a woman

This is not to say that most are not capable of doing so.

But for those who are pregnant or who are planning to be, one of the occupations which would seem best left alone would be that of a chemical applicator.

One of the hottest arguments concerning government protection of sexual equality is whether or not reasonable exclusions can be made.

The events leading to the removal of TOK from the market are not reassuring regarding that debate.

BLM seeks opinions

Idaho livestock operators using BLM-managed lands will have a voice in Federal livestock grazing decisions.

A proposed revision of grazing regulations, announced this week by the Department of the Interior, will give the operators the small. opportunity to participate in the number of animals permitted to graze on federal public lands.

This and other items included in the proposed revision prompted BLM State Director, Bob Buffington, to say, "this is one of more important management."

The proposed revisions Department of the Interior after six months of conoperators, wildlife interests, and state officials.

They provide for:

consultation between local BLM representatives and emergency situations. those from user and interest decisions become final.

-Up to 5 years for phasing

in adjustment of livestock provisions for the: grazing levels.

-An opportunity for original decisions to be amended if studies on how the range is responding indicate the original adjustment was too large or too

-A substantially greater the making of adjustments in role for all persons interested in rangeland management.

> The proposed revisions to the grazing regulations, published in the Federal Register, Oct. 15, apply to increases in grazing use as well as decreases.

The revisions would also proposals in the recent allow reductions to be history of public rangeland completed in less than five years if:

-The shorter period is were developed by the necessary to sustain forage production.

-The reduction is agreed sultation with livestock to by all parties concerned.

-The proposed reduction conservation organizations, is less than 15 percent of the

Provisions are also made -Up to 17 months of in the proposed revisions to meet the impacts of

Other revisions would groups before adjustment provide for clarfication and correction of errors in the present regulations.

These changes relate to

—Transfer of grazing preferences.

—Terms and conditions of grazing permits and leases.

-Titles to range improvements.

-Priorities for issuing grazing leases.

-Payment of grazing fees.

-Settlement unauthorized grazing use.

-Violation of federal and state laws and regulations.

The public will have 45 days to comment on the proposed regulations. addition, BLM officials will hold briefing sessions in Washington, D.C., and in each of the western public land states to describe the provisions and implications of the regulations to interested individuals and groups.

FROST, SNOW **GET GOOD MARKS**

Frost and snow may freeze your toes and give you an aching back, but they're not all bad, according to a new publication from the National Wildlife Federation.

Frost, says Ranger Rick's Holiday Book, "comes as a plowman to loosen and break up the soil:" Snow covers the ground, in effect, with a soft mulch.

The snow blanket keeps plants alive in the winter because the air is warmer under the snow than above it.

But snow can be a problem, concedes the NWF's collection of nature writings for children 5 to 12.

Light as it seems when it drifts to earth in its myriad shapes, a 10-inch snowfall over an acre of land weighs about 113 tons, the book reports.

ELECT

MIKE BLEWETT

STATE SENATOR

REPUBLICAN

After an 8 year career as a college basketball coach and health professor, Mike returned to the Culdesac area in 1974 to help operate the family farm. Since 1974, Mike's operation has expanded from about 200 acres of farm land to nearly 2500 acres. This rapid expansion gives Mike a first hand knowledge of the spiraling costs of farming, the heavy property tax burden of farmers, and the unnecessary restrictions of government regulations in regard to sprays and many other problems that are currently besetting the farm community.

Mr. Farmer, Ask yourself who you would rather have represent you in the Idaho State Senate.

1-a Union organizer like Mike's Democratic opponent, or

2-a young agressive farmer like MIKE BLEWETT

November 4 — Vote for Someone to Represent You.

MIKE BLEWETT STATE SENATOR

"A Farmer Who Understands Farm Problems"

Paid for by Mike Blewett for Senate Committee-Steve Kirkham, Treasurer.

Great grandmother runs ranch

By Imelda Wimer

one would ever guess it to see Gladys McLaughlin is a her work with her cattle, or great-grandmother but no herd a 4-wheel drive pickup

over steep, rocky mountain upstairs on a hill due east,

She knows a lot of people in the present McLaughlin Idaho County as well as knowing the terrain of the country.

There are two reasons for this—one is that she was born of pioneer parents and lived most of her life here, and the second is that she is starting her 19th year as an enumerator for USDA's Crop Reporting Service.

The McLaughlin ranch is located about 10 miles south of Cottonwood down the Graves Creek road just beyond the junction of Rocky Canyon.

The landscaped ranch home is nestled at the base of a steep hill.

"We filled in a lot of dirt to make the lawn," Gladys said. "You wouldn't believe that at one time all this area was planted to orchard trees and vineyard. The vineyard was the oldest in Idaho."

A man by the name of Niederhaus brought quite a variety of grapes and fruit trees from France, she said. He built a dugout with an

It was around the turn of the century when a Mr. Church from North Carolina visited this area and worked for Cooper.

and he lived upstairs.

