## Letters to the Editor . . .

Editor:  
After the flooding in the Kendrick and Juliaetta area last year there was some talk in the Gazette of preparing for possible future emergencies. Has anything been done or was it just talk?  
I have some channeled information to share with anyone who may wish to take advantage of it. Last year Jesus mentioned the probability of large-scale power outages in the latter half of 1997, an opportunity to use some of the food and water we have stored. In May 1997 Peter and the Masters of Light gave more specific information. Solar flares will cause power blackouts across the continent in July, August, and September. There is a possibility the energy could shift instead to the Atlantic and European continent. Duration of the blackouts may vary from a few hours to a week or more, but we should be prepared for even longer periods of time, because these things are hard to foresee. Perhaps our area will be spared, but don't count on it.  
How long will the city water supply last without electricity? Are there emergency generators? Do the grocery stores have a means to keep perishable foods cold? Doesn't it take electricity at service stations in order to pump gas? If we were without electricity for a week during the middle of harvest, would trucks be lined up in the street with no way of getting grain into the elevators? Do you have an alternate means of cooking food? Don't rely on the government to take care of you. Look out for yourselves, and also be prepared to help your neighbors.  
Chances of volcanic eruptions will increase until July 25, then slack off. Those that might affect us are in the Cascades.  
If you plan to do any flying in July or August, pay close attention to your intuition. There will probably be many airline crashes due to the fluctuating energy.  
There is no reason to be afraid or to panic. Just prepare, and then enjoy the adventure. This is only the beginning.  
Ted Meske  
Kendrick

P. S. If none of these things actually happen, count your blessings. Prophecies by the Masters are highly accurate when given, but where free will is involved, things can change in the meantime.

Many people suffer from allergies and asthma, myself included. I have found a "health food" remedy that seems to offer some relief, and I want to share this knowledge.  
Procyandiolic oligomers (PCO), this is available in Pycnogenol, or in Grape Seed Extract, which is the cheaper of the two. A bottle of 30 capsules of 50 mg Schiff brand grape seed extract costs less than \$7 at Walmart. take approximately 1 mg per 2 lb. body weight per day.  
PCO is claimed to inhibit the release of histamine, and therefore moderate an allergic reaction. It is supposed to reduce inflammation. Whatever it does, I seem to get about a 20% improvement from it with no side effects.  
Books are available from the local library system on this and I urge you to check them out if you want more information.  
Do some research, check with your doctor, and hopefully this may help you too.  
I am not a "health food nut" and I have no financial interest in this in any way. A friend whose wife has asthma worse than I do told me about this stuff. I was skeptical, did some reading, decided to try it, and am glad I did.

In 1996-97 I was employed for four months in Hanoi by the Livestock Extension Sub-component (\$7m US) of the World Bank funded Agricultural Rehabilitation Project (\$95m US) of the Socialist Government of Vietnam. During my stay I acquired a good friend, Professor Le Cao Dai, MD, Consulting Center for Environmental protection and Technology transfer (CCET), 368A Thai Thinh-Dong da-Hanoi-Vietnam.  
The Center's mission is to study the long-term consequences of Agent Orange/dioxin on the environment and human health in Vietnam. During the Vietnam War the South of Vietnam, part of Laos, and Cambodia were heavily sprayed by herbicides used for military purposes. To the present time, several decades after the War, the long-term effects of Agent Orange contaminated with dioxin are still a matter of great concern.  
Dr. Cao Dai, a surgeon, and retired military Colonel, was Commander in 1971 of a 1000-bed Viet-

