Call Before You Dig!

WHO SHOULD CALL?
Anyone planning to dig or excavate could damage any underground pipes or cables at the site.

WHAT DOES IT COST?
Your only cost is the time it takes to make one toll-free phone call. For that investment of a few minutes, you will receive the following dividends:

- The peace of mind of having avoided the possibility of hitting a pipe or cable carrying gas, oil, or telephone or electricity which could be life-threatening.
- The satisfaction of contributing to lower utility rates by holding down repair costs.
- The appreciation of consumers in your area who will not have utilities interrupted by unnecessary dig-ins.

Letters to the Editor—

Editor:
Since the school is currently considering introducing a bond in October to expand the elementary school, then now would be the time to add a regular classroom to that bond for the Special Ed. Department at Juliaetta Elementary School. Emily Fredenberg agrees this would be a wonderful addition to the school. If they are going to add on to the school

then this would be the time to request the classroom for the Special Ed Department. Right now these students have to go down in the basement where there are no windows and the circulation is poor. It is not fair.

This is the time to add the Special Ed classroom since they will be expanding anyway.