McLaughlin home.

sawmill about 1885.

place.

He was favorably impressed with the Cooper family and told Mr. Cooper

that he (Church) had a couple daughters of marriageable age he would like to send out to find husbands here.

Mr. Cooper went along with the idea so Miss Frances Church, age 16, and her sister came to Idaho in November of 1902 and Frances married young Benjamin Cooper March 12, 1903. (At age 5 Ben had come to Idaho with his parents from Cloverdale, Calif.)

Young Ben Cooper homesteaded across Salmon River, three miles upstream from Rice Creek. He panned the gold that his wife's wedding ring was made from.

He later homesteaded 320 acres east of Mrs. McLaughlin's present home. At that time this was possible if the second homestead was within 20

miles of the original one.

Living was primitive on their homestead by the river although he had water piped to their cabin from the canyon above. The pipes were hauled in by pack horse.

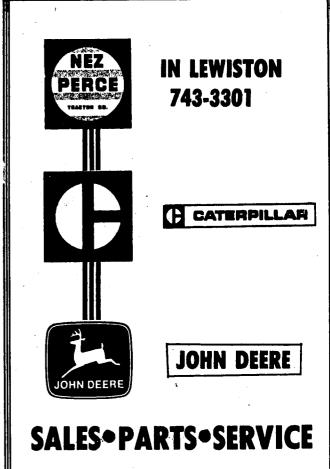

Mrs. Cooper came from a church-going community in North Carolina, with prayer meetings every Sunday, and was not used to the wilderness and roughness of the Salmon River country in those days.

"I think she was always afraid of horses and rattlesnakes, and worried about lack of medical care," Gladys said.

At the time of Gladys' birth, a neighbor rode horseback from the river to

(continued from page 4)

Cottonwood where he phoned the home of Dr. Foskett at White Bird.

The doctor was out on another maternity case at the time but as soon as he returned he came across Doumecq Plains horseback, changing horses three times.

The third horse was worn out and covered with lather when he arrived. Cooper worked the horse quite a while to cool him off.

In the meantime, Gladys had arrived 12 hours earlier, with a neighbor midwife filling in for the doctor.

In 1908, the Ben Coopers moved to the ferry where Pete Johnson now lives. Ben ran the ferry-Cooper's Ferry, later known as Jarrett's Ferry-four years.

They also had a "stopping house" where Mrs. Cooper cooked meals for overnight guests. Gladys' sister Minnie was born there.

Cooper was the first to plant alfalfa on the bars along Salmon River. Irrigation water came from a ditch out of Rice Creek that the Chinese dug in the 1860's when mining for gold.

Cooper patroled the 4-mile ditch twice a week to keep the water running.

In 1912, they moved to their present location and ment has been the building of Gladys and Minnie finished their elementary education at the Bug Slope school.

Then came the time when the Cooper girls left their canyon home to further their education and to marry. At

at Lewiston, Boise, on the coast and at Pomerov.

Her son. Norman Fitzsimmons, was born at Pomeroy. (In later years, he became County Agent of Clearwater County and has served in that capacity 22 years.)

The Depression hit in the early 30's and Gladys and her husband found it rough going to make a living. They moved back to Rocky Canyon in 1934.

"That fall weaner heifer calves could be bought for \$5 a head but we couldn't afford to buy them," Gladys said.

Her father let them have some cattle on shares. Gradually they developed their herd and the ranch.

Presently the McLaughlin ranch consists of 5200 acres of deeded land, including 500 acres between Craigmont and Westlake near Icicle Flat, and 2200 acres on Joseph Plains.

Gladys and her late husband, Bob LcLaughlin, worked and planned together. After his death some 8 years ago, she continued with the work they started but cut down on the commercial cattle to around 500 Hereford cows.

A fairly recent developfeed lots on the mountainside above Pine Bar along Salmon River.

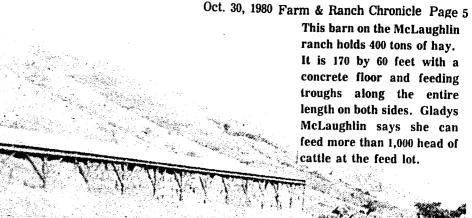

A hay barn, 170 x 60 feet, holding 400 ton of hay, has a concrete floor and feeding troughs the length of the

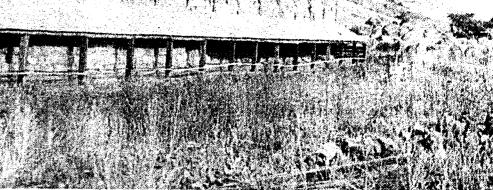

various times, Gladys lived barn. Water from a spring 3500 feet away is piped to every feed lot.

An ingenious idea was carried out for water tanks. Huge tires from construction equipment were used. The top of each was cut off with a chain saw and cement was poured for the bottom.

