Encouraged by the desire and offer

to help with some of the work and

planning by a Kendrick High School

student, efforts are now underway

to bring back a Main Street window

Customers of Potlatch Telephone Company are speaking more clearly than ever before. According to Jerry Brown, company manager, the local telephone company completed a major upgrade of its system last month. "The way that calls are sent from here to other telephone companies now is by state-of-the-art fiber optic lightwave equipment," Brown grade of its facilities in 1990 and during the 1991 cut-over to all 1-party service. During 1992, additional digital switching and lightwave son, Harold of Calif.; a daughter equipment was installed to coinnection at Arrow by US West.

What this means is that calls coming into and leaving this area are be-Highland Community Church in ing carried by the highest quality technology available. "We know that customers notice when there is static or noise on the line," commented Brown "With fiber optic equipment, calls are sent on a beam of light over hair-thin strands of glass which is simply not affected by mag-

netic or electrical interference." Customers may have noticed recently that their long distance calls have had less background noise than before.