## Storyteller at Library July 10 at Reading Prog.

The Juliaetta Library will present a program of storytelling with Betsy Bybell this Thursday, July 10 at 10:30 a. m. This is another of the special programs offered by the library for this year's summer reading theme, "Timeless Treks." The summer reading program is free and open to all area children to participate. The schedule for the remainder of July is as follows:  
July 10: Storytelling with Betsy.  
July 17: An ocean voyage with sea shell collection by Bryan and David Jones.  
July 24: Final party featuring "A Medieval Festival."  
Children who have signed up for the summer reading program may continue to read for their prizes until Saturday, Aug. 16. In the past the library has always shown a film each Thursday in August but this will not be done this year so that we may have our movie projector serviced.  
Our regular story time programs will begin again on Thursday, Aug. 28, at 10:30. This program is especially for preschool age children and always features some easy stories plus a craft for the for the children to make and take home. It is an excellent way for children ages 3 to 5 to become acquainted with other children and learn to sit and follow directions. For more information call 276-7071.  
The children who completed the summer reading program this week and received their prizes were: Katie Middlekoop, Andy Vachoc, Cole Harris, Cortnie Hammond and Christopher Hammond.  
Stop in and visit the library during open hours: Monday, 3 to 6, Wednesdays 3 to 8, Thursdays 10 to 6 and Saturdays 10 to 12.

## Idaho Economic Advisory Council to Meet in Lewiston

The Idaho Economic Advisory Council will meet in Lewiston July 10 and 11 at the Lewiston Grand Plaza Hotel.  
During the two-day meeting, the council will review requests for Idaho Community Development Block Grant (ICDBG) funds from Twin Falls, Ashton and Rexburg.  
The City of Twin Falls is requesting \$500,000 to construct streets and extend sewer and water lines to Clear Shield, a plastic utensil manufacturer, creating 75 jobs for area residents. The Council will also hear requests from the City of Rexburg (\$500,000) to construct streets and extend sewer and water lines to a new 130,000 square foot manufacturing plant for Wilcox Potato Processors; and, a \$500,000 request by the City of Ashton to complete its downtown revitalization efforts.  
In addition, the council will hear an economic overview of north central Idaho as well as an update on the Lewiston area's Vision 2001 plan. The schedule also calls for an area tour that includes properties owned by the Nez Perce Tribe of Idaho and the Port of Lewiston.  
The Idaho Economic Advisory Council—a six-member, private-sector advisory board appointed by the governor—reviews potential project requests and forwards their funding recommendations to the office of the governor.  
Idaho citizens serving on the council include Dana Magnuson of Kendrick; Paul Anderson, Coeur d'Alene; Gary Mahn, Boise; Jack Shaver, Poacello; Clay Condit, Arco, and Con Paulos, Twin Falls.

name Army Hospital, located in underground tunnels in North Vietnam. Dr. Cao Dai's staff was responsible for killing 14-18 elephants per year. This was the only source of protein for the hospital. Because Le was a good surgeon, his job was to carve up the slaughtered elephants. Because of the size of the carcass, he sometimes worked from the inside of it; also, he didn't have a large enough surgical saw to carve effectively from outside the carcass.  
In a November 1997 book, authored by James Zumwalt and published by Harper and Row, an entire chapter is devoted to Dr. Cao Dai's medical duties during the War. He did surgery on two severely wounded U. S. Army enlisted men who stumbled into the hospital. Both survived. One was PFC Jimmy C. Alexander, U. S. Army, Service No. 54510901, date of birth January 7, 1947.  
I visited with Dr. Cao Dai in Washington, D. C., on June 19. He wants to know if Jimmy Alexander, now age 50, is still alive. He wants to have a reunion. Can your readers help? I have been advised to surf several of the missing persons files on the internet. Even so, I don't have a computer terminal. If any readers with internet access can help, I'd appreciate a call at 208-882-3087.  
Thank you so very much for your consideration.

O'Brien won the gold medal in the decathlon at the 1996 Olympics at Atlanta, Georgia. He is considered by many to be the world's greatest athlete.

Baker, a veteran of World War II, was presented the Medal of Honor in January by President Clinton, after a 1996 study determined he and six other black soldiers should have received it for their heroism, and were denied because of their race.