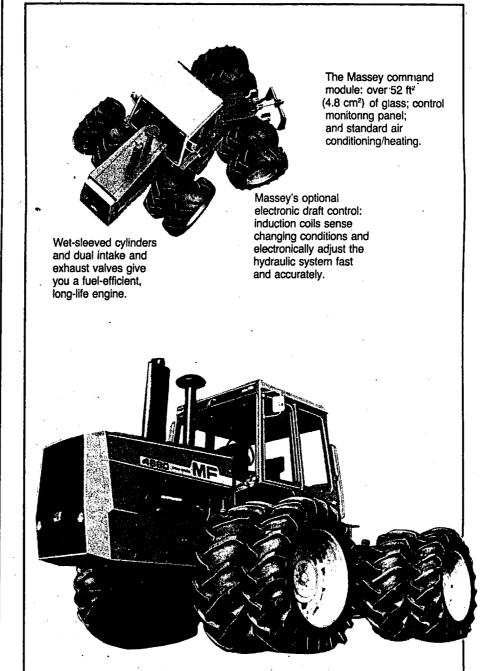

"It's impossible to shoot through the tanks as sometimes happens to metal tanks," Gladys said. "We

Large round bales of hay waiting to be chopped. The smaller grass bales wiegh between 800-900 pounds, but the big round ones weigh 1200-1400 pounds each, she she completes her work in said.

"Gene (Karl) Johnson did all the dozer work and roadbuilding and also built the corrals," she said. "and Dan Forsmann and his crew built the hay barn."

Calving season in the spring is a busy time as around 200 calves are born. Gladys helps with the job and noted, "seldom do we have to call a vet."

Along with running the

ranch, Mrs. McLaughlin has been an enumerator for the USDA's Crop Reporting Service going on 19 years.

It's a job she likes. Being farm and ranch oriented, and knowing all the roads and shortcuts in the county, as well as most of the people, record time. Any in-

WATER PROGRAM **SPEEDS**

FARM TECHNOLOGY CHANGES

New agricultural technologies will help U.S. farmers win their battle against soil erosion and water pollution, according to Chris Everts, University of Idaho extension educator specializing in water quality

the nation's water," Everts said.

The major pollutant from agriculture is sediment from soil erosion. The University of Idaho extension specialist said losses of soil from the erosion-prone hills of the Palouse region will be reduced substantially after improvements are made in no-till farming methods.

"Until now, no-till and lowtill methods have not been consistently successful. Some growers of no-till wheat have reported yield reductions, disease and other problems.

Feeders up 10 %

Cattle on feed in Idaho feedlots Oct. 1, totaled 239,000 head, according to the Idaho Crop and Livestock Reporting Ser-

This is 10 percent above the number on feed a year ago and 3 percent above the July 1 figure.

Placements during the quarter ending Sept. 30, 1980 totaled 162,000 head, 38 percent above the July-September quarter last year.

Marketings during the quarter totaled 154,000 head, a 33 percent increase from the previous year.

Steers accounted for 77

percent of the total cattle and calves on feed, compared to 79 percent a year ago. Of the steers and heifers on fees, 89 percent were 700 pounds and over.

This compares to 85 percent of the steers and heifers weighing over 700 pounds on July 1, 1980 and 85 percent a year ago.

Idaho cattle feeders expect to market 143,000 head during the October-December quarter. If these intentions are followed, marketings would be 23 percent above actual marketings for the comparable quarter a year ago.

Thomasons wen

to keep the three Thomason brothers busy during the off season at their fertilizer business has grown to the point of selling fertilizer shanks throughout the northwest and as far east in Canada as Manitoba. It also has a 6 day work week.

"Twelve years ago, we were looking for something for Bob, Bill and I to do in the winter months instead of just sitting around," said Dennis

White Front Shanks, a Yakima, Wash., shank manufacturing business and customer list was for sale.

"It worked out to be a year

Jug Thomason used con-

duction heat on a shank to

around job as we almost doubled the business output the first year," he said.

They kept the White Front name, but over the years their producct has become commonly known Thomason shanks.

Although the shanks are their main product, they also manufacture irrigation pipe flanges for Walla Walla and the Columbia Basin areas, components for circular irrigation systems, mine washers for the Coeur d'Alene mining district, and components of the Welenco Fireplaces of Lewiston.

"We keep our ear to the ground for products our equipment can make," he said.

Since their shank business started 12 years ago, they have sold their chemical division to Mark Means Co. Bill now works for Mark Means, but still is Thomason brothers' bookkeeper.

Another brother, Ardis, joined the business in the early 1970's.

"Our biggest year was 27,000 shanks, but our average is 20,000 and we turn out about 100-150 per day," he said.

When a "shank" first enters their shop, it comes as a 25 ton load of 20 foot 34 inch round steel bars.

about 6 foot lengths for each flat ones are easier to pull, shank. The scraps are made but cost more as more work into pinch bars.

"Our way, they are stronger and won't warp," Jug said.

Ardi does the designs as he is good at getting pictures in

(continued to page 12)

Who Delivers for Idaho Agriculture?

Frank Church

For over 24 years in the Senate, Frank Church has built a remarkable record of effectiveness for the farmers of Idaho. Here are some highlights of the past six

- •Rangeland Rehabilitation Bill: Frank Church wrote the 1978 law to revitalize rangeland and implement a new, flexible grazing fee long sought by Idaho livestock producers.
- •Sugar: Frank Church refused to allow the new International Sugar Agreement to be ratified until the Administration raised sugar prices. Because of Frank Church, sugar support prices were raised.
- •Reclamation Reform Act: Frank Church wrote the bill that has passed the Senate to overhaul the old law and raise the 160-acre limitation to 1,280 acres!
- •Gasohol: This year, Congress passed the major synthetic fuel bill, which sets a goal of producing eleven billion gallons of gasohol a year. Frank Church wrote the gasohol provisions of the new law!
- American Falls Dam: When American Falls Dam was no longer safe, Frank Church led the successful effort to secure funding to pay the cost of rebuilding
- Wheat Prices: When it appeared our trade negotiators might use wheat exports as a "trade-off," Frank Church threatened to block any new International Wheat Agreement that failed to protect American growers.
- Potato futures: Frank Church, at the urging of Idaho farmers, introduced a bill to put a stop to speculation in potato futures that harms the growers.
- Water: When Idaho was faced with having its water diverted elsewhere, Frank Church led the successful fight with a moratorium on diversion of Idaho water.

Steve Symms

In contrast, Steve Symms has been in Washington eight years, was a member of the Agriculture Committee during that time and yet, he hasn't passed a single piece of legislation for Idaho farmers. In fact, he hasn't passed a single piece of legislation —

Compare the Voting Records:

Before you vote, compare the record of Frank Church and his opponent, Steve Symms. You'll find Frank Church consistently voting "yes" on agricultural legislation that benefits the Idaho farmer — and Steve Symms voting "no." Here are just a few examples:

CHURCH		SYMMS
YES	Omnibus Farm Bill, 1973	NO
YES	Disaster Loan Program, 1973	NO
	Establishment of the Commodities Futures Trading Commission, 1974, to curb speculation that hurts the farmer	МО
YES	Sugar Act Extension, 1974—the backbone of protection for the Idaho sugar industry	NO
YES	Agricultural Act Amendments, 1975, raising target prices and loan rates	NO
YES	Foreign Commodity Agreement, 1975, to promote foreign agricultural sales	ИО
YES	Direct Marketing Act, 1976, to promote direct marketing between farmers and consumers	NO
YES	Agriculture Act of 1977	NO
YES	Emergency Farm Bill, 1978	NO
	Farm Loan Program, 1978, making availble emergency loans for farmers who couldn't otherwise get credit	МО
YES	Compromise Sugar Bill to protect growers, 1978	NO
	Gasohol, 1980: The Synthetic Fuel Bill contained major programs (written by Church) to promote the production of gasohol.	МО

his mind then putting them into practice.

The fireplace fronts start with a flat piece of steel. The press punches out the center and oblong cuts in the front then changes a die to do the other small square holes.

The center is used for other components, but the small squares go for scrap iron.

From the press, the fireplace inserts cross the shop on a conveyor to a second machine for shaping.

The edges are bent back, the corners welded and sanded smooth so it all looks like one piece.

The Welenco name is pressed into the front of the metal.

In addition to the regular sizes of Welenco products they also do special sizes for unusual fire places. The inserts are also the only ones which have been proven safe to go in the Standex prefabricated metal fireplaces of Detroit, he said.

"Although each usually works in one area, any of us could go in at any phase and make any of the products," Jug added.

Planning makes farms work

A simple, no-nonsense approach to farmstead planning is advocated by John E. Dixon, University of Idaho agricultural engineer.

In an article in a national engineering journal, Dixon says many planning goals must be set forth in general terms before detailed decisions can be made regarding the design of farm buildings and use areas.

"Start from the broad viewpoint and work toward the specific," Dixon states in an article in Agricultural Engineering magazine. His article is entitled "The 'Goose-Egg' Farmstead Planning Method."

One way you can avoid premature involvement with details is by using easily sketched egg-shaped figures to represent buildings and key areas on farmstead planning maps, Dixon points out.

The first goose-egg to be sketched during the planning process will indicate the farmstead's location. The University of Idaho educator suggests making this sketch on tracing paper laid over a

topographic map of the farm.

To evaluate and campare several possible locations, Dixon proposes rating farmstead sites on the basis of water supply, drainage, expansion potential and other important factors.