Other Idahoans selected for the Idaho Hall of Fame are: Terrel Bell, Commissioner of Education under President Nixon and Secretary of Education under President Reagan.

The late Ezra Taft Benson, U. S. Secretary of Agriculture from 1952 to 1960 under President Eisenhower. He later became president of the LDS church.

Mary Thomas Brooks, director of the U. S. Mint from 1969 to 1977. She was the only woman in the Idaho State Senate from 1964 to

more than save our highways. It also provides jobs and costs significantly less than replacing the pavement.

The placement of a seal coat over old pavement keeps water out of cracks in the road's surface, preventing damage when water freezes, expands and turns a hairline crack into a full-blown pothole. Seal coating also prevents erosion to the road surface due to weather, and the crushed rock aids vehicle traction.

This preventive maintenance provides a new driving surface. The money it saves is another benefit.

"Seal coating means a savings to the taxpayer since it postpones the need to replace old pavement and is only a fraction of the cost of pavement replacement," said Jimmy Ross, chief engineer for the Idaho Transportation Department.

Seal coating costs during 1996 averaged about \$11,000 per mile, compared to a cost of \$500,000 per mile to reconstruct the pavement.

At current costs, seal coating every mile of Idaho highway would cost \$2.44 billion less than replacing the pavement.

Seal coating is performed by private contractors, creating additional jobs for Idahoans each year.

This summer, about 500 miles of roadway will be seal coated. The hazards to motorists driving through seal coating areas, such as loose rock, oil and heavy machinery. To prevent damage to your vehicle and those around you, warning signs and reduced speed limits should be obeyed at all times.

"Regardless of the normally posted speed of a highway, during seal coating operations the speed limit is reduced to at least 35 mph, and sometimes lower if necessary," said Bryon Breen, assistant maintenance engineer for the transportation department.

Seal coating operations now use smaller rocks than before, which provides greater protection against such hazards. However, "If motorists drive too fast through a seal coating area they can send rock chips flying, damaging vehicles and windshields," Breen added.

Traffic delays due to seal coating, when necessary, usually only last five to 10 minutes.

Roy and Donna Syverson were Sunday dinner guests of Troy, Melissa and C. J. Syverson. Friday night they had attended the fireworks display at Elk River.

Roger and Sue Syverson returned Thursday from a two week vacation to Minnesota where they visit with relatives and friends.

Jenelle Cannon of Spokane, the granddaughter of Mr. and Mrs. Walt Locktef arrived Friday for a work's visit at the Locktef home. All at-

tended the fireworks display at the Dave Wilkens home Friday eve. Elmer and Thelma Cuddy attended the 80th birthday party for Jim Cuddy at Coeur d'Alene, then drove on to South Dakota for a visit. On the return trip they stopped at the home of Elmer's sister Wilma Watson at Drego, Idaho and arrived home Saturday. Monday, Art and Arlene Garner, son Gordon and grandson Jason Callahan, and Gordon's daughter Trista, all of Pocatello visited and stayed until Saturday.

Friday evening guests of George and Delores Lyons were Dorothy and Scott Plank and Randi Grant, Lisa and Cameron Walker and Joey Fey, who spent the weekend.

Clem and Flo Lyons attended a wedding shower for Ronda and Mark Hutcheson Friday and then drove to the home of Pete and Orita Stuart at Fraser where they spent the night, returning home Saturday.

Bill and Darleen Wilson attended the fireworks display at Elk River Friday night.

June 28th family members enjoyed a day of visiting at the home of Cecil and Jo Brammer. Attending this year were Harold and Beth Pressnall from Milton-Freewater, Oregon, Lloyd and Amy Farrington of Kendrick, Tom and Carole Rogers, all of Lewiston, Dan and LuAnn Griffith and family from Spokane, Russell and Suzanne Brammer and Gary Brammer, all of Kendrick.