When a site has been selected, Dixon says, an enlarged sketch of the chosen area should be marked with these goose-eggs:

—An egg-shaped figure representing the farm court. This is the "hub of the farm-stead," providing access to all buildings, use areas, lanes to fields and the drive leading to the public road.

—Another egg portraying the farm home. Since it is "the farmstead control center," the home should provide a commanding view of the farm court. The home should be upwind from sources of dust and odors. Farmstead drainage should flow away from the house. Buttons have been found in

Additional goose-eggs,
 as needed. These will depict
 the buildings and facilities

required on a particular farm. They are arranged in four zones, formed by drawing concentric circles centered at the farm home.

Zone 1 is the control center and family living area.

Zone 2 includes machinery storage and service.

Crop and feed storage and processing plus minor livestock housing are in Zone 3, while major livestock facilities are located in Zone 4.

In the preliminary planning, it is helpful to ignore the existing farmstead, says Dixon. The planner tries to create an "ideal" farmstead

the tombs of Egypt and Greece, dating back 2,500

to 4,000 years. It wasn't un-

til the 15th or 16th century, however, that the button-

hole was invented.

layout. Later, decisions will be made as to which of the existing buildings should be remodelled, moved or left as-is. The ideal plan is then modified, leading to the final farmstead plan.

Finally, Dixon points out, a scale drawing on the ratio of 600-to-1 can "include the farmstead area plus property lines, public roads and other physical features.

Draw existing buildings to exact dimensions and establish dimensions for each new building."

Three good reasons why Farmers and Ranchers support Larry Craig For Congress!

Experience — Larry Craig is a farmer rancher who understands our problems. "Growing up where cattle and farming are a precious way of life, I know the hardship and the problems we have to cope with to make a living on the land," Craig says.

Water Rights — Larry Craig understands the importance of water in our lives and in our business. "As long as I'm in public office, no one in Washington will get away with advocating control of our water and suggesting it will be better used elsewhere," Craig explains.

Glint of gold lures prospectors to hills, rivers

By Susan Tiede

"We had a lot of public inquires 'where's the gold' this summer," said David Williams, geologist with the Bureau of Land Management in Cottonwood.

BLM is an official recording office for mining claims as are the county courthouses. Recording regulations vary according to state statute.

Four or five people a day would phone or write the BLM office at Cottonwood, said Jim Robbins, BLM mining engineer. They ranged from mining company representatives with technical questions to the man off the street.

"We expect a lot of activity again next spring. A lot of people do it for recreation and to tell people 'see what I panned in Idaho on my vacation','' said Dick Harms, Cottonwood Resource Area Manager for BLM.

Panning isn't covered in claims the staking regulations.

"As the price of gold goes up, we will be seeing more and more groups and big companies starting up again, too," he said.

They will probably take over the mines of the 1920's and 1940's. The war effort diverted workers out of the mines and engineers were needed in more strategic jobs, Harms added.

for staking claims. Wilderness study areas can be staked, but not mined,

Williams said.

In areas that can be mined, structures can only be built for the main purpose of working the claim so it isn't for summer cabins. Robbins said.

claim jumping. Some was intentional and some ac-Some people cidental. haven't kept up their yearly \$200 worth of assessment work, Robbins said.

Also, just because a recording agency doesn't have a record, it doesn't mean someone else hasn't staked it.

In areas where the mining districts have been, people should use caution not to trespass on their claims.

Often the claims are a maze to follow and determine if an area is still open for mineral location. They are often very irregular shapes and in some areas 6-8 claims have been staked on one piece of land.

The nearly 53,000 mining claims in Idaho are currently being changed over to a computer cross reference system which gives the property's legal description, claim name and name of claimant.

All the claims are expected to be in the system by 1981, Robbins said.

The old records were by claim and claimant's name only which made an area difficult to locate whether it had been staked or not.

Often the best way to find out if an area has been claimed is to go out and look for any indication of it being previously staked, Williams said.

"We don't have a map of It's pretty much still open where all the claims are, but we do have a computer printout of the mines.

"We're encouraging people to come to the district office and check before they disturb the land. The county courthouse has the claim applications.

"Our office has more information to help them There has been some protect their claims and new

A lot of private land in the country has had the mineral rights reserved by the government.

If you plan to check out some of that land, use common sense plus asking the land owner's permission.

If you disturb a crop or fence on private land while prospecting you have to reimburse the land owner, Robbins said.

Questions on state mining law should be referred to Larry Jones, mine land specialist, Idaho Department of Lands, Bureau of Minerals, Statehouse, Boise.

The Cottonwood BLM area office has examples of claim location papers and proofs of labor.

These aren't necessarily the right or wrong ways, but examples, Robbins said.

The most activity for minerals so far is in gold, coppr, lead and some zinc, they said.

Small suction dredges which are about the size of a desk and move less than two cubic yards of material per hour are under state jurisdiction.

When small dredges are used properly, it doesn't involve the stream banks. Under the mean high water line the banks fall under state jurisdiction, but above that line is BLM.

"Last winter we had two people that grossed \$200 a day dredging. It was hard work. During the day, they worked the stream and at night they had the concentrate to sort for gold.

"They really didn't make much per hour," they

Yields bring smiles

By Susan Tiede

Crops throughout the region were unusually good on the whole, according to county agents.

"We had real good crops especially spring barley," said Floyd Gephart, Lewis County agent. "Fall wheat as a whole was real good,

The barley was exceptional with over 2 tons an acre. Peas were the best in 6 years as far as yield, with 1800-2500 pounds an acre compared to an average of 1200-1400 pounds.

The spring wheat looked like 60 bushels an acre, but it yielded in the 30-40 bushel range.

Some of the wheat had a low test weight and wild oats was a problem. Farmers killed one crop of wild oats, but the cool wet weather brought on a second crop of wild oats.

Growers are about caught up with the fall work with the good weather, but they are still a little behind in the Winchester area, Gephart said.

The fall wheat is in and looks good. It came up even. The last rain was ideal for germinationg and growing. They are working on the fall plowing now, Gephart concluded.

"Harvest was one that we can be satisfied with," said Latah County Agent Gordon Dailey. "It was a different year with ash, rain, stressand we still came out with a good harvest.

"The peas did well over a ton and the wheat was up and down with some over 100

averaged out at 1000 pounds.

"There was quite a bit of low test weights on the McDermid tend toward the exceptionally well.

wasn't any sprout this year."

The fall seeding is about lot of the fall chisel plowing.

The precautions against using moldboard plows in the volcanic ash turned out not to be needed since it wasn't the hazard it was thought it might be.

It is still dusty with volcanic ash in Latah County. The ash was tough on sickles, generators and starters this year.

Things aren't the same color as usual especially in the Potlatch-Worley area. The ground has a light gray color. Summer fallow was gray and more dusty than

"It will be something we have to put up with for a few years," he said.

"The volcano added 8-25 tons per acre of ash to our fields. It was erosion in reverse," Dailey said.

"The livestock is fat and the grass was good this year," Dailey said.

Idaho County's crop came out average this year. The south half of the county was not so good and the north half was better than average so it came out about average, said Ed Mink, county agriculture agent.

The Ferdinand-Cottonwood area did better than normal on their winter wheat and spring barley.

The fall seeding is done and needs some rain to get it up. The soil temperature is still up so it's good growing conditions except for needing more water to get a good seedling going into the inter, he said.

"Some farmers are still plowing, but they could use some rain too. The moisture situation is making it a little rough, but we like it that way for an erosion hedge going into winter."

Mink thought it had been a super cow year.

"Fantastic, excellent," was Jay Ney, Nez Perce County Agent's reaction to the crop year.

The yields for the most part were above average.

Life-long farmers who are in their 80's said it was the best year they had ever seen.

There were some in-

bushels an acre. The lentils dividual fields of Austrian peas hurt with root rot and plowed up and some wheat was affected by rust, but in wheat. Hyslop, Stephens and the long run the crops did

Barley yields of 2-21/2 ton "I'm not sure if a little rain were not uncommon. A just before harvest hurt it or number of wheat fields went not," Dailey said. There more than 100 bushels an

"They started out this fall over and farmers have done in real good shape. The summer fallow was seeded early and with the rain the seed continues to germinate and is looking good.

> "Seeding will be pretty well wound up by the end of the month in Nez Perce County, " Ney said.

Eye and face fly problems existed this year. They have adequate hay supplies as many ranchers got a second cutting with the wet sum-

At first it looked like a short hay crop, Ney said, but it turned out the opposite.

Ranchers are weaning calves, pregnancy testing cows and getting ready for winter now.

Larry Smith has been named new crop and horticulture agent for Nez Perce County. He will start work here in mid November, Ney noted. He has been a wheat breeder at the Aberdeen experimental station.

Ney will continue as the 4-H and livestock agriculture agent. Smith will be filling the vacancy created by Loren Kambitsch's retirement last year.

IDAHO RECEIVES \$1.7 MILLION FOR FISH AND WILDLIFE

Idaho will receive about \$1.7 million in the first installment of federal fish and wildlife restoration funds allotted annually by the Department of In-

About \$1,122,000 is for wildlife restoration projects and another \$94,000 may be used for hunter safety programs. Fisheries programs will receive some \$436,500.

The second installment is usually distributed in December. Each state and Puerto Rico, Guam, the Virgin Islands and American Samoa receive a share of the total amount-\$90 million-based on numbers of license holders and land area.

Funds are generated by a 10 percent excise tax on fishing equipment, pistols and revolvers and an 11 percent tax on sporting arms ammunition and certain archery gear.

Authorization comes from the Pittman-Robertson Act for wildlife restoration, which became law in 1937, and the Dingell-Johnson Act of 1950 for fish restoration.