On June 29th, Janet and Kirk Miller and family of Eagle, Idaho arrived to visit a few days with the Brammers. Linda and Mark Hynd-

man and family from Roberts, Idaho stopped by for a short visit on July 1.

**Visited Ireland and Germany—**

Granny Holt returned Tuesday, July 2 from a 14-day trip to Ireland and Germany. To say it was "green" was an understatement. They saw many cathedrals, castles, ruins of castles, but what impressed Granny the most was the neat, verdant crops of barley, wheat, sugar beets, and corn, and of course the vineyards. Weeds were a rarity in crops and on field edges. She accompanied David and Eileen Ball on the tour and in Germany they were guests of Jim and Stephanie Robbins and daughter Erika at Wurtzberg. Stephanie is a granddaughter.

Friday Granny joined the Steve Holt family and attended the annual Cuddy 4th of July picnic at Coeur d'Alene. They were guests of David Harris and Amy Lynn and Keith at Post Falls.

Tuesday morning the Davis children played at Granny Holt's home.

**Dispelling Myths About Social Drinking**

Enjoying wine, beer or spirits is a common activity in many social situations. While alcohol can be viewed as a good way to relax and unwind, it's important to note that behavioral influences play an important role in determining how much alcohol a person consumes and its subsequent effect on activities and emotions.

"Alcohol is a social lubricant," explains Dr. Alan Marlatt, professor of psychology and director of Addictive Behaviors Research Group at the University of Washington. "A person's drinking behavior is motivated to a large extent by social anxieties and psychological expectations."

To help gain an understanding of alcohol in social settings, Marlatt, who has conducted extensive research on social drinking, provides insight into some commonly held beliefs about alcohol consumption.

**Myth #1: A person is more likely to drink when socializing with close friends**

Research has found that people consume greater amounts of alcohol at times when they feel uncomfortable or anxious. So, while you may have a drink when among friends, you'll probably drink more when among a group of people you don't know very well—especially if they are also drinking.

"Men and women who attend a social event where they don't know anyone tend to go right to the bar and order a drink," Marlatt points out. "Social anxieties motivate certain people to drink more than others."

**Myth #2: A person who drinks will be more sociable than a person who doesn't**

While a drink or two can help an anxious person feel more relaxed, alcohol alone does not make a person more attractive, interesting or

While a drink or two can help an anxious person feel more relaxed, alcohol alone does not make a person more attractive, interesting or witty.

"People have strong beliefs about how alcohol changes behavior," Marlatt says. "We've found that people's beliefs about how they appear while drinking differ from the perceptions of others around them."

For example, Marlatt says that men may think they're more attractive after having a few drinks. Yet when women are asked about these men, they don't agree.

**Myth #3: People who drink can't help how they act.**

While alcohol can have physical and emotional effects, Marlatt explains that a person's reaction to drinking are equally controlled by psychological perceptions.

In a study by Marlatt, young male drinkers were given drinks they thought contained alcohol, but, in fact, did not. As the subjects consumed the "alcoholic" drinks, their behavior changed dramatically, becoming more aggressive, loud and flirtatious.

**Myth #4: People feel better if they drink.**

Though drinking provides an initial stimulation to the body, it has diminishing effects over time, including slow speech, reduced coordination and depression.

"People unrealistically think of alcohol as a magic elixir," Marlatt says. "They don't seem to remember the corresponding negative effects that go along with alcohol consumption, such as hangovers and depression."

Being a smart social drinker requires staying in control, setting limits, and realizing how your perceptions and surroundings can affect your behavior.

If you're planning to attend an event where you don't know many people, determine beforehand how many drinks you will have. By drinking slowly and being aware of your surroundings, you can stay in control and not feel easily swayed into drinking more than you normally might.

"A good social drinker is knowledgeable about alcohol," Marlatt stresses. "You know your limits, you know to eat before you drink, and you know that consuming alcohol is not going to change you into a better person."