Fungus Gets Scientist's Help

University of Idaho agricultural scientists want to make life less hazardous for a fungus that infects and kills harmful insects.

The Beauveria bassiana fungus may help U.S. farconfronts in the soil.

Dr. Al J. Lingg, professor bacteriology, said Idaho University of began inresearchers

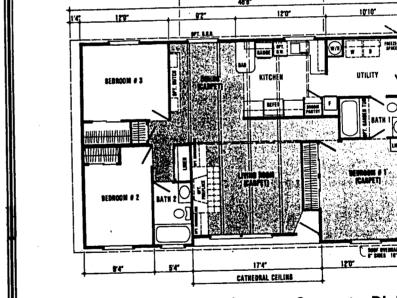

mers battle bugs if it is given vestigating the Beauveria protection from dangers it bassiana fungus several years ago with the objective of determining how the organism might be used to control the pea leaf weevil and other insect pests.

University of Idaho researchers have determined that a material produced by a number of soil organisms appears to inhibit the growth of Beauveria bassiana.

The material is patulin, a substance which has been found to be toxic to some animals, plants, bacteria and fungi.

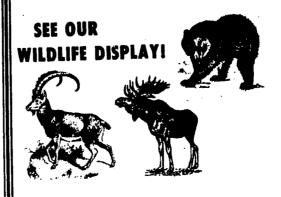

One patulin-producer the UI research team studied is a common soil fungus of the penicillium genus. Because many other soil organisms produce patulin, the researchers believe it may not be possible to manage soils in ways that would provide Beauveria bassiana with a patulin-free environment.

"We think it will be necessary to develop strains of Beauveria bassiana fungus that will tolerate patulin.

Indian Summer Extends Picnic Time

There's no cut-off time for enjoying nature and good eating. Many Americans are reluctant to give up the out of doors they so dearly love so they extend their outings to those wonderful Saturdays and Sundays during Indian Summer. This is the time for enjoying football or hockey, soccer, hiking or driving to nearby picnic areas for a view of the fall foliage. The air is invigorating and appetites are hearty so take along an easy to prepare vegetable pasta casserole made from broccoli and canned beef ravioli in rich tomato sauce. It's bound to please the cook and satisfy those Indian Summer appetites.

EASY RAVIOLI VEGETABLE CASSEROLE

2 packages (10 oz. each) frozen chopped broccoli

2 tablespoons grated Parmesan cheese

1/2 cup finely chopped onion 1 medium clove garlic, crushed

1/4 cup red or green chopped peppers

1 tablespoon butter or margarine

2 cans (15 oz. each) Chef Boy-ar-dee (R) Beef Ravioli in Beef and Tomato Sauce

Cook broccoli according to package directions; drain well. Add Parmesan cheese and mix well. Saute onion, garlic and peppers in butter until lightly browned; combine with broccoli. Place Ravioli in saucepan over low heat; stir occasionally until thoroughly heated. Add half of the broccoli mixture to Ravioli; serve half for garnish. Arrange in shallow or 11/2 quart serving dish. Garnish edge with the remainder of the broccoli. Serves 4-6.

Fancy Finale With Frosting

Those lazy days of summer are just about over. But the warm weather will linger awhile. What better way to celebrate the end of the summer than with a special homemade dessert like the frozen Lime Cream Dessert

The tart, summery taste of lime makes this a fitting finale for summer. And you won't have to change your lazy-day routine. This recipe is quick and easy to put together with the help of Creamy Deluxe® ready-tospread frosting. Just scrape the frosting from the tub, add gelatin, whipping cream and lime juice, and freeze in the cookie crust

LIME CREAM DESSERT

- 1 1/2 cups chocolate wafer crumbs
- 1/4 cup margarine or butter, melted
- 1/2 cup boiling water
- 1 package (3 ounces) lime-flavored gelatin
- 1 tub Creamy Deluxe®vanilla ready-to-spread frosting
- 1 1/2 cups chilled whipping cream
- 1 tablespoon lime juice

Heat oven to 350°. Line ungreased square pan, 8x8x2 inches, with aluminum foil. Mix cookie crumbs and margarine; press firmly in bottom of pan. Bake 10 minutes; cool.

Pour boiling water on gelatin in bowl. Stir until gelatin is dissolved; cool. Mix frosting, whipping cream, gelatin and lime juice in large bowl. Beat until smooth and creamy, about 2 minutes. Pour into pan. Freeze until firm, about 8 hours. Just before serving, lift dessert and foil from pan; place on cutting board. Cut into squares. Garnish each serving with lime twists if desired. Freeze any remaining dessert. 9 servings.

easy living

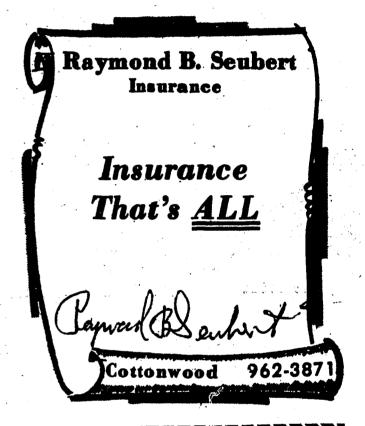

No room for a trash compactor in your kitchen, and no need or plans to remodel for quite a while? That needn't stop you from having a handy kitchen appliance that helps make kitchen clutter and overflowing waste baskets a thing of the past, advise home economists from Whirlpool Corporation.

The above sketch illustrates an interesting idea that's simple and doesn't require any changes to your present cabinetry. It shows the trash compactor placed in a pantry in or near the kitchen area.

Because it is only 15 inches wide and countertop height, the compactor takes little room, leaving lots of space for food storage or cleaning supplies. It's accessible and neat...and all that's required to install it is a regular 115 v. electrical outlet.

No closet or pantry near the kitchen? Take a look at the freestanding models available...no need to install them at all. Just like the built-in versions, they come with reversible panels and decorator colors to match or complement your other appliances. A vinyl wood-grain top also provides additional countertop space as well as a concealed bag storage compartment which makes it convenient to store a full supply of trash compactor

A touch-toe drawer opener is available on both built-in and free-standing models and provides "no hands" disposal of trash. Just press down the full width bar with your toe and the drawer slides out so that trash can be simply dropped in.

Use Frozen Haddock To **Prepare This** Cape Breton **Island Specialty**

Haddock - delicate flavored, tender, white and juicy served with a satiny chopped egg sauce is traditional Cape Breton Island cuisine. You'll find it at the Inverary Inn where there's always Lemon Snow in custard for dessert and authentic Scots Oat Cakes with every meal. Isobel MacAuley is famous throughout Nova Scotia for her down home menus which always feature the "catch of the day" from nearby North Atlantic waters.

Inverary Inn Cod

6 servings

2 lbs. frozen North Atlantic Cod or Haddock fillets

- cup butter
- 1/4 cup flour
- 2 cups milk 4 hard cooked eggs.
- chopped 1/4 cup snipped chives
- 1 teaspoon salt

1/2 teaspoon white pepper Allow fish to stand at room temperature 20 minutes unwrapped. Cut each semifrozen block into 3 portions. Poach fish in simmering, salted water or court bouillon 20 to

25 minutes or until fish is opaque white and flakes easily when tested with a fork. Remove and keep warm. Make egg cream sauce: melt butter, stir in flour and cook 1 minute. Slowly add milk. Stir over medium heat until thickened and smooth. Add hard cooked eggs, chives, salt and pepper. Arrange fish portions on serving platter. Spoon egg sauce over all. Optional ingredients: 3 tablespoons sweet pickle relish. 2 teaspoons mustard.

> Lemon Snow 10 to 12 servings

- 3 envelopes unflavored
- gelatin cups water, divided
- 2 1/4 cups sugar cup lemon juice tablespoon grated
- lemon pee 1/2 teaspoon salt egg whites

Soften gelatin in 1/2 cup cold water and let stand 5 minutes. Add 1/2 cup boiling water and stir until dissolved. Combine sugar, lemon juice, lemon peel, salt, and remaining

*Custard Sauce

2 cups cold water. Add dissolved gelatin. Chill until slightly thickened, about 1 hour. Beat egg whites. Fold into gelatin mixture. Pour mixture into an angel food cake pan or 10 cup mold. Chill until firm. Serve with Custard Sauce.

STRAWBERRY TREATS

Grated rind of 1 orange 2/3 cup peanut butter 10 slices rye bread or thin slices pound cake

Blend strawberry jam,

pecans and orange rind; spread on half of the bread. Spread peanut butter on remaining slices and press together.

*Custard Sauce

- 6 egg yolks
- 1/2 cup sugar 1/4 teaspoon salt
- quart milk
- teaspoons vanilla extract

In double boiler, beat egg yolks. Add sugar and salt. Scald milk and add slowly to egg mixture. Place pan over hot water. Stir constantly over medium heat until mixture begins to thicken. Cool. Add extract. Chill well.

Oat Cakes

4 dozen

- cups rolled oats
- cups flour
- cup sugar
- teaspoons salt
 - teaspoon baking soda

1 1/2 cups butter or shortening, or lard 2/3 cup cold water, about

Combine oats, flour, sugar, salt and soda in large bowl. Work in shortening with fingers. Add enough water, a little at a time, until dough begins to stick together. Form into a ball. Divide dough in half. On clean work surface sprinkled with additional oats. roll or pat each half out to about a 10-inch square. Cut square into 25, 2-inch squares. Place squares on ungreased baking sheet. Bake in preheated 350°F. oven to 25 minutes or until slightly browned and crisp.
